Wyrill, M., jun. (Richmond)
Yorke, Hon. E. T. (Cambridgeshire)
Young, Sir John, Bart. (Cavan, Co.)

[Three members who have died since the election—Messrs. Duncuft, Grainger, and Watson,—are not included in the list.]

GENERAL REMARKS.

The number of constituencies is 374, and there were 213 contests, viz., 25 in English counties, 2 in Welsh, 4 in Scotch, and 20 in Irish; 131 in English cities and boroughs, 7 in Welsh, 13 in Scotch, 19 in Irish, and 1 in the Universities. The few contests in the counties indicate that the bulk of the landed aristocracy was ranged on one side, and that the question of principle or place in dispute did not deeply interest the rival sections of that body. In Middlesex and Surrey (East), where two of the severest contests occurred, the Ministerialists were defeated more by the exertions of the bulk of the electors, than by the influence of the great landowners.

The contests were not, on the whole, numerous, nor did the electors take a deep interest in them. Taking throughout the largest number of voters for the opposing candidates as representing the total number of voters who polled, it will be seen, that in Bucks, out of a constituency of 5669, only 2656 voted; in Cornwall (East), out of 5694 4784, in Sussex (South), out of 8819, 4644; and in Surrey (East), out of 6118, 4472 voted. In the small boroughs, other than political motives gave activity to elections, and in them, generally, the bulk of the voters went to the poll. In the large boroughs, the number of voters who polled was comparatively a small part of the constituency, as the following examples will show:—Finsbury polled 6814 constituency, 20,288; Greenwich polled 4431—constituency, 6208; Lambeth polled 8881—constituency, 18,131. Liverpool polled 11,7 constituency, 17 111. London polled 2000—constituency, 2,000. Manchester polled 11,175—constituency, 13 221. Glasgow, polled 5548—constituency, 15,330. It says very little for the public spirit of Liverpool, that two Ministerialists were elected for that borough, while more than 5000 voters were unpolled. Manchester is remarkable for the comparatively large proportion of voters who took part in the election. In Ireland there was more excitement than in England, and larger proportionate bodies of the constituencies went to the poll. In Scotland the contests were too few to require many remarks. Ayr was unexpectedly contested at the last moment, and a

good, though unsuccessful, fight was made in favour of Mr. Cardwell, who had just before been defeated in Liverpool; and at Wick a contest unexpectedly terminated in defeating the gentleman who had long sat for the united boroughs on the interest of the Duke of Sutherland. On the whole, the contests were not spirited nor severe, and the comparatively small number of electors who took part in them is a significant fact, both as indicating the character of the present elections, and as bearing on the proposition for the extension of the suffrage. Of the persons who have votes a great number will not trouble themselves to give them.

The changes were numerous: 139 members of the old Parliament retired, or were rejected, and 24 members changed their seats. Of the new members introduced, 183 now sit in Parliament for the first time; the remainder have sat in Parliament before, and are marked with two asterisks in the list above. The following is a complete list of the members of the last Parliament who have not seats in this:—

Abby, Sir T N (Lyme Regis)	Hope, A B (Maidstone)
Adair, R S A (Cambridge bo')	Horsley, J (Bickburn)
Alexander, N (Antrim co)	Horsman, E (Cockermouth)
Anderson, A (Orkney and Shetland)	Houldsworth, T (Notts, N)
Anstey, T C (Youghal)	Howard, Hon J R (Malmesbury)
Armstrong, Sir A (King's co)	Howard, P H (Carlisle)
Arundel, Earl of (Lambeth)	Howard, Sir H (Wicklow)
Baillie, H J W (Dorsetshire)	Humphery, J (Southwark)
Bagshaw, J (Sheffield)	Horrison, Sir E (Dye)
Baldwin, C S (Totnes)	Kildare, Marquis of (Kildare)
Barron, Sir H W (Wexford)	Knightley, Sir C (Northamptonshire, S)
Bell, Jacob (Sr. A bans	Lacy, H C (Bodmin)
Bell, Matthew (Northumberland, S)	Lawley, Hon C R (Pontefract)
Bellew, R M (Louth co)	Lennard, T B (Maldon)
Benett, John (Wilts, S)	Lewis, G C (Herefordshire)
Berkeley, Hon Grantley (Gloucester, W)	Littleton, Hon E R (Walsall)
Bernal, Ralph (Rochester)	Loch, J (Wick Burghs)
Best, John (Aldermaster)	Lushington, C (Westminster)
Birch, Sir Thos (Lewes, S)	Mackinnon, W A (Lymington)
Blackstone, W S (Wallingford)	Macnaghten, Sir E (Antrim co)
Blair, Stephen (Bolton)	Macnamara, W N (Clare co)
Blakemore, R (Wells)	M'Clintock, W (Dundalk)
Brewitt, R J (Monmouth)	Mahon, r, V (Tipperary co)
Bowles, Rear Adm (Launceston)	Mahon, Lord (Hertford)
Boyd, Dr John (Colera n)	Mahon, Viscount (Kinsale)
Bridges, Sir Brook (Kent, E)	Manners, Lord C S (Leicestershire, N)
Broadwood, H (Bridgewater)	Marshall, James G (Leeds)
Bunbury, E H (Bury St Edmunds)	Martin, C W (Westmeath)
Bunbury, Captain W M (Carlow co)	Matheson, Col T (Ashburton)
Butler, Pierce S (Kilkenny co)	Melgund, Viscount (Greenock)
Buxton, Sir E N (Essex, S)	Miles, P W S (Bristo.)
Campbell, Sir W F (Cambridge)	Morgan, H K G (Wexford co)
Cardwell, E l d (Liverpool)	Muwa t, Francis (Penryn)
Carew, W H P (Cornwall, E)	Nicol, Right Hon J (Cardiff borough)
Castlereagh, V unt (Down)	Norreys, Lord (Oxfordshire)
Cavendish, W G (Peterborough)	Nugent, Sir Percy (Westmeath)
Chatterton, Col (Cork)	O'Brien, Sir Lucius (Clare)
Chichester, Lord J L (Belfast)	O'Brien, J (Limerick)
Childers, J W (Malton)	O'Connell, Morgan J (Kerry)
Cholmeley, Sir M (Lincolnshire, N)	O'Connor, Fer.us (Nottingham)
Clements, Hon C (Leitrim)	Ogle Sarpie, C H (Northumberland)
Clerk, Right Hon Sir Geo (Dover)	Ord, William (Newcastle-on-Tyne)
Clive, H B (Ludlow)	Oswald, A (Ayr county)
Cochrane, A R W D H (Bridport)	Pagett, Lord Charles (Sandwich)
Coke, Hon E K (Norfo k, W)	Palmer, Roundell (Plymouth)
Colebrook, Sir T E (Taunton)	Parker, J (Sudbe d)
Cole, Thomas (Kin.sborough)	Perfect, R (Lewes)
Collins, Will am (Warwick)	Phillips, Sir G R (Poole)
Copeland, Alderman (Stoke-upon-Trent)	Pigott, W H C (Newport, I. of Wight)
Craig, Sir W G (Edinburgh)	Powell, Rice A (Carnarvon)
Crawford, S arman (Rochdale)	Power, F E W (Herefordshire)
Currie, H (Middlesex)	Pusey, P (Berkshire)
Curteis, H M (Rye)	Rawdon, (Sir Edward)
Damer, Right Hon Col (Dorchester)	Renton, J C (Berwick)
Dawes, Hon Col (Wigan)	Reynolds, J (Dublin)
Dawson, Hon T J (Monaghan co)	Richards, R (Merionthshire)
D'Eyncourt, Right Hon C T (Lambeth)	Romilly, Sir J (Devonport)
Duke, Quintin (Aylesbury)	Romilly, Col (Canterbury)
Douglas, Sir Gnas E (Warwick)	Russell, Lord C S (Tavistock)
Douro, Marquis of (Norwich)	Salomons, D (Greenwich)
Drummond, H H (Perthshire)	Sawley, Col H (Lndlow)
Duncan, Visc unt (Bath)	Sindars, J (Portsmouth)
Dundas, Sir David (Sutherlandshire)	Somers, J P (Sligo)
Ebrington, Viscount (Plymouth)	Somerton, Lord (Wilton)
Edwards, H (Hflax)	Somerville, Sir W (Drogheda)
Elliot, J (Lescester)	Stanley, A dorman (Staffordshire)
Enfield, Viscount (Chatham)	Stanley, Hon A P S (Canterbury)
Estcourt, Colone. (Devizes)	Spearman, H J (Durham)
Evans, J (Haverfordwest)	St George C (Galway county)
Fagan, J (Wexford co)	Stewart, J F (Ennis)
Fitzpatrick, Right Hon J (Queen's co)	Stanley, E (Cumberland, West)
Fordyce, Captain A (Aberdeen)	Stanton, W H (Strond)
Fortescue, Hon J W (Barnstaple)	Staunton, Sir G (Portsmouth)
Fox, S W L (Beverley)	Stewart, Adm H (Greenwich)
Fox, W J (Oldham)	Stuart, Lord P J (Ayr District)
Gore, W R O (New Ross)	Talbot, J H (New Ross)
Grattan, H (Meath co)	Tennent, R J (Belfast)
Greene, T (Lancaster)	Thompson, Colonel (Brad ord)
Greville-Nugent, (Longford)	Thompson, G (Carlisle)
Grey, Sir G (Northumberland, N)	Totten ham, Hon T J (Grantham)
Grey, R W (Tynemouth)	Townley, R G (Cumbridgeshire)
Hall, Col C (Beverley)	Towneley, J (Beverley)
Hallyburton, Lord J (Forfarshire)	Trevor, Hon T (Hertfordshire)
Hardcastle, J A (Colchester)	Urquhart, D (Stirling)
Harris, Hon Capt (Christchurch)	Verney, Sir H (Bedford)
Harris, R (Leicester)	Vesey, Hon T (Queen's county)
Hatchell, Right Hon J (Windsor)	Villiers, Hon F W C (Weymouth)
Heald, J (Stockport)	Villiers, Lord (Worcester)
Heneage, E (Great Grimsby)	Wakley, T (Finsbury)
Henry, A (Lancashire, S)	Walker, R (Bury)
Heyworth, L (Derby)	Watkins, Col J L Y (Brecon)
Hildyard, T B T (Notts, S)	Wawn, J T (South Shields)
Hill, Lord M (Evesham)	Westenra, Col J C (King's county)
Hobhouse, T B (Lincoln)	Whitmore, T C (Bridgnorth)
Hodges, T L (Rochester)	Williams, J (Macclesfield)
Hodges, T L (Kent, West)	Williamson, Sir H (Sunderland)
Hodgson, W N (Carlisle)	Wyld, James, H (Truro)
Hogan, J (Tipperary)	Wyld, J (Bodmin)
Hope, H T (Gloucester)	Young, G F (Scarborough)

Amongst the new members are some notabilities, but the great majority of them have yet their reputation to make. Taking those worth mentioning, alphabetically, Mr. Ball (Cambridgeshire), is a farmer and a Dissenter—an unusual representative of a county; Mr. Alderman Challis (Finsbury), the Lord Mayor for 1853, otherwise a man advanced in life; Mr. M. Chambers (Greenwich), a distinguished barrister; Mr C Duffy (New Ross), the founder and editor of the Nation, an influential democratic paper, published in Dublin; Captain Laffan, Inspector of Railways; Mr. Layard (Aylesbury), celebrated for his excavations at Nineveh; Mr. Lucas (Meath county), editor of the *Tablet*, a distinguished Papal writer; Mr. Miall (Rochdale), the editor of the *Nonconformist*; Dr Mitchell, M.D. (Bodmin), a clever writer, but few gentlemen of his profession ever enter the House of Commons; Mr. Oliveira (Pontefract), connected with Portugal, and active in getting the wine duties modified; Mr. Pellatt (Southwark), a conspicuous Dissenter; Mr. Rolt (Greenwich), a great economist; Sir J. V. Shelley (Westminster), a practical farmer and writer on agriculture; Mr. S. Whitbread (Bedford), a grandson of a celebrated Whig politician. There is, no doubt, much new talent in Parliament, but we must wait for time to develop it.

Amongst the members formerly in Parliament, and now restored to it, Sir E. Lytton Bulwer Lytton (county of Hertford) and the Right Hon. T. B. Macaulay (Edinburgh) are amongst the most conspicuous, and the only ones whom we deem it necessary to mention. The former is the celebrated novelist, who is known to most readers. In former Parliaments he sat as a Whig, and distinguished himself by his writings and speeches in favour of the Melbourne Ministry; he now returns to Parliament a Protectionist and a Conservative. The latter is the eminent historian, poet, and essayist. He was a member of the Whig Ministry, but left it after being defeated at Edinburgh, in 1847. His powerful eloquence makes him a most important addition to the House

Of the members not re-elected, many were unimportant; but amongst them, deserving of mention, are the following:—C. O. Anstey (Youghal), who made himself remarkable by his industry, who was chairman of the Wine Duties Committee, and considered a rising man; Mr. Bernal (Rochester), for many years Chairman of Committees, and much respected; Sir E. Buxton (Essex, S.), the worthy representative of the Anti-Slavery party; Mr Cardwell, (Liverpool), a conspicuous member of the Peel party, formerly Secretary to the Treasury, and one of the late Sir Robert Peel's literary executors; Sir George Clerk (Dover), another conspicuous member of the same party, who, for many years was the chief representative of the Tory party in Scotland, and the conduit of its patronage for that country; Mr. Baillie Cochrane (Southampton), an author, who took up the Greek question on the Tory side; Mr. Sharman Crawford (Rochdale), the advocate of Tenant-right, who was defeated in attempting to get returned for Down; the Marquis of Douro (Norwich), the present Duke of Wellington; Mr. Tennyson D'Eyncourt (Lambeth), an old Liberal-Whig, and the representative of the borough from the beginning of its Parliamentary existence; Lord Duncan (Bath), distinguished by his exertions for the repeal of the Window-Tax; Lord Ebrington (Plymouth), an industrious, painstaking, and independent Whig nobleman; Mr. W. J. Fox (Oldham), the well known public writer and eloquent preacher; Mr. H. Grattan (Meath), the son of the great Advocate of the Roman Catholic claims; Mr Green (Lancaster), the Chairman of Committees under the Tory *régime*; Sir George Grey (Northumberland, N.), Secretary of State for the Home Department in the late Administration; Mr. Hodges (West Kent), who for many years represented that part of the country on the Liberal interest, and ... w retires from public life; Mr. Horsman (Cockermouth), a useful and ... ve Church reformer; Mr. G. C. Lewis (Herefordshire), Secretary to the Treasury in the late Administration, and a political writer of some celebrity; Lord Mahon of Hertford, (R.), an historian, Under-Secretary of State in Sir R. Peel's Administration, and one of the literary executors both of Sir R. Peel and of the Duke of Wellington; Mr. Morgan J O'Connell (Kerry), one of the relatives of the late Daniel O'Connell leaving only one of the family in the House; Mr. J. Parker (Sheffield), Secretary of the Treasury in the late Administration; Mr. Reynolds (Dublin), the late conspicuous member of that city; Sir J. Romilly (Devonport), the Master of the Rolls, removing from Parliament the only Judge who had a seat therein; Mr. Salomons (Greenwich), worthy of note as a member of the Jewish persuasion; Sir William Somerville (Drogheda), Secretary for Ireland in the late Administration; Sir G. Staunton (Portsmouth), a Chinese scholar, and as authority concerning that country; Colonel Thompson (Bradford), an eloquent and consistent advocate of Free Trade—a pithy speaker, and a valuable, if sometimes eccentric representative; Mr. Wakley (Finsbury), formerly a very popular leader, and always favourably listened to in Parliament; Mr. G. F. Young (Scarborough), a well-known and active Protectionist.

The parties which lost by the election were the Whigs, losing eleven seats at least, of whom Sir G. Grey, Sir John Romilly, Mr. Cornewall Lewis, Mr Parker, and Mr. Somerville, were distinguished men; and the Peelites, of whom Mr. Cardwell, Lord Mahon, and Sir George Clerk were the most conspicuous In Ireland the losses of the Whigs were oh efly occasioned by the Roman Catholic priests taking a decided part against them; and, by their influence, Mr. Grattan, who has, with most of the Whigs, the greatest hereditary claims on their gratitude, was ejected from Meath, and Sir W. Somerville from Drogheda.

The parties which gained by the election were the Ministerialists and the Roman Catholic and Democratic party in Ireland. The latter gained eight seats. The Ministerialists gained, and the Reformers gained, but how many votes is at present not known. All extreme opinions seem to have gained, as if men had become less compromising

The Dissenting interest is reputed to be very strong, numbering 36 representatives; united with the Catholics in hostility to the Established Church, though not agreeing on other points, they will form a compact body of nearly 90 members. No opinion seems to have gained a greater acce ssion of strength than that ho-lilty represented by these united gentlemen. Mr. Bright and Mr. Bell belong to the Soc ety of Friends.

The most remarkable contrast of opinion is that between the counties and the towns. The great majority of the members of the former are Ministerialists, Conservatives, or Protectionists. The great majority of the latter, particularly all the representatives of large constituencies, except that of Liverpool, belong to the Opposition, and advocate political improvement. Including, amongst the anti-Protectionists, those who have taken the opposition course to the policy, it now embraces the bulk of the representatives, and it includes the most intelligent and most advancing part of the population

As to the professions of the persons composing the House of Commons, 67 are lawyers and 21 are authors; 127 are connected with the law or have have been educated as lawyers, though only comparatively few actually practise either as attorneys or barristers; 92 persons are connected with trade or manufactures, 20 connected with banks, 22 are leading railway directors, 5 are mine owners, 7 are iron-masters, 9 profess to live in a great measure by their labours; and the remainder may be classed as political adventurers, country gentlemen, and younger members of the aristocracy, who enter Parliament to sustain their family interest, or find an agreeable and useful occupation.

CONSTITUTION OF THE PARLIAMENT.

The total population of the Empire by the last census—which, as already published, is known to be incorrect, and chiefly in omissions—was as follows:—

England and Wales	17,922,760	
Scotland	2,870,784	
Islands on the British Seas ..	142,946	
Ireland	6,515,796	
Total		27,452,262

The number of registered electors is 1,167,466, thus distributed;—

Counties, England	470,791	
Wales	30,438	
Scotland	53,750	
Ireland	139,422	
Total, Counties		694,221
Boroughs, England	383,341	
Wales	41,749	
Scotland	47,854	
Ireland	28,301	
Total, Boroughs		473,245
Total		1,167,466

It appears, therefore, that throughout the empire there is one elector to every 23½ inhabitants; or, excluding Ireland, 1 to every 21. In the divisions, the proportions are different: in the English counties, 1 to every 21; in the Welsh counties, 1 to every 19; in the Scotch counties, 1 to every 23; in the English boroughs, 1 to every 18; in the Welsh boroughs, 1 to every 24, and in the Scotch boroughs, 1 to every 23 Next to Ireland, Scotland has fewest voters in proportion to the people, and Wales has the most.

Excluding the females, represented by their fathers, husbands, or brothers; deducting the children, and adopting the ascertained proportion of males to the whole population under the former census (the returns of ages under the late census not yet being complete), it appears that there are at present about 5,300,000 males of full age in the empire. The number of registered electors in proportion to them is 1 in 5 4-10. If we include double votes, we may infer that there is 1 elector to about 4½ males, or only 1 out of every 5½ is really represented.

The proportion of members to population is—Counties: English, 1 to 67,850; Welsh, 1 to 47,908; Scotch, 1 to 88,421. Boroughs: English, 1 to 22,106; Welsh, 1 to 20 504; Scotch, 1 to 49,395. Leaving out Ireland, the proportion of members to the population of the rest of the empire is 1 to 37,863; and including Ireland, the proportion to the whole empire is 1 to 41,720. The Welsh borough population has the most representatives; the English county population the fewest, even fewer than the population of Ireland, which, on the whole, has 1 representative to 62,055 people.

It must be noticed, too, as to the distribution of members, that the cities and boroughs of England, excluding the completely anomalous Universities, elect 319 members, and they contain a population of 7,140,241. The remainder of the population, 20,310,021, elect 339 members: a minority of the people governing the majority of Parliament.

In all these points we fail to discover any semblance of a system. There is no reason why the borough population should have more members than the county population; or why the borough population of Wales, in particular, should have a greater share of the representation than the county population of Scotland. No reference to property or intelligence can justify the distinction and the preference.

Examined in detail, the Parliamentary representation of the people is discovered to be full of anomalies. The proportion of electors to population, like other parts of the system, follows no rule, either in counties or boroughs. In Hertford the registered electors are as 1 to the population as 1 to 29; in West Kent, 1 to 24; in the West Riding of Yorkshire, 1 to 21; in Warwick, 1 to 15; in East Cumberland, 1 to 14; and in Rutland, as 1 to 12. In Scotland, a few of the proportions are 1 to 128 in Sutland and Orkney; 1 to 122 in Sutherland; 1 to 101 in Inverness; 1 to 41 in Aberdeen; 1 to 33 in Berwick; and 1 to 19 in Selkirk. Amongst the boroughs the disproportions are greater: in Dover the registered electors are to the population as 1 to 10; in Ludlow, as 1 to 12; and in Arundel, as 1 to 13; while in Leeds they are as 1 to 27; Halifax, 1 to 28; Gateshead, 1 to 26; Oldham, 1 to 38; Bradford, 1 to 38; and Dudley, 1 to 41. In Scotland and Wales the discrepancies on this point amongst the boroughs are of the same importance, and not worth detail.

With reference to the distribution of members amongst the counties, we find the following:—

	Population, exclusive of registered owners.	Voters.	Property.	Members.
Rutland	22,983	1,876	128,678	2
Westmoreland	46,458	4 062	221,170	2
Sussex (West) ..	86 526	3,537	293,105	2
Huntingdon	57,594	2,852	294,5 9	2
Worcester (West) ..	61,1 8	4 135	353 565	2
Cumberland (West) ..	66 284	4 144	256 009	2
Northumberland (North) ..	66,758	2 111	485,470	2
Salop (South)	67,608	3 571	444 930	2
Nottingham (South) ..	69 037	3,801	352,307	2
Totals	514 733	30 8o9	2 855 452	18

These nine counties, having a population of 514,733, with 30,647 voters, and rated to the poor at £2,855,452, send 18 members to Parliament; while the West Riding of Yorkshire, with a larger population (794,779), more electors (37,319), and rated to the poor at almost as large a sum (£2,400 871), sends only 2 members. In this case the contrast is not between a town and county population, but between the population, voters, and wealth of certain counties, in all of which it may be supposed that the landed aristocracy have an equal interest; and the result is, that the gentlemen of Yorkshire being nearly equal in point of property with the gentlemen of nine other counties, possess only one-ninth of the power in the legislature which the others possess. Similar discrepancies run through the whole county constituencies, though they are not equally glaring. In such cases, unless the landowners possess property in different counties, they are, like the humblest class of the excluded population, though not to an equal degree, unfairly deprived of their due share of legislative power. Deducting the inhabitants of the represented towns, the counties of England contain 9,770,498 people—average, one member to every 67,850 persons. Seven counties, or divisions of counties—York (West Riding), Lancaster (South), Lancaster (North), Middlesex, Kent (West) Devon (South), Stafford (South), contain 2,557,310 persons—average, one member to every 182,665. Seven other counties, or divisions of counties—Northumberland (North), Cumberland (West), Worcester (West), Huntingdon, Sussex (West), Westmoreland, and Rutland—contain only a population of 378 031, or one member to 27,006. Thus these latter seven counties have, in proportion to their population, nearly seven times as large a share of the representation as the former seven counties. The intermediate counties are all more or less above the average. Durham (North), with a population of 136,843 is the nearest to the mean.

No one of the counties of Wales, in point of population, comes up to the average of the English counties Exclusive of represented towns, the Welsh county population is 473,628; they return 15 members or 1 to every 47,998 persons. Glamorgan, with the largest population, 103,222, sends 2 members; and so does Denbigh, with a population of 75,869, and assessed to the poor at the sum of £243,672; while Pembroke, with a population of 67,711, or only 8158 less, and rated to the poor at the sum of £236,276, or only £7396 less, sends only 1. At the same time, Radnor, with a population of 18,905, and assessed at £83,896, also sends 1. Pembroke is the worst treated of the Welsh counties; and Radnor, in proportion to its population and wealth, has the largest share of the county representation.

Scotland with a county population, exclusive of represented towns, of 1,742,695, returning 30 members, has 1 to every 58,421. Amongst the counties, however, the representation is very unequally divided. Lanark has a population of 165,485, or nearly three times more than the average; and Selkirk has a population of 9809, or only one-sixth of the average: it has, in proportion to its population, seventeen times as much representation as Lanark. Comparing Selkirk with Radnor and Selkirk, each returning one member; or comparing Selkirk and Peebles, having together a population of 20,547, or less than Rutland, with the West Riding of Yorkshire, we see there are discrepancies in the county representation as great between different parts of the empire as in the same parts, and almost as great amongst the counties as amongst the boroughs. Such discrepancies offend the mind, which feels astonished at the two small Scotch counties having as large a share of political power as the West Riding of Yorkshire

Of the Irish county representation we think it needless to say more than a word. The great discrepancies in the property returns inform us that great changes are going on in that country, and what we might now say would be no index to what may be, or what will be.

Coming to the English boroughs, we must take them only in a wholesale way. The Parliamentary paper No. 441, of the last session, supplied on the motion of Mr. Hume, contains a list of boroughs arranged according to their population. The first eight of these, which contain the most population, are the Tower Hamlets, Liverpool, Marylebone, Finsbury, Manchester, Lambeth, Westminster, Birmingham, Southwark, Leeds, Bristol, Sheffield, London, Wolverhampton, Greenwich, and Bradford (Yorkshire). The population of all the registered boroughs of England is 7,140,241; and these eighteen boroughs contain 3 726,856 persons, or more than the half of that population The total registered electors are 385,341; and these sixteen boroughs contain, of the whole, 204,413, or more than half, and they are assessed to the sum of £13 313,770. They elect, however, only 34 members out of the 319 returned by the cities and boroughs; containing more than half the population, and more than half the voters, they have less than one-ninth of the borough representation. At the other end of the scale, where the boroughs of smallest population are placed, some of them having only one member, as marked below, we must take 21 boroughs to have an equal number of members, 34. Thus Knaresborough, Andover, Ludlow, Thirsk (1), Lymington, Leominster, Calne (1), Marlborough, Northallerton (1), Richmond (York), Reigate (1), Wells, Evesham, Dartmouth (1), Harwich, Totness, Thetford, Lyme Regis (1), Ashburton (1), Honiton (2), the smallest borough with two members; and Arundel (1)—in all, 21—return 34 members, like the others, and they contain a population of 97,260; their registered electors are 6221, and the amount of property at which they are assessed to the poor-rate is £324,383. To make the contrast clear, read it thus:—

	Members.	Population.	Regist. Electors.	Property
First Series ..	34 ..	3,726 856 ..	204 413 ..	£13,313 770
Second Series ..	34 ..	97,260 ..	6,221 ..	324 383

This is a contrast between borough populations, having no conflicting interests. One series has only a 73d part of the whole borough population, and only a 62d part of the electors registered in the boroughs; while the other has more than the 26th part of the borough population, and more than half of the electors, and has more than forty times as much property as the other; and yet both have exactly the same amount of legislative power. Why should the second series of boroughs not be practically distinguished by their intelligence—have, in comparison to property, population, and electors, forty times as much power as the first in Parliament? If they were all situated in one province, or part of the empire, such a glaring injustice would not be tolerated for a day. Let us compare the Tower Hamlets with Honiton. They stand thus:—

	Members.	Population.	Registered Electors	Property
Tower Hamlets ..	2 ..	539 141 ..	23 534 ..	£1,374 052
Honiton	2 ..	3,427 ..	287 ..	9 924

Both have the same legislative power; yet one has 157 times as much population, 82 times as many electors, and has property rated to the poor 132 times greater than the other.

In the representation of Ireland, something worse even may be found than the borough of Honiton. Portarlington has only 71 electors; it returns one member, and has, in proportion to its electors, twice as large a share of the representation even as Honiton. For anomalies, Ireland still bears off the palm.

Between these extreme cases there are almost every conceivable variety of disproportions between representatives, population, electors, and property; which would be a waste of space to go over in detail.

In England there are 268 towns, and in Scotland 71, each of which contains upwards of 2000 inhabitants, which have no other share in the representation than as they may have county qualifications. Amongst the former, Birkenhead in Cheshire, and it contains a population of 24,175; and Alston, in Cumberland, 2005 inhabitants, the smallest. Coatbridge, Lanarkshire, with 8564 people, is the largest unrepresented town in Scotland; and Ferryport-on-Craig, Fife, with 2051, the smallest. In Wales there are no unrepresented towns with more than 2000 inhabitants Around the metropolis there are four suburban parishes unrepresented, with population as follows:—Chelsea, 56,536; Kensington, 46,053; Hammersmith, 17,760; Fulham, 13,886: all in Middlesex.

On coming to the end of these brief notices of our system of representation, we are astonished that so anomalous a contrivance is found quite compatible, as is known to every man, with national prosperity and national greatness. The majority are excluded from the representation. The majority of the electors are outvoted by a minority, and Parliament represents only a minority of those who are entrusted with the franchise. Parliament is elected by only a portion of the electors. body, which is itself a very unequally distributed fragment of the whole.

AMUSEMENTS, &c.

WELLINGTON DIED SEPT. 14, 1852.—These words, encircled by a device of cypress and laurel entwined, are formed into, and appear on the surface of a HATBAND, and a Shirt Frill, of a new description. The object of the latter, and the design is so far distinct as to present a desirable and consistent appearance on occasion, mourning at the approaching grand public obsequies.

As the invention is the first extent recorded under the new Act which came into operation on the 1st of October the material from which the fabrics are made being the same as that of the Hatband, may be introduced by the patentee in the manufacture of the well-known particulated SILK of S PALMOUT (of which the late Illustrious Chief was one of the earliest patrons).

Armlets are made of Crape, according to the Regulation of the Army, with the addition of the above Device, and it is probable that both Armlet and Hatband may be preserved as a relic by the Soldier and Civilian.

The cost being but a few pence, this tribute of respect is within the means of all, and may be obtained Wholesale or Retail of H. J. and D. NICOLL, Merchant Clothiers and Patent Patentees, 114, 116, 118, 120, Regent-street, and 22, Cornhill, and of all the Agents established throughout the United Kingdom; also of the principal Hatters, Glovers, and Drapers, in Town or Country.

THE LYING in STATE and FUNERAL of the DUKE will occupy several days, during which appropriate PAPERS for the several rooms will be in d by the undersigned HOBBS and HOBBS, at One Shilling each. To be had when ready, at No 17 and 18, HOLLES, Merchant, and ARMY CLOTHIER 25 and 26, 118 119 Regent-street, or 22, Cornhill. Who will also supply, at the shortest notice, Mourning for Gentlemen's Servants, in the livery of the Car. Marshal's this effect, viz.,—Every gentleman attending the Cathedral (not wearing uniform) should appear in Morning Frock Dress."

The Costume for those who are to take part in the Procession may be also obtained here.

COD LIVER OIL.—CHARLES FOX and CO. who devote their greatest personal care and attention to the Manufacture of the article, have just commenced making it from the Cod of the season, and respectfully solicit the attention of Medical Chemists but nearly the whole of the Newfoundland Cod Liver Oil of the last season has passed from the hands of the Wholesale houses, and will be found of the usual fine quality so highly appreciated by the Faculty for its action on the st

STATE FUNERAL OF THE DUKE OF WELLINGTON.

The Proprietors of the ILLUSTRATED LONDON NEWS, anxious to perpetuate, in a manner worthy of the event, this GREAT NATIONAL CEREMONIAL, which, as a demonstration of Funeral Pomp, will surpass everything of the kind that has ever been attempted in this country, have made the most perfect arrangements for Illustrating every incident in the forthcoming Magnificent Tribute to the Memory of ENGLAND'S GREATEST HERO, These Illustrations will appear in a

SERIES OF DOUBLE NUMBERS

OF

THE ILLUSTRATED LONDON NEWS,

During the publication of which,

Large and Magnificent Sheet Engravings

WILL BE PRESENTED

GRATIS TO SUBSCRIBERS.

These Engravings will be executed with the greatest possible care, and will be printed on Extra-fine Paper, to make them worthy of being framed and preserved as lasting Records of this solemn Spectacle. The first of these splendid Pictures will present, in one View, the entire Procession; representing, with the greatest fidelity, every interesting feature and characteristic in the whole *Cortège*; and so arranged as to exhibit, on a large scale, a fine Engraving of

THE PROCESSION TO ST. PAUL'S.

ANOTHER LARGE SHEET ENGRAVING, GRATIS, WILL REPRESENT

THE FUNERAL CEREMONY IN ST. PAUL'S CATHEDRAL.

No Effort will be spared in doing justice to this, the most important and imposing Scene in the whole Ceremony.

The following is a Programme of the most important Subjects chosen for Illustration in the SERIES OF DOUBLE NUMBERS :—

A Selection of characteristic and very curious Illustrations of former State Funerals, including those of Sir Philip Sidney; General Monk, in 1670; and Lord Viscount Nelson, in 1806.

A Series of Views in the Crypt of St. Paul's Cathedral.

A Whole Page, Allegorical Design, by Harvey.

An Original Portrait of the Duke of Wellington, by Salter, the painter of the celebrated picture of the "Waterloo Banquet."

A Fine Engraving from Winterhalter's Picture, "The First of May"—the Duke presenting a Casket to his Royal Godson, Prince Arthur, on his Birthday; memorable as the Opening Day of the Great Exhibition, whence the Casket was purchased.

A SERIES OF PICTURES, REPRESENTING INCIDENTS IN THE LIFE OF THE DUKE OF WELLINGTON :—

The Duke Writing his Despatches.
The Duke at the Horse Guards.
The Duke on the Field of Waterloo.
The Duke Showing George IV. the Field of Waterloo.
The Duke Receiving the Thanks of both Houses of Parliament after the Battle of Waterloo.
The Duke Taking his Seat in the House of Lords as Baron, Viscount, Earl Marquis, and Duke.
The Duke in the Waterloo Gallery.
The Waterloo Banquet.
A Portrait of the Duke's Waterloo Charger, "Copenhagen."

AN ORIGINAL AND LARGE ENGRAVING,

DESIGNED EXPRESSLY FOR THE ILLUSTRATED LONDON NEWS, REPRESENTING

THE LAST MOMENTS OF THE DUKE.

This Picture will be one of the most valuable of the Series, as it faithfully represents all the incidents in the "last sad scene;" including

ACCURATE PORTRAITS OF THE PERSONS PRESENT

The ENGRAVINGS more immediately Illustrative of the Funeral will embrace every incident of importance in the Ceremonial, commencing with

The Removal of the Duke's Remains from Walmer Castle.
The Progress to the Metropolis.
The Arrival and Reception at Chelsea Hospital.
A Large Picture of the Ceremonial of the Lying in State in the Hall of Chelsea Hospital.
Royal Visit to the Ceremonial.
Chelsea Hospital to the Horse Guards.
The Horse Guards the Night before the Funeral.

The progress of the Funeral Procession through the Metropolis will form the subject of a Series of more than Twenty large Single Page and Two Page Engravings, each representing an Episode in the Ceremonial, in addition to the local interest belonging to the spot from which it is taken: the whole on a large scale, and presenting the most interesting features of the Procession. Among these Views will be found—

The Funeral Car.
The Marshalling of the Procession on the Parade Ground.
The Arrival of the Waterloo Chelsea Pensioners—83 Veterans.
The Austrian, Russian, Prussian, Spanish, Portuguese, Belgian, Dutch, and Hanoverian Deputations.
The Deputation of the Houses of Lords and Commons.
The Deputation from the Universities of Oxford and Cambridge.
The Heralds.
The Artillery and the Military Cortege.
The Procession in the Mall of St. James's Park.
The Procession Defiling before Buckingham Palace.
The Procession on Constitution Hill.
A Bird's-eye View from the Top of St. George's Hospital; including Apsley House, Hyde Park Corner.
The Chief Mourners.
The Royal Carriages.
The Procession Passing the Green Park, in Piccadilly.
A Scene in St. James's-street, and a View of the Old Palace.
The Procession Passing the Athenæum and Senior United Service Clubs.
The Scene at Trafalgar-Square.
The Procession Passing Somerset House.
The Procession in the Strand, near St. Clement's Church.
The Reception by the Lord Mayor and Civic Authorities at Temple-Bar. The Civic Deputation.
Scenes in Fleet street and Ludgate-hill.
An Extra Large Illustration, representing the Reception of the Funeral Cortege at the West End of St. Paul's Cathedral.

The Illustrations within the Cathedral will comprise, in addition to the Large View presented Gratis,

A Splendid Engraving of the Procession in the Nave, showing the Arrangement of the Spectators on either Side.
A Scene from the Crypt, representing the Lowering of the Coffin to its final Resting-place.
Firing the Minute Guns at the Tower.

An ORIGINAL FUNERAL MARCH, by Sir HENRY R. BISHOP, will be included in this series of DOUBLE NUMBERS, with a variety of Engravings, illustrating every Incident, Episode, and Characteristic of this GRAND NATIONAL CEREMONY; accompanied with Original Articles, on the Character and Career of the Duke, and a complete History and Report of the Ceremonial.

THE ILLUSTRATED LONDON NEWS

No. 589.—VOL. XXI.] SATURDAY, NOVEMBER 13, 1852. [TWO NUMBERS, 1s.

WELLINGTON'S WORK: HAS IT BEEN NEUTRALISED BY THE REVIVAL OF BONAPARTISM?

An accidental coincidence will present to the eye of History the death of the illustrious conquèror of Napoleon as contemporaneous with the elevation to the Imperial throne of his nephew and successor. In this restoration of Napoleonism, some English publicists perceive a reversal of the great work which made the Duke of Wellington so famous; while, on the other side of the Channel, there are not wanting those who appeal to French vanity, and call the event a "retribution." On the other hand, so much of authority as there may be in a public declaration of Louis Napoleon Bonaparte, is arrayed on the side of a different solution of the difficulty: for he has said, in his recent Message to the Senate, that, in proposing to make him Emperor, "the people nobly avenges its reverses (of 1814-1815), without making victims—without threatening any independence—and without troubling the peace of the world." The subject is one on which there are opinions the most opposite. By one class of thinkers, the new French Emperor is regarded as a crafty and perfidious man, who meditates a resumption of the old ambitious designs of his uncle; while another—but a less numerous class—place reliance on his reiterated assertions, and look upon him as the Napoleon of Peace. Upon the career of the late Duke of Wellington, the question has a direct bearing; inasmuch as it has gravely been held to involve a disturbance of that great European settlement which was mainly his work, and which was ratified by the Treaty of Vienna.

The great military exploits of the Duke of Wellington would not lose their lustre, if the result of an investigation were to establish that the restoration of the Napoleon family to the throne of France, is virtually an abrogation of the treaty of Vienna. Still would he continue to be the admired of soldiers for the profound genius of his Peninsular tactics; still would the student of contemporary history find cause to respect the high moral purpose that sustained him throughout the struggle, and the consciousness of rectitude that steeled him against foreign enmity and domestic detraction. But mankind, however little their practice may accord with true ethics, will persist in judging from results, rather than from motives; and the universality of the Duke of Wellington's reputation might suffer, were the opinion to take root that all his victories, all his stern and steadfast strivings against the hollow but desolating tyranny of the elder Bonaparte, had been in vain, for that another of the race had come after, and scattered to the winds the laboured fabric of European restoration. We do not say that this would be a just decision, but that it would be one easily adopted by the mass of mankind; and it is, therefore, of some importance to ascertain on what grounds it could ever be arrived at.

The settlement of European affairs, at the Congress of Vienna, administered to the French nation, to use the Duke of Wellington's own words, "a great moral lesson." For some years prior to the close of the last century they had spread the terror of their arms over Europe -the fanatics of revolutionary propagandism. For many years after the commencement of the present, that military crusade had been converted into an instrument of the inordinate ambition of one man. The "great moral lesson" was offered, at least in so far as England was concerned, not to the revolutionary propagandists, who had long since spent their force and abandoned their fanaticism, but to the nation which rendered itself the accomplice of the rapacity of a military chieftain, and paid itself in plunder and false glory. The punishment inflicted on that nation consisted, not in the restoration of the Royal line it had rejected at the Great Revolution, but in the restitution, to their legitimate owners, of those kingdoms, provinces, and minor trophies of conquest, by which the French had been bribed, through their national vanity, to aid in a system of universal spoliation and tyranny. To restrain France within her natural boundaries, and to provide guarantees against future outbreaks of the spirit of rapacious conquest, was the avowed aim of the Sovereigns and delegate of Sovereigns, who met at the celebrated Congress of Vienna. We do not say that some of them were not actuated by motives of a lower order: that in the breast of one Monarch, revenge—and in that of another, a hatred of freedom, did not inspire a wish for still more stringent and reactionary measures. If

RE-ESTABLISHMENT OF THE FRENCH EMPIRE.—SITTING OF THE SENATE.—(SEE NEXT PAGE.)

history did not attest the existence of such feelings and motives, the subsequent conduct of those Sovereigns, and their successors, would prove that they hated the Revolution even more than they hated France; and 'that, if they had dared, they would have suppressed the last guarantees of constitutional liberty. It was the noble example and influence of England that averted an evil which would have been the fruitful parent of still greater evils. England had earned the right to mediate, to moderate—in some respects even to dictate; and England, at that epoch, was animated by the just, magnanimous, and politic spirit of Wellington. It was Wellington who respected the genius of Bonaparte, and was not revengeful towards him, but only sternly opposed to his system; it was Wellington who restrained the reactionary and retaliatory spirit of the triumphant Kings—triumphant mainly through his exploits and large-minded sagacity: for Wellington better knew than they their real mission. He knew that the first Revolution, however disgraced by crime and folly, had been in some sort a necessary consequence of a tyranny whose insolence had culminated as its forces had decayed; that the original Propagandist wars were the impulse of a fanaticism for which there lay some excuse in the intensity of its faith; that the duty of the Allied Monarchs, the congregated judges, was not so much to punish as to restrain, and to find guarantees against future aggression. Wellington's view of his great work was all along sustained by resolves drawn from the the highest political morality. Neither he nor his nation had any revenge to gratify; they had conquered their great antagonist, and thereby desired to complete eho work by paralysing the system that had made him dangerous.

And has this effort hitherto succeeded? Have the French people, during the thirty-seven years of peace from international wars given to Europe by Wellington—have they sought, at any period, to resume their iniquitous career of aggressive conquest? We do not speak of extra-European wars. England herself has waged war in many parts of the world since then; and Russia has sustained a protracted and not wholly unsuccessful contest, of which the object has been to extend her Asiatic territory. Of the old Napoleonic spirit of barefaced aggression—of the seizure and invasion of friendly or neutral states, on pretexts insultingly flimsy; of the insolent dictation to continental Powers, which, as much as even the wars of Napoleon, aroused the instincts of mankind against him—of these, the ancient vices of the French, has there been a fresh eruption? France has passed through two violent popular revolutions since the Peace of 1815. Did the Government of Louis Philippe inaugurate the new dynasty by aggressive wars? Did the Provisional Government of 1848—a more dangerous authority, because of more purely democratic origin—proclaim a new crusade of Republicanism in Europe? No; to the eternal honour of Lamartine be it recorded, that the earliest use he made of his Dictatorship, and of his official authority as Foreign Minister of France, was to issue a manifesto to all the nations of the Continent, in which, on behalf of the French people, he repudiated that insane lust of military aggression—those mad maxims of national vanity, which were instantly ascribed to them by the guides and exponents of public opinion, and by none more so than those of this country. That declaration—that solemn engagement entered into in the very heat of triumphant revolution by Lamartine—has never yet been treated by a French Ruler, Minister, or Diplomatist, as of less than binding force. That manifesto expressly recognised the treaty of Vienna, and the European settlement, of which it was the attestation and the guarantee. It also expressly bound France to adhere to the new international law of Europe—that no one State has a right to interfere in the purely domestic concerns of another State.

Then what is there in this coincidence of the death of Wellington with the re-crowning of Bonapartism? A dramatic unity: no more! Wellington's work remains undisturbed; and the territorial arrangement of Europe rests on the basis of the settlement of 1815. We deal only with known facts, not with the secret resolves of this or that ambicious or unprincipled ruler. Admit that those resolves exist, and the history of thirty-seven years, the foreign policy of the elder and younger Bourbons, of the Republic, and of the two Dictatorships, supply us with this grand moral,—that the aggressor, who first draws the sword for European conquest, will be suicidally in the wrong, condemned by all known law, human and divine.

So far as to the territorial question. Thirty-seven years of peace have borne testimony to the wisdom of Wellington at the crisis of 1815, in so far as he influenced the deliberations and conclusions of the Congress. His prowess had secured an European restoration; his politic magnanimity had contributed to give it stability. The same exalted morality that nerved him for the struggle and sustained him in the strife, tempered his natural exultation in the moment of victory, and inspired him with an heroic prudence. His work remains unassailed, at least from the side whence he expected the assault. The treaty of Vienna has been infringed, it is true, but not by France; and it does not come within the scope of our inquiry to discuss the excuses offered by Russia and Austria for the part they have taken in abrogating some of the minor provisions of that great compact. As a territorial settlement, it still remains in full force.

So that, even taking the present aspect of things at its worst, supposing the improbable contingency of a reversal of the settlement of 1815; assuming, with our alarmists, that there was something more than a mere rhetorical flourish in the boast of Louis Bonaparte to the Assembly that among other things he represented "a defeat," and that the leashed legions of France are once more to be let loose upon Europe; admit the still more improbable contingency of success to that iniquitous crusade: yield even all these suggestions to that calculating fear which ever broods upon the past and ignores the present—and we still have left to us one part of the great work of Wellington that is indestructible. Treaties might be torn and scattered to the winds; thrones might be shattered, as they were before; the whole social system of Europe might again upheave, its eruptions spreading havoc and ruin around; kingdoms might be parcelled and boundaries effaced; Kings might be driven into exile, the sufferings of Royalty insulted, the rights of the people trampled on: all these crimes might once more be re-enacted, on a scene that has witnessed them, and always from the same nation, too frequently already; and yet, even in the very depths of their depression, and in the desolation alike of their rights and of their hopes, there would still remain to mankind the consolation, that if wrong can reproduce wrong, so can right restore right; that the great work wrought, not so much by Wellington the man as by Wellington the embodied British character, would certainly be accomplished again, and that there is never room for despair so long as the principles of honour and justice retain their vitality in the constitution of man. In this spirit, then, we may say, that even were all the material form of Wellington's work to be destroyed, still Wellington would not have lived in vain; for he provided liberty with a history, and patriotism with a creed, and gave Europe thirty-seven years or the most fruitful and beneficent Peace yet recorded in the annals of mankind.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent.)

PARIS, November 10th.

"L'Empire c'est la Paix!" *peut être*, we shall see; but certainly it is not *la tranquillité*. What movement; what excitement; what "Maygames, wakes, Whitsunales; what dancings and concerts; what puppet-shows, hobby-horses, tabors, bagpipes, balls, barley-breaks," are preparing for this sad Empire, it passes our dazzled wits to imagine or describe.

All on the surface is smiling—nay, laughing aloud; all bears a holiday aspect; the streets swarm with *flâneurs* of both sexes, all ages, and various nations. The shop windows glitter with rich stuffs, with jewels, embroideries, with porcelain; with nicknacks, such as Paris glories in inventing; with fineries of women's gear; and, as is now the fashion, with fineries of men's. The shop of the tailor Dusautoy, on the Boulevards, rivals the most brilliant *Magasin de Nouveautés* ever frequented by the ladies of Paris or any other place: such embroideries, such braiding, such gold and silver, and splendours of all descriptions for senators, for soldiers, for sailors, for *civilians* of both orders and *officiers* of that: in short, for everybody who thinks he would look well in a uniform, and therefore sets to work to find out he has a right to wear one—a process which invariably terminates successfully. His mother's half brother had a great wish to serve in Algeria, at the most fiery epoch of the war. His grandfather, if he had had the money, would have helped to freight a vessel to aid the escape of Napoleon from St. Helena. Perhaps even he himself had cried "*Vive l'Empereur!*" at the entry of the President into Paris; not on the Boulevards, where nobody did cry, *bien entendu*; no, that would have been a want of modesty it would have rendered him too conspicuous; but in the Faubourg St. Antoine, where they did cry, he nearly screamed himself hoarse. Who, then, can say he has not a right to appear in a uniform *quelconque*?

Louis Napoleon intends visiting in state several of the principal theatres; and they, of course, are preparing for the occasion. The Italian Opera is to perform a *cantata*, written by M. Méry, and composed by M. Fontana, a favourite pupil of Donizetti. The Opéra Comique has a similar intention, and the Opéra National follows in the wake. The Odéon is to declaim an ode; and the four *théâtres de vaudeville* have, it is said, the intention of uniting their forces to offer a representation, in which each troupe plays a piece from its *repertoire*.

The representation of "Moïse" at the Grand Opera, on Friday night, was a sort of epoch in the musical world. The *chef d'œuvre* of Rossini, which for so many years has only been given mutilated, piecemeal, cut up into *specimens*—was there given intact, and the success was such as the occasion merited.

In preparation for some of the public *fêtes* of the ensuing winter, the Hôtel de Ville is about to open two new *salons*, which are to be decorated by the pencils of MM. Ingres and Eugène Delacroix. The former is to paint on the walls and ceiling of one of these apartments the apotheosis of the Emperor; the works of the latter are not, we believe, confined only to the other *salon*, but are to appear in various parts of the building.

A tragedy has been written by M. Latour-Saint-Ybars, which is to appear at the Théâtre Français, and in which Mdlle. Rachel has accepted the first part. The work is highly spoken of for the strength of the composition, and the beauty of the language.

A work, which promises to have a brilliant success, and a widely-extended circulation, has just appeared, from the pen of M. Edmond Texier. The subject is in itself one of a class calculated to command both a local and a general interest: but this is only the first element of success; behind remain those of style, research, accuracy, and variety; and all these the book possesses in an eminent degree. It is entitled "Tableau de Paris," which it represents in every possible phase, as seen every day by the observant eye, every night by those most deeply initiated into its darkest mysteries. No aspect is left out, no class undescribed, no scene passed over in silence. From the blazing bazires, the glowing atmosphere, the frantic mirth, the wild, phrenzied life of the *bal de l'Opera*, to the gloom, the chilly damp, the creeping silence, the consciousness of Death's presence, of the Morgue; from the boudoir of the *petite maîtresse* to the naked garret of the starving *ouvrière*, from the *Marquise* to the *grisette*, from the Senator to the *gamin*, all are touched with vivid and *finesse*, and an appreciation of their peculiarities, that render the work one of an interest for an originality rarely met with. The pencil of the artist adds its attractions to the book, and most of the scenes described are delineated with considerable skill and vigour

M. de Lamartine has just published the seventh volume of the "Histoire de la Restauration," and the eighth and last is now in the press. The *Assemblée Nationale* publishes from the work a series of extracts, full of interest.

The death of the Duc de Leuchtenberg has produced a certain sensation here; and already has a suggestion been raised respecting his widow, as a *parti* for the future Emperor. "The funeral baked meats' are not even allowed to become cold to "furnish forth the marriage tables."

An anecdote from the court of the Emperor Soulouque:—The Emperor Soulouque, like other Emperors, has his imperial guard to attend his imperial person, which said troop is furnished from the *élite* of his subjects. A French traveller recently visiting his regions, was struck with admiration and interest the manœuvres of this chosen band, observed that each officer bore on his head-dress a glittering badge, which, no doubt, thought our voyager, was some order of distinction. Desiring to study the decoration more closely, he contrived to get near one of the individuals thus favoured, and on a brazen plate read this interesting inscription: "Martin, Marchand de Sardines *à la* Rochelle." A certain number of boxes of cured sprats had found their way, doubtless, in some French vessel, to the dominions of the Emperor, who hadthas employed the labels.

As may be supposed, a most bitter feeling exists on the part of Jerome Bonaparte and his family at their not being placed in the *Senatus Consulte* as the heirs presumptive to the Empire—a position which they were given to understand they were to occupy. The question was long and warmly discussed at the meeting of the Senate, and the point decided by one single vote forming the majority. It is, of course, owing to this that Jerome has resigned the Presidency of the Senate.

The point respecting the necessity of each of the members of the Bonaparte family obtaining the consent of the Emperor to his marriage, is another cause of extreme dissatisfaction. In fact, a general dissatisfaction is to be naturalized on the part of the *branche cadette*.

A strong degree of excitement reigns among the French Protestants on the subject of the late persecutions in Tuscany, and some most admirable discourses have been delivered from the pulpits of various churches of the *Eglise Réformée*, all as remarkable for moderation and Christian forbearance, as for earnestness and force. In the former particularly, they present a striking contrast to some of the Roman Catholic organs. The *Univers Religieux*, for example, strongly approves the brutuess of the Grand Duke, trusts the Protestant deputation sent to him will be treated as it merits; that is to say, with harshness and contempt; and, in short, goes with a tissue of arrogance, intolerance, and bumo ogotry, we could hardly have anticipated as appearing in the public press, in the nineteenth century.

Abd-el-Kader has returned to Amboise, there to remain in perfect liberty until the *fêtes* celebrating the proclamation of the Empire, at which he is to be present.

The proceedings in the French Senate have had reference exclusively to the approaching re-establishment of the Empire. The Senatus Consultum, which, with the exception of one note, has been unanimously agreed to, confers upon Louis Napoleon the right of adoption, and moreover gives him the power of settling, by an organic decree, the order in which the different branches of the Bonaparte family are to be placed with a view to succession. The proposition to be presented to the sanction of the people is to be in the following form:—

> The people desires the re-establishment of the Imp rial dignity in the person of Louis Napoleon Bonaparte, with right of succession in the line of direct, legit mate or adoptive descendants; and gives to him the right of regulating the [illegible] succession to the throne in the Bonaparte family, as is provided by [illegible] Senatus-consult of the 7th day of November, 1852.

This *plebiscite* is to be accepted or rejected on the 21st of November.

BELGIUM.

Some excitement has been created in Belgium by the introduction by the Government of a Bill for the punishment of press offences towards foreign Governments. On Tuesday afternoon it was laid before the Chamber of Representatives. After some preliminary business had been disposed of, M. Faider, the new Minister of Justice, ascended the space of pulpit appropriated to speakers, and announced that he was authorised by his Majesty to present a bill for the punishing of outrages on foreign Sovereigns or heads of Governments. The bill, or project of law, provided that any one found guilty of outraging, by means of the press, images, engravings, &c., the persons of foreign Sovereigns, or the heads of Government, should be punished by an imprisonment not exceeding a term of two years, and by a fine not exceeding 5000 francs (£200.) It was furthermore provided that the plea of having merely reproduced anterior publications, &c., cannot be admitted in justification, or in extenuation of the offence; that the prosecutions are to take place at the formal demand of the diplomatic agents of the foreign Governments complaining of any attack or outrage; that the trials are to be regulated according to existing laws—that is to say, in other words, that press offences will still be tried by jury; and that the press law of 1816 is abolished. In the preamble to the bill (*exposé des motifs*) it is set forth that the law of 1816 was virtually declared defunct by recent verdicts of juries; and that a law punishing outrages on foreign sovereigns is an international necessity, a law based on national right and one admitted by even the greatest nations of antiquity as well as of modern time. It was stated that the Belgian Government could not and did not undertake to prosecute *ex officio*, and consequently that the complaint must emanate from the Government considering itself outraged; the prosecution to begin within three months of the alleged offence.

AMERICA.

By the United States mail steam-ship, the *Baltic*, which arrived in Liverpool on Wednesday, we have an interesting account of the funeral of Daniel Webster, whose remains were conveyed to their last resting place, at Marshfield, on Friday, the 29th ult., in the presence of a vast assemblage, who appeared to take a deep and melancholy interest in the ceremonies. The officiating clergyman, the Rev. Mr. Alden, the parish minister, having read an appropriate passage from Scripture, delivered a feeling address, in the course of which he referred to several circumstances which occurred in the death-bed scene of the late statesman, in proof that he whose death they were lamenting had been a sublime illustration of the indwelling and abiding power of Christian faith. "One who knew him," continued the clergyman, "well remarked, 'His whole life has been that of preparation.' Those who knew him best could the most truly appreciate the lessons, both from his living example, in teaching the sustaining power of the Gospel." Before the interment took place, the body was removed to the lawn in front of the mansion, and placed on a bier beneath one of the large poplar trees; and from nine to half-past one o'clock the assembled thousands took a last look. The countenance was serene and natural-like. Two garlands of oak-leaves and acorns, and two bouquets of flowers, were placed on the coffin. Many shed tears and grieved for the loss as of a departed father or dear friend. The funeral procession continued no carriages, nor were there any ladies in its train; but to such a length did it extend that scarcely two-thirds had left the house when the coffin reached the tomb. The burial took place exactly at half-past two o'clock, when an eloquent prayer was offered by the same clergyman. The funeral was attended by at least 10,000 persons, among whom were General Franklin Pierce, Governor Marcy of New York; the Hon. Abbott Lawrence, the Hon. Edward Everett, the Hon. Charles Ashman, Governor Boutwell, Chancellor Jones, of New York, Judge Sprague, and many other distinguished men; but the only member of the Cabinet present was Mr. Secretary Conrad. The whole of the proceedings are described as having been appropriate, solemn, and affecting. Mr. Webster was buried on his own grounds, by the side of his children. At New York a general feeling of mourning was perceptible; the ships of all nations lying along the course of the north and east rivers displayed their flags at half-mast, and minute guns were fired throughout the day. At a special meeting of the special committees of the Common Council, November the 16th was appointed for the obsequies in the city. Mr. Webster's death had in some degree caused a cessation of political meetings, but all parties were working energetically in favour of their candidates.

PIEDMONT.

The Piedmontese Ministry has been at last formed, in the following manner: Count Cavour, President of the Council, Finance, General Affairs; Count de Boncompagni, Foreign Affairs; M. Rozza di San Martino, Interior; M. Buoncompagni, Justice and *ad interim* Public Instruction; General La Marmora, War and Marine; M. Paleocapa, Public Works.

THE CAPE.

A sailing vessel just arrived supplies us with intelligence from the seat of war to the 11th September, at which date nothing particular had occurred, a slight skirmish or two having taken place to the disadvantage of the enemy. The Fingoe scrub hordes of the rebels continued their marauding practices, though not always with success. An attack upon the Waterkloof was contemplated by the Governor-General. Colonel Mackinnon was about to leave for England; Captain Maclean was to supply the vacancy, who would be succeeded by Major Bissett.

CHURCH, UNIVERSITIES, &c.

PROPOSED REVIVAL OF CONVOCATION.—On Monday afternoon a meeting of the rectors, vicars, and incumbents of the City and Archdeaconry of London was held in the large hall of Zion College, to consider the measures which ought to be adopted in order to give effect to any attempt to revive the active powers of Convocation. The Rev. R. Ruddock, President of the College, took the chair, and, having introduced the subject of the meeting, a warm discussion immediately arose on the question whether the clergymen, members of the College, and favourable to the revival of Convocation, had not been invited to attend. The Rev. Dr. M'Caul, at great length, moved a resolution, "That a report having been publicly circulated that a majority of the clergy of the Church of England and Ireland are desirous that the Convocation now assembled should proceed to business, the President and Fellows of Zion College beg to be permitted to state that they do not participate in that feeling, nor believe that any present or immediate [illegible] existed." The motion was met by an amendment, that the words [illegible] and *die*, which, however, was withdrawn on the intervention of Dr. M'Caul's resolution having been agreed to, the proceedings terminated. On Wednesday a meeting of members of the Church of England took place in Freemasons' Hall, Great Queen-street, for the purpose of adopting an address to the Archbishop of Canterbury on the late solar confession, and on the threatened revival of Convocation." The Lord Shaftesbury in the chair. The meeting was numerously attended, especially by clergymen. Among the speakers were Sir H. Verney, the Earl of Cavan, and the Rev. Hugh Stowell.

A meeting in convocation took place on Friday. The *Globe* says that a very warm, if not an angry, discussion took place, and that it required all the influence of the Primate to keep order.

UNIVERSITY COLLEGE, LONDON.—The Council held their first session for the academical year, 1852-3, on saturday last. Thanks were voted to the Rev. Thomas Dale, Vicar of St. Pancras, for his sermon preached in the parish church in aid of the funds of the hospital on the 31st of October, when the collection amounted to upwards of £100. And Mr. Dale was appointed a governor of the hospital. The following prizes were awarded:—The Fellowships. medals to Mr. Thomas Hillier (river), and to Mr. Joseph S. Gamgee, Surgery, to Mr. William Roberts. The Arnott scholarship in Medicine and Latin, Greek, Mathematics, and Natural Philosophy, to Mr. Henry Power (£50). And Thomas Shadwell Clark, Esq., M.A., has been appointed Professor of English Language and Literature.

UNIVERSITY OF GLASGOW.—The Conservative section of the students have determined to nominate his Excellency the Lord-Lieutenant of Ireland as Sir Archibald Alison's successor in the Lord Rectorship of the University at the ensuing election. His Lordship had a similar honour conferred upon him in 1850, being then elected Lord Rector of Marischal College, Aberdeen.

UNIVERSITY OF EDINBURGH.—The Session for 1852-3 has commenced with the following classes open on Wednesday, viz.:—[illegible] of them [illegible] numerous, a considerable proportion being first year's students. The number of matriculated students enrolled up to Wednesday, including [illegible] 204; in the literary faculty, 370; and in the faculty of law, 19: total, 585.

PREFERMENTS AND APPOINTMENTS.—The following preferments and appointments have recently taken place:—The Rev. George Augustus Sandbury, to the rectory of Westbury; the Rev. F. Kent, to the incumbency of the New Church, Raven-street, Ryde, Isle of Wight; the Rev. T. H. Hopkins, to Wells-next-the-Sea, Norfolk; the Rev. Evan Evans, to Llangeitho, Cardiganshire, the Rev. T. Underwood, B.D., to the incumbency of Chapel Chorlton, near Eccleshall, Staffordshire.

The Rev. Edward Good, late curate of St. Hilda's, Hartlepool, has lately received a testimonial of affection and esteem from several members of his congregation at that place, on his removal to West Boldon, near Sunderland, Durham.

FUNERAL OF THE DUKE OF WELLINGTON.

THE mortal remains of the illustrious Duke were removed on Wednesday from Walmer to Chelsea. During Tuesday and on Wednesday the residents of Walmer and the surrounding district were permitted to pass through the small room in which the Duke expired, and in which the preparations had been completed for the removal of the body to the metropolis. In this room the body of the Duke was enclosed in an outer coffin, covered with crimson velvet. Near the head was placed the ducal coronet, and the pall was so disposed as to permit the public to see the whole of the preparations. The coffin, covered with black cloth, was placed on a low support; and a slight railing, round which candelabra, with immense wax-lights and plumes of feathers, were fixed, prevented the too close approach of the visitors. The room was hung with black cloth, and the light shut out from its single window. The visitors entered by the gateway looking towards the north, and passing through the last living resting-place of the great Duke, found their way out at the southern entrance facing the beach. The number that visited the chamber on Tuesday was about 3000, but more than twice that number must have passed through it on Wednesday. The whole of the visitors were in mourning, and were of very respectable appearance.

REMOVAL OF THE BODY TO LONDON.

The body was removed from Walmer Castle at seven o'clock in the evening, and placed on the hearse by Mr. Holland's men. A great crowd surrounded the gate and followed the *cortège* to the station; the majority being of the better class, and all in mourning. In the mourning coaches that followed the hearse were his grace the present Duke of Wellington, Lord Arthur Hay (a godson of the Duke's), Captain Watts (Captain of Walmer Castle), and other mourners (including Mr. Kendal, the late Duke's valet), besides the official persons connected with the Lord Chamberlain's department. Minute guns were fired from the departure of the procession from the castle to its arrival at and departure from the Deal station. The firing commenced at Walmer, and was taken up by Deal and the other castles on the coast. On the arrival at the Deal station, which was guarded by a detachment of the Rifle Brigade, under the command of Colonel Beckwith, the present Duke of Wellington and mourners were received on the platform by Mr. M'Gregor, M.P., the chairman; Mr. Renshaw, the deputy-chairman; and other officers of the South-Eastern Railway. The Mayors of Deal and Sandwich were also in attendance, with the other municipal officers of their respective boroughs. His Grace and mourners were conducted to a private room, while the necessary preparations for the departure of the train were in progress. The train started from Deal at ten minutes past nine, and arrived at the Bricklayers' Arms Termius at half-past twelve o'clock, where the whole of the committee of directors of the railway were in attendance. A squadron of the 1st Life Guards, under the command of Captain the Honourable Arthur Gore, was formed on the arrival of the train. The hearse was immediately removed from the railway train, a *cortège* was formed, and proceeded at a rapid pace to Chelsea. Notwithstanding the lateness of the hour, crowds had formed at various points between the Elephant and Castle and the Bricklayers' Arms. Several persons of distinction were waiting on the platform. At every station on the road, although the train stopped only at Ashford and Tunbridge, the officials lined the platform, with lamps in their hands. The station at Deal was guarded by a detachment of the Rifle Brigade with arms reversed; and another detachment of the same corps, under command of Captain Macdonald, preceded the funeral *cortège* to the station. At Chelsea the Lord Chamberlain and his staff, and a guard of honour—composed of the Grenadier Guards, and consisting of 150 rank and file, with the regimental colour, under the command of Lieut.-Colonel the Hon. James Lindsay—received the body with every demonstration of respect and ceremonial.

THE LYING IN STATE.

The first public recognition of national regret for the loss of the great Duke of Wellington, was made on Thursday afternoon, in a very graceful manner, by the Queen and the Prince Consort, who, upon the return of her Majesty from opening the Session of Parliament, proceeded to Chelsea College, accompanied by the Princes and Princesses of the Blood Royal, to evince their regard for the memory of the lamented deceased, and, at the same time, to satisfy themselves that every mark of respect in the power of the nation to bestow, had been properly awarded by the authorities. When the Queen entered the old hall, the grandeur of the scene presented is said to have impressed the Royal mind with a feeling of deep satisfaction, which her Majesty did not fail to express in terms of a peculiarly gratifying character, both to the originator of the design, Mr. Cockerell, and to the parties entrusted with carrying out the details. Around the hero's coffin and on either side are arrayed the symbols of greatness which he did so much to establish. The rich armorial bearings and bannerols are there to indicate his own connection with the ancient aristocracy of the country; the walls of the adjoining chapel display the tattered flags captured in many a hard-fought battle directed by his own unfailing skill; and the warlike spirit of his career is shown by the presence of troops of military, with arms reversed, lining the chamber on either side. The eight Field-Marshal's *batons*, and the long list of twenty-seven Orders of Merit bestowed upon the deceased at various periods, sufficiently attest the extent of his fame. Altogether, the arrangements may be described as completely satisfactory—worthy at once of the exalted deceased, and of the nation and monarchy whom he has served so well.

In carrying out the artistic effect of the ceremonial, advantage has been taken of the fine architectural arrangement of the building. The public will obtain access to the hall from the north front of the College by a temporary entrance of some sixty feet in length, hung with black, and lighted by no other means than the reflection obtained from the vestibule at the farther end, itself only dimly illuminated. Immediately in front of this entrance there is placed, upon the north wall of the vestibule, a large trophy, containing upwards of thirty banners, captured in various battles, and previously suspended in the hall, tastefully arranged, and surmounted by the Royal standard of England, draped in mourning. In the centre of this trophy are the Royal Arms of England, on a silver ground, encircled with a laurel wreath. To the left is seen the chapel, hung with black cloth, and only sufficiently illuminated to discover eagles and other trophies of the last great war, in the capture of most of which the illustrious deceased was concerned. To the right is the great hall, at the further end of which are deposited upon a splendid bier, surmounted by a gorgeous canopy, the remains of the lamented Duke. This fine chamber, 118 feet long by 36 feet broad, and 49 feet high, is lighted by 6, chandeliers of colossal size, beautifully carved and silvered. Each of the chandeliers bears a wax candle, seven feet high, the whole affording a moderated light, gradually increasing from the entrance, and terminating the perspective in a bright illumination upon the chief object of interest, the catafalque a most imposing and beautiful design. The walls of the hall are hung with black drapery, gracefully interspersed with pendent folds, at six feet distance—each bay bearing an escutcheon of the Wellington family, surrounded with elegant wreaths of laurel in green and silver. The ceiling is tent-wise, divided by diagonal white bands, which have a very pretty perspective effect. The dazzling brilliancy of the catafalque upon which the remains of the late Duke rest can hardly be described in plain prose. It is, perhaps, one of the most gorgeous conceptions ever originated by an artistical mind. Cloth of gold and silver, with heraldic emblazonments of the richest description, and a perfect profusion of ornament, combine to produce an effect of the most brilliant character. The canopy itself, and the black forms of cuirasses by which it is surrounded, are suspended in a manner entirely new to this country, falling from the roof, and leaving the space between the floor unencumbered. Ten columns, emblematical of the mournful occasion, are placed upon the dais supporting the canopy, which are composed of spears, covered with velvet, and surmounted by plumes of feathers, wreaths of laurel, interspersed with the escutcheon of the deceased, encircling the columns, which encase an arrangement of gaslights producing a perfect blaze of light upon the canopy. The coffin containing the remains of the deceased—covered with a simple black pall —reposes upon a velvet bier, four feet high by nine and a half long, at the end of which are suspended the various orders of the deceased, at the head of which is the Most Noble Order of the Garter. The bier is surrounded by an elegant balustrade, adorned with armorial escutcheons, from which project ten pedestals, eight of which carry upon black velvet cushions the Marshal's *bâtons* and orders of the eight countries which had conferred upon the Duke those unprecedented marks of confidence and honour. The remaining two pedestals bear the Duke's own standard and guidon. The whole of the pedestals are supported by lions richly gilt, having in their right and left paws, respectively, the shield and banner of the several nations. The bier, as well as the balustrade, reposes upon cloth of gold. At the back of the catafalque is her Majesty's escutcheon, surrounded by the Wellington bannerols, also upon a cloth of gold.

The hall was lined on both sides by soldiers of the Grenadier Guards —the Duke's own regiment—resting on their arms reversed; and upon the platform the Yeomen of the Guard kept watch and ward over their deceased patron.

Four officers of the Grenadier Guards sat as mourners on this occasion. Their names were—Colonel Thornton, commanding the regiment; Lieut.-Colonel the Hon. James Lindsay, Major Brownrigg, and Captain E Ison. Mr. Norman Macdonald, Secretary to the Lord Chamberlain, stood at the head of the coffin, and two other gentlemen connected with this department were in attendance.

While her Majesty was present, the Duchess of Kent and the Duchess of Cambridge arrived, the youthful members of the Belgian Royal family also joined their illustrious relatives at the hall.

After the Royal family had retired, the pensioners in the hospital were considerately allowed to walk through the hall and survey the honours paid to their illustrious leader.

To-day (Saturday), and on Monday, Tuesday, and Wednesday next, the public will be admitted, without tickets, from nine till four o'clock.

It is stated to be the Queen's intention to view the funeral procession from Somerset House; and that the large room of the Society, which commands the Strand, is being fitted up for her Majesty's reception.

The Supplement to the *London Gazette* of Tuesday contains the following particulars of the arrangements for the funeral:—

Notice is hereby given, that the funeral of the late Field-Marshal Arthur, Duke of Wellington, will be solemnised on Thursday next, the 18th instant, in St. Paul's Cathedral.

Notice is also given, that the tickets of admission to the Cathedral for those Persons who have signified their intention of being present at the solemnity, will be ready for delivery, at this office, on Saturday next, the 13th instant, between the hours of ten o'clock A.M. and six o'clock P.M., on the production of written orders from the persons respectively entitled thereto.

The tickets for all Privy Councillors under the degree of peerage, the Vice-Chancellors, the Barons of the Exchequer, the Justices of both Benches, the Knights Grand Cross, Knights Commanders, and Companions of the Most Honourable Order of the Bath, and her Majesty's Law Officers, who have signified their intention of being present at the said solemnity, will also be ready for delivery on Saturday next, the 13th inst., between the hours of ten o'clock A.M. and six o'clock P.M., on the production of written orders from the persons respectively entitled thereto.

All members of the Order of the Bath, having places in the Cathedral, will appear in uniform, and wearing the decoration of the order.

Ladies admitted to seats in the Cathedral will appear in mourning; and gentlemen will also appear in mourning, with white cravats.

The mourners and relations will not appear in uniform

All other persons taking part in the procession (with the exception of those wearing uniforms) will appear in mourning, without weepers, but with mourning swords.

On the morning of the funeral, no person (except the troops and police forces), will be admitted into St. James's Park but those producing the Earl Marshal's card of admission into the procession, or such of his officers, assisting in the ceremonial, as shall produce pass tickets for that purpose.

All carriages and mourning-coaches numbered 1 to 41 will enter the Park by Buckingham-gate, or Storey's-gate, not later than eight o'clock A.M., and proceed through the gate in the railing near Storey's-gate, towards the Horse Guards, and be formed in the open space and road, in numerical order, according to the number on the card, with which every coachman will be furnished.

All carriages and mourning coaches, numbered 42 to 67, will enter by the Horse Guards, not later than eight o'clock A.M., and form in the road towards the Admiralty, and form in the numerical order indicated by the card

The carriages which precede and those which follow the funeral car will form in separate lines.

The Peeresses and all other persons having tickets for the centre area of St. Paul's Cathedral, will be admitted at the respective side doors of the great western entrance of St. Paul's, setting down on either side of the Cathedral in St. Paul's Churchyard.

All persons having tickets for the following places, viz.:—Nave, north side, upper, centre, and lower galleries of the north transept, east and west sides of the north transept, and north aisle of the choir, will enter by the north door of the Cathedral, setting down on the north side of the Churchyard.

All persons having tickets for the following places, viz.:—Nave, south side; upper, centre, and lower galleries of the south transept: east and west aisles of the south transept: and south aisle of the choir, will enter by the south door of the Cathedral, setting down on the south side of the Churchyard.

All persons having tickets for the gallery over the western entrance, north side, will enter by the north door of the Cathedral, setting down on the north side of the Churchyard.

All persons having tickets for the gallery over the western entrance, south side, will enter by the south door of the Cathedral, setting down on the south side of the Churchyard.

NORFOLK, Earl Marshal.

Earl Marshal's Office, 1, Parliament-street, Nov. 11, 1852.

All persons are strictly enjoined to pay attention to the police regulations in respect to the route prescribed for the carriages.

RAILWAY INTELLIGENCE.

CHAS. E. STEWART, Secretary.

NOTE.—The Returns as published are exclusive of the Traffic of the Huddersfield Canal, Shrewsbury Lines, North Union, Preston and Wyre, South Junction, Manchester and Buxton, and Sankeybridge Railways, and of the proportion of Traffic deducted under agreement with the North Staffordshire Company.

THE BROAD AND NARROW GAUGES LOCOMOTIVE ENGINES.—We understand that now the Birmingham and Oxford Junction Railway is opened with both the broad and narrow-gauge rails on the same ground, the Messrs. England are prepared to renew their former challenge, given during the Exhibition, to run their light express engine, the "Little England," against the large engine, the "Lord of the Isles," belonging to the Great Western Company, fifty miles for 1000 guineas, or the winner to take both engines. They propose that each shall take a load in proportion to its weight, or empty carriage only.

INSPECTOR OF RAILWAYS.—In consequence of the election of Captain Laffan as M.P. for St. Ives, Captain Galton has been appointed to succeed him as Government Inspector of Railways.

RAILWAY TRAFFIC.—The aggregate amount of traffic on railways in the United Kingdom published weekly, from the 1st of January to the 30th of October inclusive, amounted to £14,785,637; corresponding period of 1851, to £12,607,331; corresponding period of 1850 to £10,854,587; and in 1849, to £9,382,268. The receipts for the above period averaged in 1852 £19½ per mile; in 1851, £1959 per mile; in 1850, £1791 per mile; and in 1849 they averaged £1664 per mile. The gross receipts for the eight railways having their termini in the metropolis amounted to £141,421 for the week ending the 30th October, and for the corresponding week of last year, being the third week the Great Exhibition was closed, to £121,757.

RAILWAYS IN PRUSSIA.—According to a recent return of railway traffic in Prussia in 1851, it appears that the number of persons conveyed by the Prussian railroads in that year was 9,901,681; of this immense number only one person was killed, having jumped from a train in motion; only four were wounded. By accidents on the line to persons not passengers four were killed and three injured; they were all crossing the rails, contrary to the regulations, in front of advancing trains. The accidents to *employés* and labourers on the lines and at the stations were more numerous. Once this head there are 18 killed and 20 injured. In most of these cases the accidents could be traced to their own carelessness. There was one suicide by lying down on the rails before an engine, and another attempt of the same kind that did not prove fatal. Excluding the case of suicide, there were last year 23 fatal accidents in the 1851 of the Prussian lines, and 27 injured. The Prussian calculation states that in England there were five accidents to every million passengers, while in Prussia there was only one accident to every two millions.

HER MAJESTY AND THE CORPORATION OF WINDSOR.—At the annual meeting of the Town-council, held on Tuesday, a vote was expressive of the deep sense of gratitude felt by the corporation to her Majesty and Prince Albert for the spontaneous and munificent present of their portraits, wherewith to decorate the Town-hall, was passed by acclamation.

METROPOLITAN NEWS.

SWEARING-IN OF THE NEW LORD MAYOR.—On Monday Alderman Challis, the Lord Mayor for the ensuing year, was sworn into office in the Guildhall with the usual formalities.

THE LORD MAYOR'S DAY.—In the great disappointment of the eight years, who look forward to the 9th of November [illegible] the [illegible] exercises, no procession took place on Tuesday, in consequence of his Grace the Duke of Wellington. At one o'clock [illegible] Mayor Challis (attended by the sword and mace-bearers), ex-Lord Mayor Hunter, the Recorder, the Remembrancer, and City Solicitor, in their official robes, took in his private carriage, accompanied by a few of the aldermen, left the Guildhall, headed by a few of the police, and proceeded through Cheapside, St. Paul's Churchyard, Fleet-street, Strand, and Charing-cross, to Westminster Hall, where they arrived at two o'clock, and where the usual [illegible] took place. When the various forms were gone through, the civic authorities returned to Guildhall, where they arrived shortly after three o'clock.

BIRTH-DAY OF THE PRINCE OF WALES.—Tuesday being the anniversary of the birthday of his Royal Highness the Prince of Wales, [illegible] were rung from the bells of St. Martin-in-the-Fields, St. Margaret's, Westminster, and other churches, and flags hoisted in honour of the day. A great number of persons congregated on the Parade behind the Horse Guards, in the expectation of witnessing a review of the household troops, but they were disappointed, as no review took place. On Somerset House, and other Government offices, flags were also hoisted.

HIGHLAND EMIGRATION FUND.—Next Sunday morning, a sermon will (D.V.) be preached at St. Mark's, North Audley-street, by the Rev. Henry Mackenzie, vicar of St. Martin's-in-the-Fields, and member of the committee, for the benefit of the Highland Emigration Fund.

THE CAB MONOPOLY.—On Tuesday, a numerously-attended meeting of cab-drivers and proprietors was held at the Crown Tavern, Great Ormond-street, relative to the monopoly in the cab trade at the railway stations. Mr. Williams said that as cab-fares had been removed [illegible] to the public, and the existing monopoly benefitting the public, it was quite the contrary. It was resolved that a deputation should wait upon the Commissioners of Police.

THE METROPOLIS BURIALS ACT.—Meetings have been held this week, in Kensington Palace, and in St. Mary's, Newington, for the purpose of introducing the Metropolis Burials Act into those parishes.

THE PROPOSED PARK AT FINSBURY.—PUBLIC MEETING.—On Wednesday evening, a public meeting of the inhabitants of Finsbury was held at the Mechanics' Institution, Goswell-street, to consider what measures shall be adopted to urge upon the Government the necessity of securing the ground already surveyed for the proposed Royal Park for Finsbury. The meeting was numerously attended.

CLEOPATRA'S NEEDLE.—Lord Derby has permitted the removal of this column to Sydenham, on condition that the Government may hereafter reclaim it if the Crystal Palace Company, on payment of all expenses incurred in the transit.

MAZZINI AND KOSSUTH.—At the first *conversazione* for the season of the Society of the Friends of Italy, which took place at the Music Hall, Store-street, on Wednesday—F. A. Taylor, Esq., in the chair—Mazzini, in proposing the adoption of a petition to the House of Commons, said his heart was too full to speak upon that occasion. They had already heard that nine persons were shot the same day at Ancona. He had just received intelligence that twenty-seven others were shot the day after. In fact, they were murdering the people *en masse* at Mantua and Verona. In the presence of such facts it was impossible to speak—they should act. He sought the support of English people. They were a people rather apathetic, who, *Hamlet*-like, thought well, but did not act. Upon the unanimous demand of the audience, M. Kossuth came forward. When the applause had somewhat subsided, he said: "Believe me, ladies and gentlemen, I am deeply, very deeply sensible of your kindness, and the value of that interest which you have manifested for the cause of Italy and Hungary. I thank you for this manifestation, the more because, in connecting it with the resolutions adopted during the evening, I feel entitled to take it not only as an acknowledgment, but as an approval of the brotherly and fraternal alliance which now connects Italy with Hungary. (Hear, hear.) My best answer, then, to you, is, as I take the hand there he grasped the hand of Mazzini, who rose and stood by his side) of my friend, my brother; and as I stand here before God and you, my hand in hand with him, so, depend upon it, the world will see the people of Italy and the people of Hungary, but only standing up, but marching side by side, until those fair parts of the world are restored to the immortal and imprescriptible rights of every nation, and until they once more enjoy their inalienable right to administer their own concerns, and to set up or pull down, to alter or change, their mode and form of Government. Obedient to your call, I have risen: but not for the purpose of making a speech. There is a time when it is necessary to be silent. Such a time is the present. You in England are happy—you can hope to obtain all that you call require by the word. With us it is different—words avail us not—we can carry nothing by them. We have, therefore resolved to be silent. I have but one single speech in store, and it shall be spoken in due time. It is—Up, boys! follow me! (Loud cheers.)

About three hundred German refugees met on Tuesday night at the Freemasons' Tavern, to commemorate the so-called martyrdom of Robert Blum, who was executed after the taking of Vienna.

BOARD OF TRADE RETURNS.—The accounts relating to trade and navigation for the month and nine months ending the 10th of October, have been issued on Tuesday. The value of domestic produce and manufactures exported during the month has exceeded that returned in the same period of 1851 by £1,033,298. The imports for the month, as compared with the same period in 1851, have fallen off in the case of cotton wool, flour, live cattle, sheep, provisions, sugar, and wine; and show an increase in fruits, oats, pepper, rice, seeds, spirits, tea, tobacco, and wheat; as also in the principal articles used for manufacturing purposes.

CORPORATION OF THE SONS OF THE CLERGY.—On Thursday the annual meeting of the society was held at the office, Bloomsbury-place. R. H. Inglis in the chair—when the Archbishop of Canterbury was elected president. Lord Denman vice-president, and other officers appointed for the ensuing year. The report of the society shows that, during the past year, £14,203 were disbursed amongst distressed clergymen or their families.

HEALTH OF THE METROPOLIS.—The deaths registered last Saturday were 1101. Fatal cases arising from scarlatina declined from 104 in the preceding week to 82 in the last. Eight children died of small-pox, 5 of measles, 36 of hooping-cough, 5 of croup, 5 of influenza, 18 persons of diarrhœa, 1 of purpura, 47 of typhus. No death from cholera was registered. In the last two weeks the deaths from diseases of the respiratory organs (exclusive of phthisis) fell from 262 to 234. The births were—boys, 830; girls, 814.

METEOROLOGICAL OBSERVATIONS.—From the Royal Observatory, the mean height of the barometer last week was 29.334 in. The mean weekly temperature, which was 54.9 deg., exceeds the average of the same week in 37 years by 2.7 deg. It has not been so high since the week that ended the 25th of September, and since the beginning of October it has not been higher than 49.9 deg. In the last two weeks it has suddenly risen from 45.6 deg. to 54.9 deg. The mean daily temperature was 54.6 deg. on Sunday, or 7.9 deg. above the average. It rose on Monday to 57.2 deg.; declined till Thursday, when it was 50.3 deg.; and rose again on Friday to nearly the same height as on Monday and Tuesday when it was about 10 deg. above the average. It was higher than the average throughout the week. The wind blew generally from the south

NAVAL AND MILITARY INTELLIGENCE.

The good service pension placed at the disposal of his Grace the Duke of Northumberland by the promotion to the rank of Rear-Admiral of the Blue Sir John Franklin, Kt., K.C.H., has been bestowed on Capt. James Ryder Burton, R.H., 1826.

INCREASE TO THE ROYAL ARTILLERY IN IRELAND.—The four companies stationed in the Dublin district, under the command of Colonel Dyneley, are to be increased forthwith to forty non-commissioned officers and 400 gunners and drivers. The companies stationed in the Belfast district (head-quarters Charlemont Fort), Ballincollig (Cork Fort), Limerick and Kilkenny districts, are to be increased to nine non-commissioned officers and 100 gunners and drivers.

THE LOSS OF H.M.S. "BIRKENHEAD."—The United Service Birkenhead Subscription Committee held their monthly meeting at the Navy Club, Portsmouth, on Monday, for the purpose of distributing the bounty of the subscribers to the widows and others. The committee, since the subscription fund opened in April, have issued upwards of £1000 to the distressed relatives of naval and military persons who were saved from the wreck of the *Birkenhead*. They have collected the names of and received 138 persons connected with both services, of whom upwards of 100 are relatives of [illegible] who [illegible] to the committee for [illegible]. The committee have [illegible] down [illegible] to the [illegible] to each respectable person of both [illegible].

DREADFUL SHIPWRECK AND LOSS OF LIFE.—[illegible] received at Lloyd's on Saturday of a most [illegible] The agent at Queen's-town (Cork) communicates [illegible] the 16th of [illegible] while in the Gulf of Mexico, they fell in with the wreck of the American [illegible] *Mount Vernon*, and succeeded in taking off [illegible] creatures, who [illegible] days had been exposed to the most terrible amount of suffering. [illegible] almost starved to death, having been clinging to the sides of [illegible] entire days, without the least provisions or water. They learned from the [illegible] follows that the remainder of the crew, with some passengers in all twelve, had perished. The six survivors were put on board the *Superior*, which was bound for America, and which would convey them to their native country. Information has also been communicated of the washing up at Arklow, of a large quantity of wreck, which had led to a belief that a ship of upwards of 1,000 tons had been lost on the coast during the late gales, and that all on board of her were lost.

THE NEW LORD MAYOR.

On Tuesday, at two o'clock, the Lord Mayor was sworn in before the Barons of the Exchequer.

The Court had adjourned two hours previously, as all but one of the Barons were engaged in the Exchequer Chamber; but a few minutes before the above-named time the Lord Chief Baron, Mr. Baron Alderson, Mr. Baron Platt, and Mr. Baron Martin, took their seats upon the bench. The Barons were attired in their scarlet and ermine robes, and the Chief Baron wore his gold chain of office.

The Lord Mayor (Mr. Alderman Challis, M.P.) was accompanied by Mr. Alderman Hunter (the late Lord Mayor), the Recorder, Mr. Alderman Salomons, the Sheriffs, the Chamberlain of London, the City Solicitor, the Under-Sheriffs, the Sword-bearer, and other City officers. There were also several of the Court of the Lord Mayor's Company in attendance.

The Recorder, in presenting the Lord Mayor, said that the citizens of London had recently exercised their undoubted right of selecting one of their body to fill the high and important office of Chief Magistrate of the city of London for the ensuing year, and he had now to inform their Lordships that their choice had fallen upon the gentleman who was at that moment standing upon his right hand, Mr. Alderman Challis. He was proud further to inform their Lordships that that choice had received the gracious approbation of her Majesty; and the Lord Mayor now, through him, claimed of their Lordships for his fellow-citizens the continuance and preservation of all those ancient rights, privileges, and immunities which they had hitherto enjoyed. If the Lord Mayor had not come to that Court, upon the present occasion, attended by all that pomp and pageantry by which his Lordship's predecessors had severally been accompanied, it had not been from any desire on the part of the Lord Mayor to abridge in the slightest degree the just splendour of the high office to which he had been elevated. It had, on the contrary, been from a feeling, which he was assured their Lordships would be the first to recognise, of deference to the honourable sentiment which forbade any festive demonstration at a period when the nation was waiting to pay the last just and solemn tribute of respect to the memory of the greatest hero of the age. The Lord Mayor, Mr. Alderman Challis, presented himself to their Lordships with very many claims for the high office to which he had been elevated. Born in the city of London, where his father had carried on a successful business, Mr. Alderman Challis himself had succeeded to it, and carried it on to a most flourishing extent. But it was not merely to his activity and untiring energy in the conduct of his business that Mr. Challis's success in life, and advance in the opinion of the citizens of London, was attributable; it was his general and universal benevolence, and personal connexions in connexion with the various charitable institutions of the city of London, which had gained for him the high respect and estimation of his fellow-citizens. Accordingly, on the death of the late Alderman Sir Matthew Wood, Mr. Challis was selected to supply the vacant office of alderman of the ward of Cripplegate. Having attained that office, Mr. Alderman Challis devoted himself so ably and so energetically to the performance of his magisterial duties, that he very rapidly and very greatly increased in the confidence and estimation of his fellow-citizens. In due course of time (in 1846), Mr. Alderman Challis was chosen by the unanimous voice of the livery to be one of the Sheriffs for London—an office the duties of which he performed most faithfully, most honourably, and most satisfactorily—while at the last general election he had been elected, after a severe contest, as one of the representatives of the borough of Finsbury in Parliament, by the largest majority that had ever sent a member to that assembly. Subsequently to that event, Mr. Alderman Challis had been unanimously elected to the high and important station in which he then had the honour to appear before their Lordships. The hon. and learned gentleman then, in eulogistic terms, called the attention of the Barons to the efficient and satisfactory manner in which the late Lord Mayor (Mr. Alderman Hunter) had performed the heavy duties of the mayoralty of 1852, and went on to say that upon the election of that hon. gentleman there were those who prognosticated a period of disquietude; but he was happy to say that all the then portending darkened clouds had passed away, and that his term of magisterial preeminence had been one of tranquillity. In addition to that fact, he might state that throughout his year of office such had been the conduct and demeanour of Mr. Alderman Hunter, that he retired from his arduous duties with the general feeling of gratitude, respect, and esteem of his fellow-citizens.

THE RIGHT HON. THOMAS CHALLIS, M.P., LORD MAYOR OF LONDON.—FROM A PHOTOGRAPH BY KILBURN.

The Lord Chief Baron congratulated the Lord Mayor upon the honourable position which he had attained, and expressed his conviction that, after the statement which had been made by the learned Recorder, he would most ably acquit himself of the onerous duties which his office would necessarily cast upon him. Notwithstanding the lamentable cause of the absence of the usual pageantry with which his Lordship's predecessors had been accustomed to come before the Barons, the Lord Mayor was quite right in making his appearance at that court, because he came there to claim for the citizens of London the ancient privileges, rights, and liberties which they had enjoyed for a long series of years. The learned Chief Baron then referred, in eloquent terms, to the recent loss which the nation had sustained by the death of the greatest hero of the age. His Lordship fully approved of the feeling which had induced the citizens of London to dispense with the pageant which had hitherto formed so distinguished a feature in that day's proceedings. His Lordship then complimented the late Lord Mayor upon the way in which he had performed the duties of the office, and was convinced that he would now retire into comparatively private life, bearing the respect and esteem of his fellow citizens.

The Recorder said, it had been usual upon former occasions for the Lord Mayor and Sheriffs to invite their Lordsh a banquet at Guildhall; but for the very same reason which had induced the city of London t stain from their accustomed pageant, the Mayor and Sheriffs had for the present aban that festivity; but they hoped that they should the honour of entertaining their Lordships on a appropriate occasion.

The civic functionaries then retired.

THE SUBMARINE ELECTRIC TELEGRAPH.

In our Journal of last week, we recorded the we teresting event of the opening of the direct teleg route between London and Paris. We now en the instrument-room of "the European and marine Printing Telegraph Company," in Co The operation of the communication we have al fully detailed. The laying down of the wi the underground telegraph between Dover and metropolis, being completed, and a junction h been effected with the submarine cable, a direct course was at once opened between the London Paris stations. This new line of telegraph follow route of the old Dover coach-road, passing throug several towns of Dartford, Gravesend, Rochi Sittingbourne, and Canterbury, and has been down by Messrs. Frend and Hamill, of Bedford-r

Before the completion of this line all contin messages from London were conveyed by mea the South-Eastern Railway Company's telegrap Dover; where a break occurred, owing to the ab of direct telegraphic communication between station and the office of the Submarine Company.

We may, however, repeat, that in the Illustra the French machine is shown at work, in direct c munication with Paris. The appearance of the ins ment is attractive: instead of [illegible] double needles, now so famil ar to most of in the ordinary "speaking" part of the ele telegraph, there is a small black arm, workin[illegible] from the centre of a white dial, so as to dese[illegible] of 45 and 90 degrees, with a fixed vertical pa sung through the centre, performing, in fact, a t on which any one walking past the Admiralty ni have seen in full play when the semaphore on the was at work. The motion of the handle which grov the electric current, and the motion of the arm necessarily rotatory also; and the little arm mo roved very quickly, indicating the letters by various angles it forms with the centre line.

INSTRUMENT-ROOM OF THE SUBMARINE TELEGRAPH COMPANY, AT CORNHILL.

THE NEW PATENT LAW.

The passing of the recent Patent Law Amendment was celebrated on Tuesday week by a public dinner Dee's Hotel; which was attended by about one hund present Richard Spooner, Esq., M.P.; William Scholefield, Esq., M. Thomas Webster, Esq., barrister-at-law; W. M. Hindmarsh, Esq., b rister-at-law; J. R. Grace, Esq., barrister-at-law; Mr. Alderman Lucy, Alderman Phillips, Mr Alderman Baldwin; Messrs. W. J. Beale, F. H. Collis, R. Backwell, Prosser, H. Edmunds, F. Wilds, J. Lowe, T. C. Salt, Carlis Remond, A. Slate, Stevens, Oliver, W. C. Aitken, &c. Mr. Scholefield occup the vice-chair.

After the removal of the cloth, the chairman proposed the healths of "T Queen," and of "Prince Albert and the rest of the Royal Family," which we received with the customary honours.

The vice-chairman proposed the next toast, "The Emancipation of I ventors," adding, that, when such a consummation was attained, an impet would be given to arts and sciences of which it was impossible to imagine beneficial consequences.

The toast, which was drunk with three times three, was responded to the chairman, and by Mr. Prosser. The chairman, in the course of address, observed, with reference to the difficulties which attended t patenting of inventions, that he had to expend £10,000, in defen of his own right before a single thing was settled. It was a mi take to assert that patent laws were an injustice. It was a notorio fact that all the inventions which had improved our manufactures, and h extended their use to society at large, had been brought forward under di ficulties, and that they required the intervention of parties who monopolised t greater portion of the profits. It was known that, after Watt became associate with Dr. Roebuck, he made such slow progress in carrying out his improvement that he was induced to return for a time to his old vocations. Had he not m

NEWSPAPER

DINNER AT DEE'S HOTEL, BIRMINGHAM, TO CELEBRATE THE PASSING OF THE PATENT LAW AMENDMENT ACT.

nlton, where would Watt have been? and did they believe that, if there had patent laws, Boulton would have supported Watt in his invention? s a misconception to say that if a patent was granted to a man, it was a ly, and an abuse of power. A monopoly was a grant to persons to do uld be done by the rest of society. When you gave for a certain time ht of any improvement to the man who brought it forward, the public by paying in a pecuniary way for the benefit of a man's exertions. He ove that the commercial marine had benefited to the extent of £200,000 r at least by his invention, and if he had not contemplated a patent he not have undergone the days and weeks and months of labour which essary to its completion. The case was the same with other inventors. terations in the granting of patents under the present law were im- and were calculated to give great advantages to inventors. A man xpend £28 in obtaining a patent for three years, during which time he s any alterations or improvements, if he only kept up the principle, and g his pretensions to be valid, as would have no difficulty in obtaining such e as he might require for a moderate proportion of the profits of his in- Under the old law a man had to pay down a large sum upon speculation, aturally enough secured a large reversion before he lost his money. No man ow be subjected to the vexations which he was compelled to encounter at law. The chairman, in conclusion, assured the company that he ive his best assistance to any attempts which might be made to still fur- prove the existing law.

Mr. Prosser reviewed at some length the past and present condition of our patent laws, which, he said, differed from those of any other nation in this respect. Here the patentee has had one, two, four, six, fifteen, or eighteen months to speculate with his invention after he had a patent for it. Some patents had never been specified at all; and it was not known why they had been granted. The laws of every other country beside England required that an inventor should give a complete specification, and say, "I want a patent for this," but Englishmen were supposed to be so stubborn that a long time was required to get their inventions out of them, and an injurious laxity was the consequence. It had been the practice of all civilised nations to consider an inventor entitled to some sort of reward, and all such nations had granted patents. America up to the present time had granted 15,000 patents to inventors. The number of patents granted in France was 14,000; and in England, 15,000. For twenty years the patents taken out in this country had only averaged 500 per annum; but the number obtained under the Patent Law Amendment Act up to four o'clock that afternoon, in one month, was 606. Nothing could prove more forcibly than this fact, the nature of the burthens before imposed on inventors, who, from the time of Queen Anne, had paid in the shape of fees no less than four millions and a half of pounds sterling. In return for this, they had not one single document to consult, or "place to put their heads in;" not one official with whom they could correspond, or an index of the names or the dates of inventions, or the persons by whom they were made. Mr. Prosser specified the contrary conduct of other nations in these respects; and concluded by observing, that, although the Patent Law Amendment Act was incomplete, yet, under it, inventors bade fair to take that rank in the scale of society to which they were entitled.

The chairman then proposed "the health of Lord Brougham," to whom they owed to some extent the carrying of the New Patent Law. The toast was responded to by Mr. Grace, who referred to the services rendered by his Lordship, not only in reference to the patent laws, but as a general law reformer.

The toast of "Further Amendment of the Patent Law" was next given by the chairman, and responded to by

Mr. Hindmarch, who, in referring to the opposition offered by parties in the House of Commons to the passing of the New Patent Law Amendment Act, said, it appeared to him a most extraordinary thing that, after the patent laws had passed from us into every country in Europe, and from thence into America, as it would most likely do into Asia—that, notwithstanding all these things, it should be said that "patents are a bad thing; let us get rid of them." Something, he maintained ought to be done to get rid of these foolish ideas; the country required that it should be done. The new law was very imperfect; and if there were no other cause, the manner in which the law was passed was certain to produce the anomalies which it contained. The question of the further extension of the law depended on inventors themselves. It was requisite that every inventor should retain a right in his invention, and that that right should be obtainable at as cheap a rate as practically might be; and that nothing should be charged to the inventor in the shape of taxes in any other shape than what was sufficient to cover the expense

THE NORTHUMBERLAND COAST DURING THE LATE GALE.—(SEE NEXT PAGE.)

ce ing the p osition which was asked. Mr Webster also responded, urging upon inventors the propriety of being thankful for the New Patent Law, and suggested that they should not be too anxious to find fault with it; for, if they did, and went before Parliament for further alterations, they might lose what they had obtained. He considered the alteration as a great boon to the poor inventor; for, on the payment of £5, under the present system, he could obtain protection for six months, and in that time might obtain the assistance of a man of capital to enable him to carry on his invention.

"The Healths of the Duke of Argyle and Lord Campbell," as prominent supporters of the Patent Law Amendment in the House of Lords, was given from the chair; and responded to by Mr. Aitken and Mr. Slate.

The chairman then gave 'The Town and Trade of Birmingham," which was acknowledged by Mr. Sturges, who impressed upon inventors the importance of combining together for the formation of an association to watch over and protect their interests.

"Iron Trade," also given from the chair, was spoken to by by Mr. Blackwell, who gave some interesting statistics as to the progress of the trade during the last century.

"The Healths of the County Members," acknowledged by Mr. Spooner; "the Borough Members," by Messrs Muntz and Scholefield; and "The Press," terminated the proceedings.

STORM OFF THE NORTHUMBERLAND COAST.

We find the scene of devastation, which our Artist has here so vividly depicted, thus described in the *Newcastle Journal*:—

During Thursday night (last week) the wind blew hard from the east, with rain, the sea on the coast being tremendously high. The *Ornsby Hall*, Gurry, of and from London for Seaham, drove on the Herd Sand on Thursday morning, before daylight. At three P.M. on Thursday, the excitement was great for the safety of several vessels which were then seen running for the bar. A three-masted steamer approached; but, as if despairing of being able to enter, attempted to run into the offing; succeeded, however, her head was again put north, and after a desperate encounter with the sea on the bar, part of the crew having in the meantime taken to the rigging, she reached the harbour, and proved to be the *Swanwick*, from Hamburg. Near about the same time, a collier brig, supposed for London, put in for shelter, got far to leeward, and in vain attempted to reach the bar; the sea at the time was sweeping right across the vessel; part of the men could be seen on the bowsprit and other parts of the rigging; and at length she struck on the outer edge of the Herd. The crew now manned the boat, and away they pulled. Owing to the perilous situation of the men in the brig, who were every moment in danger of being swept overboard, the life-boat was watched by the spectators with extreme interest as it reached the vessel. In ten minutes the shipwrecked men were rescued, and were soon after landed in safety. The vessel was the *Liverly*, of Clay When the life-boat reached the shore, a gentleman, struck with the gallantry of the crew, presented the coxswain, Mr. Smith, with a sovereign for them.

PROVINCIAL INTELLIGENCE.

THE EARTHQUAKE IN THE NORTH.

On Tuesday intelligence reached town by electric telegraph that an earthquake had been felt in Liverpool and its neighbourhood that morning. The weather for the last few days had been wet and sultry, the atmosphere over out of doors being unusually warm. On Tuesday morning (says the *Liverpool Mercury*) about half-past four o'clock persons in all parts of the town, but more especially in the outskirts and at Birkenhead, felt a rocking or hearing of the earth. In some cases persons were awoke from a sound sleep, and jumped on the floor, expecting an attack from some nocturnal marauder. In other cases children screamed and hid their faces under the bedclothes; while in a few instances persons in bed simply felt a kind of rocking motion, like that of a cradle-bed. The thermometer, which varied from 50° to 61° Fahrenheit, was unusually high for the season of the year, and during the night the barometer rose nearly a quarter of the circle, although heavy rain had fallen. The greatest force of the earthquake was felt along the line of the river, and particularly at Bootle, a village at the north end of the docks. At Birkenhead, also, and in the villages on the Cheshire side of the Mersey, a considerable vibration of the earth was noticed. The *Times* correspondent, who resides at Aigburth, was awakened by a peculiar trembling sensation. All his joints appeared to be loosened, and for a moment it seemed as if he had been robbed with a violent fit of ague. The person who usually obtains the *Times* despatches from the Transatlantic steamers was awakened about half-past four o'clock by a rumbling noise, and, thinking it was the gun of some of the American steamers, he arose, dressed himself, and went down to the pier. At Seacombe, on the Cheshire side of the river, a gentleman was so much shaken while asleep that, on awakening, he imagined for the instant that some one was capsized under his bed. In many houses, on both sides of the river, cupboard doors were banged open, and other noises caused.

At Manchester, Congleton, Bangor, Holyhead, and Carnarvon, the shock was most distinctly experienced, and in all at the same time. A gentleman at Sale (six miles from Manchester), who has resided nine years at St. Domingo, and is not unacquainted with such phenomena, was awoke by it, and recognised the sensation immediately. It was something like the vibration felt in a badly-built house when a heavily-laden carriage rattles past. The crockery rattled, and the sensation lasted about half a minute. At speak of the motion as a lateral vibratory one, and some assert that it was accompanied by a loud, hoarse, rumbling noise, not unlike distant thunder.

The shock was severely felt at Chester, and along the Chester and Birkenhead Railway. At Shrewsbury it caused great alarm: it shook the houses in the town and suburbs, making the windows rattle, and, in many instances, causing people to leap from their beds. In Mardol, several large cheeses were rolled off the shelves in the shop of Mr. Williams, a cheesemonger. A dairyman, residing near the race-course, having occasion to visit his cattle, was proceeding across the yard with a lantern in his hand, when he felt the ground rock once or twice to such a degree that he could hardly keep his feet; but in the county gaol, which seemed to be in the immediate line along which the shock passed with most severity, the scene was for a short time truly alarming, the prisoners not knowing to what to attribute the sensation which they felt, aroused in great alarm. The turnkeys, on the other hand, attributed the noise in the first instance, and the rattling of doors and windows, followed by the shouts, to a combined attempt of the prisoners to escape. A portion of wall adjoining Marshall's Thread Factory, near the Castle Forest-gate, fell, and another portion of wall at the goods station of the rail way terminus sunk considerably. The bells also of the Abbey Church were momentarily sook n. At Wellington, also, and Oswestry, and other places adjoining, the earthquake was distinctly felt.

It is singular that, though the shock was perceived on both sides of the Irish Channel, nothing of it was ex erienced on board ship. On the Irish coast it was quite as intense as on the English. At Kingstown, Bray, Kilruddery, Dalkey, Glengarry, Howth, Clontarf, Glasnevin, and other places in the vicinity of Dublin, the vibration was felt. At Howth, a scientific gentleman dreamt that the end of the world had come, and, on awaking, found himself lying on the floor, having jerked out of his bed. The writer of a letter, resident at Wicklow, says:—"The house rocked in a most fearful manner, the bed pitched like a ship at sea, the clock stopped on the mantel-piece, jugs and basins danced a fearful jig." Commencing from the shore of Dublin and Wicklow, and taking nearly a circular direction, the shock appears to have been sensibly felt as far as Gloucester. Two and shock of a somewhat similar description, which was experienced with various degrees of intensity in Lancashire, throughout the greater part of the county, and the adjacent districts of Westmoreland, Cumberland, Cheshire, Derbyshire, and the Isle of Man, took place a few minutes before one o'clock on the morning of Friday, March 17, 1843. That appears to have been milder than this, which, besides creating considerable alarm, fortunately seems to have done no damage.

According to all accounts the venerable Palace of Holyrood is fast becoming ready.

A telegraphic despatch says that the ex-Emperor of Austria has been seized with apoplexy.

In the month ended the 10th ult., the quantity of tea entered for home consumption was 5,496,224 lb., against 5,311,655 lb. in the like month of 1851.

The accounts received from the Baltic report the continuance of severe frost and the increase of ice, which threatens to entirely block up the navigation for the season.

A Swiss journal states that the monks of St. Bernard have resolved, in the event of the tunnel of Mennove being constructed, to build a convent and hospital at the entrance to it, and to abandon the existing convent.

The Zoological Society of Amsterdam has just decided on contracting a loan of 1,200,000 florins (about 327,000l.), to be employed in the purchase of the estate and erection of new buildings rendered necessary by the increasing prosperity of the society.

The legislature of Maine has passed an act making telegraph companies liable for errors in despatches, either in transmission or transcript, to the amount paid for transmission to the place of destination in or out of the State.

It appears that recruiting is not what it used to be in Tipperary—one of the grand nurseries for Irish soldiers. A local paper says the 89th Regiment want only 6 men to make up its complement, and they cannot be had at Clonmel in two weeks' canvass of "the roberts" and other attractions.

In the course of some of the improvements now being carried out in the Tower, the workmen have brought to light the cell and staircase of the Beauchamp Tower.

CALENDAR FOR THE WEEK.

SUNDAY, November 14.—Twenty-third Sunday after Trinity. Source of the Nile discovered, 1770.
MONDAY, 15.—St. Machutus. Westminster-bridge finished, 1750.
TUESDAY, 16.—Rubens born, 1577.
WEDNESDAY, 17. St. Hugh. Lotteries abolished, 1826.
THURSDAY, 18.—Cardinal Wolsey died, 1530.
FRIDAY, 19.—Charles I. born, 1600. Blackfriars-bridge opened, 1765.
SATURDAY, 20 St. Edmund, King and Martyr.

TIMES OF HIGH WATER AT LONDON-BRIDGE,
FOR THE WEEK ENDING NOV. 20, 1852.

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday

On the 15th NOVEMBER will be published, price 1s.,

THE ILLUSTRATED LONDON ALMANACK
FOR 1853,
Being the Ninth annual issue of this publication; with splendid ENGRAVINGS, by B. FOSTER, Esq., and other eminent Artists. The Astronomical Department by JAMES GLAISHER, Esq., F.R.A.S., and of the Royal Observatory, Greenwich. The Notes of the Month by Mrs. ALARIC A. WATTS.
London: Published by WILLIAM LITTLER, 198, Strand.
*** Country orders supplied for cash only.

THE WELLINGTON DOUBLE NUMBER
OF THE
ILLUSTRATED LONDON NEWS,
FOR NOVEMBER 20TH,
Will contain, among others, the following Large and Splendid Engravings:—
SCENES AT WALMER
THE LYING IN STATE IN THE DUKE'S ROOM AT WALMER CASTLE.
VISIT OF THE INHABITANTS OF WALMER, DEAL, AND DOVER.
DEPUTATION FROM WALMER BY TORCHLIGHT.
ARRIVAL OF THE HEARSE AT CHELSEA HOSPITAL.

A TWO-PAGE ILLUSTRATION, BY GILBERT,
OF THE
LYING IN STATE AT CHELSEA HOSPITAL.

A SPLENDID TWO-PAGE ENGRAVING:
THE PROCESSION IN ST. PAUL'S CATHEDRAL.
DRAWN BY GILBERT.

A large and elaborate Engraving of
THE FUNERAL CAR.

In addition to the above Engravings, a variety of Illustrations will be given of interesting incidents of the progress of the Funeral Pageant; as well as the following interesting Historical Pictures:—
THE MEETING OF NELSON AND WELLINGTON.
THE DUKE WRITING HIS DESPATCHES.
FOUR PORTRAITS OF THE DUKE, from Paintings by Sir George Hayter; Isabey; the celebrated French painter; and other eminent artists.
WELLINGTON AND GEORGE IV. ON THE FIELD OF WATERLOO.
HAYDON'S PICTURE OF "THE HERO AND HIS HORSE ON THE FIELD OF WATERLOO."
A FINE ALLEGORICAL TABLEAU, by Harvey.
A VIEW OF THE TOWN OF WELLINGTON, from whence the Duke derived his title, &c.

THE MAGNIFICENT ENGRAVINGS FOR PRESENTATION
TO SUBSCRIBERS,
Are in active Preparation: the first of which,
REPRESENTING THE FUNERAL PROCESSION,
WILL BE
Published with the Number for NOVEMBER 27.
Subscriptions should be immediately entered at any Booksellers', or Newsagents'; or at the Office, 198, Strand.

The WELLINGTON NUMBERS are in PRINT, and may be had of Booksellers and Newsagents.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, NOVEMBER 13, 1852.

HER Majesty's Speech, on opening the Session of Parliament, approaches more to the character of a President's Message, as far as length is concerned, than any similar document of our time and country. In that respect, however, it would be ungracious to find fault with it; for if it depart from the ordinary vagueness, the departure is an improvement. Upon one point all parties and subdivisions of parties will be agreed. Before one sacred topic the war of political passions will be stilled; and, amid the deepest sympathy, and a rare but not remarkable unanimity, all other questions will yield precedence to that of the national sorrow. Appropriately, her Majesty's Ministers have devoted the opening paragraph of the Royal Speech to the topic of our late bereavement. The whole nation participates in the grief of her Majesty at the loss of one of the pillars of her throne, of the patriarchal counsellor, and the venerable friend and guide. Her Majesty does not calculate in vain upon the sympathy of the members of both Houses of the Legislature, and may well rely with confidence on their desire to join her in taking such steps as may mark their sense of "the irreparable loss which the country has sustained by the death of Arthur Duke of Wellington."

The first great duty of Parliament is to give formal expression to the nation's grief, and to render its homage to the memory of the illustrious dead. The opening paragraph touches a chord that will vibrate in the nation's heart. But, unfortunately, the discordant thoughts provoked by the anomalous state of the Ministry, in reference to questions which more seriously affect the interests of the living, cannot be lost sight of. Their day will speedily come. Upon the most important of them, the Speech is that of a Ministry dubious, if not divided; and there is an ambiguity in the passage which refers to the topic most dwelt on by the nation, that looks very like a compromise at the eleventh hour. Her Majesty is made to congratulate her Parliament on the generally-improved condition of the country, and especially of the industrious classes; but the strong eulogy of the cause of that prosperity, pronounced by the Chancellor of the Exchequer in propounding his first "Budget," is, to all appearance, purposely qualified in the passage immediately following. "If," her Majesty is made to say, "the Parliament shall think that "recent Legislation," in countervailing, "with other causes," to this happy result, "has, at the same time, inflicted injury on certain important interests," then they are recommended to consider how the agriculture of the country may be made "to meet successfully that unrestricted competition to which Parliament in its wisdom had decided that it should be subjected." This is something more in the way of concession than is probably pleasing to a re-actionary portion of the Ministerial party, while it will, no doubt, be considered as falling short of the admissions expected by the Opposition.

The other topics of the Speech are of considerable interest, and warrant, for the most part, the prominence given to them. The congratulations as to the operation of the Militia Bill; the paragraph as to the American Fisheries question, and the mission to the Argentine Republic; the suggested advancement of the Fine Arts and of Practical Science; the paragraphs as to Ireland, the Church, the Universities, Transportation, and Legal Reform—all show a praiseworthy desire on the part of her Majesty's Ministers to devote their energies to the great questions of the day. Nevertheless, we fear that will not reconcile the mass of the public to the ambiguity of the Speech on the question which, more than all others, absorbs the attention of the great bulk of far-seeing politicians, and all the trading and industrious classes.

On the other hand, the public will not be insensible to the evident desire of her Majesty's Government to preserve a peaceful tone with respect to subjects of a foreign bearing, while evincing a desire to promote inquiry, if not reform, in some important institutions at home. It is satisfactory to know that the tenour of our negotiations with the United States is such as to lead to a hope of the extension of our commercial intercourse; and that, in an important part of South America, an opening has been made for our commerce and manufactures to that fertile and populous continent. In like manner, it would be ungenerous and ungracious not to acknowledge the disposition of the Government to devote State attention to the advancement of the fine arts; or to combine liberal government, with administrative severity, in Ireland; or to promote church reform, university reform, law reform; and attempt a permanent change in our system of transportation. All these suggestions, or promises, disclose in the framers of the Speech a consciousness of their duties as administrators of the affairs of this great nation.

THE COURT.

BUCKINGHAM PALACE.

The Queen and Prince Albert, attended by the Countess of Desart, the Hon. Caroline Cavendish, Hon. Flora Macdonald, the Earl of Yerulam, Sir Edward Bowater, Colonel Hon. Charles Grey, Major-General Buckley, and Lieut.-Colonel Hon. Alexander Gordon, left Windsor Castle, at five minutes before two o'clock on Wednesday afternoon, and travelled to London by a special train on the Great Western Railway. Her Majesty and Prince Albert and the Royal suite proceeded from the Paddington terminus in three of the Royal carriages, escorted by a party of the 13th Light Dragoons, to Buckingham Palace, where they arrived at fourteen minutes before three o'clock. The Queen and Prince were received at the Palace by the Duke of Montrose, the Marquis of Exeter, the Earl of Jersey, the Marquis of Abercorn, Viscount Newport, Viscount Mandeville, Lieut.-Colonel Francis Seymour, and the Master of the Household.

THE QUEEN'S COURT.

Her Majesty held a Court and Privy Council on Wednesday afternoon. At the Court, the Turkish Minister, Monsieur Musurus, had an audience, to present Nubar Bey, who has been sent over by the Pachs of Egypt with the present of some horses for her Majesty. The horses were presented to the Queen in the garden of the Palace.

Count Schiafino, accompanied by Colonel Facio, Mexican Chargé d'Affaires, had also an audience of the Queen. The Colonel has brought some ponies, as a present to her Majesty, from the President of Mexico.

The ponies were presented to the Queen in the garden of the Palace.

The Earl of Westmeriand had an audience of her Majesty on his arrival in England. His Lordship was presented to the Queen by the Earl of Malmesbury.

Her Majesty held a Privy Council at four o'clock. It was attended by his Royal Highness Prince Albert, the Lord President, the Lord Privy Seal, the First Lord of the Treasury, the Secretaries of State for the Home, Foreign, and Colonial Departments, the Chancellor of the Exchequer, the First Lord of the Admiralty, the President of the Board of Control for the Affairs of India, the President of the Board of Trade, the Postmaster-General, the Chief Commissioner of Public Works and Buildings, the Lord Steward, the Lord Chamberlain, the Master of the Horse, and the Groom of the Stole to the Prince.

Her Majesty having been pleased to appoint the Most Hon. John, Marquis of Winchester, to be Lord-Lieutenant of the county of Hampshire, the noble Marquis took the customary oaths.

The Queen having been pleased to appoint the Right Hon. William, Lord Bateman, to be Lord-Lieutenant of the county of Hereford, his Lordship took the customary oaths.

The Queen's Speech, on opening the session of Parliament, was arranged and agreed upon.

OPENING OF PARLIAMENT.

The Queen went in State on Thursday to the House of Lords, to open the session of Parliament with a Speech from the Throne. The procession was formed at Buckingham Palace.

The Queen and the Prince were conducted to the State carriage by the Lord Chamberlain, the Marquis of Exeter, and the Vice-Chamberlain, Viscount Newport.

A guard of honour of the Scots Fusilier Guards was on duty in front of the Palace, and received her Majesty with the usual honours.

The Queen quitted Buckingham Palace at twelve minutes before two o'clock, escorted by a detachment of the Royal Horse Guards. Her Majesty returned to the Palace at six minutes past three o'clock, and was received, on alighting from her carriage, by the Lord Chamberlain and the Vice-Chamberlain.

Her Majesty's Hon. Corps of Gentlemen-at-Arms were on duty at the House of Lords.

THE SUBTERRANEAN TELEGRAPH.

An important feature in this system of telegraph (illustrated at page 386) is, that the limit to which a message can be transmitted, without the break of intermediate stations, is considerably increased. This is material, as the perfect success of this first line on the new plan is expected to lead to its extensive adoption, not only throughout England, but on the Continent, and to India. This increased capability for communicating to great distances arises from the superior conducting property of the metal used, which is pure copper, instead of iron; and from the plan adopted to prevent the escape of the electricity in its passage along the wires, that of covering them with the best insulator known—gutta percha; which, though so applicable for underground telegraph-wires, would not answer for those exposed to the heat of the sun.

This system has also an advantage over the old one, from the circumstance of the wires retaining uniformity of condition, as respects their conducting power, so that the amount of battery required is always the same for any given distance, irrespective of weather. This was strikingly evinced on the day of opening the line, when a single battery was sufficient to convey messages through the line and the adjacent ones; but the French lines, being influenced by the dampness of the weather on that day, required such an increased amount of battery power, as to cause both delay and inconvenience, on their connexion with the submarine line for the purpose of enabling communications to pass direct between London and Paris. Underground lines are also free from risk by lightning.

The length of each wire before laying down is half a mile; and, after each joint, careful experiments are made through the whole line, in addition to the proof the wires are submitted to before leaving the manufactory; so that every care is taken to insure a very perfect work.

The originators of the underground telegraph were the Messrs. Bratt, who took out patents for the plan, and for the submarine telegraph, some years since. The present one was laid down under the superintendence of Mr. Cheshire, Messrs. Friend and Hamill being the contractors.

In our Journal of last week, the engineers were erroneously stated to be Messrs. Crampton and Wollaston.

ELECTION OF MAYORS.—The following returns have reached us:—At Manchester, Mr. Robert Barnes was elected a second time; at Salford, Mr. Frank Ashton, ditto; at Leeds, Mr. John Pope Shaw, ditto; at Birmingham, the choice fell upon Mr. Henry Hawkes, solicitor; at Liverpool, upon Mr. Samuel Holme; at Portsmouth, upon Mr. George Cornelius Bignall; at Oxford, Mr. John Crews Dudgey, solicitor; at Cambridge, Mr. H. Harris; at Nottingham, Mr. Gallen.

THOMAS HOOD'S MONUMENT.—The *Athenæum* of Saturday says:—"An anecdote has been communicated to us on sufficient authority, which may furnish a hint of some kind to those who have the management of the Hood monument, or which, at any rate, it is well that they should know. Hood made a sketch for his own monument, which is still in existence. It consists of a square tablet, on which a figure of himself is reclining. A plain bounding surrounds it, and the simple legend is—"He sang the 'Song of the Shirt.'"

THE "MELBOURNE" STEAMER.—The underwriters of Lloyd's interested in this unfortunate vessel, have signed a protest against her proceeding on her voyage from Lisbon to Australia, unless she first undergoes a thorough repair in the dry dock at Lisbon.

OPENING OF PARLIAMENT.

HOUSE OF LORDS.—THURSDAY.

The doors of the House of Lords were thrown open shortly after twelve o'clock; from which time up to within a few minutes of the arrival of her Majesty, notwithstanding the unfavourable state of the weather, there was almost a continuous arrival of Peers, Peeresses, and persons entitled to be present.

The Lord Chancellor took his seat on the woolsack shortly after one o'clock. Several Peers took the oaths.

Shortly after two o'clock her Majesty entered the House, preceded by the officers of the household and the great officers of State in the usual order. The Earl of Derby bore the Sword of state (in place of the late lamented Duke); the Marquis of Winchester bore the Crown; and the Earl of Lonsdale, the Cap of Maintenance.

Her Majesty having taken her seat on the Throne, Sir Augustus Clifford, the Gentleman Usher of the Black Rod, left the House to summon the Commons.

After a short interval, the Commons having arrived,

Her Majesty read the Royal Speech, as follows:—

THE QUEEN'S SPEECH.

"MY LORDS AND GENTLEMEN,

"I cannot meet you for the first time after the dissolution of Parliament without expressing my deep sorrow, in which I am sure you will participate, that your deliberations can no longer be aided by the counsels of that illustrious man whose great achievements have exalted the name of England, and in whose loyalty and patriotism the interests of my Throne, and of my people, ever found an unfailing support. I rely with confidence on your desire to join me in taking such steps as may mark your sense of the irreparable loss which the country has sustained by the death of Arthur Duke of Wellington.

"I am happy to acknowledge the readiness with which my subjects in general have come forward, in pursuance of the act of last session, to join the ranks of the Militia; and I confidently trust that the force thus raised by voluntary enlistment will be calculated to give effective aid to my regular army for the protection and security of the country.

"I continue to receive from all Foreign Powers assurances of their anxious desire to maintain the friendly relations now happily subsisting with my Government.

"Frequent and well-founded complaints on the part of my North-American Colonies, of infractions, by citizens of the United States, of the Fishery Convention of 1818, induced me to despatch, for the protection of their interests, a class of vessels better adapted to the service than those which had been previously employed. This step has led to discussions with the Government of the United States; and, while the rights of my subjects have been firmly maintained, the friendly spirit in which the question has been treated induces me to hope that the ultimate result may be a mutually beneficial extension and improvement of our commercial intercourse with that great Republic.

"The Special Mission, which in concert with the Prince President of the French Republic, I deemed it right to send to the Argentine Confederation, has been received with the utmost cordiality, and the wise and enlightened policy of the Provisional Director has already opened to the commerce of the world the great rivers hitherto closed, which afford an access to the interior of the vast continent of South America.

"I have the satisfaction of announcing to you that the sincere and zealous efforts of the Government of Brazil for the suppression of the Slave-trade, now nearly extinguished on that coast, have enabled me to suspend the stringent measures which I had been compelled reluctantly to adopt, a recurrence to wh ch I anxiously hope may be proved to be unnecessary.

"The Government of her Most Faithful Majesty have fully recogn sed the justice of the claim which my Government have long urged for the abolition of the discriminating duties on the export of wine, and have passed a decree for giving complete effect to the stipulations of the treaty on this subject.

"You will probably deem it advisable to resume the inquiries which were commenced by the late Parliament, with a view to legislation on the subject of the future government of my East Indian possessions.

"GENTLEMEN OF THE HOUSE OF COMMONS,

"The estimates for the ensuing year will in due time be laid before you.

"The advancement of the Fine Arts and of Practical Science will be readily recognised by you as worthy of the attention of a great and enlightened nation, I have directed that a comprehensive scheme shall be laid before you, having in view the promotion of these objects, towards which I invite your aid and co-operation.

"MY LORDS AND GENTLEMEN,

"It gives me pleasure to be enabled by the blessing of Providence to congratulate you on the generally improved condition of the country, and especially of the industrious classes. If you should be of opinion that recent legislation, in contributing, with other causes, to this happy result, has at the same time inflicted unavoidable injury on certain important interests, I recommend you dispassionately to consider how far it may be practicable equitably to mitigate that injury, and to enable the industry of the country to meet successfully that unrestricted competition to which Parliament, in its wisdom, has decided that it should be subjected.

"I trust that the general improvement, notwithstanding many obstacles, has extended to Ireland; and, while I rely with confidence on your aid, should it be required, to restrain that unhappy spirit of insubordination and turbulence which produces many, and aggravates all, of the evils which afflict that portion of my dominions; I recommend to you the adoption of such a liberal and generous policy towards Ireland, as may encourage and assist her to rally from the depression in which she has been sunk by the sufferings of late years.

"Anxious to promote the efficiency of every branch of our National Church, I have thought fit to issue a Commission to inquire and report to me how far, in their opinion, the capitular institutions of the country are capable of being made more effective for the great objects of religious worship, religious education, and ecclesiastical discipline.

"I have directed that the Reports of the Commissioners for inquiring into the system of education pursued at Oxford and Cambridge should be communicated to the governing bodies of those Universities for their consideration, and I rely upon your readiness to remove any legal difficulties which may impede the desire of the Universities at large, or of the several Colleges, to introduce such amendments into their existing system as they may deem to be more in accordance with the requirements of the present time

"The system of Secondary Punishments has usefully occupied the labours of success.ve Parliaments, and I shall rejoice if you shall find it possible to devise means by which, without giving encouragement to crime, transportation to Van Diemen's Land may at no distant period be altogether discontinued.

"The subject of Legal Reform continues to engage my anxious attention. The Acts passed in the last session of Parliament have been followed up by the orders necessary for putting them in operation; inquiries are in progress, by my direction, with a view of bringing into harmony the testamentary jurisdiction of my several Courts; and bills will be submitted to you for effecting farther improvements in the administration of the law.

"To these and other measures affecting the social condition of the country, I am persuaded that you will give your earnest and zealous attention; and I pray that, by the blessing of Almighty God, your deliberations may be guided to the well-being and happiness of my people."

After the Speech, her Majesty left the House and returned to Buckingham Palace, in the same order in which she arrived.

Their Lordships then adjourned during pleasure.

The LORD CHANCELLOR took his seat on the woolsack at five o'clock.

The attendances of Peers on the Ministerial side was exceedingly numerous, and the Opposition side also mustered strongly.

The attendance of strangers in the galleries and below the bar was numerous, and the gallery appropriated to Peeresses was filled.

THE ADDRESS.

The LORD-CHANCELLOR having read the Speech,

The Earl of DONOUGHMORE moved the Address, and in his speech took occasion to condemn the conduct of a portion of the press of this country in attempting to dictate to the people of France the kind of Government they ought to adopt. The Address, was, as usual, but an echo of the Royal Speech.

The Marquis of BATH seconded the Address.

The Marquis of LANSDOWNE reviewed the military career of the late Duke, claiming for him the gratitude of the House and the nation; and then, adverting to the paragraph in the Queen's speech relating to the commercial policy of the country, he expressed a wish that the Government had been less obscure in its declaration upon the subject, and that the wording of the paragraph had been more intelligible.

Lord BROUGHAM passed a warm eulogium on the late Duke; and, having dwelt at some length upon the position of the country, said he agreed in the necessity of preparing for national defence.

The Earl of DERBY gave a most eloquent sketch of the career of the late Duke of Wellington, and expressed his gratification that nothing was likely to interfere with the unanimity of the adoption of the Address. He saw nothing in our relations with foreign countries which threatened to interrupt the continuance of peace. At the same time, he was of opinion that the best security for a nation against foreign aggression rested on its own internal resources. He congratulated their Lordships on the satisfactory progress which had been made in the organisation of the militia force. He admitted that, within the last three or four years, there had been a very satisfactory improvement in the condition of the working classes. He had examined into the best means of testing the prosperity of the working classes, and found them in the increased use of articles of general consumption, and with increased deposits in the savings-banks. He had no hesitation in saying that this prosperity had been produced by the operation of Free-Trade legislation, which had not been attended by those neutralising accompaniments which he and his party had anticipated. He was aware that other causes had also contributed their share towards the prosperity, such as emigration, the abundance of money, &c.; but, nevertheless, it was mainly to be attributed to the cause he had named. The noble Earl, in conclusion, said that the Government would bow frankly and freely to the expressed opinion of the country, and would as honestly endeavour to carry out the recent commercial policy as if they had been themselves the authors of it.

After a few observations from Lord WODEHOUSE, the Address was agreed to.

Their Lordships then adjourned.

HOUSE OF COMMONS.—THURSDAY.

The Speaker took the chair at one o'clock.

A large number of members took the oaths and their seats.

Shortly after two, Sir Augustus Clifford, the Gentleman Usher of the Black Rod, appeared at the bar, and, advancing to the table, commanded the immediate attendance of the Commons to the other house, to hear her Majesty's Speech read.

The Speaker then left the house, followed by a large number of members.

On their return, the House immediately adjourned until a quarter to four.

The Speaker did not resume the chair till half-past four o'clock.

NOTICES OF MOTION.

Sir J. FITZGERALD gave notice that, on Tuesday next, he should move for a copy of the evidence taken at the coroner's inquest in the Six-mile-bridge affair. Mr. Serjeant SHEE gave notice that, on Thursday fortnight, he should move for leave to bring in a bill for regulating the custom of Tenant-right in Ulster, and securing compensation to improving tenants: and also for limiting the power of evictions in certain cases.

The CHANCELLOR of the EXCHEQUER brought up a report of the treaty with the Republic of Peru.

THE ADDRESS.

The SPEAKER then read the Queen's Speech (for which see Lords report on the same day), after which

The Address was moved by Lord LOVAINE, and seconded by Mr. EGERTON, in brief but conciliatory speeches.

Mr. C. VILLIERS, though agreeing in many of the paragraphs contained in the Queen's Speech, complained that the one which related to the commercial policy of the country was vague and deceptive. Although he would not move any amendment to the Address, he gave notice that, on the earliest convenient day, probably the 22d inst., he would bring forward a resolution which would have the effect of settling finally the question of Free Trade.

Mr. HUME, after a long pause, rose and expressed his approval of the notice given by the hon. member for Wolverhampton. He called upon the Government to avow that it had changed its opinions in regard to the commercial policy of the country.

Mr. WALPOLE denied that the paragraph in question was either ambiguous or evasive. The Government were fully prepared with their measures to lay before Parliament, and they would take the earliest opportunity, after the obsequies of the late Duke of Wellington had terminated, of submitting them to the consideration of the House. The Speech from the Throne was, in his opinion, sufficient to indicate that it was not the intention of the Government to attempt to reverse the recent legislation which had led to such improvements in the condition of the working classes.

Lord J. RUSSELL deprecated a long discussion under the peculiar circumstances in which Parliament had met. He, however, concurred in the course proposed to be taken by the hon. member for Wolverhampton, because he thought it was requisite that the commercial policy of the country should be immediately settled and determined.

The CHANCELLOR of the EXCHEQUER said, he thought that if the paragraph had been so very evasive, as was alleged, an amendment would have been moved. It was true that their unrestricted competition, however generally beneficial, had caused injury to a certain class, and it became the duty of the Government to mitigate the injury it had occasioned. It was not the intention of the Government to propose anything which could give rise to artificial prices; but, as commercial changes had been effected without having made any corresponding financial changes to meet them, it was the intention of the Government to propose a financial policy more in harmony with its commercial. He would take the earliest day to lay that policy before Parliament, and ask its verdict upon it. He would be able, probably, to make this statement on the 26th instant.

Mr. GLADSTONE thanked the hon. member for Wolverhampton for having drawn forth the important statements of two most important members of the Government. He hoped that the hon. member would persevere in pressing forward the motion of which he had given notice.

After some further discussion, in which Mr. Newdegate, Mr. Christopher, Mr. Bernal Osborne, and Mr. Adderley took part,

Mr CORDEN also expressed a hope that the hon. member for Wolverhampton would persevere with his motion, and would not suffer it to be mixed up with any financial or other question.

Lord PALMERSTON, having alluded to the loss sustained by the nation in the death of the late Duke of Wellington, said he considered it absolutely necessary that there should be a declaration made—not by Ministers only, but by Parliament itself—that Free Trade was a policy from which it would suffer no departure.

The Address was then agreed to, and the House adjourned.

(To the Editor of the ILLUSTRATED LONDON NEWS.)

30, Dover-street, Nov. 8, 1852.

SIR,—In your paper of last Saturday, you describe me as a new member, whereas I sat in the last Parliament, though for two months only; and, in your alphabetical list I am called the member for Carmarthen (which is represented by Mr. D. Morris) instead of the member for the county.—Your very obedient,

D. JONES.

THE VACANT SEATS.—Rumour says Mr. W. J. Fox will be M.P. for Oldham after all. The late member for the county of Oxford, Lord Norreys, is the candidate for Abingdon. The Scotch Lord-Advocate—the rejected of Orkney and Shetland—it is said, will be returned for Lisburn.—*The Daily News* says, in reference to the vacancy created by the death of Colonel Brown, the member for Carlow county, it is not very probable that any Liberal will be found to contest the seat.

POSTSCRIPT.

FUNERAL OF THE DUKE OF WELLINGTON.

THE LYING IN STATE.—Friday being the day set apart for the admission of the foreign Ambassadors and Ministers, the nobility, members of Parliament, officers of the army and navy, and the principal members of the aristocracy and gentry, to view the lying in state, as early as nine o'clock carriages began to arrive at the covered entrance at Chelsea Hospital, and between ten and eleven formed a continuous line along the Queen's-road and Grosvenor-row, Sloane-street, and Asylum-row. Amongst the early arrivals were the principal members of the Government, foreign Ambassadors, and members of both Houses of Parliament, who, on alighting, passed through the vestibule into the chamber where lay the body of the departed hero, surrounded by the mournful paraphernalia on occasions of lying in state. The several parties having passed through the room, departed at the exit door in Queen's-road. The throng increased hourly. At five the pressure was immense. The route from the Hospital to Belgrave-square was filled with the carriages of visitors waiting to be set down; and, in spite of the inclemency of the weather, the pedestrians assembled in an equally surprising manner.

THE FUNERAL CAR.—A preliminary experiment was made on Friday, the authorities having thought it desirable to test its capabilities by directing it to be drawn the whole line of route, bearing, in addition, at least such equivalent weight as would be placed thereon on the day of the funeral. The experiment was perfectly successful.

HOUSE OF LORDS.—FRIDAY.

Their Lordships met at five o'clock.

LAW REFORM.

In reply to questions from Lord Lyndhurst, the LORD CHANCELLOR was understood to say, it was his intention to introduce a measure for the purpose of reducing the expenses of Commissions in Lunacy under the Court of Chancery, also one to carry out the recommendations of the Criminal Law Commissioners. He would take the earliest opportunity possible to state the nature of these measures, as well as of others relating to Law Reform which he also proposed to introduce.

Lord BROUGHAM expressed his satisfaction at the announcement.

THE ADDRESS.

The Duke of MONTROSE (the Lord Steward) announced that her Majesty had been graciously pleased to return an answer to the Address agreed to by their Lordships last night, to the following effect: "I thank you for your loyal and dutiful Address, and it shall be my constant desire to promote measures calculated to advance the permanent happiness and prosperity of my people."

FUNERAL OF THE LATE DUKE.

The Duke of MONTROSE also presented a special message from her Majesty, which was read by the Lord Chancellor, to the following effect:—"Her Majesty, desirous of marking in the most solemn manner her sense of the pre-eminent services of the late Field-Marshal the Duke of Wellington, and of affording to her subjects an opportunity of testifying their admiration of his memory, and their sorrow for the loss which they have sustained by his death—has directed that measures should be taken for the public interment, at the earliest possible period, of his Grace's mortal remains in the cathedral church of St. Paul. The Queen is persuaded, that, in taking this step, her Majesty has only anticipated the general wish of Parliament and the country, and that you will afford to her Majesty your cordial aid and concurrence in giving to the mournful ceremony a degree of solemnity and importance worthy of the country and of the occasion. Her Majesty is confident that you will readily concur in any suitable provision which may be made by the liberality of the House of Commons, for the due discharge of a debt of public gratitude, and a tribute of national sorrow."

The Earl of DERBY gave notice of his intention to move that her Majesty's most gracious Message be taken into consideration on Monday next, and to move that a committee be appointed to inquire into the most proper means to carry into effect the wishes of her Majesty.—Adjourned till Monday.

HOUSE OF COMMONS.—FRIDAY.

The House met a little before four o'clock.

Petitions, complaining of the returns for the boroughs of Great Yarmouth, Bridgenorth, and Tavistock, were severally presented.

BETHLEHEM HOSPITAL.

In reply to a question from Mr. Fitzroy, Mr. Secretary WALPOLE said that the report and the evidence taken by the Commission of Inquiry into outrages said to have been committed in Bethlehem Hospital, would be laid upon the table of the House as soon as it should be returned by the Governors of the Hospital, to whom it had been submitted for their observations.

BETTING-HOUSES.

In reply to another question from the same hon. member, Mr. WALPOLE said, it was the intention of the Government to bring in a bill to put a stop to the betting-house nuisance in the metropolis.

FUNERAL OF THE LATE DUKE.

A message from her Majesty stated that she had given directions for the interment of the late Duke of Wellington in St. Paul's Cathedral; and her Majesty relied upon her faithful Commons to provide means to make the necessary arrangements for conducting the funeral obsequies with befitting solemnity.

The CHANCELLOR of the EXCHEQUER gave notice, that, on Monday next, he would move that her Majesty's Message be taken into consideration.

POLICY OF THE GOVERNMENT.

The CHANCELLOR of the EXCHEQUER gave notice that he would make his statement relative to the commercial and financial policy of the Government on Friday, the 26th inst.; but, in the event of any unlikely hostile attempt being made against the Government, he would reserve to himself the right of altering the present arrangement.

STATE OF IRELAND.

On the motion for bringing up the report upon the Address,

Mr. FAGAN took the opportunity of expressing his dissatisfaction at the paragraph in the Queen's Speech relating to Ireland, implying that outrage and turbulence prevailed there, which he denied to be the case.

Mr NAPIER said the paragraph applied to the past and not to the present state of Ireland.

Mr. Serjeant SHEE complained that the paragraph relating to Ireland was not true in fact. He wished to know if it was meant to insult Ireland, on the one hand; or, on the other, to bring in new measures of coercion?

Mr. Secretary WALPOLE said that the Government had no intention of introducing any new measures of coercion. On the contrary, they were in hopes that before long they might relieve Ireland from a measure of coercion which had been last session renewed for one year. They proposed to pursue towards Ireland a liberal, generous, and high-minded policy; and they would, in a short time, introduce a measure to settle the relations of landlord and tenant in that country, giving to the latter compensation for unexhausted improvements.

The report upon the Address was then agreed to.

THE KAFFIR WAR.

In reply to an observation from Lord J. Russell, Secretary Sir J. Pakington said that, by the last advices, the Kaffir war appeared to be dying out.

BILLS OF EXCHANGE—THE DUKE'S FUNERAL.

Mr. Secretary WALPOLE gave notice that on Monday next he would move the suspension of the standing orders, with a view of carrying a bill through all its stages on the same day, the object of the bill being to provide that all bills of exchange and promissory notes falling due upon the day appointed for the late Duke's funeral, shall be treated as if it was the Lord's day.

Adjourned until Monday.

On Thursday, on the nomination of the Council of his Royal Highness the Prince of Wales, Francis Howell, of Ashy, Esq.; Richard Fowler, of Castle, Esq.; Thomas Graham Graham, of Kenquite, Esq., were appointed to serve the office of Sheriff of the county of Cornwall.

On Thursday a most destructive flood took place at Birmingham.

A most disastrous fire broke out in Romford, Essex, on Thursday night.

On Friday there was an unusually high tide in the Thames.

LATEST FOREIGN NEWS.

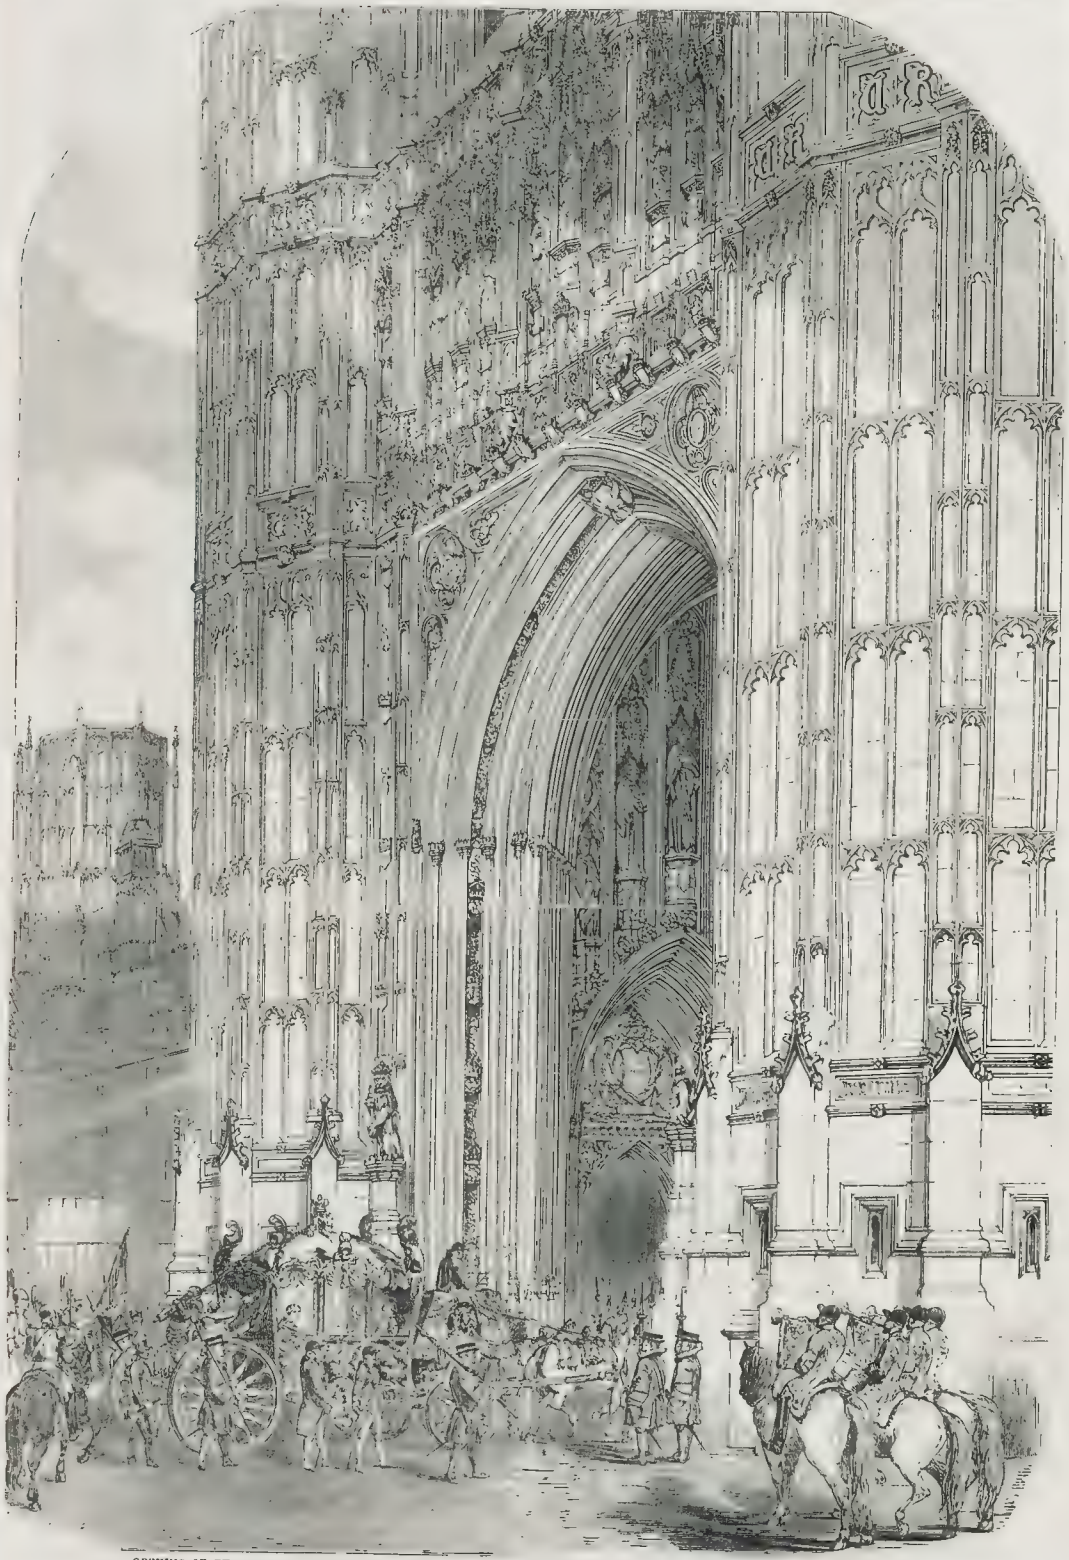
THE OVERLAND MAIL.

(By Electric Telegraph.)

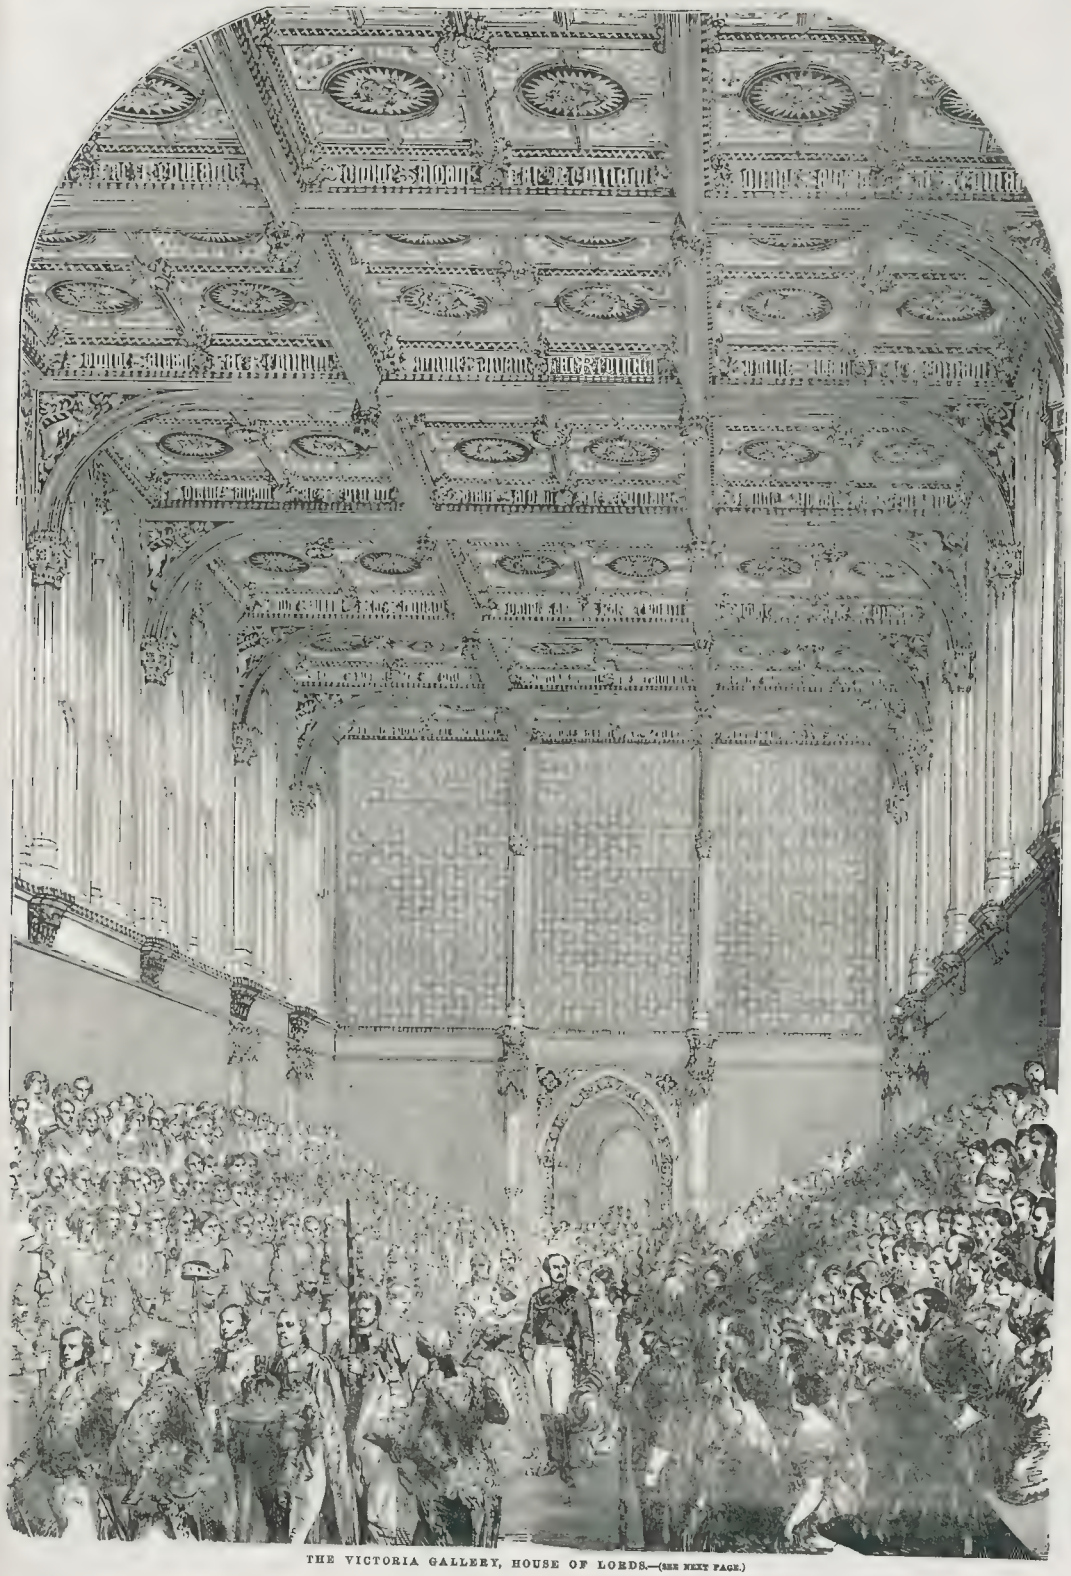
TRIESTE, Thursday, Nov. 11.

The steamer *Adria* arrived this day from the river Rangoon, with dates to the 26th of September. The first division for Prome, consisting of her Majesty's 18th R.I., her Majesty's 80th, and 35th Madras Infantry, with eight guns, and some Sappers and Miners, had just left, and was accompanied by the General, Admiral, Commodore Sir J. Cheape, and almost all the chiefs of departments. The second brigade was to follow within three or four weeks. It was expected, on its arrival at Prome, that Pegu would be surrendered and annexed, and the campaign over.

The China insurrection against the Emperor is gaining strength.



OPENING OF THE NEW PARLIAMENT.—ARRIVAL OF HER MAJESTY AT THE VICTORIA TOWER, HOUSE OF LORDS.—(SEE PAGE 402.)



THE VICTORIA GALLERY, HOUSE OF LORDS.—(SEE NEXT PAGE.)

THE NEW HOUSES OF PARLIAMENT.

Upon the preceding pages we have illustrated the splendid ceremonial of the Opening of Parliament by her Majesty, on Thursday, in a pair of large Engravings by Mr. J. L. Williams, showing also the last completed portions of this magnificent edifice.

THE VICTORIA TOWER.

This imposing portion of the New Palace is placed at the south-west angle of the pile of buildings. In plan it is square, with octagonal turrets at the angles; and from Old Palace-yard there are two great archways, one on the west and the other on the south side. The archways are marvellously fine; their immense size, their deep mouldings, and their profuse enrichments of Tudor roses and crowns in the hollow of the arches, and also the roses and leaves (forming the background, as it were, to the other decorations in the sieles), make up a superb *coup-d'œil*. The apex of the arch is formed by a group of three angels, crowned, holding the Royal shield crowned; quatrefoils fill the spandrils over the archway, and in them are angels holding shields, surrounded by the garter, containing, respectively, the Royal Arms, and those of Edward the Confessor. The whole surface of the turrets is panelled with trefoil-headed arches, and small quatrefoil divisions, containing the Royal monogram; and, between the great arches and the turrets, the walls of the Tower are enriched with small panels, with badges of the arms of the three kingdoms. Lions, holding scrolls, are seated on pedestals on each side of the doorways. Above the archways is a series of panels filled with quatrefoils, containing roses, *fleurs-de-lis*, and portcullises; and above these panels are niches, with tracerial pinnacles of great beauty. The central niche, which has a richer canopy than the rest, contains a statue of her Majesty: and the other niches are filled with statues on pedestals. Above these niches is another series of square panels, filled with roses, *fleurs-de-lis*, and portcullises; and higher yet there are, on each face of the Tower, three windows, divided from each other by piers of immense solidity, deeply moulded. Each window is traceried in the head, and also in the transoms: and higher up the Tower is again a series of elaborately-enriched paneled and other windows; and above this the Tower will rise still higher, to an immense altitude. The outside diameter of the Victoria Tower is about 70 feet.

THE VICTORIA GALLERY.

This magnificent gallery is the longest, and will be, when finished, the most superb of all the apartments in the new Palace: it is gradually approaching completion. It measures in length about 110 feet; in width, 45 feet; and in height, 45 feet. It is lighted by windows on each side, elevated at some height above the ground; and the wall under the windows, beneath a broad space intended for a sculptured frieze, is at present plain, but will be filled with large paintings in fresco. Between the windows, and resting on a bracket (on which is sculptured the Royal monogram, crowned) are columns with elaborately decorated capitals to carry the tie-beams, which are boldly moulded. The ceiling is divided into eighteen compartments; each compartment being sub-divided into four by lesser ribs, and at the intersect on of the lesser ribs, are *pateræ* of extreme richness of carving; those down the centre of the ceiling containing the sun in splendour; those on the western side, the Lion of England; and on the eastern, the Spread Eagle of Saxe-Coburg. At the intersection of the lesser ribs are circles, each filled with a Tudor rose, surrounded by a rayonated glory, very richly sculptured. The spandrils round the circles are filled with lions, in circles: three being gold on a red field, and one red on a gold field; and each having the floral symbols of England, Scotland, and Ireland. These are painted. The bosses on the ceiling are wonderfully fine and varied in character, and at the intersections of the main ribs are pendants fashioned as Royal crowns. The spandrils on the main ribs have in them, on the eastern side of the gallery, lions; and on the western, unicorns; with roses, shamrocks, and thistles, boldly sculptured and p.erced through. There are entrances at both ends of the gallery, one communicating with the House of Lords, the other with her Majesty's robing-room. These entrances are in deeply recessed and highly elaborated doorways, with niches for statues on either hand; and there is another doorway, at the southern end of the west side of the apartments, similarly adorned, and also having niches. The door leads to the entrance known as the Norman porch, at the top of the grand staircase. The large spaces on the walls, at the ends of the gallery, between the pillars supporting the longitudinal ties of the roof, will be filled with frescoes; at present they are only decorated with hangings, powdered with portcullises, roses, and crosses.

THE MOVERS AND SECONDERS OF THE ADDRESS.

THE EARL OF DONOUGHMORE,

MOVER OF THE ADDRESS IN THE HOUSE OF LORDS.

The Earl of Donoughmore, who was selected by her Majesty's Ministers to move the Address in the House of Lords, is not altogether new to political life. He has on more than one occasion exhibited ability as a speaker, and good sense as a party man.

According to the peerage books, Richard John Hely Hutchinson is the fourth Earl of Donoughmore. He was born in the year 1823, and married a daughter of Walter Steele, Esq. The father and grandfather of the noble Earl were not unknown to contemporary history. His father was the second son of the celebrated Hely Hutchinson. After sitting for some years as a member of the Irish House of Commons, he (holding a commission in the army) raised a regiment at his own expense, with which, in 1793, he served against the Irish rebels. He subsequently served in the unfortunate campaigns with the Duke of York, in Holland; and, from thence, went to Egypt, where, on the death of Sir Ralph Abercrombie, he succeeded to the chief command, and brought the expedition to a successful close. In 1801 he was made an Irish Peer, and was further rewarded with a pension of £2000 per annum, and the rank of Lieutenant-General. He was then engaged in diplomatic missions to Russia; and, having been made an English peer, he plunged into politics. Although he attached himself to the Whig party, he was selected in 1815 by the then Ministry, to negotiate (at St. Omer's), with the present Lord Bronghan, the terms on which Queen Caroline would absent herself from England. His elder brother, then Lord Donoughmore, was one of the peers who upheld the cause of the Queen in 1820. He was a man of upright and independent character, and a speaker of no ordinary eminence.

The family have been mainly resident in Ireland. A great portion of the present Earl's youth was spent there. He served some time in China as Lieutenant in the 98th Regiment. When of age he entered Parliament, where he took an interest in Irish questions. The noble Earl spoke in the House of Lords in a debate originated by the Marquis of Clanricarde with respect to the present application of public funds for educational purposes in Ireland. From this, and all his subsequent speeches, it is evident that Lord Donoughmore is not indifferent to those social questions which agitate his native country.

The noble Earl stands high among the Freemasons; being Senior Grand Warden of the Grand Masonic Lodge of Ireland, and Patron and Passed Master of Donoughmore Lodge, Clonmel. He is Lieut.-Colonel of the Tipperary Militia. His Lordship resides at Knock-olty, near Clonmel.

THE MARQUIS OF BATH,

SECONDER OF THE ADDRESS IN THE HOUSE OF LORDS.

Of the Marquis of Bath we have but little to say, except what appertains to his family honours. This young nobleman is only just of age, and has therefore had no time or opportunity to distinguish himself in public life His Lordship, John Alexander Thynne, is the fourth holder of the title, which was granted in 1789. He was born in 1831, and succeeded to the marquisate in 1837. He has therefore such worldly advantages as accrue from a protracted minority to a man of property. The noble Marquis is patron of ten livings. We believe that, like his father and grandfather, he graduated at Cambridge University. Report speaks well of this young nobleman's abilities, and of the practical political knowledge he has acquired at home and abroad.

LORD LOVAINE, M.P. FOR NORTH NORTHUMBERLAND,

MOVER OF THE ADDRESS IN THE HOUSE OF COMMONS.

Lord Lovaine is the eldest son of the Earl of Beverley, the heir presumptive of the Duke of Northumberland. His mother was Louisa Harcourt Wortley, third daughter of the late Hon. James Archibald Stuart Wortley, and sister of the present Lord Wharncliffe. The noble Lord was born in the year 1810. He was educated at Eton; and proceeded in due time to Cambridge University, where he was of St. John's College. He entered the army in 1827, in which (in the 76th and Grenadier Regiment of Guards,) he served ten years. In the year 1839 he took his degree as Master of Arts; and in 1842 the honorary degree of Doctor of Laws was conferred on him by the same University. In the year 1842 he was made Captain in the Northumberland Militia, and in 1845 he married Louisa, the eldest daughter of Mr. Henry Drummond, of Albury Park, Surrey. He is a magistrate and a deputy-lieutenant for Northumberland, and also a magistrate for Surrey.

In 1831 Lord Lovaine was in Parliament as member for Berwick. In 1841 the noble Lord was a candidate for the city of Exeter, in opposition to Mr. Divett, the Liberal member; Sir William Follett being the other Conservative candidate. In the course of this election, it was alleged against the Conservative party, that they had unfairly sought to thrust Lord Lovaine upon the constituency. Sir William Follett, for himself and his supporters, repudiated this charge. Lord Lovaine was not permitted by his more clamorous opponents to give any explanation, but the result showed that the battle had been well fought: Lord Lovaine polled 1119 votes, while Sir W. Follett numbered 1302, and Mr. Divett 1192.

At the general election for 1847, and on the retirement of Mr. Cresswell, Lord Lovaine was invited to become a candidate for North Northumberland, his opponents being Sir George Grey and Lord Ossulston. He had now afforded him a more ample opportunity of explaining his political creed, which was of a decidedly Protectionist character. In this contest his Lordship was again unsuccessful to obtain a seat in Parliament; although, the race was even closer than during the struggle for the representation of Exeter, in 1841.

At the last general election Lord Lovaine attained the object of his ambition, and succeeded in ousting Sir George Grey from the representation of North Northumberland. His Lordship's speech at the nomination of candidates on Tuesday, April 27, and whatever courage he possessed was fully brought out by the dashing address of the right hon. Baronet who had preceded him. In the course of his remarks, on the hustings, he said he thought he had a right to ask the right hon. Baronet what were to be the open questions of the Administration which was to succeed Lord Derby's? The abolition of the Monarchy?—the destruction of the House of Lords?—the abolition of the union of Church and State?—for all these questions had been discussed by the new associates of the Whigs in their assemblies. It was reported that the right hon. Baronet had said he was not ashamed of joining them, but he (Lord Lovaine) must be excused for not believing this. He could not believe that the man who stood so boldly and so nobly in the gap, when the institutions of this country were threatened by open violence without, and, if report said true, by treachery and cowardice within, during the last two years, would unite, without some feeling of shame, with those who had openly declared that capital owes no allegiance to the Crown or country; and had actually weighed the lives and properties of their fellow-countrymen, and the rents of English woods, against the money to be paid for their protection. After this somewhat vague denunciation of his political opponents, Lord Lovaine began the assertion of his modified views on the subject of Protection. "Free Trade," he said, "was a good thing when nations reciprocally interchanged commodities on a fair system of duties levied for the purposes of revenue, and he believed that corn formed no exception to the general rule; but he had already stated, that to attempt to impose such a change without the general consent of the nation, would be unadvisable and dangerous; and as there was no sign of such a consent, he would be no party to such a measure. But the Free Trade of the right hon. Baronet taxed one article and not another, and allowed the foreigner to derive an undue advantage from the industry of the Englishman. With regard to the franchise, he was not opposed to its extension, provided that sufficient safeguards were taken to protect the rights of property—to prevent the beggar being placed above the owner of property, the fool above the wise man, and the faggot-voter above the the independent farmer. Lord John Russell promised a reform bill, in which the influence of property should be respected; and how did he keep his word? Why as the Whigs always did. He proposed to give franchise to beggars in the streets of London, and place them on a level with the richest merchants, the wisest philosophers, and the most industrious tradesmen in the greatest city in the world. The noble Lord stated his objection to the ballot, and to the admission of Jews to Parliament, and, after an attack upon Lord John Russell for his Durham letter, concluded by an assertion of the necessity of a supervision of nunneries in the country, a safeguard adopted in Catholic countries, and, therefore, peculiarly desirable in this.

From all this it would seem that Lord Lovaine is not wanting in what is called moral courage; while on the other hand, he exhibits an amiable readiness to square his views with those of the chiefs of his party, descending gracefully from "Protection" to "reciprocity," from "reciprocity to the "something looming," with a facility that might almost be envied by Mr. Disraeli himself. In fact, the noble Lord is evidently quite a model county member; and his merits are attested by his having been selected to move the Address by a Ministry disposed to harmonise its policy with the wishes of the public at large. Lord Lovaine is a speaker of more than average merit.

MR. E. C. EGERTON, M.P. FOR MACCLESFIELD,

SECONDER OF THE ADDRESS IN THE HOUSE OF COMMONS.

Mr. Edward Christopher Egerton is the fourth son of Wilbraham Egerton, Esq., of Tatton Park, by Elizabeth, second daughter of Sir Christopher Sykes, Bart., of Sledmere House, Yorkshire. Mr. Egerton was born at Tatton Park in 1816. He was educated at Harrow, whence he proceeded to Christ Church College, Oxford, where he graduated as B.A. in 1837. He was called to the bar at the Inner Temple in June, 1840. He obtained a fellowship at All Souls College, and graduated as B.C.L. in 1841. He married, in 1845, the Lady Mary Frances, second daughter of the second Earl Manvers.

Mr. Egerton is not wholly new to election contests. In July, 1850, on the elevation of Sir John Jervis, the late Attorney-General, and long-tried M.P. for Chester, to the bench as Lord Chief Justice, Mr. Egerton stood for the borough. Chester has from time immemorial been the electoral battle-ground of three great neighbouring families. Of these families, that of Grosvenor, unfortunately possesses the most influence, in consequence, according to the unimpeachable Dod, of the vicinity of their principal residence, and large property in the neighbourhood. This electoral influence is not confined to the city, but spreads over both divisions of the county; so that it is very unusual not to see, in the House of Commons list, the name of a Grosvenor, a Stanley, and an Egerton, as holders of one or all of the seats in county and city. Turning to the year 1840, at random, we find a Stanley and an Egerton representing the Northern Division; and Egerton the Second and a Grosvenor (in the person of the noble member for Middlesex), Lord Robert Grosvenor, the city. In the list of the present Parliament, we have again a Grosvenor sitting for the city, and an Egerton for each division of the county.

On the occasion to which we refer, in July, 1850, Mr. Edward Christopher Egerton, the subject of this memoir, contested with Mr. E. O. Stanley, the vacant seat; Mr. Stanley representing Whig, and Mr. Egerton, Tory interests. The Whigs being at the time in power, Mr. Stanley carried the day, polling 986 votes to his adversary's 617.

Still aided by family and local influence, Mr. Egerton, at the last election, turned his attention to Macclesfield, which in the last Parliament had been represented by Mr. John Brocklehurst and Mr. John Williams. He succeeded in turning out Mr. Williams, and now represents the borough on Conservative principles. He professes, however, the more Liberal tendencies attributed to a portion of the party. He is opposed to the re-imposition of a duty on corn; but, with Mr. Disraeli, proposes to re-adjust the burthens of taxation. He gives a general support and confidence to Lord Derby; and is favourable to a moderate extension of the suffrage.

MUSIC.

M. JULLIEN'S CONCERTS.

The annual series of amusing evening entertainments, given by M. Jullien, at Drury-lane Theatre, commenced last Monday night, with the customary events of the opening performance; namely, a house filled in every crevice, with an excited and noisy audience, evidently highly gratified to gaze again at the brilliantly-lighted crystal-curtain and at the white calico hangings, with their characteristic emblems, and to be enabled to wander through the well-suppled refreshment and reading-rooms as well as their crowded state would admit. M. Jullien announces in his programme, that "his success in England has procured him proposals of the most flattering description from the musical amateurs of the New World, and of a nature so advantageous that he has not been able to resist entering into engagements to visit the United States." He adds with *naïveté* that he hopes his trip "may not only be productive of pecuniary gain to himself, but may furnish him with materials for novelty in his return to this country." There cannot be the slightest doubt of M. Jullien's successful career in America. If he has been able to maintain a position in London for so many years, with an advanced state of musical knowledge, what reason can there be to doubt his complete triumph in less civilised regions? But it must be conceded that M. Jullien will be able truthfully to present himself in the United States as a symbol of art-progress here. His popularity has arisen from a combination of fortuitous circumstances, with which the cause of elevated music has had the least to do. M. Jullien has had the tact to follow in the wake of Strauss, Musard, and Labitzky, in the improvement of dance, music: he scores a quadrille with piquancy and point; he presents us with exhilarating polkas, he inspires us with whirling waltzes of graceful themes, and he thoroughly understands the mode of developing the attributes of the most accomplished soloists. Above all, M. Jullien's concert schemes have always been lively, if sinning sometimes on the side of boisterousness and exaggeration. Serious matters have never satisfied much importance to the introduction of isolated movements from the symphonies of the great masters. No doubt, the hearing of these classic gleanings has lubricated the ear of the masses to the sound and quality of instruments; but the names of Beethoven and Mendelssohn, inserted in such a manner, must be looked upon more as a "sop to the critical Cerberus" than as indicative of any high and genuine purpose on the part of the Gallic speculator, who was acute enough to know the advantage of concentration. It may be, however, asked if, now that fourteen seasons have elapsed since Jullien entered the field, his miscellaneous audience is a bit nearer the appreciation of an entire work? This question may be unhesitatingly answered in the negative. Despite of "Mendelssohn and Beethoven nights," the hearers consider the symphonies and concertos as a bore, and as simply a foil to the dance selections. M. Jullien's speciality has been acquired and maintained by his picturesque orchestration of dance music, by his eccentricities, and by the generally attractive features of the house arrangements. These antecedents will insure him a welcome across the Atlantic, though with him as he will his very clever leading conductors of the orchestra.

For this farewell season M. Jullien has engaged the brothers Mollenhauer, who display very remarkable precision in passage-playing on the violin; Mr. Wulle, a Belgian clarionet performer of no ordinary ability; and M. Arban, the celebrated cornet-à-piston. Amongst the old favourites are Koenig, Baumann, Lazarus, Barret, Jarrett, Cioffi, Collinet, Maycock, Prospere, Vogel, Reinmuat, De Folly, Howell, Chipp, Howland, &c. The vocalists selected for the season are Miss Anna Zerr, whose brief but recent engagement affords the greatest pleasure to the audience, especially in her *cheval de bataille*, the air of the "Queen of Night," from "Il Flauto Magico," in which her extensive compass is so strikingly developed; a new polka, "Les Echos de Mont Blanc," which M. Jullien the composer, has dedicated to Albert Smith, calls into play the talents of Koenig and Arban very advantageously. Koenig, in the "Prima Donna" *solos* of Jullien, also provokes much enthusiasm; in fact, the cornet-à-piston is unquestionably the most popular instrument at the concerts. Instead of the military bands of former years, the services of a chorus of more than a hundred voices, have been put in requisition; in the National Anthem, and in the selections from Meyerbeer's Huguenots this aid is more grateful to the ear, than the brazen crashes of the open-air players.

M. Jullien's season will be brief, and when he has departed, it will be no easy task for his successors to provide such gay and brilliant concerts; but it would be certainly more agreeable if those speculators, who may follow him, would abstain from dance entertainment from the classic programme.

MUSICAL EVENTS.

Sacred Harmonic Society.—It is intended to perform an appropriate selection of music at Exeter Hall, under Costa's direction, as a tribute to the memory of the Duke of Wellington. Mendelssohn's "Christus" will be performed for the second time, when the choruses are better prepared for its due execution; on the other hand, Spohr's "Last Judgment" was so magnificently rendered that its repetition will be desirable on an early occasion.

London Sacred Harmonic Society.—Handel's "Messiah" will be performed next Monday, at the opening concert, under Mr. Surman's occasion.

Oratorio at the Hackney-road Wesleyan Chapel.—Haydn's "Messiah" was performed on Tuesday night, for the benefit of the Trust Fund, under the conductorship of Herr Anschuez. Mr. J. Hoskins presided with ability at the organ. The chief vocalists were the Misses Stabbach and Lascelles, Messrs. G. Tedder and Lawler. The band and chorus numbered about 150 performers; and the oratorio was steadily rendered.

Marylebone Literary and Scientific Institution.—Under the direction of Sig. Fossi, an evening concert took place on Wednesday. The vocalists were Miss Eyles, Signora Greco, Sig. Campanella, Sig. Puglieri, Mr. Wrighton; and the instrumentalists, Senor Frost (flute), Mdlle. Coulon and Sig. Pagi (pianoforte), Herr Von Heddeghem (violin), and Mr. Case (concertina).

Brighton Musical Union.—The first concert took place at the Royal Pavilion on Thursday evening. The executants were Mome, Oury (pianoforte), Messrs. Oury and Hill (violins), Mr. W. Cramer (viola), and MM. De Munck and Porgule (violoncellos).

M. Eduard de Paris Concert.—A numerous and fashionable audience assembled at the Brighton Pavilion, for the annual concert of this pianist, under the patronage of Lady Jane Peel. M. Santon, the violinist, and Regondi the concertinaist, assisted M. de Paris in the instrumental solos. The vocalists were Madame Fiorentini, Miss E. Philips, and Mr. Bodda. Madame Fiorentini was in beautiful voice, and sang "Prayschutz" (Oberon), "Ah'le Halle" in German and Spanish songs in which she was enthusiastically encored.

English Opera at Brighton.—Miss J. Bleaden, Miss Julia Harland, Mr. E. L. Hime, Mr. H. Corri, Mr. Drayton, Mr. Jones, and Mr. Sims Reeves, have been singing in English operas with great success, at Brighton.

Bath Harmonic Society.—Under the direction of Mr. Bianchi Taylor, with Mr. George Field, as pianist, the first concert took place on Tuesday, at the Assembly Rooms.

The Organ at Exeter Hall.—Important additions have been made by Mr. Walker, the builder, under the direction of Mr. Brownsmith, the organist of the Sacred Harmonic Society. There are now 1122 pipes in the great organ, 840 choir, 403 swell, and 314 pedal, making a total of 2679 pipes, with eight coupling stops in addition. The compass of the great and choir organs is from F F F to G in alt, 56 keys; the swell from C C to G, 56 keys; the pedals contain 2½ octaves, 29 notes. The pneumatic system has been more extensively applied, and three sets of keys may now be played simultaneously, without any extra exertion on the part of the performer. A great increase of power has been attained by the addition of a powerful ophicleide-stop, which will come into play in massive choral points. The coupling movements have been so constructed that the instrument may be used as a C C organ.

Parisian Musical News.—The Paris letters and journals of the week are barren of interesting intelligence as to matters musical. The revival of Rossini's four act opera "Moïse," known at the Royal Italian Opera in London under the title of "Zora," has been very successful. Madame Laborde, Mdlle. Poinsot, Mdlle. Dorz. MM. Duprez, Gueymard, Lucien, Obin, Gueymard, and Morelli sustained the principal parts, and Mdlles. Taglioni and Bagdanoff were in the corps de ballet. Gueymard and Morelli were encored in the duo, between *Amenophis* and *Pharaon*, in which Tamberlik and Tamburini created such a sensation. M. Clapasson's new opera, "The Mysteries of Udolpho," the libretto by Scribe and Germain Delavigne, produced on the 4th at the Opéra Comique, has been well received. Mdme. Viardot has returned to

Paris, she has not accepted the offer tendered to her for next season, either at Her Majesty's Theatre or at the Royal Italian Opera, and, in all probability, will go to Germany or Spain, for which countries she has brilliant offers of engagement. Sig. Corsi's company for the forthcoming season at the Paris Italian Opera consists of Mdlle. Cruvelli, Mdlle. Vera, Signor Beltramelli, as sopranos; Madame Borghi-Mamo, Mdlle. Nantier Didée and Mdlle. Dumpierl as contraltos; Bettini, Calzolari, Negrini, and Ghiostri as tenors; and Marini, Balletti, Arnaud, Arnoldi, Valli, Susini, and Altini as basses. Sig. Castagneri will conduct the orchestra.

THE THEATRES, &c.

LYCEUM.

A new and original comic drama, in two acts, first produced at Sadler's Wells, has been performed at this theatre with much success. It is by Mr. John Daly, and entitled "Married Daughters and Young Husbands;" and merits notice from a certain freshness of subject and handling which it exhibits. The dialogue is remarkably racy and natural; and the different items of the story are wonderfully well dovetailed together. The story consists of the manœuvres of *Mrs. Gorey* (Mrs. F. Matthews) to get her chickens (her daughters) well matched with husbands, and of the early revils of their married lives. Two of these, at the opening of the play, have been disposed of—one to *Mr. Pong* (Mr. Suter), a grocer, and the other, to *Mr. Dicky Spooner* (Mr. Hooby), a foppish kind of gentleman, who loses his money by betting on the race-course. The piece commences with preparations for the marriage ceremony of *Miss Anna* (Miss J. Oliver), with *Alfred Vavil* (Mr. H. Butler), a gentleman-like merchants' clerk, whose income is supposed to be greater than it is, and who has been extravagant in his presents to his intended bride, believing her to have a portion and expectations from a rich uncle. The marriage takes place, but the young man is unhappy, having accepted a bill for £150, which becomes due on the Saturday announced for his wife's "at home." The character was performed with much gentlemanly ease and grace, and, slight as it was, was made really interesting. Out of this difficulty the new-married couple, however, are delivered by an eccentric uncle, *Mr. Godbury* (Mr. Frank Matthews), who, after bumbling the pride both of *Mr. Vavil* and *Mr. Spooner*, by sending them for a pot of porter and pipes from the neighbouring public-house, proves a real friend to both *Mr. Pong*, the grocer, is a humorous individual, who, not ashamed of his trade, enters the drawing-room in his shop costume; and, finding that *Mr. Spooner* has borrowed from his wife some forty pounds, with which he had expected to pay his rent, strips off his coat to box with his brother-in-law on the spot. All these, with *Mrs. Pong* herself (Miss Julia St. George), are veritable life-like portraits, drawn with apparent facility, and without exaggeration. Excellently acted as the drama now is, and addressed to a refined audience, justice will be rendered to the evident talent of the author, with whom the public will be glad to meet again.

ADELPHI.

A piece from the Haymarket, entitled "A Wife for a Day," has been imported into this establishment, for the purpose of giving a new character to Mr. Selsbee, in the part of the Yankee brother, who pretends to be the husband of his sister-in-law, and suffers all manner of perils and untoward accidents from a chivalrous feeling of fraternal affection—such fee ing being accompanied with rude manners, and even vulgarity. Out of the contrast, a rich fund of pathos and humour is provided, on which Mr. Selsbee draws abundantly to the delight of the audience. The farce was preceded by the excellent melodrama of "The Flowers of the Forest," the character of *Starlight Bess* being admirably impersonated by Mrs. Keeley.

CITY OF LONDON.

This theatre, on Wednesday evening, distinguished itself by the production of a new and original five-act play; a circumstance note-worthy in itself, as marking the extension of the legitimate drama into a channel where it is desirable it should be found, as an agent in the proper education, not only of the people, but of the populace; and still more deserving of attention, from the fact that the actual drama produced on the East-of-London boards is a piece of handiwork, not simply creditable to the worker, but meritorious in a high degree, as an example of elaborate and successful dramatic art. Designed for a hard-working audience, we recognise in this no merely *amateur* essay at dramatic composition, but a thoroughly business-like aptitude—an intimate acquaintance with the stage, and a talent for dramatic dialogue, both gay and grave; together with a distinctive portraiture of various character, rich both in power and promise. The title of the piece is "Civilisation;" and its subject the adventures of a *Huron* in Paris at the end of the seventeenth century. The author is Mr. John Wilkins, a name obscure at present, but de erving of future distinction. The savage is brought in an English vessel to St. Malo, where he succeeds in interesting the prior, the *Père Gabriel* (Mr. W. Searle), and shows himself exceedingly curious to understand what "civilisation" is. He receives different parties he receives different definitions, and resolves on ascertaining the truth by experience. He submits to the ceremony of baptism, and is named *Hercule*. In the second act, we find that he has discarded his Indian costume, and appears in the garb of a Frenchman. At this juncture, the English crew in whose company he reached the coast, are discovered to have commenced an attack. It is necessary that the town should be defended; but neither *M. Francis*, the high-bailiff (Mr. A. Saville), nor *Tobie*, his son (Mr. Corano), prove to be sufficiently courageous to lead on the peasantry. *Hercule* (Mr. James Anderson) becomes their leader; and the enemy is repul-ed from the shores of France. *Hercule* naturally expects gratitude for his services—such gratitude from "a civilised" man as the savage would willingly render. But he is deceived; he has not yet learned "civilisation." Envy is fertile in p ots against him. The bailiff w ites to the Prime Minister that he is an English spy, and that the attack and defence of the coast was part of a preconcerted plan for ulterior purposes; and *M. Lacelles* (Mr. N. T. Hicks), a secret agent of the Ministry, thwarts him in his love for *Hortense* (Miss Marian Lucy), one of the prior's wards. He discovers that *Hortense*, by assuming as sponsor at his baptism, has disqualified herself, under the ecclesiastical law, from becoming the wife of *Hercule*. To get rid of this difficulty the Pope must be appealed t, and, probably, through the King. *Hercule* determines to proceed to Paris or Versailles, and see the King, claiming the boon as some recompense for his military service. But here he finds unexpected difficulties. The Prime Minister, *M. De Louvois* (Mr. Worrell), has been prejudiced against him by the bailiff's letter; and, in his attempt to encounter the King personally, he falls into altercation with the courtiers, who wish him as a match for whom they please, and is finally shut down and incarcerated in the Bastile. Here he is visited by *Hortense*; and soon afterwards released by order of the King, who has become interested in his story. *Lacelles* meanwhile procures a *lettre de cachet*, meaning to fill up the blank with *Hercule's* name, and thus procure his perm anent imprisonment. The Premier, too, determines on his ruin, because, in an interview with him, *Hercule* had rejected with scorn the offer of the situation of Equerry, as a reward for his services and wrongs, demanded a Captaincy instead. The King is, however, amused with what off nds his cour iers, grants *Hercule's* suit, and commands them to pay especial respect to his person and wishes. *Lacelles*, proceeding in his malignant project, ultimately commits himself, and is outwitted by one *Victor le Bel* (Mr. W. Travers), who procures a dispensation from the Pope, which the former seeks to possess for the purpose of destroying, and pretends to sell it to him, in order to lull his vigilance, but in reality only parts with a copy. The result is that *Hercule* is enabled to defeat all *Lacelles's* designs, and to consign his rival to the Bastile by means of the very blank letter intended for himself. And thus *Hercule* gets a better notion of the complex nature of "civilisation" than that with which he had commenced his career. The act-ng throughout of the play was very respectable; and Mr. Anderson deserves great praise for the spirit and vigour which he displayed in the part of the hero. One defect the play has, it is too didactic; but Mr. Anderson, fortunately, was no orator in his elocution than usual; and the crowded audience listened with intense respect to the lessons of moral and political wisdom with which the character is perhaps overcharged. But we are loth even to cast this censure on so honest and sterling a pie ce of gd writing; and are g adied in being able to conclude with the assurance that this effort of the author was unquestionably successful. Though it might have been anticipated that such a theme was somewhat above such an audience, we are compelled to add that every point in it was apparently well appreciated. Such a production and such a rec-p-tion show the wisdom of the legislature act, universalising the liberty of the stage and permitting the highest specimens of the dr.ma to be produced by any management sufficiently enlightened for the purpose. Mr. Nelson Lee deserves to be encouraged in this attempt, and it is to be hoped that he will find it to his interest to repeat the experiment.

CHESS.

TO CORRESPONDENTS.

CHESSICUS.—In the diagram No 43 of the last *Chess Player's Chronicle* the White Kt at Black K's 3rd square, should be a *Black* Kt—so a second diagram in our present Number shows the same problem in a correct form. We are interested to see how many of our English amateurs will hit upon the correct *mode* of approach for White at his 10th move.

J. B. Sheffield.—We return you our best thanks for the trouble you have taken. The Problem is ingenious, but the solution is not much to the purpose.

J. F. B.—Received.

KAPPA throughout.—A very pretty little game, for which we shall find a place shortly.

W. B. Leaming.—His Diagram has been returned, as it required some slight amendment.

PERSEUS.—The Game in Mr. Sutton's fine Problem (No. 456) has been carefully corrected, and it shall be reprinted ere long.

RICHARD.—The SIMILAR KAPPA, and 3 more. No correspondent has yet hit upon the true *modus operandi* for White in the game between Anders n and Dufresne, which we put home in our last. The possibility of the game was hinted to withhold for a short time, that we may put the sagacity of our readers to the proof.

W.—The Book of the Tournament Games is published by Bohn, of Covent-garden. The price is. The same work is out of print.

A Z, Birmingham.—Your copy shall have a reprieve of all the Chess-clubs in the kingdom; together with the names of the secretaries, and the places and hours of meeting, should he be a ble one that might long ago to have been acted upon. No one thing would tend so much to promote the prosperity of a provincial club, as its being thus honourably recorded in all Chess-players. If the secretaries will do their part, by sending us such particulars as are required, we shall not fail to do ours, by giving the publicity to them.

ORIENT.—Mr. Cochrane is the best player in India. No native player of the present day would have a chance against him in a set encounter. Your subscription towards the sets for the Chess Problem Tourney should be sent to the editor of the *Chess-Player's Chronicle*.

P. D. Bruges.—A second number has been despatched.

B. B.—Sent from Your last explained copy, dated October 24th, reached us this week, but we have requested to wait for the article you mention by Signor Centurini, of Genoa.

SOLUTIONS OF PROBLEM No. 455, by Messrs. Jacobson, J. M. of Stockport, Perlin, Solitaire, Argus, P. L. J. H. of Hastings, R. to Astford, Mentelpha, G. F., Arthur T. P. C. M. O. C., Lyrak, Rev. T. U. H., Rev. H. L. D. D. Oakall, B. H. S., Rushmeade, Bodger, A Boy of Great Yarmouth, are correct. All others are wrong.

MATCH BETWEEN MESSRS. HARRWITZ AND WILLIAMS.

The following is the score in this contest up to the time we write, viz.:—

Harrwitz ..	..	.. 3	Drawn 1
Williams ..	..	.. 0	

SOLUTION OF PROBLEM No. 457.

WHITE.	BLACK.	WHITE.	BLACK.

2. R takes K B P	B takes Kt (best)	4. B to a B 3d.—Mate.	

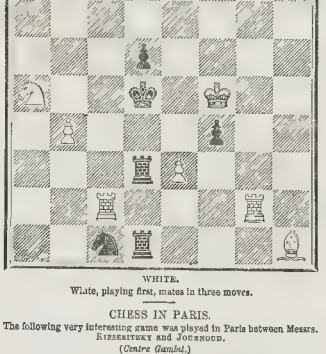
SOLUTION OF PROBLEM No. 458.

WHITE.	BLACK.	WHITE.	BLACK.
1. R takes B (ch)	B takes R	4. Q to K 4th (ch)	R takes Q
2. Q to Q R sq (ch)	Q to Q 6th	5. Kt to K B 5th.—Mate.	
3. Q to Q R 7th (ch)	Kt to Q B 4th		

PROBLEM No. 459.

By the Rev. H. BOLTON.

BLACK.



WHITE.

White, playing first, mates in three moves.

CHESS IN PARIS.

The following very interesting game was played in Paris between Messrs. RIESSEITZKY and JOURNOUD.

(*Centre Gambit.*)

WHITE (Mr. J.)	BLACK (Mr. K.)	WHITE (Mr. J.)	BLACK (Mr. K.)
1. P to K 4th.	P to K 4th	22. K to R sq	B to K B 3d
2. P to Q 4th	P takes P	23. B to K B 5d	B to Q 5th (d)
3. Kt to K B 3d	P to Q B 4th	24. K to Kt sq	Kt to Q B 7th
4. B to Q B 4th	P to Q Kt 4th	25. R to Q 3d	B to K Kt 8th (e)
5. B to Q Kt 3d (a)	Kt to Q B 3d	26. Q takes B (f)	R takes B (ch)
6. Castles	Q Kt to Q Kt sq	27. K to R sq	B to K 6th
7. B to K B 4th	Q Kt to Q Kt 3d	28. R to Q sq	B to Q 5th
8. Q Kt to Q 2d	P to Q 3d	29. R takes Q P (g)	Kt to K 6th
9. P to Q B 4th	Kt to Q Kt 5th	30. Q to K R 3d	B takes Q Kt P
10. P to Q 5	Kt takes B	31. Kt takes Q B P	Kt takes Kt
11. P takes Kt	Kt to K B 3d	32. Q takes Q P (h)	Kt to K 6th
12. Kt to Q 4th	Kt takes Q P (b)	33. P to Q R 3rd	Kt takes Q R (i)
13. Kt takes K	P takes Kt	34. P takes Q	Kt to K B 7th (ch)
14. Q to K 2d (ch)	Q B to Q 3d	35. K to Kt sq	Kt takes Q
15. B to K Kt 5th	B to K 2d	36. P takes B	Kt takes K B P
16. P to Q Kt 4th	Castle	37. R to Q 7th	B to Q Kt 5th (ch) (k)
17. Kt to Q 2d	Kt to Q h 5th	38. K to R sq	B to Q Kt 3d
18. Q R to Q B sq	P to Q 4th (c)	39. R to Q Kt 7th	Kt to Q 4th
19. K to K sq	P to Q B 5th	40. K to his 2d	B takes Q R P
20. P to K B 4th	P to Q 6th	41. R takes B	Kt to K B 6th (ch)
21. Q to K B 3d	B to K 3 4th	42. K to Q 3d	Kt takes R
	And White gave up the game.		

(a) The youngest player will perceive that he would have cost his adversary K his game if he had taken the Pawn.

(b) If he had taken the Q Kt Pawn with his Knight, the following would probably have been the common way of continuing:—

WHITE.	BLACK.	WHITE.	BLACK.
12.	Kt takes P	14. Q Kt to K 5th (ch)	K to Q B sq (best.)
13. Q to K 3rd (ch)	K to Q B sq (best)	15. Kt takes B and wins	

(c) Black's object in this move is to obtain a dangerous attack, and well certainly give the adventurous player trouble, as he has a right to do.

(d) The opponent, at first view, to remove White a little, but his position is one of extreme peril nevertheless.

(e) Well played.

(f) It would have been better perhaps to have played the Queen to K Kt 3d, instead of taking the Bishop, at this moment.

(g) It was impossible to avoid the loss of a Rook for the Kt or Bishop, if Black chose to take it.

(h) He should have taken the Q Pawn with the K Rook, and he would then have stood a fair chance of drawing the game, we believe.

(i) M. Journoud omitted to take this rash move, but when he attacked the Q on

(k) This last or penultimate Black game is certainly played by M. Kieseritzky.

CHESS IN THE PROVINCES.

Smart little affair played at the Hull Chess Meeting, between Messrs. LOWENTHAL and LUCENTE.

(*Petroff's Defence to the Kt's Opening*)

BLACK (Mr. H.)	WHITE (Mr. L.)	BLACK (Mr. H.)	WHITE (Mr. L.)
1. P to K 4th	P to K 4th	19. Q to K B 3d	Kt takes Kt
2. Kt to K B 3d	Kt to K B 3d	13. R takes Kt	Q B to K 8th
3. Kt to Q B 3d	Kt to Q B 3d	14. Q to K Kt 3d (d)	Cast es
4. B to Q Kt 5th	B to Q B 4th	15. B takes B	Q takes B
5. B takes Q Kt	Q P takes B	16. P to K B 3d	B to Q 3d
6. Cas tles (c)	Q to Q 3d	17. Q to K B 2d	Q to K 2d
7. P to Q 3d	P to K R 3d	18. Q takes Q R P (e)	Q to K R 5th (ch)
8. P to K R 3d	P to K Kt 4th (b)	19. K to Kt sq	R takes K Kt P (ch)
9. Kt to K R 2d	Kt to K sq		
10. Q B to K 3d (c)	P to K Kt 5th	20. K takes R	R mates
11. P takes P	Kt takes K P		

(a) If he had taken the K's Pawn, White would have taken his K B Pawn, checking, in return.

(b) Not advantageous, as it will be found, as minute the assault he has now commenced with unbounded spirit and vivacity.

(c) He should have preferred playing Kt to Q R 4th.

(d) Very hazardous but "one of the merry dangers," Mr Horwitz "plunks the flowery," for he manages to extricate himself from jeopardy in a miraculous manner occasionally.

(e) With a quiet characteristic of this brilliant but incautious player He rushes reckless into difficulties, escapes from them with marvellous ingenuity; and lets when his game is tolerably secure again, he throws it away by some hallucinations which would discredit a tyro!

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

On Sunday night, on the Liverpool and Crosby line, a Mr. Hanner and his niece lost their lives, by being thrown between the train and the platform, by a sudden movement of the former.

A "chair" of Homœopathic Medicine is about, it is said, to be established in the University of Berlin.

The betrothal of the Princess Anna, daughter of Prince Karl of Prussia, with the Prince Frederick of Hesse-Cassel, took place last week, at the Palace of Charlottenburg.

Cannon, the sweep, is to be transported for life.

Mr. Roney, secretary to the "Great Dublin Industrial Exhibition for 1853," has arrived at Berlin, and is actively engaged in promoting the views and interests of the committee.

The *Liverpool Albion* says:—"Out of fifteen vessels from Liverpool recorded in the Underwriters'-rooms, this week, as wrecked or putting into port with damage, only three are British."

Measures are about being taken to prevent encroachments upon Peckham-common.

Fifty-eight persons have renounced Popery in St. Paul's, Bermondsey, since the 16th of September last.

Letters of the 31st ult. from Rome state that the sentence on Mr. Murray has been commuted to hard labour for life.

A fund is being raised for placing a memorial window to the poet Wordsworth in the church now rebuilding at Cockermouth, his birth-place

The pay of the Melbourne postmen has lately been raised from 6s. to 10s. a day.

Captain Wode, 13th Light Infantry, is appointed Civil Commissioner of the Seychelles Islands.

Capel Hanbury Williams, Esq., is appointed stipendiary magistrate at Port Natal.

During the passage to Liverpool last week of the *Princess Royal* steam ship, when off the *Crosby* lightship, a respectably attired man threw himself overboard; and, though the boats were quickly lowered and his body was recovered, life was extinct.

The *Dublin Express* states that "the New Ross petition will be pushed forward with vigour; and, as it proceeds on sure grounds, it seems certain that Mr. Duffy will be compelled to vacate his position."

Mr. Penny, late commander of the *Lady Franklin* and *Sophia*, has been honoured by the Duke of Northumberland with an interview, and has received a gratifying acknowledgment of his own services and of those under his command from the present Board of Admiralty.

Workmen are at present employed in restoring the statues and marble vases in the gardens of the Tuileries.

On Saturday night last a fire broke out on the premises of Messrs. Paton and Charles, the extensive soap-boilers, Wapping, which destroyed property to the amount of several thousand pounds.

Mr. Baylis, inventor of the fire-escape, committed suicide last week.

At the Small Debts Court, Inverness, last week, a man named Chisholm was awarded one farthing in a breach of promise case.

Four deaths have occurred in one family, in Camberwell, from eating dahlia roots.

On Saturday last, a man from the "diggings" was robbed of £460.

A Sailors' Home will shortly be established in Cork.

Last week, Mr. R. Bourne, the founder of the Primitive Methodists, died at an advanced age, in Staffordshire.

Mr. Brydges, the assistant-secretary, will succeed, it is understood, Mr. Harding, as secretary to the London and South-Western Railway.

Sir John Tyrrell has resigned the Colonelship of the West Essex Militia, in consequence of a misunderstanding with the Lord-Lieutenant, Lord Maynard.

Mr. James Gordon Bennett, proprietor of the *New York Herald*, arrived at Southampton by the *Franklin* steam-ship from America, on Monday last.

The Law Amendment Society held its first meeting for the session on Monday night.

A bullion agent and an emigration agent were committed at Liverpool on Monday, for defrauding Robert Gardner, of Nuneaton, who was on his way to New York, of between £200 and £100.

An Irish contemporary enumerates, amongst the eminent men to whom Ireland has given birth, that of *Saturan Tate!*

A Parliamentary blue-book, obtained by Sir W. Molesworth, M.P., on the "Affairs of New Zealand," has just been published.

The Duchess de Montpensier was safely delivered of a Princess on the 8th inst.

On Saturday night last a destructive fire broke out in the sheds of the York and North-Midland Company, Hull. Damage was done to the amount of £22,000.

At a meeting on Saturday, at Manchester, it was determined to extend the time for the League Essays till March 1st.

Last week three men were killed by the fall of an embankment at Sheffield, on the Manchester, Sheffield, and Lincolnshire Railway.

Mr. Howe, an undergraduate at Oxford, was drowned in the Isis last week.

The Government have officially notified to the Corporation of Portsmouth that they will not sanction the construction of commercial docks upon Government property in that town.

Caligmani says the iron works in the north of France are now fully occupied.

First-rate steamers are to be put on the line between Glasgow and Liverpool next spring.

It is rumoured that the Cambridge University Commission recommends the establishment of four new Professorships, whose salaries are to be paid out of a fund created by the abstraction of £30 per cent. from the incomes of the fellow ships.

Mr. Sparks, jun., of Liverpool, the gentleman whose legs were shattered by a railway carriage at the Huyton station of the London and North-Western Railway recently, died last week.

A correspondent of the *Times*, writing from South Australia, says the persons who reap least benefit from the diggings are the diggers.

The emigration to Australia from the United States is on the increase.

A fugitive slave case occurred at St. Francisco, without occasioning the slightest excitement.

Great excitement has been suddenly produced at Quebec, in consequence of severa. deaths having occurred from cholera.

The number of students who have inscribed themselves at the University of Padua for the next scholastic year exceeds 2000.

Lord John Russell is to take the chair at the *soirée* of the Leeds Mechanics' Institution, which is to take place on the 2d of December.

A farmer named M'Ardle, residing near Castleblaney, has been arrested for the murder of Mr. Bateson, and committed to Monaghan gaol, on a warrant sent down from Dublin Castle.

During last month the number of emigrant vessels which sailed from the port of Liverpool was 42, containing 17,243 souls. In October, 1851, the vessels were 53, with 20,104 souls.

Mr. John Pemberton, of Birkenhead, a law-student, and his wife, have been committed to take their trials at the next Cheshire sessions for cruelty to their servant girl, named Elizabeth Maddon.

A meeting of the friends of the establishment of tribunals of commerce in this country was held on Wednesday in London.

The *Italia e Popolo*, the Mazzinist organ of Turin, was seized, by order of the public prosecutor, on the 4th.

Colonel Sheil, her Majesty's representative at the Court of Teheran, has just left his post, and is *en route* for England, suffering, it is said, from extreme ill-health.

WELLINGTON'S FUNERAL MARCH.

Larghetto con moto. M. M. 𝅗𝅥=66.

LAW AND POLICE INTELLIGENCE.

The brother of the Chancellor of the Exchequer, Mr. James Disraeli, of No. 4, Vice-street, Regent-street, has been appointed to the Treasurership of the County Courts of Nottinghamshire, Derbyshire, and Lincolnshire, circuits 17, 18, and 19. The salary is stated to be £400 a year with £150 a year for a clerk.

SCOTCH LAW CHANGES.—It is now definitively settled that Mr. J. Marshall, Dean of Faculty, will succeed to the vacancy on the bench caused by the resignation of Lord Medwyn.

LUMLEY V. GYE.—In the Exchequer Court, on Friday (yesterday), Mr. Gray applied, under the new statute, for a rule to show cause why the defendant should not be at liberty to traverse certain matters contained in the declaration. The action in which the damages were laid at £30,000, was brought by Mr Lumley, the late director of her Majesty's theatre, against Mr. Gye, the manager of the Covent-garden Opera House, for having prevented Jenny Lind from singing at that theatre in breach of her engagement, in accordance with a contract entered into with Mr. Lumley. The declaration set out that the defendant counselled and advised her not to fulfil the engagement, and succeeded in enticing her from it and causing damages which she might be made liable to by reason of breaking the contract. The Court requested that the affidavits should be amended, and that the matter should be brought before a Judge at chambers.

"GEMS" AT JULLIEN'S CONCERTS.—At Bow-street, on Tuesday, Robert Garden, army saddler and accoutrement maker; Edward Kemp, a young gentleman, who stated that he was "living with his friends," and was said to be the son of a General; and John Williams a naval officer, were placed at the bar before Mr Henry, charged with creating a disturbance and assaulting the police at Jullien's Promenade Concert, at Drury lane Theatre, on Monday night. Inspector Jarkin, of the A division, described the character of those unseemly disturbances at Drury-lane. A number of young gentlemen made it a rule to go in a party, apparently for no other purpose than to get up a row. They usually commenced by raising a cry of 'A ring, a ring!" upon which they formed themselves into a circle, enclosing a large body of respectable and peaceably-disposed persons. A piece of money in paper was thrown down, and then the "ring" made a rush towards the centre. The people who were encircled naturally pressed outward, and thereby set up an equal crush in the opposite direction; while the police, who did their best to capture the ringleaders, were knocked about on all sides. Mr. Henry fined Williams and Garden £5 each, and sentenced Kemp to fourteen days' imprisonment.

NATIONAL SPORTS.

The Warwick and Leamington November meeting comes off on Tuesday and Wednesday next; and, with the sale, and steeple-racing, is likely to show plenty of sport. There is nothing else of the kind on paper until the following week. The coming fixtures are as follow:—Tuesday, Malleny; Wednesday, Spelthorne and Sunderne; and Thursday, Chatsworth.

TATTERSALL'S.

MONDAY.—The business transacted this afternoon was barely sufficient to admit of a quotation. The following were the nominal prices:

	SEFTON HANDICAP.	
4 to 1 agst Doubt (t)	5 to 1 agst Retail	6 to 1 agst Warwick
	6 to 1 agst Little Fawn	
	CHESTER CUP.—30 to 1 agst Nancy	
	DERBY.	
13 to 1 agst West Australian	20 to 1 agst Cossa (t)	50 to 1 agst The Mayor of
100 to 8 agst Pearce	100 to 1 — Pearce	Hull

TUESDAY.—Very few members present, and only two bets laid; viz:—20 to 1 each, in fifties, against Umbriel and Elmsthorpe.

LIVERPOOL AUTUMN MEETING.—WEDNESDAY.

SCURRY STAKES.—Jupiter, 1. Henrietta, 2.
SELLING STAKES.—Noodle, 1. True Girl, 2.
AUTUMN STEEPLECHASE Carrig, 1.
AINTREE STAKES. Truth, 1. Fleet, 2.

NORTHALLERTON RACES.—THURSDAY.

TWO YEAR-OLD STAKES.—Zeta, 1. Lord Faucenberg, 2.
NORTH RIDING HANDICAP.—Jack Connolly, 1. Bit of Blue, 2.
AMATEUR STAKES.—Quiz, 1. Black-eyed Susan, 2.

FRIDAY.

MAIDEN PLATE.—Agnes Wickfield, 1. Barbatia, 2.
FAREWELL STAKES. The Gip, 1. Ada, 2.
NORTHALLERTON HANDICAP.—Child of the Mist, 1. Alp, 2.

NEWCASTLE BOAT-RACE.—Candlish won by four boats' lengths.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

The actual amount of money business doing in the Consol Market this week has been comparatively small. Although slight fluctuations have taken place in the quotations, the value of each description of stock has been fairly supported. Several operations having been entered into for a fall, the supply of stock now in the hands of the jobbers is larger than for some time past. This circumstance is chiefly attributable to the re-establishment of the Empire in France. However, on the whole, the position of the national stocks is very satisfactory, and we also but take cause at present to anticipate any material decline in their value. Money for all commercial purposes continues very abundant, and the quantity of paper afloat is at great beyond recollected precedent. In Lombard-street great competition still continues for first-class acceptances, which are freely taken at 2 per cent. per annum.

The unrivalled prosperity of the trade of the import and export trade of the United Kingdom, during the month ending on the 10th ult., are very favourable. As compared with the corresponding month of 1851, they show an increase in our export trade of £1,093,238. The aggregate values of our shipments, during the first nine months of the year, has been £54,391,438, against £53,304 978 in the same period in 1851. Compared with the corresponding period in 1850, the increase is £4,104,587.

The movement in the Bullion trade still continues active. This week about 360 000 do lars have arrived from New York, and nearly £200,000 in gold from Australia. About £50,000 in silver has come in hand from France, owing, it is presumed, to the comparatively high value of that article here. Against the above we have to place several rather heavy parcels of gold and silver forwarded to different continental ports.

On Monday, Tuesday, and Wednesday, the ruling value of the Three per Cent Consols was 100⅛ ⅜; of the Three per Cents Reduced, 99⅝ ⅞; and of the New Three-and-a-Quarter per Cents, 103⅜ ⅝. Exchequer Bills, 1000 have been purchased about £50,000 Consols, but the transaction has not had much effect. On Thursday the market was far from active, as follows:—Bank Stock, 213; Three per Cents Reduced, 99⅛ ⅜; Three per Cent Consols, 100⅛ ⅜; Long Annuities, 19⅝; India Bonds, under £1000, 57s.; and Exchequer Bills, 73s. a 75s., premium.

On the whole, the Foreign Houses has been tolerably firm, and prices have ruled steady. Swedish Loan has marked 1 discount; but Turkish Scrip has ruled firmer, at from 3 to 3½ prm. The improvement in the value of the latter is attributed to a notice issued by the contractors, Messrs. Dewaux and Co., to the effect that in a short time it is their intention to call a special meeting of the parties immediately interested in the Loan. Many of the holders entertain great doubts whether the indemnification of 7½ per Cent. will be realised. At all events, it is clear that the whole of the original amount will be raised. The quantity of Spanish Stock operated on by the Rimi is of £1,000 000, out of £4,000 000. In future the bonds will have to be transmitted to Madrid for conversion, the period allowed for that purpose here having expired.

A considerable loss has taken place in the value of gold, in Paris, where English sovereigns are worth 25f. 20 cents to 25 cents. This is an extraordinary feature, when we bear in mind that the stock of bullion in the Bank of France is two or three millions sterling in London.

On Thursday, Brazilian Five per Cents, were done at 100⅛; Danish Five per Cents, 103; Grenada Deferred, 10⅜; Mexican Three per Cents, 22½; Portuguese Five per Cents, Converted, 40; Portuguese Four per Cents, 28; Russian Five per Cents, 118 ⅛; Sardinian Five per Cents, 98½. Spanish Three per Cents, 20½; Ditto, New Deferred, 25½; Turkish Six per Cent Loan, 2 to 2 prm.; Dutch Two-and-a-Half per Cents, 59½; Dutch Four per Cents, 97⅞. Bargains have taken place in Buenos Ayres, at 81½; Peruvian Six per Cents, 104 and 103½; the Deferred, 62⅜; Russian Four-and-a-Half per Cents, 104⅝ to 105½; and, Spanish, 41.

Amongst the miscellaneous Share business, transactions have taken place in the Bank of Australasia Shares at 64⅜; Bank of British North America, 59; English, Scottish, and Australian Bank, 23; Provincial Bank of Ireland, 6⅝; Ditto, New, 17⅛; Union Bank of London, 18⅜ to 18; Australian Royal Mail Steam, 3 to 3⅛; Crystal Palace, 5; General Steam Navigation, 28⅜ to 29⅜; Mediterranean Land Exchange, 2½; Peninsular and Oriental Steam, 87 to 87½; Ditto, New, 46; Royal Mail Steam, 79¼.

Dock Shares have continued firm. Commercial Stock has been done at 103; East and West India, 157½ to 158; London, 130 to 128½; St. Katharine, 84½; South-Western, 55 to 56.

Although long since anticipated, a considerable fall has taken place in the value of French Shares. Such seem to be the panic, that the holders generally refused to take speculative business from parties unless they give additional security. Here the market has become very excited, with every prospect of lower terms, as it is evident that many of the estate *Rails will be compelled to* suspend operations. English Shares have been tolerably steady. Transactions have taken place in the Boston and Midland Counties Railway and Dock Company's scrip, at 10s. to 20s. premium. The following are the official closing prices on Thursday:—

ORDINARY SHARES AND STOCKS.—Ambergate, Nottingham, and Boston 65; Bristol and Exeter, 104½; Caledonian, 8⅞; Cork and Bandon, 17; Eastern Counties, 12½; Eastern Union, B and C, 6¼; Edinburgh, Perth, and Dundee, 25; Great Northern Stock, 83½; Ditto, Half A Stock, 48; Ditto, Half B Stock, 119; Great Southern and Western (Ireland), 80⅜; Great Western, 94½; Irish South-Eastern, 6⅜; Lancashire and Yorkshire, 86⅜; Ditto, Fifths, 11⅛; Leeds Northern, 17½; London and Brighton, 109½; London and North-Western, 124⅜; Ditto, Fifths, 16; London and South-Western, 85¾; Londonderry and Coleraine, 13½; Manchester, Sheffield, and Lincolnshire, 41; Midland, 79⅜; Ditto, 1 ... C ... Newcastle and Berwick, 74½; Newry and Enniskillen, 3½; North British, 6⅜; Oxford, Worcester, and Wolverhampton, 48½; Scottish Central, 79; Scottish Midland, 61; South Devon, 22; South-Eastern, 78½; Waterford and Kilkenny, 4½; West London, 6; York, Newcastle, and Berwick, 7⅛; Ditto, Extension, 2⅜; Ditto, Purchase, 7⅛; York and North Midland, 57⅜.

LINES LEASED AT FIXED RENTALS.—Buckinghamshire, 110; Clydesdale Junction, 95½; East Lincolnshire, 18½; Gloucester and Dean Forest, 39½.

PREFERENCE SHARES.—East Anglian, 3½; Seven per Cent., 3⅝; Eastern Counties, No 2, 4 prm.; Great Northern, 113. Great Western, 4 to 4½ per cent, 110; Lancashire and Yorkshire, 6; Manchester, Sheffield, and Lincolnshire, Six per Cent, 8½; Ditto, Seven per Cent, 7½; Ditto, Five per Cent, 149; Ditto, Four and a-Half per Cent, 9½; North British, ... Newcastle and Berwick, 4½; Oxford, Worcester, and Wolverhampton, 8½; Scarborough and Cleeker, 17½. Western and Brazil, 5½; Ditto, Purchase, 7½; York and North Midland, 57½.

DEFERRED DIVIDENDS.—East Indian, 22½; Grand Junction, 42; Great Junction of France, 7½; Great Western of Canada, 11; Luxembourg, 7½; Ditto, Half-way, 4¾; Manchester and London, 8½; Northern of France, 34; Northern of France, Irrefragable, 9½; Paris and Lyons, 28½; Paris and Strasbourg, 33½; Paris, Caen, and Cherbourg, 9½; Quebec and Richmond, 3⅜; Rouen and Havre, 19½; Sambre and Meuse, 10½; Upper Canada, 8⅜; Vigo, 8 prem.; Western of France, 17½.

A moderate business has been done in Mining shares. On Thursday Agua Fria were 2½; Anglo-Californian, ½ to ⅝; Australian, 4½; Aus ralian Freehold, ⅛; British Iron, 7½; Brazilian Imperial, 5½ to 5⅝; Ditto del Rey, 20½; Cobre Copper, 43⅜; Colonial Gold, 1⅞; English and Austra ian Copper Smelting Company, 4½; Liberty, 2½; Mariquita, 1½; New Granada, 1; Nouveau Monde, 1⅝; Port Phillip, 1½; Scott, 3½; Scottish Australian, 1½.

FRIDAY AFTERNOON.—We have had a very inactive market for Consols to-day. In prices, however, very little change has taken place. The Three per Cents Reduced, are 100⅛ ⅜; Ditto, Consols Account, 100⅛ ⅜; New Three per Cents, 103½; and the New Three-and-a-Quarter per Cents, 103⅞. Bank Stock, 213½; India Bonds, 58s; and Exchequer Bills, 73s prem. Turkish Loan, 1½ to 2 prm.; Spanish Scrip, 1 dis.; Ditto, Passive, 4½. Ready. In Railway shares are dull, and all French lines continue to decline, with a heavy market.

THE MARKETS.

CORN EXCHANGE (Friday).—During the present week the arrivals of English wheat up to our market, coastwise have been only 2 930 quarters, chiefly from Essex and Kent, and in very middling condition. To-day the supplies of both sorts of wheat were moderately large; the show of samples was limited. For all kinds we had only a moderate inquiry; nevertheless, Monday's prices were supported. For foreign wheat very few transactions took place. The imports of foreign wheat have been confined to 537 quarters but the show of samples of this description, and parcels changed hands for country consumption; but the demand was by no means active at late rates. Floating cargoes were held at very full currencies. The show of both English and foreign barley being small, the trade ruled steadily, and late rates were well supported. The value of malt no change took place. The quantity on offer was limited. There was a slight improvement in the oat trade, owing to the falling off in the supply. In prices no change was noticed. Beans, peas, and flour sold at very previous quotations.

The Seed Market—Linseed is in good request, at fully last week's prices. Cakes are 5s. 6d. per money. In all other articles very little business is doing:

Linseed, English, sowing, 46s to 48s; Baltic, crushing, 43s to 44s; Mediterranean and Odessa, 44s to 47s; hempseed, 32s to 40s per quarter. Coriander, 16s to 18s per cwt. Brown mustard-seed, 7s to 9s; white ditto, 9s to 9s 6d. Tares, 9s 0d per bushel. Canary, per quarter-seed, 54s to 62s per last of 10n quarters. Linseed cakes, English, £8 10s to £8 15s; ditto, foreign, £9 0s to £9 5s per ton. Rape cakes, £5 15s to £6 0s per ton. Coriander, 9d to 10d per lb. Up to Saturday last, duty was paid on 34,749 cwts. against 35,629 cwts in 1851.

Sugar.—Wes. India is in good request, at a further advance in the quotations of 6d per cwt. Fine yellow Barbadoes has sold at from 39s to 40s per cwt; good, 36s to 38s 6d; ordinary, 32s to 35s. Demerara, 33s to 42s 6d, fine yellow Mauritius 38s 6d to 39s 6d; low to good, 36s 6d to 38s 6d; grey, 32s to 37s; good to fine ditto, 38s 6d to 40s; fine grey yellow, 41s to 42s 6d, and to good, 38s 6d to 40s, fine grey white Madras, 40s to 40s; low yellow, 37s to 42s; grey ditto, 36s to 38s; good to fine Bengal, 36s to 37s. Up to Saturday last 10n barbadoes was delivered, amounted to 5,470 387 cwts, against 4 853,542 cwts in 1851.

Coffee.—Good ordinary native Ceylon continues steady, at from 46s 6d to 47s per cwt, all other kinds of coffee are quite as dear as last week, with a moderate demand.

Rice.—This article is steady, and late rates are fully well supported.

Fruit.—The clearances are very extensive, and some importers refuse to sell at present rates.

Provisions.—All descriptions of butter are very dull, and lower to purchase. Forest is selling at from 74s to 76s per cwt; fresh, 78s to 80s per cwt. Bacon has given way 2s to 3s per cwt. Hams are dull, at 64s to 68s per cwt. Lard is steady, at 54s to 56s per cwt. Lean pork is in fair demand, and 50s to 60s per kegs.

Tea.—This article is dull, and late rates are in favour of the buyer.

Tobacco.—This article is steady, and late rates are well supported.

Oils.—Linseed oil has met a ready sale, at rather more money. Palm oil is steady, at 41s to 42s per cwt. Rape oil is dull, at £34 10s per last of 10n quarters. Linseed oil, £31 10s per last. Cocoa-nut oil, £37 10s per ton. Olive oil, £45 per tun. Spermaceti oil, £90 per ton. Fish oils are dull, at £30 per last of 10n quarters.

Spirits.—Rum sells more readily, and late week's quotations are maintained. Proof Leewards, is held at 1s 1d. Brandy is dull, at 12s 6d to 13s 6d per gallon. Hollands is in good request, and the turn dearer. British-made spirits are in fair demand, at 2s 4d to 2s 5d per gallon.

Hay, and Straw.—Sunday hay, £2 12s to £3 18s; clover ditto, £3 15s to £4 15s; meadow straw, £1 4s to £1 15s per load. Trade dull.

Coals (Friday).—Stockton, 9s 6d; Eden Main, 17s 3d; Belmont, 17s 3d; Hawwell, 18s 6d.; Clowning Tees, 15s 6d.; Pensax, 14s 3d; their by-products.

Wool (Friday).—The sales by auction in London have reached £214,824 2s 3d, or somewhat under previous estimates, the demand for all new hops is active, and in some instances prices have an upward tendency.

Hops.—Mid and East Kent Goldings, 120s to 160s; Weald of Kent, 78s to 88s; ditto, choice, 90s to 98s; Mid. 74s to 80s; ditto, choice, 84s to 88s; Sussex, 70s to 78s; Farnham, 105s to 126s, ditto, choice, 130s to 140s; Country, 62s to 100s; ditto, choice, 110s to 120s per cwt.

Provisions.—Monday.—Notwithstanding that the supplies of beasts on sale to-day was very moderate, and in middling condition, the beef trade was in a depressed state owing to the unfavourable side of the weather for slaughtering, and but few sellers to be found in the market. Trade, and Monday's prices were tolerably supported. The numbers of sheep were on the increase, yet as breeze ruled heavy at barely late currency. We were rather encumbered with calves, in which the trade was dull, at barely late rates. The pork trade ruled quiet at our quotations. Most cows were selling at from £14 to £18 10s each, according to their small calf.

For 8 stone to sink the offal:—Friday's Beasts to-day's Beasts Sheep Calves Pigs

THE LATE DANIEL WEBSTER.—FROM A DAGUERREOTYPE BY LAWRENCE, BROADWAY, NEW YORK.

(*Continued from page* 406.)

General Harrison to the Presidency occurred, and Mr. Webster was placed at the head of the Cabinet, as Secretary of State. His administration of the department during the two years he remained in it was signalised by the most distinguished success. The United States was at that time involved in a long-standing controversy with Great Britain, on the subject of the north-eastern boundary of Maine. To this had been added the difficult questions arising out of the detention of American vessels by British cruisers on the coast of Africa. Still more recently, the affair of M'Leod, in New York, had threatened an immediate rupture between the two Governments. Through the wise policy and management of Mr. Webster, the treaty of Washington was brought about on the 9th August, 1842. By this treaty the boundary dispute, which had lasted fifty years, was adjusted. An amicable and efficient arrangement was made for joint action in the suppression of the slave-trade, and an agreement entered into for a mutual extradition of fugitives from justice. The other subjects of discussion, at that period, between Great Britain and the United States, with the exception of the Oregon boundary, were happily disposed of in the correspondence accompanying the treaty.

Mr. Webster retired from office when Mr. Polk became President. He returned to the Senate. He remained a member of that body during the whole of the administration of Mr. Polk, and till the death (in 1850) of General Taylor. Though unconnected with the Executive Government, he rendered the most material service in the settlement of the Oregon dispute. Mr. Webster opposed the Mexican war on principle; and in the full persuasion (which events have confirmed) that acquisitions of territory would disturb the balance of the Union, and endanger its stability. He, however, concurred in granting the supplies which were required for the efficient conduct of the war. His second son, Major Edward Webster, with the entire approbation of his father, accepted a commission in the Massachusetts regiment of volunteers, and sank under the exposure of the service in Mexico. He was a young man of great promise.

On the death of General Taylor, the chair of state was assumed by President Fillmore, who immediately called Mr. Webster to the office of secretary. His administration was marked with characteristic ability and success; and his subsequent conduct and policy to the hour of his death fully bore out his reputation.

The melancholy loss to America of this eminent statesman took place on the 24th ult. He died of disease of the stomach. He met his end with fortitude, preserving his faculties and his mind clear and unclouded to the last. His demise has plunged the whole United States in grief and mourning. His character, his conduct, and his fame, now matters of history, will remain among the brightest remembrances of his country. In private life, Daniel Webster was generally and greatly beloved. There, too, he was continually useful. He paid much attention to agriculture. His residence, when not engaged in the public business, at Washington, was either at Marshfield, in Massachusetts, or at the place of his birth, in New Hampshire. He possessed large and valuable farms in both places, stored with the choicest breeds of cattle, and cultivated by the most improved methods of husbandry. The works of Mr. Webster have been lately published in six volumes 8vo, with a biographical memoir by Mr. Edward Everett.

An American writer, in 1850, thus characterises Mr. Webster:—

He is called the expounder of the constitution. He will be known hereafter as its chief defender. He has been to it during the second period of the Republic what Washington was to its liberty in the first. Vast as were the powers he displayed usually, those who heard his reply to Hayne, in which he surpassed the models of antiquity, felt that there were hidden fountains of elemental fire still unstirred. The majesty of his person, the unfathomable depth and varied intonation of his voice, his manner always just as excited as needful, the soundness of his mind, and the amazing resources of his learning and imagination have stamped him the colossal intellect of America.

THE LATE MR. VINCENT G. DOWLING.—FROM A BUST BY BUTLER.
(SEE PAGE 406.)

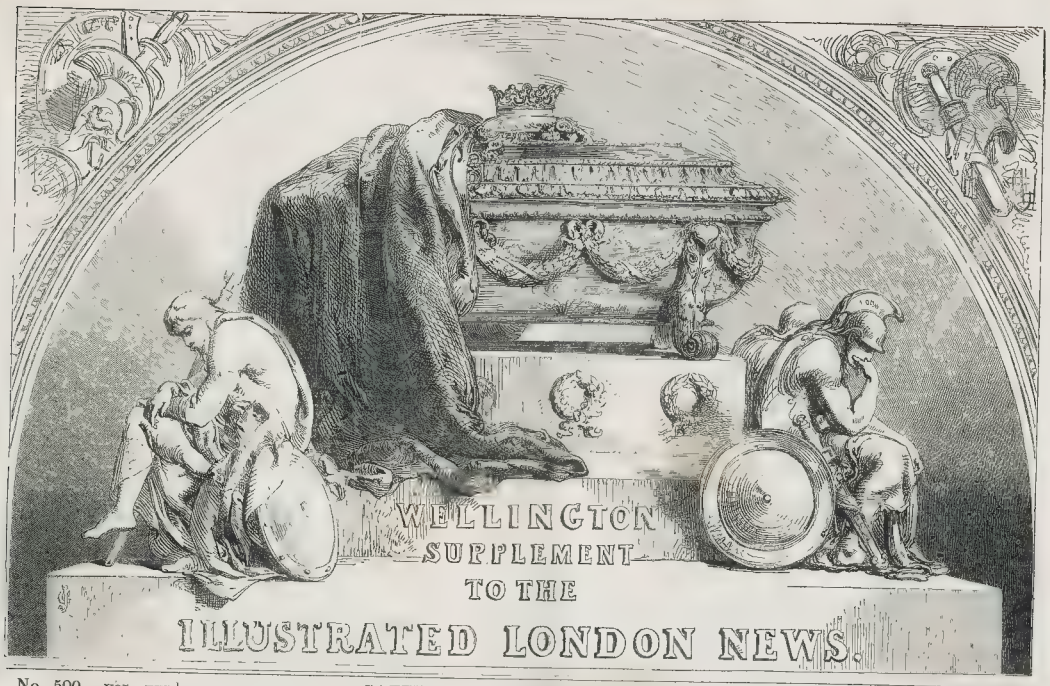
ABD-EL-KADER AT VERSAILLES.

On Wednesday (last week) the fineness of the weather, and the desire to see Abd-el-Kader, attracted an immense crowd to Versailles. The ex-Emir left Paris at noon with the Minister of War, and on his arrival mounted a fine Arabian horse, which had been placed at his disposal by the Prince President. He went to the plain of Satory, where the review was to take place, with the Minister of War, and Generals Magnan, Korte, and Partounneax. The two Arabs who accompanied him to Paris rode by his side. Several foreign officers in uniform, two of them English, were on horseback on the ground. The regiments reviewed were the 1st and 2d Carabineers, the 6th and 7th Cuirassiers, the 7th, 8th, and 10th Artillery, the 1st and 7th Lancers, and the 12th Dragoons. The ground was kept by the 63d regiment of the line. The Prince President was not present. The review was passed by the Minister of War; and, after the manœuvres, at which the Emir frequently expressed his admiration, the troops filed off before him. After the review, Abd-el-Kader visited the Palace, and at half-past five left Versailles for Paris, to dine with the Minister of War.

Abd-el-Kader is the Paris lion of the day. With a facility which does honour to the Oriental character, he seems to be equally at home, equally at his ease, in a church, at the opera, receiving visitors, or being received by others; dropping his eyelids in respectful worship before the admiring gaze of beauty, or when that same eye lightens up with the fire that is not all dead within him at the neigh of the chargers or the flash of an autumn sun on a horseman's corslet. That the Arab warrior should not quit Paris without beholding a sight long so unfamiliar to him, but to which his heart yet warms—a military display—is what might have been expected.

VISIT OF ABD-EL-KADER TO VERSAILLES.

London: Printed and Published at the Office, 198, Strand, in the Parish of St. Clement Danes, in the County of Middlesex, by William Little, 198, Strand, aforesaid.—Saturday, November 13, 1852.



No. 590.- VOL. XXI.] SATURDAY, NOVEMBER 13, 1852. [TWO NUMBERS, 1s.

THE

MIDNIGHT WATCH AT WALMER CASTLE.

NOVEMBER 8, 1852.

I.

Most sad! most beautiful! the calm, clear stars
Shine on us, through the soundless deeps of Time:
The moaning sea strikes chafing on the bars
Of the restraining land; its voice sublime
Making sonorous music evermore—
A wail, a chant, a requiem, on the shore.

II.

Around the lonely room, where sleeps in death
Britain's great hero—friend of human kind—
There are no sounds but Ocean's;—save a breath,
Fitful and low, of the expiring wind;
And at short intervals the measured beat,
Solemn and slow, of the night-watchers' feet.

III.

These sounds but mark the silence, as pale lights
In deep, wide darkness, show it darker still.
All silently, from out the heavenly heights,
The stars look down on human joy or ill;
All beauteously the Night pursues her way;
And breathes her prayerful thoughts to coming Day.

IV.

How sad, but oh, how beautiful the scene!
'Tis Death that lends the music to the sea;
'Tis that High Presence, solemn and serene,
Which robes all Nature with such sympathy;
That gives the stars of heaven a voice to tell
Things felt, but never known—ineffable.

V.

We gaze and sigh, but here we cannot weep;
'Tis Reverence and Religion, and meek Faith,
That fill us with emotion, pure and deep,
And waft our heavenward thoughts to Life from Death—
To Life Eternal: tears we may not shed,
We are alone with Nature and the dead.

VI.

The tears shall fall to-morrow, but not here.
Mid pomp and show, and blazonry and pride—
And slow funereal march, and gorgeous bier,
The sorrow shall have vent for him who died—
So great, so simple, and so calmly grand—
So like the staff and father of the land.

VII.

But, ah! not here:—we can but breathe a prayer,
Awed by the spiritual beauty spread around.
The foremost man of all our time lies *there*;
The tree has fallen, and sanctifies the ground.
To-morrow, and to-morrow, tears may flow;
But Hope is with the stars, and chides our woe.

The Midnight Watch at Walmer Castle.

THE DUKE OF WELLINGTON AS AN ORATOR.

THE deferential respect with which the Duke of Wellington was invariably listened to in the House of Lords, and the excitement (followed by conviction or acquiescence) that usually attended his speeches, attested to his possession of no ordinary powers and influence as a speaker. Yet, if the meaning conventionally attached to the word "orator" were applied to it in his case, he assuredly would not have been ranked among that higher class of debaters whom it is generally used to describe.

For, what is an "orator?" The mind naturally reverts for examples to the great men of antiquity—to Demosthenes, Cicero; or to those men in our own more immediate era who have maintained the *prestige* of British senatorial eloquence—to Grattan, Curran, Fox, Sheridan, Canning, and Brougham. Men of this stamp have in all ages existed, who have cultivated the graces and developed the strength of oratory, until it has been raised to the dignity of an art, whose cultivation successfully will ensure fame and honours to the student—fortunate if nature shall have aided him at the outset with those physical advantages which certainly conduce to eminence, although distinction has been successfully attained without them. These great artists in oratory have deeply studied the human character on its impressionable side; have carefully noted all the avenues to the soul through the ear, the eye, and the sympath.ai the heart. Like the great tragic or comic actor, they have learned to seem most earnest and impassioned, when in truth their eloquent outbursts are more compounded of calculation than inspired or impulsive. Like great artists in painting or in sculpture, they have transmitted, from age to age, models of their own conceptions in the art they have studied, which have served as laws to their successors laws, of which the soundness is attested by their almost invariable application, and the necessity which all young beginners feel of rendering them a voluntary, and, therefore, an impressive obedience. The speeches of such men, with the prepared exordium and peroration; with the skilful, almost scientific, arrangement of the facts; the artistic and artful introduction of reflections and appeals to the feelings; the relief afforded to dry argument by poetical or humorous illustration; and in their totality for their symmetry, and the proportion borne by the parts to each other, and to the whole: such speeches may be profitably made a subject of study even by those who do not propose to devote themselves to oratory as an art; and they afford the same combination of pleasure and instruction that arises from the contemplation of a fine picture, a beautiful statue, or a noble pile of architecture.

The Duke of Wellington, it is clear, could never be called an orator in this acceptation of the term; for he never devoted an hour to the study of the graces of public speaking, and, although he certainly did develop its strength, he did so unconsciously, without design, and solely in obedience to the native impulses of his own character. We must, therefore, seek other causes of the influence—the almost unparalleled influence—which he exercised during so many years over the House of Peers, and, through that House, on the House of Commons, and the public at large. Men who have performed great military and civil services, others of who, even as orators, have reigned supreme, while still in the rank of Commoners, have, on being raised to the Upper Hou e of Parliament, failed to command a tithe of the respect paid to the Duke of Wesiington in his capacity of public speaker on political affairs; so that we must not be led into attributing his eminence solely to his past services, and the great reputation he held by reason of them.

Yet that reputation was at the root of his influence as a speaker. Conceive the position of a man, who on first taking his seat in the House of Peers, had all his patents of nobility read, one after the other, from that of simple Baron up to that of Duke! Such an accumulation of honours was the outward and visible sign, the living voucher, of his great achievements—a kind of testimony calculated to produce an impression on minds imbued more fully than those of commoners with the vast importance of titular distinctions. Nor, in our estimate of the success of the Duke's influence as a speaker, must we despise this sunken concrete at its base; for assuredly, throughout the rest of his political life, the memory of that grand and brilliant scene pressed on the minds even of his opponents, not as a formal display, but as a symbol of more solid, true, and lasting sources of greatness. As we go forward, we shall find that a great portion of the Duke's influence as an orator was moral; that if his speeches were rough hewn from the block of his sagacity and experience, his auditors forgot their roughness and unpolished aspect in their deep sense of the value of the quarry.

But we must go a little farther back, ere we begin to talk of peerages and speeches in the House of Peers. The eye strains itself with gazing through a vista of nearly sixty years, crowded with great deeds and great events, in order to obtain a dim glimpse of the young subaltern officer, who sat in the old Irish House of Commons before the union, as member for the borough of Trim. A hard, silent, undistinguished, uncommunicative personage was that spare young man with the unexpressive physiognomy, who spoke but seldom, and was thought to be little more than an incarnate Tory vote. "His address," says Sir Jonah Barington, "was unpolished; he spoke occasionally, and never with success; and he evinced no promise of that unparalleled celebrity which he attained afterwards." What was going on in his mind, no one can do more than guess; but we may suppose that he was a close observer, because we find that in so short time after he proved himself thoroughly conversant with the state of his country; and that, although a little too Tory for the Catholics of those days, he was on many points much more liberal than those who subsequently became his official superiors. Fortunately, a slight record has been preserved of his demeanour at this period, which is interesting from its exactly tallying with our late knowledge—some necessary allowance being made for increased age, maturity, and authority. A gentleman, now deceased who had constant opportunities of observing the young "Arthur *Wesley*" in the House of Commons, spoke of him, to the writer, as having at that time, when he addressed the House, given utterance, in the same plain, honest, unpolished way, to his opinions—disdaining all oratorical art, yet impressing his words with a natural emphasis derived from conviction—that some thirty years after rendered him one of the most unique and original speakers in the House of Lords. Now this reminiscence is interesting, as helping to show that the organisation of this remarkable man's mind was complete from the first—that he had little or no crudity or youthful heat to get rid of ere entering on his duties; so that his contemporaries found in his nobly useful natural qualities an unmixed gain.

In many men who have become great in after life, we have to deplore youth spent in perpetrating and retrieving mental follies; so that impaired intellectual powers have to a certain extent detracted from the value of experience and knowledge. But such as the Duke of Wellington was at last he was at first—sound, observant, unexcitable—always keeping himself, by regular drill and exercise, fit for action at a moment's notice; so that he brought on the larger scene of his career a full masculine vigour.

As a member of the House of Commons, after the Union, and as Sir Arthur Wellesley, the Duke very seldom spoke, and then only on subjects connected with his duties as Secretary for Ireland; but, in the little that he did say, there was the pregnancy, the fullness of information, the clearness of vision, and the decision of judgment, that are to be found in his later speeches. It is remarkable that at all periods of his career (and the remark applies to his despatches as well as to his speeches), his opinions were expressed with a positiveness and self-reliance not often found in subordinates. In whatever position he might be placed, whether as a home administrator, an Indian civil governor, or a diplomatist, he thoroughly comprehended all that related to his sphere of action, and pronounced upon what was going forward with the confidence of absolute and intimate knowledge. This evidence of a mind matured in its organisation even in youth, is to be found, also, in his speeches, during the period we refer to, when, as Sir Arthur Wellesley, and ere he went to the Peninsula, he had occasion to address the House of Commons on subjects connected with the duties of his post as Irish Secretary. It is remarkable, that although his contemporaries were still very far from supposing the kind of man they had among them, they had become mysteriously impressed with a sense of his sterling value and trustworthiness—a feeling which existed in the House of Commons at the time to which we refer to an extent far exceeding any actual claims the young soldier-statesman yet had on their confidence or admiration.

Still, between these, his early Parliamentary essays, and his subsequent influence, almost amounting to a dictatorship, over public opinion, there was a long interval. As a mere civilian, with his past Indian reputation, he would always have commanded a respectable position; but there was nothing in his Parliamentary efforts to have procured for him fame. We must look, therefore, to extrinsic and external causes for the extraordinary ascendancy he afterwards obtained—not only from his reputation as a soldier, not from his position as a minister, but on his merits as a sound, clear, and well-informed speaker on great political topics, and from his singular moral influence.

It is impossible, however, to separate the Parliamentary speaking of the Duke from this moral influence, because they reacted on each other. For many years after he entered the House of Lords, neither himself nor those around him were aware of the vast amount of practical sagacity he could bring to bear on a given question. When about to fight the Waterloo campaign, what he most desired was his Peninsular veterans, most of whom had been sent to the American war; but he could not recover them. Not so with his experience of men and measures gained on the same scene. Those veterans were always at command; always fit for service, with their past honours thick upon them. Wisely, he abstained from much speaking; partly, perhaps, from a modesty of nature accompanying true greatness, and which renders it always doubtful of its own capacity; partly because the state of affairs did not call for his direct interference as a man of prompt and decisive measures, whether in council or in action. When he did speak, his friends mistook his abruptness, his terseness, his positiveness, for the mere habits of the soldier transferred to the senate; and, beyond the prestige they derived from the support of a man towards whom the nation felt so grateful, they did not attach much importance to his opinions. They did not know or reflect that these peculiarities were a part of the nature of the man, a consequence of his plain, deep, logical morality, and of his singularly clear perception and vigorous understanding. They forgot, or they had never had the opportunity of observing, that he had always exhibited the same general characteristics as a speaker, even while yet a young man, reconnoitring the ground of political action, observing the conditions of success in the world, and graduating in the difficult science of politics. Nor had they yet the opportunity of knowing that in his Despatches there were still more striking and impressive indications of this Spartan mind. That the Duke of Wellington felt very deeply the painful condition in which this country was placed during several years after the peace, there can be no doubt; but he was not struck much by the violence of the mob; but there is good reason, also, to believe that he was aware of the causes of those outrages—knew that they were not, as some twenty years before, the expression of speculative opinions of a revolutionary tendency, but the irrepressible complaints of the industrious masses, groaning under the effects of a sudden change of system. We can thus understand how, while, as a soldier, and a lover of subordination, he would not shrink from the responsibility of repressive measures; on the other hand, he would abstain from that more active support which indicates an earnest co-operation. Yet there were occasions, even at this period, when the Duke of Wellington's speeches sufficiently showed that it was not from inability or apathy, that he did not take a more active part in political affairs. His most lucid, practical, and energetic speech on the Currency question; his humane, sensible, and statesman-like speeches on the Catholic question, wherein he decried the purely religious views of the subject, and adhered to the great principle that its difficulties were political: these were, in their way, masterly examples of that dignified and logical eloquence which results from a calm spirit and a clear mind, and a vision undisturbed by prejudice.

When, at last, circumstances forced the Duke of Wellington into greater prominence as a debater, the contrast he presented to those around him did not escape attention. A Spartan defending himself and his country against Athenian orators, could not have developed a more strongly marked idiosyncrasy, or a more signal difference of nature, thought, principles, and language. On his own side of the question, there were few men of oratorial power; but, in the Whig ranks, there were Earl Grey, the Marquis of Lansdown, and others, who sustained the school of formal oratory, and excelled in that art of speaking, which the Duke never had practised, and never could. Mistaken at first "for a plain blunt soldier, and no more," it was not supposed that he could sustain himself against the antagonists arrayed against him, in those displays of dialectics wherein our legislators delight to recreate themselves. The result belied these expectations. The Duke, like another great conqueror of old, settled the affair by cutting the knot; like the best of our diplomatists of the old school, he carried the day against the most refined art and intrigue, by simply saying his say, and meaning what he said. He was honest and terse, that he left no room for argument. He discomfited his antagonists by a charge that left no room for logical or oratorial tactics—as Napoleon, in his younger days, used to scatter the generals of the old school, and confound all their elaborate manœuvres.

His parliamentary resembled his military tactics. The same spirit pervaded both. His mind was subjected to the same organisation and discipline that had rendered his Peninsular army so invincible. Everything, there, was in its proper place. The prevailing principle was the necessity for discipline, subordination. He never, as a public man, thought or did anything that was irregular, premature, or unaffiliated to the necessity of the time. His political code was as simple as his military regulations A few fixed conclusions served him with principles of action. His experiences were all stored, arranged, put into cantoonments, as it were, and ready at an hour's notice. If he spoke on a subject, it was a moral necessity with him only to say what was indispensable, and only to bring forward views or facts that were argument-proof. For him to be contradicted on a question of fact was so rare an occurrence, that it might almost have been predicted as impossible. Yet this was not because he transcended other statesmen in a love of truth, but because his habits of mind forbad his accepting any class of facts but those which were absolutely fit for service. The beautiful arrangement and subordination of his political materials was a subject of admiration with even his opponents. He used them with the precision and science of modern gunnery, his great object being never to waste a shot, but always to hit his mark. For a long time decried as a mere Tory dogmatist, he confounded his detractors by the intimate and extensive knowledge he displayed on subjects the most foreign to his former pursuits. This was eminently shown in his speeches on the Currency question, which were full of facts and data, ably collated, and all bearing directly on the subject. He spoke with a kind of rude natural logic, which, if it did not quite serve to convince logicians, at all events produced its effect on antagonists in the House of Lords. A short speech of the Duke in 1823, on the proposal for a Poor-law in Ireland, furnishes us with an instance of the readiness with which he could turn the flank of an adversary's argument. He was famous in the House, and latterly with the public, for this sledge-hammer style of "coming down" upon an opponent, and cutting to pieces all the finesse of a "case." He had an eagle eye for a fallacy, and would expose it ruthlessly; yet the chances were that the whole argument on which he rested proceeded upon the omission of some general and philosophic view of the subject in debate, which, if attended to, would have enrolled his smaller reasoning, and neutralised its force. The following passage from the speech just referred to illustrates to a certain extent these remarks —

> I am thoroughly convinced (he observed) that no part of his Majesty's dominions is impoverished by a less degree the constant and particular attention of his Majesty's servants as Ireland does. A noble Earl has stated that in Ireland there are 8 000,000 of people, the situation of 6,000 000 of whom demands inquiry. He has told your Lordships likewise that all the wealth of Ireland is not sufficient to give employment to those people. Now, certainly, I cannot but think this is an exaggerated statement on the part of the noble Earl. It cannot be supposed that there are 6,000,000 of the Irish population who require employment—I cannot admit that the whole of those people are unemployed. It is not true that they suffer this distress at all times. It is not true that they suffer the same degree of distress in all years; but it is unquestionably true that they do suffer great distress at various periods, owing to the casualties of the season, and to the particular species of food on which they subsist. Such is the plain fact. The noble Earl has stated that the people are able to procure that sort of food on which they chiefly live, at the rate of three farthings a stone Now, really, if those people do not suffer distress except that which is occasioned by the intervention of the seasons; if these 6,000,000 of people can get provisions at the price mentioned by the noble Earl, it does appear to me that the case hardly calls for inquiry, except at a time when their food has failed, in consequence of an unpropitious season. But, then, the noble Earl has asserted that the distress arises from want of work, and that it would take more than all the wealth of Ireland to procure employment for the people. "Let us, then," said the noble Earl, "relieve the sick, the lame, the aged, and the impotent" The noble Earl has said that one of the great evils of Ireland is want of capital; but I must beg leave to tell the noble Earl that want of capital alone will not prevent the existence of a numerous body of poor; and, to prove the fact, let the noble Earl look to the situation of England. There is no want of capital in this country; the noble Earl has told you that there are invested here £9,000,000 of capital belonging to Ireland alone; and yet, with all this capital, the support of the poor required last year amounted to no less than £7,000,000 of rates."

"His Majesty's servants!" "His Majesty's dominions!" In the use of these old phrases—now almost expunged from conventional political language—the Duke was always very scrupulous. Nor, in reference to the foregoing extract, and our previous remarks, will the reader have failed to perceive the simple process by which the speaker overturned the case of his antagonist. Because, with a looseness of expression, it had been given forth that six out of eight millions of people were unemployed, he flatly denies the monstrous assumption. Because the antagonist admits that potatoes can be bought at three farthings the stone, in ordinary seasons, therefore there is no case for a Poor-law, or even an inquiry, except on a failure of the crop. Because there are so many poor in England, where there is so much capital, therefore the pauperism of Ireland is not to be attributed to the want of capital. Such is the substance of this argument; and, so long as the speaker could continue to grapple with such arguments, not one word could be said on the abstract question of a Poor-law, of anticipation of such an evil as a bad season, or of the horror and disgrace of such a normal state of society. This was almost invariably the Duke's manner of dealing with such questions. The vulgar saying that "he never looked beyond his nose" would in a sense apply to his Parliamentary speaking; except that his non-perception did not arise from inability to see when the occasion arose, but from a systematic resolve only to deal with the realities before him, to answer the actual arguments put forth on the opposite side. The same habit pervaded his larger policy. Here is another passage taken at random from a speech made in 1829, which illustrates the plain, do-aright, home-thrust style of argument of which we speak. The Duke is meeting, beforehand, objections to the forthcoming bill:

> A noble friend of mine (he said) has stated to the House that the proposed measure is inconsistent with the constitution as established at the Revolution; and another noble Lord has even asserted in that statement I had been going to propose a measure which would introduce a predominant Catholic power into Parliament, I should then be doing that which is nearly the same thing with the constitution. But I am not going to say such a thing. There is a Catholic power at present; I never can venture to say that Catholic power does not exist at present either here or in Ireland. I will address myself more particularly to the noble Lords who have so pointedly opposed me, and I will ask them whether Roman Catholic power was not introduced into Ireland by measures of their own? Did not some noble Lords exert their influence to the utmost to produce that very power which has rendered a measure like that which I have announced to Parliament absolutely necessary? As such is the case, I implore noble Lords to look at the situation of the country, and the state of society which it has produced. Whether it has been brought about by the existence of these disabilities, or by the Catholic Association, I will not pretend to say; but this I will say, that no man who has looked at the state of things for the last two years, can proceed longer upon the old system, in the existing condition of Ireland, and of men's opinions on the subject, both in that country and in this. My opinion is, that it is the wish of the majority of the people that this question should be settled one way or other. It is on that principle, and in conformity to that wish, that I and my colleagues have undertaken to bring the adjustment of it under the consideration of Parliament.

Here there is certainly nothing of the grace and adornment of oratory; but there is, undoubtedly, a vigorous simplicity of exposition that does the work quite as well, if not much better. The practical view of the case is here put in a nut-shell, evidently with the conviction that any other is quite unnecessary. "What is, is." What must be, must;" that is the sum of the whole; and it answered the purpose much better than the most elaborate defence of a nominal inconsistency. One more passage from a speech at the same time gives an equally practical and every-day reason for the great political resolve of 1829. In reply to Lord Longford, he said:—

> I have repeatedly declared my earnest wish to see the Roman Catholic question settled. I have nothing could ever have been more distinct or explicit than my expression of that wish; and is it a matter of surprise that the person entertaining it should avail himself of the first opportunity of proposing it? A question of that nature, year and over again, he declared himself anxiously to wish? On this particular question I had long made up my mind, as a member of this House, to take a particular course. It may be thought peculiar, a manner of state for many years I have acted upon the determination never to vote for the affirmation of this question until the Government, acting as Government, should propose it to the Legislature. My mess relation know that ever since the year 1810, the several successive Governments of this country have been formed on a principle which prevented their ever proposing, as Government, the adoption of any measure of relief in regard to the Catholics. In order to the formation of a Cabinet, which, acting as a Government, could propose this measure, it was, in the first place, necessary to obtain the consent of that individual the most interested, by his station, his duties and the most sacred of all obligations, of any individual in the empire. It was necessary, I say, that I should obtain the consent of that individual, before the members of the Government could consider the question as Government one. Now, under such circumstances as these, would it have been proper in me to have breathed a syllable on the subject until I had obtained the consent of the illustrious personage to whom I have alluded? (Lord Longford had charged the Duke with having kept the intentions of the Government a secret.) I call upon my noble relative to answer this question, if he can, in the negative. I beg my noble relative to ask himself this question, whether I was wrong in having kept secret my views, since the month of July or August, not talking to any man on the subject until I had the consent of that exalted personage to form a Government upon the principle of taking the question which I have alluded into consideration. My noble relative ought to place himself in my situation; he ought to see what was expected of me; and then, instead of blaming me for having acted as I have done, he would see that, if I had acted otherwise, I should have been highly blameable. When the question had been settled, I called upon the permission, so as to be enabled to make a declaration (on not having made which alone the accusation of surprise can be founded), the opening of the session was so near that it was impos ble to make known what had occurred earlier, or in any other manner than by the Speech from the Throne.

It was during his Premiership and the Reform struggle that the later powers of he Duke as a speaker were in the most striking manner developed. Until within a very short time previously he had but rarely taken part in the debates of Parliament; but now, suddenly called upon to act, he seemed to feel his strength. His whole conduct at this time was strikingly characteristic; and, as the "oratory" of the Duke was not a thing to be studied, apart from his position and peculiarities, we must here glance at the circumstances. Scarcely a year before he took office

he had, on being taunted with an aspiration in that direction, exclaimed, with even more than his usual vehement emphasis, to the assembled Peers, that "he should be mad to think of such a thing." When afterwards called on by the Crown, it was the instinct of military duty that caused him to obey, and accept a post for which, perhaps, he was not fitted. All his speeches, all his acts, whether in Parliament or in his official capacity, breathed the same military spirit. The King was his Master, and the principles of the Constitution formed his Law. He obeyed them himself, and he expected every one else to do the same with the like ready cheerfulness. In the same spirit was his defence of himself from the charge of inconsistency in 1831, when, at a moment's notice, he undertook to head a "moderate Reform" Administration, although but a few days before he had been one of the fiercest opponents of the new scheme. "If I had refused," said he, "to assist his Majesty, because I had hitherto been opposed to Reform, I could not have shown my face in the streets, for shame of having deserted my Sovereign in circumstances painful and alarming." His obedience to the authorities he recognised, was not in act merely, but in thought, and in his habit of thinking. Instinctively, and without knowing it, he resembled Bonaparte, in his aversion to ideologists. The Duke of Wellington never philosophised—that is to say, in the sense of abstract speculation: although his whole life was a practical example of philosophy. He had his political lines of Torres Vedras—sufficient for him was defence, until the moment when assault was justifiable and practicable; and then no one so dashing or so daring as he. In all his political speeches of any importance, this is founded on the defensive. He put a kind of practical "*cui bono?*" to every new proposition. When asked to change, his answer was "the reason why?" Things have gone on very well hitherto with the old; what need, then, for the new? Why throw away a chance? Why risk your position for manœuvres, however great or skilful, when you are secure behind your intrenchments of experience and practice? This style of argument was very different from that of a bigoted Tory of the old school; for the Duke was not, like them, unable to see any but the threatening side of any new measure; he adopted his defensive system because it accorded with his old habits, and a brilliant career had proved their value. Statesmen no more than generals should leave temptations to chance or fortune. Hence the dogmatic positiveness of the Duke's opinion for men in measures of speculative change, so long as it was possible to hold out with the old state of things. It was not self-reliance, or obstinacy, but faith in his system. How suddenly and ably he could abandon the defensive and act on the bolder tactics, his conduct on the Test Act Repeal proves: and how little his mind was really constructed in the sense in which a bigot's is, is at esteed by his excellent, in some respects his noble speech, in proposing the repeal of those acts. That, and his speech on moving Catholic Emancipation, effected as complete a change in men's opinions on his political character and worth, as his brilliant campaign against Massena had done in the carping antagonism of those who saw in his earlier tactics in the Peninsula only timidity and inaction.

At the time his nature was thoroughly aroused. It was one of his rules always to do everything as well as he could. He had proclaimed himself unfit for office; but, being there, he strove as hard as he could to falsify his own opinion. His speeches partook of this feeling. He was more energetic, more positive, more dogmatic, more exultable than ever he had been before. A new life appeared to have been breathed into him. Conscious that in the Test Acts Repeal and Catholic Emancipation he was playing a great part, he rose with the occasion; and, if we dismiss from our idea of eloquence those ornate accessories which have become associated with it, then was the Duke eloquent, because he worked most powerfully on men's reason and feelings.

It was the startling contrast between his past and his present that made the Peers and the public more ready to accept his somewhat military and dictatorial style. The former felt towards him an ineradicable respect; the latter did not object to his martinet style of dealing with his subordinates, so long as he did not oppose their own wishes—rather, so long as he was constituting himself the agent of popular fulfilment. His popularity at this period of his parliamentary career was of a totally different kind from that he attained to fifteen or twenty years later. Then in full masculine vigour, he was looked upon as a combatant whose moral weight made him a Hercules: later, he had ceased to agitate the political feelings of men, who regarded him as an aged Ulysses, fit to be the Mentor of a nation

More startling still was the vigour and earnestness he displayed in combating against the Reform Bill. This time his military style of defending his position was against the wishes of the public, and he, of course, lost his popularity. What they had laughed at when applied to Mr. Huskisson and the ideologists, enraged them when applied to themselves. But all that made no difference to the Duke: the latter, in the old style, but with renewed energy and more passion than people had given him credit for. His short speech against Reform, and in defence of the old constitution of the House of Commons, was one of the most nervous, terse, heavy-shorted he ever delivered. What a time that was there of a new House when the old one had just struck off the fetters of the Dissenters and Catholics? Give him his old troops—his veterans—and he would do the work: he wanted no popular aid, no popular enthusiasm, no popular interference. If ever his heart was in anything, it was purely political, it was in this struggle. He forgot even his constitutional caution, in his anxiety to give utterance to his apprehensions and convictions. He had always rested on the past and the present, and dared not to think of the future. He had never believed in theories or warnings, but always in himself and his own countable resources. Yet now he, the unbelieving except in the actual, took to prophesying. He promised the country nothing but ruin from the Bill. "He had been forty-five years in the service of the Crown—thirty of these in situations of trust and confidence—in command of armies, in embassies, and in councils," and what? "His experience told him, from the passing of that Bill would be dated the downfall of the constitution." The Duke of Wellington, who never obtruded himself or his services on the public notice, must have been sorely enraged thus to appeal to both, and use them to ballast his opinion! Again, he prophesied, that the union with Ireland could not be maintained under the Reform Bill that the Established Church would be sacrificed that the House of Commons in the future be "a fierce democracy," and much more of the same earnest and impatient exhibition of strong opinion and feeling. While the Reform contest continued the Duke of Wellington appeared a changed man, so deep was his interest in the danger incurred, and of the inadequacy of the means of defence. For, after his first manly (though incautious) declaration against all Reform, his views very soon became changed as to the state of the popular mind. Still, like a skilful general he prepared to do his duty, and to make the most of the means of defence the constitution placed in his hands. And, also, like a skilful general, when he found that "the game was up," when he saw there was no medium between embracing Reform and the views of his party, he, as we have already said, resolved to "stand by his Sovereign," and even went the length of recommending the peers to the compromise he had himself denounced only a week before to the compromise by which the House of Lords permitted the bill to pass. And why did those peers submit to the "dragooning," as Mr. Disraeli described it, of the Duke? In the first place, to them it did not seem to be "dragooning:" if it had, it is a question whether they would not still have submitted to it, from the Duke. But they never saw it in any other light than that afforded by the feeling that made them call him "the illustrious." It was a habit of mind rather than an obtrusion of supremacy. They knew, too, that in duty to superiors, and obedience to the law, there was not a more humble man than the Duke of Wellington; and, like the rest of mankind, they submitted cheerfully to a little seeming dictation from one who himself bowed to a higher authority. It was in truth only "seeming," in manner more than intention: but, if it had been what it seemed, it would have ceased to be offensive from the moment it was acquiesced in. For the Duke of Wellington spoke, in their eyes, with such an immense weight of authority, with Fame and Glory hovering over him, and History by to attest his right to speak—that any other than a submissive attitude would almost have seemed out of place, while deference conferred more honour on those who paid it than on those who received it. We are speaking now of the more active and excited period of the Duke's political life, when this extraordinary demeanour of the majority of the Peers was still more significant, from his having so recently offended their religious prejudices. The abruptness and the authoritative tone of some of his speeches, his perfect indifference to all propitiatory arts, the coolness with which he confined himself to the simple expression of his opinions, as if it were unnecessary to explain the process by which they had been arrived at, all these peculiarities, which in another man would almost have been offensive, did, in him, only seem the natural consequence of his age, position, and high authority.

The strong feature of the Duke's oratory was its intense realism. He elevated the practical to the rank of the philosophical. He never dallied with a subject to display himself, but always treated it for its own sake. Choice would have kept him from party strife, but necessity compelled. He had saved the country as a warrior, and it was well known that he possessed administrative capacity in an extraordinary degree. He was, therefore, drawn from his chosen retirement, in order to take part in public affairs. He took them up to do good, according to his lights and powers, not in the spirit which animates ordinary political disputants. He was of a party, of course; but that party was liable on occasion of danger, to become a mere contingent in the forces of the whole nation. It might be said of the Duke, as an orator, that he had not a particle of vanity. He spoke because his position in the country called for an expression of his sentiments; not because he liked applause, or felt a pride in seeing his advice taken. His sole object was the public good—not a theoretical, speculative, abstract good, but the tangible and the practicable. He happened to think that a measure on the past was for the public good, and therefore he ranked with Tories: he had what now appear to be antiquated notions of the share the Crown and the aristocracy ought to take in public affairs; but still he tested these notions by the great principle of his life—the public good. It was because he was known to think thus that he spoke with such authority. He never spoke, too, except when it was necessary another source of the singular and almost oracular influence he wielded. He never went through the process of reasoning in public: he had done all that before he began to open his lips; so that his thoughts took the shape of axioms, maxims, ascertained principles, fixed conclusions. His habit of making expediency his rule in political affairs helped to save him from the necessity of reasoning: he thus had only to act when the time for action came, and his words embodied not suggestion but resolves. To this was owing the pithiness and lucidity that rendered his speeches so unique, and the lofty wisdom that on great occasions made them so grand. The total absence of all display or ostentation displayed lent them an additional influence. The Duke, as he only spoke because he felt obliged to do so, never said more than was necessary. Sometimes he would repeat the same idea twice, and even thrice, in the course of a speech; but that was because he felt the importance of impressing it deeply on the public mind, and he did it for the sake of emphasis. The consciousness that he was only propounding what he believed to be the true and the right, led him to avoid all circumlocution, all the arts by which orators seek to render their sentiments captivating. It has been written of him, that "self reliance and singleness of purpose induced in him vigour of thought and simplicity of diction. This simplicity, which was not confined to the language only, but extended to the operations of the mind, was one of the Duke's great merits." Yet no man in other man prominently before the public. There was a vigorous economy of both thoughts and words. As a speaker, and as a general, the Duke equally discumbered himself of unnecessary agents. He was as little fond of eloquence as of the array of useless troops. Every word did its work. Simple, sound, sterling Saxon, he seemed to choose by instinct; as hitting hardest with the least show." While he was out of favour with the public, these peculiarities were set down as the outward signs of a tyrannical and autocratical spirit; but, as he grew older, even the "common people" (as they are termed) learned to know his true value, and to smile at an abruptness and positiveness, the moral of which they did not always comprehend, but which they admired for its self-possessed and "pluck." A writer who seems to have studied the Duke well, thus describes his manner of speaking:—"It is an intellectual treat of the highest order to see the Duke of Wellington's demeanour in the House of Lords. It is essentially different from that of any other man there. He is almost the only unfettered man in the House. Others are fettered by obstacles which they themselves, or for themselves, in various ways, by the too eager pursuit of personal or party objects. But the Duke of Wellington's high reputation and standing place him above all such considerations. He can afford to speak the truth, and he does speak it on all occasions fearlessly. While other speakers, on either side of the House, have been wasting their powers in fruitless eloquence (mere personal display), or in perverting the truth, for the purpose either of unfair attack or unfair defence, the Duke of Wellington has appeared to be paying not the slightest attention to their proceedings. He has sat, absorbed in thought, or at least in seeming indifference. You would almost suppose that, overcome by fatigue or indisposition, he was sleeping, so perfectly motionless and silent is he, reclining, with folded arms, his legs stretched out to their full length, and his hat over his brow. The question has been discussed, argued, and disputed upon for hours No result seems to have been come to, and you are as ignorant of the object and scope of the measure as when the debate began: nor have you any clear idea what will become of the Bill. At length the Duke of Wellington rises, advances abruptly to the table, wraps the tails of his coat, like a dressing-gown, over his legs, and plunges at once its *modus res*. There is an undivided attention when he speaks; indeed, it is sometimes absolutely necessary, for he speaks indistinctly. he often with difficulty heard even by those near to him; as, indeed, he himself hears with difficulty, from being deaf on one side. But in a moment you see that his mind is as vigorous as ever. His keen intelligence pierces at once to the core of the matter; no fallacy can blind or deceive the Duke of Wellington. He knows why the measure was introduced, what it is, what it will do, and what will become of it. He grapples with it like the spirit of a statesman tary trustee of the people; he is bound to look to their interests, as a whole: for by the people he understands—not those who bawl loudest about universal suffrage, but the people, as a whole, understood. he is often with difficulty heard,

BUST OF THE DUKE OF WELLINGTON.

To the numerous artistic memorials of the Duke, Minton and Co., of Stoke-upon-Trent, have just contributed a Bust, in Parian, which is entitled to special commendation. The likeness is admirable; and the

BUST OF THE LATE DUKE, IN PARIAN.

venerable age of the Duke is felicitously expressed; at the same time the characteristics of firmness and decision are maintained. The material—Minton's Parian—is of excellent colour, and of the finest texture, in the manipulation of which great skill has been displayed. The Bust is, altogether, one of the most successful productions of its class. It is published by Goode and Co., South Audley-street.

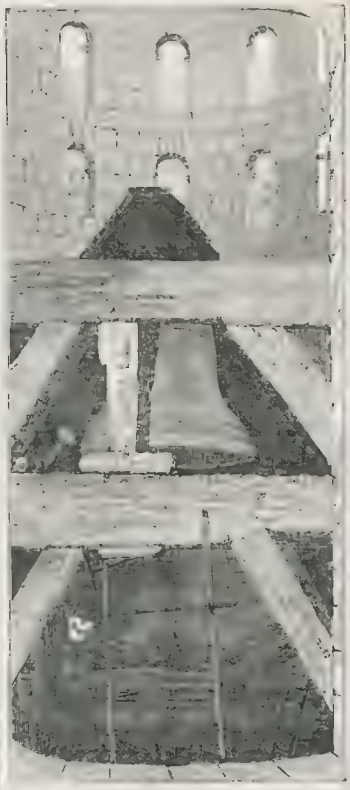
ST. PAUL'S.—THE CRYPT.—THE GREAT BELL.

At no period of the history of our great metropolitan church has this sacred depository of the illustrious dead been an object of greater interest than at the present moment, when it is about to receive into its cryptal home the remains of England's greatest hero. The crypt, like the body of the cathedral, is divided into three aisles, by massive piers, forty feet square; the floor underneath the dome being supported by a circle of columns: in the middle rest the remains of Lord Nelson, and within the circle, the remains of Nelson's brother and his family. In the south aisle is the grave of Sir Christopher Wren, covered by a flat stone, the English inscription upon which merely states that he died in 1723, aged 91: hung on the adjoining wall, is a tablet, bearing the Latin epitaph, also placed over the choir entrance. Near Wren's grave, are the remains of our great painters. Hence, says Mr. Leslie, R.A., "if Westminster Abbey has its 'Poets' Corner,' so has St. Paul's its 'Painters' Corner.' Sir Joshua Reynolds's statue, by Flaxman, is here, and Reynolds himself lies buried here; and Barry, and Opie, and Lawrence, are around him; and, above all, the ashes of the great Vandyck are in the earth under the cathedral." Close to the Wren monument, under an uninscribed slab, lies J. M. W. Turner, our greatest landscape-painter. Here are also the altar-tombs of Robert Mylne, the architect of Blackfriars-bridge; and John Rennie, the engineer of London-bridge. Nelson's remains are placed within an altar-tomb, surmounted by a black marble sarcophagus, made by order of Cardinal Wolsey, but which was left unused in the tomb-house adjoining St. George's Chapel, Windsor. The sarcophagus bears a Viscount's coronet upon a cushion; on the pedestal is inscribed "Horatio Viscount Nelson." Outside, but near this circular portion of the crypt, lies Lord Collingwood, as he requested, near Nelson; and opposite lies Lord Northeak, distinguished in the victory of Trafalgar. Here, too, are the graves of Dr. Boyce, next to Purcell, perhaps the greatest English musician; and George Dance, the architect, and the last survivor of the original forty of the Royal Academicians. In a dark recess of the eastern wall are the remains of the monuments from the old cathedral. There are some interesting memorials of the family of the great architect beneath the south aisle of the church: a monument of white marble on the right, representing a female seated at the organ, is to the memory of the daughter of Sir Christopher Wren; who, besides being a good musician, has the credit of having designed several of the City churches. Next the great architect lies his son; and a new white marble tablet is in memory of the great grand-daughter of Wren, who died at the age of 95: Sir Christopher was 91, and his son 97, at the time of their deaths. On opening the Wren tomb, to receive the body of the above-mentioned lady, the last of the race, the coffin of the architect was distinctly visible, in good preservation.

It is now time to speak of the spot in which Wellington is to be laid. We learn that it was the original intention of several persons in authority, who have the direction of the Duke's funeral, to have removed the granite slabs which inclose Nelson's remains to the edge of the grave of his brother: this would leave room for Wellington, equally near to the centre, and the two greatest naval and military heroes of the age would rest without any difference as to their position. This arrangement has been altered; and we now learn that the Duke will be buried at some distance east of the centre of the cathedral. The site of the warrior's grave would be in entire darkness were it not for the gas-lights which faintly light the tombs and arches; the side aisles of the crypt, after leaving the part covered by the transepts, are comparatively light. A very sensible proposition has been made to remove the sarcophagus made for Wolsey (which is empty), and to erect in its place a monumental tomb, containing the body of Wellington, properly inscribed; were this done, the two great commanders would lie in a place of equal honour.

On Monday Lord John Manners, the Chief Commissioner of Woods and Forests, accompanied by the Marquis of Salisbury, Lord H. Lennox, and several other members of both Houses of Parliament, visited the Cathedral, for the purpose of inspecting the arrangements in progress for the obsequies of the immortal Duke, as also the effect of the general lighting up of the interior. The Very Rev. the Dean (Dr. Milman) and Mr. Phillips were in attendance to explain the extent and character of the works. The whole of the gas jets were lighted, and the appearance of the interior was one of remarkable grandeur. The space over the tomb was lighted by several argand lamps suspended from the dome, while the nave was illuminated with wax candles. Lord John Manners expressed himself much struck with the effect, and complimented the various artists engaged, on their success. His Lordship also visited the crypt, which was lighted in the ordinary manner.

"The Great Bell" is one of the most popular curiosities of St. Paul's. It hangs in the southern clock-tower, above the two bells which strike the quarters. It cannot be raised and rung, but is hung on gudgeons, or axles, on which it moves when struck by the hammer of the clock. It is only tolled at the deaths and funerals of any of the Royal Family, the Bishop of London, the Dean of the Cathedral, and the Lord Mayor. But its deep tones will, doubtless, be heard at the State Funeral on Thursday next. The bell weighs 11,474 lbs.; and its diameter is 9 feet; the hammer lies on the outside brim of the bell, has a large head, weighs 145 lb., is drawn by a wire at the back part of the clockwork, and falls again by its own weight upon the bell; the clapper weighs 180 lb. This hammer is also used to toll the bell, in case of a demise or funeral; but the sound is not then so loud as when the hour is struck, in consequence of the heavy clock-weight not being attached when the bell is tolled, and causing the hammer to strike with greater force than by manual strength.



THE GREAT BELL OF ST. PAUL'S.

The key-note (tonic) or sound of this bell is A flat (perhaps it was A natural, agreeably to the pitch at the time it was cast); but the sound heard at the greatest distance is that of E flat, or a fifth above the key-note; and a musical ear, when close by, can perceive several harmonic sounds.—(*W. Parry.*)—From *Curiosities of London.*

A strange mistake has been made with regard to the bell. It is continually said to be the same, only re-cast, as that which, from the

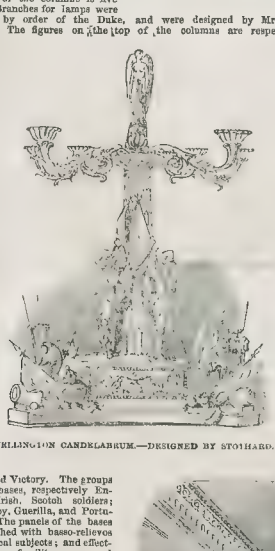
CENTRE OF THE CRYPT OF ST. PAUL'S.

reign of Edward I., hung in the bell-tower in front of Westminster Hall, and which was first known as "Edward of Westminster," and then as "the Great Tom." It is true that this bell was given, or rather sold, by William III. to St. Paul's, and re-cast by one Wightman; but it proved so faulty, that "Sir Christopher Wren employed Mr. Phelps (an honest and able bell-founder, as appeared by several specimens and testimonials), to make a bell proper for the clock all of new metal; and the agreement was so ordered, that this new bell should be delivered and approved before he was paid anything for it; and that he should accept the bell cast by Wightman, in part payment towards the new one, so far and at so much as the weight produced, at the price of old bell-metal; and Wightman's bell was likewise to remain at the church till the new bell was approved. And there were all other due and necessary cautions made in the agreement with Mr. Phelps, as may be seen by it, at the office of the works, at St. Paul's. This new bell, then, after trial, being found good, and approved of, Wightman's faulty bell was delivered to Mr. Phelps for the balance of his account."—(Wren's Answer to the Tract "Frauds and Abuses at St. Paul's.")

"THE DUKE'S" PRIVATE ROOM, AT THE HORSE GUARDS.

WELLINGTON CANDELABRA.

AMONG the magnificent Testimonials presented to "the Duke" was the pair of Columns, or Candelabra, here engraved; which, with the Wellington Shield, were designed by Stothard: the cost of the three pieces being about £10,000. The height of the columns is five feet. Branches for lamps were added, by order of the Duke, and were designed by Mr. Vulliamy. The figures on the top of the columns are respectively



WELLINGTON CANDELABRUM.—DESIGNED BY STOTHARD.

Fame and Victory. The groups on the bases, respectively English, Irish, Scotch soldiers; and Sepoy, Guerilla, and Portuguese. The panels of the bases are enriched with basso-relievos of classical subjects; and effective groups of military arms and trophies are placed at each angle of the base.

The whole of the plate was manufactured for Messrs. Green and Ward, by Messrs. Smith, Duke-street, Lincoln's-inn-fields.

TOMB OF THE DUKE OF WELLINGTON.

Honiade, near Taunton,
Nov. 9, 1852.

SIR,—As it is desirable to keep the character of "the Duke" *conspicuously* before the public, as an example and incitement to every person, from the highest to the humblest station of society; and as the interment *in the crypt* of St. Paul's will exclude his tomb from the public view, the solemn and imposing effect of which would be so great to all time, I would suggest that the statue of Queen Anne should be removed to unconsecrated ground); and on its site an appropriate monument be erected; such as a bronze colossal equestrian statue on a granite pedestal, the plinth of which should be so extended as to admit of four, five, or eight equestrian statues of so many Peninsular Generals surrounding him beneath, all to be of the simplest character. Such a Tomb would be a very imposing feature of the locality, a great ornament to the City, as well as a perpetual incitement to follow the great and good man in his many virtues.

Yours, &c.,
HENRY PERRY.

THE DUKE'S INTRODUCTION TO THE GOVERNOR-GENERAL OF INDIA.—When Lieut.-Col. Wesley (for thus the Duke originally wrote his name) first arrived in India, in February, 1797, the Governor-General was Sir John Shore (soon afterwards Lord Teignmouth), to whom young Wesley brought a letter of introduction from the Marquis Cornwallis; and it is amusing now to notice the guarded, though complimentary, terms in which the Marquis couched his recommendation. The letter is dated "Whitehall, June 10, 1796," and is as follows:—"Dear Sir, I beg leave to introduce to you Colonel Wesley, who is Lieutenant-Colonel of my regiment. He is a sensible man, and a good officer, and will, I have no doubt, conduct himself in a manner to merit your approbation." Sir John Shore seems to have very promptly and acutely discerned the true character of the young soldier. The present Lord Teignmouth tells us that, at their first interview, at a levee, Sir John turned quickly round to his aides-de-camp, as Colonel Wesley retired, remarking:—"If that officer should ever have an opportunity of distinguishing himself, he will do it, and greatly." The Colonel was a frequent guest at the table of Sir John Shore, who, in after-life, often adverted to the union of strong sense and boyish playfulness which, he said, was at that time a peculiar characteristic of his young friend.—*Military History of the Duke of Wellington in India.*

"THE DUKE" AT THE HORSE GUARDS.

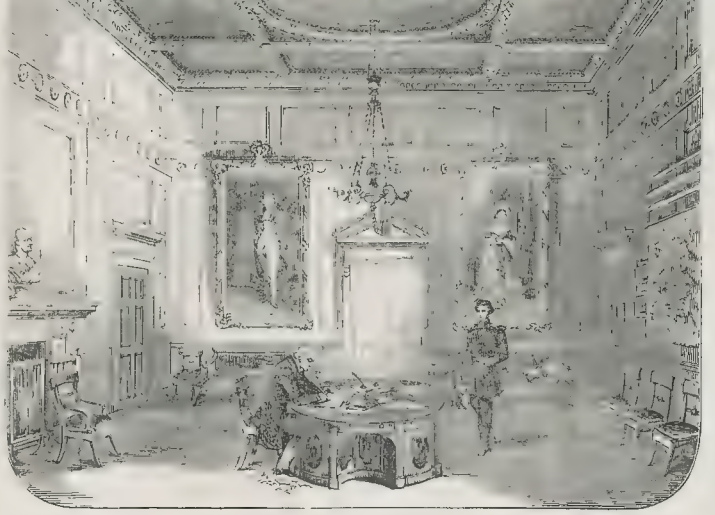
We have already illustrated the active life of "the Duke" in several of his official capacities; but in no instance is the great Commander's disregard of "pomp and circumstance" more evident than in the plainness of his Grace's office, at the Horse Guards. The building in which the military affairs of the empire are transacted certainly cannot be said to present any extrinsic ornament: there can be no reasonable complaint of unnecessary expense in this department; and the unpretending style of the apartment wherein the late Commander-in-Chief transacted business is nearly as plain as a barrack-room.

The Horse Guards, named from a troop of Horse-Guards being constantly at duty in it, stands on the site of the tilt-yard formerly attached to the Palace of Whitehall: in this yard, stables and barracks were built for the body of troops raised by Charles II., which he entitled "Horse-Guards." Precisely a century ago, these buildings were taken down, and the present edifice built by Vardy. It has been much complained of by architectural critics, and not without reason; and the two guards on duty in the stone alcoves, may be somewhat too grand for their quarters. The troop are accommodated in two lateral pavilions, which flank the east face of the main building. The apartments to the south of the arches are occupied by the Secretary-at-War, his assistants, and clerks, who manage all the fiscal business of the army. The Commander-in-Chief's department, conducted in the northern wing, is solely devoted to the government, discipline, and movements of the military. These apartments have a melancholy interest; for the Duke's last official act of importance was his regulation, as Commander-in-Chief, of the uniform to be worn by the officers of the militia, then in course of enrolment; and on the Saturday previous to the Duke's lamented death, the printer's proof was dispatched to his Grace for revision.

"The Duke's Private Room," which we have first engraved, was that in which his Grace transacted the business of his important office. It is singularly plain in its character: it is simply papered to imitate oak panels, and in the furniture a like simplicity prevails. A curtain hangs on a rod around the fire-place, so that it can be drawn at pleasure, just as in the Duke's chamber at Walmer. How simple and unaffected is the aspect of this official apartment, more especially when we consider all regulations and instructions to the army have, for several years, been settled within these plain walls.

Next is a chamber of greater pretension—the Audience Room, in which the Commander-in-Chief held his levees. It faces St. James's Park, and is the only ornamented apartment in the wing. The pictures are whole-length portraits, by Gainsborough, of George III. and Queen Charlotte. The bust on the mantel-piece is that of the Duke of York, by which we are reminded of a characteristic anecdote. When Sir Arthur Wellesley returned to England, "the hero of Assaye," on his first visit to the Horse Guards, he was kept in the waiting-room for upwards of two hours after his name had been sent up to the Commander-in-Chief, the Duke of York. (This was attributed to Sir Arthur having, many years before, given his opinion on the operations of the Duke of York's army in the north of Europe, in terms not palatable to his Royal Highness.) On the same day, Mr. Pitt heard of the above slight, when he issued cards for a grand entertainment, the invitation being "to meet Sir Arthur Wellesley." (See *Wellingtoniana*, p. 116, just published.)

WELLINGTON CANDELABRUM.—DESIGNED BY STOTHARD.



THE AUDIENCE-ROOM, HORSE GUARDS.

In the Audience Chamber, the body of the Duke will be deposited on Wednesday next, the night before the funeral; the procession being appointed to start from the Horse Guards on Thursday morning.

WATCH PRESENTED BY THE KING OF SPAIN.—The Duke possessed a remarkably handsome and well-constructed gold Breguet watch, which was presented to him by Ferdinand, King of Spain. This time-keeper is a "montre de touche," in which the hours are indicated by eleven projecting studs round the rim of the case; while the pendant marks twelve o'clock. In the centre of the back of the case, is placed an index or hand; which, when moved forward, stops at the position of the hour indicated by the watch, which, by means of the studs and pendant, can be easily felt and counted; for instance, at half-past two, the index stops in the middle of the space between the second and third stud from the pendant.—*Wellingtoniana.*

THE DUKE OF WELLINGTON AS A DIPLOMATIST.

(*Continued from page* 411.)

that his influence in France was still enormous, was attested by the rapidity with which he chased away the restored dynasty, and the suddenness with which, as by a breath, he destroyed the yet uncemented fabric of the new *régime*. Experience had shown that the coalition had its weak points; and what had happened before might happen again. The firmness and foresight of Wellington especially fitted him for this duty — to re-assure the timid, or to shame the wavering. It was in the name of honour and justice that he spoke, and thus far his task was easy; but those appeals came with the more force from one whose past deeds had given him the right to speak. The immediate result of his exertions was the additional Treaty of Vienna, by which the Allied Monarchs bound themselves to keep the lance in rest till the common enemy should be overthrown.

In three years from this date, the Duke of Wellington's services as a diplomatist were again in requisition. On this occasion, it was to proceed to the Congress of Aix-la-Chapelle, where, in the same spirit as at Vienna, he strove to moderate the reactionary spirit of the Sovereigns, and thus avert the inevitable resistance of their subjects.

Five years afterwards, at the close of the year 1823, the Duke of Wellington proceeded to the Congress of Verona as Plenipotentiary of England. The ostensible or supposed object of that Congress was the settlement of the affairs of Russia and Turkey, on which subject the policy of our Foreign Minister, Mr. Canning, would have been in accordance with that of the other Courts, in so far as they were prepared to observe the law of nations. But the Duke of Wellington, while on his way, had learned at Paris that the Congress would occupy itself with the internal affa rs of Spain, and in favour of that tyranny which the restored Bourbon was maintaining, to the disgust of Europe. The Duke, acting with his accustomed promptitude, wrote over for further instructions, which were at once conveyed by Mr. Canning, in the terms most congenial with the nature of the envoy. It was however, unnecessary to tell this diplomatist of the old school, that he must "frankly and peremptorily" declare that "England would not be a party to any interference by France, by force or menace, in the affairs of Spain." The Duke's own nature, and his experience of the character of the Spanish people, were enough to satisfy him of the folly of such a step, even were it not a contravention of that international law which Bonaparte had himself infringed when he crossed the Pyrenees. The Plenipotentiary stuck to the text of his instructions; but like remonstrances were of no avail against the infatuation of the French and Spanish Bourbons. The other Sovereigns represented at the Congress, or attending it, resolved on withdrawing their Ambassadors from Madrid. The Duke, reading his instructions with a liberal comment, refused to do the like with the British Ambassador; but declared that he should remain at the Spanish Court, in order to "allay," if possible, "the irritation" natural to the proud Spanish nation at being thus dictated to by f reign Monarchs. With the straightforward and somedie ated to by f reign Monarchs. With the straightforward and some-what pe remptory instructions he had received, the Plenipotentiary was not long in discharging his du y; for we find that, although the Congress did not meet till the 16th of December, the Duke had returned to Paris, his mission accomplished, before the end of the year

For the fifth, yet not the last, time, the Duke of Wellington was now about to be despatched on a diplomatic errand. On this occasion he was selected by Mr. Canning to complete the work he had done at Verona. He proceeded, under special instructions, to Madrid, still further to calm the irritation of the Spaniards, and by his immense influence and personal acquaintance with the chief men of Spain, to avert the most fearful consequences of the late resolution of the Sovereigns. In this mission he was successful, and on the 24th of April of the following year (1825) he delivered a speech in the House of Lords, in which he entered into a full explanation of all he had done.

Once more, and now finally, the Duke of Wellington, figured as Ambassador. In the year 1828 the state of our relations with Russia, and the presence in the Foreign Office of Mr. Canning, whose policy was feared by the Autocrat, rendered it desirable that some special communications should take place between the two Governments. The last Ambassador to St. Petersburgh, on the occasion of the crowning of Nicholas, had astonished the people of that luxurious capital by his display of magnificence. Now was to proceed there a man who disdained such sources of influence; the lustre of whose deeds paled all "inefectual fires." To the new Emperor the nomination of Wellington could n t but be a source of peculiar satisfaction; it was, as it were, the ratification of his right (but recently menaced by a formidable conspiracy), in the presence of the man who had so much contributed to consolidate his throne. No wonder, then, that the Duke was successful in the object of his mission, and that the apprehended causes of difference were precluded.

Thus much space we have devoted to the Duke of Wellington as a Diplomatist, because even those most familiar with his career have somewhat overlooked his services in this capacity. To his accumulated honours must be added this other distinction—that more often than any living diplomatist he was specially selected for diplomatic missions; that his instructions embraced more important and more various objects; and that on all occasions (save at Verona) he was successful—conquering civilians, as he had conquered soldiers, mainly by his steadfast adherence to the great principles of truth, honour, and justice.

THE DUKE IN HIS PRIVATE AND SOCIAL CAPACITY.

It seems almost an anomaly to supply the term "private" to one who had so entirely become public property as the Duke of Wellington; who could not appear outside his door but his children knew him, and pointed to him in their innocent wonder. Still, the Duke had a character wholly distinct in its external symptoms from that which he presented to the world as a warrior and statesman a character so unique and original, and, withal, so thoroughly English, that insensibly it has been adopted as a model even by those who could never hope to reach its singular excellence.

It is well observed by M. John Lemoinne, of the *Journal des Débats*, in his masterly little book, "Wellington from a French Point of View," that the Duke, after having been England's Captain, Minister, Protector, "had become also one of her monuments, and, as such, he could not refuse himself to popular demonstrations." This is true; and it accounts for the good-humoured freedom with which the Duke received and responded to the admiration and even the curiosity of the public. He towered so high that he could be above affectation. He did not disguise that he was well aware of the nature and extent of the feelings he excited. What most excites satisfaction is, that those feelings should be so universal and so intense; the poor and humblest of the p.ople regarded him with the same impulse of affectionate respect, that prompted one of his old companions in arms to burst into tears in the House of Lords on receiving from him a reproof.

He had become household property. Something of the admiration of the French for Napoleon pervaded the English towards the Iron Duke. Pictures, busts, statues, of all sizes, of every conceivable order of merit and likeness, swarmed in the shops, and ornamented the collections of private persons. Although England cannot boast a Horace Vernet, the pencils of some of our best artists have been employed in record.ng his battles, or in preserving his lineaments; while the sculptors have always been, and still are, hard at work. We have heard of one young artist who has already received orders for nearly 200 copies, in marble or plaster, of a recent likeness. By his aristocratic friends and admirers, and by public bodies, he was constantly tormented to sit for his likeness; and it was rightly considered no slight favour when he acceded to the request. He never thought of such things for himself; indeed, he had little occasion; for, as his witty French critic remarks, "As for public statues, it must be owned that England rather over-used her great man. The good old Duke could not walk out without being exposed to knock himself against his own nose. In Apsley House, he was literally besieged with representations of his own figure, and he could not look out of a window without finding himself in his own presence." In truth, the Duke was hardly used in this respect; if we reflect on the two extremes of bad taste with which he was assailed outside his own dwelling-house. If he was indifferent, as a matter of vanity, to having his own likeness perpetuated, when he did consent to sit he was most particular as to the exactitude of the resemblance. Here we have the predominating trait in his character exhibiting itself in trifles. Nor was this all: he carried his idea of duty still further. If he went through the ordeal at all, at least the work must be well done. He was most minute and careful in this respect; would take the measuring compasses, and ascertain the exact proportions of his own features, then compare them with the clay representative. Nor was it only the elaborate works of great artists that adorned the galleries of the rich: every petty image-maker had his *contrefaçon*; so that the head of the Duke appeared in all conceivable sizes and in every degree of divergence from truthfulness to the original. It had, however, this effect—that his face became known in the remotest nooks and corners of the country, so that he could not pass along the street without being recognised.

Let us pursue the Duke through one day, during the height of the season. Of course, for the sake of effect, we crowd into the record of one, the diversified occupations of many days; but, more or less, the picture will be true.

At six, or half-past six, the aged man would rise from his simple bed on its iron bedstead; for, like all really great working men, he always rose early. At an advanced age, he invariably indulged in the hardy luxury of a shower-bath, to which may be attributed much of the power of endurance he manifested up to the very close of his life. This healthful and invigorating act concluded, he proceeded to dress himself, never employing a valet or attendant, but always preferring to do everything, even to his shaving, with his own hands And how simple was that dress In summer, the snow-white trousers and the plain blue or black coat, the white vest, and close band round the throat, confined by that unique steel buckle. Of this buckle there is an anecdote told that illustrates his character. Some kind member of his family, thinking that the old steel buckle, of many years' service, was scarcely good enough for so great a man, had replaced it by another of more costly material and more brilliant effect. The result was the reverse of what might have been expected. The Duke, instead of being pleased at the change, was annoyed at the loss of his old serviceable friend, and made such a to-do about it that all sly subterfuge was useless, and they were obliged to "find" the missing buckle.

But, to return to his habits. His dressing achieved, he devoted himself to labour for some time before breakfast. Thank of the many high posts he filled, and of the duties attaching to them; of the correspondence, the investigation, the mere consumption of time and physical labour induced by those offices; and then add to these the multitude of letters written by indifferent persons, too many from mere idle curiosity, or to obtain an autograph, and it will not seem surprising that the Duke was one of the hardest-worked men in her Majesty's dominions. He might have had less to do if he could have permitted himself to act through the agency of others; but, like the late Sir Robert Peel, he was unwilling to suffer any one else to do what could be done by himself. And this was not, as might be supposed, from the mere fidgetiness of an old man, but because, as a matter of duty, he considered himself bound to form a correct opinion upon every subject that came before him, and also to judge for himself on questions of fact. Those with whom he thus came in contact in discharge of his various duties universally bear testimony to his assiduity and stoical perseverance in fulfilling his functions as Commander-in-Chief, as Governor of the Tower, as Master of the Trinity House, a d as Lord Warden of the Cinque Ports. No subject was too minute for his attention, provided there was any principle of justice or duty involved in it. We do not know whether the anecdote has appeared in print; but we have heard a story characteristic of his love of discipline, and his promptitude in attending to justifiable application. A gentleman, it is stated, in passing Apsley House, had in some way or other contrived to lose his cane, which the servant would not take the trouble to look for. A second, and even a third application produc ng no result, the gentleman wrote to the Duke, stating the facts, and complaining of the domestic. To this he received an immediate reply, requesting him to call at ten the next morning. When he presented himself, he received, not only the cane and an apology, from the servant, but also the unpleasant news that, after six and twenty years' service, he had been dismissed for the breach of duty and good manners. That was a hard measure of punishment; but the Duke probably felt his own character implicated by the incivility of his servant. Ultimately, the gentleman was induced to make, with many apologies, an appeal to the clemency of the Duke, which proved successful, and the man was reinstated.

The best part of the day was usually spent in the labours incidental to his position. Of course, he was constantly liable to the visits of callers, some of whom, though old friends, would be troublesome.

The military instincts of the Duke were carried into the small concerns of life, and the discipline to which he subjected himself when conducting the weightier affairs of the nation, whether in military or political strife, was discernible, and sometimes under rather ludicrous aspects. The Duke, during very little of his public career, could call any time his own. When not occupied in the duties of his more legitimate profession, or in the councils of the state, his position rendered him a frequent referee on subjects of a national character; and then, like other men, he had his own private friends to whom he had to give audience. Visits, however, were sometimes *mal-apropos*, and a hasty intimation to that effect did not fail to escape him. He was obliged to lay down the most stringent rules for the preservation of his time, or rather the time of the public, from intrusion not only from persons, but also from missives of every kind, in the shape of presents, curiosities, and other things with which he was continually pestered Nothing of this kind could be left at Apsley House without previous permission obtained from himself or from his secretary. On the other hand, he did not close himself up against what was passing around him. He was fully alive to all the activity of invention, and sought after useful novelties of every kind. It has been already recorded of him in this Journal, that no part of the newspaper was more closely conned by him than the advertisement columns; and that if he saw anything announced that was likely to be worth examining or purchasing, he sent for it immediately. Thus, on the one hand, he protected himself from being intruded upon by impertinent speculators, who might strive to trade on his name; while all that was really worth having was sure to be within his reach. Even in such a trifle as this the practical genius of the man may be detected.

We have supposed him occupied, before and after his frugal breakfast, with the reading of his correspondence, of documents of various kinds appertaining to his public duties. A now familiar instance of this is the fact, that almost immediately before his death he was occupied in mastering the report of the Oxford University Commission; partly because, as Chancellor of the University, it was his duty to do so, and partly because he expected that the subject would come under discussion in the ensuing session of Parliament.

When these labours, and the scarcely less onerous duty of receiving visitors, did not occupy too much time, the Duke was accustomed to sally forth for a walk or a ride. Who does not remember the venerable figure of that old man, in his plain frock-coat and trousers, his small but sharply cut hat, as he half walked, half-wandered, on his way, manfully struggling with his iron will against the growing infirmities of age, which made his step totter at times in spite of himself? Who does not recollect to have seen this plain, unpretending veteran, the mere illustrious for his unostentatious bearing, as he passed through troops of fellow-subj. cts, not one of whom but lifted his hat as he passed? Who has not heard of his hair-breadth escapes from horses, cabs, and vehicles of all descr ptions, as, self-possessed and fearless of danger, he kept on his solitary way, deaf, not so much from physical infirmity, as from the pre-occupation of his thoughts. Thus—or, as was more often the case, on horseback, where he sat with the ease of youth, but the relaxed hold of age—would the Duke of Wellington make his way from Apsley House, or the Horse Guards, to the House of Lords, receiv ng, on his way, a personal homage such as is not paid in this country to any but the Sovereign, or to some popular Princes of the Blood Royal. In this respect he stood quite alone in the world. There was no other man in any country, except a crowned head, who received this honour, and received it so spontaneously. The word had never gone forth —there was no national consent—thus to distinguish him from the rest of the world; yet, as if by a miracle of common accord, every man, from the highest peer to the humblest artizan, made public obeisance to him; and the women, young and old, and the little children, when they heard his name, gazed on him with the same admiration, and paid him a homage as sincere and still more touching. You might trace his pa h in the turned faces and gazing eyes of the people through whom he had passed; he seemed to leave a line of light along his traces. And when he reached the House of Lords, it was but to meet from the highest and the noblest the same marks of respect he had received from unknown admirers. With a few he was on such terms of intimacy, that they could take the liberty of grasping his hand. These were old companions in arms; or illustrious civilians such as Lord Brougham, Lord Lyndhurst, Lord Lansdowne, or the late Earl Grey. With others he was intimate from personal liking; as, for instance, with Lord Ellenborough; but with none were his communications more cordial, friend.y, and jocular than with his old antagonist, but since fast friend, Brougham. It was not unusual for his colleagues, when perceived, to suspend for a moment or two any discussion short of a formal debate, because his advent centred on him all attention. To see him on a Royal Speech day, when that brilliant chamber was crowded with the intellect and beauty, rank and fashion of the empire, was a thing never to be forgotten. As for the fair sex, it was as if they would have devoured him with their eyes, smothered him to a delightful death with their questions and their congratulations—all which he was of a nature to enjoy beyond measure. From some the salutations of friends, political associates or antagonists, and of dis inguished foreigners. His courage in battling against infirmity was here most marked; he would persist in staggering, under the weight of that massive sword of state, even at the imminent risk of a catastrophe; and he supported the fatigue of such public displays with a calm stoicism which always drew forth the warm and affectionate congratulations of the Queen. Towards her Majesty in private, his demeanour is believed to have been more that of a father than of a subject, but not from forgetfulness on his part of duty and etiquette, but because her own affection and respect commanded it. In public, the contrast presented by the Queen and the great conqueror of the enemies of her country, was touching, from the tender respect she paid to him, and the studied courtesy of his homage to her. Of his demeanour in the House of Lords, much has been written, and more could be added; we mean, not in his political, but in his personal capacity. Let us rather follow him to his home; where, if alone, he dined frugally;—if he has guests, magnificently. If there did not happen to be some special attraction to draw him away in the evening, he would usually spend an hour or two in his cabinet; yet, still find time to mix with the ladies in the drawing-room. During the musical season, he would dress (and how distinguished, how ever classically elegant he rendered that ornate costume, our ord nary evening attire!) and proceed to the opera, or to the Ancient Concerts, or to the concerts of the Philharmonic Society; where, of course, he was an object of universal respect and attention.

At other times, when on some visit of ceremonial, he would wear his blue ribbon, especially if he was invited to an evening party where any member of the Royal family was expected. Of course it was not every lady, even of high fashion, who could obtain the honour of a visit from the Duke; even the highest regarded it as an honour. He was not guided in these condescensions by the rank of his hosts in the peerage, or even by their being in the peerage at all. He knew perfectly well the influence he could communicate by the visit of even a few minutes; and young people often encouraged the presentation to invite him, were gratified with this distinction, when the richest and the highest might have received an excuse. He was, of course, an object of universal manœuvring on the part of the givers of grand entertainments; not to have had the Duke were to have missed the greatest attraction; to have numbered him among the guests was an achievement. And yet his kindness in this respect was proverbial, because, as has already been observed, he knew that he was in some respects public property, and thus it was impossible to unpardonable in him to remain in obscurity. His main reasons for ever declining, or making an excuse, were the necessities of his public position, or his duty, which called him elsewhere; and even when he could plead these, he often contrived to steal half an hour in order not to be wanting at the soirée of some favourite *protégée*.

And the links that bound him to these friends were not of a merely formal kind. Those who say that the Duke of Wellington had no heart, do him and their own judgment injustice. He was a man in whom the strongest sense of the feelings; but he was not the less open to the kindliest impulses. Of children he was always fond; and children paid him an involuntary tribute, by being fond of him. The instinct of children is seldom wrong in this respect; and they all came running after him, regarding their little joys and sorrows, and looking for the presents with which he usually stored himself beforehand. He was godfather-general; and, in this respect, accumulated an awful amount of responsibility. As his friends and associates, more particularly amongst the female aristocracy, were usually selected for their talents and virtues, it may be hoped that the future career of those innocent objects of his sponsorship, from Royalty downwards, may be influenced by the consciousness that they owe their name to that illustrious man—more illustrious even in his manly virtues, than in his glorious deeds.

Stories have circulated to the effect that the Duke was penurious in his habits. Except that he squared his personal expenditure with the simplicity of his tastes, this charge is unfounded. He was, of course, a natural object of prey to all kinds of impostors, and was obliged to adopt rules for self-protection. He was a large dispenser of private charity; and, in some cases, was frightfully plundered by impostors—in one instance, which was made public, of upwards of £500. He was a contributor to a great number of charities, hospitals, and other benevolent institutions, besides being either a president or patron of many of them.

We have spoken of some of his ordinary habits in town. They were still more simple and more hardy when he was in the country. It was to him a welcome relief to go down to Walmer Castle to enjoy comparative peace and the sea-breezes. There, one of his most favourite visitors was Lord Brougham, who, more than any other living man, will be enabled to leave for posterity a portrait of the salient points of his character, and of his public character. Here, in consequence of his duties being fewer, he repeatedly afforded himself an extra hour's rest. While, in this, his marine retreat, he much occupied himself with the fortifications of the coast. He was here, on a small scale, as much the object of love and veneration as on a large scale in London. He knew the people, and especially their children, and always acted towards them with kindness. His habits here were singularly hardy and Spartan-like for so aged a man. He never feared changes of the season; indeed, it was often the tempestuous season that he chose for his visits to the sea-side. Here, too, he had his duties—his correspondence, his out-of-doors and in-doors pursuits—all of which, even down to the superintendence of the details and accounts of his household, were performed by himself. His precision extended to trifle, and he was punctual, from habit, as well as from judgment. A trifling incident, which exhibits, perhaps, more of the force of habit than of discipline, is related of the Duke when at Dover. It was his Grace's custom to have in readiness three saddle-horses, a pig and a saddle-horse, either of which he used whenever he had to proceed from Dover to Walmer. The oddity here recorded is, that it was the invariable custom of his Grace, when he had mounted his horse, to let it walk at a slow pace until he had proceeded to a given distance—about fifty yards beyond the hotel—and then abruptly push the animal into a full gallop, which he would keep up until the end of the ride. This anecdote is insignificant in itself, but the quidnuncs of Dover were often mightily amused by what they considered to be an evidence of his extraordinary method and order. Wagers were constantly laid, that at a given boundary the Duke would suddenly accelerate his speed; and the unpractised in the ways of his Grace in this respect had to pay for their incredulity. This instinctive regularity pervaded all his actions—the least as well as the most important. Of course, as he grew older, his mind became more and more fixed on such things—that is the inevitable fate of age.

We have here touched on some of the points of his character, but there are still others, and most interesting ones, left for future handling.

STATUES AND PORTRAITS, AND MEMORIALS OF WELLINGTON.

We consider that we may do an acceptable service both to the existing generation (so deeply engrossed with thoughts upon the mighty dead, now shortly to be consigned to the grave), and also to future historians, in producing an accurate account of the various Statues, Testimonials, Portraits, and other works of Art, including Historical Pictures, raised to his honour, or in which his achievements are commemorated, or even incidentally referred to. Without further preface, therefore, we commence with the principal

PUBLIC STATUES TO THE DUKE.

The first public statue erected to the hero of Waterloo was that known as the Achilles statue, in Hyde Park; executed by Westmacott; erected there by order of George IV., on the 18th of June, 1822, and inscribed :—"To Arthur, Duke of Wellington, and his brave companions in arms, this statue of Achilles, cast from cannon taken in the battles of Salamanca, Vitoria, Toulouse, and Waterloo, is inscribed by their countrywomen." The statue is about 18 feet high, and weighs upwards of 30 tons; cost £10,000, subscribed by ladies. The figure is copied from one of the famous antiques on the Monte Cavallo, at Rome; but Achilles is a misnomer: and the statue has never received its sword! For twenty-two years this was the only public statue in honour of the Duke of which the metropolis could boast.

In 1844 two equestrian statues were erect ed to the Duke; the one in the City of London, opposite the Royal Exchange; the other at Glasgow. The City statue, placed in the midst of the open space left by the removal of Bank-buildings, can easily be viewed on every side. The statue itself is 14 feet in height from the feet of the horse to the top of the head of the Duke. The pedestal, which is of granite, is altogether 14 feet high, so that the total height is really 28 feet. The horse is in an attitude of rest: opinions differ as to the merits of the animal; but, to our eye, the chest and shoulders are disproportionately large, the head is too sharp, the neck too short, and the channel too heavy. The portrait of the Duke is more successful than the entire figure, which is ill-proportioned, whilst the position is objectionable. There has been a striking anomaly noticed in this statue: stirrups are omitted, as being a modern invention, whilst there is introduced an appendage to the bridle which is an addition of our own day. The Duke wears a military cloak, so that the classic affectation is not extended to the costume.

The cost of the statue and pedestal was £6000: the metal, which was given to the committee by the Chancellor of the Exchequer, is valued at £1800, in addition to that amount. The money was raised by a public subscription, after a meeting held at the Mansion House. The contract with Sir Francis Chantrey was made in February, 1839, by the trustees—Sir Peter Laurie, Mr. John Masterman, Mr. Arthur K. Barclay, and Mr. R. L. Jones; the work to be completed and fixed by 1843. Sir F. Chantrey, at his death, left the whole model complete, and also the head of the Duke, the full size. The work was completed by his assistant, Mr. Weeks, under the direction of the executors.

The King of Saxony was present at the inauguration of this statue, by the Lord Mayor and civic authorities, which took place on the 18th June, 1844.

As to the quiescent attitude of the horse in this, and two other equestrian statues by the same sculptor, and which, in spite of all arguments to the contrary, we cannot help condemning, as contrary to the prevailing nature of the horse, we find some revelations in Jones's "Recollections of Chantrey" which are worth quoting. The passage runs as follows:—

When George IV. was sitting to Chantrey he required the sculptor to give him an idea of an equestrian statue to commemorate him, which Chantrey accomplished at a succeeding interview by placing in the Sovereign's hand a number of small equestrian figures, drawn carefully on thick paper, and resembling, in number and material, a pack of cards. These sketches pleased the King very much, who turned them over and over, expressing his surprise that such a variety could be produced, and, after a thousand particulars of opinion somethe spirited steed, sometimes a trotter, then for a prancing or starting charger—his Majesty at length resolved on a horse standing still as the most dignified for a King. Chantrey probably led to this, as he was decidedly in favour of the four legs being on the ground. He had a quiet and convincing manner of conveying his opinions of the propriety of that, which, from reflection, he judged to be preferable. Chantrey's friend, Lord Egremont, was of the same opinion; for, in writing to the sculptor, he said, "I am glad your horse is not walking off his pedestal, which looks more like a donkey than a sensible horse." Chantrey wished, in this instance, for a quiet or standing horse; but he determined, if he ever executed another portrait, to represent the horse in the act of pawing, not from the conviction of its being a better attitude, but for the sake of variety, and to convince the public that he could do one as well as the other, for, whenever his works are censured, it always was for heaviness or want of action, which is rather surprising considering the energetic and speaking statue of Grattan.

"Man proposes—but"——we all know the rest. The next equestrian statue which Chantrey undertook was that for the City of London, now in question, and he still stuck to the quiet horse, the identical quiet horse, we believe, upon which he had on an earlier occasion perched his Sir Thomas Munro. Mr. Jones, in his little *brochure* already referred to, states, on the authority of Mr. Cunninghame, that the Duke once went to see this equestrian statue (previous to its being sent out to India), when he remarked:—"A very fine horse;" after a pause, "a very fine statue;" and again, after another pause, "and a very extraordinary man."

The Glasgow statue originated in a resolution passed at an influential public meeting, in the spring of 1840; and within a few months the subscriptions amounted to nearly £10,000. A deputation of the subscribers then waited upon the Duke of Wellington, at Apsley House, and communicated their intention to his Grace.

In this case the artist employed was not an Englishman; and, pending the deliberations upon the subject, Chantrey appears to have become early aware of that fact, and writes, under date May 18, 1840, to Miss Moore "Tell papa that the Duke has discovered that in England, or even in Scotland, no artist can be found worthy of the Glasgow Commission: that it must be offered to Thorwaldsen of Rome. If Thorwaldsen should not be able to cast it, what then? No matter!"

As to the appointment of Thorwaldsen, however, the English sculptor was mistaken—a *French* artist was resorted to. On the 30th of November, 1841, the acting committee resolved to nominate Charles, Baron Marochetti, of Vaux, in the Department of Seine-et-Oise, in France, as the artist to design and erect the statue, with the illustrative bas-reliefs, on the pedestal, representing the battles of Assaye and Waterloo. The inauguration took place on the 8th Oct., 1844, in presence of the Lord Provost, Sir Axtel Douglas, Commander of the Forces, &c.

In this statue, also, the horse is quiescent, the moment being that when having just come to a state of repose, he seems as if listening to some distant sound. The head is that of an Arab, with the broad forehead and wide nostrils, and is standing with fore foot a little in advance, in an easy posture, the reins lying slack. The position of the Duke is that of a General reviewing his troops. The likeness is taken when the Duke was in the prime of life, the hero being dressed in the full uniform of a Field Marshal, with his different orders. The bas-reliefs on the south and north sides of the pedestal represent the first and last victories of the Duke, namely, that of Assaye, fought on Sept. 23, 1803; and Waterloo, June 18, 1815. Two small bas-reliefs on the east and west ends of the pedestal represent the soldier's return, and the soldier at the plough after all his labours, and a boy having saved his country from the thread of the fo[illegible]

In 1846 was erected the colossal equestrian statue over the triumphal arch at Hyde-park-corner, which was of dimensions to throw all equestrian groups extant, or on record, into the shade. This stupendous work is of so recent date, and its erection on the site where it stands was attended with so much difference of opinion, expressed with so much acrimony, that, upon an occasion like the present, we shall avoid detailed criticism, and merely give some statistics in reference to what must always be looked upon as a remarkable work. We believe it is correct to state, that the statue owed its existence, in part, to the contest for the execution of the City statue, which resulting in disappointment to the numerous patrons of one of the candidates, it was resolved to get up a new subscription for a statue at the West-end. So popular was the project, that in a very short time £30,000 was raised. Mr. M. C. Wyatt was appointed to design and execute this interesting memorial; and, assisted by his son, was occupied upon the model for upwards of three years. The model required 100 tons of plaster-of-Paris. The group represents the Duke as he appeared at the field of Waterloo, upon his favourite charger Copenhagen—the latter modelled from the most authentic data the artist could command. The horse is in a standing position, with his head a little on one side, as if looking out to a distant point of the field. The Duke sat to the sculptor for the portrait, which is considered like him. This statue is nearly 30 feet high, its other dimensions being as follow:—Girth round the horse, 22 feet 8 inches; from the horse's hocks to the ground, 6 feet; from his nose to the tail, 26 feet.

The entire group weighs 40 tons. It has been stated that the metal is from guns captured by the Duke in his various campaigns, and contributed by the Board of Ordnance; this was promised, but only one gun was given by the Ordnance—to cast the head; and from three to four tons of the rest of the forty were contributed on a division of what was left from the City statue of the Duke, between the Nelson monument (for the capital) in Trafalgar-square, and the Wellington group now in question.

The inauguration of this statue took place on the 30th September, 1846; it being conveyed entire from the *atelier* of the sculptor in a waggon drawn by 30 dray-horses, and escorted by cavalry. (For full particulars see ILLUSTRATED LONDON NEWS, No. 231.)

In October, 1848, a stone statue of the Duke, by Mr. Milnes, was erected on the Green near the river in the Tower of London. The figure is draped in military costume, with a cloak hanging from the shoulder. It is about eight feet in height; the pedestal being ten.

In the present year—namely, on the 18th of June last—the citizens of Edinburgh inaugurated a splendid equestrian statue of the great Duke in their fair city. This great work, which is from the hand of Mr. John Steell, is colossal in dimensions, measuring nearly 14 feet in height; and, together with the pedestal, which is of Aberdeen granite, rising from the ground about 26 feet. The bronze weighs nearly twelve tons. It derives additional interest from its being the first bronze statue ever cast in Scotland. Unlike most other bronze statues, in this the different parts are not riveted together, but *fused*—an improvement attended by considerable labour and difficulty. The horse is here in high action. The only parts which touch the pedestal are the hind feet and the tail; and, accordingly, in order to preserve the balance, great skill was required in apportioning exactly to each part its proper weight of metal. We believe the only other equestrian statue in a similar posture is that of Peter the Great, at St. Petersburgh, where the difficulty is chiefly overcome by the not very appropriate introduction of a serpent, upon which the horse is trampling, and which not only strengthens the hind legs, but projects far behind, and serves as a balance. The statue represents the Duke mounted on his charger, and in *repos ordre*; the reins lie loose on the neck of his plunging steed; in one hand he holds them and his plumed hat, and with the other points commandingly to a distant part of the field. A large engraving of this statue has just been published.

The above are the principal public works of sculpture erected to the Duke in this country. Of busts there are several in public places, viz.:—One, by Turnerelli, in the Council-room of the Guildhall, opposite the bust of Nelson by Mrs. Dawson Danser; another, by Wolleksen, in the Chantrey, in the Guard-room at Windsor Castle, over which hangs the tenure-flag annually renewed for Strathfieldsay. In the same room is the bust of Marlborough, copied from Rysbrach by Sevier, and over it the tenure-flag for Blenheim.

Whilst upon the subject of Sculpture, we may quote some very pertinent, and we believe very true, observations, made by Sir F. Chantrey, in reference to a most remarkable point in the expression of the Duke of Wellington; namely, the eye. Sir Francis, in the sculptor, in his slight notes appended to the "Recollections," by Jones, already cited. Sir Henry, speaking of his interview with Chantrey, says:—

I observed that in some of his busts the pupils of the eye were marked, and others had the ball of the eye left plain. As this very time he was engaged on busts of George the Fourth and the Duke of Wellington, and he had marked the pupils of the eyes in the Duke's bust, and not those in the bust of the King. I asked him what it was that guided him in making the distinction? He said, "In the expression of some faces the eyes are the feature that takes the lead. When that is the case, I mark the pupils, when it is otherwise I do not; and a very simple experiment always decides which should be done."

On the second occasion that Mr. Jones came, he found the bust of his being there, and desired us to walk about for a few minutes, while he tried the effect of marking the pupils on his model. When he had done it he called us back. I told him that, as far as I was capable of forming an opinion, I liked the bust better before the eyes were marked, and Mr. Jones said the same. He said, "You are right, the marks won't do;" and he immediately removed them.

PORTRAITS OF THE DUKE.

The Portraits of the Duke, painted at various periods of his life, are so many and so various as almost to defy the attempt to enumerate them all. We will endeavour, however, to produce as complete a *catalogue raisonnée* of them as possible:—

Amongst the earliest is that by Hoppner—a fine picture, representing the Conqueror when Sir Arthur Wellesley, whole length, standing, holding his sword and hat: an Indian holding his horse. This picture was engraved in mezzotinto, by W. W. Barney, and published 1808. The figure was also engraved by G. Clint, 1814. The same artist painted a half-length of the hero, when Earl, with ribbon and star, which was engraved by H. R. Cook, in 1812, and in 1815. In the latter the title of Duke was given.

Sir William Beechey: A half-length. Engraved by W. Skelton, 1814; also, by H. Meyer, in Cadell's British Gallery, 1817.

Robert Horne: A whole length, when Marquis. Engraved by J. Williamson, 1813; and in smaller size, in mezzotinto, by J. C. Easding.

J. M. Wright: A whole-length, on horseback, holding a baton. Engraved by D. Havell, 1814.

F. Gerard: A whole length, both hands resting on his sword, his hat lying on a rock. Painted in 1814. Engraved by P. Fortier, in 1818.

Pellegrini: Oval, in a square, a half-length, in the Portuguese uniform, with ribbon and star; flags, cannon, &c., as accessories. Engraved by "F. Bartolozzi, Ætat. 83," (1811.) [This engraver passed the last thirteen years of his life at Lisbon, and died there in 1815]. There is another smaller engraving of this picture in 8vo.

Pellegrini painted another portrait about the same period, as the Marquis of Wellington, a whole-length, in the Portuguese uniform, a paper in his right hand, his left resting on his sword. Engraved by James Godley, in large folio, 1812.

H. Leveque: A whole-length, standing in his uniform, a field telescope in his right hand, and pointing with his left to a camp. Engraved in large folio, by the artist himself, 1818.

Isabey, the celebrated French miniature-painter: An oval, head and shoulders, with orders. Engraved by Mecou, 1814, inscribed "Le Duc de Wellington," published in Paris. Also engraved by Cochrane. This is a very pleasing and spirited likeness. The original was sold in Paris so recently as Saturday last, the 6th of November, at the sale of the Countess d'Hijar's property at Versailles, for the large sum of 10,001 fr., or £424. The Marquis of Hertford was the purchaser, after a sharp competition with another bidder.

Carlo Anatasi: An oval medallion profile, left side seen, when Marquis, wearing the Order of the Golden Fleece. Engraved by Freeman, 1814; also engraved by Middlemist.

T. Phillips: A half-length, in uniform. Engraved by W. Say, 1814.

But the most interesting, and, perhaps, on the whole, the most agreeable of the early Portraits of the Duke, produced about the period of his crowning triumph in the field, is the Miniature by Hayter (now Sir George), painted by order of his Grace for his mother, the venerable Countess of Mornington, and so much esteemed by him and her, that his Grace caused it to be engraved by J. H. Robinson, not for publication, but for the use of himself and any friend upon whom he might think proper to bestow a copy. This Portrait represents the Duke without any military paraphenalia, looking at the spectator, full-face, in a frock-coat closely buttoned up, and a white cravat.

The better-known portraits are, of course, those painted within the present generation, and by more modern artists, commencing with Lawrence.

There are four portraits of the Duke by Sir Thomas Lawrence, of each of which numerous repetitions exist.

The first in order of date is that representing the Duke with the Sword of State, painted for the Prince Regent for the Waterloo Gallery at Windsor, and exhibited at the Royal Academy in 1815. This picture was engraved in line by Bromley, with the following inscription, "The Duke of Wellington as he appeared on the Day of Thanksgiving at St. Paul's, for the ratification of that Peace, the attainment of which his valour, genius, and wisdom had so essentially promoted; distinguished by the insignia of those honours with which a grateful country and applauding Europe had invested him, and bearing, by command, the Sword of England." This is a very dazzling picture—ambitious in style, and with a very broad light from above and behind, where, also, is a view of St. Paul's. It is, however, by no means the most pleasing of Lawrence's portraits of the Duke.

The next was the Portrait of the Duke, "in the dress that he wore, and on the Horse that he rode, at the Battle of Waterloo," painted for Messrs. Bathoe, and exhibited in 1818. This is a very spirited moving picture; the Duke mounted on his charger "Copenhagen," waving his hat and giving the word for the Guards to make that eventful and resistless charge which decided the fortune of the day of Waterloo. Of this picture, Wilkie, who saw it before it went to the Exhibition, writes to Sir George Beaumont, 10th Jan., 1818: "Sir Thomas Lawrence has almost completed his equestrian portrait of the Duke of Wellington. This I have seen, and think it a happy effort. He is dressed in a plain blue coat, and a large cloak of the same colour over it. It is the dress he wore at Waterloo; and, not being a regimental dress, has a very uncommon, though inherently military look about it. It is one of those images of the Duke that is likely to supplant every other; and I should not be surprised if it were to become a common throughout the country as Sir Joshua's Marquis of Granby. It is rather a dark picture, and I could wish that it had something of a quality which has almost gone out of fashion in the present day—I mean *tone* in the colouring." This picture was engraved in the ILLUSTRATED LONDON NEWS of the 18th of September last.

The third portrait, painted by Lawrence, is that done for Mr. Arbuthnot, in 1818. It is a half-length, representing the Duke in a military cloak, with the right hand thrown across to the left shoulder. This has been repeatedly engraved: in mezzotint by Cousins and by Jackson; in line, by Dean Taylor and by Charles Smith; and in smaller sizes, in mezzotint, by Milnes, Burgess, and others.

This was always the favourite portrait with the Duke; and we think not without reason, for the expression is very pleasing, combining manliness with delicacy and refinement of sentiment. It may be mentioned that the great Commander, though never betraying a particle of personal vanity in the little sense, was proud of the estimation in which he was held both by the public and a numerous circle whom he honoured with his friendship; and a very usual mode of marking his esteem was the presentation of a print of himself, generally the Arbuthnot one, with his autograph affixed, and in a plain little maplewood frame. This, for instance, was his usual *souvenir* to the hundreds of brides whom he has "given away," and, probably, the most gratifying testimonial he could bestow. Only a few days before his death he gave one of these modest keepsakes to an individual of illustrious rank! It happened that in September last, the Duke and Duchess of Mecklenburg-Strelitz, on their return from England to the Continent, paid a visit to the Duke at Walmer, when, in the course of conversation, the Duchess asked "the Duke" which of the many portraits existing of him he considered the best. The latter immediately pointed to the little maple frame hanging from the wall, in which was a print of the "Arbuthnot picture," and announced his preference for it. Upon the Duchess remarking that she would send to London for a copy, "the Duke," with his usual gallantry, declared she need not do so: and, taking the print down from the nail whereon it hung, begged her to accept it, which she did. No sooner had his visitors left the room, however, than the Duke took thought of the blank space which he had made on his wall, and also the absence of his portrait from the line of Prime-Wardens, Pitt, and others, which he had arranged thereon, and, with his usual love of order, promptly set about refilling it. The very next morning a note reached Messrs. Graves and Co., in the Duke's hand-writing—"F. M.'s compts." &c.—requesting that they would, with as little delay as possible, procure for him a copy of the Arbuthnot portrait, framed in maple-wood, and forward it to Apsley House, whence it would be immediately sent to Walmer. No time was lost in putting into execution his Grace's order, and a message was sent to the steward, at Apsley House, announcing that the print, framed, would be ready for delivery on the following day. In the meantime, four days only after the first note, came another from the Duke, dated "7th Sept., 1852," in which he referred to the order already given, and "begged to know if it had been received, and what progress had been made in the execution thereof?" The print, framed as ordered, crossed this second note on the road. The print, framed as ordered, crossed this second note on the road. The print, framed as ordered, crossed this second note on the road.

sittings his Grace may be pleased to give me. The Duke returns to town on Monday, but is to give me a sitting on Monday morning; still I am not quite sure whether I return on the same day or not. There is only here the Duke and Lord Charles, his youngest son. The only strangers that have seen the picture are Sir Claudius Hunter and Mr. Brickall, the clergyman, who called to-day; both seemed highly satisfied with it. The whole of this is to me a most interesting visit and interesting labours." Again, on the 4th, he writes:—"I have had now about nine sittings, and to-morrow get one very early, which I expect will complete the head. His Grace leaves for town to-morrow. Finding that it would be convenient for me to paint the horse here, he has requested me to remain in the house to proceed with it. This, I think, will take me till Wednesday. I think the Duke likes the head, and seems to wish me to get the picture done without delay. The horse being at hand can be painted easily, and at all hours, which could not be the case, even were he brought to town."

This fine picture was exhibited in 1834.

By H. P. Briggs, R.A., we have three portraits of the Duke, viz.:—

A whole-length, seated, in his robes, as Chancellor of the University of Oxford; painted for the Earl of Eldon. Engraved in mezzotint, by Phillips. There is also a smaller engraving of part of this picture, half-length, inclosed in an oval scroll.

A whole-length, in a military cloak, the arms crossed, standing in a portico; below which is his horse. Painted in 1840; and engraved in mezzotint, by Ryall, 1842.

A three-quarter-length portrait in military undress, arms crossed, painted in 1840 for the Cutler's Hall, Sheffield. Engraved in mezzotint, by Ryall.

By John Lucas there are three portraits, viz.:—

A whole-length, in the costume of Master of the Trinity House, arms crossed; the Tower seen in the distance on the left; on a table to the right a plan of Dover Harbour. Engraved in mezzotint, by H. Cousins.

A whole-length, standing, in his robes as Chancellor of the University of Oxford. Painted for the University. Engraved in mezzotint by S. Cousins.

A whole-length in military dress, standing, his hat under the left arm, the right pointing to a paper on the table. Painted for the county of Hampshire. Engraved in mezzotint, by John Lucas, 1841.

By Lilly we have two portraits, viz.:—

A whole-length, as Lord Warden of the Cinque Ports, with a cloak over full dress, with orders; Dover Castle in the distance. Painted for the Corporation of Dover, for the Town-hall. Engraved in mezzotint by Scott. A half-length of this picture has also been produced.

A whole-length, on horseback, on the sea-shore, near Dover. Engraved in mezzotint, by J. Scott.

By Salter:—A whole-length, in the uniform of Field-Marshal, standing under an arch. Engraved in line by Greatbach. The same artist has also painted a half-length, in undress, with cloak, which has not yet been published, but of which, by permission of the artist, we have the pleasure of presenting an Engraving in the present Number.

By Pickersgill: A whole-length portrait, for the Oriental Club; which has been engraved in mezzotint by Wagstaff.

By W. Robinson is a portrait, painted for the United Service Club, under circumstances thus related in the journals of the day:—

Several years ago a subscription was raised among the members of the Senior United Service Club for the purpose of procuring a picture of the Duke of Wellington. His Grace had been so frequently asked to sit, that the members of the committee to whom the management was confided did not feel themselves warranted in requesting such a favour; and it was resolved that a copy of the head and face from some acknowledged portrait by Sir Thomas Lawrence should be made, but that his Grace should be respectfully asked for the use of his sword, glass, cloak, &c., so that there might be as much real originality in the picture as possible. A young and rising artist, Mr. W. Robinson (since dead), was selected to do the work. A three-quarter portrait by Lawrence, belonging to the late Mr. Arbuthnot, was lent for the head, and one of the committee was commissioned to speak to the Duke, and to request the use of the appointments alluded to. When the circumstances were made known to him he assented immediately; and, with the greatest good humour, said that he would give as many sittings as might be necessary to make the picture as original. This offer was gratefully accepted, and, the picture having been as much advanced as possible, his Grace gave the sittings required. He ordered that the cloak, &c., should be sent, but the sword was missing, and nowhere to be found. It was one with a very peculiar silver hilt, which had been mounted in India, which he afterwards very generally wore during the whole of the Peninsular War, and for which he had a particular value. It had been painted by Lawrence in the picture belonging to Sir Robert Peel; from which a hasty eye sketch was made from memory, in order to convey some idea to the artist of its peculiar shape. Mr. Robinson had been occasionally employed by Sir Thomas Lawrence, and still had some acquaintance with the person who had been his servant. As this chance (remote as it was) of learning something about the sword thus offered itself, Mr. Robinson took the [illegible] canes, [illegible] parasols, &c., left in Sir Thomas's house at the time of his death, unreclaimed, which were still collected, and were to be sold, with various effects, in a very short time. They visited the store, and (from the sketch) identified the very sword, which had never been sent back to the Duke, who was not aware of its loss, and totally ignorant of where it was, and, as it had no name or cypher, or ticket attached to it, it was utterly unknown and unnoticed, and would have been sold by auction without comment or observation in a very few weeks, if it had not been for this fortunate circumstance. Application was immediately made to the executor, and the sword was returned to the Duke, very much to his surprise and gratification, at his last sitting.

THE LATE DUKE OF WELLINGTON, FROM AN ORIGINAL PORTRAIT PAINTED BY SALTER (NOW FIRST ENGRAVED).—THE BO DE [illegible] DESIGNED BY HARVEY.

Mr. Thos. Heaphy, of Bulstrode-street, the son of the late artist of that name, wrote to the papers in reference to the above narrative, which he contended was incorrect, averring that the Duke had lent his father a sword for the purpose of copying into a portrait, which sword had been mislaid for many years, and was finally (1842) discovered in a shop of miscellaneous curiosities by Mr H., jun., who immediately purchased it, and returned it to the Duke. He therefore infers that the other sword story must be inaccurate. We have reason to believe, on the other hand, that both stories are correct. It is well known that the Duke gave the use of many matters of this kind to artists at various times, and we believe he sometimes bitterly complained of the careless manner in which they were treated, being not unfrequently damaged, if not mislaid.

By J. Simpson is a whole-length, in military frock-coat, the Duke's hat on the right hand, the left resting on his sword, near which is a cannon, the smoke and flames of the battle-field seen in the distance. Painted for the Junior United Service Club; engraved in mezzotint by Phillips.

By Count D'Orsay: A three-quarter-length, in evening dress, wearing the Star and Ribbon of the Garter, his hat under the left arm, the right hand resting on a table. Engraved in mezzotint by Wagstaff.

A Daguerreotype portrait was taken by M. Claudet on the 1st of May, 1848, which has since been engraved in stipple by Ryall. There are two versions of it; in the larger, the hands have been put in since; the original Daguerreotype and the smaller print showing the bust only. It represents the Duke sitting in ordinary dress, with a white waistcoat; three-quarter face, stooping a little, and with a bland expression. There is no question about the likeness; nevertheless, the Duke, when he was shown this print, was not altogether pleased at it. He looked at it for a moment, shook his head, and, with a half smile and half frown of recognition, muttered, "Very old! hum!" and turned away in thought.

H. Weigall, junior, in the course of the present year, painted a miniature from the life. It represents his Grace standing in profile, in evening dress, with orders and a glove in his hand; the latter "not historically correct," as remarked by the Duke to the artist at the time; his observation being, "there is one thing in it that is not historically correct—you have put a glove in my hand; I never wear gloves. However, it is of no consequence; I don't want it altered; I ought to wear them." The miniature has been engraved by S. W. Reynolds.

Shortly before his last departure from town for Walmer, August 20, the Duke gave to Mr J. W. Gins several sittings for his portrait; induced to depart from the resolution which he had formed not to sit again, through the mediation of the Hon. Abbott Lawrence, the late American Minister to the Court of St. James's, and who is a personal friend of the artist. The result of the sittings is a picture, representing the Duke on horseback, in his every-day costume, which has been engraved.

In a future article we shall give some account of other Memorials of the Duke, including Historical and Family Pictures, in which his portrait is introduced.

LAST MOMENTS OF THE DUKE OF WELLINGTON

When the Duke had been suffering some hours, and it was evident that the last sad scene was approaching, Lady Charles Wellesley was led into the room. Overcome with emotion, she fell on her knees, and, after a little while, was led out by Lord Charles. Shortly afterwards, the Duke breathed his last. Around the form of the hero his attendants had wrapped a blanket, and placed a pillow on his knees The persons present at the moment, selected by the Artist for this historical picture, were Lord and Lady Charles Wellesley, Dr. M'Arthur, Mr. Hulke (the apothecary), and his son; Mr. Kendal, the valet; and the butler: the accuracy of the portraits having been greatly assisted by the Daguerréotype.

SOLEMN INTERMENT OF GEORGE MONK, DUKE OF ALBEMARLE.

An ancient servitor emerged from a great house in Whitehall, one inclement morning in the month of January, 1670. His weather-beaten face wore an expression of deep concern, and traces of tears were upon his cheek. He stopped at the Guard-room, where the Coldstreams were on duty, and, touching his hat to an officer to whom he appeared to be known, said, "The Lord-General is dead, sir!" The ill news was soon whispered about among the private soldiers, and every face was saddened

Universally popular among the army, who would follow "Old George" anywhere, the Coldstreams were especially proud of his fame. They were the Duke's own regiment, and knew they had immortalized themselves by that memorable march under their great General from Coldstream, which changed the destinies of England, and inaugurated the Restoration. Messengers were now seen coming from the "Cockpit," charged with communicating the news of the Duke's death to Charles II., the Duke of York, and Lord Arlington, principal Secretary of State The event had been for some time anticipated; but now that it had happened, almost every one in that profligate and licentious Court breathed more freely. The King knew that Monk was blamed by the common people for having restored monarchy without conditions and guarantees. If ever a subject had a right to tender counsel to his Sovereign, it was Monk. Yet Charles had no more humble and submissive subject. Very rarely did Monk presume to give advice: when he did, it was coldly received, and rarely followed. The infamous Cabal Administration, and the minions of the Court, had sold themselves to France. They wanted not the sword of the once renowned Parliamentary General, when the army of Louis XIV. could be obtained to defend the King against revolt or disaffection on the part of his subjects But, among the common people, very different sentiments prevailed. As the news spread eastward, groups of people bewailed the death of Monk as a national calamity. The merchants and traders of the City felt as if the prop and mainstay of the empire were shattered: they knew the confusion which prevailed in the national finances, the peculation and waste in every department of the public service. The nation was visibly drifting to anarchy and ruin, and now that Monk was gone, there seemed no human hand powerful to save.

Perhaps the King had some compunctious visitings of conscience, when he remembered the vast services that Monk had rendered him, and the profound melancholy which had seized upon the great General during the latter years of his life. "It will never do to seem ungrateful," said the King; "let us give the Duke a great funeral." So Arlington has instructions to announce his Majesty's resolve "to pay all the honours and respects imaginable to the memory of the Lord General deceased." Garter King-at-Arms was immediately ordered to prepare a programme, and heralds and pursuivants were soon as busily engaged as they are now in searching musty records, collecting precedents, and arranging for the due observance of heraldic proprieties. They made such quick dispatch, that Garter and some of his officers, within five days from the Duke's death, submitted several programmes to the King and his Council, one whereof being chosen and approved, instructions were given to prepare three rooms in Somerset House (which stood upon the site of the present building), wherein the body might lie in state.

The remains of Monk lay in state for three weeks in Somerset House, where they were visited by thousands. The spectators first passed through two rooms hung with black cloth, and adorned with escutcheons—the gloom of these apartments fitly preparing them for the impressive magnificence of the chamber containing the Duke's remains. This chamber was hung with black velvet, and brilliantly illuminated by wax tapers. A bed of state, of black velvet, contained the coffin, which was covered with a heavy pall of black velvet. Upon the coffin was placed a full-length effigy of the Duke, coloured to the life, which the severer taste of the nineteenth century would condemn anywhere but at Madame Tussaud's bazaar. The effigy was attired in complete azure armour, profusely studded with gilt nails. The ducal coronet, of gold and crimson velvet, and cap turned up with ermine were upon his head. His body was invested in a magnificent ducal robe of crimson velvet, with ermine round the shoulders. This ducal robe was thrown open, so as to show the armour, the collar, and George of the Garter, which hung round his neck; a broad crimson scarf, fringed with gold, was about his waist, a gilt bâton in his right hand; on his left side his sword, and upon his left leg a garter of blue velvet, the buckles and letters of gold. Under the head was a large cushion of crimson velvet, with fringe and tassels of gold. These rich and gorgeous colours stood out in dazzling contrast to the sombre adornments of the apartment. At the foot of the bed was a table with a cover of black velvet, upon which were placed the coat of arms, sword, target, helm, crest, gauntlets, and spurs, which were all to be borne in the funeral procession, by the heralds and his esquires-at-arms. About five feet distant from the bed was a rail covered with black velvet, attached to which, at the sides, stood the bannerols, three banners, and a gudon, and at the foot, the standard and great banner—all indispensable at a public interment. Between the standard and great banner hung a chandelier containing wax tapers. The tapers, which shed a soft, but rich light over this chamber of mourning, were kept constantly burning for three weeks, during which time, on every day except Sunday, the public were admitted. Forty gentlemen in mourning, all officers except five, gave their attendance, twenty upon a day. Four were in attendance in the first room, six in the second, and ten in the chamber where the body lay in state.

The Duke died on the 3d of January, 1670: the funeral did not take place until nearly four months afterwards, namely, on the 30th of April. The procession took the way along the Strand, and down Whitehall, to Westminster Abbey. The way was lined by the Middlesex Train Bands, who kept the passage free for the funeral *cortège*. Before eleven in the morning the carriages of the nobility and gentry assembled at Somerset House; but it was two in the afternoon before the Duke of York's Foot Guards, which led the procession, were seen coming towards Charing-cross. The trumpets sounded a funeral dirge. The officers of all the troops on duty wore mourning scarves; and the trumpet-banners and kettle-drums were covered with black stuff. After the Duke of York's regiment came his Majesty's troop of Horse Guards, commanded by the Duke of Monmouth in person. After them marched his Majesty's regiment of Foot Guards, commanded by Colonel John Russell—*clarum et venerabile nomen*. Then followed various divisions of pikes and musketeers, and after them Monk's own regiment of Coldstreams, with their colours furled and wrapped in crape, and their drums covered with black baize. They marched with arms reversed, and with them ended the military *cortège*. What may be termed the civil portion of the procession then commenced, with seventy-four poor men, in long black gowns, who walked two and two. After them followed a long array of drums, trumpets, pursuivants, and banners, with here and there a mourning horse, heavily caparisoned with black cloth. There is a goodly array of Barons, Bishops, and Earls, who walk two and two. The noblemen, with their long and shapeless coats, round hats, perukes, and half-boots with rosettes, look as if they had stepped out of some old Dutch print. The picturesque dress of Charles I.'s reign has gone out with the chivalry of the Cavaliers, and French and Dutch innovations have scarcely left a trace of the splendid costume of Vandyke. The odious periwig, with its long flowing curls, is surmounted by a low-crowned, small round hat, not unlike that worn by the beef-eaters of Queen Elizabeth' reign. The doublet had been gradually elongated until it reaches the middle of the thigh, and has, in fact, become a long and very ugly coat, profusely decorated with buttons and button-holes all the way down the front. The coat-sleeves come no lower than the elbows, where the white sleeves of the shirt budge out; they are ruffed at the wrist, and are adorned with rows and bunches of black ribbon. These white sleeves of the shirt and the lace cravat somewhat relieve the sombre black of the other portions of the apparel. The petticoat breeches, tied at the knee, are scarcely visible under the long coat. Each nobleman and gentleman wears a cravat of Brussels lace, tied in a knot under his chin, the ends hanging down square. A rich baldric is worn sashwise over the right shoulder, outside the coat, and to this is suspended a sword, which is universally worn, not only by persons of quality, but also by their servants.

The great banner of England, which it is ever considered a great honour to bear upon state occasions, was entrusted to Sir James Smith, Lieutenant-Colonel of the Duke's regiment. After him came the chief mourning horse, richly caparisoned with black velvet, and upon its head a nodding plume. Then came the heralds, who wore their tabards, richly emblazoned with gold upon scarlet, over their black mourning gowns. They wore black hoods, as did the chief mourner, the Lords assistants, and all the official personages present. After the heralds and kings-at-arms, followed the funeral car, surmounted by the effigy, attired as before described. Five esquires carrying bannerols marched on each side of the coffin. The pall, of black velvet, was borne by Lord Newport, Lord Gerard, Lord Ashley, and Sir Thomas Clifford, treasurer of the household. Over the car was a rich black canopy, surmounted by waving plumes. The armour of the effigy, the ducal robe of crimson velvet, the gold and ermine of the ducal coronet, and the gay colours of the bannerols relieved the sombre colours of the pall and canopy, and the deep mourning apparel of all those who took part in the ceremony. The young Duke of Albemarle, the deceased's son, was the chief mourner. He was supported by the Duke of Richmond and the Duke of Ormond, Lord Steward. After these, followed the Lord Chamberlain, the Earl of Sandwich, the Earl of Carlisle, the Earl of Arlington, and six other Peers of distinction, who were called Lords-assistants to the chief mourner. A cream-coloured horse of honour, or horse of state, unlike the mourning horses, was gorgeously caparisoned with crimson velvet, embroidered and embossed with gold and silver. Proudly the noble steed bore himself in his glittering array, and many were the exclamations of admiration as he passed. After the horse of honour came his Majesty's troop of Horse Guards, commanded by Sir Philip Howard, knight (brother to the Earl of Carlisle), and three squadrons of horse closed the *cortège*.

As the procession moved down the Strand, the grief of the vast assemblage in the streets was evinced by tokens that left no doubt of its sincerity. The truest mourners were not the courtiers who filled the most conspicuous places in the pageant, but the honest people who stood behind the train bands, and filled the windows and tops of the houses along the line of route. It was the fashion at the witty and facetious court of Charles II. to flout the old Duke, and to make especial sport of the Duchess, "ever a plain, homely dowdy." One of Pepy's gossips, who knew the King's Ministers well, spoke to him contemptuously of the Duke of Albemarle. "The only quality eminent in him is that he did persevere," and then the two lift up their hands in astonishment as they agree that "he is indeed a very drudge, and stands by the King's business" And then Samuel Pepys' Court gossip adds, "that the Duke never would receive an excuse if the thing were not done, listening to no reason for it, be it good or bad." But these qualities, which the Monk appear impracticable and ridiculous at Whitehall, increased his reputation with the nation. The people could not forget that when, five years before, London was one great charnel-house, and the King and Court fled from the indescribable terrors of the Great Plague, Monk remained, looked Death coolly in the face in his most pestilential haunts, and displayed a lofty heroism that eclipsed all the glories and conquests of the warrior. Charged by the King with the government of the City, the inhabitants remembered that he had maintained order, succoured the houseless and destitute, preserved property from pillage, and by the rare example of his unshrinking courage and self-possession had infused hope and confidence into others. A thousand times he had perilled his life to save his fellow-citizens; and hardly had the Great Plague abated, when Monk was called upon to encounter danger upon another element. This Dutch, with a cloud of vessels, threatened our coast, and there was no Englishman, save Monk, capable of sustaining the national honour. A modern Commander-in-Chief would receive with astonishment a summons to leave the Horse Guards, and put to sea in command of the Channel Fleet; but Monk, devoted to his duty, obeyed without repining. The sailors of the Royal Navy, among whom great discontent existed in consequence of the abuses and maladministration of the Victualling Department and Navy Pay-office, came to offer themselves in crowds as soon as they heard that Monk, "with his calm and indefatigable activity," was superintending the preparations for a cruise. "For," said they, "we are sure honest George will see us well fed and justly paid."

The fleet put to sea, and Monk, at first alone, and then in conjunction with Prince Rupert, sustained with the Dutch the most furious actions in which either nation had ever been engaged; while the King and Court were quaking with fear for the result. During Monk's absence, there broke out the terrible Fire of London, which reduced the city to ashes. Some of those who were now gazing upon the effigy of the dead, must have remembered that when the panic was at its height, and when the multitude burst forth in accusations and reproaches against the Government for their want of vigour and their incapacity, the exclamation was heard, "Ah! if Old George had been here, the city would not have been burnt." "Old George" returned; but the very next year he was required to put himself at the head of a few companies, and hasten to Chatham, where the Dutch had made a descent and burnt nineteen ships. A nation which, in the space of three short years had suffered such terrible visitations and panics, could ill afford to lose the great General, who, unmindful of the witticisms and ingratitude of a venal Court, "stood by the King's business," and was never unmindful of the greatness and glory of England. A few stern Republicans, here and there, muttered reproaches upon his memory for his double-dealing with the *Rump*, and for restoring the King without limitations and conditions. But Charles was marching so stealthily towards arbitrary power, that the Republican faction might well doubt whether any limitations of the Royal prerogative would or not have been long since set at nought and evaded. And Monk had, by his conduct during the Great Plague and his gallantry against the Dutch, regained the popularity which he had to some extent forfeited by disposing of a throne and people without providing securities against future misgovernment.

Let us join a group of persons of quality who are watching the procession from a window in Whitehall. The Duke of Monmouth, the natural son of Charles II., looks up to them with a gay and confident air as he marches at the head of his two squadrons of horse. "His Grace of Monmouth is in high favour with the King," said one gentleman. "They do say," whispered another, with an easy and self-indulgent countenance, in whom we recognise Mr. Samuel Pepys, "that the King is made a child of by Buckingham and Arlington, to the lessening of the Duke of York." "Yes!" put in a handsome blonde, who was beginning to show considerable *embonpoint*, "and there are rumours in the City of the Duke of Monmouth being made Prince of Wales," "Hush, Mrs. Pepys," said her husband, "the Duke of York is our very good friend and patron; and, while some attend only to their pleasures, he is active in public business"

Fifteen years afterwards, this gay and smiling scion of Royalty was to bare his neck upon Tower-hill, to the headsman, and to suffer the penalty of his ill-fated rebellion against this same Duke of York, then James II.

But who is that handsome young ensign, who wears the uniform of the Duke of York's Foot Guards, and who seems to have a glance for every lady of distinction in Whitehall? His eye is expressive and penetrating, and the singular graces of his features and person would furnish the sculptor with a model for the youthful Antinous. It is Ensign John Churchill. As he marches along, surrounded by his young brother ensigns, they observe, with somewhat envious eyes, that he receives many gracious smiles from Court ladies of distinction. His lovely sister, Arabella, was introduced at Court, soon after the Restoration, as Maid of Honour to the Duchess of York; where her charms attracted the notice of the Duke. Her brother was appointed page-of-honour to the Duke. Three or four years before the event we are narrating, being asked by the Duke what profession he would like, the young page threw himself on his knees, and petitioned for a commission in the Duke's regiment. In a few months he will gain his first laurels in the defence of Tangiers against the Moors. In a couple of years Turenne will speak of him as "my handsome Englishman," and will predict that he will become a master in the science of war. He will afterwards contribute to the suppression of Monmouth's insane rebellion. Future Victor of Blenheim and Ramilies, his military fame will entirely eclipse that of the Lord General whose funeral *cortège* we are beholding. Half a century will elapse before similar national honours are paid to one of England's sons. A funeral procession will then be passing down Whitehall, with a display of military parade and regal pomp, which the scene now passing before us, imposing as it is, will scarcely equal. The handsome young ensign will have become the most distinguished warrior and statesman of his country and time, and Westminster Abbey will again open its portals to receive the venerated remains of the Great Duke of Marlborough.

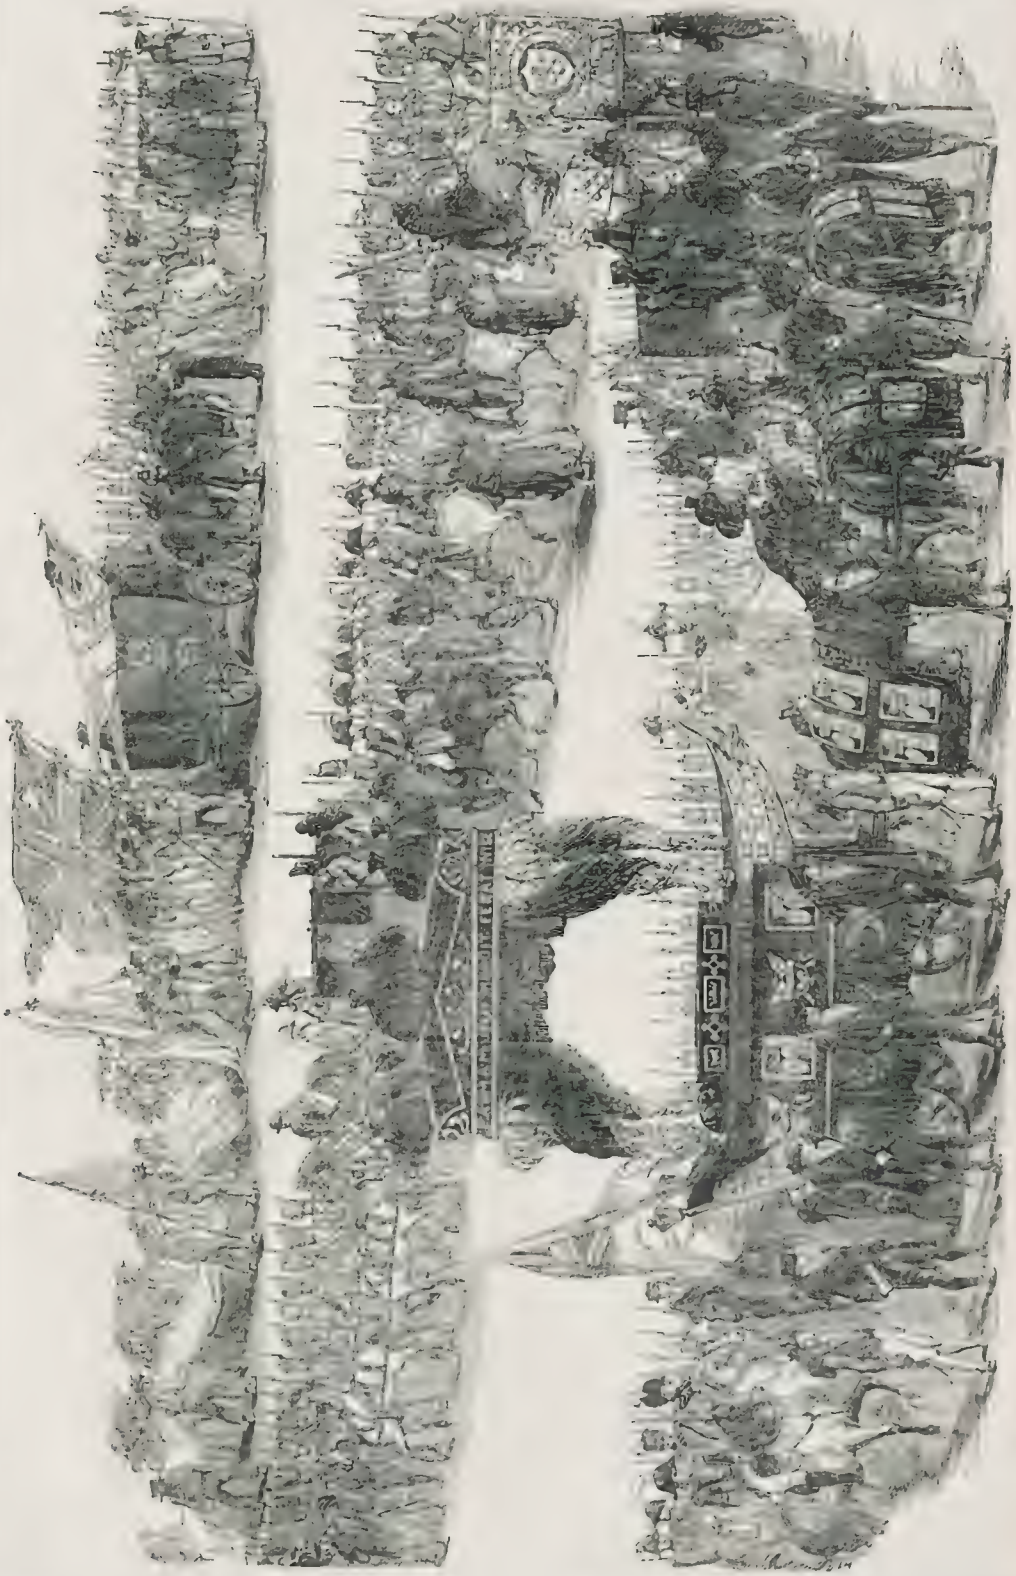
At present this brilliant horoscope has not been cast, and young Churchill's only hope of advancement is in his good sword, and his sister's influence with the Duke and Duchess of York. She is among that bevy of Court ladies in deep mourning in the balcony opposite to Mr. Pepys, who is surveying their charms with the eye of a respectful connoisseur. "I wonder not that my master the Duke admired Mistress Arabella Churchill," said he; "but, comely as she is—and she comes of a handsome race—that lady standing by her side, Mistress Frances Jennings, is, to my mind, the loveliest of her sex." "The young woman is well enough," curtly rejoined Mrs. Pepys, who did not seem to approve of her husband's raptures; "but who is that sweet little girl by her side? She hardly seems ten years of age; and yet how her eyes sparkled with pleasure when young Ensign Churchill nodded to the balcony. I warrant me, she will turn the heads of some of our gallants after a while." "The child is, as I think," said a lady standing next to Mrs. Pepys, "the sister of Frances Jennings. She is, in a year or two, to be placed about the person of the Duchess, for the young Princess Anne hath mightily taken to her, and they are fast friends and playmates already." This beautiful child is to become the bride of John Churchill when she is scarcely sixteen; and to her ascendancy over Queen Anne he is afterwards to owe the command of our armies on the Continent, and the opportunity of entering upon a course of glorious achievement, which, "since the days of Henry V., had never been equalled, and which was never surpassed by a British commander, until the time of WELLINGTON."

As the ponderous funeral-car rolls on with its splendid effigy, the people lift their hats and stand bare-headed. "None so poor but do him reverence." Next to the car all eyes are turned to the young Duke of Albemarle, the only son and heir of the deceased Duke. He is clad in a black hood and mourning-cloak, the train of which is borne by Sir Francis Leake. There are some who look at his youthful form who well remember that, when General Monk had veiled his design of restoring the King, and was earning his title to wear "*cunctando restituit*" for his motto, they had pestered little Kit, then a boy of six or seven years of age, by questions and presents, to confess that one day his father and mother had talked in bed of the King's return. This speech of the child's sent a dozen courtiers to Brussels to offer his service to Charles II Only three days before the old General's death, and in his sick chamber young Christopher had wedded the youthful grand-daughter of the Duke of Newcastle. The Duke then sang the "Nunc dimittis," and prepared himself for death, leaving this cherished son the heir to his vast fortune But the Dean and Prebendaries are waiting at the great west door of Westminster Abbey, with the words of the Royal Psalmist on their lips: "He heapeth up riches, but cannot tell who shall gather them." If we could foretell the destiny of this young Duke of Albemarle, who now walks so reverently and dejectedly behind the remains of his celebrated sire, we should see him dissipating in a life of utter profligacy the immense fortune which his father left him, and dying childless, eighteen years after his father's funeral, in a distant dependency of the British Crown, of which he was Governor.

As to the witty and unprincipled courtiers who bear the pall, and figure as Lords-assistants to the chief mourner, it is difficult to speak of them in the measured and dignified tone of history. Almost all are pensioners of a foreign Prince, and are abetting the King in his design to possess himself of arbitrary power. They are regarded with the deepest aversion by the populace—for popular instinct not seldom outruns the publication of confidential letters and despatches, and suspects the treachery, the absolute proofs of which are reserved for posterity. Clifford and Ashley, two of the pall-bearers, are members of the infamous Cabal Administration. So is Lord Arlington, who follows in the train of the Lords-assistants. Clifford and Arlington have leagued themselves with the King and the Duke of York in that infamous secret treaty with France, in which the King declares himself to be a Catholic, and stipulates with Louis XIV. for a supply of money and ships, to facilitate the prosecution of his design of re-establishing Popery as the national faith. If the mob assembled at Charing-cross knew that within three weeks from this day Clifford and Arlington would repair to Dover, accompanied by the Monarch, and would there sign the secret treaty which pledges the King to this desperate and wicked enterprise, they would tear them limb from limb.

The procession has reached Westminster Abbey. The poor men in gowns open to the right and left to let the mourners enter the Abbey. The first who enter there are the servants to the nobility, who, also opening to the right and left, form a line which extends from the great west door to the choir. The effigy is taken out of the car and placed upon a bier, which, being borne into the Abbey, is there received under a black canopy. The Dean and Prebendaries in their copes, and the choir in their surplices, here commence the funeral service, and the effigy is borne to a ducal hearse of magnificent height and proportions, situated under the cross of the Abbey, between the choir and the steps going up to the altar. This hearse, or colossal canopy, is the design of Dr., afterwards Sir Christopher Wren, now Surveyor of Works, who has been commanded, by warrant from the Lord Chamberlain, to prepare a frame of timber for the purpose. Dr. Wren has been sadly perplexed by visions of the magnificent dome of a new cathedral of St. Paul's, which has taken rooted possession of his brain, and which obstinately came between his eyes and the paper on which he essayed to sketch the design for Monk's funeral hearse. He has just drawn up a plan, too, for

PART OF THE FUNERAL PROCESSION OF GENERAL MONK, DUKE OF ALBEMARLE, IN 1670.



FUNERAL OF ADMIRAL LORD NELSON IN [illegible]

the restoration of the City, the leading features of which are a broad street running from Aldgate to Temple-bar; a large square for the reception of St. Paul's Cathedral, and a range of handsome quays along the river. In his leisure hours at this time, too, he is designing the Monument and the beautiful spire of St. Mary-le-Bow, in Cheapside; so that, altogether, he has work on hand for a dozen architects. But the Lord Chamberlain's order was imperative, and Wren's hereditary predilections were too strongly on the side of royalty to suffer him to neglect an opportunity to do honour to the memory of the Restorer of Charles II. He has acquitted himself so well, that the hearse, now that the effigy has been placed upon it, and surrounded by the banners and bannerols, is a striking and most conspicuous object in the old nave and bannerols, is a striking and most conspicuous object in the old Abbey. It is supported by four great pillars, one at each corner, and each twenty feet high, and rises in the centre in the shape of a dome, upon the summit of which is a ducal coronet, two feet in diameter. The height of this coronet is thirty feet from the pavement. Upon the top of each of the four great pillars are placed the crests and supporters of the Duke. The canopy is doubly valanced and fringed, and the whole hearse is hung with black velvet, garnished with embossed compartments of the Duke's arms, and embellished with crests, coronets, and scrolls, conspicuous among which are two mottoes, "Fortiter, fideliter, feliciter," and "Cunctando restituit." The table upon which the effigy lay stands upon a haut pas, six inches above the pavement. The hearse is fourteen feet long, and the breadth eleven feet; it is floored with black cloth, and surrounded by two spaces, railed off. The rail next to the hearse is twenty three feet long, twenty feet broad, and three feet high. Within it sits the chief mourner on a great Gothic chair of black velvet, and his two supporters and ten assistants sit round him on stools of black velvet. The outermost rail is thirty feet long, twenty-seven feet broad, and three feet high; and within it forms, covered with black baize, are placed, upon which sit the officers of arms; the rest of the mourners being decently disposed around.

Then the Dean of Westminster reads the funeral service, and the Bishop of Salisbury preaches the funeral sermon; after which, the Dean and some of the Prebends go up to the altar, and their await the offerings. The chief mourner then, with much pomp and ceremony, repairs to the altar, where target, sword, crest, spurs, great banner, and bannerols are brought him by the heralds and lords-assistants, one at a time, and are by him handed to Garter King-at-Arms and laid upon the altar. This portion of the ceremony occupies a considerable time; but at length, all being returned to their seats, Garter King-at-Arms, standing upon the highest step of the altar, with his face to the hearse, in a loud and distinct voice, and amid a deep and solemn silence, proclaims the style and title of the deceased, as follows:—

"Thus it hath pleased Almighty God to take out of this transitory life unto his mercy the most high, mighty, and most noble Prince George, late Duke of Albemarle, Earl of Torrington, Baron Monk, of Potheridge, Beauchamp, and Teyes, Captain-General of his Majesty's Forces, Gentleman of his Majesty's Bedchamber, one of the Lords of his Majesty's Most Honourable Privy Council, and a Knight of the Most Noble Order of the Garter."

The officers of the Duke's household here break their white staves of office at the head of the effigy; and then the sergeant-trumpeter, giving the sign to the trumpets ever the door going into the choir, they immediately sound, as a signal to the military drawn up outside the Abbey; other trumpets outside also take up the notes, and horse and foot immediately fire three volleys, which conclude the ceremony.

The King honoured the obsequies of his great General by a splendid military funeral, but he did not carry his gratitude so far as to raise a monument to his memory. M. Guizot gives Charles the credit of having attended in person the obsequies of Monk; but neither the King nor the Duke of York was present at the ceremony.

Thus close the grave over the Duke of Albemarle, between whom and the great English Captain of our own day some points of resemblance may be discovered. The circumstances of their death were not dissimilar. Unable to lie down upon his bed, from a difficulty of breathing, Monk, like Wellington, died in his arm-chair, after a short sleep and without noise. He was not curious in his diet, but studious how to gratify it. He was capable of living with very little sleep, and of enduring great fatigue. His stature was of the middle size, and his frame was marked out for strength and action. He had an aversion to physicians. His biographers claim for him many distinctions; but chiefly that in his immortal march from Dalkeith to London, he led two kingdoms in his own triumph—that, after he had restored his Crown to the King, he humbled the pride of his stubborn enemies, the Dutch, in two memorable battles at sea; and last, for ten years, he faithfully assisted in the settlement of the State. Nicolas, a Secretary of State and man of business, used to say "that independently of the Restoration, Monk deserved all the favours his Majesty had showered upon him for the services he had rendered since that time." Like Wellington, his modesty was habitual.

"No man ever performed such great services," say his contemporaries, "who discovered so little inclination to mention them, or hear them ment oned by others." He was taken from his country at a moment when "a conspiracy headed by the King, supported by the Court, the Government, and the whole influence of the State, waited but the proper moment for development to let loose all the horrors of civil war upon the land. Six thousand foreign troops were ready to disembark at Dover, to give weight to the proposed declaration of Catholicism—and Louis was further bound to support his Royal dependant, with all his forces, until the rebellion should be ended." To resist these mighty preparations, England had only a corrupt Parliament and a disunited people. No wonder, then, that the day that saw Monk's remains borne to the tomb, was a day of gloom in the English metropolis. A pillar of the State had fallen! and no man could look into the dark future without dismay.

GRAND STATE FUNERAL OF LORD NELSON.

THE age which has produced two such heroes as Nelson and Wellington has not degenerated. The Englishman who can stand under the glorious dome of our metropolitan cathedral, and can point out to a foreign guest the tombs and coronets of our two great captains side by side, may well be pardoned if he should feel emotions of patriotic pride at the recollection of their great exploits. The heroic acts of the great Duke are "doubly remembered" by those who are about to assist in his magnificent obsequies Let those who wish fully to realise the associations which will cluster round St. Paul's next week take up the daring chapter of Nelson's great sea victories. We have done so, and have found something absolutely terrible in his valour, and in the lightning flashes of his genius. In the page which worthily records his dauntless and unsurpassed courage we are reminded of the busts of Jupiter by the old Greek sculptor You know you are looking at a senseless block of marble, and yet it is impossible to gaze fixedly in the face of the Thunderer without quailing before the dread majesty and the sublime sense of power of those awe-commanding features. The god is there, and although you have not the religion of the sculptor you can hardly gainsay it.

No words can express Lord Nelson's invincible and unshaken confidence, that victory awaited him whenever he could bring the combined fleet of France and Spain to battle. In August, 1805, Captain Blackwood arrives in England with news of the combined fleets being blocked up in Cadiz, by Admiral Collingwood. On passing Nelson's villa, at Merton, the captain called to give him the news. On seeing Captain Blackwood, he immediately exclaimed, "I am sure you bring me news of the French and Spanish fleets. Depend upon it, Blackwood, I shall yet give M. Villeneuve a drubbing." In a few days afterwards he finds himself on board the *Victory*, at Portsmouth, ready to put to sea, as Commander-in-Chief of the Mediterranean fleet. Here he writes:—"You may rely, if it is in the power of man to get at them, it shall be done. I am sure that all my brethren look to that day, as the finish of our anxious cruise. I must think, or render great injustice to those under me, that let the battle be when it may, *it will never have been surpassed.* I have only to think of destroying our inveterate foe." This is written within a month of Trafalgar. A few days afterwards his consuming anxiety that the enemy should put to sea, and enable him to get at them seemed about to be rewarded. He sat down to write:—"I verily believe (he said), that the country will soon be put to some expense, on my account, either a monument or a new pension and honours. I want, for the sake of my country, that the thing should be done so effectually, as to have nothing to wish for. It is, as Mr. Pitt knows, *annihilation* that the country wants, and *not merely a splendid victory of twenty-three to thirty-six*:—honourable to the parties concerned, but absolutely useless in the extended scale to bring Bonaparte to his senses."—On the 10th of October he writes:—"I rely, my dear Blackwood, that we cannot miss getting hold of them, and I will give them such a shaking as they never yet experienced; at least I will lay down my life in the attempt." He ardently wishes that some of his ships should have been changed for others, whose rate of sailing was better. He never ceases to importune the Admiralty for more frigates, which he calls the "eyes of the fleet." "I own (said he to the First Lord) I long for faster-sailing ships, and, if not three-deckers, two alongside an enemy are better than three-deckers a great way off." On the 19th, Blackwood being stationed off the harbour's mouth, first telegraphed the enemy being at sea. The great Admiral, in a fever of impatience, telegraphs Blackwood: "I rely upon your keeping sight of the enemy." At six, on the morning of the great day of Trafalgar, the 21st October, 1805, Nelson telegraphs for Blackwood to come on board the *Victory*. "So much (says Blackwood) did he think of the possibility of the enemy's escape into Cadiz, that he desired me to employ the frigates as much as I could, to complete the destruction of the enemy, whether at anchor or not; and not to think of saving ships or men, for annihilation to both was his first object, and capture but a secondary one."

Captain Blackwood's memoir will be an immortal passage in our annals:—"During the five hours and a half that I remained on board the *Victory*, in which I was not ten times from his side, he frequently asked me *what I should consider a victory?* the certainty of which he never seemed to doubt; although, from the situation of the land, he questioned the possibility of the subsequent preservation of the prizes. My answer was, that, considering the handsome way in which the battle was offered by the enemy, their apparent determination for a fair trial of strength, and the proximity of the land, I thought if fourteen ships were captured, it would be a glorious result; to which he always replied, 'I shall not, Blackwood, be satisfied with anything short of twenty.' I was walking with him on the poop, when he said to me, 'I'll now amuse the fleet with a signal;' and he asked me 'if I did not think there was one yet wanting?' I answered that I thought the whole of the fleet seemed very clearly to understand what they were about, and to vie with each other who should first get nearest to the *Victory* or the *Royal Sovereign* (Collingwood's ship). These words were scarcely uttered, when his last well-known signal was made, 'ENGLAND EXPECTS EVERY MAN WILL DO HIS DUTY!' The shout with which it was received throughout the fleet was truly sublime. '*Now*,' said Lord Nelson, '*I can do no more. We must trust to the Great Disposer of all events, and the justice of our cause. I thank God for this great opportunity of doing my duty.*' About ten o'clock Lord Nelson's anxiety to close with the enemy became very apparent. He frequently remarked to me that they put a good face on it, but always quickly added, 'I'll give them such a dressing as they never had before.'"

"Britannia's god of war" now wielded his bolts, and was about to launch them in deafening thunder upon his enemy

While Nelson had infused his own marvellous valour and superhuman confidence into the breast of every officer and seaman in his fleet, every man on board the combined fleet felt a presentiment of approaching triumph. They knew they were in the toils of the hunter. Nelson was styled by the French *Cet Amiral detestable* Admiral Villeneuve, on receiving his orders to put to sea, called a council of war, when it had been determined, on knowing that Nelson commanded the British fleet, that they should not leave Cadiz unless they were *one-third stronger* than the British force. Admiral Villeneuve, after he had surrendered, assured Captain Blackwood that on seeing the novel mode of attack intended to be made on the combined fleet, and which, at that moment, he confessed he could not in any way prevent, he called his officers around him, and pointing out the manner in which the first and second in command of British fleet were each leading his column, he exclaimed—"Nothing but victory can attend such gallant conduct." It is an extraordinary, but well-attested fact, that the enemy did not hoist any colours; at least, not until very late in the action. When the *Victory*, being unable to break the enemy's line without running on board one of their ships, ran into the *Redoutable*, the crew of the latter ship fired a broadside into the *Victory*: and immediately let down her lower-deck ports, to prevent her from being boarded through them by the *Victory's* crew, nor were they again opened. Contrast this with the cool intrepidity of the officers and men stationed on the lower deck of the *Victory*. When the guns on that deck were run out, their muzzles came in contact with the *Redoutable's* side, and at every discharge there was reason to fear that the enemy's ship would take fire, and both the *Victory* and the *Temeraire* be involved in her flames. The fireman of each gun stood ready with a bucket full of water; which, *as soon as his gun was discharged, he dashed into the French ship through the holes made in her side by the shot.* Each gun fired three shots into the *Redoutable's* hulk at each discharge.

No wonder that this ship, which was twice on fire, soon struck to such desperate opponents. On her colours being struck, and as there seemed no possibility of boarding her, from the closing of her ports, some English seamen volunteered to jump overboard, and, by swimming under the bows of the *Redoutable*, to endeavour to secure the prize! Captain Hardy rightly deemed the lives of such brave fellows more valuable than the possession of a helpless hulk. The *Victory* was not the only ship that ran on board the enemy. No less than five of the French captured ships were engaged so closely, that the muzzles of our lower-deck guns touched those of the enemy. And it was remarked at the time, as an instance of the moral and physical superiority of our seamen, that, in every instance, the Frenchmen immediately lowered their ports, and deserted their guns on that deck; whilst our seamen, on the contrary, were deliberately loading and firing their guns with two, and often with three, round shot, which soon reduced the enemy's ships to a perfect wreck. Facts like these will serve to illustrate and explain the inexpressible pride in our navy which animated the British public when the battle of Trafalgar had, indeed, annihilated the enemy's fleet; and they must also be kept in mind, if we would realise the intense sorrow which hung over Nelson's funeral obsequies, and turned the day of victory into a day of great mourning.

Nelson's remains were brought home in the *Victory*, and landed at Greenwich the day before Christmas-day, 1805. On Sunday morning, the 5th January, 1806, after Divine service, the Painted Hall, where the body lay in state, was opened to the public. The lying in state was continued throughout Monday and Tuesday, but so general was the desire of the public to witness the spectacle, that thousands of persons were unable to obtain admission. If this happened in 1806, we may well doubt whether a longer period ought not to have been allowed to the public to see a similar mournful spectacle in 1852, when the population of the metropolis has not only enormously increased in the interval, but when railroad facilities will immeasurably swell the crowd with spectators from the provinces. On Wednesday, the procession by water from Greenwich Hospital to Whitehall was conducted with great funeral pomp. The Lord Mayor and the different companies of the city of London accompanied the procession in their state barges, and the river was alive with boats. The weather was remarkably favourable, considering that a violent tempest had arisen during the previous night; and the thousands of spectators who lined the shore on both sides uncovered their heads as the body passed. The procession passed the Tower a little before three and arrived at Whitehall at a quarter past, the Tower guns firing at intervals of a minute during its passage up the river. The weather now again became tempestuous, and great fears were entertained that the weather next day would be wet and unfavourable for the great procession to St. Paul's. The streets through which the procession were to pass were covered with gravel in the night, and every preparation was made to add funereal grandeur to the last solemn rites.

The morning of Thursday, the 9th January, gave the promise of a fine day, which was happily realised, the weather being astonishingly favourable for the season.

We have already described the memorable scene exhibited by the interior of St. Paul's during the funeral of Nelson. A few particulars now, relative to the procession out of doors, may not be uninteresting. The military part of the procession commenced with the 92nd Highlanders, whose steady and soldier like bearing was worthy of the high reputation and eminent bravery of this corps. The Buffs and Scotch Greys followed. The latter regiment never appear in any gathering of their countrymen without exciting admiration; but now immeasurably this feeling would have been increased, if the bystanders could have known that, nine years afterwards, some of those fine-looking men were destined to extort the admiration of Napoleon, and to assist in deciding the fortunes of Waterloo. A detachment of the Horse Artillery closed the military *cortège*.

Messengers of the College of Arms now ushered in the Civic portion of the procession. Forty-eight pensioners from Greenwich Hospital denoted the short span of life allotted to the illustrious dead. They were clad in mourning cloaks, with badges of Nelson's crest on their shoulders, and carried black staves in their hands. The same number (48) of seamen of the *Victory* followed, with the sad and mournful air and step of men, every one of whom would have laid down his life if Nelson could have been spared to reap the honours and glories of his victory. These brave tars, who appeared in their ordinary dress, except that they wore black neckerchiefs and stockings, with crape hatbands, were regarded with great affection by the vast multitude, for every one knew the prodigies of valour they had performed. Now came Rouge Croix and the guidon, and the colours of the *Victory*, borne by part of the crew. Let us hope that the gallant fellows who offered to take possession of a French man-of-war by swimming for her bows, were among this chosen band—the bravest of the brave. The largest flag was borne by several seamen, who, as the procession now and then came to a stand, unfurled it, and spread it open, in places, to enable the bystanders to see the shot holes in it. It was stained with the blood of its intrepid crew. "Oh!" they cried, "the flag of our brave Admiral, which was never lowered until his death!" Tears responded to the appeal. When these sailors stood upon the steps of St. Paul, to let the procession pass by them, they were recognised by the Duke of Clarence, who burst into tears at the sight of the colours of the far-famed *Victory*. When the Royal brothers were standing together in the choir while the funeral service was being performed, these brave tars, who stood near the communion table, were pointed out by the Duke of Clarence to the Prince of Wales. The Prince hereupon commanded that they should return with the *cortège* to the central space under the dome. Here room was made for them near the body, and here, among the Princes and nobles of the land, these seamen occupied the most honourable place. When the coffin was lowered into the crypt, and the colours, banners, and bannerols were laid upon it, Nelson's hardy seamen, by a common impulse which they could not withstand, each tore a shred of the largest flag as a memento of their gallant Admiral.

After the colours of the *Victory* there followed the carriages of gentlemen, equires, deputations from the great commercial companies of London, physicians divines, and then the chaplain and secretary of the deceased, in a mourning coach. Four companies of grenadiers now intervened, and then came serjeant-at-law, knights baronets, barons, viscounts, earls, and dukes. The Archbishop of Canterbury was followed by dukes of the blood Royal; and after them came the Prince of Wales, in a coach of six, and escorted by a detachment of Horse Guards. His Royal Highness, the Heir Apparent, held the post of honour and precedence until he arrived on the east side of Temple-bar, when he gave place to the Lord Mayor, who, on horseback and uncovered, and accompanied by four colonels of the Loyal London Volunteers, in their uniforms, bore the city sword. The great heralds, and a coach containing the banner of the deceased followed, and then came the funeral car. Six led horses drew the car, each horse having a nodding ostrich plume upon his head, and caparisoned with black cloth, upon which were coloured escutcheons, containing the coronet and arms of the deceased. The coffin was uncovered by a pall, in order that it might be the better seen by the multitude. The bier upon which the coffin was placed was covered with black velvet, decorated with escutcheons and devices, and a rich gold pall. The funeral car was designed to represent the bow and stern of the *Victory*, but the wheels of the car sadly marred the effect, and nothing can be said in praise of the design. A figure of Fame, holding an out-stretched wreath, did duty as figure-head. At the stern was the Union Jack. An elevated black canopy, upon four pillars, resembling main-trees, covered the coffin. These pillars were decorated with green laurel leaves. On the side of the canopy was worked, in silver letters, "Palmam qui meruit ferat." The names of Nelson's great battles were seen on various parts of the funeral car. The public taste was not so highly cultivated in those days, and probably criticism would have been voted disloyal and Jacobinical. It is certain, also, that men were possessed by other feelings, and that the intensity of the popular sorrow made them tolerant or heedless of the ugliness of the funeral car.

The Duke of York, then Commander-in-Chief of the Forces, and a brilliant staff, followed the body. Then came Garter-King-at-Arms, with his sceptre, in a carriage; and after him, in other carriages, came the Chief Mourner, the venerable Sir F. Parker, Admiral of the Fleet, and one of Nelson's early friends and patrons; he had his two supporters, and six assistant mourners. The banner of emblems separated them from the relations of the deceased, who followed in mourning coaches; and finally the funeral *cortège* was brought up by officers of the navy and army, according to their respective ranks, the senior nearest the body.

The Highlanders who had been with Abercrombie in Egypt, arriving at St. Paul's a few minutes before one, were drawn up in single line on both sides of the space left for the procession along the nave and under the dome. The distant sounds of solemn music then announced to the multitude within the cathedral that the procession was ascending Ludgate-hill: the trumpets of the cavalry were heard approaching more nearly; and at length the procession entered by the great western door, having passed through the densest multitude ever before known to be collected in the metropolis upon any occasion whatever. The magnificent scene within the cathedral we have already described, and need not repeat. England duly mourned her departed hero, and Ambition's self could not have chosen a more grandly picturesque resting-place than the centre of that circle of massive pillars under the dome of St. Paul's.

HEROES' TOMBS IN ST. PAUL'S CATHEDRAL.

> The echoes of its vaults are eloquent!
> The stones have voices, and the walls do live:
> It is the house of memory.—MATURIN.

THROUGH the vista of centuries we can trace in the long-drawn aisles of Old St. Paul's the sumptuous resting-place of many a brave spirit, and the home of many a stately warrior, the splendour of whose deeds paled but in the sunset of chivalry—before

> The daring flames peep'd in, and saw from far
> The awful beauties of the sacred choir,
> But since it was for holy use design'd,
> They check'd their rage, destroy'd by fear.—DRYDEN

State obsequies were a profitable privilege of the old cathedral. Sumptuously picturesque were these displays, when the choir was hung with black and escutcheons; and the hearse were magnificently adorned with banners and other insignia of vain glory. Here stood that of John of Gaunt, Duke of Lancaster, "on whose monument hung his proper helmet and spear, as also his target covered with horn." In the nave was the tomb of Sir John Beauchamp, Constable of Dover Castle, one of the founders of the Order of the Garter, and a son of the renowned Guy, Earl of Warwick; his effigy, in complete armour, lay on the top, beautifully painted, and sculptured shields decorated the front of the base. In St. Dunstan's Chapel was the tomb of Henry Lacy, Earl of Lincoln, a great benefactor to the cathedral; but better known in history as Edward I.'s able Lieutenant in his Scottish expeditions: he was the last and greatest man of his line; and was the confidential servant and friend of Edward, whom he seems not a little to have resembled in courage, activity, prudence, and every other quality which can adorn a soldier or statesman: his monument bore his cross-legged figure clad in mail

which has been perpetuated by the hand of Hollar:—(Spilsbury's *Lincoln's Inn*)—the sides and ends of the tomb were a mass of beautiful decorations, consisting of a great number of figures in niches, with Gothic canopies. In the north aisle was the tomb of Sir Simon Burley, the friend of Edward III. and of the Black Prince, the guardian and tutor of Richard II.; for espousing whose cause the unfortunate knight was sent to the scaffold by Thomas Duke of Gloucester, in 1388. In the same aisle, and in the same tomb with Etheldred, it is believed, lay the remains of his grandson, Edward Atheling, the Outlaw, one of the great popular heroes of Saxon England. Between two columns of the choir, near the sumptuous monument of Sir Christopher Hatton, Lord Chancellor, was a tablet to Sir Philip Sidney; and another of the same unpretending description to his father-in-law, Sir Francis Walsingham. The stately appearance of Hatton's monument, ("higher than the best and their," as Bishop Corbet describes it,) and the humble nature of Walsingham's and Sidney's, occasioned the following epigram, of which, by-the-bye, old Stow himself was the author: (Cunningham's *London*)

Philip and Francis have no tomb,
For *great* Christopher takes all the room.

These, however, were but a few of the memorials which adorned the old cathedral, and storied its walls with the great deeds of England's worthies. All, however, fell amidst the great conflagration of 1666; and from the heap of ruins were picked a few mutilated memorials, which, on the rebuilding of the cathedral, were consigned to the darkness of its crypt.

The nave and aisles of St. Paul's, as left completed by Wren, were naked and blank in their vast expanse: thus they remained for eighty years. Meanwhile, the venerable architect had descended to the grave, beneath his own great work, his fittest monument; for this is an act of beautiful homage which the breathing marble does not unfrequently render.

In 1773, an attempt was made to supply some artistic decoration of the cathedral walls. When compared with the interior of St. Peter's, at Rome, although simple and severe in its design, glittering with gilding, mosaics, and paintings; or even with that of St. Geneviève, at Paris, which is a splendid monument to the memory of Soufflot, its architect, St. Paul's appears cold and meagre; and there are few persons who do not regret that the munificent offer to cover the interior with *paintings*, which was made by certain members of the Royal Academy during the presidency of Sir Joshua Reynolds was not accepted. Six members were named to undertake the task: Reynolds, West, Barry, Cipriani, Dance, and Angelica Kauffman. The Dean and Chapter and the King highly approved of the scheme; but the Archbishop of Canterbury, with the Bishop of London, strongly objected to it, as savouring of Popery, and likely, therefore to produce popular clamour; hence it was abandoned.—(Godwin's *Churches of London*). From that time, the introduction of monuments within St. Paul's was proposed as a means of decoration, to which, however, many impediments were offered at first; but, in 1791, on application for leave to erect a statue to the memory of John Howard, a general consent to their introduction, always under the supervision of the council of the Royal Academy, was granted, and many have been erected to the memory of distinguished individuals: they exceed forty in number, and have been for the most part voted by Parliament, in honour of naval and military officers; though there are a few also to authors and artists, and philanthropists. But, in general, while civil eminence had been commemorated in Westminster Abbey, St Paul's has been made a Pantheon for our heroes. Yet, the effect of the whole is extremely cold:—which induces one to whisper Addison of quiet satire, in *Spectator*, No 50, where he makes the Indian King suppose St. Paul's to be carved out of a rock.

Howard's statue stands in the alcove formed by the junction of the south aisle with the transept; the three other similar situations, occurring at the junctions, being occupied by statues of Dr. Johnson, Sir Joshua Reynolds, and Sir William Jones. Reynolds is by Flaxman; the three other statues being by Bacon. Howard, with his keys, is often mistaken for St. Peter; and Johnson, with his scroll, for St. Paul. These are men of peace, from whom we step aside to the hero-worship of sculpture in our Pantheon-temple. Under the great arch which separates the choir from the dome area is Flaxman's monument, commemorative of Lord Nelson: his statue, resting the right arm on the anchor, is characteristic; the want of the right arm is concealed by the union-jack of England thrown over the shoulder; though the guide will tell you, it is intended for a fur pelisse, the gift of the Grand Signior, during the time of Nelson's service in the Mediterranean. Surely, for St. Paul, these fellows mutilate the poetry of art! Nelson's figure alone is worthy of Flaxman; the pedestal, with its sea-gods, its couched lion, and Britannia directing the attention of two naval scholars to Nelson, is a miserably poor allegory, unredeemed by its style of execution: it has been covered up, save the figure of the hero, in the fittings for the approaching funeral. In a panel above, Bacon has commemorated Captain Duff, who, while commanding the *Mars* at Trafalgar, had his head swept off his shoulders by a cannon-ball, which also killed the officer who stood behind him. Duff was so beloved by his crew, that there was not a dry eye on board the ship when his death was announced; but this incident has been lost by the sculptor, who, in the old conventional style, has made up an allegory of Britannia bearing Duff to Neptune, decorated with a medallion of the deceased, while a mourning sailor bears the British flag.

Opposite Nelson's monument is a massive group, by Rossi, to the Marquis Cornwallis, who, it will be recollected, in 1796, gave the late Duke of Wellington, when Colonel Wesley, a guarded though complimentary letter of recommendation to Sir John Shore, then Governor-General of India. In the St. Paul's monument, Rossi gives a portrait-statute of Cornwallis upon a truncated column, at the base of which are deities of the Ganges and Ganges rivers, which are picturesquely characteristic; on the left is a conventional figure of Britannia.

In the north transept, on the western window, is another of Rossi's works—a large and costly group to Lord Rodney; the hero, as usual, upon a pedestal, with the allegory at the base History listening to Fame "expatiating upon the merits of Rodney;" yet, for this poor work the sculptor received 6000 guineas! Beneath the opposite window, the same artist has executed a monument to Captains Moore and Rou, who fell in Nelson's attack upon Copenhagen in 1801: the composition is a double sarcophagus, with medallions of the deceased, supported by figures styled Fame and Victory: the artist has left the exploits for the inscription, which recites as an act of Moore's intrepidity, his having left a ship under his command, not unworthy of remembrance. But this friend of Nelson, this seaman of whom Southey, alluding to his death, says, that, "except it had been Nelson himself, the British navy could not have suffered a severer loss," was something better and nobler than before the fleet left our shores for Denmark, in 1801, some Danes in Rou's frigate, the *Amazon*, leaving the place of their destination, went to him, and entreated him to get them exchanged into some other ship not included in the proposed expedition. They assured him that they had no wish to quit the British service; but begged most earnestly that they might not be seat to fight against their own country. "There was not," says Southey, "in our whole navy a man who had a higher and more chivalrous sense of duty than Rou. Tears came into his eyes while the men were speaking. Without making any reply, he instantly ordered the boat, and did not return to the *Amazon* till he could tell them that their wish was effected." During the tremendous battle of Copenhagen, Rou, whilst endeavouring to obey Sir Hyde Parker's signal of retreat, was exposed to a most murderous fire. Although he had been already wounded in the head, he took his place upon a gun to encourage his men. First, his clerk was killed by his side; then several of the seamen, who were hauling in the main-brace, were swept away. "Come, then, my boys," was Rou's address to the others, "let us all die together." The words had scarcely left his mouth when he fell dead, cut in two by a rakinz-shot.

Under the window, adjoining Rodney's monument, is Gahagan's memorial to Sir Thomas Picton, who, after distinguishing himself at Rosaco, Fuentes d'Onor, Ciudad Rodrigo, Badajoz, Vitoria, the Pyrenees, and Toulouse, fell almost in the arms of victory at Waterloo; yet, a bust is all we see of the hero, who is sacrificed to the allegory of a winged youth (Genius) receiving a wreath of laurel from Victory, for an old soldier (Valour)!

Against the opposite pier is Baily's colossal portrait statue of Earl St. Vincent, with a subordinate bas-relief on the pedestal of History, recording the name of the hero on a pyramid, beside which Victory is seated.

On the right of the north door, is Hopper's monument to Major-General Sir Andrew Hay, who fell before Bayeane, in 1814; the hero is sinking. On the left, against the great pier, is the younger Bacon's allegorical group to Major General Dundas, in testimony of his eminent services in the reduction of the French West India Islands; yet, a bust is all we see of the hero, crowned by "the Genius of Britain, attended by Sensibility." On the pedestal is a bas-relief of Britannia defending Liberty against Fraud and Rebellion! In the gallery above is the Manning's table monument to Generals Mackenzie and Langworth, who fell at Talavera in 1809; the composition, a figure of Victory, two youths' wreaths, and a tomb

On the opposite pier is an abler work, by Banks: Captain Westcott falling at Aboukir; the explosion of *l'Orient* in the bas-relief, and the country indicated by sphynxes and palm trees, and a recumbent figure on the pedestal, copied from an ancient statue of the Nile. This is in a better school. In the panel above is the younger Bacon's memorial to Generals Craufurd and Mackinnon, who fell at Ciudad Rodrigo in 1812; the composition, a Highland soldier and a double tomb, and Victory crowning a stand of colours; "a lion pawing a fallen eagle," is a specimen of allegoric absurdity reduced to the meanest capacity.

The memorial to the Hon. Sir William Ponsonby, in the north transept, is altogether unworthy of an association with Waterloo, although the names of two sculptors, Theed and Baily, are inscribed upon it. The hero, by his excess of intrepidity, lost his life: his horse is sinking, whilst his naked figure is pressing forward to receive a wreath of laurel from the hands of Victory. Of a better class is Westmacott's heroic statue of Lord Duncan, placed against the opposite great pier. Chantrey's table monument commemorative of Major-General Bowes at the storming of Salamanca—the steep breach crowded with the enemy, and strewed with the slain, and the General leading his troops on to the charge, and receiving his mortal wound in the moment of victory, denoted by the fallen bearer of the French standard—is an affecting picture of the realities of war; and of high merit, compared with that of Rossi's panel monument to another Salamanca hero, Major-General Le Marchant, where the poor allegorical figures of Spain and Victory, trophies, and a tomb, have been pressed into the sculptor's service. The pair of Trafalgar panel reliefs, by Westmacott and Bacon, to Captains Cooke and Duff, the principal figure in each being Britannia, are of the same conventional class.

One of Chantrey's battle-pieces, the "Cadogan Memorial," in the south-east ambulatory, is truthful in spirit: it shows the dying Colonel Cadogan at Vitoria, borne by his men, with his face still turned towards the enemy, while his bearers, waving their hats, denote the moment of victory.

Of the better class is Westmacott-'s large monument, in the south transept, to Sir Ralph Abercrombie, where the humblest free visitor of the cathedral can understand the entire work without the aid of a "Guide." The General has just received his death-wound, and falls into the arms of an attendant soldier; whilst the scene—Egypt—is marked by the sculptor's artistic choice of a Sphynx on each side, as the most characteristic feature of that ancient kingdom; the mind at once acknowledging the propriety of their presence, as a means of marking the scene of the event commemorated.

The same sculptor's monument to Nelson's favourite, the brave and pious Lord Collingwood, in the south transept, is a good specimen of emblematic composition, in which the figures are excellent. The body of the hero, shrouded in colours he had won from the enemy, is laid out on the deck of a man-of-war, his hands clasping a sword upon his breast; and, from the prow, Fame kneels over the Admiral's body, while a group of River Gods are looking on. But the chief merit of the composition is the artistic telling of the history of Navigation in the space of three or four feet long by only a few inches broad. The illustration is on the gunwale, in bas-relievo, in five stages: in the first, a boyish form is watching the movements of the nautilus; in the second, he has trusted himself to the frail bark, with a streamer, in imitation of the nautilus; in the third, he has found a rude support for the sail, whilst looking upward to the stars that guide his course; in the fourth, he has the compass in his hands; and the weapons he finds it necessary to forge for defence, in the fifth division. This treatment has been much admired; notwithstanding that many persons regard Collingwood's colossal statue at Newcastle as a better representative of the characteristic simplicity of the truly great naval commander.

Mr. Cunningham, in his excellent "Hand-book," has judiciously divided the monuments in St. Paul's into two classes: monuments to illustrious men, and, additionally interesting, as fine works of art, and those only interesting from the illustrious persons they are designed to commemorate. We have enumerated the former. Among the latter is the statue of Lord Heathfield, the gallant defender of Gibraltar; the monument to Lord Howe; that to Sir John Moore, who fell at Corunna; before the latter memorial Marshal Soult stood and wept.

These monuments, it will be seen, have cost the nation a large sum of money, the expenditure of which, it is much to be regretted, deserves to be visited with no much censure, more especially as so little benefit appears to have accrued from the official supervision of the committee of Royal Academicians. Hereafter we hope to see better judgment evinced in the monument to be placed in our great metropolitan Pantheon, in memory of the illustrious hero whose remains will in a few days be placed in its vaults.

The following were the prices paid for the principal monuments, from a Parliamentary Return, dated Feb. 6, 1838:—

1.	Lord Rodney	£6300	10 Marquis Cornwallis £6300
2.	General Lord Heathfield	3150	19 Major-General Bowes 1575
3.	Earl Howe	6300	21 Lieut-Co Sir Will iam Myers 1575
4.	Major-General Sandes ..	3150	22 Major-General Bowes 1575
5.	Cap ain Fan hawe, R N ..	4200	23. Major-General le Marchant .. 1575
6.	Earl St Vincent	3150	24. Major General Craufurd and Mac kinnon 3100
7.	Lord Duncan	3150	25. Major-General Sir Isaac Brock .. 1575
8.	Lieutenants Bayne, R N ..	4200	26. Colonel Cadogan 1575
9	Cap ain Westcott, R N ..	4200	27. Major-General Hay 1575
10.	Cap. ains Moores and Rou, R N	4200	28. Major-Gens. Gore and Skerrett 3100
11.	Sir Sidn ey Smith	6300	29. Major-General Gillespie 1575
12.	Lord Nelson	6300	30. Major-General Ross 1575
13.	Lord Collingwood	4200	31. Lieut-Gen Sir Thomas Picton 3.50
14.	Cap ain Cooke, R N	1575	32. Maj r-Gen eral Sir William Ponsonby 150
15.	Captain Duff, R N	1575	33. Major Gens. Pakenham and Gibbs 21.00
16.	Cap ain Hardinge, R N ..	1575	
17.	Major-Gens Mackenzie and Langworth	2100	Aggregate amount .. £100,800
18.	Lieutenant-General Sir John Moore	4200	

THE PRINCELY OBSEQUIES OF SIR PHILIP SIDNEY.

BRIGHT mirror of chivalry! Matchless impersonation of "high erected thought, seated in a heart of courtesy!" England's great poet-hero! Two centuries and a half have rolled their course since young and passionately-loving friends assembled around thy inanimate dust in Old St. Paul's. A consuming fire has devoured every vestige of the ancient fane. Victoria has ascended the throne of Elizabeth. England has had sons as brave, more renowned captains, greater poets; yet no succeeding age has witnessed in any man the rare combination of mental and personal endowments which made thee the "bright particular star" of a generation of great men. Doer of bravest deeds: thinker of noblest and gentlest thoughts!—

The President
Of noblemess and chevalres,

as thou art styled by Spenser, thy life was indeed "poetry put into action!" Brilliant talents, romantic courage, genius, wit, learning, were never yet in any Englishman united with so earnest and loving a nature.

Sidney, in the words of his "Arcadia," had never desired to make a "perpetual mansion of this poor baiting-place of man's life;" but so premature a termination as we are about to record, of so splendid a career, struck despair and awe into the hearts of his friends and contemporaries, who seemed to imagine that so much genius, virtue, and bodily address should "bear a charmed life." He was appointed Governor of Flushing. Spain and Holland were then at war. The Queen, in 1585, took the Protestants of the Netherlands under her protection, and promised to despatch a military force to their succour. Sir Philip Sidney arrived on the 18th November in the year, and was immediately declared Colonel of the Dutch regiments, and Captain of 200 English foot and 100 cavalry. He was followed by his uncle, the Earl of Leicester, who brought over and commanded a numerous re-inforcement of auxiliary troops. Sidney had gained many successes against the enemy, when, on the 22nd September, 1586, a small detachment of English, to the number of 500 men, encountered a convoy of the enemy, numbering about 3000, who were on their march to relieve Zutphen, an obscure town in Guelderland, situated on the banks of the river Issel. An obstinate and protracted engagement ensued, under the walls of the fortress. Sidney performed prodigies of valour. Early in the battle he had a horse killed under him. Having mounted another, he, with daring incrpidity, rescued Lord Willoughby from the most imminent peril, and gallantly charged the enemy three times in one skirmish. At length he received a musket-shot from the trenches a little above his left knee, which "so brake and rifted the bone, and so entered the thigh upward, as the bullet could not be found before the body was opened." We are told that an eccentric and chivalrous feeling of emulation, caused by his having met the marshal of the camp only lightly armed, had induced Sir Philip to throw off his cuisses before going into action, and thus to leave exposed the parts of his frame which they protected, and where the ball took effect.

The anguish of the wound and the loss of blood brought on so much faintness, that Sidney was obliged to leave the field. Gallantry in action was now to assume the new and more difficult phase of heroism of endurance and forgetfulness of self in sympathy for the sufferings of others. The immortal story is simply but nobly told by his attached friend, Lord Brooke. "Passing along by the rear of the army, where his uncle (Leicester), the General, was, and being thirsty with excess of bleeding, he called for some drink, which was presently brought him; but as he was putting the bottle to his mouth he saw a poor soldier carried along who had eaten his last at the same feast, ghastly casting up his eyes at the bottle, which Sir Philip perceiving, took it from his head before he drank, and delivered it to the poor man with these words, 'Thy necessity is yet greater than mine.'"

The gloom in the camp, when it was noised abroad that Sidney had received his death-wound, was universal. The grief of the Earl of Leicester was of the most passionate kind. In a letter to Sir Thomas Heneage, he says "that this man was his greatest comfort, next her Majesty, in all the world; and that if he could buy his life with all he had to his shirt, he would give it. We can believe that the eyes of Elizabeth's accomplished courtier and favourite were brimming with tears as he depictured Sidney's noble and loving nature in the words following:—

"How God will dispose of him," (continues the Earl), "I know not, but fear I must needs greatly the worst; the blow is so dangerous a place, and so great; yet did I never hear of any man that did abide the dressing and setting his bones better than he did, and he was carried afterwards in my barge to Arnheim, and I hear this day he is still of good heart, and comforteth all about him as much as may be. God of his mercy grant him his life. I was abroad that time in the field, giving some order to supply that business which did endure almost two hours in continual fight, and greeting Philip coming upon his horseback not a little to my grief. But I would you had stood by to hear his most loyal speeches to her Majesty; his constant mind to the cause, his loving care over me, and his most resolute determination for death; not a jot appalled for his blow, which is the most grievous that ever I saw with such a bullet; riding so long, a mile and a half upon his horse ere he came to the camp, not ceasing to speak still of her Majesty, being glad if his hurt and death might any way honour her; for hers he was while he lived, and God's he was sure to be if he died:" prayed all men to think that the cause was as well her Majesty's as the country's, and not to be discouraged, "for you have seen such success as may encourage us all, and this my hurt is the ordinance of God by the hap of the war." Well, I pray God it be His will save me His life, even as well for her Majesty's service as for my own comfort."

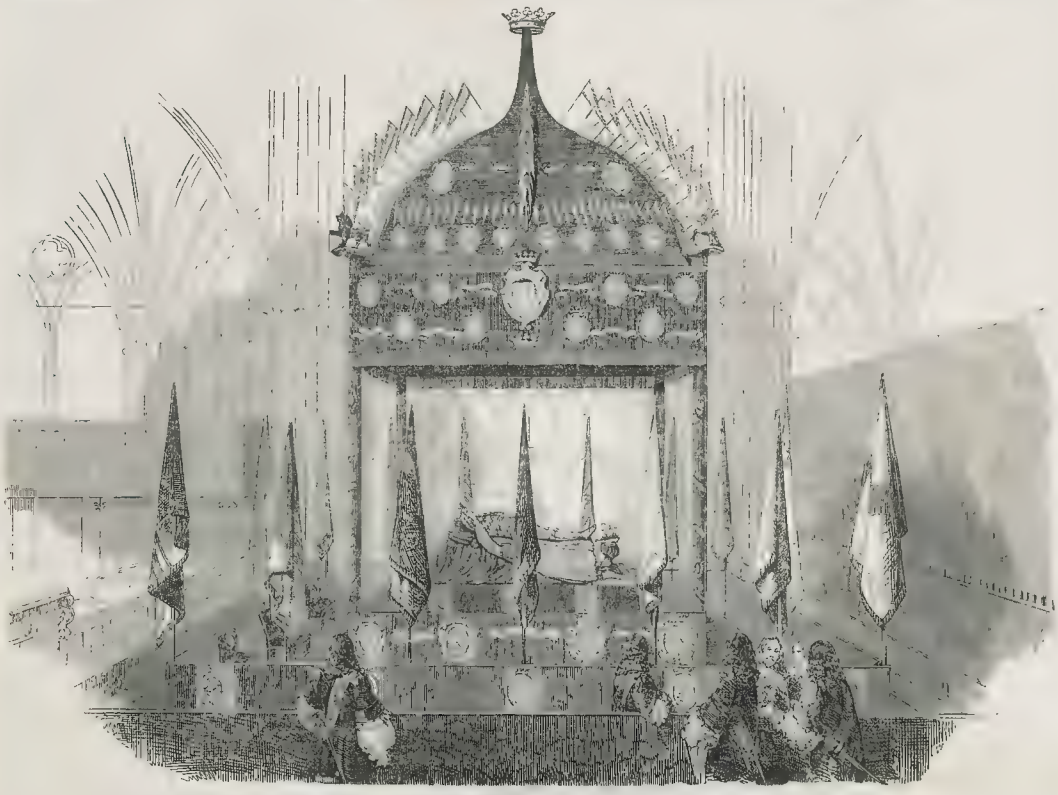
Sidney lingered for sixteen days in severe and unceasing pain, which he endured with the utmost sweetness and composure. We are told that in order to soothe and divert his mind he composed an ode (unhappily lost), which he caused to be set to solemn music. His wife was at his bed-side, and nursed him with womanly devotion. The skill of the chirurgeons of the camp was unavailing. Symptoms of mortification set in, and Sidney prepared for his dissolution. On the 16th October his gentle spirit took its flight. He breathed his last sigh in the arms of his faithful secretary and bosom companion, Mr. William Temple. The religious sentiment is ever strong in the breast of the true poet; and Sidney resigned his breath with child-like trust in his Creator. His dying address to his brother exhibits his feelings of love and faith, not untinged by sadness; for he had much to do, and had nourished the anticipation of a brilliant future:—"Love my memory; cherish my friends, their faith to me may assure you they are honest. But above all, govern your will and affections by the will and word of your Creator in me beholding the end of this world with all her vanities.

Thus had the same accomplished character of our history, the universal idol of his time, the "soldier's, scholar's, courtier's eye, tongue, sword!" When the news of his death reached England, from the Queen upon her throne to the meanest subject, the language of lamentation was everywhere heard. The whole kingdom went into mourning, an honour never before paid in England to any subject, however distinguished. It is related that for several months no gentleman of quality ventured to appear in a light-coloured or gaudy dress, either in the resorts of business or fashion. His father-in-law, Sir Francis Walsingham, then principal Secretary of State to Elizabeth, directed that no expense should be spared in his interment, and Queen Elizabeth ordered that the body should be publicly buried in St. Paul's. We have, however, first to trace the honours paid to the departed hero by the gallant nation whom he was seeking to deliver from the chains of religious tyranny and despotism. The subjects of Sidney's late Government would fain have kept his ashes among them. They entreated with the utmost earnestness that his body might be suffered to remain with them, and they offered, should their request be granted, to erect for him "as fair a monument as any Prince had in Christendom, yea, though the same should cost half a ton of gold the building." Their request was refused. But if a descendant of these honest Dutch burghers should ask us where Sidney's monument lies, would it be enough to reply that a tablet was erected to his memory in Old St. Paul's, which has not been preserved, and that such successive age has neglected to renew the memorial?

On the 1st of November, 1586, Sidney's remains were brought from his house at Flushing to the sea-side by the English garrison, then 1200 strong. The burghers of the town followed mournfully, and there, under volleys of musketry, and discharges of all the great ordnance upon the walls, the coffin was put on board a pinnace of his own, called in the engravings of the time the "Black Pinnace," a noe all her sails, tackling, and other furniture were coloured black, and her bulwarks were hung about with black cloth, embroidered with escutcheons of Sir Philip's arms. The *Black Pinnace*, accompanied with divers other ships, arrived in the Thames, and on the 5th of November the body was carried to the Minories ("which is without Aldgate"). Here it remained until the 16th of February following, when the funeral procession, with much pomp and magnificence, wended its way through the chief streets of the city to St. Paul's.

In the British Museum may be found a curious and valuable series of engravings, representing the procession in the obsequies of Sir Philip Sidney. This interesting roll was shown to Horace Walpole, and is mentioned by him as a great curiosity. It was "contrived and invented by Thomas Lant, Gent., servant to the said honourable Knight (Sir P. Sidney), and graven in copper, by Derick or Theodore de Brie, in the city of London, 1587." The engravings depict, with minute accuracy, the personages who compose the procession, and is a valuable contribution to the costume of the period. We learn from this contemporary record that the streets were so thronged with people that the mourners had scarcely room to pass. "The houses, likewise, were as full as they might be, of which great multitude there were few or none that shed not some tears as the corpse passed by them."

The funeral procession was opened by 32 poor men, (the number of his years) clad in black cloaks. Then came fifes and drums playing soft music, and the officers of Foot serving under Sidney in the Low Countries, with ensigns trailed. The officers of his Horse followed, and after them those the esquires and knights of Sidney's kindred and friends. The distinction between the esquires and knights is that the former wear a small white collar turned down upon their coats, and the latter the stately ruff. All the persons in the procession wear the very high and large hat of the period, with a brim of considerable breadth, bent sometimes in front and sometimes at one side. These hats are alluded to by Stubbs, when describing the head coverings of this reign, as "made of a certain kind of fine hair, which they call beaver hats, of twenty, thirty, and forty shillings a-piece, fetched from beyond sea." A long-waisted jerkin, or jacket, with a narrow skirt, just covered the hips, and close-fitting hose, which came down to the shoe, served the purpose



THE BODY OF MONK, DUKE OF ALBEMARLE, LYING IN STATE IN WESTMINSTER ABBEY.

both of trousers and stockings. The breast-plate worn by the military rises to an edge in the centre, and this salient angle is also imitated in the jerkin, which is ornamented by a row of large buttons down the front. A few gentlemen wear the slashed trunk-hose, which afterwards became so splendid a feature of Court apparel; but as yet it seldom descended below the middle of the thigh. Servants, esquires, knights, and nobles all wear a sword.

Following the knights of his kindred and friends, came Sidney's "horse for the field"—a stout, compact nag, ill-made for a retreat, but of great weight and strength in a charge. It was led by a footman and ridden by a young page, who trailed a broken lance. Further on came Sir Philip's "barbed horse," for state occasions, caparisoned in rich cloth of gold, and upon its back another page, carrying a battle-axe reversed. The five heralds wore, as usual, their richly-embroidered suits of gold lace and crimson over the black cloak. They carried the spurs, crest, &c., which are called in the engraving the hatchment and dignity of his knighthood.

Now came the coffin, covered with a black velvet pall, and borne upon the shoulders of fourteen of his yeomen. The corners of the pall were held by four gentlemen, his "dear, loving friends;" namely, Mr. Thomas Dudley, Mr. Fulke Greville, Mr. E. Wootton, and Mr. E. Dyer. Four of his near kindred also walked by the side of the coffin, carrying the bannerols, which are always borne at state funerals. They were Mr. Henry Sidney, Mr. E. Packenham, Mr. E. Walsingham, and Mr. W. Sidney. All these wore black hoods and mourning cloaks. The black velvet of coffin and pall was richly emblazoned with the arms of the deceased. His brother, Sir Robert Sidney, followed the body as chief mourner; and here we are reminded of the well-known picture by Gerard, at Penshurst, which represents Philip and Robert Sidney standing side by side, their arms linked together; "the former looking the protector, and the latter the protected, to the very life." The mourners' assistants were four knights and two gentlemen—one his kinsman; the other, his youngest brother, Thomas. Now came the Earls and Barons of his kindred and friends—a grave and dignified band, who ride two and two, on horseback. The first two are the Earl of Huntingdon and the Earl of Leicester, who, of all his friends, most fondly admired his parts and virtues. Leicester's moustache and beard, larger than those of his fellows, are indicated with great accuracy by the engraver. The Earl of Pembroke and the young Earl of Essex also ride side by side. The latter has neither moustache nor beard, and is almost the only man in the procession whose round and smooth cheek denotes alike youth and delicacy. He afterwards married Sidney's beautiful widow.

When Essex perished on the scaffold, in 1600, she embraced the Roman Catholic faith, and married a third husband, Richard de Burgh, the fourth Earl of Clanricarde. Essex was the brother of Sidney's "Stella," the lady whom he has made immortal in his verse. Pembroke, who rides by his side, is the husband of Sidney's sister. For her the "Arcadia" was written; and to her it is dedicated by Sidney, in a fond and fraternal passage. The last of this company of Elizabeth's proudest nobles was brought up by the Baron De Willoughby and the Baron De North. They were all clad in black cloaks, trimmed with velvet collars and edgings, and their horses were caparisoned with black cloth. The seven worthy Hollanders, who represented the seven United Provinces, and who were deputed to testify the respect of the States for his memory by their vicarious presence at his obsequies, followed the nobles, also on horseback. Next followed the Lord Mayor, Aldermen, and Sheriff of the city of London, and after them the Company of Grocers, of which Sir P. Sidney was free. The Lord Mayor, Sir E. Barnes, was preceded by the sword-bearer, also on horseback, who wears the fur cap of such ancient City tradition. The Lord Mayor and Aldermen wore purple gowns, and neat flat bonnets and caps, a much more picturesque article of dress than the huge beavers of the rest. The Aldermen were divided into those who were knights and those who were not; all are of right worshipful demeanour, with the grave and reverend aspect suited to the fathers of the City. The Company of Grocers follow on foot in their livery, to the number of 120. They wear caps, long gowns, and ruffs. The rear is brought up by 300 young men of the City, practised to bear arms, who marched three by three, with pikes, ensigns, and halberds trailing on the ground; musketeers and arquebusiers walked with arms reversed; and drums and fifes, with a trailed ensign, closed this sad procession. Of the mourners, we are told, every gentleman had a man, every knight two, some noblemen twelve, and others more. There were also present sundry English captains of the Low Countries, with divers other gentlemen who came voluntarily, "and are not in the work expressed." So that the procession on the whole numbered about 700 persons.

The funeral *cortège* passed through Aldgate and along Cornhill and Cheapside, only stopping now and then to relieve the bearers of the coffin. The great west door of St. Paul's, at which the mourners entered, was kept by some of her Majesty's Guards. Within St. Paul's, a splendid canopy or hearse had been erected under which the body was placed. The church was hung about with black cloth, and the hearse covered with black velvet, most beautifully adorned with escutcheons of his arms. Two heralds, Windsor and Chester, preserved the choir and hearse for the mourners, whom they placed according to their degree. So when the sermon was ended, the offerings and other ceremonies finished, and the body interred, the heralds in the churchyard "did by a double volley give unto his life and death a martial VALE!"

PART OF THE FUNERAL PROCESSION OF SIR PHILIP SIDNEY.—THE BODY.

THE ILLUSTRATED LONDON NEWS.

No. 591.—VOL. XXI.] SATURDAY, NOVEMBER 20, 1852. [TWO NUMBERS, 1s.

The Great Funeral Procession of The Duke of Wellington.

We beg to inform our Subscribers and Readers that it is quite impossible to publish all our Engravings of the Procession of the Funeral with this week's Illustrated London News. On Saturday next, November 27th, we shall, besides issuing the Engravings enumerated in another page, present Gratis a Large Engraving of the Procession on its way from the Horse Guards to St. Paul's; and on Saturday, December 4th, another Large Engraving, Gratis, of the Interior of St. Paul's, and the Funeral Ceremony. These Engravings will be executed in the best possible manner, and will, we trust, be found worthy of preservation as a permanent remembrance of the Lamented Hero.

198, *Strand, November* 19*th*, 1852.

THE DUKE'S FUNERAL.

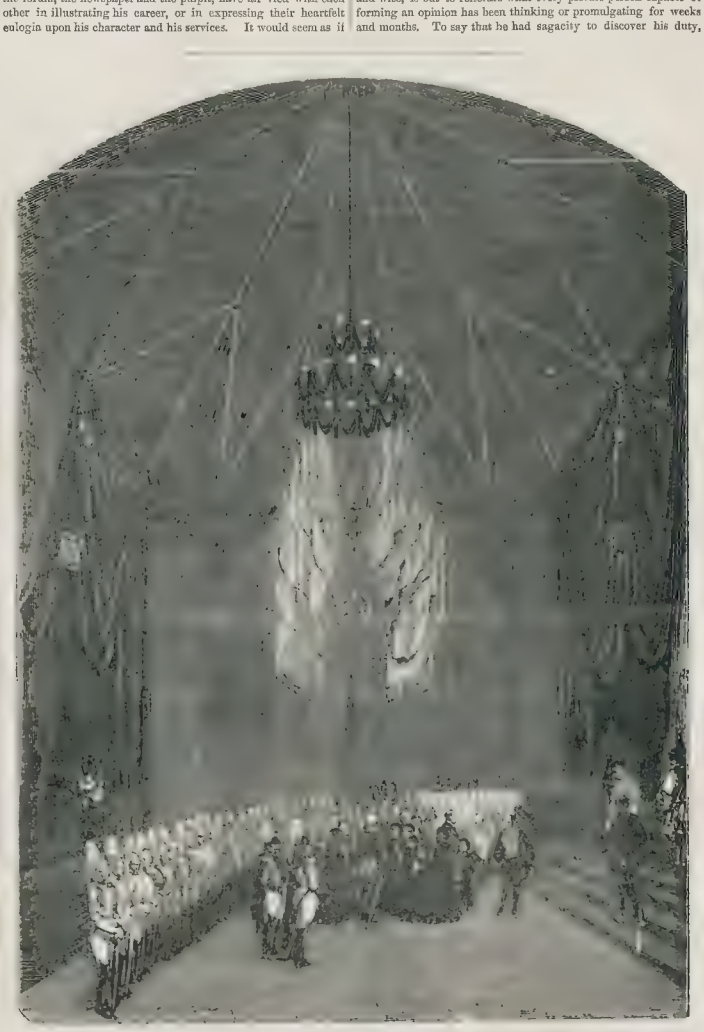
THE grave has closed over the mortal remains of the greatest man of our age, and one of the purest-minded men recorded in history. Wellington and Nelson sleep side by side under the dome of St. Paul's, and the national mausoleum of our isles has received the most illustrious of its dead. With a pomp and circumstance, a fervour of popular respect, a solemnity and a grandeur never before seen in our time, and, in all probability, never to be surpassed in the obsequies of any other hero hereafter to be born to become the benefactor of this country, the sacred relics of Arthur Duke of Wellington have been deposited in the place long since set apart for them by the unanimous decision of his countrymen. All that ingenuity could suggest in the [illegible], all that imagination could devise, were used to surround the ceremonial with the accessories that most forcibly impress the minds of a multitude, all the grace that Royalty could lend, all the aid that the State could afford in every one of its great departments, all the imposing circumstances derivable from the assemblage of great masses of men arrayed with military splendour and in military mourning, together with the less dramatic but even more affecting grief expressed by the sober trappings of respectful and sympathising crowds, all the dignity that could be conferred by the presence of the civil and legislative power of a great and ancient kingdom; and, lastly, all the sanctity and awe inspired by the grandest of religious services performed in the grandest Protestant temple in the world, were combined to render the scene, inside and outside of St. Paul's Cathedral on Thursday last, the most memorable in our annals. Nor in the popular estimation were these, great and imposing as they were, the only circumstances that invested the funeral of the great Duke with extraordinary interest. To the mind of the people, and to the superstition of thousands who would be loth to confess, although they would find it impossible to deny, the hold of such feelings upon their imagination, "the signs and the portents of nature" were added to the commemorative deeds of men, to render the last scene in the history of the hero more awe-inspiring than it might otherwise have been.

Amid the rise, and perhaps the fall, of empires, amid "fear of change perplexing the nations," amid earthquake and flood, a trembling earth and a weeping sky, Wellington was conveyed from his lonely chamber at Walmer to the more splendid haltingplace of Chelsea, and from thence to his grave, in the heart of London. To the popular apprehension—felt, if not expressed—it seemed as if the great funeral of that great man were only to be fitly celebrated amid mystic voices predicting—

> A time of conflict fierce and trouble strange,
> When Old and New, over a dark abyss,
> Fight the great battle of relentless change;

and when the very elements seemed to sympathise with the feelings of living men at the loss of one so mighty as he had been in his day and generation.

But the hero is entombed, and the voice of his contemporaries has spoken his apotheosis. Every incident in his long and honourable life has been sought for and recorded. His youth, his maturity, and his age have had their careful and admiring annalists; and his public and his private, his military and his civil career, his deeds as a soldier and a statesman have severally and collectively been trumpeted to all the winds of heaven by a fame as extraordinary as it was well-merited and universal. Every trait in his simple, direct, and manly character has found its chronicler. The stores of his wisdom have been arranged and [illegible]-ified into apothegms, brilliant as epigrams, and many of them as immortal as his victories. Literature and art, the senate and the forum, the newspaper and the pulpit, have all vied with each other in illustrating his career, or in expressing their heartfelt eulogia upon his character and his services. It would seem as if praise had been exhausted, and that nothing more remained to be done or said about the Great Duke. The journalist, who is always expected to say something new, can in this case but repeat the old. He cannot lead, but he must follow, that unanimous public opinion which exists around him. To say that the illustrious individual whose loss we deplore was brave, honest, and wise, is but to reiterate what every private person capable of forming an opinion has been thinking or promulgating for weeks and months. To say that he had sagacity to discover his duty,



THE LYING IN STATE AT CHELSEA HOSPITAL.—THE VESTIBULE.—(SEE NEXT PAGE.)

honesty never to swerve from it, and energy to accomplish it, is but to utter a truism familiar not only to Englishmen, but to all Europe. Yet the moral of that brilliant life cannot be too often or too forcibly repeated. In this respect, what a contrast is offered by his history to that of his mighty rival whom he so happily overthrew. Napoleon, Bonaparte, was false to liberty, a traitor and breaker of his word, a false friend, false to his own heart's affection, false to his early principles, false to his country, and false to the Sovereigns and nations with whose confidence he shone. There was scarcely a part of the human in the of his character—his god was himself, and he fell before it basely.

> Though specious tyranny be strong,
> Hypocrisy is weak,
> And Lucifer, soon upon a wrong
> Is rotten through and through.

But to every principle to which Bonaparte was false, Wellington was true. The British hero was utterly unselfish, knew not wrath itself, his guiding star was public duty, his course was that of fr dom and humanity, and his successes were as brilliant and beneficent as the final defeat of his great antagonist was signal and calamitous. Wellington never sought or gave glory; but he acquired it in a degree compared to which that of Bonaparte is but a pale and uncertain glimmer to a noon-day blaze. And what is equally true of the man who never used the word glory in his immortal Despatches, he never courted popularity; and yet he acquired it. There never was a popularity in England that could be compared to his. Napoleon was, if we may borrow the expressive language of Philip Massinger, in the old and neglected play of "The Great Duke of Florence"—

> An undeserving man, set off
> With all the trim of greatness, state, and power.
> The thing was but a comet, no true star,
> And, what was dreadful, proved ridiculous.

But Wellington, in the language of the same writer, continued in the same passage—

> Was not so,
> He being such pure tried gold, that any stamp
> Of grace to make him current to the world,
> The King was pleased to give him, did add honour
> To the great lawgiver.

The Hero sleeps well. Time shall but increase his glory. May we never miss in a future day the guiding hand and the clear judgment of him who gave nearly forty years' peace to Europe, who was the benefactor of every kingdom in it; who gave France constitutional liberty—since lost, but sure to be regained; and who raised his own country to a height of power, influence, and true glory she had never before reached. No Cæsar ever approached such deeds as these; and all Greek and Roman fame are but small and mean compared with the pure fame of the GREAT DUKE OF WELLINGTON!

THE DUKE'S FUNERAL.

THE LYING IN STATE AT CHELSEA HOSPITAL.—THE VESTIBULE.

In the Number published with the present Sheet we have illustrated and minutely described the grand spectacle of the Duke's remains Lying in State in the Hall of Chelsea Hospital; and upon the preceding page have engraved a portion of the arrangements which is considered to have been equally successful with the more gorgeous scene in the Hall. Such is the Vestibule, which has two entrances, north from the garden, and south from the centre court; the interior is octangular; and has a dome, the centre of which opens into the lantern. An ascent of ten steps on the west side leads to the door of the Great Hall, while a similar flight on the east side leads to the chapel. Entering on the north side, the visitor passed through a spacious corridor, constructed for the purpose, hung with black, and dimly lighted by a chandelier ornamented with plumes. The arrangements of this vestibule are executed in the simplest and most severe style, sombre tone being placed in the centre of each side wall; and that immediately facing the approach bearing a large and very effective trophy of thirty banners, surmounted by the Royal standard. The worn, faded, and tattered appearance of these flags, seen through the gloom, has a singularly striking appearance; and the interest which they excite increases, when, upon a closer inspection you can trace upon the once flaunting banners such inscriptions as "Republique Française, que la Liberté ou la Mort." In the centre of this trophy are the Royal arms, encircled with a wreath of laurel. The fitting up of the vestibule was designed to give a national and patriotic turn to the thoughts of visitors, and to awaken in their minds recollections of our military glories. Beyond the simple escutcheons on the walls, and the black draperies descending from the elevated arch-shaped roof, there is nothing to suggest the name of Wellington; and, though some of the flags won in his battles are included in the trophy alluded to, they are placed without any distinction, along with others, under the common shelter of the national banner which crowns them.

Further details of the Lying in State will be found at pages 428 and 457.

THE SURVIVING WATERLOO OFFICERS.

Now that the chief of that compact band that fought and bled on the field of Waterloo has been consigned to the tomb, a list of the survivors of that glorious battle may be interesting. A complete and accurate list has been made from all the available authorities, and is, we believe, correct.

FIELD MARSHAL.—The Marquess of Anglesey, K.G., G.C.B., and G.C.H., Colonel of the Royal Regiment of Horse Guards.

GENERALS.—The Right Hon. Sir John Regd. Oldfield, G.C.B., and G.C.H., Colonel of the 1st Foot; the Earl of Dalhousie, G.C.B., Colonel of the 3rd Regiment Foot Guards; Sir Peregrine Maitland, G.C.B., Colonel of the 52nd Foot; Sir Colin Halkett, G.C.B., and G.C.H., Governor of the Royal Military Asylum at Chelsea Hospital; the Right Hon. Sir Edward Barnes, G.C.B., G.C.M.G., Colonel of the 74th Foot; Sir Andrew Barnard, G.C.B., G.C.H., Colonel of the 95th Foot; Sir Andrew F. Barnard, G.C.B., Colonel of the 16th Regiment; Sir Andrew Lieutenant-General of the Ordnance, Sir James Macdonell, K.C.B., Colonel of the 79th Foot; Sir James W. Gordon, G.B., Colonel of the 9th Regiment; Sir Alexander Cotton, K.C.B. and K.C.H., Colonel of the 14th Regiment; Sir John Keane, G.C.B., Colonel of the 3rd Regiment; Sir Frederick Adam, K.C.B., Colonel of the 87th Foot, and Aide-de-Camp to the Queen; Sir Hussey Vivian, G.C.B., Colonel of the 13th Dragoons; Sir George Anson, K.C.B., Colonel of the 23rd Regiment; Sir Edward Kerrison, K.C.B., Colonel of the 7th Dragoon Guards; Sir Colquhoun Grant, K.C.B., Colonel of the 3rd Dragoon Guards; Sir Samuel Auchmuty, K.T., K.C.F., Colonel of the 66th Regiment; Sir Frederick Adam, K.C.B., Colonel of the 87th Foot; Sir William M. Gomm, K.C.B., Colonel of the 13th Regiment; Sir Edward Blakeney, K.C.B., Colonel of the 45th Regiment; Sir Thomas Bowser, K.C.H., Colonel of the 1st Regiment; Sir Thomas Reynell, K.C.B., Colonel of the 39th Regiment; H. D'Oyley, Colonel of the 44th Regiment; Sir John Murray, G.B., Colonel of the 7th Dragoon Guards; Sir Hew Ross, K.C.B., Colonel of the 13th Regiment; Sir Frederick Stovin, K.C.B., Colonel of the 3rd

WELLINGTON DOUBLE NUMBER

OF THE

ILLUSTRATED LONDON NEWS.—The Publisher and Printer beg the indulgence of their Subscribers and Readers for the DELAY that must necessarily ensue this week. The orders already received in this day are FOUR TIMES MORE NUMEROUS than it is possible to supply by Saturday, the 20th. On Monday, the 22d, it is hoped all the regular Subscribers will be in receipt of their Papers. Every means is used to procure sufficient copies, but it is impossible to print the number required for delivery within the regular time.

198 Strand. Nov. 19, 1852.

CALENDAR FOR THE WEEK.

SUNDAY, November 21.—Twenty-fourth Sunday after Trinity. Princess Royal born, 1840

MONDAY, 22.—St Cæcilia Grey Administration formed, 1830.

TUESDAY, 23.—Old Martinmas Day. St. Clement.

WEDNESDAY, 24.—John Knox died, 1572. Peace with America, 1814.

THURSDAY, 25.—St. Catherine. Michaelmas Term ends.

FRIDAY, 26. Dr. Watts died, 1748. Lord Lyttelton died, 1779.

SATURDAY, 27.—Princess Mary Adelaide born, 1833

On SATURDAY, JANUARY 1st, 1853,

WILL BE COMMENCED THE PUBLICATION OF

THE UNIVERSAL LIBRARY

OF THE

BEST WORKS OF THE BEST AUTHORS OF ALL NATIONS,

IN ALL DEPARTMENTS OF LITERATURE,

Beautifully and uniformly printed in royal octavo, with two or more first-class Illustrations to each Number, and a handsome cover.

The Work will be printed in a clear, readable type, in double columns, on superior paper, made expressly for this Library. Each Number containing two or more highly-finished Engravings, consisting either of Portraits of the Authors, or representations of Scenes forming the subject of the works; and, as a general rule, about 112 pages of letter-press; and the price will be One Shilling.

London: INGRAM, COOKE, and Co., 227, Strand.

NOTICE.

The all-absorbing interest of the Great State Funeral of the Duke of Wellington, and the large space we have devoted to its Illustration, have compelled us to postpone, until next week, several ENGRAVINGS of miscellaneous subjects; including Two Pages of Illustrations of

THE GREAT FLOODS IN THE MIDLAND AND WESTERN DISTRICTS.
THE MEETING OF CONVOCATION.
THE EVENTS ON THE RIVER PLATE, and a PORTRAIT OF GENERAL URQUIZA.
THE FRENCH SENATE AT ST. CLOUD.
THE MILITIA MUSTER AND UNIFORM, &c. &c.

WITH NEXT WEEK'S

WELLINGTON DOUBLE NUMBER

OF

THE ILLUSTRATED LONDON NEWS

will be presented, GRATIS,

A GRAND HALF-SHEET ENGRAVING

OF THE

FUNERAL CAR AND PROCESSION.

This Double Number will also contain large and beautifully-executed ENGRAVINGS of the following subjects:

MARSHALLING THE PROCESSION AT THE HORSE GUARDS.
THE PROCESSION PASSING APSLEY HOUSE.
THE PROCESSION PASSING PICCADILLY AND THE GREEN PARK
TRAFALGAR-SQUARE AND THE CHELSEA PENSIONERS.
THE PROCESSION IN FLEET STREET AND LUDGATE-HILL.
TEMPLE BAR THE NIGHT BEFORE THE FUNERAL.

Being the Ninth annual issue of this publication; with splendid ENGRAVINGS, by B. FOSTER, Esq., and other eminent Artists. The Astronomical Department by JAMES GLAISHER, Esq., F.R.A.S., and of the Royal Observatory, Greenwich. The Notes of the Month by Mrs. ALARIC A. WATTS.

London: Published by WILLIAM LITTLER, 198, Strand.

*** Country orders supplied for cash only.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, NOVEMBER 20, 1852.

Our readers will observe, from the present Number of our Journal, as well as from that which we issued last week, and we hope also from those which are to follow it—that we have spared neither time, trouble, nor expense, to illustrate in a befitting manner the various scenes and incidents in the Grand State Funeral of the Duke of Wellington. In pursuance of the task which has devolved upon us, we have necessarily been brought into constant communication with official personages: most of whom, we are proud and grateful to admit, have, in the most courteous manner, endeavoured to be of service to us, and have placed facilities in our way for duly recording, in our own manner, the most striking ceremonial of modern times. When it is reflected that by far the larger portion of the people—and, indeed, all who are not residents of the metropolis, or who did not visit it for the purpose; all the inhabitants of the provinces or of the remote colonies, dependencies, and possessions of the British empire, will owe to our pages, far more than to those of our daily contemporaries, however copious and able their reports, the knowledge which they will obtain of the "pomp and circumstance" of the funeral and all its accessories,—the importance as well as interest of the labours of our artists and engravers will be acknowledged. The official personages to whom we had occasion to apply for assistance very generally admitted our claim on their attention; and we are happy to express our acknowledgments for their prompt courtesy and invaluable aid. Justice, however, compels us to exclude from any recognition we have to offer, the clerical authorities of St. Paul's Cathedral. Not only as regards ourselves, but as regards others, we are compelled to notice the loud and general complaints that have reached us from every quarter, of the manner in which these authorities executed the trust reposed in them on this great national occasion. It might have been supposed that a fair and reasonable proportion of the enormous number of places claimed by the Dean and Chapter would have been devoted, not simply to those who record the events of our time, and without whose aid public ceremonies lose most of their value and importance, but to those persons connected by relation-ship or service with the illustrious deceased. But we are given to understand that this was by no means the case, and that the old companions in arms of the Duke, men, too, who had been wounded at his side in the battles of this country, urged in vain upon the Dean their claim to a place in St. Paul's Cathedral, on the occasion of the funeral. We are also given to understand that even some of the nearest and dearest relatives of the departed could not obtain a sufficient recognition of their right to be present, and to bring those with them who might be connected, by service or by companionship, with the Great Duke whom the nation delighted to honour. We are well aware that complaints against such personages are all but useless; but we, nevertheless, feel bound to enter our protest against the manner in which the d[illegible] grand ceremonial were conducted by the authorities of St. Paul's Cathedral.

It is exceedingly to be regretted that the honourable task of pronouncing the Parliamentary eulogium of the House of Commons on the career and character of the Duke of Wellington should have fallen, by right of office, to Mr. Disraeli. The speech of the right honourable gentleman on that memorable occasion fell far short of what was expected; and when Lord John Russell only added a few words, and when the other great parliamentary celebrities kept silence and allowed Mr. Disraeli to be the sole orator of the occasion, the country felt disappointed, as it well might. Unfortunately, however, the speech which Mr. Disraeli thought fit to deliver was only his own in those passages of it which were marked with bad taste. The memory of the Duke—of the man of truth—was insulted by the repetition of a second-hand panegyric, pronounced nearly a quarter of a century ago upon the memory of a second-rate French Marshal, and held forth to the House of Commons and to the country as Mr. Disraeli's own.

Thought for thought—expression for expression—nay, word for word—Mr. Disraeli's eulogium on the hero of Waterloo was taken from an article by M. Thiers, on the death of Marshal Gouvion de St. Cyr, written in 1829, and re-produced in a legible article of the *Morning Chronicle* of the 4th of July, 1848. The circumstance was so extraordinary when pointed out in the columns of the *Globe* of Tuesday night, that we hesitated to give it credence. We accordingly referred to the file of the *Morning Chronicle*, to satisfy ourselves that no hoax was attempted by our clever evening contemporary, and with regret we found the identical passage. Let the reader compare Mr. Disraeli's speech with M. Thiers's essay, and then pass his opinion upon Mr. Disraeli, and his fitness to be the leader of such an assemblage of gentlemen as the British House of Commons.—

PARALLEL PASSAGES.

It is not that a great general must be an engineer—a geographer—learned in human nature—adroit in the management of men; that he must be able to fulfil the highest duty of a Minister of State, and then to descend to the humblest office of a commissary and a clerk, but he has to display all this knowledge, and to exercise all these duties, at the same time, and under extraordinary circumstances. At every moment he has to think of the eve and of the morrow—of his flank and of his rear: he has to calculate at the same time, the state of the weather and the moral qualities of men; and all these elements that are perpetually changing, he has to combine—sometimes under overwhelming heat, sometimes under overpowering cold—sometimes in famine, and frequently amidst the roar of artillery. (Hear, hear.) Behind all these circumstances there is ever present the image of his country, and the dreadful alternative whether that country is to welcome him with laurel or with cypress. (Hear, hear.) Yet those images he must dismiss from his mind; for if a general must not only think, but think with the rapidity of lightning; for on a moment more or less depends the fate of the most beautiful combination and a moment more or less is a question of glory or of shame (Hear, hear.) Unquestionably, sir, all this may be done in an ordinary manner by an ordinary man; as every day of our lives we see that ordinary men may be successful managers of state, successful authors, and successful speakers, but to go all this with genius is sublime. (Hear, hear.) To be able to think with vigour, with depth, and with clearness, in the recesses of the cabinet, is a great intellectual demonstration; but to think with equal vigour, clearness, and depth amidst the noise of bullets, appears to me the loftiest exercise and the most complete triumph of human faculties (Cheers.) Mr. DISRAELI'S on the DUKE OF WELLINGTON, 1852.

. . . Farther off, and behind them, is the spectacle of your country, with laurel or with cypress. But all these images and ideas must be banished and effaced, for you must think, and think quickly—one minute too much, and the rarest combination has lost its opportunity, and instead of glory it is shame which awaits you. All this undoubtedly is compatible with mediocrity, the every other profession one can also be a middling poet, a middling orator, a middling author; but this done with great success is sublime.

To think in the quiet of one's cabinet clear-y, strongly, nobly, that is undoubtedly is great; but to think accurately, clearly, nobly, in the midst of combat, and fire, is the most perfect exercise of the human faculties —M. THIERS on Marshal Gouvion de St. Cyr, 1829, quoted in the *Morning Chronicle* of July 4, 1848.

THE COURT.

BUCKINGHAM PALACE.

Her Majesty, his Royal Highness Prince Albert, and the youthful members of the Royal family continue in the enjoyment of good health.

On Wednesday the Queen and Prince Albert, with the Prince of Wales, the Princess Royal, Prince Alfred, and Princess Alice, accompanied by the Duc de Brabant, the Comte de Flanders, and the Princess Charlotte of Belgium, and the Prince of Leiningen, the Prince and Princess of Hohenlohe-Langenburg, the Princess Adelaide and Feodore, and the Prince Hermann of Hohenlohe, left Windsor Castle for London, *viâ* the Great Western Railway; and reached Buckingham Palace at 26 minutes past three o'clock. At four o'clock the Queen held a Court for the reception of all the foreign officers who have come over from Russia, Portugal, the Netherlands, Prussia, Hanover, and Spain to attend the funeral of the late Field-Marshal Arthur Duke of Wellington, together with all the officers composing their suites, and

On Thursday, after the passing of the funeral cortège of the late Duke of Wellington, the Queen went to St. James's Palace, and again viewed the procession from the windows. Her Majesty was accompanied by their Royal Highnesses the Prince of Wales, the Princess Royal, Prince Alfred, the Princess Alice; the Duchess of Kent, the Princess Charlotte of Belgium, the Princess of Hohenlohe-Langenburg, and the Princess Adelaide and Feodore of Hohenlohe. His Royal Highness Prince Albert left Buckingham Palace shortly after nine, in a car age drawn by six horses, to take his place in the funeral procession of the late Duke of Wellington. His Royal Highness returned to the Palace about three o'clock in the afternoon. Her Majesty, Prince Albert, and the Royal family and suite, left Buckingham Palace at five minutes past five o'clock for Windsor. Her Royal Highness the Duchess of Kent and the Princess of Hohenlohe also left for Frogmore.

POSTSCRIPT.

HOUSE OF LORDS.—FRIDAY.

The Lords met at [illegible] o'clock, the Lord Chancellor presiding.

BURIAL OF THE DUKE OF WELLINGTON.—The Marquis of [illegible] gave notice that [illegible] on Monday, the [illegible] Lords [illegible] to the public business to be brought before the House before [illegible] the funeral for the Christmas holidays.

QUARANTINE REGULATIONS.—The Earl of GERMANS referred to the Sanitary Conference held in Paris last year; and directed attention to the fact of the *La Plata* West Indian steamer having arrived at Southampton on Thursday, with yellow fever on board. He asked what precautions had been adopted with respect to the unfortunate persons on board.—The Earl of MALMESBURY said there was good reason to hope that the recommendations of the Conference would be carried out, for, a short time since, [illegible] conference report, Parliament [illegible] the Government [illegible] the Board of Health [illegible] consider these matters. Lord BEAUMONT suggested [illegible] the regulation of railways.—The Earl of DERBY [illegible] such a measure must be considered he was afraid [illegible] difficult, if not impossible, to carry it out. The [illegible] the great evil interfered with [illegible] thought that such interference might be made [illegible] troops and the mails. After some further conversation [illegible]

THE LATE DUKE'S FUNERAL.—The Earl of DERBY, in a most eloquent speech, congratulated the House on the successful manner in which the funeral arrangements of the previous day had been carried out; and spoke most favourably of the conduct of the people and the troops, at the same time paying a high tribute to the orderly behaviour of the public. The noble Earl, in concluding, proposed an address to [illegible] on the character of the late Duke of Wellington.—Adjourned.

HOUSE OF COMMONS.—FRIDAY.

The Speaker took the chair shortly before four o'clock.

THE TURKISH LOAN.—In answer to a question from an hon member Lord STANLEY said he thought it would not be necessary to lay on the table of the House the correspondence which had taken place with [illegible] to the Turkish Loan. The Turkish Government had acted with [illegible] and he believed the matter would be speedily and satisfactorily [illegible].

AMALGAMATION OF RAILWAYS.—In answer to a question from Mr. Labouchere, Mr. HENLEY said, the department of the Board of Trade [illegible] examination into the subject of the amalgamation of railways more [illegible] by the *Gazette* notice; but, as the subject was a most important one, and [illegible] a committee of the House ought to be appointed to consider the subject, in order to protect the public.

CONVOCATION.—In answer to a question from Sir J. Shelley, Mr. WALPOLE said, the usual course with respect to the assembling of Convocation was to leave it to the Archbishop of Canterbury, without interference on the part of the Crown, unless the authority of the Crown was attempted to be set aside. It was not intended upon the part of the Government to deviate from the usual course which had been adopted with respect to the meeting of Convocation. He should not induce him to advise the Crown to grant a license for the continued sitting of Convocation, as he thought nothing would be more detrimental to the Church of England than to allow the Convocation to make canons for the Church.

FREE TRADE AND PROTECTION.—The CHANCELLOR of the EXCHEQUER gave notice that on Tuesday, the 30th, he would move, by way of amendment to the resolution of Mr Villiers, "That this House acknowledges with satisfaction that the cheapness of provisions occasioned by recent legislation has mainly contributed to improve the condition and to increase the comfort of the working classes; and that unrestricted competition having been adopted after due deliberation, as the principle of our commercial system, this House is of opinion that it is the duty of the Government unreservedly to adhere to that policy in these measures of financial and administrative reform which, under the circumstances of the country, they may deem it their duty to introduce." (Derisive cheers.)

THE CAPE.—In answer to a question from Lord J. Russell, Sir JOHN PAKINGTON said, he was enabled to say that the late advices from the Board of Good Hope were of a favourable nature, and stated that there was reason to believe that the war was drawing to a close and would, he hoped, be speedily terminated. He said that the construction [illegible] had been carried on [illegible] and a railway [illegible] nature that it [illegible] [illegible] of the [illegible] [illegible] [illegible]

CHELSEA HOSPITAL.—THE CROWD GOING IN.

THE LYING IN STATE AT CHELSEA HOSPITAL.

In last Saturday's Number, the visit of her Majesty the Queen to the solemn spectacle in the Great Hall at Chelsea Hospital, on Thursday, the 11th, was recorded; and, in our Postscript, we noticed the visit of private ticket-holders on Friday, the 12th.

The weather, on Friday, was one continued deluge. The company, amounting to 15,000 persons, chiefly of the aristocracy and richer of the middle classes, arrived in carriages, and for many hours blocked up the adjacent streets. Throughout the day their impatience to gain admission, and excess of numbers (as compared with the facilities for setting down and taking up carriage company), caused much confusion and disappointment. On the doors being closed, shortly after four p.m., there were still several thousand persons holding tickets to whom admission was denied. At one period of the day, the lines of carriages were estimated to extend over two miles.

A Special Correspondent furnishes the following account of the public days of the Lying in State:

Saturday, the 13th, was the first public day. While it was yet four hours from sunrise, the measured tread of police detachments from the northern suburbs, heavily tramping towards Chelsea, indicated that I was not the first afoot. It was not from a desire to be the first to enter the hall of solemn grandeur on that day which drew me forth so early. I went to observe and listen, and, if need were, to take note of what was seen and heard around and in the vicinity of the coffin of the most honoured and honourable man of our nation, and of the world.

On reaching Charing cross and thereabout, it was observable that more wayfarers kept the streets awake than are usually seen at four o'clock. One might have supposed that the morning of Covent-garden market, or the disposition of certain classes to sit up late or not go to bed at all, was the cause of early bustle. These contributed to it, but on looking more closely at the moving men and women as they passed under the lamps, it was observable that most of the men wore crape upon their hats, while the women were attired either in black or partially in mourning. Their faces too were turned westward. Where could they be going, if not to Chelsea, to arrive there two hours before daylight, to pay homage to the memory of the Duke of Wellington. Thither they were bound, both those on foot and those who rattled over the stones in street cabs. Thither I followed them.

There were early breakfasts in crowded rooms. Groups, though as yet not multitudes, in the streets and about the hospital approaches. Detachments of the Grenadier Guards arrived to do duty in the great solemnity, by "resting on their arms reversed," and of Life Guards to stand (dismounted) in the entrance hall as sentinels of honour. Workmen, within and without the Hospital walls, were hammering by

SCENE OF THE CATASTROPHE, AT THE GATE, CHELSEA HOSPITAL

the light of lanterns and torches—nailing barricades—opening new door-ways, or closing old ones. The police were posted, or in process of being told off to their posts. The crush of 15,000 private ticket-holders on the previous day, 5000 of whom, it was said, had been unable to gain admission; and the indecorum and rudeness of the Chelsea pensioners with their wives and friends, after the Queen's private visit on Thursday, had led to a superintendent of police and some officers being suspended, for some real or alleged neglect of duty. This police incident made all the constables, on Saturday, more active and stern (some people who do not consider how severely the patience of the police is tried, may have called them rude); and it was apparent that, banded across the streets at different points, they were not in humour to be cajoled out of their firmness.

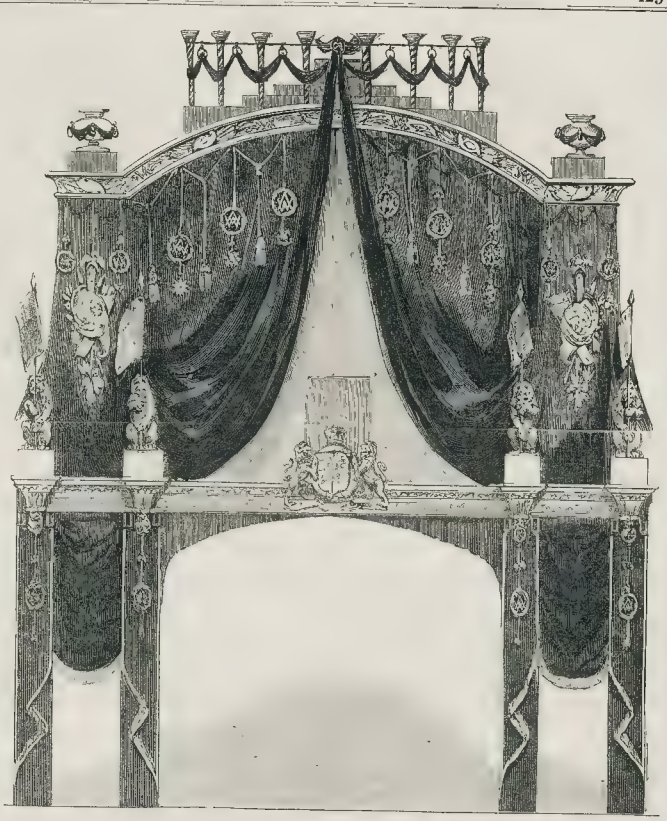
From the importance of the after incidents of the day, it is requisite to know the lines of approach and departure at the Hospital. The Queen's-road passes the northern front of the building, separated from it by a high railing and wall, and an open space about a hundred feet deep; on the opposite side of the Queen's-road is a square of grass pasturage, said to be ten acres in extent: it is surrounded by iron rails, intersected by a central private road, which approaches the centre of the Hospital, and crosses the Queen's-road at a right angle. Outside this green square are public thoroughfares.

Let the reader suppose himself approaching the Hospital by the east side of this square. His face is to the south; and, arriving at the Queen's-road, the gates are immediately before him, by which entrance is obtained on ordinary occasions. On Saturday these gates were closed, except to the military, police, and official persons. The entrance for the public was at the central gateway; so that from this eastern corner the public had to advance up the Queen's-road westward a hundred and fifty yards, or thereabouts. But they were only allowed to do so by the foot-path on the left-hand side of the Queen's-road. A strong body of police were stationed here to turn every person back, either to the north, by the side of the square, or to the east by the Queen's-road. Which ever course they took, they had to go about a quarter of a mile, latterly more than half a mile eastward, there to turn and fall in upon the crowded pavement; with faces westward, to move up to the Hospital, after hours of detention and crushing. They were detained on that pavement, or in the gutters skirting it, by a close row of street-cabs and private carriages. These the police kept together like a wall, permitting no person to pass through the line without going to the extreme end eastward.

So far, this arrangement was good. Had there been no approach to the interior of the Hospital but from the eastward by this section of the Queen's-road, the ingress would have been simple. But a like current of people was allowed to approach from the westward, and come in conflict with this eastern current at the place of entrance. The current from the west was only about two hundred yards in length, rather less; that is to say, any persons newly arriving, and going round the west side of the extensive green square, or coming in, as thousands upon thousands did, from the steam-boats by way of Cheyne-walk, could approach to the Hospital without being formed by the police. Thus, the fresh accessions from the west were within two hundred yards of the place of ingress before they were confined to the pavement to advance in order, while those from the east were in confinement for more than half a mile. The first result was that, though the published police regulations had named the eastern section of the Queen's-road as the only approach, people flocked to the western section, because an hour of struggle there got them sooner to the entrance than four hours of struggle from the east.

But this was not the cause of all the suffering that occurred. The chief cause was that, the current of exit from the Hospital was poured into this impetuous western crowd, face to face. The people who arrived from the river or the western streets were, as yet, fresh and vigorous, and rushed forward. All the military and engineering science left after Wellington, and any required share of £100,000 or more, which the funeral is to cost, seemed to have been insufficient to devise a way of exit for the wearied and crowd-worn devotees coming from Wellington's coffin, other than by erecting a gallery, only a few feet wide, through which they were poured out as through a funnel, or out of a bung-hole, in the face of the new comers, who crushed them, feeble as they were, against the railings, or, in their own vigorous impetuosity, trampled them under foot.

After devoting some hours to a study of the streets and the congregating people, and noting that, at least, three out of every four men wore crape on their hats, and nearly all had some sign of solemnity about them, while not one woman in fifty was seen with a gay ribbon on her bonnet, I thought it full time to seek access to the interior. At half-past nine o'clock, the doors having only been opened at nine, I, like thousands more, was turned by the police towards Pimlico, to fall in behind the wedged crowd at the distance of four or five hundred yards eastward from the Hospital. The number of those who looked on in despair, and went home at that early hour, seemed to be nearly as great as of those still arriving. By the progress which this eastern crowd made, I reckoned my period of admission would be late in the afternoon. I again made my way through streets where the crowds were still in motion, and with some difficulty reached the barrier of policemen, who, with an inspector, stood across the Queen's-road at the east end of the Hospital. Having given the name of this Journal to the inspector, he permitted me to pass up the road; but I was immediately pursued by a constable on horseback, who peremptorily ordered me back. To him I also named the business I was on; but he was not to be satisfied until



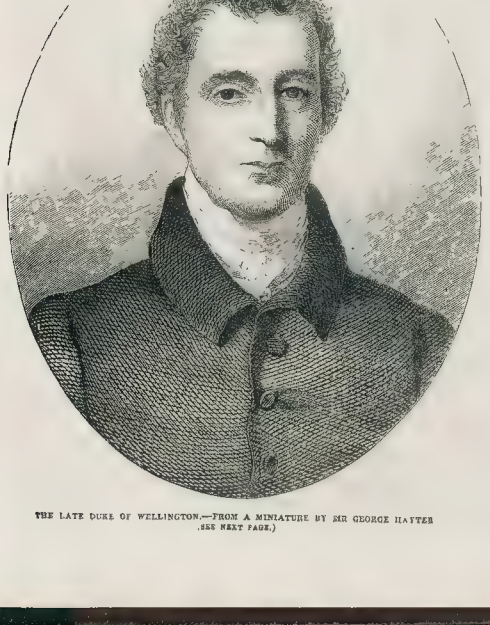
THE DUKE'S FUNERAL.—TEMPLE-BAR. (SEE NEXT PAGE.)

he had the inspector's permission. This was soon obtained; and, being permitted to go, there arose shouts in the crowd, "That's favour;" "That's not fair!" I only notice this to say, that I do not believe a word of certain accusations of which I have since read to the effect that persons were admitted by bribing the police. Those who make such charges should know that it is necessary for members of the press to be admitted where others may be excluded. Let any man attempt bribery on such occasions, and he will be in great danger of a rap over the knuckles, if not over the head, besides being turned to the outside.

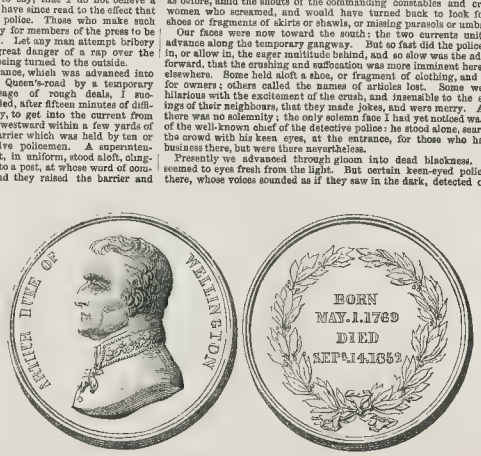
Arrived in front of the Hospital entrance, which was advanced into the Queen's-road by a temporary passage of rough deals, I succeeded, after fifteen minutes of difficulty, to get into the current from the westward within a few yards of a barrier which was held by ten or twelve policemen. A superintendent, in uniform, stood aloft, clinging to a post, at whose word of command they raised the barrier and with it [illegible] upon which it being raised, twenty or thirty persons were let in on that side. Then it was closed, and that on the west was opened as before, amid the shouts of the commanding constables and cries of women who screamed, and would have turned back to look for lost shoes or fragments of skirts or shawls, or missing parasols or umbrellas.

Our faces were now toward the south: the two currents united to advance along the temporary gangway. But so fast did the police pour in, or allow in, the eager multitude behind, and so slow was the advance forward, that the crushing and suffocation was more imminent here than elsewhere. Some held aloft a shoe, or fragment of clothing, and asked for owners; others called the names of articles lost. Some were so hilarious with the excitement of the crush, and insensible to the sufferings of their neighbours, that they made jokes, and were merry. As yet there was no solemnity; the only solemn face I had yet noticed was that of the well-known chief of the detective police: he stood alone, searching the crowd with his keen eyes, at the entrance, for those who had no business there, but were there nevertheless.

Presently we advanced through gloom into dead blackness. So it seemed to eyes fresh from the light. But certain keen-eyed policemen there, whose voices sounded as if they saw in the dark, detected one or



THE LATE DUKE OF WELLINGTON.—FROM A MINIATURE BY SIR GEORGE HAYTER (SEE NEXT PAGE.)



MEDAL OF THE LATE DUKE OF WELLINGTON, BY PINCHES.—(SEE NEXT PAGE.)

allowed twenty or thirty or more men and women to rush or rather to be thrown vehemently forward by the unsolemn mob of people in crape and mourning behind. These in, he shouted "down with the barrier," and it was let down or forced down upon those who would not or could not remain upright, but who stooping, were crushed to the ground and were dragged through beneath by the constables within.

While they were thus hauling in the prostrate or half-suffocated from the western current, another officer, not in uniform, who, like the other, stood aloft, hanging to a pillar of timber, by one arm, and gesticulating with the other, shouted to his men who held the barrier against the current from the east to, "up more thieves. What became of the thieves, I know not; I only heard them detected.

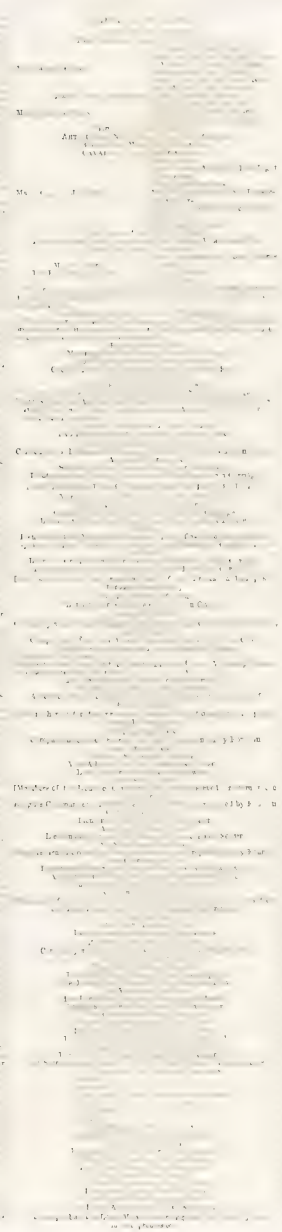
But now there was a glimmer of light ahead of the hot crowd seen as through a tunnel. And now men took off their hats, and the crowd moved slowly, black, and silent. The policemen who stood in dark recesses now spoke in subdued voices, if they spoke at all. As we advanced, we penetrated to a deeper solemnity, but there was more light. Darkness is not solemn with thieves, detectives, fainting women, and a stifling atmosphere around you. But on gaining the outer hall, lined with Life-Guardsmen in full-dress, resting on their swords, their white plumes, bright helmets, and scarlet uniform relieving the blackness of the draped walls—the glittering trophy overhead in centre of the aggregated ensigns of vanquished armies—silence all round—here the visitor for the first time that day felt that he was in a solemn presence, befitting the coffined Duke of Wellington. On ordinary occasions the visitor sees in the hall forty-six standards, and in the chapel fifty-five. Most of these are now before us: they include thirty-four old French, taken before the close of the war in 1762, in which the French lost Canada; thirteen American; four Dutch; and thirteen tricolors, with the eagle on each, indicating the period of Napoleon and Wellington. Of these, two came from Waterloo, two from Salamanca, four from the West Indies, two from Madrid, and one from Barossa.

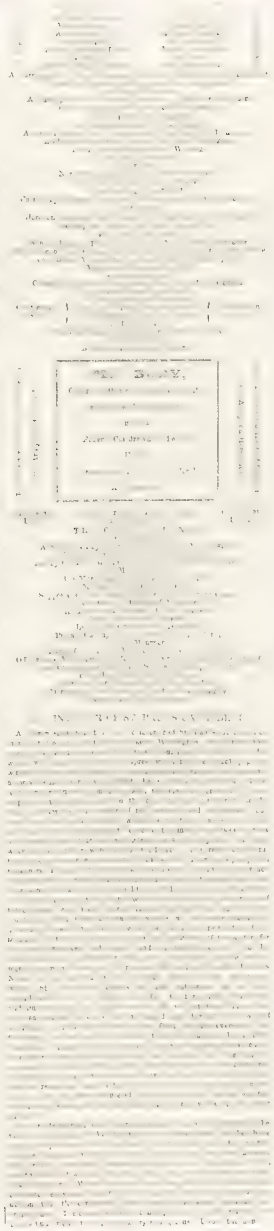
"Where is it?" this we all ask ourselves; yet, no voice is heard. Some words are spoken by a constable, low and soft, as if he stood by a death-bed, such as "Up the steps, if you please."

Softly we ascend the steps to the great hall, treading upon thick cloth, and matting that we may be noiseless. We can see hangings of black, crimson, and gold; the black relieved by silver lines and loops, with brilliant lights in the western distance; rows of grenadiers, two rigidly-drawn lines, at the hall, resting on their arms reversed (the muzzle of the musket pointing to the ground), the palms of their hands covered with white gloves, and the brass of their heavy and [illegible] are groups of candles several feet higher than the tallest of the men, all burning amid shadows of gloomy magnificence.

What have we seen like this before? Has it been the imitation of a grand solemnity in some theatre; or a still grander reality in a Christian temple? Are those low voices, which break the silence, and yet make you feel it to be the more profound, the mutering of religious ministers upon the altar at one of the most impressive of devotional services? No; this is like none of these. This has had no parallel. It is itself; the last tribute to Wellington. This has had no parallel. It is itself; the last tribute to Wellington. This has had no parallel. It is itself; the last tribute to Wellington

FUNERAL OF THE DUKE OF WELLINGTON IN ST. PAUL'S CATHEDRAL.—THE PROCESSION IN THE NAVE (SEE PRECEDING PAGE.)





St. Paul's—to repose by the side of the ashes of the hero of the Nile—a public opinion at once pronounced to be the most appropriate spot for the august remains of the great captain of the age; but it was generally felt that all conventional combinations would be inadequate to do justice to the departed warrior and statesman. The effect of the Internal arrangements of the Cathedral has been in accordance with the character of the "Duke"—simplicity has been combined with grandeur. The vast edifice, with the gigantic platforms covered with plain mourning draperies, and lighted up by the circular jets, had the most solemn and imposing aspect; in every way calculated to convey the double idea of death, and of the apotheosis. The eyes were not fatigued with any unnatural glare, the combustion was as touching as it was harmonious.

The dais of honour was the dome, fitting covering for the coffin of the soldier, before it descended to the last resting-place. The signification, the character, and the proportions of the decorations were austere, grand, and noble. Glitter and gold could have been ill adapted to the Christian spot, on which the most mighty of the nation, bent down, humiliating their grandeur before the Divine Majesty, and seeking for solace and pity for the acts of life, of which the corpses beneath the pavement were an image and a remembrance. The triumph of art has been attained by the design, that a quick comprehension or seizure of the general details impresses were immediately excited, and the eye had not to wander to seek for detachment. The past and the present were suggested at once by this precise simplicity, by the careful avoidance of the trivial, by this judicious abstinence from martial symbols. How fine was the contrast between the style of decoration in art and that adopted at the tawdry flittings-up of the Invalides for the reception of Napoleon's ashes in 1840! The proportions of the interior of St. Paul's seemed to have increased in vastness, by the darkened perspective of the funereal hangings, relieved by the brilliant mass of light. The edifice appeared magnified to meet its size. The glance from the extremity of the nave to the end of the choir will not easily be forgotten by those who entered the western door. Wren's masterpiece was never seen to greater advantage; and there could be but few regrets for the lighting up could not be rendered per ceptible when the draperies of the dais were all be removed. The nobility and majesty of the architecture under its aspect of mourning completely eclipsed all reminiscences of other edifices even if Charlemagne's sabres under the cupola of Aix la Chapelle, the catafalques of Florence, Naples, and Venice came for a moment across the mind. There was ample time to ponder on one's past experience, of grand spectacles, from the moment of the opening of the doors at half-past eight o'clock, instead of half-past ten, and the troops began to file off on each side of the entrances were soon forgotten in the excitement of expectation. Before nine o'clock the galleries at the western entrance, at the south and north sides of the nave, at the transepts, and at the dazzling erections raised for the procession, spaces apparent by ten o'clock, except those reserved for the procession, were filled with spectators, all dressed in deep mourning; but the *toilettes* and costumes of many of whom had been, in no small degree, disturbed by the conflict of the places, to which no index or guides had been provided. Many persons gave palpable signs of the rain of previous days, in their mud-besprinkled garments, before they could reach the interior. Shortly before nine o'clock the sun broke forth from murky clouds, and a beautiful sunbeam across the dome indicated that the weather had at last changed. The only event expected at the period was the procession reserved for the procession, to the cathedral, with the organ to the choir and those below the dais, which

THE LAST DREAM OF WELLINGTON.

DYING! leaving all his glory;
Dying! going from the world;
All his battle-armour rusty,
All his battle-flags upfurled.

Dying! eyes that mocked the eagle's
Glazing in eternal night:
This the eye that saw advantage
In the very wreck of fight?

This the thunder-bolt of battle,
Gasping for a little breath;
And the voice that roused all Europe
Muttering in the dream of death?

In a dream of death, repeating
This long life in one swift gleam,
From the follies of his boyhood
To the instant of the dream.

And there comes a flash like sunshine
On his brow and in his eye:
'Tis a memory of his manhood
From the burning Indian sky.

Backward, backward many a season;
Many a long long year away;
And the vortex of the battle
Whirls around him at Assaye.

Then he stands upon the summit
'Mid the Pyrenean snow,
While the sulphrous flush of battle
Comes up hotly from below.

And the eagle flies before him
As from first to last she flew,
Till he slays her in the sunset
At avenging Waterloo.

Now he starts, he hears the thunder
Of the shout and of the gun;
Hears the tread of thousands marching,
Measured as the tread of one.

Countless pass they in his dreaming,
Never stops that heavy tread—
Marching, marching on in myriads,
With a spectre at their head.

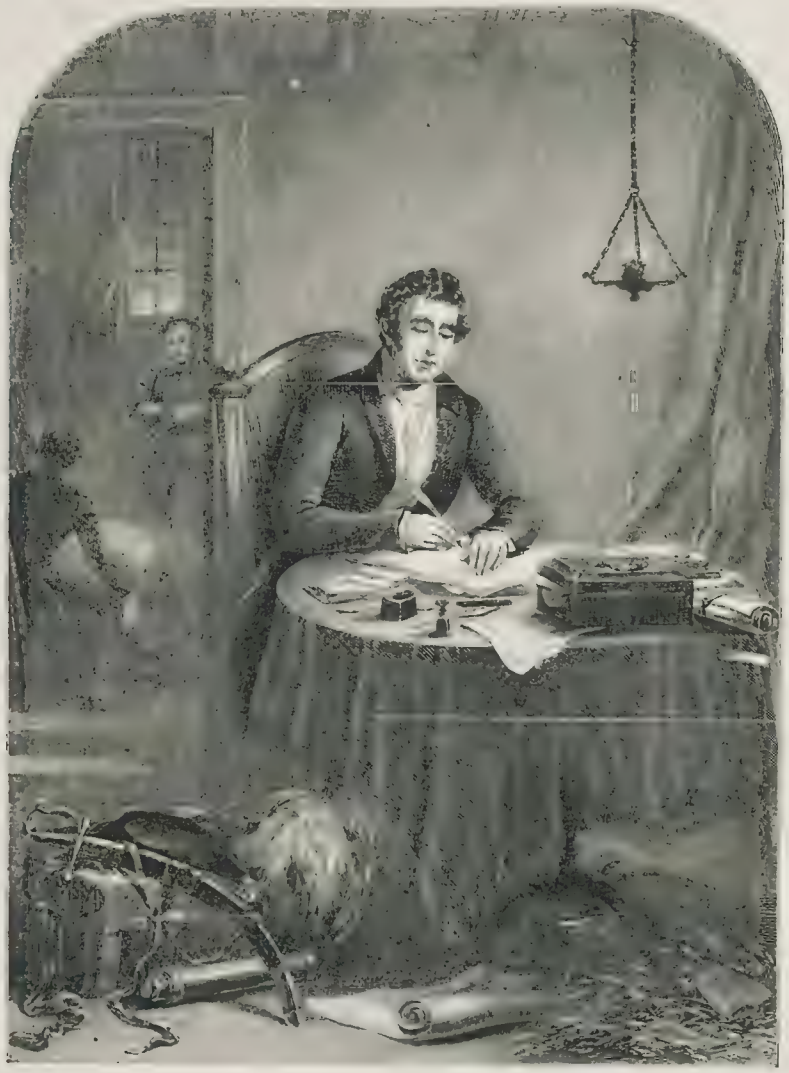
On its panoply of battle
Rust and mildew, mould'ring fall;
And it glides to martial music—
Gliding, girded in a pall!

Truncheon held in fleshless fingers;
War-plumes flapping on a skull:
Hush! the misty music ceases,
And the measured tread grows dull

And he sees his shadow vanish:
Then he knows that all is o'er,
Never shall he lead to battle—
Never be the victor, more.

And the present, and the future,
And the past, are all as one;
And a mighty life is over,
And a glorious race is run.

G. S.



"THE DUKE OF WELLINGTON WRITING THE DESPATCH AFTER THE BATTLE OF WATERLOO."
FROM A PICTURE BY THE COUNTESS OF WESTMORELAND.

THE DUKE OF WELLINGTON WRITING THE DESPATCH AFTER WATERLOO."

THE above beautiful picture of the Duke seated in his quarters writing the despatch of the victory of Waterloo, was painted some years ago, by the Countess of Westmoreland. It is full of poetic interest. The expression of the Duke—an exceedingly good likeness—is subdued by an appearance of stern melancholy and lassitude, the natural effect of reaction on the system, even of the "Iron Duke," after one of the hardest-fought battles in modern history. A mean lamp glimmers over head; the background represents the room where the remains of Sir Alexander Gordon are lying; the cold morning light just breaking in upon the solemn scene. This picture was engraved in mezzotint by Bromley, and dedicated to the Marquis of Wellesley.

One of the three letters written by the Duke *from the field* was a brief note, which having enumerated some of the fallen, ended thus emphatically:—"*I have escaped unhurt; the finger of Providence was on me.*" What the impulse was which dictated these extraordinary words, we leave to the opinion of those who read them. . . . When the dreadful fight was over, the Duke's feelings, so long kept at the highest tension, gave way, and, as he rode amid the groans of the wounded and the reeking carnage, and heard the rout of the vanquished and the shouts of the victors, fainter and fainter through the gloom of night, he wept, and soon after wrote the words just quoted from his letter.

Wellington.
Waterloo, June 19 1815

Again: "My heart," he feelingly writes, "is broken by the terrible loss I have sustained in my old friends and companions, and my poor soldiers. Believe me, nothing, excepting a battle lost, can be half so melancholy as a battle won: the bravery of my troops has hitherto saved me from the greater evil; but to win such a battle as this of Waterloo, at the expense of so many gallant friends, could only be termed a heavy misfortune, but for the result to the public."

PANORAMA OF THE BATTLE OF WATERLOO, LEICESTER SQUARE.

MR. BURFORD has very judiciously reproduced this excellent panorama, which he correctly describes as "the finest historical painting of the great event." It was painted, he states, from drawings taken on the field of Waterloo immediately after the battle, and completed under the inspection and authority of the field and other officers then at head-quarters at Paris. On the occasion of its previous exhibition, the Duke of Wellington, it is said, frequently visited this picture, and always testified to its accuracy. The panorama is taken from the plateau in the rear of the farm of La Haye Sainte—the scene of the fiercest contentions, and near the road to Genappe. In the hollow on the left the Duke of Wellington's tree appears; and behind the hedge, the formation of the 5th division. Towards the east, the prospect is bounded by the woods near Frischermont; and towards the right, by the chateau and small wood of Hougoumont, where the advanced post of the right centre of the British closely approximates the French line. The road to Nivelles from Brussels, Merke Braine, and Braine la Leude, are also conspicuous; as are also the opposite heights from right to left forming the position of the French army, with the house called La Belle Alliance. In the rear of the British is the village of Mont St. Jean. The harrowing details of the battle itself are, of course, not to be described, but witnessed. We regret that the canvas has in parts suffered damage, but the substantial merits of the pictures will command admiration, in spite of such accidental and inevitable drawbacks. As a tribute to the Duke of Wellington's memory, it will be warmly appreciated by the British public.

"THE ARMY AND THE NAVY."

MEETING OF LORD NELSON AND THE DUKE OF WELLINGTON (WHEN COLONEL WELLESLEY) AT THE HORSE GUARDS.—SURROUNDED BY THE "DUKE'S BORDER."

THE fraternity of the "Army and Navy," in the persons of the two greatest heroes of either service, has been commemorated by Mr. J. P. Knight, in a picture founded upon the recorded circumstance of the only occasion when Nelson met with the Duke, when Colonel Wellesley, at one of the Government offices, we believe the Horse Guards. The occasion was in short no other than that of Nelson coming to ask for the services of the rising soldier; and report states that the latter having been sent for, had, out of official jealousy, been kept some time kicking his heels in the ante-room, when Nelson came in; and mutual recognition taking place between them, the Admiral entered upon his business without waiting for formal introduction. The figures are represented standing; Nelson pointing to the map of the Mediterranean in further elucidation of the views he is propounding. This picture has been engraved in mezzotint by Reynolds. By permission of the artist, we present an Engraving of this fine work, carefully copied from the original picture.

It should be stated that Salter painted a very fine picture on the same subject, in which the heroes are represented seated at a table; and which was some years ago announced for publication by Mr. Moon; but Mr. Knight's picture being produced, as well as the engraving from it, subsequently to Mr. Moon's announcement, the intention of the latter was for the time abandoned. Having seen the picture, however, we can speak to its very high artistic merit, and would express a hope that the original purpose to which it was destined may be yet carried out.

Mr. Cunningham, in his "Handbook of London," gives the following version of this story, we believe, upon the authority of an article in the *Quarterly Review*, by Mr Croker:—"At the Colonial Office, in Downing-street, in a small ante-room on the right hand as you enter, the Duke of Wellington (then Sir Arthur Wellesley) and Lord Nelson, both waiting to see the Secretary of State, met—the only time in their lives, The Duke knew Nelson from the portraits of him; Lord Nelson did not

"THE ARMY AND THE NAVY."—MEETING OF LORD NELSON AND THE DUKE OF WELLINGTON (WHEN COLONEL WELLESLEY.) PAINTED BY J. P. KNIGHT. WITH "THE DUKE'S BORDER."

know the Duke, but was so struck with his conversation that he stepped out of the room to inquire who he was."

The border to the above Engraving calls for a few words of explanation, connected as it is with interesting associations. In our Supplement of last week, and the present, we have given some rather discursive notices of Portraits and Sketches of the Duke, in the course of which we necessarily touched on the subject of Prints—a branch of art of which the Duke was a great admirer, and in which he purchased largely. That he was, in the main, contented with works of this class, may be easily understood, considering the practical tendencies of his thought. Accordingly, in his own retreat of Stratfieldsay, he stored his shelves, and covered his very walls with prints, chiefly of historical subjects, and of events of his own time. We understand that there is scarcely a battle-scene of his own fighting, or of the Great Napoleon's, or of any of the Generals of either, nor a portrait of a distinguished brother in arms which is not to be found in this curiously-arranged collection. We say curiously-arranged, because it has been, indeed, arranged with the curious care of the gallant Duke himself, who had a method of his own in everything. Accordingly, we find that, whilst he valued his print-store for the facts they seemed to represent, so he would have them set forth as plainly as possible; but, above all things, upon a uniform plan. Two styles of framing only did his scheme admit of; the one a plain maple frame, flat on the surface, and very narrow, with the double view of saving room and material; the other a printed border, of a design of his own devising, which his printsellers, Messrs. Graves, have in consequence always kept a stock on hand. Some—the crack subjects—the Duke would order into the maple wood; for others the printed paper border was considered good enough, and so equipped they were ordered to do duty on the walls of Stratfieldsay. This love of order and uniformity was carried out with stern impartiality. His Grace's love of prints being well known, many presents of the kind were sent to him from abroad, from Princes, and from artists themselves; and generally these offerings came recommended, as was supposed, by frames of the most magnificent and expensive description. Short was their little day of glitter, however, after they had passed muster, and been received into "the service" of his Grace. The gaudy frames and trappings were at once ordered off, and cast away with the lumber, or became perquisites of the household: and then, after passing in review [illegible] the Duke promoted them to the "maple frame" or the "border" division, according to his estimation of their merits. Through the kindness of the Messrs. Graves, we have obtained a specimen of the "Duke's border," which, reduced one-half in width, we have caused to be placed round the above engraving.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

A company is forming in London for the establishment of a new line twice a week to New York and Canada.

The destruction of property in the late fire at Konigsberg is stated at 700 00 thalers, but the loss is nearly covered by the insurances.

Latest reports state the volcano of Mount Etna to be in a state of considerable activity.

The manifesto of the Count de Chambord has been circulated largely in Germany, Belgium, and France.

The 40th anniversary of the retreat of the French army from Moscow was celebrated with very unusual pomp there, on the 23rd October

On the 25th ult., a fire broke out at Constantinople (Galata), which consumed three hundred houses and did great damage.

The fourth and last balloon ascent for scientific objects for the present year took place from Kew Gardens last week.

At Frankfort the demonstrations made in honour of the anniversary of the death of Robert Blum were stopped by the police.

The total amount realised by the sales in the Encumbered Estates Court on Friday week was £64,150.

A meeting of American citizens resident in London was held last week, for the purpose of condoling with their Government upon the death of Daniel Webster.

In addition to becoming a patron of the Sailors' Home, at Portsmouth, Prince Albert liberally presented the institution with £50

Last week an old man, in Cornwall, discovered twenty-three spade guineas in an old chest of drawers which he had vainly offered for sale at 3s

At Guildhall, last Saturday, Alderman Lawrence was presented with a pair of white kid gloves, in consequence of there being no cases for trial before him.

A private soldier, quartered in the Isle of Wight, has given two lectures on "The Immortality of the Soul," to crowded audiences, at Ryde, during the past week.

The Marquis of Londonderry has sent a letter of congratulation to Abd-el-Kader, to do honour to the pressing invitation to visit him in England.

The Nile is falling rapidly. It has not risen within five feet of its usual elevation, and a short wheat crop generally over Egypt has resulted.

Dr. Birkbeck's widow has been offered a pension of £50 a year by Lord Derby, which, however, was declined.

The colliers of the district of Bolton have obtained an advance of wages, which will amount to 10 per cent, and, in some instances, to 25 per cent.

M. Roebuck will not be able to take his seat in Parliament before Christmas, on account of ill-health.

There was another high tide in the Thames on Sunday.

A mad elephant belonging to the King of Naples, last week was destroyed by the fumes of charcoal

The young chief Dhuleep Sing, ex-Maharajah of Lahore, has embraced Christianity.

The attorneys of Calcutta have formed an association amongst themselves for the purpose of getting up a law library worthy of their body.

The deliveries of tea in London last week were 611,075lb., being a slight increase over the previous week.

A bronze colossal statue of Christopher Columbus is to be erected in one of the squares of Madrid.

Captain Vaile, Commander of the ship *Barham*, testifies to having seen a sea-serpent, while on a voyage to Madras.

The *Cassel Gazette* states that the Prince Regent of Baden is about to marry an Austrian Princess.

The Count de Chambord will winter at Venice.

The Earl of Carlisle will deliver a course of lectures on the poet Gray, at the Sheffield Mechanics' Institute, this month.

The Irish Government has conferred upon Mr. James Martin, of Ross, the office of auditor of union accounts to the Poor-Law Board.

A meeting of 211 Conservative members of Parliament took place at Lord Derby's on Monday, for the purpose of hearing from his Lordship an explanation of his policy

On Saturday an iron-screw steamer, built for the African Mail Company, was launched at Pembroke.

At Adelaide, South Australia, affairs continue to improve rapidly, in consequence of the establishment of the Assay Office, and the making of gold bars a legal tender at the price of 71s per ounce.

A direct communication has just been established between Paris and Fontainebleau by means of the electric telegraph.

The *Severn*, on her homeward passage from the Brazils, narrowly escaped a total loss on the Amazon in consequence of the spontaneous ignition of one of Lipin's patent fire annihilators.

A most rigorous search is made at this time at Rome, by the authorities there, for copies of the Bible.

The Hon. Edward Everett, of Massachusetts, has been appointed to succeed Mr. Webster, as Secretary or State of the United States.

The cholera is still raging at Quebec.

On Monday, a Chelsea omnibus backed into a jeweller's shop on Ludgate-hill, and did considerable damage.

General Franklin Pierce, the Democratic candidate, has been elected President of the United States

A letter from Commander Lancaster appeared in Wednesday's *Times*, on behalf of Nelson's daughter.

The *Times* suggests that the sailors in our various ports should not take rum at service, but be entrusted as tea-tasters.

Mr. T. F. Meagher is to give a course of lectures in New York, on Ireland.

The old curfew bell at Sandwich, which has been rung daily since the time of William the Conqueror, is to be discontinued.

We are happy to state that the Marquis of Normanby's attack having passed off, his Lordship is progressing rapidly towards complete recovery.

Five proprietors' shares of one hundred guineas in the Theatre Royal, Drury-lane, were sold at the auction mart on Tuesday for seven guineas.

The *Pays*, French paper, has just been sold for 1,900,000f.

The line of electric telegraphs from Bâle to Strasburg has been commenced.

The French troops, nearly 4000, recently landed at Civita Vecchia disembarked in eight hours.

The *Duke of Wellington*, 131, screw steam-ship, is to be fitted out without delay

It is evident, from the contradictory reports in the Constantinople and Smyrna papers, that the insurrection of the Druses is a serious matter.

The Prince Jerome Bonaparte attained on Monday his 68th year.

The Belgian Senate is convoked for the 30th inst.

It is in contemplation to establish express-trains on the railways, so that despatches may reach Paris from Vienna, and vice versâ, in forty-eight hours.

The police of Munich has prohibited the wearing of the Hecker hats.

On Wednesday a man named Horler, living in Sun-street, was committed to Newgate for the murder of his wife

A sum of £312 has been collected in the diocese of Limerick, for the Newman Indemnity Fund.

There have been several heavy snow-storms in Scotland and the north of England, this week.

The first of the new auxiliary fleet of steamers belonging to the Cunard Company arrived from Liverpool, on Sunday.

It is said that an amalgamation will take place between the London and Brighton and the South Western Railways.

King Oscar remains in a dangerous condition.

Another land-slip on the Great Northern Railway took place, near Greatham, on Wednesday

The *Successor*, an East Indiaman, has recently been lost in the Madras Roads. Sixty-four persons were drowned.

M. Guillon Barrot arrived at Genoa from Naples on the 10th inst.

CHESS.

TO CORRESPONDENTS.

C and D. It is a drawn game

D W S. I regret that a set of pawns in the game between Anderssen and Dufresne will not assist you in your solution of No. 2. The great remark named discovered the key at once, but our correspondent, who has favoured us with many valuable contributions, has failed to do so. Will he favour us with Q R 6th, or, of course, with Q to the 2nd?

A. A. D. will find forwards and Others—The line of play suggested would infallibly lose instead of win, as the pawn on White's 2nd square would then queen and win the game.

S W. Stockton. Your solution is correct.

A Young Beginner. Your solution of the problem in question; we have no means of referring to it.

L. North Brunswick-street, Bristol. We shall be happy to receive any specimens of your skill at any time, but if you wish for an answer the sooner you favour us with your solutions the better.

Alpha and Omega (Cheltenham). Your solution of No. 459 is correct.

Chess Problem Prize. Should no more solutions of the three prize problems be received on the 30th inst., Jasper's Chess-men, King William-street, Charing-cross, will forward a prize of Staunton's Chess-men, or the elegant leather reading-board of the same, to the first correct solver of the three problems.

A List of Solutions received from Alpha and Omega, Jack of Shrewsbury, T R B of Manchester, T A of Carlton, Nottingham, and Stella, J H of Bath (whose name is illegible), Bristol, Bruno, Alpha, and Jane, who will find C D Purchase's 4th correct, Clyde, E K of Kaldy, Nox, Rugby-boy, A German Nora, Hyde, and Neophyte, are correct. All others are wrong.

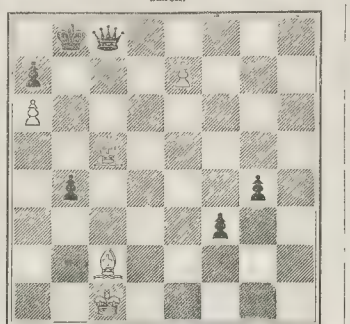
PROBLEM No. 460.

By the Rev H. Bolton. A master-piece of Chess strategy.

BLACK.



WHITE.

White to play, and give mate in seven moves.

MATCH BETWEEN MESSRS. HARRWITZ AND WILLIAMS.

Since our notice of last week, the contest has advanced but little. Two more games, to be sure, have been played; but, as both were drawn, we are no nearer the termination than we were ten days ago.

Harrwitz	3	Drawn	3
Williams	6		

NATIONAL SPORTS.

Steeple-chasing, or, should the present weather continue, racing through water for many of the "lions" are so dead—will be confined to Aberystwith on Tuesday, Shrewsbury on Wednesday, and Sutton on Thursday. As far as we can judge from the programme, the sport is likely to be up to the average. The following are the coursing fixtures:—Monday, Ashcombe (Epsom); Tuesday, Hornby Park, Cottenmore, Stamford, and Barton-on-Humber; and Thursday, Bicaxpool.

WARWICK AND LEAMINGTON NOVEMBER MEETING.—TUESDAY.

Sweepstakes of 5 sovs. each, with 20 added.—Henrietta (G. Oates), 1. Plunkett (Carroll), 2.

Great Warwick Handicap.—Aidoto (Flatman), 1. Lundrick (Waddington), 2.

Leamington Welter Cup.—Sister to Battersway (D. Wynne), 1. Half and-Half (Davenport), 2.

Sweepstakes of 3 sovs, with 20 added.—Telescope (Knott), 1. Bordeaux (Flatman), 2.

Scurry Handicap.—Maria Bennett (Weaver), 1. Lady Speedy (Riley), 2.

WEDNESDAY.

Free Handicap Steeple-chase.—Frank (W Troen), 1. Iodine (D Wynne) 2

Grand Open Steeple-chase.—Maurice Daley (C. Boyce), 1. The Reiver (R. James), 2.

Hunt Cup Steeple-chase.—Victress (S. Darling), 1. Trust-me-not (Mr. Goodman), 2.

Match; £50.—Mignionette (Captain Rowley), 1. Flytrap (Mr. Stewart), 2.

Free Handicap Hurdle Race.—Oldham (W. H. Troen), 1. Tumboy (Tasker), 2.

COWBRIDGE HUNT RACES.

Cowbridge Annual Steeple Chase.—Sundry, 1. Physician, 2.

Hunt Steeple-chase Stakes. Mr. Briggs, 1. Gipsy Lass, 2.

LAW AND POLICE INTELLIGENCE.

On Saturday last, Mr. J. Inglis, the Lord Advocate for Scotland, was elected, by the Faculty of Advocates, Dean, in the place of Mr. John Hope, now a Lord of the Session.

Runaway Bankrupts.—On Monday, at the Court of Bankruptcy, out of a list of only five cases, two of the bankrupts had absconded, to Ostend. One of them was under liabilities to the extent of about £5,000; the other was partner in a firm, the debts of which were £8000. Cases of absconding bank agts have been of more frequent occurrence within the last three months than during any similar period for the last twenty years.

The Can Cases.—On Monday, Mr. A'Beckett gave his decision in these cases, which have been adjourned for some time, at the request of the Brighton Railway Company. The defendants were fined Mr. A'Beckett deciding that, at a railway terminus, as well as in a street, it is obligatory on the first arm

Revolting Cruelty.—On Tuesday, Mr. William King, residing at Amber-street, Purley-road, and who holds a situation at the warehouse of Mr. Owen, New Bond-street, attended before Mr. Broughton, by virtue of a summons which had been obtained against him by Mr. Henry Thomas, secretary to the society for the Prevention of Cruelty to Animals, for ill-treating and torturing a cat by roasting it alive. After sufficient evidence had been heard, Mr. Broughton committed Mr. King to the House of Correction for one month.

A breakfast was given on Wednesday to the members of the Colonial and International Courts Association, at the house of the society in Arundel-street, Adelphi; Lord Granville the president, in the chair.

The Dean and Chapter of Hereford have subscribed £10 towards the establishment at Hereford of an elementary drawing-school, in connection with the Department of Science and Art.

The Pope has charged M. Jacometti, the sculptor, with the execution of the fine group of Daniel in the Lion's Den, in marble. It is to adorn the vestibule of the Christian Museum, now organising in the Palace of Lateran.

The estate of the late Mr. Thomas Rouse, formerly proprietor of the Greenland Dock, has been valued for sale by auction at £220,000.

An Englishwoman has been among the first to prove the efficiency of the electric telegraph so recently introduced into Switzerland. At the moment the Federal Council were discussing some rules for the transmission of despatches by the new agency, a lady, who had a relative in the room, wrote a few words on a piece of paper, and requested that they might be forwarded to the person addressed. The message was sent, and the answer returned in a few minutes, to the great astonishment of the Council, who had not been informed of the experiment.

During the night of the 26th ult., there was such a tremendous hurricane at Athens, that one of the columns of the temple of Jupiter Olympus was thrown down

MUSIC.

LONDON SACRED HARMONIC SOCIETY.

The fifth season was commenced last Monday night, Exeter Hall being well filled in every part. The Rev. B. S. Plinch is the president; the vice-presidents are the Rev. O. F. Owen and the Rev. R. Sale; and the hon. secretary is the Rev. W. Stunt of Austin. These names are a guarantee that the society has the support of the religious amateurs. The musical executive remains under the direction of Mr. Surman, who for so many years was the conductor of the Sacred Harmonic Society. Mr. H. Blagrove is the leader of the band, and Mr. T. Jolley is the organist. There was an effective performance of "The Messiah," the principal singers being Miss Birch, Miss Williams, Miss A. Stewart, Miss C. Henderson, Messrs. Lockey and Lawler. Prior to Handel's oratorio, a tribute of respect to the memory of the late Duke of Wellington was paid, by the execution of a selection from the anthem of Handel, "How are the mighty fallen," which was composed in 1737 for the funeral of Queen Caroline, the consort of George II. The anthem was preceded by the Dead March in "Saul." The anthem itself is a composition of striking grandeur and intense pathos. Simple as are the materials employed by the master-mind, the orchestration being confined almost exclusively to the stringed instruments, with which are interwingled the wailing notes of the oboe, nothing can be more solemn and imposing than the effect produced by the mournful strains. In the chorus, "The Ways of Zion do Mourn," the vocal passages are like the broken sobs of a multitude in lamentation; and the lovely quartett, "When the ear heard him," so artistically rendered by Miss Birch, Miss Williams, Mr. Lockey, and Mr. Lawler, is no less affecting. The anthem produced a marked sensation on the auditory. The next performance of the society will be Mendelssohn's "Elijah," on the 23d of December.

Sacred Harmonic Society.—Performances took place on Wednesday and Thursday evenings, under Mr. Costa's direction. The programmes included Handel's Dead March in "Saul," and Anthem, "His body is buried in peace;" Spohr's "Blest are the departed," from the "Last Judgment;" Mendelssohn's "Christus," and selections from "Paul" and "Elijah." The vocalists were Mrs. Endersohn, Miss Williams; Messrs Lockey, H. Barnby, and Phillips.

Mr. Forbes' Subscription Concerts, St. John's Wood.—Mr. Forbes, the pianist and composer, commenced on Tuesday a series of subscription concerts, assisted by M. Sainton, the violinist; Mr. J. B. Chatterton, the harpist; Regondi, the concertinist, Miss Birch, Miss Williams, Mr. Lockey, and Mr. Bodda. Gleanings from the works of Beethoven, Mozart Weber, Spohr, Rossini, Curschman, Herz, Stigelli, Hobbs, Giardini, De Beriot, Osborne, S. Bennett, Waley, J. B. Chatterton, &c., were performed. The second concert will be on the 30th, at which Miss Kate Loder, the pianist, Miss Dolby, Miss Read, Mr. Blagrove, Mdme. Herrman, Miss Birch, Signor Nappa, &c., are engaged.

Pollock, the Welsh Harpist.—In answer to some inquiries respecting the admission of the youth to the Royal Academy of Music, we have great pleasure in stating that there is every prospect of the necessary amount being raised for the purpose. In addition to the subscriptions of Lord Ranelagh, Lord Alfred Churchill, Sir Charles and Lady Morgan, and Mr. C. L. Gruneisen, we have to add contributions of a guinea each from Madame Fiorentini, of Her Majesty's Theatre, Mr. John Parry, and Mr. Brinley Richards, the pianist and composer. In addition to this kind aid, Mr. J. B. Chatterton, the harpist to her Majesty, has very generously offered to give gratuitous instruction to the harpist of Wales. The Earl of Westmoreland, the chairman of the committee of management, who has arrived in town from Vienna, to attend the funeral of his illustrious relative, the late Duke of Wellington: Sir George Clerk, who is the chairman in the noble Earl's absence; and the Rev. Mr. Casalet, the superintendent, have also kindly interested themselves in facilitating Mr. Pollock's entrance into the academy. It will, therefore, only require the co-operation of the amateurs in Wales to rescue a most promising talent from obscurity.

THE THEATRES

LYCEUM.

A new farce, in two acts, entitled "Those dear Blacks," was produced on Wednesday. As the title imparts, it bears some reference to "Uncle Tom's Cabin," and seems intended to illustrate the difficulty of raising the social position of the black in civilised life. The scene is laid on the Chain Pier, at Brighton, and is occupied with the love-adventures of *Mr. Frank Featherridge* (Mr. C. Mathews), who passes for a man of fortune, with only ninepence in his pocket, exspence of which is expended to recover his mistress's bracelet, accidentally dropped into the sea. Here he is identified by an attorney, as a penniless adventurer, and rejected by the lady's father. But *Adonis Lilywhite* (Mr. Suter), an emancipated negro, and inheritor of his master's fortune, comes unexpectedly to his aid; and prevents the despairing swain from throwing himself over the pier. Ultimately, he consents to become the servant of the black man; and the second act exhibits him as trying in vain his new duties. Massa, however, has to do all the work for himself, and *Frank* manages to do nothing. The incidents are merely extravagant and improbable; but an end is put to them by the discovery of the will by which *Lilywhite* takes the estate, which is found to belong to *Frank*, the testator being his uncle, and the next issue, though previously advertised for without result, existing in his own person. Both Mr. Mathews and Mr. Suter acted their parts with spirit, and the fun was at times exciting; but the general theme of the piece did not appear altogether pleasing, and the applause at the conclusion was not entirely unmixed.

PRINCESS'.

An elegant monody on the Duke of Wellington, written by Mr. W. Marston, was finely delivered by Mrs. Charles Kean, attired as the tragic muse, on Thursday evening, after the drama of "Anne Blake." The bust of the Great Duke on a pedestal appropriately illustrated the poem, which was, in heroic verse, full of elegiac poetic, always terse in expression, and frequently eloquent in diction. The house was fully and continuously attended. The monody was listened to with profound attention, and the applause at the conclusion was universal, but chastened by reverence. Mrs. Kean was obviously affected with emotion, produced by the touching tribute to the hero's memory, which she had been thus called upon to interpret.

THE LATE DUKE OF WELLINGTON.—A SINGULAR WORK OF ART.—

M. Touche, of 18, Arthur-street, Golden-square, has submitted to our notice a very singular work of art, in the form of a drawing copied from Sir Thomas Lawrence's portrait of the Duke of Wellington, published in the Illustrated London News of the 4th of September. The ingenuity and originality of the work consists in including in the drawing itself the whole life of the Duke as it appeared in our Wellington Supplement of that day. In a word, the twenty-seven columns, entitled "Memoir of the Civil and Military Career of the Duke of Wellington," are all contained in this drawing; but the best sight cannot read the words, although they may be distinguished easily by means of a powerful microscope. This extraordinary work was performed with a metallic pen, by the naked eye.

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.—Monday.

Lord DERBY proposed a resolution of the House in reply to her Majesty's message respecting the Duke of Wellington's funeral, expressing their satisfaction at the measures adopted for the interment of the illustrious Duke (the details of which will be found in this week's Wellington Supplement).

Some other business was despatched, and their Lordships adjourned.

HOUSE OF COMMONS.—Monday.

In the House of Commons, on the motion of Mr. WALPOLE, leave was given to bring in a bill, or declaring that the day appointed for the funeral of the late Duke of Wellington shall, as regards the payment of bills of exchange and promissory notes, be treated as considered as the Lord's Day, in the cities of London and Westminster. The bill was brought in, and passed all its stages.

The CHANCELLOR of the EXCHEQUER, in moving an address to her Majesty, in return to her Majesty's message on the subject of the funeral obsequies of the late Duke of Wellington, pronounced a panegyric upon him (which will be found in the Supplement published with the present Number).

Mr. ROEBUCK moved that, in the present session, no business be proceeded with in the House after midnight; and that at twelve o'clock the Speaker do adjourn the House without putting any question.

The motion was seconded by Mr. Ewart, and supported by Mr. Williams; and on, and by Mr. W. Clay and the Chancellor of the Exchequer, who observed that the [illegible] the amount of time at the disposal of the House for pub is business, and if would, practically, impose a restriction upon [illegible]

Mr. [illegible] the motion; which was opposed by Lord J. Russell and Sir [illegible]

On the motion the motion was negatived by 260 against 64.

Hobhouse, after some preliminary remarks, moved the re-appointment of the Select Committee on East India affairs, [illegible] the name of the member who [illegible] on the new sold to be added to the list of the committee who had ceased to be members of the House—namely, Mr. Macaulay, Mr. Elliot, Lord Stanley, Sir R. Clive, and Lord Palmerston.

After a few observations from Mr. Hume and Mr. Macgregor, the motion was agreed to.

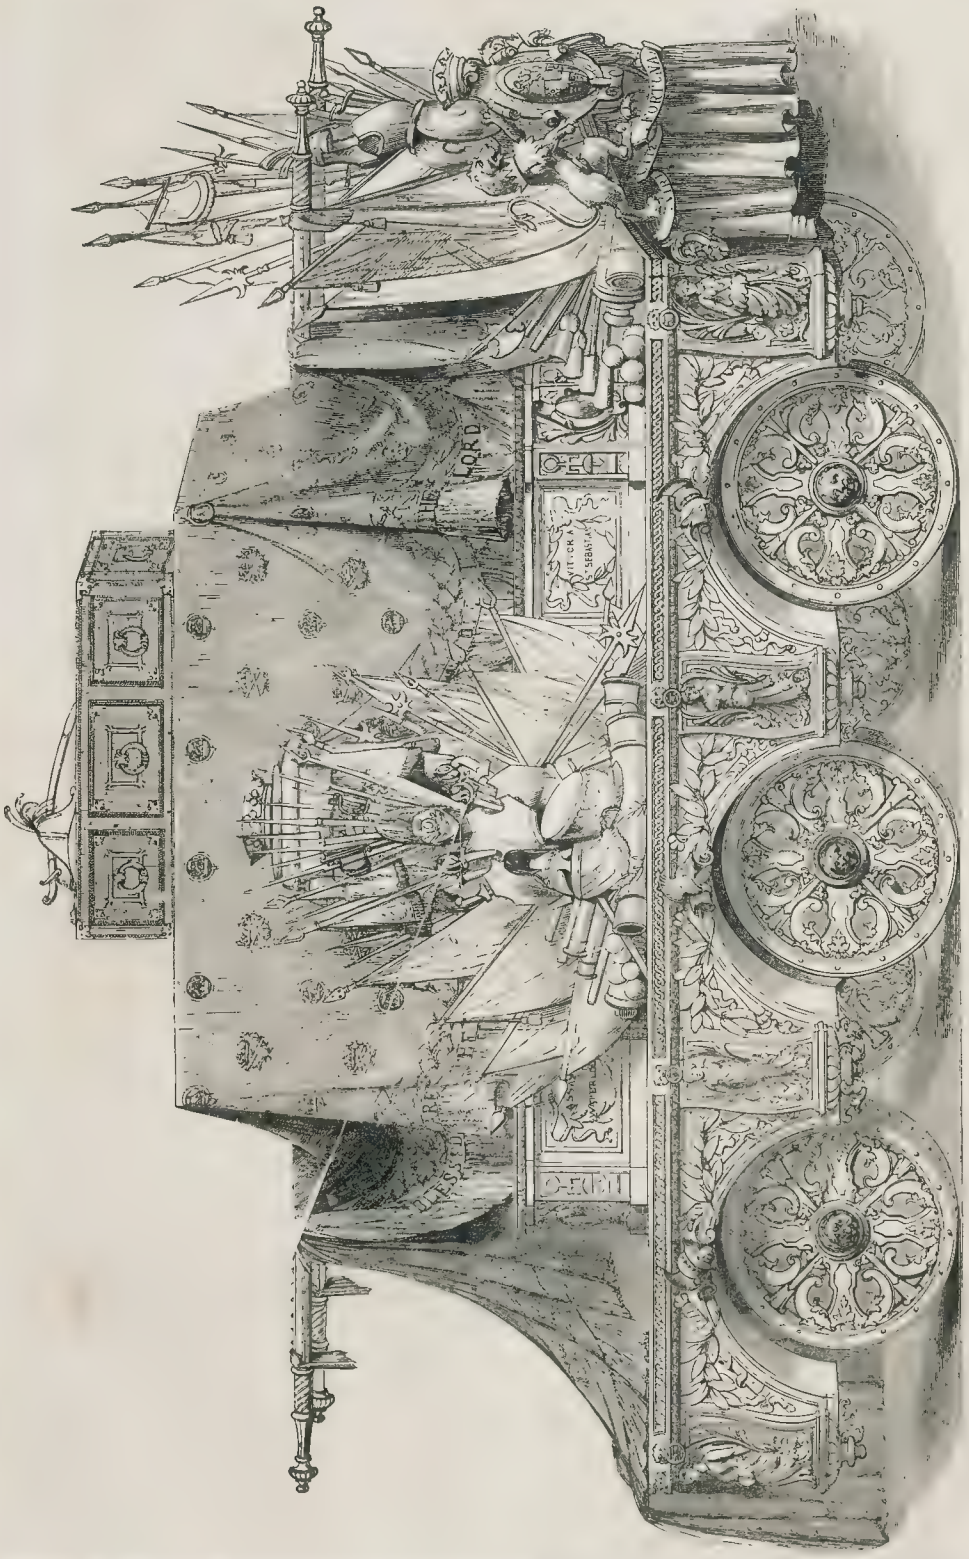
On the motion of Mr. Baines, the Select Committee appointed last session to inquire into the Treatment of Criminal and Destitute Juvenile was re-appointed.

The House adjourned at seven o'clock.

HOUSE OF LORDS.—Tuesday.

The Lord Chancellor [illegible] a number of [illegible] bills.

Lord Lyndhurst [illegible] proceeded to state what [illegible] had taken place [illegible] to carry into [illegible] the bills passed [illegible] Court of Chancery, and other matters connected [illegible] and the measures which the Government proposed on the subject. He [illegible] generally. The bills already passed were three in number, as [illegible] Court of Chancery. The first was for abolishing [illegible] Master, and for [illegible] a new system, called a [illegible] system. The [illegible] matters which, up to that time, had been prosecuted by [illegible] their own chambers. The next bill was for "the improvement of the jurisdiction of equity," and the third bill was "The Suitors in Equity Relief Act," which certainly had afforded great relief in the reduction of salaries, and the abolition of what appeared to be useless and unnecessary offices. They were now in full operation, and he believed that they would have the effect of making the Court of Chancery no longer proverbial [illegible] without any undue haste—which of all things was to be deprecated—he believed that questions of property to the value of [illegible] hundred thousand pounds would be decided more rapidly in the Court of Chancery than in any other court in the country. It had often happened that sixteen or seventeen years after a decree of the Court of Chancery persons came and appealed to their Lordships' House. This evil had been remedied, and five years was now the longest limit allowed. As for the bill for the relief of suitors, its effect would be to save the suitor a vast expense, and leave him as well secured as at present. His Lordship then proceeded to describe the nature of the two funds out of which the costs of the administration of justice were paid, and the means pro osed at first further to reduce those costs. An other small bill was connected with the subject of the Masters Extraordinary in Chancery. He proposed to have a registry for transacting their business, and to sweep away the fees now charged by these gentlemen. With regard to [illegible] at present on [illegible] of court had jurisdiction in one place, and another in another, and the utmost confusion prevailed. He proposed an extended investigation into the working of these courts, and the establishment of one supreme court of jurisdiction in equity, and the other authorities over lunatics, the act called Lord Shaftesbury's [illegible] and eleven commissioners, whose duty it was to look after the affairs of the [illegible]. In the course of June the existing acts had been found to require several amendments, which were now in progress; and he saw reason to believe that every object which had hitherto impaired the working of the commissions would be removed. A other small bill which he should introduce was [illegible] [illegible] [illegible]



THE DUKE OF WELLINGTON'S FUNERAL CAR.—(SEE PRECEDING PAGE.)
(DRAWN ON THE WOOD, AT THE SCHOOL OF DESIGN, MARLBOROUGH HOUSE.)

London: Printed and Published at the Office, 198, Strand, in the Parish of St. Clement Danes, in the County of Middlesex, by William Little, 198, Strand, aforesaid.—Saturday, November 20, 1852.

WELLINGTON SUPPLEMENT TO THE ILLUSTRATED LONDON NEWS.

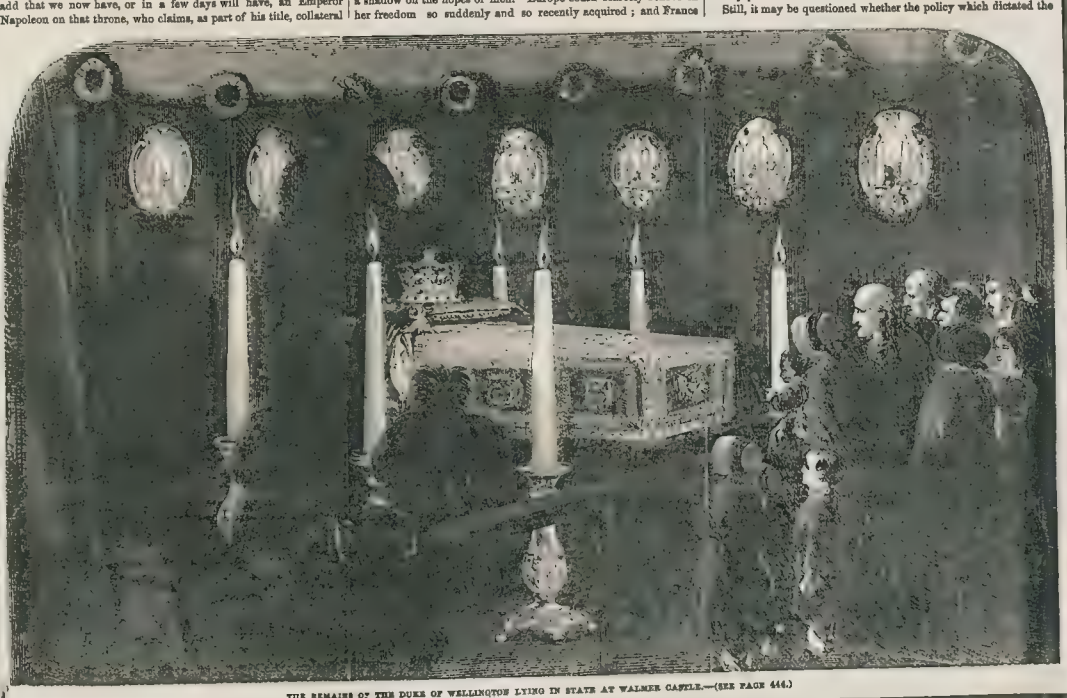
No. 592.—VOL. XXI.] SATURDAY, NOVEMBER 20, 1852. [TWO NUMBERS, 1s.

THE DUKE,
AND THE SETTLEMENT OF EUROPE.

By those who read the history of Europe for the last forty years, only to draw the conclusion from it—when they compare it with, and judge it by, the light of the events now happening, or about to happen, in France—that Waterloo was fought in vain, it is alleged, with considerable force of argument, that the Treaty of Vienna was personal as well as territorial; that its purpose was not only to abrogate Napoleonism as a system, but also Napoleonism as a dynasty; that it expressly stipulated that no member of the family of Napoleon should ever occupy the throne of France. They add that we now have, or in a few days will have, an Emperor Napoleon on that throne, who claims, as part of his title, collateral descent and heirship, as well as the designated choice of the founder of the dynasty. Was it not, they say, Wellington's great work to destroy Napoleonism? and can Napoleonism be said to be destroyed when its living representative reigns supreme in France, alike on his Imperial claims and by the vote of the people?

This line of argument has been skilfully used by alarmists, here and elsewhere, to arouse against the French people and their ruler the old spirit of the days of the coalitions. Yet should we always be wary, especially in politics, that we do not let escape the substance in our tenacity of the form. Time dwarfs all things and all reputations, even a Napoleon and the terrors of his name. When the settlement of 1815 was made, the dreaded name of Napoleon yet cast a shadow on the hopes of men. Europe could scarcely believe in her freedom so suddenly and so recently acquired; and France had but just shown a sense that she had exchanged a "glorious" slavery for an ignoble servitude. But a little time had passed since "the eagle" of the Emperor had flown in a few hours from an outpost to the capital. Fame, in heralding his coming, had emulated the modern wonders of the electric wire. True, he was caged, but the very severity of his captivity attested the doubts of his captors. The events of the last few years, the fetish-worship of the ignorant peasantry, the electoral urn filled as by some occult influence with millions of votes bearing the magical inscription "Napoleon," singularly justify the fears or the foresight of those who drew up the Treaty of Vienna. A name was then a reality, as now; and hence the necessity of guarding against the extraordinary power of that name.

Still, it may be questioned whether the policy which dictated the



THE REMAINS OF THE DUKE OF WELLINGTON LYING IN STATE AT WALMER CASTLE.—(SEE PAGE 444.)

forced exclusion of any particular dynasty from the throne of France—as far, at least, as foreign Sovereigns could exclude it—was a wise one. We must remember that, by the same decision which excluded Bonaparte and his family, Louis XVIII. was restored. Certainly, the Sovereigns who attended the Congress of Vienna did not contemplate that, within fifteen years of the date of the treaty, the dynasty they had chosen for France would be ignominiously expelled; or that, within eighteen years further on, the junior branch, which then replaced the elder, would, in its turn, be driven from the throne. Nor, in the universal exultation which followed the downfal of Bonaparte, would the proposal have been admitted, that the majority of the Sovereigns attending the Congress would have found themselves forced to abandon their self-assumed right of dictation to France, and to acknowledge rulers, whether Kings, Dictators, or Presidents, chosen by the French people themselves. It was the Duke of Wellington who set the example of acknowledging the dynasty of the House of Orleans; thus far abrogating the principle on which the Congress of Vienna had assumed the right to exclude the Bonaparte family. Although, too, the Belgian kingdom was the creation of Lord Palmerston's diplomacy, the Duke of Wellington (that is to say, the Ministry of which he formed a part) seized the earliest occasion to acknowledge the *status quo*. In addition to this, we must remember that it is now a principle of European diplomacy to acknowledge the *de facto* Government of any state; and, that principle once admitted, it is difficult to say in what respect it is possible to put it on it a limitation. Whether the French nation choose to call their ruler for the time being King, Emperor, Dictator, President, it matters little to those who are prepared to apply this new and salutary principle; nor, after that principle has been admitted, is it very easy to sustain that provision of the Treaty of Vienna which excludes the Bonaparte "dynasty" from France. The mere fact that, after seven and thirty years, a Bonaparte—the Bonaparte designated by the Emperor Napoleon—is about to mount the throne of France (it matters not by what means, since diplomatists a nation quiescent must always be a nation acquiescent) is itself tantamount to a proof that the provision in question is obsolete.

It is obvious that the great work brought to so triumphant a close by Wellington in 1815, would be all destroyed if the fact of Louis Bonaparte being made Emperor of the French were enough to annul the treaty of Vienna, and the settlement on which it is based. Then there remains no alternative but to separate the essential from the non-essential part of that treaty, and to insist on its territorial provisions, while discarding the personal. Were the Duke of Wellington alive at the present hour, and consulted as to his opinion—we might even say his wishes—all experience of his past career goes to show that he would hold fast by the real, and discard the sentimental. The same sound sense that induced him to acknowledge Louis Philippe would lead him to discharge a still less agreeable duty with regard to his successor. But he would never lose sight of the great duty of European Sovereigns, that of maintaining the territorial limits settled in 1815.

In another point of view we are entitled to say that the great settlement of Europe effected by the Duke of Wellington remains untouched in its material part. Is there not, has there not been for many years past, an absolute accord between the European Sovereigns on the great principle of international morality? Would not the slightest attempt by Louis Napoleon to break down the barriers of that morality be instantly visited with punishment and repression by a combination of the crowned heads? Yet, on the other hand, would it have been possible to form a coalition of those Monarchs for the purpose of crushing the last revolution, or now of restoring the Bourbons? Assuredly not. England at least would [illegible] aloof; and other States would have clung round her in fear of so pernicious an example. It is impossible then to say that the work of 1815 is destroyed or undone, when we find a great principle of morality in active operation for the government of States, which up to that era—at least for nearly a century—had been set at defiance, and by none more flagrantly than by the uncle of the present ruler of the French nation.

The service, the inestimable service, then, that Wellington rendered to mankind, still endures, and will, we have no doubt, long endure, to hallow his name. He found Europe groaning under a desolating despotism; but he very early discovered that it was quite hollow, that a vigorous application of arms, in obedience to the highest laws of morality, would, in time, strike that tyrant to the ground. He raised up states that had been crushed by an unprincipled oppressor, and he then devoted himself to the establishment of securities or guarantees against the renewal of the oppression that he overthrew. This, even more than his victories, constitutes the glory of his great career. Other great generals have been illustrious in war, but none have so successfully laid the foundations of peace. Even in his very manner of winning battles and of conducting a campaign, he inaugurated the new era. Long before his own countrymen, and less Europe at large, believed either in him or his system. If he had reason to wish himself rid of meddling patriots and undisciplined troops in the Peninsula the want of their aid was more than compensated for in the enthusiasm of the peasantry and the people. And how was that enthusiasm excited? By patriotism alone? No; chiefly by the high character Wellington had obtained for his army, in respect of its honesty and its humanity. Thus, even at the outset, he was opposing morality to wickedness and rapacity; thus he was fostering the germ which was afterwards to develop into that durable policy of justice which was at a future day to spread over Europe its protecting shield. And let us not overlook this other fact—that the example thus set, and its brilliant results, did in fact renovate the political policy of [illegible] the civilized world. It rescued the nations from the dominion of a fatalism born of awe and despair. It was as the vulnerable point in the heel of Achilles, that prompted courage against all odds. But for that calm, steadfast, adamantine mind far away there in the South-West, and but for what he did, would the nations of the East, or the North, and of the North-East, have felt the presentiment of coming deliverance? Wellington it was who awakened once more the moral perceptions of mankind, and aroused them to a remembrance that there were influences in the world more potent than brute force. Was this a slight service to render to mankind? Was it not a service in its very nature lasting? Has it not, in dreary years of pining patriotism, even in later days, encouraged hope in the midst of despair? He made it clear to the world that tyranny even the most gigantic and power beyond calculation, could not subsist against the aroused moral instincts of mankind. And this great truth sank deep into the hearts of men—even of those who could not span the proportions of Wellington's mind, or admire, perchance, the name of their benefactor.

PARLIAMENTARY EULOGIES ON THE DUKE OF WELLINGTON.

THE HOUSE OF LORDS.

It was not to be supposed that the British Parliament, so rich in orators, would meet without seizing the earliest occasion to record the grief of the Duke of Wellington's colleagues in legislation and statesmanship at his departure from the scene of his senatorial labours. Accordingly, we find that the formal business consequent on the Speech from the Throne had scarcely been disposed of in the House of Lords (in the course of which Lord Donoughmore spoke ably and feelingly of the Duke of Wellington), when the Nestor of the assembly rose to pay his tribute of regret and admiration to the memory of the illustrious deceased.

THE MARQUIS OF LANSDOWNE'S TRIBUTE.

The Marquis of Lansdowne, whose political life has extended over half a century, and in whose living memory is written the history of those great achievements which most of us can only contemplate in the [illegible] took precedence in the discharge of this solemn [illegible] and venerable position than by his actual re[illegible] speak from a personal knowledge of many events in the career of the illustrious [illegible] which even to the oldest Peers around him were only matters of [illegible] and there was also something of dramatic unity in his [illegible] tied upon to pay the last tribute of parliamentary respect to the [illegible] of Wellington, as, forty-seven years before, he had been selected by the Ministry of the day, of whom he formed a part, to do public honour to that of Nelson. The noble Marquis thus expressed himself:—

I, perhaps, have some claim, as an individual, to [illegible] this duty. (Hear, hear.) not merely because, [illegible] that I entertained for the noble Duke when we knew each other—who is to the country and lost to the world—not merely because without any politics in [illegible] with the noble Duke he was done up to the honour at this to consider me as his friend; and on the very last occasion on which he addressed this House, he did [illegible] names as ours, perhaps.

[illegible] but noble Duke's military and P[illegible] I stand in somewhat of a peculia[illegible] this subject, because it [illegible] to do now the honour of addressing you, some 47 years ago[illegible] was per[illegible] [illegible] around him were only mi[illegible] and there was also something of dramatic unity in his [illegible] tied upon to pay the last tribute of parliamentary respect to the [illegible] of Wellington, as, forty-seven years before, he had been selected by the Ministry of the day, of whom he formed a part, to do public honour to that of Nelson. The noble Marquis thus expressed himself:—

I, perhaps, have some claim, as an individual, to [illegible] this duty. (Hear, hear.) not merely because, [illegible] that I entertained for the noble Duke when we knew each other—who is to the country and lost to the world—not merely because without any politics in [illegible] with the noble Duke he was done up to the honour at this to consider me as his friend; and on the very last occasion on which he addressed this House, he did [illegible] names as ours, perhaps.

[illegible] but noble Duke's military and P[illegible] I stand in somewhat of a peculia[illegible] this subject, because it [illegible] to do now the honour of addressing you, some 47 years ago[illegible] was per[illegible] [illegible] [illegible] [

dies non; and that all bills falling due on that day should be presented and payable on Wednesday, but that if they were paid before two o'clock on Friday the parties should be subjected to no notarial charges arising from the delay.

The bill was then read a first time, and ordered to be read a second time on the following day; the standing orders being dispensed with for the purpose.

The Earl of DERBY then again rose and said: "I have now to ask your Lordships to agree to an address to her Majesty, in pursuance of which I am sure that it is quite unnecessary for me to say a single word, because I am convinced that it will meet with the universal concurrence of your Lordships. And if I had not been convinced of this before, the language of general eulogy which I heard a few days ago would have relieved me from the necessity of addressing your Lordships at any length, and would have made me perfectly certain that you would have but one feeling as to the propriety of doing all that you can at present to honour the memory of the late Duke of Wellington by that public funeral which her Majesty, in anticipation of the wishes of Parliament and the country, has already directed. I beg, therefore, to move, without further preface, that an humble address be presented to her Majesty, to express to her the thanks of this House for her Majesty's most gracious message, which was communicated on Friday last, and humbly to thank her Majesty for having given directions for the public interment of the mortal remains of his Grace the late Duke of Wellington in the cathedral church of St. Paul, and to assure her Majesty of their cordial aid and concurrence in giving to the ceremony a due degree of dignity and solemnity."

The address was at once and unanimously agreed to.

The Earl of DERBY then said: "I have now to move a resolution that this House do attend the solemnity of the funeral of Arthur, Duke of Wellington, in St. Paul's Cathedral on Thursday next, and that a committee be appointed to consider the circumstance relating to the attendance of this House at the solemnity of the funeral."

The Duke of CLEVELAND said that he wished to suggest to the First Lord of the Treasury the propriety of giving full ties for the departure and return from the cathedral of St. Paul of those persons who have been officially engaged in the procession and solemnity. He thought it was but reasonable that if those persons were not to return in procession, they should have some priority of departure over those who were present merely as spectators.

The Earl of DERBY said he need hardly assure the noble Duke that the question of the whole of the arrangements connected with the funeral had been a matter of very anxious consideration on the part of the Government and of those connected with the ceremony (hear, hear). It was of concluding a ceremony of such magnitude as this it was no doubt that provision had been made for the fitting accomodation of those persons who had to join officially in the procession, and for their returning as far as possible their return after the ceremonial had been performed; but he thought it would be convenient, if their Lordships agreed to the appointment of a committee, that that committee should have in attendance before them on the following day Garter King-at-Arms, from whom they might ascertain what were the precise arrangements made, and then the committee or any other noble Lord would have an opportunity of suggesting any alterations which they thought desirable; and if it was possible to make them within the limited time which remained, he was sure that every person engaged would be ready to pay the utmost deference to the wishes of the House, and would have every object too to meet them.

The resolution was then agreed to, and the noble Earl having nominated the committee, their Lordships proceeded to the other business on the notice paper.

HOUSE OF COMMONS.

Her Majesty's message in reference to the funeral of the late Duke of Wellington having been read,

The CHANCELLOR of the EXCHEQUER rose and said: "Sir, the House of Commons is called upon to-night to perform a sorrowful, but a noble duty. It has to recognise, in the face of the country and of the civilised world, the loss of the most distinguished of our citizens, and to offer to the ashes of the great departed the solemn anguish of a bereaved nation. The princely personage who has left us was born in an age more than usually great events than any other period of recorded time. Of these vast incidents the most conspicuous were his own deeds, and they, which were productive of the mightiest consequences, were accomplished with the smallest means in the face of the greatest obstacles. He was, therefore, not only a great man, but a great man of a great age. Amid the chaos and conflagration which attended the end of the last century, there arose one of those beings who seem born to master mankind. It is not too much, sir, to say that Napoleon combined in himself the energy of Alexander with the strategy of Hannibal. The kings of the earth fell before his subtle genius, and he denounced destruction against the only land which dared to disobey him and be free. The providential superintendence of the events of history was never more manifest than when we recollect this dispensation that the same year should produce the French Emperor and the Duke of Wellington; that in the same year they should have embraced the same profession; and that, natives of two distant islands, they should both have received the rival military education to that same land which each, in his turn, was destined to subjugate. During that long struggle for our freedom, our glory, and, I may say, our existence, Wellington fought and won fifteen pitched battles, all of the highest class, concluding with that one of those crowning victories that give a colour and form to history. During this period, that can be said of him which can be said of no other general, that in the capture of 8000 cannon he never lost a single gun. But the greatness of his exploits was perhaps surpassed by the difficulties he had to encounter. He had to encounter a feeble Government, a factious opposition, and a mistrustful people—scandalous allies—and the most powerful enemy in the world. He won victories with starving troops, and carried dogs without proper *matériel*. And, as if to complete the fatality which attended him throughout life in this respect, when he was at last successful in creating an army worthy of the Roman legions—an army of himself, this invincible host was broken up on the eve of the greatest conjuncture of his life, and he had to enter the field of Waterloo with an army of raw levies and discomfited allies—Dutch, Belgians, and Welsh levy raised. He has been called fortunate—for fortune is a divinity that ever favours those who [illegible]. Invasive and patient, [illegible] ated his career—achieved h[illegible] exploits and [illegible] him from vicissitudes, for it was his self-control that regulated his lofty fame. (Cheers.) But, sir, it has of late years been somewhat the fashion to disparage the military character: forty years of peace have, perhaps, perhaps, somewhat less aware of the considerable and complex condition that go to the form of a great general. [illegible] engineer—a geographer—learned in human nature—a statesman—a master of men that he must be [illegible] Minister of State, and then to descend to the humblest office of a commissary and a clerk, but he has to display all his knowledge and to exercise all those duties at the same time, and under extraordinary circumstances. At every moment he has to think of the eve and of the morrow—of his flank and of his rear—he has to carry with him ammunition, provisions, hospital [illegible] calculate at the same time the state of the weather and the moral [illegible] of the men—all those elements that are perpetually changing—he has to combine sometimes under overwhelming heat, sometimes under overpowering cold—often times in famine, and frequently amidst the roar of artillery. (Hear, hear, hear). Behind all these circumstances there is to be present the image of victory, and the dreadful [illegible] to welcome [illegible] for the gallant [illegible] only think, but [illegible] for a man [illegible] or less obedient [illegible] beautiful [illegible] ment moreover, [illegible] unquestionably, sir, all this may be done in an ordinary manner, by an ordinary man—as every day of our lives we [illegible] perpetrated by successful ministers of state, successful authors—but to do all this with genius is sublime (hear, hear)—to be able to think with vigour, with depth, and with clearness in the recesses of the cabinet, in a great intellectual deconstruction, and to [illegible] with equal vigour, clearness, and depth amidst the noise of bullets, appears to me the loftiest exercise and the most complete triumph of human faculties. (Cheers). When we take into consideration the [illegible] life of the Duke of Wellington one [illegible] by that military career of his [illegible] place in history. Only eight years elapsed from Vimiera to Waterloo—a [illegible] date of his first command in the last campaign he [illegible] ard in the field of battle, twenty years old scarcely he commenced [illegible] (hear, hear). He was destined for another profession [illegible] at and most successful warrior, if not in the prime, at least in the perfection of manhood commenced that civil career scarcely less successful or less splendid [illegible] the military one that lives in the memory of man. (Cheers). He was thrice the ambassador of his Sovereign at those great historic Congresses that have settled the affairs of Europe; he was twice Secretary of State; he was twice Commander-in-Chief of the Forces; once he was Prime Minister; and to the last hour of his life he may be said to have laboured for his country. (Hear, hear). It was only a few months before we lost him that he favoured by his council and assistance the present advisers of the Crown, respecting that war in the East, of which no one was so competent to judge. He drew up his advice in a state paper worthy of his genius—and when he died, he died still the active chieftain of that illustrious army to which he has left the tradition of his fame. (Cheers). Sir, there is one passage in the life of the Duke of Wellington which, in this place, and on this occasion, I ought not to let pass unnoticed. It is our pride that he was one of ourselves—(hear, hear, hear)—it is our glory that Sir Arthur Wellesley once sat on these benches. (Cheers). If we view his career in the House of Commons by the test of success that we would apply to common men, his career, though brief, was still distinguished. (Hear, hear). He entered the Royal councils, and exercised high offices of State; but the success of Sir Arthur Wellesley in the House of Commons must not be tested by the fact that he was a privy councillor or secretary to the Lord-Lieutenant—he achieved here a success that the greatest minister and the most brilliant orator might never hope to accomplish (cheers). That was a great parliamentary triumph when he rose in his place to receive, as a member of Parliament, the thanks of the Speaker for a great victory. (Cheers). And still later, when at the bar he received, Sir, from one of your predecessors, in memorable words, the thanks of a grateful senate for accumulated triumphs (Cheers). Sir, there is one source of consolation which I think the people of England possess at this moment, under the severe bereavement which they mourn over—it is their intimate acquaintance with the character, and even with the person of this great man. (Hear, hear). There never was a great man in England who lived so long and so much in the public eye. (Hear, hear). I would be bound, there is not a gentleman in this House that has not seen him—many there are who have conversed with him—some there are who have touched his hand—for his countenance has been [illegible] voice are impressed upon every memory, and live in every [illegible]. In the golden saloon, and in the busy market-place, to the last moment he was found. The rising generation, amongst whom he lived, will recollect his words of kindness; and the people followed him in the street, with that lingering glance of reverent admiration which seemed never to tire. (Cheers). Who, indeed, will ever forget that venerable and classic head, [illegible] [illegible] [illegible]

[illegible] Cheers.

(Cheers). That we might not be unacquainted with his inward and spiritual nature, that we might walk [illegible] how this sovereign master of duty fulfilled the manifold duties of his life with unrivalled activity, he favoured us with a series of military and administrative biography which no age and no country can equal; and, fortunate in all things, Wellington found in his lifetime a historian whose immortal pages now rank with the classics of the land which Wesley saved. (Cheers). The Duke of Wellington has left to his country a great legacy greater even than his fame—he has left the contemplation of his character. (Hear, hear, hear). I will not say that in England he revered a sense of duty—that I trust was never gone; but he has made the sense of public life more masculine—he has [illegible] his career, restless activity, and reprimanded the morbid susceptibility of irregular egotism. (Cheers). That, I think, is not exaggerated praise (Cheers). I do not believe that, from the highest [illegible] duties to the humblest the keenest responsibility of State, to him who executes the humblest duty of society, there are no moments of difficulty and depression when the image of the Duke of Wellington may not come to the memory, and the sense of duty may not sustain and support him. (Hear, hear.) Although the Duke of Wellington lived so much to the hearts and minds of his countrymen, although to the end of a prolonged career he occupied the most prominent position, and filled the most august offices, no one seemed to be conscious of what a share he occupied in the thoughts and feelings of his countrymen until he died. (Hear, hear.) Perhaps the real cause of his [illegible] greatness of character more completely asserted than by the fact that, in an age when intellectual quality flatters all our self-complacency, every one acknowledges that the world has lost the greatest of men. (Cheers.) In an age of utility, the most famous, the most common-sense people in the world—men from every [illegible] of their race, can select no other representative for their grief, than [illegible] the centre of the [illegible] And we who are [illegible] here for purposes no different—to investigate the sources of the wealth of nations—to [illegible] ourselves in statistics or [illegible] such a paper as [illegible] fiscal controversy—we offer to the world the most sublime and touching spectacle that human circumstances can well produce—[illegible] ce of the senate mourning a hero. (Cheers.) I beg to move, sir, that an humble address be presented to her Majesty for her [illegible] having given directions for the public interment of the remains of his Grace the Duke of Wellington, and to assure her Majesty of our cordial aid and concurrence to give the solemnity a fitting degree of [illegible]."

Lord J. RUSSELL: I rise to second the motion, but I do not wish to add a single word to the eloquent language in which it has been brought forward. I trust that the whole House will concur in the able testimony which has been borne to the merits of the illustrious deceased. (Hear.)

The motion was put, and carried unanimously.

The CHANCELLOR of the EXCHEQUER: "I move, sir, that this House shall attend the funeral solemnity of the Duke of Wellington, in St. Paul's Cathedral on Thursday next."

The motion was carried.

The standing orders having been suspended to permit the motion to be made,

The CHANCELLOR of the EXCHEQUER moved that a select committee should be appointed for the mode in which they should take part in the [illegible] at the committee should consist of the following [illegible] Lord John Russell, Mr. Wahole, Mr. Gladstone, Sir [illegible], Lord John Manners, Sir F. Baring, [illegible] Hon. Fox Maule, Right Hon. Mr. Cayley, Viscount Palmerston and Mr. G. A. Hamilton.

Mr. HUME: "Before the motion is agreed to, I hope the right hon. gentleman will state to the House what the duties of the committee will be."

The CHANCELLOR of the EXCHEQUER: "The object of the committee is to consult the journals, and see the best manner in which the House should [illegible] the [illegible]."

The motion was then agreed to.

THE DUKE OF WELLINGTON AS LORD WARDEN OF THE CINQUE PORTS.

AMONG the remarkable features of the Duke of Wellington's character, not the least surprising is that it should present itself in so many different aspects. Scarcely have we finished the record of his brilliant military [illegible] equally the subject of [illegible] career, [illegible] [illegible] variety of modes in which his [illegible] [illegible] at present itself to mankind and worked out [illegible] [illegible] ready shown him as a statesman [illegible] [illegible] [illegible]

THE VISITORS ON THE BEACH AT DEAL.

THE DUKE'S FUNERAL.

THE LYING IN STATE AT WALMER.

Among the funeral arrangements, none seems to have given greater satisfaction, or to have been carried out in better taste, than the opportunity afforded to the inhabitants of the Cinque Ports and the surrounding district, of visiting the remains of their illustrious Warden, in his official Castle at Walmer. The village, as we have already illustrated, was of the Duke's early choice as a place of occasional residence: he liked its pleasant walks and rides, and its sea view was, doubtless, suggestive to the hero in his retirement.

The preparations made by Messrs. Dowbiggin and Holland at the Castle were of a simple and unpretending character, there being no means for any great display; nor, indeed, was it wanted. In the small, irregularly-shaped death chamber lay the body of the Duke, inclosed in an outer coffin, covered with crimson velvet, and with handles and funeral decorations richly gilt. On the lid, near the head, rested the ducal coronet, and beyond it the pall, gathered back, to give visitors a complete view. The coffin rested on a low stand, covered with black cloth, and protected from intrusion by a small railing, round which candelabra with huge wax lights and plumes of feathers were arranged. The walls and roof of the small apartment were, of course, hung with black cloth, the single deep-recessed window closed, and candles reflected against silvered sconces barely relieved the gloom of the sombre drapery. Visitors entering at one door passed by the end of the coffin, and then out at another without interruption. The ante-chambers and corridors for egress were also darkened, hung with black, and lighted with candles placed at intervals on the side walls.

The first day for admission of the public was Tuesday (last week). Through the low strong archway of the main entrance the visitors passed, first, along the curved glass-covered passage, then up steps upon the battery, then through dimly-lighted anterooms into the chamber of death, and then along corridors and down staircases and across the garden on to the beach. All the way, at a few paces distance from each other on either hand, the guard of honour of the Rifle Brigade were placed, each man with his arms reversed and leaning in a sorrowful attitude on his musket.

Along the beach, as far as the eye could reach towards Deal, a long train of visitors dressed in mourning passed and repassed throughout the day, while from greater distances conveyances arrived and took their departure in quick succession. One could not help being struck with the respectable appearance of all the visitors, and the evident care which even the humblest of them had taken to present themselves in a suitable attire at the castle on such an occasion. There was no overcrowding and confusion of any kind, and no unseemly levity of conduct.

On Wednesday the public were admitted again, when the attendance was still more numerous than on the previous day.

Three of the Duke's oldest and most faithful domestics are all of his establishment that now remain at the castle. One of them, a fine old veteran, is the sergeant of the Guards, who at the disastrous siege of Bergen-op-Zoom refused to capitulate with the rest of the troops, and with thirteen comrades, after expending every cartridge, made an almost miraculous escape in the face of the enemy.

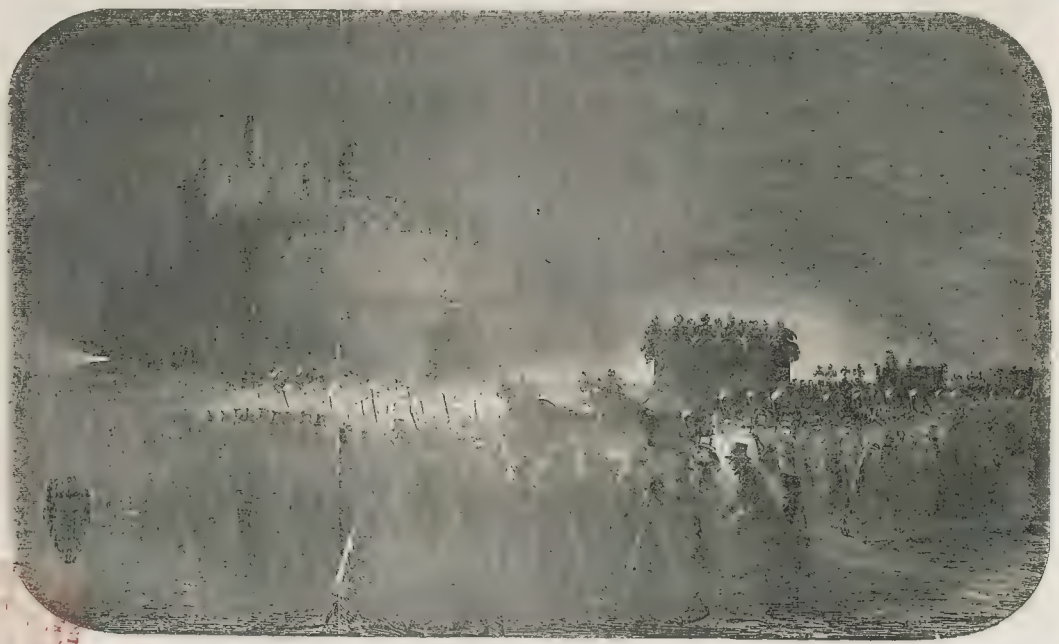
ENTRANCE TO WALMER CASTLE.

REMOVAL OF THE BODY

The general belief was that the body would be removed from Walmer to Dover, and thence by rail to the Bricklayers' Arms station; and it was not until late in the afternoon of Wednesday that orders were received for the horses to convey the hearse and mourning coaches from the castle to Deal. At four o'clock the castle was closed against visitors, and shortly after Mr. Holland, the undertaker, and his assistants, were in readiness to remove the coffin to the hearse. Shortly before seven, the hearse was backed over the moat bridge, and placed under the archway; and, immediately afterwards, two mourning coaches and four, and one mourning coach and pair, were brought up to the foot of the bridge. Almost at the same moment, about 150 of the Rifle Brigade marched up the northern approach of the castle, and lined the roadway, in readiness to form an escort. This detachment was under the command of Colonel Beckwith.

At a few minutes after seven, the coffin was placed in the hearse; and the plumes having been fixed, and the other arrangements completed, the tramping of the horses across the bridge announced the departure of the remains of the immortal soldier. As the hearse passed down the northern approach, the Rifle Brigade closed in as an escort.

The first mourning coach contained the present Duke, Lord Arthur Hay (brother-in-law of the present Duke), and Captain Watts (the Governor of Walmer Castle.) In the second carriage was Mr. Marsh, of the Lord Chamberlain's office; and in the third carriage, Mr. Collins (the butler), and Mr. Kendal (the valet), both old and faithful servants of the late Duke. Minute guns were fired from the castle as the *cortège* left the



THE HEARSE AND REMAINS PASSING DEAL CASTLE.

ARRIVAL OF THE HEARSE AND REMAINS AT THE RAILWAY STATION AT DEAL.

ground. The same honour was paid to the late Duke from the castle at Deal, and also from Sandown. The procession was led by a number of men with flambeaux, and as it moved down the sombre avenue was suggestive of deep and varied feelings. A large concourse of people had assembled along the road, and at Deal several thousand persons had congregated to witness the removal of the body. The progress from the castle to the Deal station was exceedingly slow, above an hour and a half being occupied in moving over about two miles of ground. At the station, the *corthge* was received by the chairman of the South-Eastern Railway, Mr. James Macgregor, M.P., and the other authorities of the Company. The hearse was quickly placed on a truck, and at a quarter past nine the train started for London.

The present Duke, Lord Arthur Hay, Captain Watts, and the late Duke's butler and valet, came up in the train, which stopped at Ashford and Tonbridge for the engine to take in water, and arrived at the Bricklayers' Arms at twenty-five minutes past twelve.

The arrangements at Walmer, and the passage of the *corthge* to the Deal station, were effected with exactness, and with the exception of the minute-gun firing, almost in silence.

THE ARRIVAL IN LONDON.

In consequence of its having transpired that the body of the late Duke would be brought to London on Wednesday night by special train from Walmer Castle, the greatest curiosity was evinced in the neighbourhood of the Bricklayers' Arms station to ascertain, if possible, the hour when the remains might be expected. But as everything connected with the removal was conducted with the utmost secrecy, the most stringent orders to that effect were issued to the various officials of the station. By seven o'clock, or more than two hours before the special train left Deal, a crowd had collected before the gates of the station, which were kept close fastened. Groups also formed along the New Kent-road, at the Elephant and Castle, and onwards.

Precisely at half-past ten a troop of the 1st Life Guards, under the command of Captain De Ros and Lord Mountcharles, arrived, and were promptly admitted within the precincts of the station.

The hearse, containing the coffin, was firmly secured upon a railway truck, which was almost instantly detached from the rest of the train, the hearse placed upon *terra firma*, and the horses, four in number, harnessed in. All the troops, upon its coming into the open space outside the walls of the station, reversed their swords, and remained with them so until the *corthge* set out for Chelsea. This did not take place until some time had been consumed in fitting the funeral part of the cavalcade with black velvet and feathers.

The following was the order of procession :—

Advanced Guard of Life Guards.
Four mutes
State Lid of Feathers.
Mutes.

HEARSE,

Drawn by four horses, containing the Body of his late Grace.
Escort of Life Guards by the sides and at the rear of the Hearse.
Two mourning coaches, each drawn by four horses,
containing the mourners, the Duke of Wellington, Lord C. Wellesley, and others immediately connected with the Duke's family.

The cavalcade left the station at half-past one, and proceeded at a very slow walking pace down the New Kent-road, by the Elephant and Castle, into the Kennington and Vauxhall-roads, over Vauxhall-bridge to Chelsea, where it arrived at about four o'clock. It was attended the whole of the way by a considerable crowd, that followed perseveringly in spite of the continued rain. On the arrival of the procession at Chelsea, the body was received by Mr. Norman Macdonald, Comptroller of the Lord Chamberlain's office, and under the superintendence of that gentlemen removed to the hall, where it was to lie in state. A detachment of the Grenadier Guards (the Duke's regiment) remained in the hospital, and mounted a guard of honour in the state-room for the remainder of the night.

ARRIVAL OF THE HEARSE AND REMAINS AT CHELSEA HOSPITAL.

PORTRAITS, STATUES, AND MEMORIALS OF THE DUKE OF WELLINGTON.

SECOND ARTICLE.

CONTINUING our account of the portraits of the Duke of Wellington, we have to mention a very excellent one painted by J. Simpson, in 1838; a half-length, with cloak and hat: the latter with its flowing feather, giving, perhaps, the appearance of a little heaviness to the head, but agreeable for the variety it presents to other portraits; the sword is carried across, supported by both hands. This portrait has been engraved in mezzotint by O. Gibbon.

Wilkie, whose last portrait, with charger, for the Merchant Tailors' Company, has already been mentioned, also painted a full-length in 1836, for the Marquis of Salisbury.

The late G. Dawe, painter to the Emperor of Russia, painted a full-length portrait, which is now in this country.

Of other engraved Portraits, whether from Paintings, Sketches, or Sculptured Busts, may be enumerated:—

A half-length dressed in his orders. Large folio, *ad vivum*. By W. T. Fry, 1815.

Bust in a niche, after Nollekens. Drawn by John Taylor; engraved by E. Bocquet, 1815.

Etching of head in profile, looking to the right. After Chantrey. Engraved by Mrs. Dawson Damer, 1832. (Private plate.)

Whole-length: standing, holding a letter, when Marquis and K.B.

Small head profile, by C. F. Burney; engraved by Jas. Heath, 1814.

Half-length, right arm on a cannon. 8vo., *ad vivum*. T. Woolnoth, 1839.

A miniature half-length in uniform, when Marquis of Wellington By W. Haines; engraved by H. Cook, for the Military Panorama, 1812.

Bust: after the Bust of Turnerelli. Engraved by H. Cook, for the *Military Chronicle*, 1813.

Profile, with wreath of laurels, forming an oval. Engraved by Shroeder, 1816.

Profile, bust, in uniform, looking to the left: in a wreath, inscribing the word Waterloo over his head, and underneath the representation of a triumphal chariot, the names of Wellington's principal victories, and this inscription: "Fas sua, fas Gnosia Juno," and a unique cameo ring on a rich sardonyx, representing Victory in a car presenting a laurel crown to Wellington the Conqueror. Published by Mr. Thomas Martyn, author of the design and proprietor of the ring. London, November 7, 1815." This print was accompanied by a wild rhapsody in letter-press by the said Thomas Martyn, "An hoc of various works on Shells, and other branches of Natural History, &c."

Half-length in a cloak, with order, engraved in mezzotint, from an original sketch by the late George Dawe, R.A. Published by Welch and Gwynne, 1842.

A bust in a circle, in military dress, dedicated to Lady Anne Cullen Smith. "Engraved by H. Minasi, from an approved likeness in her Ladyship's possession," 1814.

We have also seen a profile in small medallion, drawn and engraved by T. Wright, brother-in-law of Dawe, with an inscription in Russian, which we believe has not been published in the country.

"A View in Hyde Park," representing the Duke on horseback, in plain clothes, returning a salute. Painted by W. H. De Panorauwa. The same, smaller.

Equestrian portrait (coloured) of the Duke in plain clothes. By H. B. Equestrian portrait of the Duke in plain clothes, as he appeared on his 73d birthday. Sketched and lithographed by H. B.

A small sketch (coloured) of the Duke as Field-Marshal, reviewing the troops at Windsor.

A group of three heads, representing the Duke at different periods of Life, when in India, at Waterloo, and in the House of Lords. Drawn and lithographed by J. F. Lassoquière

The above are more strictly works of portraiture. There have been, besides, a great variety, introducing portraits, but more or less connected with incidents, and in some cases in association with other portraits

Of an early period is a fine portrait group, entitled "The Despatch," painted and engraved by John Burnet. It represents the Duke standing at night by a camp fire, and writing a despatch, supporting the paper on his hat; a guerilla with his mule ready-harnessed standing by, in the rear, buildings on fire. Beneath, in the middle, is an eagle grasping sword and a pen, and this inscription—"Totum qua gloria cogit orbem."—Ovid.

The Countess of Westmoreland (when Lady Burghersh), also painted a picture of the Duke Writing the Despatch of the Victory of Waterloo, which we have engraved and described at page 436.

Wilkie also painted a cab net picture of the Duke writing a despatch by lamplight, on the night before the battle of Waterloo, which was exhibited in 1836, and attracted much attention. His biographer, Mr. Cunningham, however, says of it that this picture, admirable in other respects, was liable to this objection - that there was nothing in the composition to show that the despatch was penned on the eve of Waterloo—an error so rare in Wilkie as to render it remarkable." Whatever light lings on the score of historical identity, the artist bestowed great pains upon the execution of this work, which he painted for Sir Willoughby Gordon, late governor of Chelsea Hospital. The whole from it is engraved in Wilkie's "Spanish Sketches;" and the original study for the hand, painted from life, and an admirable specimen of minute and life-like elaboration, is in the possession of Messrs. Graves.

Poor Haydon, encouraged by the honours reaped by his study of "Napoleon on the Rock of St. Helena" (purchased by Sir R. Peel), produced in 1844 a companion picture, the "Hero and his Horse on the Field of Waterloo Twenty Years after the Battle." Which has been engraved in mezzotint by Lupton, and in a smaller size by Davey; and, being dedicated to the British nation, has enjoyed a wide popularity. The warrior Duke is represented standing beside his horse, resting upon his neck with one hand, his hat off, and contemplating the altered aspect of the once blood-stained field, now restored to the peaceful uses of agriculture.

The fraternity of "The Army and Navy," in the persons of the two greatest heroes of either service, has been commemorated by Mr. J. P. Knight, in the circumstance of the only meeting of Nelson and the Duke, we on Colonel Wellesley. This picture is engraved and described at page 437.

Mr. J. T. Barker has produced several "Incidents in the Life of Wellington," in which he succeeded in combining accuracy of portraiture with subjects of historical interest. His meeting of Wellington and Blucher on the evening of the victory of Waterloo, at La Belle Alliance, recently produced a remarkably characteristic. It is a picture which tells its story in a vigorous way, and there is not only accuracy in the facts, but in the portraits. Blucher's face is the familiar face of Germans and snuff boxes; the attendant officers of both commanders are historic personages, painted from their portraits; and the Duke's face is such as those who knew the Duke in his old age feel he must have been in his middle life. The picture has some defects as a work of art, the atmosphere and the background being bad, but the artist probably looked lonely at his principal group, painting the whole simply to be engraved from; and we have no doubt, when engraved, it will obtain a wide popularity. We understand that this picture was seen by the Duke himself not long before his death, who expressed himself greatly pleased with it. Another subject portrait by the same artist has also recently appeared, and is announced for publication. This picture represents the Duke life-size and full-length, in his cabinet at Apsley House. He is seated in his Waterloo chair (a piece of furniture made out of the famous tree near which he erected at the Battle of Waterloo, and the fellow of which is at Windsor Castle) and "reading the despatches from India announcing that he is at Feroze pore with the Sikhs." He is supposed to have just written upon a passage in Sir John Littler's report, where the Sixty-Second Regiment of Foot is stated to have been seized with panic—a charge against which the Duke subsequently vindicated the regiment in the House of Lords. Mr. Barker, although he had no sittings for this work, had frequent opportunities of studying the great hero in the House of Lords, and elsewhere, and has produced an admirable likeness, in which the flesh tints strike us as somewhat too warm and deep. Objections perhaps may be taken to the spectacles, inasmuch as they were seldom used by the Duke, and are unmilitary in character; but, it is known that he used them occasionally in his parliamentary and official duties, and this introduction seems, therefore, to be historically correct on the occasion. By this introduction alone the artist has been enabled to contend against a difficulty which baffled little else in all his predecessors, Lawrence alone excepted, in the treatment of the Duke, namely, the expression of the eyes. The accessories - the "Waterloo elm chair," the desk full of well-picked papers, the carpet, the portrait of Napoleon—all are actual facsimiles, taken from the private cabinet at Apsley House, and painted with a skill which we have before remarked in similar objects in the artist's pictures. The work is to be engraved in line by Mr. F. Bacon, as a companion to Delaroche's Napoleon at Fontainebleau

The Duke having been represented in all his every official character except that of the statesman, we owe to the fine taste of her Majesty's groom-porter of England's two most honest and indefatigable servants, the Duke (not of the battle field, nor of the Trinity House, nor of the University; but in the simple dignity of a politician and adviser of the Crown) standing beside the only statesman to whom he always (willfully" deferred, Sir Robert Peel. The Duke is represented in profile, dressed, if we mistake not, in the Windsor uniform, Sir R. Peel wearing a frock coat. This picture, which was painted by Winterhalter, in fact, and has been engraved by Faed, though perhaps not containing the very best likenesses extant of the two illustrious leaders, is invested with a peculiar interest which will increase with time

Finally, the Duke, as the fast friend of Royalty—the sponsor to one of England's young Princes, is commemorated in a very pleasing picture, also painted by command, by Winterhalter, entitled "The first of May, 1851." That picture represents the Duke offering the infant Prince to his godsons, Prince Arthur, a cleaver, which he has just received, in the Great Exhibition. The Queen, still in her robes of ceremony, but the royal infant in his nurse's arms, appear in the background, while Prince Albert, a magnificent looking cavalier, stands by. Duke, to which the Royal party have last returned from the Exhibition, holds a plan in his hand. This picture has been engraved in mezzotint by Samuel Cousins.

HISTORICAL PICTURES OF THE DUKE'S ACTIONS, AND FANCY SUBJECTS ILLUSTRATIVE OF THEM.

We come now to a very interesting part of our subject; a review of the principal historical or fancy pictures, in which his wondrous achievements are commemorated, or in which he is personally introduced

And first among these, though not claiming to be historical in the strict sense, we shall place Wilkie's masterly picture, "The Chelsea Pensioners Reading the *Gazette* of the Battle of Waterloo." Great as this Leader of his Art undoubtedly was in the delineation of the simpler and more pathetic emotions of the human heart, it cannot be denied that in the mighty gems of the age; as being the only memento of the greatest action of his life, undertaken by his own express command, and the composition and production of which he personally superintended.

As we have already stated, the picture is rather an episode upon the battle of Waterloo, than an historical work, and yet it was painted under circumstances, and comprises so many portraits of men who had distinguished themselves, although in humble capacities, in the service of their country, under the command of the Duke, that it may properly be looked upon as belonging to history. Wilkie, as soon as he was honoured by the Duke to grace his mighty fame with a work of mixed fancy and reality, gave himself up almost wholly to the work, of which he was justly more proud than any other commission could have made him.

When it was known (says Cunningham), that Wilkie was engaged on a picture for the Duke of Wellington of a military nature, great was the stir in the ranks of the army, and likewise in society; the contrast of a bloody fight was in the days of some, which others honoured he would choose the field after the battle was fought, and show the mangled relics of war—

> With many a sweet babe's affection,
> And many a widow mourning.

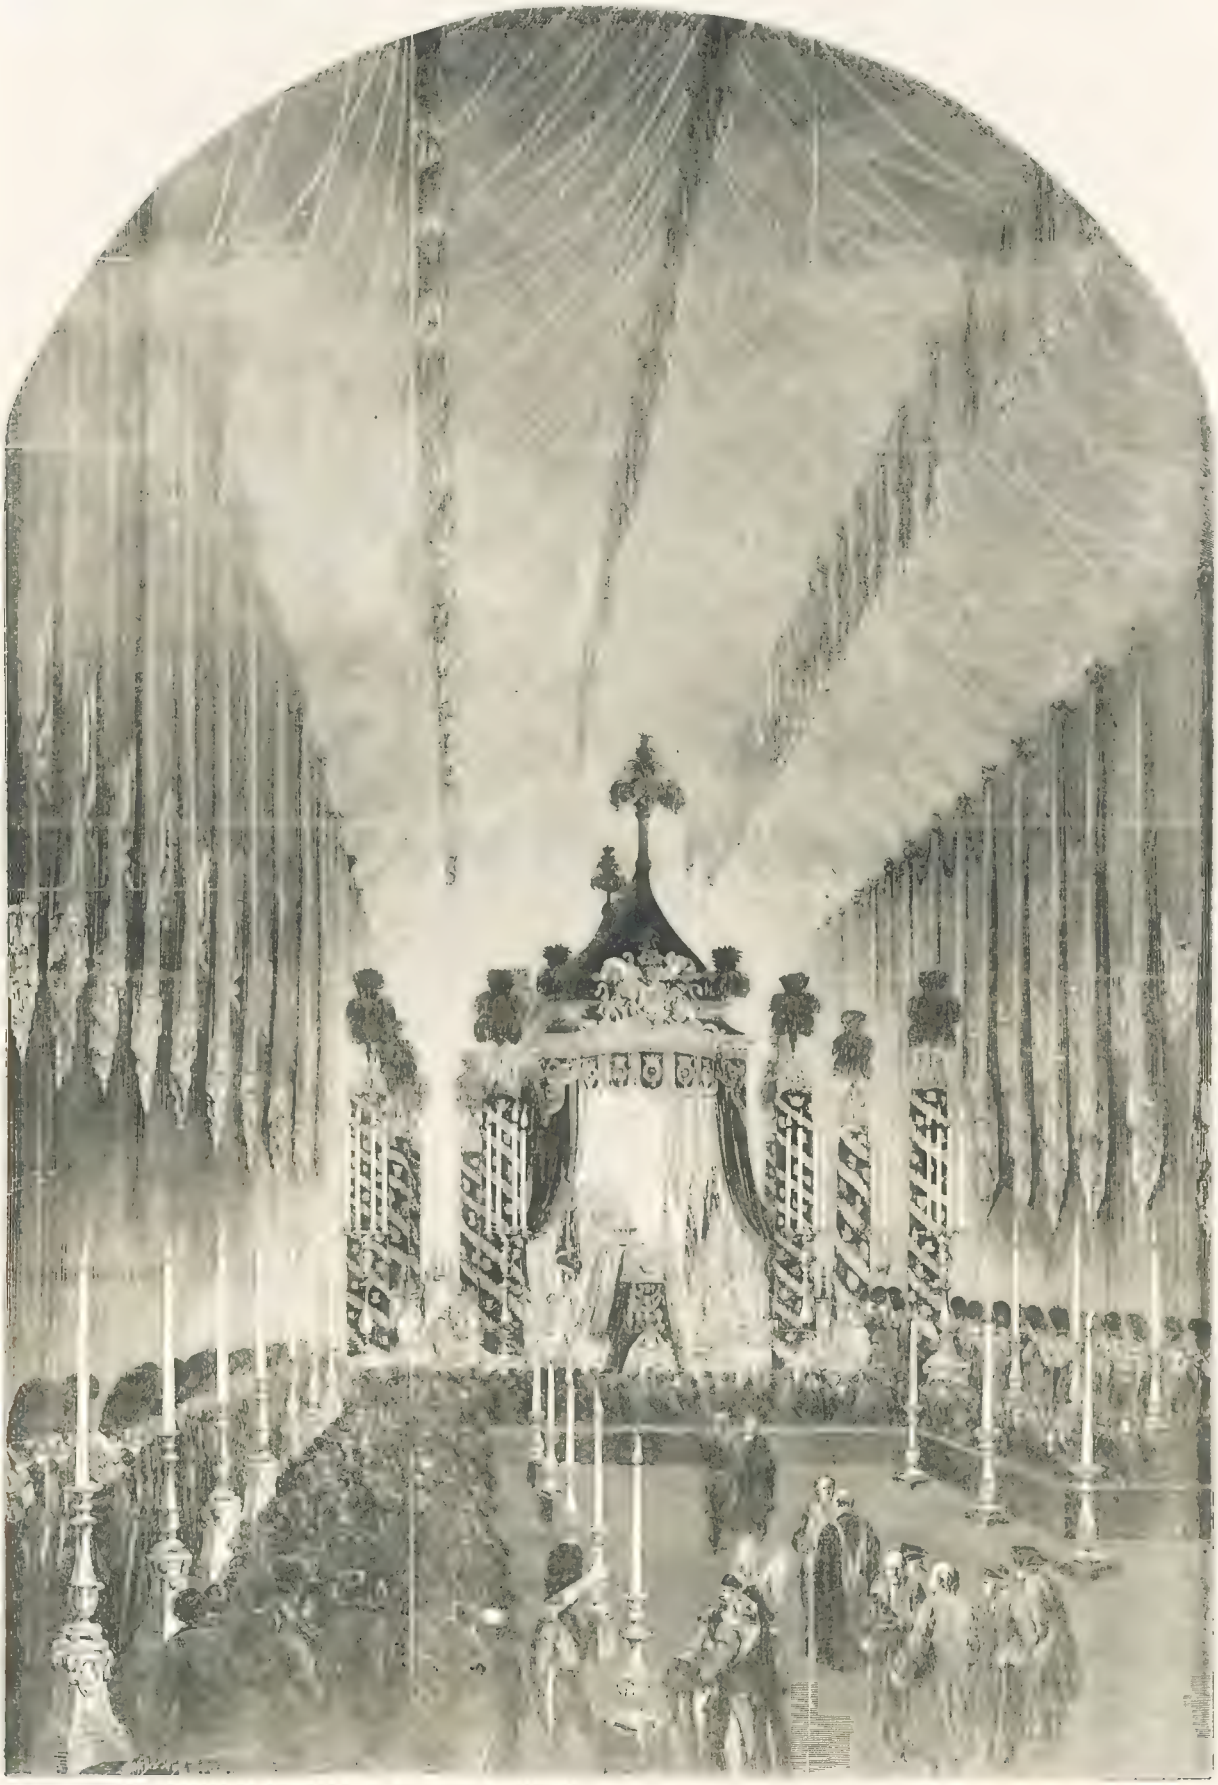
But no one guessed that out of the wreck he would gather and bring home one of old Chelsea, he was able to do a subject which the general public could accept as a remembrance of Waterloo, and new. Pensioned the Duke of Britain with mingled gladness and pride. Not the less were they touched by the subject was Sir Willoughby Gordon, a soldier of the old school, whose name appears on the list of the Duke's friends at the time when [illegible] was in power; and [illegible] employment and [illegible] to possess my sketch of 'The Chelsea Pensioners reading the Gazette of the Battle of Waterloo,' in which I have endeavoured to [illegible] Dec. 24th. Left a note at Apsley House, to request that I might be favoured with a sitting from the Duke of Wellington that I have proposed to [illegible] Peninsular Waterloo Medal, which he agreed to. [illegible] Kensington."

Subsequent entries show how the Duke and the artist were sometimes put to some little trouble, before they could come to a meeting point to the latter all engrossing point—the order of the day, for the great work:—

Jan. 24, 1819. Went to dine with Haydon, and when about to set out for the house of Wellington, who did me the honour to call about three o'clock. His Grace, I am sorry to say, was more scarcely any person was admitted, but took Lord [illegible] was with him soon after, and, to my attention at "The Waterloo," and the Duke's Grey. [illegible] Grace was going, that he would call again.

26. Sent a note to the Duke, to express my regret, and to say that, after Tuesday, when my picture ('The Penny Wedding') will be delivered at Carlton House, I should be at home constantly.

Feb. 26. Called at Apsley House. The Duke was not at home, but I had a [illegible] Mr. [illegible] Duke's [illegible] that he had [illegible] Mr. [illegible] Duke's [illegible] that he had [illegible] Mr. [illegible] Duke's [illegible] that he had



THE FUNERAL OF THE DUKE OF WELLINGTON, 1852.—IN STATE IN THE HALL OF CHELSEA HOSPITAL.—SEE PRECEDING PAGE.

REMINISCENCES OF THE GREAT DUKE IN THE HOUSE OF LORDS.

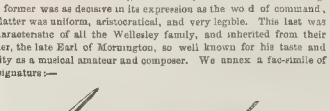
THE absence of the Duke of Wellington from the brilliant procession at the Royal Parade of Westminster last week, when her Majesty

[illegible] opened the Duke of Wellington was among the Peers earliest in Prince Albert's chair, and at the foot of the throne, where his Grace, in the Field-Marshal's uniform, receiving all entrances to sit down received the annual offer her Majesty, until the moment when it was necessary to don his Ducal robes and take his place in the Royal carriage. Many a pretty [illegible] was the Duke and always either consulted her, stamping the proudest [illegible] of distinction, and giving a new and masculine charm to the [illegible] and members of our female company. In congress and diplomatique, the representative of the Czar was perhaps most sensible of the Bank which the House and the country have sustained, for the Duke [illegible] [illegible] rendered it painful to him to take his assembly where he had so many dearest, yet Grace never omitted to have a visit a friend's chair with Baron Brunnow's who distinguished as he is by the favour of the Emperor [illegible] the esteem in which he is held by the public men of the [illegible] [illegible] he also so long been accredited, appeared highly to appreciate the compliment paid him by the illustrious hero.

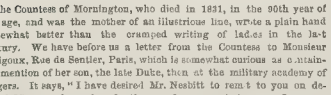
Among the interests which claimed the arrival of Her Majesty, the prevailing topic of conversation among the Peeresses and other [illegible] who, upon the occasion usurp the seats of the Upper Chamber—around "the Duke," and the Duke's movements, were expected at the House without him. The untimely were indicating to the younger [illegible] of the [illegible] [illegible] [illegible]

AUTOGRAPHS OF THE WELLINGTON FAMILY.

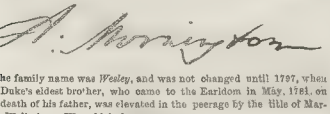
Public attention, which occupies itself with even the most trifling details relative to departed greatness, has been drawn, of course, to the style of the Duke of Wellington's letters, and to his handwriting. The former was as decisive in its expression as the wo d of command, the latter was uniform, aristocratical, and very legible. This last was a characteristic of all the Wellesley family, and inherited from their father, the late Earl of Mornington, so well known for his taste and ability as a musical amateur and composer. We annex a fac-simile of his signature:—



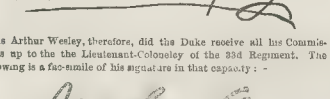
The Countess of Mornington, who died in 1831, in the 90th year of her age, and was the mother of an illustrious line, wrote a plain hand somewhat better than the cramped writing of ladies in the last century. We have before us a letter from the Countess to Monsieur Perigoux, Rue de Sentier, Paris, which is somewhat curious as containing mention of her son, the late Duke, then at the military academy of Angers. It says, "I have desired Mr. Nesbitt to remit to you on demand fifty pounds sterling for the use of my son at Angers. I suppose Messrs Pigneroiles have drawn upon you by this time for the last quarter, due, I think, about this time." The rest of the letter is about the packing of some rare china, and bears date "London, August 15, 1786," about seven months before Arthur Wesley was gazetted to an ensigncy in the 73rd Foot. We give a *fac simile* of Lady Mornington's signature:—



The family name was *Wesley*, and was not changed until 1797, when the Duke's eldest brother, who came to the Earldom in May, 1781, on the death of his father, was elevated in the peerage by the title of Marquis Wellesley. We subjoin his signature:—

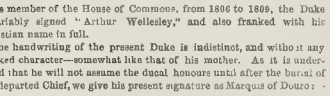


As Arthur Wesley, therefore, did the Duke receive all his Commissions up to the the Lieutenant-Colonelcy of the 33d Regiment. The following is a fac-simile of his signature in that capacity:—

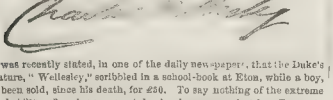


As member of the House of Commons, from 1806 to 1809, the Duke invariably signed "Arthur Wellesley," and also franked with his Christian name in full.

The handwriting of the present Duke is indistinct, and without any marked character—somewhat like that of his mother. As it is understood that he will not assume the ducal honours until after the burial of the departed Chief, we give his present signature as Marquis of Douro:—



Lord Charles Wellesley, the second son, writes with a little of the family habit of tall letters, as follows:—



It was recently stated, in one of the daily newspapers, that the Duke's signature, "Wellesley," scribbled in a school-book at Eton, while a boy, had been sold, since his death, for £30. To say nothing of the extreme improbability of such an amount having been so paid, it is sufficient to state that "Wesley," and not "Wellesley," was the Duke's signature at the time, and until he was in middle age.

The late Duke, sometimes irritated by the extended correspondence in which his position and celebrity involved him, frequently returned tart replies to communications which were of a *bond fide* business character. In 1837, Mr. Wilkins, the well-known engraver, wrote to the Duke, as Constable of the Tower, for permission to take sketches of various parts of that remarkable building. The Duke returned the following answer:—

The Duke of Wellington presents his Compliments to Mr. Wilkins, and has received his Letter

The Duke begs to inform Mr. Wilkins, in reply, that every body who wishes it, can see the Tower, and all that it contains, to the Number of some thousands annually

Individuals and the Publick at large, as well as the Duke himself, would be exposed to great Inconvenience if he was to give a Special Order to every Gentleman desirous of going to the Tower. He has not in any Instance, given such an Order, and he must beg leave to decline to give one, which, at the same time, he assures Mr. Wilkins, is not necessary in order that he may attain his object.

London, May 11, 1837.

It happens, however, that though the public are admitted to the Tower, they are not allowed to make a sketch of any part of it, or any object it contains. A special order was requisite for this purpose, and his Grace would probably have given it had he not evidently misunderstood the artist's application, which was not merely to "go the Tower," but to obtain permission to sketch in it.

Having received his military education in France (like Marlborough) the Duke was able to converse and write in the [illegible] tongue with considerable facility. It is recorded that Talleyrand, when asked how the Duke spoke French, pleasantly remarked "with a good deal of boldness, as he does everything." In truth, however, the only peculiarity in his use of the language was that he continued to follow the old-fashioned mode of expression in use before the Revolution. We possess a letter from his Grace to Madame Ida de St. Elme (a notorious *intriguante* of the time, and authoress of the well-known "Memoires d'une Contemporaine"), which enables us to show what manner of French the Duke wrote:—

A Londres, le 21 Avril, 1834.

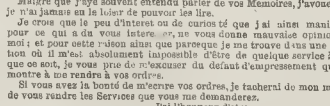
Madame,

Malgre que j'aye souvent entendu parler de vos Memoires, j'avoue que je n'ai jamais eu le loisir de pouvoir les lire.

Je crois que le peu d'interet ou de curiosité que j'ai aime manifesté pour ce qui a du vous interesser, ne vous donne mauvaise opinion de moi; et pour cette raison ainsi que parceque je me trouve dans une position où il m'est absolument impossible d'être de quelque service à qui que ce soit, je vous prie de m'excuser du défaut d'empressement que je montre à me rendre à vos ordres.

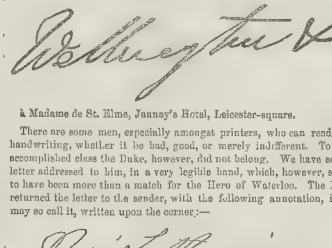
Si vous avez la bonté de m'ecrire vos ordres, je tacherai de mon mieux de vous rendre les Services que vous me demanderez.

J'ai l'honneur d'etre,
Madame, votre tres
obeissant Serviteur



à Madame de St. Elme, Jaunay's Hotel, Leicester-square.

There are some men, especially amongst printers, who can read any handwriting, whether it be bad, good, or merely indifferent. To that accomplished class the Duke, however, did not belong. We have seen a letter addressed to him, in a very legible hand, which, however, seems to have been more than a match for the Hero of Waterloo. The Duke returned the letter to the sender, with the following annotation, if we may so call it, written upon the corner:—



The letter was written in pale blue ink. This may account for its illegibility.

Having now before us several of the Duke's "Answers to Correspondents," which show the characteristics of his style, we shall freely use them here. It is well known that a letter to the Duke almost invariably received some reply. For the most part it was a simple announcement that his Grace had received such a communication, of such a date. Sometimes he was provoked into a fuller or more explicit acknowledgment. Thus, in a letter from Strathfieldsay, dated "May 17, 1835," to a gentleman, editor of a Liverpool newspaper, who had forwarded him some important Congressional documents from the United States, he says:—

The Duke being in the Country, he cannot state from recollection whether he did or did not receive the document to which ——— refers. He is in the habit of acknowledging immediately the Receipt of all papers, and he thinks if he had received the Document in question he should have acknowledged it. At all events he has not yet had time to read it.

A few days after, when the document turned up, his Grace immediately wrote again, mentioning the fact, and adding that he had read it with great interest [it was a report to Congress on the Army of the United States], and felt much obliged by its being sent.

Some months after, when the same gentleman wanted a report issued by the House of Lords, he wrote to the Duke on the subject. His Grace replied (March 28, 1838):—

The Duke regrets much that he has no copy of the evidence to which ——— refers, and that he cannot, under existing regulations, obtain one to send him.

A few days after, his Grace sent his own copy, on loan, with a request that it might be returned in a fortnight.

The late Mr. G. V. Drury, of Shotover Park, near Oxford, was a gentleman of active benevolence, who had filled high appointments in India, and devoted much of his later leisure to literary compositions. Among other subjects, having opportunities of convincing himself, as a landed proprietor, that the beershops which the Duke had sanctioned in 1830, led to much mischief in the rural districts, Mr. Drury drew up several statements, statistical and otherwise, which he circulated largely among the Bishops, both Houses of Parliament, and the heads of the Government departments. One of these he transmitted to the Duke and received the following curt and characteristic reply:—

London, May 10, 1843.

F M. the Duke of Wellington presents his Compliments to Mr. Drury and has received his Letter of the 9th Inst.

The Duke is the Commander-in-Chief of the Army and a Member of His Majesty's Councils. But there are other Noblemen and Gentlemen in Office besides himself; Each having under his Directions some particular Branch or Department of publick business. The Duke has no Control over any Duke but over those particular over which he presides. Yet Gentlemen think proper to address him upon every Subject, and expect answers to their letters.

It is impossible to satisfy such expectations. No man can find time even to read all that is transmitted to him.

Mr. Drury should address the Secretary of State for the Home Department or the Chancellor of the Exchequer on the Beer and Gin Shops and their effects, and not the Commander-in-Chief of the Army.

George Drury, Esq., Shotover Park, Oxford.

Nothing daunted by this sharp reproof, Mr. Drury again wrote to the Duke, and enclosed a petition against the beer and gin-shops, which he prayed his Grace to present in the House of Lords. The Duke's reply, dated May 11, 1844, was [illegible] curt, as usual:—

He has received his Note [illegible] petition from Mr. Drury. The Duke begs leave to recommend that the Petition should be sent to some Noble Lord acquainted with Mr. Drury.

The petition was eventually put into the hands of the Bishop of Exeter, and duly presented.

Some months subsequently, Mr. Drury, who had written numerous letters to the heads of colleges at Oxford on the subject of college debt, drew up a voluminous report, embracing many facts, arguments, and suggestions, which he sent to the Duke, as Chancellor of the University. By return of post he had the following reply, which, certainly, is plain and very much to the purpose:—

Walmer Castle, Oct. 30, 1844.

F. M. the Duke of Wellington presents his Compliments to Mr Drury He has received his Note.

The Duke's attention has long been given to the Subject which Mr Drury states is that of the Paper which he has inclosed.

Mr. Drury would render a great Service to the University and to the Publick, if he could persuade the Parents of the Youths in the Course of receiving their Education in the University, to exercise their parental Influence and Authority, and a little of the Family Police, to prevent the Idleness and extravagance of their Sons.

The Exercise of such Powers would produce infinitely more Effects than all that can be done by the University.

George Drury, Esq., Shotover Park, Oxford.

Meanwhile, having perused the statement enclosed by Mr. Drury, his Grace wrote another letter on the day following, in which he entered at some length (but, it must be confessed, not with his usual degree of clearness) into a discussion of the subject. His correspondent, who had filled highly responsible public situations in the East Indies, had referred to the discipline of the College of Fort William, at Calcutta, which, he said, had repressed debt, by depriving those students who incurred it of all employment in the public service. And he suggested that, at Oxford, no degree should be conferred upon any student until all his debts had been paid and he had made a public declaration, on his honour, that he owed nothing to any tradesman there or elsewhere. The Duke's letter is as follows:—

[illegible] Castle, [illegible]

F. M. the Duke of Wellington presents his Compliments to Mr Drury. He has received Mr. Drury's letter upon the Subject of the Habit of the Students at the University of Oxford to incur Debts.

He begs leave to remind Mr. Drury that the University of Oxford is not the College of Fort William, of which the object was exclusively to educate the Young Gentlemen sent out to India by the Court of Directors of the East India Company in the Capacity of covenanted civil Servants of the East India Company.

These Young Gentlemen were educated in the College preparatory to their eventual employment in the Civil Service of the East India Company.

The Governor-General in Council had the Power and the Right, and it was his Duty, to adopt such Regulations as he might think proper to regulate their Studies and to govern their Conduct, as well during their Residence in the College as subsequently; and in the employment of these Young Gentlemen in the publick Service.

But the Convocation of the University of Oxford has no such Powers. It can regulate the Conduct and Studies of those whose Education is in the course of being carried on under its control and Superintendence.

It may make Rules and embody the same in Statutes. But they must be general and applicable to all. It is to be apprehended, that a Rule embodied in a Statute to require that all upon whom degrees of Honor at the University should be conferred should previous to, and as a condition previously to, the grant of the Degree of Honor, declare that He the Claimant was not in Debt; would not be considered a fair Rule, or one equal in its application to all the Students in the University.

Under ordinary Circumstances; those who would be most likely to incur Debt and to be indebted to Tradesmen in Oxford; are those whose Parents would be least opulent, and able to assist them with allowances sufficent to defray the necessary expences of their Residence at the University, setting aside all provision for Luxuries, or the gratification of Habits of extravagance.

While those well provided with allowances by their Friends would probably not be in Debt.

The Results then of the suggested Regulation would be to give the Rich alone the Ceremony of receiving the Honors of the University; as those alone could, under existing Circumstances, be certain of being out of Debt. Such a Regulation could not therefore be adopted.

George Drury, Esq., Shotover Park, Oxford.

Mr. Drury, who certainly had the *cacoethes scribendi*, lost no time in replying to the Duke's last letter, and took leave to question the accuracy of his statements and his reasoning; denying, in short, that the sons of parents in moderate circumstances were more liable than the sons of the wealthy to contract debts at the University, or that they did so contract them. On the contrary, he alleged that, in most instances, the larger the pecuniary allowance, the greater the prospect of debts being contracted. His letter, drew the following from the Duke:—

Walmer Castle, Nov. 12, 1844.

F. M. the Duke of Wellington presents his Compliments to Mr Drury He has received his Letter of the 11th inst.

It is really impossible for the Duke to carry on a Correspondence with every Gentleman who thinks proper to write to him. He has given Mr Drury an answer. He hopes he will be excused for declining to write any more upon the same Subject.

G. Drury, Esq., Shotover Park, Oxford.

The Duke and his pertinacious correspondent, were in reality old acquaintances, though the fact had probably been forgotten by his Grace. In July, 1805, on his return from India, Sir Arthur Wellesley had expressed a favourable opinion of the salubrity of St. Helena, and this may have been one of the causes why, ten years afterwards, that island was selected as the residence of Napoleon. While at St. Helena his attention appeared chiefly directed to political subjects, and he repeatedly expressed his desire to have a seat in Parliament.

The latest letter from which we shall quote, is dated June 18, 1849—a memorable anniversary. A collection of portraits and other paintings, by an eminent artist, who was relinquishing the practice of his profession was then about being brought to the hammer in New Bond street, and among them was a fine likeness of the late Earl of Mornington (Lord Marybrough, who succeeded the Marquis Wellesley in the Earldom), which a gentleman, who knew the artist, thought it probable the Duke might desire to see. He communicated with his Grace on the subject, and immediately received a note saying that he was much obliged to him for his letter, and adding, "He will avail himself of the opportunity of looking at the Portrait in question. He has Portraits of the late Lord Mornington, with which he is satisfied."

Probably no public man was so much troubled with correspondence upon subjects, most of which must have been wholly uninteresting to him. In numerous instances there is no doubt that he was written to in the hope of his sending autograph replies. The possessors of such letters (and we have recently seen some of them advertised as "to be parted with for a valuable consideration,") may not be well pleased to learn that, for many years past, the great majority of Wellington letters, even with his private seal, *were not written by the Duke*; they were dictated by his Grace to his private Secretary, Mr. A. F. Greville, whose handwriting bears much a marked resemblance to that of the Duke, that [illegible] experience in the calligraphy of both to distinguish one from the other. Both handwritings slant very much from right to left [illegible] by the capitals, both have capitals more frequently than the usual custom; and in both we find the like similarity of old spelling—such as *publick, musick*—and the omission of the second vowel in *honor, control*, and other words from the Latin. We caution the possessors of "Wellington autographs" to ascertain whether they were not written by Mr. Greville. *Franks* would be authentic, beyond a doubt.

WELLINGTON, SOMERSET.

WELLINGTON AND ITS DUKEDOM.

It would be an object of curious research, to trace and record the various circumstances which have led to the selection of certain localities in England, for the titles of Peerages, and have thus brought places of comparatively unlettered fame into prominent distinction. The conqueror of Victoria in the choice of the title of his Dukedom, presented a remarkable instance of the above fact; although, we are not aware that the cause of the selection has been publicly stated. At the close of the war, in 1814, all the titles and distinctions at the command of Crowns and Cabinets were showered upon the liberator of the Peninsula, and the conqueror of Napoleon. Douro made him a Baron; Talavera, a Viscount; Ciudad Rodrigo, an Earl; Salamanca, a Marquis; and Victoria, a Duke; and as these honours had all accumulated in his absence, his successive patents were read together in a single day, as he took his seat for the first time, and with the highest rank, among the Peers of England.

There are two towns in the empire which bear the name of Wellington: one in Shropshire, and the second on the Devonshire border of Somerset; the latter being that selected by the Duke. This is an ancient and respectable market-town, and a parish, situate near the Tone, in the hundred of Kingsbury West, in the union of its own name, and on the line of the Great Western Railway; distant 150 miles W.S.W. from London, by turnpike road, but 170 by rail; 7 S.S.W. of Taunton, 45 S.W. of Bristol and 24 N.E. of Exeter. The Duke of Wellington was lord of the manor, which appears to be an ancient one, having been held by the proud Duke of Somerset, who was beheaded for high treason *temp.* Edward VI. The manor was previously held by several Bishops; among whom was Asser, Bishop of Sherborne, preceptor to Alfred the Great, who was presented to the manor by that Monarch. On Asser's death, the manor was transferred to the Bishop of the newly-erected diocese of Wells, by whose successor it was held in the time of the Domesday survey, in which it is written Wallinone.

The town is about half a mile in length, and consists of five streets, respectively named High-street, Fore-street, Mantle-street, South-street, and North-street; the principal one being Fore-street, which contains the Market-house, a handsome and commodious modern structure; the upper part appropriated as a Town-hall and reading-room, and the base to the corn and provision market. The only extensive branch of manufacture carried on at Wellington is that of serges and woollens; steam being now the power principally employed in fabricating these articles.

The parish church, dedicated to St. John the Baptist, is a handsome Gothic building, having a nave, chancel, north and south aisles, and two chapels; at the west end is an embattled tower, adorned with pinnacles, having a turret on the south side. In the interior is a beautiful monument to Sir John Popham, who held the high office of Chief Justice of England in the reign of Queen Elizabeth and James I. The living is a vicarage in the patronage and incumbency of the Rev. W. W. Furman. In the western portion of the town is a handsome modern church, built chiefly at the expense and endowed by a former patron of the church of St. John the Baptist. Here are, also, places of worship for Independents, Wesleyan Methodists, Baptists, the Society of Friends, and Plymouth Brethren. In 1604, but rebuilt in 1833, almshouses were founded and endowed by Sir John Popham, who resided at Wellington Court House. Markets are held on Thursdays for corn, and all sorts of provisions; and fairs are holden on the Thursday week before Easter, and on Thursday week before Whitsuntide The parish contained, at the last census, near 7 000 inhabitants.

In the Civil War, at the period of the memorable siege of Taunton the rebels gained possession of Wellington by stratagem, and held out for some time against the King's forces under Sir Richard Grenville The garrison was, no doubt (says a contributor to *Notes and Queries*, No 32), at the large house built by Chief-Justice Sir John Popham, in the town of Wellington, and which, though of great strength, was much damaged on that occasion, and shortly fell into ruin.

The people of Wellington have not been unmindful of the illustrious hero who has conferred celebrity upon their town; which they have evinced by erecting, by subscription, upon the Black-down Hills about two miles south of the place—a monumental obelisk in honour of the Duke of Wellington, and in commemoration of the crowning victory obtained at Waterloo; and in the vicinity of this memorial is annually held a fair on the day of the battle, June 18. From the crest of the hill the eye ranges over a vast extent of rich and varied scenery; and on a clear day many a gleaming sail may be descried upon the Bristol Channel. On the southern side of the wall is the [illegible] of the counties of Devon and Somerset.

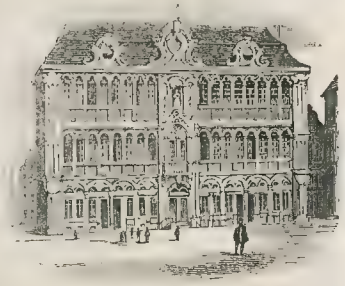
Since the death of the Duke of Wellington, the obelisk has been examined by Mr. Paul, of Taunton, architect, and is reported by him to be badly built, and so dilapidated as to endanger its stability. Some of the plinth has already fallen A subscription has been opened for the repair of the memorial; and it is proposed to carry out the original design of placing a bronze statue of the Duke on the top, and erecting a building for three military pensioners to take charge of the monument.

The accompanying Views of the town and obelisk are from Sketches taken within the past month.

MEMORIAL OF THE BATTLE OF WATERLOO, ERECTED ON BLACKDOWN HILL, NEAR WELLINGTON.

THE DUKE'S FORESIGHT, AND THE BALL AT BRUSSELS.

We quote the following from "Wellingtonia: Anecdotes, Maxims, and Opinions of the Duke of Wellington," just published.



HOUSE AT BRUSSELS WHEREIN THE DUCHESS OF RICHMOND GAVE A BALL TWO DAYS BEFORE THE BATTLE OF WATERLOO.

There was long current a popular error, "that the British army were surprised while the officers were dancing," on the evening of June 15th, two days before the battle of Waterloo. The facts are these:—On June 15th, Bonaparte crossed the Cambre, and advanced upon Charleroi; but this attack was not thought to be a serious one, and it was believed that he really intended to open his road to Brussels, the head-quarters of the Duke, by the valley of the Cambre. Accordingly, his Grace waited at Brussels for proof of the attack upon Charleroi not being a feint, which was brought at three o'clock in the afternoon to the Duke at his hotel, about 100 yards from head-quarters in the park at Brussels, which he had taken care not to quit during the morning, or the preceding day. Wellington now put his army in motion to his left, the order for this memorable march being given—not in a ball-room at midnight, as idle report long had it—but in the Duke's hotel, and by about five o'clock in the afternoon These orders must have reached most of the corps by eight, and probably all by ten o'clock at night.

The Duchess of Richmond had issued cards for a ball at Brussels on the same evening; and upon hearing that the enemy was advancing, proposed to recall the invitations. The Duke, however, to prevent alarm, requested that the ball might take place, which is rather a proof of foresight than inattention, as it clearly turned out. Wellington, therefore, went to the ball, and many of his officers went as well as he, because their business for the day was done.

About midnight the general officers were quietly warned, and quietly disappeared from the ball-room. Shortly after, the younger officers were summoned from the dance, but without any bustle, and the troops were mustering, but not in so hurried a manner as Lord Byron would have his readers believe. By this time, the troops at Brussels were mustering, and before the sun of the 16th of June arose, "all were marching to the field of honour, and many to an early grave."

ALLEGORICAL DESIGN

ARMORIAL ACHIEVEMENT OF FIELD MARSHAL ARTHUR DUKE OF WELLINGTON, K.G., G.C.B., G.C.H.

ARMORIAL ACHIEVEMENT OF FIELD-MARSHAL ARTHUR DUKE OF WELLINGTON, K.G., G.C.B., G.C.H.

Arms.—Quarterly, 1st and 4th gu. a cross arg. in each quarter, five pintes in saltire for WELLESLEY; 2d and 3d, or, a lion rampt., gu. ducally collared gold, for COWLEY. Over all, in the centre chief point, an escocheon of augmentation, charged with the Crosses of St. George, St. Andrew, and St. Patrick conjoined, being the Union Badge of the United Kingdom of Great Britain and Ireland.

Crest.—Out of a ducal coronet, or a demi-lion rampant gu., holding in the paws a forked pennon arg., flowing to the sinister, charged with the Cross of St. George, and the ends gu.

Supporters.—Two lions gu. gorged with Eastern coronets and chained or.

Motto.—Virtutis fortuna comes.

Round the shield of arms appears THE GARTER, dark blue, edged with gold, bearing the motto, "Honi soit qui mal y pense," in gold letters, with buckle of gold. The Collar of the Order of the Garter next encircles the armorial bearings. This collar is of gold, and consists of twenty-six garters, in each a red rose, and as many knots, white, to which is pendent the George, being the figure of St. George on horseback, in armour, encountering a dragon with a tilting spear; the whole gold. Around the collar of the Garter comes that of the BATH, of which famous Military Order the Duke was a Knight Grand Cross. This collar, also gold, is composed of nine Imperial crowns, and eight roses, thistles, and shamrocks issuing from a sceptre, in their proper colours, tied or linked together with seventeen gold knots, having pendent therefrom the Badge of the Order; viz, a gold Maltese cross of eight points—in the centre, the rose, thistle, and shamrock, issuant from a sceptre between three imperial crowns or, within a circle gu.—thereon the motto, "Ich Dien" (I serve), in letters of gold.

The external collar, encircling the whole, is that of the ROYAL HANOVERIAN GUELPHIC ORDER, which is formed alternately of lions passant guardant, and double cyphers of G. R.; pendent from it is the Badge, viz. "a Maltese cross, surmounted by two swords and the crown of Hanover upon the upper limb of the cross, and between each limb a lion passant guardant in the centre."

Suspended beneath are exhibited the numerous foreign Orders, to which the illustrious soldier was entitled. Beginning on the dexter side—that is, under the word "Virtutis," of the motto, as shown in our Engraving—we will name each in succession.

1. THE TOWER AND SWORD of Portugal, conferred on "Arthur Lord Viscount Wellington, *Conde de Vimiera* for his distinguished and glorious services," 1811.
2. THE SWORD OF SWEDEN, first instituted by Gustavus Vasa, and revived by Frederick I. Of this Order the late gallant Sir Sidney Smith and Admiral Lord De Saumarez were Grand Crosses, as well as the Duke of Wellington.
3. THE ANNUNCIADE OF SARDINIA.—This Ancient Order was conferred on the late Viscount Exmouth.
4. THE BLACK EAGLE of Prussia. This is the Chief Order of the State. All the Knights enjoy the rank of Lieut.-General of the King's Forces. No one, under the rank of a Sovereign Prince, can receive it before the age of thirty.
5. THE ELEPHANT OF DENMARK.—A very ancient and, after our own glorious Garter and the Golden Fleece, the most distinguished Order in Europe. It arose with the Crusades, and has at all times been awarded most sparingly. The only British subject who held in the present era was Wellington.

   ST. ANDREW OF RUSSIA, instituted by Peter the Great.
7. THE GOLDEN FLEECE of Spain; justly esteemed one of the most honourable and illustrious of the many orders of Chivalry, second only to the Garter. It was founded in 1429, at Bruges, by Philip the Good, Duke of Burgundy and Earl of Flanders, who chose for Badge *the Fleece*, the material of the staple manufacture of his country.
8. THE HOLY GHOST of France, the most distinguished Order of Chivalry in France.
9. ST. JANUARIUS of the Two Sicilies, founded in 1738 by Charles, King of Naples, afterwards Charles III., of Spain.
10. MARIA-THERESA of Austria.
11. ST. FERDINAND OF MERIT of Spain.

THE LATE DUKE OF WELLINGTON.

DISCONSOLATE along the lonely shore
Weeps the fair daughter of th' imperial isle;
And ever as she mourns, old Ocean's roar
Is hushed into a plaintive song; the while
In many a throb of love his waveless pour
About her feet, and many a saddened smile
Gleams on his azure countenance; but she
Strays sadly on, nor heeds his sympathy!

Weep on! nor fear to let thy sorrows flow,
For tears are holy when the noble die!
Sigh on! The sounds which breathe a nation's woe,
When, by inexorable destiny,
The brave, the wise, the righteous are laid low,
Find not a purer anthem 'neath the sky:
The noblest requiem o'er honoured biers
Are freemen's sighs and freemen's honest tears!

And he was worthy, who has sunk to rest—
Worthy a people's lasting gratitude!
The foremost of these later times confessed—
The centre of admiring eyes, he stood,
A beacon to the world; a creature blessed
With the strong love of millions, which the rude
Assault of envious tongues could never move—
So hallowed was the tie, so deep their love!

The meteor blaze of conquerors who sweep
Along their burning tracks, the crimson dye
Of desolation in their rear, who steep
The earth with carnage, crowns, and slavery;
Who reck not how the trampled nations weep,
So they but rear their godless thrones on high,
Or grasp the phantom, glory! senseless prize!
The blood-besmeared idol of their eyes!

This was not his, but the enduring fame
Of constancy and truth; the steady glow
Of never-swerving honesty, whose fame
Is centred in itself, and cannot grow
By man's applause, nor lessen by his blame!
His were the glorious deeds which only flow
From true nobility, whose steadfast soul,
Save "duty," owns no law, nor hears no controul!

No tyrant wonder of the age—his sword
Ne'er flashed in vain in Freedom's righteous cause,
Fiercely on Gallia's desolating lord
It wreaked full vengeance, for the outraged laws
Of God and man; and blessed peace restored
To earth, long drunken with the reeking wars
Of hideous Ambition, which stern fate
Wrecked on a Lybian rock—lone, desolate!

But he has passed away—the good, the true!
Sunk is the arm of might; the mightier will,
Which crushed all obstacles that Fortune threw
Athwart its onward course. The voice is still
Which thundered from Assaye to Waterloo,
And roused the drooping hearts of men, until
The morning star of Liberty arose
O'er the wild storm, and hushed it to repose!

No more shall listening senates throng to catch
Rich wisdom from his honoured lips; no more
Shall eager myriads for their hero watch,
Blessed with one smile from him all hearts adore!
Alas! for human lot! that Death must snatch
The loved and glorious from our gaze! 'Tis o'er—
The fitful scene! and all that grief can claim
Of England's noblest son is but a name!

But mighty is that name! It breathes a spell
Which time shall ne'er efface; and sire to son
With glowing lip and kindling eye shall tell
The tales of our great Captain, Wellington!
Stirred by th' electric sound, each heart shall swell
With honest rivalry for laurels, won,
Not in the lust of empire's lawless fight,
But in the cause of Liberty and Right!

Then place the costly monument! 'Tis good
That love shall find a shape. And we would show
The nations of the earth our gratitude.
But for ourselves—his memory will grow
More richly round each loving heart, imbued
With truth and earnestness—the springs whence flow
Those traits which made him all we love to scan—
The model of a perfect Englishman!

B.

THE DUKE'S HUMANITY.

(*To the Editor of the* ILLUSTRATED LONDON NEWS.)

SIR,—The English mind is so deeply imbued with admiration of the great qualities of the great Duke, that all anecdotes of him tending to strengthen that admiration seem superfluous; but, sensible as I am of the existence of the feeling, I beg your notice of an anecdote which was narrated to me in Martinique, by the late Lieut. J. A. Eyma, of the Royal Waggon Train, an officer who had served as a subaltern in the Peninsula during the hottest period of the war, and who had retired from the service to cultivate his paternal estate in that beauteful island, where I was his guest in the year 1838.

"Shortly," said he, "after one of our severe battles, Captain —— and myself, with some half-dozen surgeons, had charge of an old Spanish *château*, which had been converted into a hospital for the wounded. One afternoon we had just sat down to dinner, when the door suddenly opened, and, to our great surprise, in walked the Duke, dressed as usual in his blue cloak, and attended by a single orderly. After the first salutations, addressing Captain ——, he said, 'Captain ——, I will thank you to take me to your chamber.' 'By all means, my Lord,' replied the Captain; and, supposing the Duke wished to wash himself after a ride of sixteen miles from head-quarters, he added aside to me, 'A clean towel, Eyma.' With equal devotion and alacrity I snatched a towel from the linen-chest, and followed them into the Captain's apartment. We had no sooner entered it than the Duke turned round to my comrade and, with a serenity of manner I shall never forget, said to him, 'Captain ——, I am greatly displeased to find that you, an English officer, should be with the care of the wounded in this hospital, should have appropriated to your own use the most airy and spacious apartment in the whole building. I desire, Sir, that you give it up to the invalids this very night; and remember, if, on any future occasion, I shall come to know of your discharging your duty in this inconsiderate manner, I shall send you home to England, as unfit to serve his Majesty.' The Duke then visited, with the surgeons, all the wards: he spoke kindly to several of the sufferers; inquired into, and made notes on the state of the medicine-chest; and, after being thus engaged for about an hour, he sat down with us to our rough repast. I recollect sitting on a cask, myself, at that very dinner, and, after what had happened, did not dare to improve my seat. Soon after he left us, to join the camp; so that he rode 32 miles that day, with apparently no other object than to see after the sick and wounded. It was some time before my friend, the Captain, recovered his wonted spirits: so deeply did he feel the rebuke of his noble and ever thoughtful commander."

This true tale would probably never have been made public, unless I had told it. Characteristic of the man, it seems to me an answer to the few "puny whipsters," who would derogate from his noble nature by implications that he was wanting in those kindly feelings which adorn even the sternest warrior. Setting aside his mighty achievements, his whole career seems to teach mankind that useful lesson—that true benignity lies, not in the indulgence and gratification of morbid feelings, but in personal abnegation and benevolent activity.

The lesson seems complete when we know that the ashes of such a man will be conveyed in triumph to the tomb, and repose by the side of him whose last dictum was—"England expects every man will do his duty!"

I am, Sir, your obedient servant,

J. H.

NEW BOOKS, &c.

Just ready, Vol I., Price 5s, to be completed in 2 vols.
ILLUSTRATED LIFE OF THE DUKE OF WELLINGTON.
Demy 8vo, handsomely bound in cloth, gilt.

AN ILLUSTRATED LIFE of FIELD-MARSHAL the DUKE of WELLINGTON, the Commander-in-Chief of the British Army. By J. H. STOCQUELER, Esq, Author of "The British Officer," "The Hand-Book of British India." TEAS, COFFEES, SUGARS, RAISINS, CURRANTS RICE, &c. &c. &c.—The Public are requested to [illegible] every article manufactured and

THE COFFIN OF THE DUKE OF WELLINGTON.

THE DUKE'S COFFINS.

THE inner coffin, or pine shell, wherein the body is placed, was made by the Duke's own carpenter at Walmer. It is placed in a lead coffin, of twice the usual thickness and strength; and this, in a coffin of English oak, handsomely finished.

The outer coffin or case is of solid Spanish mahogany, covered with the richest crimson Genoa velvet. It is panelled with large gilt nails, and the ducal coronet engraved within the several gilt angle-plates; and at the sides and ends are large ring handles. In the lower portion of the upper panel of the lid are the Duke's arms; and in the centre of the foot panel is the Star of the Order of the Garter. The central or inscription plate is gilt, and bears the following:—

"The Most High, Mighty, and Most Noble Prince Arthur, Duke and Marquis of Wellington, Marquis of Douro, Earl of Wellington, Viscount Wellington of Talavera and of Wellington, and Baron Douro of Wellesley, Knight of the Most Noble Order of the Garter, Knight Grand Cross of the Most Honourable Order of the Bath, one of her Majesty's Most Honourable Privy Council, and Field-Marshal and Commander-in-Chief of her Majesty's Forces. Born 1st May, 1769. Died 14th September, 1852."

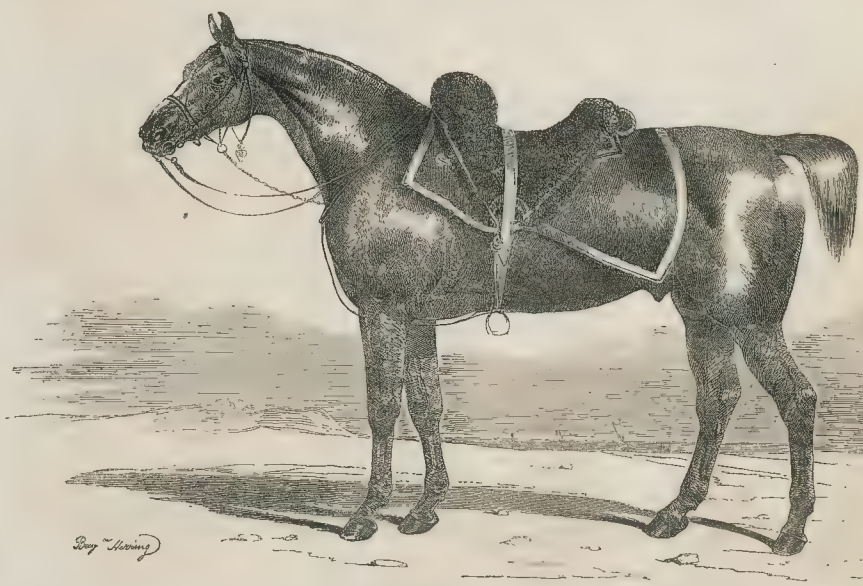
The lead, oak, and mahogany coffins were made by Messrs. Dowbiggin and Holland, of Mount-street, Grosvenor-square: the outer coffin is altogether very handsome, but is not so sumptuous in its appointments as it would have been, had it been expressly made for a State funeral; the wishes of her Majesty not officially being known at the time the order for the coffin was given to the undertakers.

ANECDOTES OF THE DUKE OF WELLINGTON.

HIS HUMOUR AND KINDNESS.—When Haydon, the painter, was engaged with his picture of "George IV. visiting the Field of Waterloo, accompanied by the Duke of Wellington," he was desirous of having a hat and other matters to paint from, so that perfect accuracy of detail might be ensured. He had occasion to see his Grace, and took the opportunity of expressing his wish. The Duke's reply was characteristic: "I neither sell nor lend my old clothes, Mr. Haydon." He afterwards dropped a hint about his servant; and through Mr. Greville, Haydon became possessed of all he required.

HIS PERSON UNIVERSALLY KNOWN.—A friend happened to call upon Haydon soon after he had painted for Sir Robert Peel the large picture of "Napoleon at St. Helena" (the original sketch of which was bought by the Duke of Sutherland). After admiring it for some time, and complimenting the artist on daring to choose such a position for an historical picture, observed, "It is all very well to show the back of Napoleon, because everybody knows his figure; but to attempt it with anybody else would be an utter failure." Haydon, nothing daunted, differed from his friend, who, in the true English spirit, backed his opinion by offering a bet, which Haydon accepted. A few months elapsed, and his friend called again, and was shown into the studio, which, then-a-days, was Haydon's reception-room. On removing one picture, he (apparently by accident) disclosed one that stood behind, when his friend exclaimed, "What a capital likeness of the glorious old Duke!" "Ha, ha!" laughed Haydon; "pay me my twenty guineas." His friend handed the money, and Haydon very properly handed him the picture.

HIS UNAPPROACHABLENESS.—A literary gentleman had recommended to the Duke the perusal of a work recently published, and was requested to send it. This he did several times, and as often was it refused acceptance. Seeing the Duke a few weeks afterwards, he referred to the subject; whereupon the Duke observed:—"If I were to take in all the trash sent to me, I might furnish a store-room as large as the British Museum." After writing a few words, he added:—"Stick that on the outside, and I'll get it." This was his own name and address written by himself. So to ensure delivery, it was necessary to have his own endorsement.



"COPENHAGEN," THE DUKE'S FAVOURITE CHARGER.—FROM A PAINTING AT STRATFIELDSAY.

THE DUKE'S CHARGER "COPENHAGEN."

AMONG the numberless anecdotes of the late Duke of Wellington, which have lately been printed, his celebrated charger Copenhagen has come in for no small share; but several of his pedigrees details are stated, in *Bell's Life in London*, to have been incorrectly given From the columns of that paramount authority upon matters equine we therefore quote the following, which the writer assures us may be relied upon as a true and authentic account of this famous horse:—"The horse was bred in the year 1808 by the late Field-Marshal Grosvenor; his sire was the famous little racer Meteor, a son of Eclipse. Meteor hardly exceeded 14½ hands; he was, however, very strong and handsome, with a remarkably good constitution and legs, which enabled him to stand the wear and tear of training for seven years. Meteor was just a little short of the first class or form of race horses, running well at all weights and distances. His illustrious progeny, Copenhagen, appears to have inherited the stoutness of his sire in no slight degree, although very unsuccessful as a race-horse upon the turf. His dam was a mare whose name is given in the "Studbook" as Lady Catherine, by John Bull, a very large, strong horse, the winner of the Derby Stakes in 1792; who, as well as Meteor, was in the stud of Lord Grosvenor, the grandfather of the present Marquis of Westminster. By those who are versed in the mysteries of the "Equine Persuasive," Lady Catherine was always considered to be entitled to the "bend sinister." In fact, she was *not quite* thoroughbred. The newspapers have informed us that the Duke's charger was named in consequence of his having been foaled at Copenhagen, which we must beg leave to doubt; for, even supposing Field-Marshal Grosvenor to have visited the Danish capital in 1808, either in a military or a civil capacity, which does not anywhere appear to be the case, it is hardly possible that he would have taken a brood-mare as a part of his travelling establishment. At that time it was a very common circumstance to name race-horses after some illustrious event happening during the war. Thus we have the names of Albuera, Waterloo, Smolensko, St. Vincent, and many others. For a similar reason Copenhagen most probably received that title. At the time Copenhagen was foaled, Meteor was 25 years old. Copenhagen was taller than his sire, being very nearly, if not quite, 15 hands, but neither so strong nor so handsome. The first time he started, he received about a stone in a mile race from all the others four in number, and obtained the third place. The winner, the Duke of Rutland's Sorcery, also the winner of the Oaks in 1811, was a good mare, the rest inferior animals; consequently, this was a bad performance. Upon the whole, in the year 1811, Copenhagen ran nine times and paid one forfeit, all amongst the worst horses of the year, and won only twice—once in a match against probably the worse racer of the day upon the English Turf, and the other time a sweepstakes of 90 guineas at Huntingdon. The winner might have been purchased for 300 guineas, but no one would claim Copenhagen at that price. The balance of stakes won and lost in that year was about £220 against him, and we may, therefore, set him down, with trainers' bills, jockeys' fees, &c., as a very indifferent performer, and a dead loss of at least £400. At four years old he ran at Chester Races in the month of May, and never afterwards. There he came out for three inferior prizes, and ran seven heats without having in any one of the seven put his head into the proper place. Copenhagen never again appeared upon the turf. As the Duke was not his earliest master in the capacity of a charger, and as he was only seven years old at Waterloo, we presume he could not have seen actual service under his illustrious burden for more than two campaigns.

The read r will find some details of the military career of Copenhagen in the ILLUSTRATED LONDON NEWS for October 9th, page 308.

In Sir Thomas Lawrence's celebrated portrait of the Duke on the field of Waterloo, the hero is mounted upon "Copenhagen." The original study for the picture, painted on panel, was purchased by a gentleman at Sir Thomas Lawrence's sale, and is now in the possession of Mr. Walesby, of Waterloo-place.

The Wellington Funeral.

With this week's "Illustrated London News" is presented a Large Engraving of the Procession of the Wellington Funeral-Car. No copy is issued from this office without the Plate, gratis. Next week, Dec. 4th, another Large Engraving, Gratis, of the Interior of St. Paul's, as it appeared at the moment of the Interment.

198, *Strand, November* 27, 1852.

OUR FINANCIAL POLICY.—THE LAND-TAX.

WHATEVER may be the comparative merits of the Free-Trade motion of Mr. Charles Villiers, and of the amendments of Mr. Disraeli and of Lord Palmerston; whatever may be the worth or the grace of the tardy recantation of their past errors by the chiefs and the subordinates of the Ministry; and whatever may be the fate of the present Administration, or the complexion of the next; it is evident that, among the earliest measures to which the attention of Parliament will be directed, are those which involve the principles and the incidence of taxation. The Budget of Mr. Disraeli, or of some other Chancellor of the Exchequer, must, of necessity, open up the whole question of our late and present policy on the all-important points of the gradual emancipation of industry and the equitable distribution of the the national burdens. Financial problems—always difficult of solution—are peculiarly embarrassing at the present juncture; for the Legislature is not called upon merely to raise an annual revenue, but so to apportion the weight of taxation as to bring it into harmony with the policy of Free Trade. Each class claims exemption for itself; and were the Chancellor of the Exchequer to admit the several pleas that ingenuity can invent, it would be impossible to replenish the Treasury. Whatever form taxation may assume, it is always a deduction from wealth; and the only way to avoid injustice is to adapt it to the sources from which wealth is derived. Such was the old constitutional system, before the pernicious scheme of anticipating revenue was adopted, and a National Debt established; since that period, Customs and Excise have been regarded as guarantees for the dividends of the fundholder. Free Trade compels a return to direct taxation; nor, indeed, would Sir Robert Peel have ventured to relax a restrictive tariff, had not the experiment been accompanied by an assessment on property and income. If the commercial policy of that great statesman is to be carried out to its legitimate results, the day will come when revenue, except in the case of such articles as wine, spirits, tobacco, and perhaps a few others, must cease to be collected from articles of consumption.

Prior to the restoration of Charles II. direct taxation was the rule, and indirect taxation the exception. The hereditary crown lands and the feudal dues were the main resources of the national treasury: the latter were abolished in 1660, and an Excise substituted to make good the deficiency caused by their surrender; the former were given up, with very slight reservations, at the Revolution of 1688, and a Civil List created as an equivalent. During the contest for the expulsion of James II., the people were promised that some compensation should be awarded for the abandonment of the feudal dues; and, accordingly, in 1692, the Land-tax was imposed, the rate being four shillings in the pound on the true yearly value of real property, and twenty-four shillings for every £100 personal property (except debts, stock upon land, and household stuff), or 4s. in the pound on £6, the legal interest of money at that time. This ancient precedent contradicts the modern doctrine of a Property and Income-tax being strictly a war-tax, as it was originally intended as an equivalent for the feudal dues which were coeval with the Conquest. And it is also important to observe that the desire of the Legislature was to apportion the tax to the growing or declining rental; for, in the terms of the statute, the collectors of the revenue are directed to assess "after the rate of four shillings in every twenty shillings of the full yearly value, as the same [lands] were let for, or worth to be let, *at the time of assessing thereof.*" However, in 1697, the Legislature, chiefly composed of landholders, contrived to alter the original terms of the Act; so that the tax no longer took effect on the increasing value of the land, but became a fixed annuity on a rigid scale. On that scale the Land-tax Act of 1797-8 was based; although, in the lapse of a century, the landed rental had prodigiously increased. For the 7th section directs that the several quotas to be levied on each borough and county throughout the kingdom shall be rated according to the proportions charged by the 4th of William and Mary.

CONVOCATION OF THE CLERGY.—SITTING OF THE LOWER HOUSE IN THE JERUSALEM CHAMBER.—(SEE NEXT PAGE.)

It is further to be noted that the Act of William and Mary took effect on personal property and offices. The former was exempted by an Act passed in 1833. The evasions had been numerous and shameful. Mr. Wood, Chairman of the Board of Stamps and Taxes, when examined before the Select Committee on Agricultural Distress, in 1836, stated, in answer to question 9132:—"The working of the Act depends entirely upon the local commissioners; and we know nothing of the assessments which they make, or of the description of property they choose to assess; and I suppose it had never been the custom to assess personal property generally, but that they found that the quota was easily raised within the county, and that they did not choose to disturb the assessment which before had been made. We find that in most districts there was a small charge made for the duty on personal estates, but it was very small indeed. I think, latterly, it was between £5000 and £6000 a year." There used to be charges on pensions, that of the Duke of Marlborough having been referred to in Mr. Wood's evidence; but this department of the revenue has been so loosely managed, that it appears impossible to arrive at the whole of the facts. Mr. Wood, however, did mention an instance where the rate was still levied at 3s. 11½d. in the pound.

A very instructive pamphlet on this subject has been recently published by Mr. Ayres, editor of the *Bankers' Circular*, and its appearance is opportune. It is full of very curious and carefully-compiled tables, and offers many interesting points of comparison. Liverpool now pays to the Land-tax one thirty-sixth of a penny in the pound; Manchester, Preston, and Stockport, one farthing; Leeds and Macclesfield, one halfpenny. In portions of the metropolis the rates are very different. In St. Paul's, Covent-garden, it is 1s. 10½d.; in St. Mary's-le-Strand, 1s. 1½d.; in St. Andrew's, Holborn, 11¾d. St. Pancras, Marylebone, and Paddington, are only charged one farthing. These inequalities are glaring, but they are fair specimens of the whole system. It is also obvious that they who pay the heavy Land-tax, and also a Property-tax, are doubly assessed on the same estate, which is a flagrant injustice. The aggregate Land-tax of 1797-8 may now be taken to yield £2,000,000, and the tax on land under Schedule A of Property-tax has reached £2,652,951, so that in these cases the burdens are cumulative.

In any scheme for the equitable re-adjustment of taxation, this subject cannot be overlooked. True it is that a portion of the Land-tax has been redeemed under the act of 1798, but it would be easy to get rid of this exemption by compensating the holders, so that one uniform plan might be enforced. Justice is sure to be violated or evaded, if exceptional rules are permitted, and it is on real property, whatever its character may be, that the great weight of fiscal burdens ought to press. At any rate, the dividends of the fundholder should be mainly drawn from that source, from whatever funds the current expenditure is defrayed. The tendency of Free Trade is to cheapen commodities, and add to the purchasing power of all fixed annuities, and even of professional incomes; and it is, therefore, only equitable that they who specially benefit by the commercial policy with which the name of Sir Robert Peel is connected, should furnish the means by which it may be fully carried out into practice. It was inconvenient to the proprietors of nomination boroughs to witness their disfranchisement; to the West India planters, to encounter the competition of foreign sugar; to many of our land-owners, to surrender the Corn Laws; to our ship owners, to abandon the Navigation Laws; and it may be equally inconvenient to the holders of real property to bear an augmented or a permanent tax. But we have commenced a new system, and must accept it with all its consequences. It is a vain attempt to separate our fiscal from our commercial policy. In all directions, we must lighten or remove the weights which press upon the springs of industry. This can only be effected by a complete revision and readjustment of taxation; and, unless statesmen can take a bold and comprehensive view of the whole of this complicated subject, and raise the revenue on such principles as may remove all impediments to the freedom, both of the home and foreign trade, they will not be able to direct the destinies of the empire with credit to themselves and advantage to the people.

CONVOCATION OF CANTERBURY.

THE recent proceedings of Convocation have already been briefly recorded in our Journal. The houses were opened on Friday, the 5th inst. The Archbishop of Canterbury, wearing his Convocation robes, the Bishops of Oxford, Manchester, and Llandaff, wearing theirs; and Deans, Archdeacons, and clergy, in hoods and gowns, attended Divine service, performed in Latin, at St. Paul's Cathedral. This being over, they retired to the Chapter House, where the Royal writ was read, and the members of the Lower House ordered to withdraw and elect a prolocutor. The choice fell upon Dr. Pascoe, Dean of Ely. The Convocation was prorogued till Friday, the 12th, when both Houses met in the Jerusalem Chamber at Westminster.

At this meeting an address was proposed to the Crown, when the Bishop of Oxford intimated his intention of moving an amendment, which would have the effect of raising the question of the expediency of reviving the active powers of Convocation, and consequently of the nature of those powers.

The Convocation met again on Tuesday and Wednesday (last week).

The Upper House, at its meeting on Tuesday, conceded to the press the privilege of admission in order to report the proceedings. There were present the Archbishop of Canterbury, the Bishops of London, Winchester, Lincoln, Exeter, Rochester, St. Asaph, Peterborough, Llandaff, St. David's, Oxford, Salisbury, Worcester, Norwich, and Chichester

A discussion took place at the outset as to the right of the Archbishop to prorogue the Convocation without the consent of the suffragans. The Archbishop said he had no idea of surrendering the right hitherto exercised by his predecessors.

The business of the sitting commenced by the reading of the address to the Crown proposed by the Archbishop of Canterbury. It stated, that there were many of the clergy favourable, and many unfavourable, to the revival of Convocation; and that Convocation was content to leave the matter in the hands of her Majesty. Upon this the Bishop of Oxford moved an amendment, stating that the active deliberation of Convocation should be resumed; but disclaiming the discussion of controverted questions of doctrine, and confining itself to questions of discipline. The Bishop of Winchester opposed the amendment; as did also, though less decidedly, the Bishops of Llandaff, Worcester, and Norwich. The Bishop of Salisbury supported it. The Bishop of St. David's assisted with both the original address and the amendment, struck out a third course, in which several, and more particularly the Bishops of Exeter and London, concurred. He proposed that both should be submitted to a committee to ascertain how far they could be united; which suggestion the Archbishop would not say whether he would agree to. Ultimately, the Bishop of Oxford withdrew his amendment, in favour of one drawn up by the Bishop of Salisbury, praying that Convocation might at no distant date be revived, and observing any intention of touching doctrinal questions. This was agreed to; as was also an additional clause protesting against Papal aggression.

A committee, consisting of the Bishops of London, Oxford, Salisbury, Exeter, Winchester, Chichester, and St. David's, was afterwards appointed, on the motion of the Bishop of Oxford, to consider whether an address should be presented to her Majesty with respect to a measure for the better enforcing of discipline among the clergy. The committee was directed to confer with the Lower House.

Wednesday's business consisted in settling some matters of routine, and in finally re-ang the address to the Throne.

The Lower House met at ten o'clock. The actual business consisted of the appointment of a Committee of Grievances, to consider the re, ntation of "gravamina" and "reformanda" presented in a pap. by Dr. Spry at the previous sitting. This Prolocutor carried the resolution to the Upper House; and on his return reported that the Archbishop had requested that the document be left with him, and that he would send an answer.

Some other matters were disposed of; and the House was in the midst of a discussion on an important paper framed as an address to the Queen, praying that license might be given to protest against the Papal aggression in which all the branches of the Church within and without Great Britain would be invited to concur, when a message was sent proroguing the sitting until the next day.

The Lower House met accordingly on Wednesday; and the address from the Upper House having been received, several additions were made, one being an expression of regret at the death of the Duke of Wellington. On that portion of the address relating to the meeting of Convocation, which rather hinted than expressed a formal desire for the revival of its active functions, Archdeacon Hare moved an amendment, expressing a desire that her Majesty would take steps for the speedy convening of a synod, in which the manifold gifts of the lay members of the church may work together with those of her ecclesiastical members." This was seconded by the Rev. Mr. Seymour; but, in deference to the general opinion, the amendment was withdrawn. An attempt was made nevertheless, to raise a discussion. Dr. M'Caul, Archdeacon Sinclair, and Archdeacon Garbett objected to the revival of Convocation. The Rev. Hayward Cox moved an amendment, in opposition to the resumption of the functions of Convocation without lay co-operation, but the amendment was lost by a large majority. Subsequently the address was carried up by the Prolocutor, who reported that their Lordships had agreed to the alterations.

The address of Convocation, as finally amended and adjusted, stood as follows:—

Madam,—We, your Majesty's faithful subjects, the Archbishop, Bishops, and clergy of the provinces of Canterbury, assembled in Convocation, most humbly approach your Majesty with respectful assurances of loyal affection to your Majesty's throne and person.

And we desire to add our sincere congratulations, that since the last occasion when we enjoyed a similar privilege, it has pleased Almighty God to bless both your Majesty's Royal family and the country at large with a measure of prosperity which demands our warmest thanksgiving.

Your Majesty has been graciously pleased to state to your assembled Parliament, that your Majesty's received assurances of a disposition on the part of Foreign Powers to maintain those friendly relations with this country which have already been prolonged beyond all former example. And never, perhaps, was there a time when the blessings of peace were more generally prized by persons, more willingly obedient to the laws, or more loyally affected towards the Throne. It is our earnest prayer to Almighty God that he will continue to our selves, and extend to all nations, the blessings of peace and unity.

Here we earnestly desire to assure your Majesty of our deep sympathy with the nation which your Majesty has so gracious y expressed, a sorrow which is even shared by foreign nations, for the loss which the empire is now mourning, in the death of that great warrior and statesman, to whom, above all, it has been owing, under God's overruling Providence, that we have enjoyed this long and unbroken period of peace and prosperity. We assure your Majesty that we pray, above the splendours of his greatest exploits, that high sense of duty which led him to devote all his faculties to the service of his sovereign and his country, and to yield his most glorious victories chiefly as they secured a lasting peace.

One object, however, on which your Majesty will expect us to feel the deepest interest, is that of religion in the land. And here there is much to encourage, whilst there is also much to lament; and much that we hope may really to amount. Great exertions have been made during the last thirty years, with the desire of providing the means of spiritual instruction for a population increasing rapidly beyond all former experience. Much has been done by the awakened liberality of individuals, assisted by recent legislative measures, towards enabling the Church to fulfil the ends of her divine mission. Much, however, still remains to be done; and we assure your Majesty that our heartiest endeavours shall be used to this end, where they are in the spiritual wants of the population. We feel a second requirement that time cannot but suggest, and which

8,000,000, rather over than under. The Prefects and sub-Prefects have been enthusiastic in their appeals to the public. One official who declares that "the defeat of Waterloo has rendered as a tear on the heart of France," exclaims: "Re-establish the Empire, and put an end to the mourning of thirty-seven years." Another declares that the establishment of the Empire is tantamount to tearing out the first page from the Treaties of 1815. Another functionary has had a ballot-box made expressly to be taken round to the hospitals, and to the residence of sick or aged persons, whom disease or the infirmity would prevent from going to the municipality to vote. To show his gratitude, Abd-el-Kader writes to petitioned the Mayor of Amboise to be allowed to vote, and a special arm was provided for the reception of the Emir's vote, and that of his officers.

SPAIN.

A grand levee was held by the Queen and the Queen-Mother on the 19th, it being the *fête* day of the former. The attendance was very numerous. The *Heraldo* states that the statutes of the company for the canalisation of the Ebro have been approved of by the Royal Council. The governor of the province of Malaga has issued a decree prohibiting the carrying of the long knife called *navajas*, under pain of imprisonment. Letters which had reached Madrid from Manilla, dated Sept. 15, represent that colony to be perfectly tranquil.

GREECE.

The *Morning Herald* announces, that at "Lord Malmesbury's own house," on Saturday, a convention was signed on behalf of England, France, Russia, Bavaria, and Greece "The new treaty (says the *Herald*) declare that none but a Prince professing the Greek religion shall reign over the Greek people.

THE AUSTRALIAN GOLD FIELDS.

According to the latest accounts received from the Australian Gold Fields, the quantity of the precious metal discovered is becoming quite fabulous. The Victoria diggings in one month alone (August) yielded 246,000 ounces. One place, a "flat," between Adelaide Gully and Watt'ree Flat, on the road leaving from Forest Creek or Fryer's Creek, has obtained colonial celebrity by a party of four Adelaide men, who had gone there "prospecting," turning up 150 lb. weight of pure gold in one morning between breakfast and dinner. Seven tons of gold were lying idle at Adelaide Gully for want of horses to take them to Melbourne, and more was fast accumulating. At New Bendigo Flat, Forest Creek, one "party" took 12 lb. weight from one hole, and four Germans gained 21 lb. of gold in one week. At Donkey Gully, in the upper part of Forest Creek, 100 ounces were taken out by a party in one week, and many others in that vicinity are digging the old deserted holes and doing "very well."

The papers contain a very interesting document, a price current of labour, published by a Mr. Pitchett, of the Victoria Registry Office. Of course the prices are *bona fide* ones, because Mr. Pitchett is prepared to engage servants at the amount he mentions. Married couples, as house servants for country hotels, &c., can have engagements at £65 to £70 per annum, with rations; shepherds, £38; hut-keepers £30; bullock-drivers, £50, or by the week, £1 10s., and on the roads from £3 to £4; farm servants, £50 per annum, and £1 10s. by the week, &c.

THE NEW GAZZA LADRA.

(From the *Morning Chron cle.*)

The following is an illustration of Mr. Disraeli's "Ciceronian" habit of learning common-places and forgetting to specify that they are quotations. The words "it has been well observed" can apply to the first sentence only; and if they are intended as a loophole, that only shows the plagiarism to be thoroughly wilful. It may be well to state that "Lord Castlereagh" was expressly intended by the novelist as a pseudonym for Lord Byron:—

It has been well observed that no spectacle is so ridiculous as the British public in one of its periodical fits of morality. In general, elopements, divorces, and family quarrels pass with little notice. We read the scandal, talk about it for a day, and forget it. But once in six or seven years our virtue becomes outrageous. We lose all command of ourselves. Decency and decency to be violated. We must make a stand against vice. We must teach liberties that the English people appreciate the importance of domestic ties. Accordingly, some unfortunate man, in no respect more depraved than hundreds whose offences have been treated with lenity, is singled out as an expiatory victim. If he has children, they are to be taken from him. If he has a private secretary, he is to be driven from it. He is cut by the higher orders, and hissed by the lower. He is, in truth, a sort of whipping-boy, by whose vicarious agonies all the other transgressors of the same class are, it is supposed, sufficiently chastised. We read with very complacency on our own severity, and compare, with great pride, the high standard of morals established in England with the Parisian laxity. At length our anger is satiated. Our victim is ruined and heart-broken—and our virtue goes quietly to sleep for seven years more.

Thus it happened to Lord Cadurcis: he was the periodical victim, the scapegoat of English morality, sent into the wilderness with all the crimes and curses of the multitude on his head. Lord Cadurcis had certainly committed a great crime: not his intrinsic with Lady Montague, for that surely was not an unprecedented offence, not his deal with her husband, for after all it was a deal in *ad-de-ance*; and at all events, divorces and duels, under any circumstances, would scarcely have excited or authorised the storm which was now about to burst over the late pol ed child of society. But Lord Cadurcis had been guilty of the offence which, of all offences, is punished most severe—Lord Cadurcis had been overpraised. He had excited too warm an interest; and the public with its usual just ce, was resolved to chastise him for it as only it can.

* * * *

To a public, without waiting to think, or even to inquire after the truth, intently selected as genuine the most false and the most flagrant of the fifty fabulous narratives that were circulated of the transaction. Stories, inconsistent with themselves, were all alike eagerly believed, and what evidence there might be for any one of them, to a virtuous people, by whom they were rejected, neither cared nor knew. The public, in short, fell into a passion with their darling.—Mr. Disraeli's Venice, vol. ii., pages 352–355, published in 1837.

Lord Byron fared in the same way. His countrymen were in a bad humour with him. His writings and his character had lost the charm of no city. He had been guilty of the offence which, of all offences, is punished most severely: he had been overpraised; he had excited too warm an interest: and the public with its usual justice, was resolved to chastise him for it as only it can. The public, without knowing anything whatever about the transactions in his family, flew into a violent passion with him, and proceeded to invent stories which might justify its anger. Ten or twenty different accounts of the separation, inconsistent with each other, with themselves, and with common sense, circulated at the same time. What evidence there might be for any one of them, to a virtuous people who repeated them, neither cared nor knew. The public, in short, fell into a passion with their darling.—Mr. Disraeli's *Vivian Grey*, vol. i., pages 34–35, published in 1826.

MR. DISRAELI AND M. THIERS.

The following has been addressed to the editor of the *Times*:—

SIR,—As the writer of the article of July 4, in the *Morning Chronicle*, from which Mr. Disraeli is charged with having taken a passage of his panygeric upon the late Duke of Wellington, I think it but just to that gentleman to exonerate him entirely from this unfounded accusation.

It is more than ten years ago since Mr. Disraeli first mentioned to me this very striking opinion of the military character, which he remembered having read fifteen years before, in a French review.

Having subsequently discovered that this article was by no less a personage than M. Thiers, I made use of the quotation in some comments on French affairs by statesmen.

It is therefore but fair to state that, instead of Mr. D sraeli being indebted to the *Morning Chronicle* for the passage in question, the *Morning Chronicle* was indebted to Mr Disraeli.

I have the honour to be, Sir, your obedient servant,

63, Harley-street, Nov. 21. GEORGE SIDNEY SMYTHE.

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

THE EARL OF SHREWSBURY.

JOHN TALBOT, 17th Earl of Sarewsbury, died on the 9th inst. at Naples, after a short illness. His Lordship had been sojourning on the Continent during the last two years. At the beginning of this month he was suddenly seized, while at Palermo, with an affection of the brain, caused by exposure to the intense heat of the place, and he was ordered by his medical attendants to remove to Rome. He had progressed as far as Naples, when a fatal attack of fever came on, and his Lordship soon after ex ired.

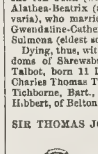
The Earl of Shrewsbury was the lineal male heir and representative of the renowned warrior Sir John Talbot, so illustrious in the French wars of Henry V. and VI., more especially as the opponent of the Maid of Orleans. To him were granted the Earldoms of Shrewsbury and Waterford, which descended to the nobleman whose death we record. The great Talbot was slain, in his 80th year, in a battle with the French before Chastillon. It is said that he was victorious in forty different engagements. The late Earl was born 18th March, 1791, the son of John Joseph Talbot, Esq., by Catherine, his first wife, daughter of Thomas Clifton, Esq., of Lytham, county Lancaster, and succeeded to the family honours at the decease of his uncle, in 1827. He inherited, at the same time, a very considerable property, and, subsequently, he commenced, under the guidance of Pugin, the erection of the magnificent structure of Alton Towers. From the moment of his accession to the Peerage, his Lordship took an active part in matters concerning the Roman Catholic party, of which he was a zealous adherent. About the year 1839 he wrote several political and religious pamphlets, chiefly addressed to Mr. Monsignor Hale Bishops, a convert, and remarkable for their extreme Catholic tendency, and their censure of Mr. O'Connell.

On all occasions Lord Shrewsbury was a munificent supporter of his religion, and he is stated to have contributed no less a sum than £50,000 to the building of Roman Catholic edifices. A new church was erected at Cheadle at the Earl's sole expense; and the cathedral at Nottingham was largely assisted by his Lordship's generosity.

Lord Shrewsbury married, 27th June, 1814, Maria Theresa, eldest daughter of William Talbot, Esq., of Castle Talbot, county Wexford, and neice of Arthur first Earl of Mountnorris, by whom he had issue: one son John (who died in infancy), and two daughters, viz. Mary-Alathea-Beatrix (raised to the rank of a Princess by the King of Bavaria), who married, 4th April, 1839, the Prince Doria Pampuli; and Gwendaline-Catherine, who married, 11th May, 1835, the Prince of Sulmona (eldest son of the Prince Borghese), and died in 1840.

Dying, thus, without male issue, is Lordship is succeeded in the Earldoms of Shrewsbury and Waterford by his cousin, Bertram-Arthur-Talbot, born 11 Dec. 1832, only son of the late Lieutenant-Colonel Charles Thomas Talbot, by Julia his wife, third daughter of Sir Henry Tichborne, Bart., which lady is now married to Captain Washington Hibbert, of Belton Grange, county Warwick.

SIR THOMAS JOSEPH DE TRAFFORD, BART., OF TRAFFORD PARK, CO. LANCASTER.



SIR THOMAS died at Trafford Park, on the 14th inst., aged 74. The old and knightly family which he represented, has been seated at Trafford from a period antecedent to the Norman Conquest. An ancient deed sets forth that Randolphus, the direct ancestor, "flourished at Trafford in the time of Canute the Dane, about the year 1030." On the grandfather's whose death we record, was son and heir of the late John Trafford, Esq., of Trafford, by Elizabeth, his wife, daughter of Stephen Walter Tempest, Esq., of Broughton, county York. He served as High Sheriff of Lancashire, in 1834, received a Royal licence in 1841 to assume the prefix De to his surname, and was created a Baronet in the same year. Sir Thomas married, 17th August, 1803, Laura Anne, third daughter and co-heir of Francis Colman, Esq., of Hilsendon, Devon, and had issue, Sir Humphrey, present and second Baronet, born 1st May, 1808, four younger sons, and seven daughters.

LIEUT.-GENERAL SIR HENRY FREDERICK BOUVERIE, G.C.B., AND G.C.M.G., COLONEL OF THE 97TH FOOT.

THIS gallant officer died suddenly, at Woolbeding, on the 14th inst. He was born 11th July, 1784, the third son of the Hon. Edward Bouverie, brother of the first Earl of Radnor. He entered the army, as Ensign in in the 2nd Foot, in 1799. In 1809 he served on the staff in Scotland, and subsequently filled the office of aide-de-camp and military secretary to the Duke o Wellington, while in Spain. In 1838 he obtained the rank of Lieutenant-General; and, at one period, was Governor of Malta. He received one Cross and one Clasp for his services as Assistant-Adjutant-General at Salamanca, Vittoria, St. Sebastian, Nive, and Orthe.

Sir H. F Bouverie married, 8th July, 1826, Julia Fanny, daughter of the late Lewis Monsoleau, Esq., and widow of Captain Will am Wilbraham, R.N., by whom (who died 23d June, 1836) he leaves one son, Henry Montolieu Bouverie, an officer in the Coldstream Guards; and one daughter, Henrietta, married, in 1851, to Hugh Montolieu Hammersley, Esq.

THE COUNTESS OF ELDON.

LOUISA, Countess of Eldon, died on the 18th inst., after a short illness at Surrey Park, Surrey. Her Ladyship was born November 16th, 1807, the third daughter of Charles Dunbomne, 1st Lord Feversham; and was married, October 1, 1831, to John Scott, Viscount Encombe, who subsequently became 2nd Earl of Eldon at the decease of his grandfather, the Chancellor Eldon, in 1838. Of this marriage there is issue, one son, John Viscount Encombe, born November 8th, 1845, and six daughters.

PARLIAMENTARY PORTRAITS.

THE MARQUIS OF SALISBURY, K.G., LORD PRIVY SEAL.

IF we reflect that the Marquis of Salisbury has, for very nearly thirty years, held a seat in the House of Peers, and that for some time before his elevation he sat in the House of Commons, we shall notice that, in a political po nt of view, his life has been comparatively inactive. Yet he always has been, and still is, a man of very decided political opinions, who never shrank from avowing those opinions, even at a time when they involved no ordinary unpopularity. In point of fact, Lord Salisbury's life has been that of a country gentleman rather than that of a courtier or a politician; and he has seldom stepped into the arena as a political combatant, except on those great and exciting occasions when it is almost the duty of a man invested with the privilege of legislating to declare his conscientious opinions.

The family of Lord Salisbury is descended from Robert Cecil, the youngest son of the celebrated Lord Burghley, by the daughter of Sir Anthony Cooke. Robert Cecil was raised to the peerage by James I., in 1603, as Baron Cecil; and in 1605 he was created Earl of Salisbury, having intermediately received the title of Viscount Cranborne. The family were not in any way remarkable for the talent which distinguished their ancestor, nor did they take any very active part in public affairs; but in the year 1688 an inc dent occurred to the then holder of the title, which forcibly illustrates the state of opinion in "free" England at that date. James, the fourth Earl of Salisbury, had embraced the Roman Catholic faith. The House of Commons, at that time under the influence of a violent access of the anti-Popish frenzy, made the conviction, that of the Earl of Peterborough, also a Catholic, the ground of a resolution was adopted that they should be impeached for high treason, "for having departed from their allegiance, and become reconciled to the Church of Rome!" The threatened prosecution, however, was soon afterwards abandoned.

The present Marquis succeeded to the title on the death of his father, the first Marquis (created 18th August, 1789), on the 13th of June, 1823. He had previously sat for some years in the House of Commons as Viscount Cranbourne. He has always professed himself a Tory of the school of the younger Pitt.

In June, 1823, he succeeded to the Marquisate, and in due time took his seat in the House of Peers. We do not find him actively engaged until June, 1824, when he resumed his early pursuits so far as to oppose, and successfully, Earl Grosvenor's bill to legalise the sale of game. It is observable that four years later Lord Salisbury himself proposed successfully a bill to effect the same object as that which he had before opposed. In 1825 he was very active again on the "Spring Guns Bill," indeed, but for an occasional brush with the Whig Peers on the Corn Laws, Lord Salisbury's senatorial honours would almost be confined to his success on such congenial topics.

In 1826 Lord King had made one of his dashing assaults on the Corn Laws. Lord Salis ury was in arms at once. He taunted the noble Lord with not having brought forward some specific measure, a course from which Lord King had sagaciously abstained, from a conviction of the hopelessness of appealing to a jury so constituted. The noble Lord, he said, had used all the arguments calculated to irritate the manufacturers, and to persuade them and the people that they were sufferers by the exclusive privileges of the landed interest. If the noble Lord would give him an opportunity, he would prove that the manufacturing interest depended for its prosperity on that of the agricultural interest. In the May following Lord Salisbury also delivered a very strong speech against any change in the then existing Corn Laws. It is almost unnecessary to state that the noble Marquis was not one of the admirers of the Reform Bill, or that the Whig Ministry of 1830 received from him at all times an uncompromising opposition. On the other hand he gave his cordial support to the brief Conservative Administration of 1834-5, when Sir Robert Peel made so gallant a stand on behalf of the Tory party, whose fallen position was mainly owing to the internal dissensions caused by his own Liberal measure in 1829.

We have slightly interfered with the order of dates in referring to Lord Salisbury's opposition to the Reform Bill. Reverting to the year 1829, we find that the noble Marquis was among those who assented, though with reluctance, the necessity for some legislation on behalf of the Catholics. The strong arguments supplied by Mr. O'Connell's Catholic Association, and his election for Clare, had their effect even on Lord Salisbury; so much so that he consented to move the Address on the opening of the session of 1829. As he was known to belong to the ultra or High Tory section of the Ministerial party, this selection was tantamount to an advertisement that the ultras had been won over by Wellington and Peel. Lord Salisbury's speech on the occasion was the best he ever delivered; as though the good genius of Christian toleration and liberality watched over him on the occasion. The speech was extremely temperate, and the noble orator earnestly deprecated angry discussions on the subject at issue. He treated it in its political aspect, and took into his view the religious feelings of the House with those considerations which ought to have weight with legislators as statesmen. At the same time his support to the Government measure would only be conditional, on his finding that due guarantees were provided for the safety of the Protestant religion and the Established Church.

When the bill of Mr. Peel came before the public, the tone of the noble Marquis suddenly changed. On the 2d of April he spoke strongly against it. He had given his general assent to the new policy, he said, on the understanding that securities were to be taken for the Protestant religion. No such securities were afforded by this bill. Mr. Pitt, whom he followed in all things, would, if he were alive, have taken better securities. To pass the measure would be to sign the death-warrant of the Established Church in Ireland. It provided no guarantees or securities. He had always advocated the payment of the Roman Catholic clergy by the State as the only safe guarantee; and he still held to that opinion. It was with the greatest pain, more especially as he had lately moved the Address, that he thus showed his want of confidence in Wellington and Peel; but he felt compelled to take the course he did and to give expression to his sentiments. The noble Marquis voted against the second and third readings of the bill. At the next great crisis in the history of his party, Lord Salisbury took a course not very dissimilar. From 1830 to 1834 he had supported Sir Robert Peel in his arduous campaign, and in 1834-5 he gave that statesman his full confidence and support as First Minister of the Crown. Again, from 1835 to 1841 Lord Salisbury's name always swelled the division list of the House of Lords when any anti-Whig demonstration was made. When, at the close of 1841, Sir Robert Peel once more took office, Lord Salisbury renewed his allegiance. To the moderate commercial reforms of 1842 he gave his express assent, apparently not perceiving, as in 1829 on the Relief Bill, the conclusions to which they led. When, however, in 1846, the grand blow came to the supremacy of the landed interest, Lord Salisbury broke away from his chief, speaking and voting steadily against Corn-law repeal. It is not surprising, therefore, that, on the accession of the Earl of Derby to office, Lord Salisbury should have brought his territorial influence to the aid of his associates. He was named a member of the Cabinet, with the office of Lord Privy Seal, which had been resigned by the Earl of Ma nto when the Whigs quitted office.

James Brownlow William Gascoyne Cecil, second Marquis of Salisbury, was born on the 17th April, 1791, and K.B.), was born on the 17th April, 1791. He married, on the 2d Feb, 1821, Frances Mary, daughter of Bamb ur Gascoyne, Esq., when he took the name of Gascoyne as a prefix to his own family name. The first Lady Salisbury died on the 15th October, 18 5. The Dowager Marchioness had met with a melancholy fate on Nov., 1846, having been burnt to death in the west wing of Hatfield House when it was destroyed by fire. Lord Salisbury had issue by his first marriage the present Lord Cranbourne (born 29th Oct., 1821) and two other sons; and two daughters married to Mr. J. B. Hope, M.P., the other to Mr J. M. Balfour, M.P.

The Marquis of Salisbury married, on the 29th April, 1847, Lady Mary Catherine, second daughter of Earl Delawarr, by whom he has one son and one daughter.

Lord Salisbury is Lord Lieutenant of the county of Middlesex, High Steward of Hertford, Major of the South Herts Yeomanry Cavalry, and Colonel of the Herts Militia. One of his Lord-ship's sisters is married to Lord Cowley, the other to the Marquis of Westmeath. The principal family seats are Hatfield House, Herts (where the noble Marquis received the honour of a visit from her Majesty), and Cuddweh Hall, Lancashire.

THE RIGHT HON. SIR JOHN TROLLOPE, BART, M.P., PRESIDENT OF THE POOR-LAW BOARD.

Of the past political life of Sir John Trollope we have not much to record; his present position, however, as Chief Poor-law Commissioner, renders it desirable that we should know what has been his former career, and what is the prospect of his probable conduct, in the event of her Majesty's Ministers fulfilling the expectations entertained by some sanguine persons of their future measures.

Sir John Trollope comes from an old Lincolnshire family. He is the son of the sixth Baronet, by the daughter of Henry Thorold, Esq., of Coxwold, Lincolnshire. Sir John was born at Casewick, in Lincolnshire, in the year 1800. On the 20th of October, 1847, he married Julia Maria, the eldest daughter of Sir Robert Sheffield, Bart.

So far back as as the year 1825 Sir John Trollope was a man of note in his county. In that year he served as High Sheriff; and he was early looked to as one who might some day find favour with the Lincolnshire farmers, should any cause lead them to change their representatives.

It was not until the general elect'on of 1841 that the right hon. Baronet was returned to Parliament as member for the southern division of Lincolnshire. To the new commercial policy of Sir Robert Peel, that now distinguished as "the policy of 1842"—he gave a general support, though not without some small exceptions more immediately affecting agriculture; but he continued for four years a silent member of the House. In June, 1844, he stood up as the defender of the Protection or Pro-Corn-law Associations, which, it will be remembered, were established by the agricultural and shipping interest to oppose the growing influence of the Anti-Corn-Law League. His speech was not without ability. It was a chief feature in it that he would know that the landlord would be the last to suffer from the repeal of the Corn Laws, and that the farm labourers would quit the rural districts for the towns, where they would become chargeable on the poor-rates.

When, in June, 1846, Sir Robert Peel brought forward the bill for the repeal of the Corn Laws, Sir John Trollope did not for an instant hesitate as to the line he should take. He had been elected as a Protectionist, and a Protectionist he remained. He was one of the first to follow the standard of the late Lord George Bentinck and the present Chancellor of the Exchequer, and he was alike regular in his attendance and in his votes. In one of his speeches at this period, he maintained that the Protectionists did not wish to make food scarce and dear; they desired to see it abundant and cheap, but preferred that it should be the growth of English rather than of foreign soils. He predicted that after the repeal there would still be great fluctuations in the price of corn. Against the second reading of the Repeal Bill Sir John Trollope made a good, strong, practical speech, embodying the farmers' views of the question

Throughout the debates on that measure he stuck to his creed and party; and no cheers were more loud in delight at Mr Disraeli's sarcasms on Sir Robert Peel, than those of the weighty representative of South Lincolnshire. When, on the 25th of June, the moment for revenge came—when the Corn Bill had passed the Lords, and Sir R. Peel, by moving on the Irish Coercion Bill, threatened the defeat which party

[Here intervene two pages of censure on the partial severity of the public in cases of adultery, &c.]

THE MOST NOBLE THE MARQUIS OF SALISBURY, K.G., LORD PRIVY SEAL.
FROM AN ORIGINAL PAINTING AT HATFIELD

THE RIGHT HON. SIR JOHN TROLLOPE, BART., M.P., PRESIDENT OF THE POOR-LAW BOARD.
FROM AN ORIGINAL DRAWING.

Justice, if not political equity, demanded.—Sir John Trollope was there to cast his stone, and help in the downfal of the Minister who had saved his order from disgrace and danger, but who was by them known only as "the traitor."

In the succeeding years Sir J. Trollope followed, first, Lord George Bentinck, then, Mr. Disraeli. In 1849, the Whigs having recognised in the Queen's Speech the existence of agricultural distress, Sir J. Trollope was selected to move an amendment to the Address, declaring that the now admitted distress arose from Free Trade, and was aggravated by local taxation. Mr. Disraeli then moved his committee on agricultural distress, when, on a division, there appeared a majority of only 21 for Ministers, and Mr. Disraeli was emboldened to go further next year in letting down his party from the high and dry regions of Protection into the healthier atmosphere of "adjustment of taxation." In 1850 Sir J. Trollope voted again for Mr. Disraeli's metamorphosis of "Protection," when he ran the Whigs down to a majority of 14. In 1851 he supported Lord J. Russell in the Ecclesiastical Titles Bill; and on the subsequent change of Ministry, Sir John was appointed Chief Poor-Law Commissioner, in the room of Mr. Baines.

It is due to Sir John Trollope to say that he has always been a consistent believer in the efficacy of Protection; and that, although he is too good a subordinate to defy his chieftains, his election speeches of late have been of a character to presage some difficulty for Mr. Disraeli and Lord Derby in keeping the Ministerial team in order. Sir John Trollope is a Deputy-Lieutenant of the county of Lincoln. Of respectable abilities and conciliatory character, with sound practical knowledge as a farmer, he may perhaps manage the Poor Law department in a more homogeneous spirit than can be expected from men who do not come in contact with the workings of the system in the rural districts, and are too apt to judge by abstract rules and theories. At the same time, it is as a representative of agricultural interests that Sir John Trollope has his place in the House, and upon those subjects alone has he ever displayed any mental activity.

The worthy Baronet has a sister, married to Mr. Wykeham Martin; and two of his near relatives attained distinction in the Navy:—Admiral Sir Henry Trollope, K.C.B., who died in 1839; and Rear-Admiral George Barne Trollope, C.B., who died in May, 1850.

ROYAL MAIL PACKET "LA PLATA."

THIS noble vessel, the last new ship of the Royal Mail Steam-Packet Company, arrived in Southampton Water on the 16th instant, from the West Indies, under melancholy circumstances; seven of her crew having died on the passage from yellow fever, including her commander, Captain Allan, a gentleman universally esteemed for his high integrity and his talents as a seaman.

La Plata was built in the Clyde for the Messrs. Cunard, the contractors of the British American Mail. Finding their last new vessels, the *Asia* and *Africa*, unable to cope in speed with those of the Collins' line (though the difference only amounted to a few hours), the Messrs. Cunard ordered two ships to be built of such power as should enable them to outrun their rivals. For this purpose the *Arabia* and *Persia* were planned and built; but on the loss by fire of the *Amazon*, of the Royal Mail-Packet Company, arrangements were entered into by them with the Messrs. Cunard, and the former vessel was sold to the Royal Mail Packet Company, and took her place among their fleet, fresh named *La Plata*, at a cost of £120,000.

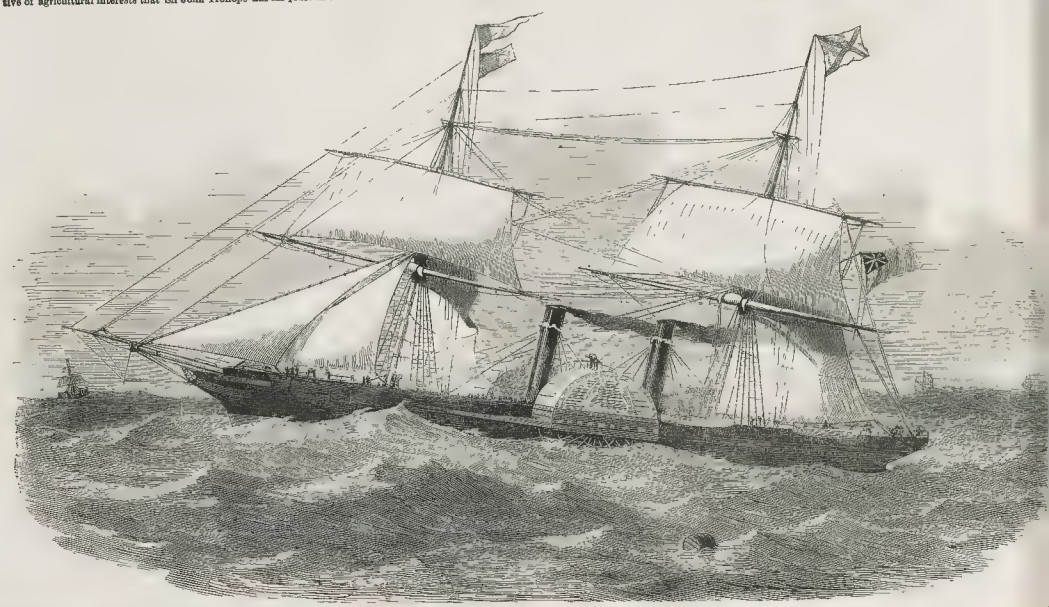
The performances of this vessel have exceeded the most sanguine expectations. On her passage from the Clyde to Southampton, she ran from Greenock to the Bell Buoy, at the mouth of the Mersey (a distance of 201 miles), in fourteen hours, at a speed of 14.28 knots, or fully fifteen miles an hour; and from Liverpool to Southampton, 461 miles, including stoppages to receive and discharge pilots, in thirty-six hours, at an average speed of fourteen miles an hour. She made her last voyage out to St. Thomas in 12½ days, and returned from that place, in spite of bad weather the greater part of the passage, in 13 days; and has been pronounced, by the most competent authorities, to be the fastest ocean steam-ship in the world.

The plan of cabin arrangements is totally different from that of the other ships of this company; instead of their spar-decks, she has a deck round-house, extending the whole length of the ship. Her dimensions and power are as follow:—

Burthen in tons	2222.42.94
Length between perpendiculars ..	285 feet
Breadth of beam	41 ft. 6 in.
Depth of hold	27 ft. 8 in.
Horse power	940
Diameter of cylinder	103 inches
Diameter of paddles	36 ft. 10 in.
Stroke	9 feet
Average speed	14½ miles per hour.

At Southampton, *La Plata* was boarded and inspected by the Health Officer of the port; who withheld pratique, and refused to allow the landing of the mails. A report was handed to him of the health of the persons on board; from which it appears, that besides the nine who have died, there were "twenty-one invalids ill during the voyage, including the doctor;" and that they had no disinfecting fluid but chloride of lime.

The collector of Customs then determined to permit *La Plata* to remain at anchor in the river, but debarred from any communication whatever with the shore, till a report of the circumstances of the case had been forwarded to the Commissioners of Customs; in the meantime, the collector consented to the mails being placed in a boat, in charge of Lieutenant Gardner, the Admiralty agent of the ship, and towed down to the Lazaretto at the Motherbank, there to be fumigated



THE ROYAL MAIL STEAM-SHIP "LA PLATA."

THE FRENCH SENATE AT ST. CLOUD.—(SEE NEXT PAGE.)

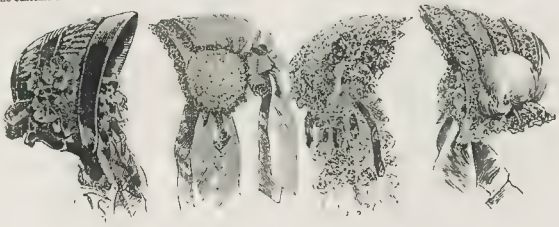
and returned to Southampton for transmission to the General Post-office.

On Saturday morning, Sir William Pym, the Superintendent-General of Quarantine, arrived from London, and having inspected the crew and convalescents of the vessel, and finding that the latter were progressing most favourably, and having ascertained that there had not been any fresh cases of yellow fever for the last seven days, released *La Plata* from quarantine.

Permission was accorded to enter the docks and discharge her cargo, &c.; but the quarantine officers deemed it prudent previously to give orders that she should take a trip of about eight miles down the river to bury the dead on board, in preference to landing their remains at Southampton. Accordingly, about noon, *La Plata* hauled down the quarantine flag, got under way, and steamed into the open water, where the ceremony of committing to the deep the bodies of the unfortunate men who had died was performed with due solemnity; the funeral duties being impressively performed by the Bishop of Sydney. After this *La Plata* headed towards Southampton, and entered the docks about four o'clock, the passengers' baggage being immediately landed and cleared by the customs and dock authorities.

PARIS FASHIONS FOR DECEMBER.

THE new winter toilettes are distinguished by the magnificence and costliness of their materials; even the simplest dresses for morning dress being of exorbitant price. These include taffetas of extreme thickness, and of all shades; the flounces are edged with satin stripes, and festooned; and at their extremities is a pretty fringe woven in the stuff. But the stuff, *par excellence*, is the *brocantelle*; this does not bear flounces: it is manufactured in the richest style: the pattern is almost in relief, it is so thick at the bottom, growing thinner as it ascends to the waist. It is made of various shades: for morning, the pattern is black, on a cabbage-green ground, or Naples blue; violet is, however, the shade most in vogue, and best harmonises with black. For evening, the pattern is white, upon a light ground, as China rose, or light blue, and moirés. These are truly magnificent. There are also for evening, plaid borders of velvet, woven with a white ground: these are charming for young people. A fashion of the Empire, when tortoise-shell was not so common as at present, has been revived. Thus, metal combs are worn, ornamented with pearls, enamel, &c. The hair is generally dressed falling very low on the neck behind; and from it hang long ribbons, either singly or in long flat bunches, falling on the neck and shoulders, and sometimes even to the waist. The revival of short waists is still apprehended; but the only approach we have seen is in bodies round in front, instead of pointed, with a silk belt of watered ribbon tied in front, with long falling ends: so long as fashion does not exceed this, nothing can be said against it.



PARIS FASHIONS FOR DECEMBER.

A charming little garment, of which we have already spoken, is now in high fashion; this is a Turkish jacket, large and quite straight behind, and with sleeves open at the elbow; it is worn at home, over a rich toilet, on receiving the first-comers to ball or party. This jacket is mostly made of red or white cashmere, trimmed with gold or silver ribbon, and a little fringe to match. For older persons black cashmere is worn, with black braid and gold pattern. The Talma mantelets still continue fashionable; but there is some talk of a partial return to cloaks, with sleeves very wide at the ends. They are trimmed either with ribbons, fringe, or lace on the arms, and at the bottom of the garment; black velvet is most becoming. The mildness of the season has not allowed opportunities for fur trimming.

PARIS FASHIONS FOR DECEMBER.

THE ILLUSTRATIONS.

Talma mantelet of velvet or cloth, trimmed with a wide watered ribbon; a small collar giving a finish to the mantelet, and fitting quite close to the neck. The collar of the fichu should be turned over it. Albanian dress, with pattern; the ground is of *reps*, and the stripes of velvet are woven in the stuff.

BONNETS.—No. 1. White satin bonnet: crown black, the top trimmed with white satin ribbon, put on lozenge-shaped, and each trimmed with small blond lace of the same width. On the edge of the front is a small ribbon, laid flat, on a frill gathered in the middle, made with ribbon, the end trimmed with blond to match; inside are two large bunches of white pinks, or rose pinks.

No. 2. Green velvet bonnet: crown trimmed with guimpure or embroidery; the top is trimmed with three rows of ribbon to match, gathered at one end, the edge of the front trimmed with a frill of ribbon indented, and the curtain trimmed to match.

No. 3. Plain velvet bonnet, for morning dress and mid-winter.—Garnet green, and violet, are worn, trimmed with two slopes laid on flat; flowers of velvet, with the centre of a lively colour; the inside trimmed with velvet flowers to match, but mingled with blonde and net.

No. 4. Visiting, or theatre bonnets of white satin, entirely covered with four rows of lace, and a feather rolled up on each side.

CAPS.—1. Indoor cap of pink taffeta, trimmed with black lace and a large bunch of small lace net.

2. Evening party cap: crown of flat lace, and lined with five pinks, half hidden by a lace lappet, the two others are in the underneath lace; whence hang little velvet ribbons in bunches, or floating ends.

Echu for open dresses; tambour embroidered patterns, with a small edge of Valenciennes, very low.

PARIS FASHIONS FOR DECEMBER.

THE FRENCH SENATE AT ST. CLOUD.

THE grand official reception of the Imperial Senatus Consultum by Louis Napoleon at St. Cloud (pictured upon the preceding page), took place after the sitting of the 7th inst; the account of which is thus given in the *Moniteur*:—

The Senate met at mid-day, under the presidency of the first Vice-President, M. Mesnard: and in presence of the commissaries of the Government it deliberated on each of the articles of the Senatus Consultum. These articles were successively adopted, and the ballot having been opened upon the *ensemble*, the Senatus Consultum was adopted by 86 votes out of 87 who voted. Those absent were General Rapatel, Admiral Rosamel, and Count Beugnot—Marrast, on account of their health. The Prince de la Moskowa was absent on military service, which ref ins him in Algeria. The Senatus Consultum was signed by all the members pre ent. Immediately after the sitting, all the senators, in grand costume, and their Eminences the Cardinals in red robes, preceded by an escort, went in a body to the Palace of St. Cloud. They met in the Great Gallery. In a few seconds the Prince-President entered the hall, surrounded by his Ministers and by the Commissioners appointed by the Council of State, and accompanied by the officers of his military household. At his entry, the Prince was saluted with cries of "*Vive l'Empereur!*" M. Mesnard, First Vice-President of the Senate, on presenting the Senatus Consultum to the Prince President, addressed him as follows:—

"Monseigneur,—When a great country like France makes its voice heard, the first duty of the political body to which she addresses herself is to listen and to reply. Such were the ideas of your Highness in calling for the meditations of the Senate on this vast movement of public opinion, which has manifested itself with so much ensemble and energy. The Senate has understood that this striking manifestation is justified at the same time by the immense services which you have rendered, by the name which you bear, and by the guarantees which are given to the future by the greatness of your character, and the wisdom and firmness of your mind. It has understood that, after so many revolutions, France feels the want of putting her destinies under the shelter of a powerful and national Government, which, on y holding to the past by the souvenirs of her glory and the legitimacy of her ori in, now again finds in popular sanction the elements of its force and of its duration. The Senate gl ries, Monseigneur, in being the faithful interpreters of the wishes and sentiments of the country, in placing in your hands the Senatus Consultum which ca ls you to the Empire."

Loud cries of "*Vive l'Empereur*" followed the conclusion of the speech.

The Prince replied:—

"Messieurs les Sénateurs,—I thank the Senate for the readiness with which it has responded to the wishes of the country, in deliberating on the re-establishment of the Empire, and in drawing up the Senatus Consultum which is to be submitted to the acceptance of the people. When, forty-eight years since, in this same place, in this same room, and under analogous circumstances, the Senate came to offer the Crown to the chief of my family, the Emperor replied by these memorable words:—'My spirit will no longer be with my posterity from the day when it shall cease to merit the love and the confidence of this great nation. What now most affects my heart is the conviction that the spirit of the Emperor is with me that his ideas guide me, that his whole process me, since by a solemn proceeding you come, in the name of the French people, to prove to me that I have merited the confidence of the country. It is not necessary for me to tell you that my constant preoccupation will be to labour with you to promote the grandeur and prosperity of France."

Renewed cries of "*Vive l'Empereur!*" here burst forth. The Prince afterwards approached the senators, and entered into conversation with each of them; after which they left, and returned to the Luxembourg.

The single senator who has had the courage to vote against the Empire is M. Vieillard, who was tutor to Louis Napoleon in his youth, and who, during the Monarchy, was a Liberal; and, under the Republic, a sincere but moderate Republican. He has always been opposed to the establishment of the Empire; but there are some people who doubt whether, upon this occasion, his vote was not a matter of calculation. It is rumoured that Louis Napoleon was himself anxious that there should be one vote at least against the Senatus Consultum, in order to give the Senate the appearance of independence; and it is also said that, with a similar object, care will be taken that there shall be 160,000 "*Non*" against the *plebiscite*.

THE COURT.

WINDSOR CASTLE.

The Queen and the Prince Consort have been dispensing a regal hospitality since their return to Windsor Castle. On Monday, her Majesty gave a grand dinner to the distinguished foreign officers deputed by their respective Governments to attend the funeral of the late Duke of Wellington.

On Tuesday, the Queen drove out, accompanied by the Princess Adelaide of Hohenlohe, to Cumberland Lodge, and inquired after the health of Lieutenant-General Wemyss.

On Wednesday, his Royal Highness Prince Albert, accompanied by the Duc de Brabant and the Comte de Flandres, went on a shooting, attended by Earl Talbot, Colonel the Hon. Charles Grey, and Lieut.-Col. the Hon. A. Gordon.

On Thursday the Queen and the Prince walked in the Home Park.

Her Majesty will hold a Privy Council to-day (Saturday) at Windsor Castle.

The Duchess of Atholl, the Earl and Countess of Derby, Viscount Hardinge, Lord Cowley, his Excellency the Belgian Minister and Madame Van de Weyer; the Duke of Northumberland, Viscount and Viscountess Mandeville, and Lord and Lady Wriothe-ley Russell have been among the guests of her Majesty at the Castle during the week.

Their Serene Highnesses the Prince and Princess of Hohenlohe-Langenburg, Prince Hermann, and Princess Feodore of Hohenlohe have left England on their return to the Continent.

The Marchioness of Ely has succeeded the Viscountess Canning in the duties of Lady-in-Waiting to the Queen. The Earl of Verulam and Lieut.-General Sir Edward Bowater have been retired by Earl Talbot and Mr. R. Ormsby Gore, as Lord and Groom in Waiting.

On Saturday last Mr Joseph Nash's drawings of the "Lying in State of the late Duke of Wellington," and of the "Funeral Ceremony in St. Paul's Cathedral," were submitted to her Majesty and the Prince Consort, who were graciously pleased to express their approbation of them.

On Tuesday Mr. Adams had the honour of submitting his bust of the late Duke of Wellington.

FASHIONABLE RE-UNIONS.

Viscount and Viscount Palmerston gave a grand dinner, on Monday evening, at their mansion in Carlton-gardens, to a distinguished circle invited to meet the Duke and Duchess de Terceira. The Duke having been commanded by Her Majesty to Windsor Castle, the Duchess was alone present, attended by his Excellency the Portuguese Minister and the Countess de Lavradio. Among the guests at the banquet were his Excellency the French Ambassador and the Countess Walewska, his Excellency the Spanish Minister, his Excellency the Sardinian Minister, the Duchess of Inverness, the Marchione s of Ailesbury, the Earl of Westmoreland, the Countess of Shaftesbury, the Countess of Tankerville, Lord Howard de Walden, Count Boutenoglie d'Aragon, Hon. Spencer Cowper, and Mr. Monckton Milnes, M.P. After the banquet the noble Viscountess had a brilliant assembly.

His Excellency the Belgian Minister and Madame Van de Weyer gave a grand banquet on Tuesday evening, at the residence of the Legation, in Portland-place. The guests included the Duke and Duchess de Terceira, his Excellency the French Ambassador and the Countess Walewska, his Excellency the Sardinian Minister, his Excellency the Minister for the Netherlands, his Excellency the Portuguese Minister and the Countess Lavradio, the Duchess of Somerset, the Earl of Malmesbury, the Earl and Countess of Jersey and Lady Clementina Villiers, Viscount and Viscountess Hardinge, and M. Delefosse. After the banquet, Madame Van de Weyer received a select circle of the nobility.

The Earl of Malmesbury, Secretary of State for Foreign Affairs, gave a grand dinner, on Saturday evening, at the Foreign Office, Downing-street, to the distinguished officers sent by the respective Governments of Spain, Portugal, Russia, Prussia, the Netherlands, Hanover, and Brunswick, to represent them at the funeral of the Duke of Wellington. Viscount Hardinge, as General Commanding-in-Chief, gave a grand dinner, on Tuesday, to the same distinguished party.

CHURCH, UNIVERSITIES, &c.

The Bishop of Moray and Ross has declined to allow himself to be put in nomination for the vacant diocese of St. Andrews.

CIRCULAR CONFESSION.—A numerous and most respectable meeting was held at the Amphitheatre, in Liverpool, this week, for the purpose of protesting against the practice of auricular confession recently introduced into the Church, in the diocese of Exeter and elsewhere.

APPOINTMENTS AND PREFERMENTS.—The following preferments [illegible] are announced:—*Sub-deanery*: The Rev. and Hon [illegible] William Lowley, M.A., to be the Collegiate Church of York. *Rectories*: The Rev. Washington Shirley Mayers, M.A., to Thurgarton, near Cromer, the Rev. J. C. Walker, M.A., to Acaster-Malbis, near York, the Hon. and Rev. Archibald George Campbell, M.A., to Kilpeck, near Grantham, Leicestershire; the Rev. David Winstone, M.A., to All Saints, Watchfield, near Boston, the Rev. John Owen, to Llanystyn, Carnarvonshire. *Vicarage*: The Rev. G. Peake, B.A., to Acton, near Birmingham; the Rev. William Wright, M.A., to St. Peter's, Worcester.

CALENDAR FOR THE WEEK.

SUNDAY, November 28.—Advent Sunday. Goldsmith born, 1713.
MONDAY, 29.—Sir Philip Sidney born, 1554.
TUESDAY, 30.—St. Andrew. Duke of Gloucester died, 1834.
WEDNESDAY, December 1.—Leo X. died, 1521. Alexander of Russia died, 1825.
THURSDAY, 2.—Napoleon crowned, 1804.
FRIDAY, 3.—Plassan died, 1826. Beloni died, 1833.
SATURDAY, 4.—Cardinal Richelieu died, 1642.

J. K.—Which family of Lawrence does our correspondent refer to?

FANNY—Arms of Beaconsaul of Lancashire: "Sa. a cross formée arg., in the dexter quarter an escallop or."

CHRISTABELLA—We know of no work giving the names of the English and Scotch settlers in Ireland between the years 1640 and 1700. For particulars of Walker, the hero of defender of Derry, refer to Harris and to Graham's "Memorials of the Siege"

A LADY.—The old Scotch title of Lovat is not extinct, but dormant. The present possessor is Simon Joseph Thomas Alexander Fraser, Baron of Lovat in the Peerage of Great Britain

QUERISTON.—Each day, before the House of Commons proceeds to business, prayers are said by the Speaker's Chaplain

J. G.—Parker's "Glossary of Heraldry"

J. W. P.—The inheritor of the estate must petition the Crown for a sign-manual to change his name. The expenses will be little short of £100

EVANGELINE.—The text admits of no misconstruction; the pronoun "him," of course, refers to the Chief Mourner

BERLIOZ.—A biography of this distinguished composer has been published in the ILLUSTRATED LONDON NEWS

J. W. C.—The picture of the late Countess of Mornington, mother of the great Duke of Wellington, surmounted by busts and medallions of her distinguished sons, painted by the present Countess of Westmoreland (when Lady Burghersh), was engraved in mezzotint, by T. Hodgetts, and was published in 1839 by Welsh and Gwynne. In the ILLUSTRATED LONDON NEWS of September 25 we gave an Engraving of the figure of the Countess, copied from this picture.

Friday Morning, Nov. 26.

Our Readers and Subscribers may form some idea of the great inconveniences which the Trade have experienced in the last week's issue of the ILLUSTRATED LONDON NEWS, when we explain to them that we are now obliged to take off the Forms from the Printing Machines, in order to print our Journal of the present week; although many thousands of our last week's Number are yet unsupplied—every arrangement, however, being made to eventually supply all demands. Regular Subscribers are served in preference to casual purchasers.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, NOVEMBER 27, 1852.

Now that the solemn State Funeral of the Duke of Wellington has become a thing of the past, and that public homage to departed greatness and virtue has been rendered after the form the most obvious, if not the most appropriate—we, in common with our contemporaries—and in common, also, with the highest personages in the realm—with the Administrative and Executive authorities, and with the general feeling of society—may be permitted to record our admiration of the great people, who lent to that ceremony its greatest beauty and significancy. So vast, so orderly, so respectful a multitude of men were, perhaps, never gathered together in this country. One particular feature of the proceedings on the memorable 18th of November, is too remarkable to be passed by without especial notice. On that day there were no conflicts of individuals with the police—no robberies in the crowd—no attempts at robbery in those remote and unguarded districts of the metropolis which were left without an adequate force of constables for their protection, during the absence of the majority of that estimable body of men on the long line of procession. On all ordinary occasions, when shows and spectacles are offered to the teeming inhabitants of this city—whether at the Lord Mayor's annual exhibition of barbaric and mediæval foolery—or at the more striking displays consequent upon a Royal progress, or a coronation—the crowds that assemble but too commonly include large numbers of professional thieves, who resort to the show for no other purpose than to turn it to thievish account. Not so on the occasion of the funeral of the hero of Waterloo. That this particular class of men were present we cannot doubt; but that they, during this one ceremony, mingled with the public as part of the public, and abstained from doing dishonour to the day by the exercise of their vocation, is a fact which remains equally clear, by the strongest negative testimony. No such cases came before the police magistrates, and no complaints, as far as we have been able to ascertain, have been made of loss sustained by robberies, either among the crowds or in the unguarded houses of the metropolis. The fact is remarkable, and we leave it without further comment.

Among all the gorgeous and ceremonial attendants on the funeral, nothing has more forcibly struck the public than the simultaneous tolling of the bells of all the parish churches in England and Wales, at the hour of three o'clock, on the day of the interment. It was the unbought homage of a whole nation to departed greatness and heroism. It was a mark of respect which has never, we believe, before been paid on any similar occasion. As tower echoed back to tower throughout the length and breadth of the land the announcement that the obsequies of Wellington were finished, it was felt to be a greater sign how truly he had lived in the hearts of Englishmen, than all the ceremonial which it was the privilege of the inhabitants of London to witness.

While upon the subject of the funeral, we cannot refrain from expressing our satisfaction that the name and fame of the Duke of Wellington are to receive from his contemporaries some more satisfactory memorial than a public funeral, however magnificent—and than statues of marble or bronze, however costly or conspicuous. We learn from a public announcement that, with a view to erect a monument to the memory of the Great Duke, to which all may contribute, which shall be worthy of its object and of the nation, and which shall be of permanent and important advantage to that service of which he was long the head and the ornament, it is proposed to erect and endow, by public subscription, a school or college, to bear the name of the Duke of Wellington, for the gratuitous, or nearly gratuitous, education of orphan children of indigent and meritorious officers of the army. Her Majesty the Queen has headed a subscription for this object with the munificent sum of £1000; and his Royal Highness the Prince Consort, his Royal Highness the Duke of Cambridge, and several of the most eminent and illustrious of the nobility and of the officers in the army have followed with subscriptions of £500 each. We cordially wish success to this project—a far more sensible mode of rendering homage to the memory of the Great Duke, whom the nation delights to honour, than a state funeral—however splendid.

THE gradual improvement in the condition of the Irish people is admitted by all recent writers and travellers. The famine and the pestilence—the collapse of the long agitation carried on by the late Daniel O'Connell—the still more rapid collapse of the "Young Ireland" delusion—the introduction of an apparently hard and stringent, but absolutely essential Poor-law—the emigration of the superabundant population—and, last of all, the highly beneficial working of the Act for the Sale of Encumbered Estates—all combined to awaken the Irish people to more correct notions of themselves, and of their connexion with this country, than were formerly current among them. We are glad to see that the present Government is not only fully aware of the real causes of this great and desirable change in the prospects of a country, of which the very name has so long been synonymous with misery and misrule, but that it has determined to extend the benefits of the system introduced by its predecessors, and to work out the regeneration of Ireland without reference to party considerations. The Attorney-General for Ireland, in a speech which reflects high credit on his legal ability, and on his statesmanlike comprehension, introduced on Monday evening a series of four measures for the improvement and simplification of landtenure in that country. The object of the first bill is to facilitate the improvement of landed property, whether held by encumbered or unencumbered proprietors; of the second, to compensate tenants for the permanent improvements which they may have effected during their occupancy; of the third, to remove impediments now existing in the making of beneficial leases, and of the fourth, to consolidate, to simplify, to define, and generally to amend the laws which regulate the relationship and the transactions of landlords and tenants. In the eloquent peroration of his admirable speech, the right hon. gentleman truly described the series of measures as calculated to meet all the real wants and exigencies of Ireland. In preparing them, and in considering every suggestion made to him, "he had," he said "added many an hour of toil to a life of labour, and every suggestion which might hereafter be offered, from whatever quarter it might come, would be accepted, and considered in the same spirit in which these measures had been submitted to the House. He knew (he continued) the recompense often bestowed on those who preferred the moderate and equitable adjustment of extreme opinions and conflicting claims, and who considered the common weal as paramount to the selfish demands of any class or party. The man who is clamorous about rights and negligent of duties might depreciate his labours; the grinding middleman might dislike, and the factious or fraudulent tenant might heartily condemn; but for all this he was quite prepared. Enough for him if he had provided a free course for industry, and a hindrance to injustice. If he should have afforded the means of working effectively the resources of a land which God had blessed, but man had blighted, the recompense would be to him an exceeding great reward." We think the verdict of the wise, whether in Great Britain or in Ireland, will be unanimous in favour of Mr. Napier's attempt to forward, if not to complete, the good work of Irish improvement; and we trust that none of the chances or mischances of political and parliamentary strife will prevent his measures from being duly considered and from becoming the law of the land—of course, with such amendments as may hereafter be deemed advisable. At some future day, it may, perhaps, be found necessary to extend similar principles to other portions of the empire; but, in the meantime, it is right that the most suffering should receive the first attention. Such measures—and the adoption of strict justice to the tenants, as well as to the landlords—will, it is hoped, tend to the eradication of the greatest remaining obstacle to the improvement of Ireland, and the foulest blot upon the character of the people—the horrible practice of assassination—and the no less horrible sympathy of the populace with those who commit murder upon the persons of landlords, agents, and rent and rate collectors. Legislation cannot do everything, but it can undo much; and, in both of its functions, we consider the zealous and conscientious labours of the Irish Attorney-General to be well entitled to all the praises which they are certain to receive from the well-wishers of Ireland.

FINE ARTS.

BUST OF THE DUKE OF WELLINGTON. BY ADAMS.

Mr Adams, of Eccleston-street East, has just completed a bust of the late lamented Duke, which may fairly be pronounced to be, in every sense, admirable. It was undertaken and has been completed with the sanction, and under the superintendence and guidance of the present Duke and his family, to all of whom it has given unqualified satisfaction. Her Majesty caused this interesting memorial to be brought to her for inspection, a few days ago, and pronounced herself well pleased with it; at the same time ordering a copy, in marble, to be prepared for her. Numerous other copies, in the same material, have also been ordered by some of the most intimate of the, Duke's relations and acquaintances; amongst others, the present Duke, Lord Charles Wellesley, Lords Hardinge, Tweeddale, Ely, Dynevor, &c.—affording ample test mony to the reliable and speaking character of the likeness. We visited the studio of the artist in the course of the week, and were indeed agreeably surprised, after having inspected scores of busts and portraits of the great commander, with more or less approval, to find in the one produced by Mr. Adams an accuracy of feature, and a simple truthfulness of expression, which surpassed all former efforts, and brought, as it were, the living man before us. The marvellously intelligent eye and commanding brow, and the compressed lips, are especially characteristic. The head alone is given, as fixed straight upon the neck, and without any drapery; the whole being severely and classically correct. We understand that Mr. Adams is commissioned to produce a full-length statue, to be erected at Stratfieldsay.

CALLIGRAPHIC PORTRAIT OF THE LATE DUKE OF WELLINGTON.

Among other interesting relics of the great Duke brought to light by the recent melancholy event, we have been shown a very curious caligraphic production in the possession of Mr. Uloth, of Kentish-Town. It is the Duke's portrait, formed by a written scroll giving the history of his life and achievements, and executed with a common steel pen. The Duke is in military costume, with his numerous orders, the figure being surrounded by an oak wreath containing acorns, each bearing the name of one of his principle battles.

Although 411 pages of letterpress are contained in this work, the whole can be easily read with the assistance of a reading glass. It was produced some years ago, and was the production of an amateur who devoted immense labour and very great ingenuity to its completion,

POSTSCRIPT.

HOUSE OF LORDS.—FRIDAY.

Their Lordships met at five o'clock.

AMERICAN FISHERIES.—In reply to Lord Wharncliffe, the Earl of MALMESBURY said that a letter had been written by the late Mr Webster, Secretary of State to the American Government, complaining of an order issued by the British Government, with a view to the increase of the naval force on the coast of North America. There was an impression abroad that the British Government was disposed to take a new view of the question, or to make some new claim on the American Government under the treaty. That impression was, however, an incorrect one. The negociations at present were in such a state as to prevent him from according to Lord Wharncliffe's request for the production of the correspondence which had passed between the two Governments. The late Mr Webster had entered heartily into the negociations, but his death was a cause of peculiar inconvenience by the interruption of the discussion that had shown an anxious desire to bring the matter to a satisfactory issue, and he (Lord Malmesbury) had a very sanguine expectation that that desire would be fulfilled.

Their Lordships then adjourned.

HOUSE OF COMMONS.—FRIDAY.

THE SPEAKER took the chair shortly before four o'clock.

New writs were ordered to be issued for the election of representatives—for Abingdon, in the room of General Caulfield deceased; for Barry St Edmunds, in the room of Sir John Stuart, appointed a Vice Chancellor; for Carlow county, in the room of Colonel Bruen deceased; for Durham county, in the room of John Duncuft, deceased; and for Peterborough, in the room of Mr. Watson, deceased.

THE BUDGET. In reply to Lord J Russell, the CHANCELLOR of the EXCHEQUER said that he would probably make his Financial Statement next THURSDAY said that he would probably make his Financial Statement next Friday.

THE FREE-TRADE RESOLUTIONS. In answer to a question from Mr. Richards, the CHANCELLOR of the EXCHEQUER said, he did not approve of the motion either of Mr. Villiers or of Lord Palmerston, but he preferred the latter.

THE ARRANGEMENTS IN ST. PAUL'S.—In reply to questions put by two or three hon. members respecting the collective arrangements for admission to St Paul's, Lord J. MANNERS said he would not interfere with the regulations of the Dean and Chapter.

THE POLICY OF FREE-TRADE.—ADJOURNED DEBATE

Mr M. GIBSON resumed the adjourned debate on Mr. Villiers's motion. He expressed his regret that party politics should have been mixed up with the subject, and said he was at a loss to understand how the Government could support that the motion of his hon. friend the member for Wolverhampton was tantamount to a vote of confidence. He declaimed, on behalf of the party with which he acted, intending any insult towards the Government. They were only influenced by the motive of securing the stability of a Free-Trade policy, and of rendering it impossible for any Government to reverse it.

A destructive fire at the Nine Elms saw-mills took place on Thursday night.

Four persons have perished this week in the neighbourhood of Wimbledon, in consequence of the present inundation.

The Murchioness of Sligo died on Tuesday last, in the 72th year of her age.

Captain Edward Somerset, M.P., of the Rifle Brigade, has arrived in London, from the seat of war at the Cape.

LATEST FOREIGN NEWS.

THE EMPIRE IN FRANCE.

The Corps Legislatif met on Thursday, and M. Fould, Minister of State, read a message of the Prince President, in which he says that the Government will only change in form; that, devoted to the great interests which are brought forth by intellect and carried out by peace, it will, as in the past, maintain itself within the limits of moderation. This message was received by unanimous acclamations of "*Vive l'Empereur!*"

METROPOLITAN NEWS.

"WELLINGTON CLUB."—It is proposed to establish a new club, under this title, in the immediate neighbourhood of Portland-place, or in some other eligible situation, "thus giving club accommodation to residents in Regent's Park, and the numerous squares in the northern part of London."

THE ALBERT PARK, ISLINGTON.—The Commissioners of Works and Public Buildings have announced their intention to apply to Parliament for an Act to empower them to form and make a public park, to be called the Albert-Park, at Islington, and which will comprise 165 acres of land.

"THE CLUB."—The members of this venerable society, established in the last century, by Dr Johnson and Sir Joshua Reynolds, and called "The Club," in contradistinction to others, dined together on Wednesday evening, at the Thatched House Tavern, St. James's street, where the meetings have been held since its establishment. Sir David Dundas was in the chair, and among the members present were the Duke of Argyle, the Marquis of Lansdowne, the Earl of Aberdeen, the Earl of Clarendon, the Earl of Carlisle, Lord Overstone, Lord Granby, Viscount Mahon, Right Hon. T. B. Macaulay, Rev. Dr. Wigram, Dr. Holland, Mr. Cornewall Lewis, Mr. Nassau Senior, and the Dean of St Paul's.

MARYLEBONE FREE LIBRARY.—On Wednesday, a meeting was held in the Mary-le-bone Court House, for the purpose of promoting the establishment of a free library for the borough, and the rector, Dr. Spry, were desirous of promoting the object; the Bishop of London had given 20 guineas, Prince Albert had been able to become a patron; other eminent personages, such as the Duke of Newcastle and Lord Brougham, had also supported it. Amongst the speakers were Sir B. Hall, Lord Dudley Stuart, Dr. Burn, Messrs. Ewart, M.P., C. Gilpin, M.P., Grace, and Gentle. A meeting of the working-classes to take the plan into consideration had been previously held, on Saturday last.

BIRTHS AND DEATHS.—The births registered in the metropolis for the week ending last Saturday were—Boys, 770; girls, 720: total, 1490. The deaths registered during the same period were—Males, 487; females, 435: total, 922.

METEOROLOGICAL OBSERVATIONS.—At the Royal Observatory, Greenwich, the mean reading of the barometer in the week was 29.189 inches. The mean temperature of the week was 49.3 deg., which is 2.6 deg. above the average of the same week in ten years. The mean daily temperature was above the average on every day of the week, and the excess was more than 5 deg. on Monday and Tuesday, and 6 deg. on Wednesday and Saturday. The wind blew generally from the south-west. The rain in the week amounted to 1.77 inches.

TESTIMONIAL TO LORD RAGLAN.—A paragraph has been going the round of the newspapers alluding to the strong and general wish entertained in many circles to present Lord Raglan with some substantial token of the gratitude and affectionate esteem created in the minds of all who have had the happiness to come into contact with him during the long series of years through which he filled the arduous and responsible functions of Military Secretary to the late lamented Commander-in-Chief. For nearly forty years Lord Fitzroy Somerset was the Duke of Wellington's confidential adviser and assistant in all matters connected with military organization and government. There is, perhaps, no office which requires for its success full and satisfactory discharge a rare combination of tact, firmness, urbanity, and sound judgment—no position in which, from its inherent nature, it is more difficult to observe rigid justice, and, at the same time, to avoid giving personal offence. A number of distinguished persons, including the Duke of Rutland and Richmond, the Earl of Ellesmere, &c., have already expressed their cordial concurrence. The Duke of Richmond has consented to take the chair, on an early day, at a meeting to be held for the purpose of giving practical embodiment to the plan.

CHARITABLE BEQUESTS.—Thomas Croft, Esq., formerly of Fleet-street, by his will, proved the 1st instant, has bequeathed the sum of £400 to each of the following charities:—Charing-cross Hospital, St George's Hospital, Middlesex Hospital, Westminster Hospital, Lambeth Orphan Asylum, Gravesend Dispensary, King's College Hospital, Kent Ophthalmic Hospital at Maidstone, School for the Indigent Blind, Deaf and Dumb Asylum, Kent road; Aged Pilgrim's Society at Camberwell, Caledonian Society, Kent Dispensary, Deptford; Royal General Annuity Society, and to the Aged Needlewomen's Society.

The *New York Herald* states that a recent attempt was made to murder Mr. JAMES GORDON BENNETT, its proprietor, by means of an infernal machine.

Only one vessel containing negroes landed in June, 1852, on the Brazilian coast.

The Royal Academy of Berlin has recommended Major Rawlinson, the Orientalist, as a candidate for the medal of the Prussian Order of Merit, vacant by the death of the late Thomas Moore.

THE LATE FUNERAL.

WE have already shown how last Thursday was kept in London and the country. As the public interest is still undiminished, we now add further particulars relative to the solemnities observed in memory of the departed hero.

A funeral service for the Duke of Wellington was performed, on the 18th, in the garrison church of Berlin: it was attended by detachments of all the troops in garrison in Berlin, with generals, officers, and Princes of the Royal family. The body of the church and the galleries were crowded with every variety of uniform—Lancers, Artillery, Cavalry of the Guard, Hussars, and the different regiments of the line. The late Dean's own regiment, the Fusiliers, in all respects quartered on the Rhine, and was not represented. The communion table was draped with black cloth, and the stands of the lighted altar candles were bound with crape. The decorations were of the simplest kind, subduing alike to indicate the event, and, excepting the address of the preacher, there was little in the service itself that denoted the occasion; yet it had much interest for the English present. It was a fact redolent of the grand solemnity being celebrated almost at the same hour in the Cathedral of St. Paul. It was the last mark of honour by an old national ally to one whose name is associated with the greatest and most united effort Germany has ever made against a foreign enemy. Of the Royal Family there were present Prince Albrecht, Prince Adalbert, Prince Karl, and Prince George; General Wrangel, the Commander in Chief of the province; and all the Generals under his command also attended. The English Minister, Lord Bloomfield, is confined to his room by illness, and could not attend, but the Embassy was represented by Mr. Bligh and Mr. Norman. The Austrian Embassy, the American Embassy, also attended the ceremony. No member of the Austrian Embassy was present. The sermon was preached by the Military Chaplain of the Division, M. STRAUSS. He took his text from the third chapter of the Second Book of Samuel, "And the King said to his servants, know ye not that there is a Prince and a great man fallen this day in Israel?" Funeral services were held also in the Catholic church in the Prussian military quarters, as well as in Berlin. In Frankfort the mixed garrison of Prussian and Austrian troops also attended a funeral service in memory of the Duke of Wellington, in the Protestant and Catholic churches.

The *United Service Gazette* states that the Secretary-at-War has consented to allow a gratuity of a shilling each to all the non-commissioned officers and men employed in the procession or on duty. A general order from the Horse Guards has appeared, stating,—"The General Commanding-in-Chief desires to express to Major-General his Royal Highness the Duke of Cambridge his entire approval of the very judicious and successful manner in which the military arrangements for the funeral were carried into execution. The conduct of the officers and men on this melancholy occasion, on the ground with the police—was most praiseworthy. The detachments from every regiment in the service brought up to London by the express command of her Majesty, to represent the army, will take back to their several comrades the deep feeling of admiration and sorrow which universally prevailed amongst all classes of the people on this solemn occasion of carrying the immortal hero to his grave. The presence of the troops was most welcome throughout the procession, and at the various points at which they were posted, not only as assisting the civil authorities in preserving order and preventing accidents, but as being the class of their fellow-countrymen who, trained under their illustrious commander, will, on all occasions, endeavour to follow his perfect example of preferring the strict performance of his duty to every other consideration."

The Dean of St. Paul's has been honoured with the following communication from the Secretary of State for the Home Department:—"Whitehall, November 22, 1852.—Gentlemen,—In obedience to the Queen's express commands, I have great satisfaction in signifying to you her Majesty's entire approbation of the excellent manner in which the arrangements for preserving good order throughout the metropolis were made by the commissioners of police, and executed by those who acted under them on the memorable occasion of the Duke of Wellington's funeral. Her Majesty has also commanded me to express her strong sense of the admirable conduct of all her people, who displayed such real feeling and true respect to that illustrious man who was carried amidst a whole nation's tears with such pomp and honour to the grave."

The carriages in the funeral procession, belonging to the late Duke, struck the spectators on account of the multiplicity of appearance. The fact is, the Duke never would have any new carriages after he had purchased the equipages for his embassy to Paris, in 1815. He found that those when he possessed them answered his purposes very well, and as he seldom went out in the daytime except on horseback, he did not care for appearance at night.

THE WELLINGTON FUNERAL CAR.

WITH the present number of this journal is presented a large Sheet Engraving of the Wellington Funeral Car. In reference to the design and construction of the car, the public has been informed by Mr. H Cole, in a lecture delivered on Wednesday evening, that—

Its production is the first public result of the special classes established at Marlborough House. Whatever (said Mr. Cole) may be its merits or defects, I may say that the car would not have been produced if our special classes had not been established. We were consulted by Mr. Scharf, jun., to furnish a design for a triumphal car, and superintend its execution. Although imperfectly organised, we thought it our duty not to shrink from the work. We had just time enough to produce a work tolerably creditable to many, though not to all; and great was the pressure at last, that for eighty hours preceding the starting of the car the workmen of two bronze founderies had not had their clothes off or their beds; and up to the very dawn of the day some fifty female students of the school were at work on the embroideries. The briefness of the time placed great restrictions in the character of the design, not forgetting the lowness of the archway at Temple-bar. We resolved to make the Duke's coffin the principal object, and in this we succeeded, for I believe that every one of the hundreds of thousands of mourning spectators would point to the coffin as the object best impressed in his memory. We resolved whatever there was should be real, and not a sham, but were defeated in this by the disobedience of two of the manufacturers entrusted with the castings. Helmets were to be fitted in particular spaces; one had been modelled, and was sent to Birmingham to be repeated six times in bronze. Would you believe it? the manufacturer had the irreverent audacity to put aside the one modelled, and to substitute a helmet different in shape, and so big that it could not be used. We sent to another manufacturer a lion's head of a particular model; he returned it a sort of pug-dog's head—too large. Such is the wilful ignorance of art, and total disrespect for authority among some manufacturers displayed at a moment so critical, and thus we were driven to strike painted papier maché helmets; but these helmets are only shams to another manufacturer, and to substitute a mere heraldry; but, when they were sent, the way some fifty female students requested to substitute a real embroidered one. The general design of the car was chiefly suggested by Mr. Redgrave; but the mechanical execution of the structure, with its architectural details, was due to the ability of Professor Semper, who conducts our metal class, whilst the richness and propriety and truthfulness of the woven and decorative materials from the unrivalled science of Mr. Owen Jones and Mr. Digby Wyatt, who also superintended the whole. Although the car was essentially a reality in its materials, it was, perhaps, less a reality viewed on true architectural principles than it would have been if soldiers would have had less impressive than the Duke's corse with the dangling empty boots. Truth in effect must arise from the perfect reality of all the attendant circumstances. Triumphal cars belong to heroes ages—the sculptured car, the car of the soldiers themselves, carry their comrade to the gravein these days.

So far we have quoted from Mr. Cole. Justice to ourselves compels us to add that the Engraving of the Car published in the ILLUSTRATED LONDON NEWS of last week was drawn on the wood by the pupils of the School of Design, at Marlborough House, by especial arrangement with Mr. Cole; and, that the canopy was omitted, because, until the morning of the funeral, it was the intention of the authorities that no canopy should be used. In our large and admirable Engraving of this week, for which we are solely indebted to our own artists and engravers, this involuntary omission has been supplied.

THE WELLINGTON MONUMENT AT WELLINGTON.—(To the Editor of the ILLUSTRATED LONDON NEWS.) With respect to your account of the state of the Waterloo memorial, near Wellington, Somerset, I beg further to inform you that the obelisk was struck by lightning and much injured in the summer of 1846. I am also credibly informed that sixty or more pieces of cannon, captured by our brave countrymen, under the command of the Great Duke, and intended to have been used for this monument, lay many years on the quay at Exeter, being detained for non-payment of freight. My informant for her states that some have been converted into mooring posts for the shipping, and many of them dispersed.—E. B.

THE CHANCELLOR OF THE EXCHEQUER.—We regret to learn that the Chancellor of the Exchequer has been suffering severely from influenza. He has now partially recovered.

EPITOME OF NEWS.—FOREIGN AND DOMESTIC.

The Countess of Derby will hold a "reception" this evening (Saturday), in Downing-street, after the banquet to be given on that day by the noble Earl to the officers forming the foreign deputation at present in London.

Lord Brougham has left town for his *château* at Cannes, in the South of France.

The marriage of Lord de Blaquiers with Miss Jolliffe, daughter of Sir William Hylton Jolliffe, M.P., was solemnised on Thursday morning, at St. James's Church.

The new residence of the American Legation is No. 45, Portland-place. We understand his Excellency Mr Ingersol intends to enliven the fashionable world with a series of assemblies before Christmas.

The *Sapphire*, which arrived from Sydney last Saturday, brought 14,868 ounces of gold, valued at £60,000. The *Eagle*, which arrived a day or two after, brought £600,000 worth of gold.

On Saturday night a daring garotte robbery was committed on Mr. Chalmers, of Cambridge-street, Golden-square, London.

Australian papers state that a gold-field has been discovered at Bingara, in the Gwyder district, which promises to rival Mount Alexandria itself. In Adelaide a gold-field has been discovered, extending over sixty miles.

The Dutch booksellers have been requested by the authorities not to sell "Napoleon le Petit," or the "Nuits de St. Cloud."

Dr. Dixon, the new Roman Catholic primate, was consecrated on Sunday, at Maynooth.

It is said the Madiai will be pardoned, on condition that they quit the Tuscan territories.

At the meeting of the Royal Geographical Society, on Monday, Captain Ingenhell gave a detailed account of research for Sir John Franklin.

Inquests were held this week on the bodies of two men who died from the pressure of the crowd at Chelsea, last week.

The *Limerick Chronicle* says, such is the rage among the peasantry for occupying farms, that in the barony of Owney and Arra, Tipperary, several hundred acres have been late y taken at £3 per acre.

The birthday of the Grand Duke of Tuscany was officially celebrated at Florence on the 16th.

The only specimen of British art in the British Exhibition, which closed on Sunday—the bust of Lord Westmoreland—was the production of Mr. Birch, a young artist of great promise, and pupil of Professor Westmacott.

A limited amnesty has been promulgated relative to the revolt of Capadonia; seventeen prisoners have been set at liberty, and four banished.

The Government of Port Phillip has offered £1000 to the discoverer of one available coal-field.

A subscription has been started at Melbourne to present the captain of the *Chasseur*, the first to inaugurate direct steam communication between the mother country and the colony, with a silver vase containing 2000 sovereigns.

A new metropolitan line has been proposed, with a capital of £2,5,000, to run from the Paddington terminus of the Great Western Railway, and to effect a junction with the East and West India Dock Railway, near the Grange-road, Kentish Town.

The funeral of the Duke de Leuchtenberg took place on the 4th at St. Petersburgh.

The Canadian Parliament is adjourned to the 14th of February.

The special session of the New Brunswick Legislature adjourned on the 20th inst., having passed several railroad bills.

On Tuesday, a meeting of Lord Derby's supporters in the House of Commons assembled at his Lordship's official residence. About 214 gentlemen were present.

About 100 American Nova Scotia fishing-boats have recently been detained by the commander of her Majesty's steamer *Devastation*.

According to the *Augsburg Allgemeine Zeitung*, Prince Frederick William, the heir of the Prussian crown, is betrothed to the Princess Royal of England.

There are an immense number of forged Bank of England notes in circulation in Manchester.

Letters from Toulon announce that the French squadron, which has been in that port for some days, has received orders to get ready for sea.

On Thursday, a sewer explosion took place in Clerkenwell, which resulted in the loss of two horses, which fell in.

Great inconvenience is felt in Australia from the scarcity of copper coin.

Mr. F. Wion Knight, M.P. for Worcestershire (W.), has been appointed to the office of Parliamentary Secretary to the Poor-law Board, in the room of Sir J. Emerson Tennent.

The county votes for the two divisions of Lancashire are, this year, 19,782, being an increase of 474 over the number in 1851.

In consequence of orders given by the French Government to complete the two ships of war on the mixed system, the *Bayonnaise* and *Magenta*, which are building at Brest, will be launched in the early part of 1853. Another screw steamer of the first class is to be laid down forthwith.

The cause of Mr. Hume's absence from the House of Commons this week is the death of a lamented sister.

The Grand Duke of Tuscany has issued a decree, dated Florence, the 16th instant, which re-establishes the punishment of death by the guillotine for crimes against religion, of public violence against the Government, of premeditated homicide, and robbery accompanied with acts of violence.

Digby Pilot Starkey, Esq., barrister-at-law, has been appointed Accountant-General of the High Court of Chancery in Ireland.

A letter from Genoa states that a steamer had arrived bringing intelligence that the Bey of Tunis was dead.

FLOODS IN THE MIDLAND AND WESTERN DISTRICTS.

DESTRUCTION OF THE CROWS-MILLS VIADUCT ON THE MIDLAND RAILWAY, NEAR LEICESTER.

In our Journal of last week we recorded the occurrence of disastrous and fatal floods, in various districts, by which property to an immense amount has been devastated. We now engrave a few of the localities of the catastrophes, from Sketches by our own Artists, as well as Correspondents, in the respective districts. The appearance of these Illustrations was unavoidably deferred last week.

LEICESTERSHIRE.

Leicestershire has been visited as seriously as any county. The town of Leicester, on Friday and Saturday (the 12th and 13th instant), was entirely insulated, from the overflow of the Soar, which arose several feet in the course of a few hours, and at the height of the inundation was eight feet above its ordinary level. All the houses in the low-lying districts were flooded four or five feet, in some cases even more, almost without warning. Many of the factories were invaded in the same way. Walls were washed down; and the destruction of pigs and sheep has been very great. Happily no lives have been lost in Leicester. Near Market Harborough, however, a post-office messenger was drowned. Melton Mowbray and the whole valley of the Wreake suffered equally with the valley of the Soar.

The Midland Railway has sustained great damage in several places: by the destruction of a great portion of the Crow Mills Viaduct, near Leicester; at Loughborough by the tearing up of the rails and washing away of the embankment; and at Manton from a similar accident. The first-named is the most serious disaster, the line having, in the other instances, been sufficiently repaired, after a day's stoppage, to allow of the resumption of traffic on one line of rails, and now on both. The destruction at the Crow Mills Viaduct will not be so easily repaired, as our readers will perceive by the accompanying Sketch, for which we are indebted to Mr. F. Clarke, an artist of Leicester.

This viaduct is situated between the Wigston and Countesthorpe stations, in the Rugby direction, and crosses the canal and a small stream called the Blaby-brook, which can frequently be stepped over. The whole of the country about here lies very low, and there are many smaller water-courses, which feed this brook in time of rain. A high embankment of nearly a mile takes the line over this ground; this viaduct consisted originally of fourteen or fifteen arches. Last summer, the arches spanning the canal had to be replaced by an iron bridge. On the Thursday night week the waters had begun to accumulate so rapidly above the Crow Mills, that Mr. Perkins, the occupier, was on the watch all night: about five o'clock he heard a tremendous crash: he proceeded to the viaduct about 100 yards from his mill, when he found that one of the buttresses, with a considerable portion of two of the arches, had fallen. He immediately called up a neighbour, and despatched him to Countesthorpe, while he himself rode off to Wigston and Leicester, and there gave information of the accident. By this timely precaution, trains both ways were stopped, and a fearful loss of life and property prevented. At first, it was hoped that the remaining portion of the arches would stand, and allow of the passengers being handed over on the single line of rail, and so only necessitate the trifling delay of a change of trains. The directors and their officials passed and re-passed in this way many times during the day; the midnight down-mail passengers were enabled to get to Leicester; and within five minutes of the entire and instantaneous fall of five of the arches, some of the company's servants were quietly passing over this treacherous way.

By Monday the company had made such arrangements for forwarding their passengers to Countesthorpe, as permitted of three trains being despatched each way per day. At a rough estimate, the loss to the company, irrespective of the annoyance and delay of traffic, will not fall short of £10,000

The inundation had almost entirely subsided, when, on Saturday and Sunday, there was again a heavy fall of rain. The result was, the river Soar again overflowed its banks, and the streets of Leicester were again under water. The inhabitants of several streets near the Westbridge were unable to leave their dwellings except in carts, a number of which were occupied during the whole of the day in conveying persons through the flood.

HEREFORDSHIRE.

The city and county of Hereford were, on the 12th instant, devastated by the rapid rising of the rivers Wye, Lugg, and Frome. At eight o'clock, a messenger arrived at Hereford with the news that, at a place called "Five Bridges," in the parish of Donnington, six miles from Hereford, a bridge had, during the night been washed away by the flood in the river Frome, and that the mail, which is drawn by four horses, had been swallowed up in the stream. At that time it was supposed by the messenger that all on the coach had been lost; but this, happily proved to be unfounded. The "Five Bridges" cross the Ledbury-road, and it has transpired that the cries of the passengers, when they found themselves in so terrible a position, were heard by persons at Lonsworth Lodge, on the Hereford side, and at Donnington, on the Ledbury side.

TAKING THE GLOUCESTER AND ABERYSTHWITH MAIL-COACH OUT OF THE RIVER FROME.

ILLUSTRATED LONDON NEWS NEWSPAPER

FLOODS IN THE MIDLAND AND WESTERN DISTRICTS.

FLOOD AT GLOUCESTER.

Access, however, without boats was impossible, and a messenger on horseback was instantly dispatched to Hereford, whence a vanload of small boats was instantly sent, together with a body of men, to assist the sufferers. The coachman and box-passenger, it appears, were thrown upon the leaders, and, having got among some trees, or hedges, managed to save themselves from drowning. So with the other outside passengers and the guard, all of whom scrambled to the road; but Mr. Thomas Hardwick, a solicitor in Hereford, was inside the coach, and breathed his last almost immediately that he was rescued. The leading horses kicked themselves free, but the wheelers sank. One of the leaders, however, was drowned. A few of the mail-bags were got out of the coach by means of a pole, and among them the London bag. Thirteen bags remained on or in the coach, which, with the two wheelers, floated down the bed of the Frome. Here the coach lay until Tuesday, the 16th, when it was recovered by attaching ropes, and thus drawing it with horses out of the river.

GLOUCESTERSHIRE.

Great alarm was excited throughout this county on the 13th, by the alarming increase of waters in the Severn, through the "freshes" from the late rains, added to a high spring-tide. At Gloucester, the houses in the neighbourhood of the Quay, and in the lower portions of the city, were several inches under water. The flood soon increased two feet, and the whole country westward presented a scene of desolation. The water was up level with the South-Wales Railway, which crosses the low grounds adjacent to the Severn by a high embankment. During the whole of the day the water was running into the Gloucester and Berkeley Ship Canal, through flaws in the "stop-gate," used at the mouth of the canal in cases of flood to keep out the river water. This gate has not been closed for thirty years, the water in the Severn having never before risen to such a height as to lead to this precaution being employed. The traffic to Hereford and the western part of the county was almost entirely impeded. Much cattle and stock in the fields were carried away; and several carcases were seen floating down the river. Our Artist has pictured the scene of devastation near Gloucester, with the singular scene of a railway train passing through the flood.

The next illustration shows an incident witnessed by our Artist from the coach on the road from Hereford to Gloucester. Here the toll-gate keeper was driven to the upper room of the toll-house, whence he descended by a ladder to take the toll. The boat in the foreground is conveying the parish surgeon, who was obliged to resort to this mode of conveyance, and lead his horse, till they reached a part of the road which is passable.

BLISWORTH CUTTING.

On the evening of the 13th, the 9 P.M. mail-train from the Euston-square terminus of the London and North-Western Railway proceeded at the usual rate till near Blisworth, when, in the steep cutting, it was stopped by a slip of earth caused by the heavy rains, the water, at the same instant, rushing with destructive force over the lofty banks. The guard was sent back some distance to stop the luggage-train. The clearing away of the fallen earth occupied about an hour, when the mail-train proceeded.

EALING

(From a Correspondent.)

While every mail was bringing to London accounts of the floods in the provinces, we had an outbreak of the waters at our own door. Within six miles of London the traffic on the Great Western Railway was suspended for several hours by a land-slip of the cutting at Ealing, which was produced by the defective drainage of that village. The land all around this vicinity, saturated with the recent heavy rains, could absorb no more; the drains were insufficient to carry off the

THE TOLL-GATE BETWEEN HEREFORD AND GLOUCESTER.

STOPPAGE OF THE MAIL-TRAIN IN THE BLISWORTH CUTTING, LONDON AND NORTH-WESTERN RAILWAY.

EALING STATION, GREAT WESTERN RAILWAY.

rapidly-increasing surface-waters; and early on Monday morning, the 15th, the flood, which had accumulated on Haven green, beside the railway-station, and on some adjacent fields, having filled every surrounding ditch, broke bounds, and found a vent over the edges of the railway-cutting, and soon grew into a torrent of such force as to sweep down a mass of earth and gravel, which completely blocked up both the lines. When the accident occurred is not exactly known, but it must have been after quarter-past four, A.M., as at that hour, the up-mail train fortunately passed the spot in safety. Soon after, however, the alarm was given, and no time was lost in setting a number of workmen to clear the line. As the news of the disaster spread, the quiet little village was worked up to a state of excitement, numbers hastening to the bridge, which spans the line, where the inundation broke loose, and there, to their wonder, beholding a large waterfall sweeping down the bank, and rushing along the trench of the railway like a mountain stream.

The first object on the part of the authorities was to get the London morning mail down the line; and for this purpose, an ingenious bit of engineering took place. The shapeless mass of fallen earth was vigorously attacked by the workmen, and flung on the north, or up side of the line, so as to form a channel for the wild waters, and turn them upwards towards London; thus leaving the south, or down side, free from further accumulation of earth, and open to clearance. The well-plied shovels of the navvies did their work; and a locomotive engine, with several trucks attached, was at hand, to expedite the clearance. In the meantime, all the up trains were stopped at Hanwell; and here a scene of great pictorial beauty was presented, the entire valley of the Brent was flooded; that small stream having swollen to a raging torrent threatening the safety of the bridge at Hanwell, and roaring through the stems of the willows that fringe its banks. The noble Wharncliffe viaduct that spans the valley, reflected in the wide expanse of the outlying waters had a grand effect, and, at one time, six trains were to be seen upon it, arrested in their course, blowing off their steam, and giving animation to the picture.

The village of Hanwell presented a scene of great activity; all passengers whose business made their early presence in London imperative, quitted the train and sought conveyance to town. It was a harvest for the omnibusses—seats were scrambled for, in and out—they were bonded and pounced upon, gallant style as fast as they appeared; while those who had more money than activity negotiated for flies, cabs, and even taxed carts, till at last every available vehicle above a wheelbarrow was put in requisition. All the old rattle traps that had lain for long under sheds, and become legacies to the legs of the poultry, were drawn from their retirement, and became tenanted with the bird of passage of the railway, instead of the cocks and hens of Hanwell; and spavined and ringboned, halt and broke-winded, were withdrawn from their work; and gallant ringboys were elevated to the rank of Jehus: it was new life to the road, and a great day for the turnpikes.

By eleven o'clock A.M. the down line was open at Ealing, and the trains presented a novel appearance, ploughing their way through the water, for the rails were still completely immersed. The cutting resembled a canal; and the perfect reflection of the houses, bridges, engines, and carriages produced a most picturesque effect. Two or three trains had passed before the line was quite open; and as they lay at the station, blowing off their steam, they attracted crowds of beholders; but these were only the idlers, the indu-trious people having quite enough to do at home in endeavouring to clear their kitchens and cellars of water, for every house in the village was flooded

Later accounts state the inundations to have risen considerably higher within the past week. Reading, on Tuesday night, remained covered with water; hundreds of acres on each side of the Thames were submerged and punts had been used for several days for conveyances on the Caversham road and causeway; and a vast sheet of water extended nearly six miles. No parallel flood has occurred since the year 1841. At Maidenhead, on Tuesday, the Thames rose higher than hitherto, and rushed over the meadows and lowlands for many miles on each side of the South Western and Great Western Railways; so much so as to stop trains opposite Cliefden. On the same day, the excessive rains again raised the floods to a great height, and on the Great Western Railway the water was two feet deep

Early in the week, in the neighbourhood of Bristol, the river Frome again overflowed its banks. Between Bristol and Cleveland the moorlands appeared like a vast lake of water. At Ashton, on the Somerset side of the river, most of the meadows were under water, and the country about Caverham was inundated for several miles

At Nottingham, on Tuesday, the waters had risen within three feet and a half of the height attained on Saturday week

At Shrewsbury, on Sunday, a large proportion of the 550 houses inundated by the Severn, obtained relief.

In many parts of Essex heavy floods have laid large breadths of the lowlands under water. On the North Woolwich line some damage has been done to the embankments. Boats have been used, and the inhabitants of some of the houses contiguous to the Eastern Counties Railway have been compelled to leave the water, in some instances, reaching the upper floors. Even the basement of houses at Stratford Broadway have been flooded.

We regret to add that at Walton-upon-Thames, on the South-Western Railway, on Saturday evening, a farm-labourer, his wife, and two children, were drowned while endeavouring to punt themselves across a swollen meat in a boat or cooler

From Ireland the accounts still report great losses in the lowland districts of Leinster

On Saturday the Waterford and Maryborough mail coach was near being lost in the floods on the road near Dunkitt-bridge, county Kilkenny. The coachman did not perceive his danger until "the leaders" were literally swimming.

In Kilkenny and Carlow the convulsion of nature caused a greater flood in the River Barrow than any remembered for many years. In Carlow, a portion of the town was inundated

At Longford, a large portion of the low-lying lands was covered with water, particularly bordering the Shannon.

On Friday week the river at Ballybrigan burst the flood-gates of a mill, and the water, in its rush towards the sea, destroyed two houses, and drowned a woman

Floods in Herefordshire.—The pas engers inside the mail-coach (engraved on the preceding page) were Mr. Haddock, solicitor, who was drowned, and Mr. Allen, solicitor, who was saved. These gentlemen, who represented the rival Worcester and Hereford Railway Bills, were proceeding to Hereford to insert the Parliamentary notices in the *Hereford Times*. Mr. Haddock had his notices in his pocket, and they came out after his death, sent to Hereford, and handed to the paper just in time. Mr. Allen, while waiting at Gloucester for the coach, removed the notices from a trunk and placed them in his breast-pocket; and a gentleman, which was washed away in the catastrophe, has not yet been found.

LAW AND POLICE INTELLIGENCE.

Achilli *v.* Newman.—In the Court of Queen's Bench, on Monday, Sir Alexander Cockburn obtained leave for a new trial in this case, on the ground of misdirection—the verdict being against evidence—and of the exclusion of evidence.

Sir C. Napier *v.* the "Quarterly Review".—In the Court of Queen's Bench, on Tuesday, Mr. M. Chambers, on behalf of Sir C. Napier, moved for a rule to show cause why a criminal information should not be filed against Mr. Murray, the publisher of the *Quarterly Review*, for a libel published in the October number of the periodical. The libel charged Sir Charles with mutiny, and with "an ungovernable determination to bring about war at any cost," when Commander-in-Chief of the army in India. Lord Campbell, the other Judges agreeing, refused the rule.

The Strand-Bridge Case.—In the Court of Queen's Bench, Dublin, on Tuesday, the Lord Chief Justice delivered the judgment of the Court. After reviewing the facts, his Lordship stated that the Court had determined to refuse the application of the attorney-General.

The Wagner Case.—In the Court of Exchequer, on Wednesday, this case was advanced a step. Mr. Cressy having, upon a former occasion, obtained a rule *nisi*, calling upon the plaintiff to show cause why the defendant should not be allowed to demur to the declaration, as well as to plead to several matters proposed to be pleaded; Mr. Hoggins (with Mr L. Bailey) on the part of the plaintiff, appeared to show cause. After some discussion, the Court granted a rule absolute for the defendant to plead the several matters proposed. The demurrer and pleas to be delivered in a week, but no further proceeding to issue, in fact, to be taken, till demurrer has been argued.

The Eoham Duel.—An application was made in the Court of Queen's Bench for allowing the prisoners to be bailed. The Court refused the rule.

Controverted Elections.—The late election appears likely to produce an unprecedented number of petitions against the return of the successful candidates. At the commencement of the last Parliament there were 37 returns petitioned against, and more than one-half of these petitions then were presented on the last day allowed by law. Up to Thursday, 107 were presented. There are some places for which more than one petition has been lodged, and there are many petitions that affect more than one seat each. The total number of members petitioned against, and who are consequently disqualified from serving on committees, is about 120. If we add to these the honourable gentlemen who claim exemption, on the ground of being over sixty years of age, the number of members capable of exercising judicial functions will be found to be very greatly reduced. Among the petitions presented, there was one against the return of the Lord Mayor of London for Finsbury.

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.—Monday.

Crystal Palace.—On the presentation of a petition by Lord Panmure, relative to the opening of the Crystal Palace on Sundays, the Earl of Derby took the opportunity of stating the proceedings and opinions of Government on the subject. It had been determined that a charter should be granted to the Crystal Palace Company; and with regard to the opening of the Exhibition on Sunday the Government had inserted some restrictive clauses in the draft which had been prepared. Subject to these restrictions—to which the company cordially agreed—he believed that so far from it being a desecration of the Sabbath, great advantages would arise from the opportunity of instruction that the Palace being opened on that day.—The Earl of Clanricarde considered that, in a proper state of the law of partnership, there would be no necessity in cases like the present for granting a charter at all. He regretted that the Government had neglected this among its other law reforms.—Lord Campbell expressed his satisfaction at the state and prospects of the New Exhibition.

Convocation.—The Earl of Derby, in reply to Lord Shaftesbury, stated that it was not the intention of Government to depart from the usual practice with regard to Convocation

Policy of Government.—Lord Clanricarde asked a question, of which he had given notice, with regard to the public business to be brought forward this session. The Earl of Derby, after reviewing generally the conduct of Government since its tenure of office, and stating that the recent election had convinced them that it was their duty to advise her Majesty that the principle of unrestricted competition ought to be adopted, said that, after the motion of the 26th instant had been disposed of, it was not their intention to bring forward any important measure during the present session.—Lord Wodehouse made some general remarks condemnatory of the proceedings of the Government as equivocal, and wanting in good faith.—On the "terms, the progress, the tone, or the good taste" of these remarks, Lord Derby said he did not think it necessary to make any observation.—This drew from Lord Wodehouse a disclaimer of any personal or offensive inference, and the *amende* being graciously accepted by Lord Derby, their Lordships adjourned.

HOUSE OF COMMONS.—Monday.

The Case of Mr. Paget.—In reply to a question put by Mr. Milnes, Lord Stanley said it was true that Mr. Paget, who had been resident for two years at Dresden, had had his house en ered and his papers seized by the police; but it was not true that the seizure had been made by the Austrian police, but by the police of the country in which he resided. As a result of the remonstrance made to the Saxon Government was that Mr Paget's papers had been restored, and the police who had entered his house had received a severe reprimand.

Ecclesiastical Courts.—In answer to Sir B. Hall, Mr Walpole stated that the Government were of opinion that there ought to be an effectual reform of the Ecclesiastical Courts, but that no bill should be introduced for that object until the whole question now under investigation, had been fully considered; that the Crown had no power to prevent what Sir Benjamin had termed "flomish" proceedings in the Church; the best mode of checking which would be found in the good sense of the people of this country; and, lastly, that he did not see that the Government ought to interfere with the life-incomes of any of the Bishops.

Call of the House.—On the motion by Sir J Walmsley, in the absence of Mr Hume, that the House be called over, Sir R. Inglis having objected that the call would be a *brutum fulmen*, and a waste of time; after a few words from Messrs. Cobden, Walpole, and Lucas, the motion was withdrawn.

Improvement of Property in Ireland.—Mr. Napier moved for leave to bring in a bill to facilitate the improvement of landed property in Ireland. After noting the difficulties which beset the framing of a code of laws to regulate the relations between landlord and tenant in Ireland, and giving a sketch of the agricultural history of Ireland, and of the policy which England and the Imperial Legislature had pursued with reference to the Irish question, he then developed the objects he had in view to remedy the agricultural evils of Ireland, in the bills he proposed to introduce. The first was to enable owners themselves to carry out fully improvements in the soil, by means of money. The second was to facilitate the making of beneficial leases and contracts, and agreements for compensation for improvements of lands, which would promote concord and harmony between the landlord and tenant by assuring that they had a common interest; while the tenant would enjoy a full legal protection, and the landlord's just rights would be secured. A third bill would simplify, consolidate, and amend the existing law in relation to the relation of landlord and tenant; fou thing that relation upon the principles of contract, and providing facilities for effecting such contracts, along with remedies more prompt and effectual than those now existing for the recovery of rent, abolishing arrear, barring of lands, and other wrongs; simplifying, at the same time, the law of ejectment. The last bill would provide compensation to tenants for the improvements they had made, by the increase of the land in Ireland being held by tenants from year to year. It was not intended to interfere in any way with the tenant right of Ulster. It was proposed to enable the tenant to carry out improvements under the system he ancied chose to avail himself of the means of effecting them, which would be placed in his power; and retrospective improvements, made by the tenant before the passing of the law would be taken into consideration, without resorting to schemes that would lead to the compulsory adjustment of rent.—Mr. Connelly spoke warmly in commendation of the proposed measures.—Lord John Russell, after reading at length the three bills which was about to bring in, and explaining their objects, said he was convinced that the last bill would give no sort of satisfaction in Ireland, that part of the bill which related to improvements was liable to the objections Mr Sanley's measure over again.—After a few remarks from Messrs. George, Kirk, W. P. Urquhart, and from Lord Naas, who denied that there was any similarity between this bill and Mr Stanley's, leave was given to bring in the four bills.

The House adjourned at half-past 9 o'clock.

HOUSE OF COMMONS.—Tuesday.

FREE TRADE.

Mr. C. Villiers rose for the purpose of moving the following resolution:—"That it is the opinion of this House, that the improved condition of the country, and particularly of the industrious classes, is mainly the result of recent commercial legislation, and especially of the act of 1846, which established the free admission of foreign corn; and that that act was a wise, just, and beneficial measure. That it is the opinion of this House, that the maintenance and further extension of the policy of Free Trade, as opposed to that of Protect on, will best enable the property and industry of the nation to bear the burdens to which they are exposed, and will most contribute to the general prosperity, welfare, and contentment of the people. That this House is ready to take into its consideration any measures consistent with the principles of these resolutions which may be laid before it by her Majesty's Ministers." The hon. gentleman commenced by declaring that the vagueness of the Royal Speech had rendered it impossible for him to do what he had done. The House had met for the purpose of receiving the answer of the country as to what policy should be pursued, and accordingly he (Mr. Villiers) could not refrain from making a motion at the suggestion of the Chancellor of the Exchequer. His motion was not intended to upset the Government; at the same time, he did not see why he should have any confidence in them. There was one question which he was particularly glad to find admitted: an admission that one of the acts of recent legislation had produced the prosperous of the country, and thereby to prevent the condition of the people. During the discussions which took place in the time of the Corn-laws, it was said it was a labourer's question; that they would suffer were those laws repealed. This was the ground on which the hon. gentlemen had taken their stand. Supposing his motion were carried, and gentlemen in office remained, he believed the country would be able to get over the calamity; especially hoped the Chancellor of the Exchequer would continue in office. The hon. gentleman continued:—"I have been in my time a cotton spinner, which readily illustrates the policy which I hope the Chancellor of the Exchequer intends to pursue. The City of London alone affords a most conclusive illustration of the enormous effects that are produced by a reduction in the price of articles of food upon the availability of the people's means for purchasing other articles. The population of London, according to the most moderate calculation, is 2,000,000. From July, 1846, when the sliding-scale enacted, up to the end of 1841, when it was abolished, 14,767,990 quarters of wheat were admitted, 12,493,948 of which, or 84 per cent., were not admitted until the price exceeded 70s. per quarter. 70s. per quarter for wheat grew to be cheap for flour. The quarern loaf would then be 1½d., it is now 7d. The consumption of the population of London is not less than two quarters loaves per head per week; so that the saving is 5d. per head per week, or £1 18s. per annum; being, for the whole population, £4,760,000. Again, as bread is the staple food of the people, consumption is greater than in the country, the allowance to servants is half-a-gallon of beer per week, and tea alone; the middle and upper classes consume not less than 5lb. lbs.; so that the average duty hardly be taken at 20 lbs. The sort sugar, that, up to 1845, was 7d., is now 4d. to 5d.; the loaf sugar, that was 10d. to 11d., is now 5d. to 6d.; and probably half the consumption of London is loaf sugar, so that the saving on this article is 3d. per head, the saving is 8s. 9d. a head per year; or, for the whole population, £4,380,000. The artizan consumed living above 20½ lbs. per head. In 1842, on a similar calculation, the saving was 3s. 3d. per head; and consumption £1,230,000, representing a total of £8,739,983 in London alone, there being a proportionate gain also to the country and to the provincial towns." He (Mr. Villiers) was desirous to put these facts upon the notes of Ministers of the Crown, who did not seem to be aware that the difference between food and any other article is, that food is a thing of necessary consumption, and that it depended entirely upon the price and abundance of that article as to any thing else was consumed. The amendment referred to the working-class; he did not confine himself to them, because he thought that there was no possibility of affecting them by legislation which did not also benefit the whole community. He believed all interests were benefited by the Act of 1846, and no compensation was necessary to any class. Agriculture never was in a better position. Mr. Villiers said—"I asked a large occupier and farmer of land, who is, besides, employed by many noblemen and gentlemen as their land-agent, and who is moreover, is largely interested with the sale of land, what he thought of the condition of the landed interest; and he told me that he had not known it for years in so good a condition as it was in now. I asked him whether land now sold for more than it used to fetch, and he replied 'Most undoubtedly;' that speaking from 30 years' experience, he had never known land so well as now; that he himself had sold, within the last few months, a great deal of land at more than 30 years' purchase, and that some pasture and, which a few years ago sold for 27 years purchase, had recently fetched, under his hand, 33 years' purchase. The farmers and the labourers also were well off. What the farmers wanted was equitable agreements with the landlords. The proceedings of the Royal Agricultural Society had shown that farming, to be carried on profitably, required improved leases. The farmers had been an ill-used class. Their distress has been made capital of by gentlemen opposite. But the farmers had grievances, such as the Law of Distraint, the Law of Settlement, the Game-laws, and the want of tenant-right, which ought to be attended to. The hon. gentleman then referred to Lord Derby's remarks as to the influence of the discovery of gold in Australia, and concluded his speech amid loud and protracted cheering.

Mr. Ewart seconding the motion.

The Chancellor of the Exchequer moved, by way of amendment, "That this House acknowledges, with satisfaction, that the cheapness of provisions, occasioned by recent legislation, has mainly contributed to improve the condition and increase the comforts of the working classes; and that, unrestricted competition having been adopted, after due deliberation, as the principle of our commercial system, this House is of opinion that it is the duty of the Government unreservedly to adhere to that policy in those measures of financial and administrative reform which, under the circumstances of the country, they may deem it their duty to introduce." The question before the House was not, whether the Corn-laws should be repealed, nor whether the Sugar-duties should be reduced, nor whether Protection or Free Trade, to use the language of the hon. and learned gentleman, should be repealed or supported; but whether her Majesty's Ministers by their conduct since their accession to office have fulfilled their pledges to Parliament and the country; and whether, having announced that they differed from the opinion of the country, on a subject of great importance, they have, frankly or otherwise, communicated to the House the resolution at which they have arrived. The Protectionists were opposed the repeal of the Corn-laws for two reasons. "We," said the Chancellor of the Exchequer, "opposed that change on two grounds. The main ground was, that we believed it was a change which would prove injurious to the interests of labour. That was the main and principal ground on which I myself individually based it: was it not the main cause of failure? We opposed that change for a second reason, because, irrespective of the great and principal objection which we entertained to it, we believed it would occasion injury to another great interest—land. And on a subsequent occasion, in 1850, when the matter was incidentally referred to in the House, I myself used the expression with reference to the Corn-laws, that it was a question of labour, or it was nothing." Shortly after the repeal of the Corn law came that of the Sugar duties, and that of the Navigation-laws. The five years which elapsed between the election of 1847 and the recent dissolution were mainly occupied in a successful and legislation upon the agricultural, commercial, and shipping distress. "It is a fact," asserted the hon. gentleman, "which it may be convenient for members to forget, the accuracy of which cannot be questioned by those who have had experience in the business of the House, and which no one will be further we have not that experience to remember—that, from the time that the repeal of the Corn-laws was passed until the present moment, not a single attempt has been made in the House of Commons to abrogate the measure of 1846." No effort of such a kind was made, because the Protectionist party felt there were no facts before them of a sufficiently large character to convince them that the condition of the working classes was injured by the act of 1846. With regard to the Sugar-law, a committee was appointed, with but three Protectionists on it, which decided that there ought to be a differential duty of 15s. per cwt in favour of colonial sugar. As to the Navigation-laws, so far from attempting to re-enforce them, the present First Minister of the Crown took an early opportunity of saying that he thought that that was a step which it was impossible for the Legislature to retrace. And along the Protectionist party had refused to attempt to alter the Act of 1845, in 1851 he (Mr. Disraeli) had brought forward a motion, the object of which was to relieve the country from the pressure of local taxation; and though that was lost, in a full house, on by a majority of ten, it led sons to the alteration, and to placing the power in the hands of its present possessors. Lord Derby then declared a policy of compromise and conciliation. All Lord Derby proposed was, that the descending scale, which made a division between the rate of duty upon colonial and foreign sugar, should be arrested, and that the former, while the colonies were suffering from the great trial through which they were passing. As to the Navigation-laws, Lord Derby only proposed declaring that any recurrence in that respect would be impossible. After the enunciation of those principles which were the basis of the noble Lord opposite himself condemned). Lord Derby did not succeed in forming a Government in 1851. It therefore became necessary to consider his position with regard to this question, and, on mature consideration, it was his opinion that it would be extremely unwise and injurious to bring forward in England, or in that or any subsequent session, any motion which directly or indirectly maintained the great industrial controversy which had been so long prevailed. The Government of which the hon. Member for London was the head fell to pieces from internal dissensions, and again Lord Derby had to form a Cabinet. The answer given was to the address of the Queen commercial policy, was, that Government was about to appeal to the people, and would abide by the result. The Chancellor then quoted from the speeches of Mr. Gladstone, to show that his conduct had received the approval of the House of Commons. The hon. gentleman then referred to the speech of the member for Wolverhampton, and said he would not follow it, for it was not agreed with. The agriculturalists had had a fair fight and been beaten, and now he would defend them. It was said the Queen's Speech was unsatisfactory, but the bill which Lord John Russell was in power, by the Manchester school. If they were to be censured for retaining office, the same blame as was due to Sir R. Peel, who opposed the Reform bill, and yet became minister after it had become law. If the Queen's Speech were carried out, Parliamentary Government would be impossible. After putting it to the House whether it was the interest of the present Ministers, should they be turned out, the Chancellor of the Exchequer concluded by appealing to the new Members and to the friends of Protection generally, to support the new Ministers.

Mr. Bright, after alluding to the significant expression that Mr. Disraeli had ceased himself and his party throughout his speech as "protectionists," said himself—Lad brought forward motions directly against the present commercial system of the country. The argument of the right hon. gentleman was bad as himself. He (Mr. Bright) would not come to ask Protectionists to do what he had not done

principal articles of the food of the people. That this House is of opinion that this policy, firmly maintained and prudently extended, will best enable the industry of the country to bear its burthens, and will thereby most surely promote the welfare and contentment of the people. That this House will be ready to take into consideration any measures consistent with this principle, which, in pursuance of her Majesty's gracious Speech and recommendation, may be laid before them."

The House then adjourned, at ten minutes past twelve o'clock.

HOUSE OF COMMONS.—WEDNESDAY.

COUNTY ELECTIONS POLL BILL.—Lord R. GROSVENOR moved the second reading of this bill.—Mr B DENISON said he was in favour of the polling in counties being confined to one day, but he objected to the proviso in the bill making the day of polling to take place the second day after the day of nomination; and he was sure that, if the bill was to pass, the expense of contested elections would not be diminished.—Mr. ROBERT PALMER moved that the bill be read again that day six months.—After a few words from Lord Harry Vane, Mr. Secretary Walpole, Mr Spooner, Sir J. J. Buller, against the bill; and from Mr. Alcock, Sir G. Pechell, Messrs. Monsell, F. Scott, Viscount Monk, and Messrs. Brown, Elliot, Locke King, Grieve, and W. Williams, in its favour, Mr R. PALMER withdrew his amendment.—Lord ROBERT GROSVENOR replied, and the bill was read a second time, and ordered to be committed.—Sir G. PECHELL's motion for a return of screw gun-propelled but dilatory, or already built, having been withdrawn, the House adjourned, at two o'clock.

HOUSE OF LORDS.—THURSDAY.

Their Lordships met at five o'clock, but only sat for a few minutes; the only business done being the presentation of some petitions.—Adjourned.

HOUSE OF COMMONS.—THURSDAY.

The Speaker took the chair shortly before four o'clock.

FREE TRADE AND PROTECTION.

Sir W. CLAY wished to know from the Chancellor of the Exchequer whether he was willing to withdraw his amendment if the House agreed to the proposition of Lord Palmerston; and he wished to know from Mr. Villiers if he would withdraw his resolution, and adopt the amendment of Lord Palmerston?

Sir J. GRAHAM felt bound to oppose the course adopted by the right hon. baronet (Sir Wm. Clay). To enable him to explain himself he would move that the House do now adjourn. After the question put by Sir William Clay, he felt bound to address the House. At the close of the debate on Tuesday, Lord Palmerston suggested certain terms which he thought might be adopted by both parties. Now, it was impossible, as one of the surviving colleagues of Sir Robert Peel, that he should not feel a deep interest in the subject which stood for discussion this evening. He would state all that had passed to-day with Mr. Villiers's motion. The right honourable Baronet then proceeded at some length to state his reasons for concurring with the course taken by Mr. Villiers, a course which also met the approbation of the Earl of Aberdeen and Lord John Russell. He admitted being a party to the framing of the resolutions proposed by the hon. member for Wolverhampton, in conjunction with the noble Lord, the member for the City of London. It was at the suggestion of some of the other friends of Free Trade that the words "were just and beneficial" were inserted. The amendment proposed on Tuesday night was, however, worded in nearly the same terms as the original resolutions, which he and Lord John Russell had framed. Although he was opposed to any compromise, he thought that if the Government accepted the terms of Lord Palmerston's address, with the addition of the words he had just referred to, the hon. member for Wolverhampton might with propriety withdraw his proposition. In that case he would not be in a position to make their statement on the following evening, to which he would give the widest possible publicity. (Cheers.)

Lord LOVAINE said, he believed the resolutions proposed by Mr. Villiers to have been brought forward from factious motives. He did not come forward on the principles of Protection, but on the principles of common sense and common justice to the farmer.

Mr. GLADSTONE saw no course to pursue but to leave the Government unfettered, or to bring forward a vote of want of confidence, and put an end to the Administration, if the House had a sense of what was due to its own dignity. He thought the suggestion of Sir James Graham might be adopted without disgrace or disparagement to the Government or to Mr. Villiers, and would finally close the question of Free Trade.

Mr. T. DUNCOMBE said, he believed the real fact was, that the gentlemen below him could not themselves take office, and now they wanted to get out of a mess.

Mr. CAILEY admitted that Free Trade had conquered Protection; and he was convinced it was folly to attempt to restore it by any legislative policy with Mr. Villiers; he thought that such relief as the finances of the country could afford should be extended to the agricultural interests.

Mr. R. PALMER said, it had been his intention to have met the resolutions of Mr Villiers with a direct negative. He admitted, however, that the sense of the country was against the re-imposition of the Corn laws. He could not vote for Lord Palmerston's amendment, because he considered it a party vote.

Lord PALMERTON said that, if the motion of Mr. Villiers were withdrawn, he would still persevere in his amendment against that of the Government, if he was supported by the House. (Cheers.) He thought the question would have preferred the resolution of the Chancellor of the Exchequer, he was willing to accept the resolution of the noble Lord the Member for Tiverton.

The Marquis of GRANBY hoped the Member for Wolverhampton would persevere in his motion. He wished the House to divide on that motion. He did not agree with any of the resolutions proposed.

Mr. B. JOHNSTON declared his intention to oppose the resolution of Mr. Villiers.

The CHANCELLOR of the EXCHEQUER denied that the Government had ever acceded to office on the question of Protection; the fact being, that, upon that question, they said they would be governed by the opinion of the country. He had been generously supported by the Protectionist party in that House; and now that Protection was abrogated, he would adopt a policy which would give relief to that class which were suffering from those causes which had been so beneficial to their fellow-countrymen. He had received a copy of the resolutions to be moved as soon as possible after the Address, and the Earl of Derby on reading them, at once recommended their acceptance to his followers. This was no secret. It became generally known to the public that the resolutions would be generally accepted. The resolutions were then altered, and three others against those introduced into them. In consequence of this, it became necessary to frame a resolution by way of amendment, adopting the policy of Free Trade for the future most unreservedly. He should certainly resist the amendment of Mr. Villiers; but, from a conciliatory and natural goodness for his own amendment, he was willing to give way, and to accept the proposition of Lord Palmerston, with the amendment of Sir J Graham, if the House should think it preferable to his own proposition as it stood. The only question now was whether Mr. Villiers would persevere in outraging the feelings of the Ministerial side, which he thought could answer no good purpose.

Lord J. RUSSELL said he thought that the Government had committed a great mistake in not having included in her Majesty's Speech a definite assertion of the decision of the country upon the appeal which had been made to it on the subject of Protection. It was at his own suggestion that the words "wise and just" had been, in the first instance, introduced into the resolutions, and he felt that some acknowledgment of their policy was due to the late Sir R. Peel as the promotor, from those who regarded that policy as beneficent. Under existing circumstances, he would recommend his hon friend, Mr. Villiers, to withdraw his resolutions in favour of Lord Palmerston's, as amended by Sir James Graham, and thus give the stamp of unanimity to a resolution certain to bring Free-Trade as the unalterable policy of the country.

Mr. CORDEN regretted the principle of compensation; for, if it were admitted, the Free-traders would have gained nothing. It was necessary, after the declaration of the Chancellor of the Exchequer—who implied a policy of compensation—that the House should come to a division, in order that the Free-traders might know how they stood. He therefore hoped that Mr. Villiers would adhere to his motion.

Mr. NEWDEGATE avowed himself still a Protectionist.

Mr. VILLIERS said that, though he was not the author of the resolutions, he was the mover of them. The words "wise, just, and beneficent," were in the original resolutions, as they were sent to Downing-street, previous to their being proposed in that House. Under the circumstances he did not think it his duty to withdraw the motion.

After several further observations, the debate upon the resolutions was then resumed; the Chancellor of the Exchequer having withdrawn his amendment, with a view, as he said, of simplifying the question; and Lord Palmerston having moved the one of which he had conditionally given notice.

The CHANCELLOR of the EXCHEQUER intimated to the House his inability to bring forward his finance statement on the following evening, in consequence of illness.

Mr BOOKER said he could not vote for either of the resolutions, not believing that the prosperity of the country was to be attributed to Free Trade.

Mr. S. OSBORNE said that Lord Palmerston was making himself a sort of waterspout to the Admiralty, as he had done last session. He strongly commented upon the case with which Mr. D'Israeli audaciously asserted that he had no wish or attempted to reverse the doctrines of Free Trade, after having been for a few years doing his utmost to restore Protection in his room. He had no confidence in the protestations of principle, as of the Chancellor of the Exchequer or of his party; and he called upon the House to vote for the motion of Mr. Villiers.

Mr. F. BARING contended that the landed interest was entitled to compensation for the losses they had sustained by the Act of 1846.

After some further discussion, in the course of which Sir JOHN PAKINGTON defended the conduct of Ministers,

The House adjourned at a quarter to one o'clock.

CHESS.

TO CORRESPONDENTS.

AN OLD SUBSCRIBER, Hull. The Rev H Kelson's Problem, in our Number of the 13th, is perfectly correct. Play 2.—B sch mate, he cannot delay the mate beyond three moves

J P, Bethnal-green. Your solution of Stella is right; but you have failed, like most of our novice prob-ers, in re-setting the proper line of play for White in the game of Anderson and Dufresne

ELLIM.—We should have much pleasure in deciding the "knotty point" submitted; but we are quite unacquainted with the name of "Dash Chess."

RODGER.—It is obvious that if White move his King to B square, the Rook can take the K B Pawn, checking, &c.

SECRETARIES of the SOUTHAMPTON and LEAMINGTON CHESS CLUBS.—We are glad if by the particulars regarding our Correspondence and Problem Tourney we have given our readers cause for action to publish a renewal list of all Chess societies in the kingdom, with their places and times of meeting; well knowing that many of them are unable to inform their friends of their existence. Without such assistance, which it is the immediate duty of every president and secretary of a club to supply, it is next to impossible for us to carry out our purpose.

CASTAS versus UNIONIENSIS.—The printed report of the Westminster Chess Club, dated November, 1851, the year in which the unsurpassed match was played between Staunton and Horwitz, Bernauer and Mucklow, and others, is the only one known. The documents given the following statement of the final result:—" Eighty-eight games were played by these gentlemen, of which ninety-four were fought out. Of the remaining seventy-four, M de la Bourdonnais won forty-four and lost thirty."

PERCY, Tunbridge Wells.—The first of a Chess Problem being solvable in two ways does unquestionably detract very seriously from its merit. We doubt exceedingly, however, whether the position of Falkener's Problem is capable with the defence, and four certain lines of the solution proposed by you is erroneous.

BOOK-WORM.—The late Mr Bledow, the accomplished proprietor of the *German Chess Magazine*, possessed, we believe, one of the richest Chess libraries extant, but the most unassailable collector in this department of literature we have ever heard of, is M Fortelick Allky, a magistrate in one of the French provinces who has accumulated, it is said, between seven and eight hundred works upon the game! In fact any description of the kind to be found, as in Oxford, Cambridge, and the British Museum alone would occupy our whole Chess column.—See the "Literatur des Schachspiels," by Anton Schmid (Vienna, 1847.)

SOUTHAMPTON, M P, PUNCH, HARROVIENSIS, AMATEUR, Manchester.—You are quite white of the mark.

C S, Lindfield.—The amended version is now under consideration

SIGMA GRAY-ton.—A and B "are undoubtedly of their moves

CIRAN WAKEDA.—Your suggested continuation of the game between Andersson and Dufresne is ingenious, but the result, you will find, on re-examination, would not be to White's advantage. On the Kt being played to K 8 th Black might answer with rook to K 8 th, and it appears to us the game was at its most interesting point for challenge?

A CONSTANT READER, Birmingham.—The chief practical superiority of what are called the Staunton Chessmen consists in their being so formed that one piece can never obtrude upon the view of any but that from the branch of it from which they cannot readily be diverged, and, that as the officers on the King's side have each a distinguishing mark, no one can ever err in giving proper priority even to a Pawn, much less to the Pawn, the Knight, the Rook, and Queen's men. You will no doubt be able to procure them of any leading dealer in such articles in Birmingham

J W M C.—There is no such commercial rule as that assigned by your adversary. When you have advanced a Pawn to Queen's, and there is no Black Queen forced off the board, the Queen you have acquired by the promotion of a Pawn is a perfectly new piece, for the time of the right colour

J W G. Where are writers to be addressed in regard to the challenge?

SOLUTIONS of PROBLEM No. 455, by M K R, J P of Bethnal-green, Stevens, Bells, Phiz, Amateur

SOLUTIONS of PROBLEM No. 459, by Stevens, Jack of Shrewsbury, Amateur, Bodger, Halsey, of Norwich, Brutus, Albert, R D, I B D, Rev P T, Rev S M G Clarke, Madge, Phiz, F V, Diana, Neaa, Mercutio, An Old Subaltern, B B N, P A S, Before the Mast, M P, Hall, Tarnouth Dane, Liverpudlian Harrovienais, J P, R R of Ashford, T B of Woodford, W H J B Baldock, D M B, and J J of Hanover-square, Amateur, Manchester, are correct. All others are wrong

PROBLEM No. 461.

By Herr RIES, of Stuttgardt.

BLACK.

WHITE.

White to play and mate in four moves.

MATCH BETWEEN MESSRS. HARRWITZ AND WILLIAMS.

The interest at first felt in the progress of this little contest we regret to observe is manifestly subsiding, and the whole affair is threatened with oblivion before it is half over. The cause of this is undoubtedly the neglect of due provision for the publication of the games by the chief Chess organs, and the fault would seem to rest upon the authorities of the Club where the match is played. We hesitate to give credence to a report which has reached us, that the games are not published because the players claim them. This is too absurd. The players have not a vestige of right to the games. If A and B agree to play a match at Chess, without any stake or for a sum of money or beer one, or if they play to oblige parties who have wagered with each other, on their respective powers, the games in such match are unquestionably their own property; as in the present instance. A Club subscribes a purse to be played for by two or more competitors engaged for the purpose, the subscribers have a clear and indisputable claim to all the games in the contest. This is so evident as hardly to admit of argument. But without stopping to inquire by whom the games are monopolised, we put it to all parties concerned whether they will not best consult the interests of their Club, and serve the cause of Chess generally by giving every facility for making the games public.

During the past week one game only has come off, which was gained by the German, having the score:—

Harrwitz	.. .. ..	4	
Williams	.. .. ..	0	Drawn 3

CHESS IN RUSSIA.

The following Games were contested lately between Prince ODRCOUSKOFF the Younger and Count PETROFF.

(Allgaier Gambit.)

WHITE (Prince O.)	BLACK (Mr. S.)	WHITE (Prince O.)	BLACK (Mr. S.)
1. P to K 4th	P to K 4th	27. Q K† to Q 3d	P to Q B 4th
2. P to K B 4th	P takes P	28. P to Q Kt 3d	Q Kt to Q sq
3. Kt to K B 3d	P to K Kt 4th	29. P to Q R 4th	P to Q Kt 3d
4. P to K R 4th	P to K Kt 5th	30. K Kt to K B 4th	Kt to K B 3d
5. Kt to K 5th	P to K R 4th	31. Kt to K R 5th	Kt to Q 2d
6. R to Q B 4th	P to K B 3d	32. R takes P (ch)	K to K 2d
7. P to Q 4th	P to K B 6th	33 Kt to K 6th	K R to K R 2d
8. P takes P	P to Q 3d	34. R to Q 6th	Q R to K sq
9. Kt to Q 3d	P to K 3d	35. P to K Kt 5th	P to K Kt sq (g)
10. B to K 3d	B takes P (ch)	36. Q Kt takes Q B P	K to B 2d
11. K to Q 2d	P takes P		(ch)
12. Q takes P	Q B to K Kt 5th	37. R to K 7th	P to Q R 4th
13. Q to K B 4th	Kt to K Kt 2d (a)	38 P to Q R 3d (h)	Kt to B 3d
14. Kt to Q B 3d	Kt to Q B 3d (b)	39 Q Kt to Q 3d	Kt to Q R 3d
15. B to Q Kt 5th	B to K Kt 4th	40. Q Kt to K 5th (ch)	K to K 3d
16. Q to K B 2d	B takes B (ch)	41. K to Q 6th (ch)	K to K 2d
17. Q takes B	P to Q R 3d	42. Kt to Q 7th	K to K 3d
18. B takes Kt (ch)	P takes B	43. P to Q B 6th	Kt to Q B 2d
19. Q R to K Kt sq (c)	Q to K Kt 4th	44. P to Q B 6th	Kt to Kt 4th
20. P to B 5th (d)	Castles	45. R to Q 6th	K to K 3d
21. Kt to K 4th	Q takes Q (ch)	46. P to K Kt 6th	P to Q R 5th
22. K takes Q	P to K B 4th	47. Q R to Q 8 sq	R to K R 6th (ch)
23. Q Kt to K B 2d	P takes P	48. Kt takes R	R takes (ch)
24. P takes P	Q R to Q 2d (e)	49. K to K 4th	R to K 5th (ch)
25. K Kt to K B 4th	K R to K R 2d	50. K to K 3d	
26. K Kt takes K R (f)	K R to K 2d	And Black resigned.	

(a) This and the next move of the defence are not to be defended. See the April No. of the *Chess-Player's Chronicle*, page 111, note h, where the game is carried on thus:—

WHITE	BLACK.	WHITE.	BLACK.
13 Q to K 2 4th	Q Kt to Q 2d	15. P to Q Kt 3d	R to K Kt 2d, &c
14. Kt to Q B 3d	Kt to Q Kt 3d		

(b) Breaking up to take the Q Pawn; and, if White took it, to win the Queen by B to K 4th.

(c) With the intention of taking the K R Pawn with the other Rook unless Black guards against it.

(d) It does not appear that Prince O would have gained anything by playing Kt to K 3 th to which the Q R Pawn.

(e) Apprehensive of White's taking the K R Pawn.

(f) Well played. If Black take the Kt he must lose his own in return.

(g) He might search long enough ere he found a good move in his present untoward situation.

(h) This is sign decent-looking move was important, because it prevented the adverse Kt from entering White's territory, and enabled Prince O. to maintain his Q Kt at his post, if needful.

A FOREIGNER'S ACCOUNT OF THE FUNERAL.

(From the *Independance Belge.*)

London, Friday, Nov. 19, 1852.

London is recovered from its fever, and returned to its normal condition. An hour after the procession passed, the demolition of the scaffoldings began, the black hangings were taken off, and the barriers removed which had intercepted the circulation during the past twelve hours. It is a serious thing for this business-like nation to have suspended all occupation for a whole day, that day not being a Sunday. England, however, went completely into mourning for her hero. In London not a single shop was opened, and it appears to have been the same over all the kingdom.

This was the real demonstration, for as respects the military display, decidedly this excellent English nation understands nothing whatever about this kind of spectacle. Not that I reproach them for it: they may thank God that they have something else to do besides excercising troops, and have no need to mount guard. But then, when one has no sort of experience in the style of the Olympic Circus, one should not attempt it, nor have reviews. The fact is, that the spectacle of the military procession was very poor, and for foreigners, accustomed to grand reviews and great marching and countermarching of troops, this part of the ceremony altogether miscarried. The English are to blame for going out of their ordinary course to play at soldiers. Hence one of the most remarkable things of the funeral yesterday, was precisely the long double row of policemen, forming a line from one end to the other, and whose only weapon was their little staff. This is what gives to English funerals *fête* such a characteristic and original aspect—it is the absence of the armed force, the absence of military power. But for the funeral of a general, and of a general whose name was Wellington, a military show was indispensable. England, therefore, made an exhibition of troops of every arms.

These troops are fine men, well appointed, if you please, but there were not many of them. Londoners most likely there saw more soldiers at a time than they had ever seen in their lives before. The *cortège* of the English marshal of France in the *Invalides* would have surprised that of Wellington as a military escort. I know not why English soldiers always have an artificial appearance, they look like model soldiers for which their trainers had obtained prizes and medals. Their arms are so bright, so well cleaned, that one would think they were the fittings are of polished steel; they shine like fire grates; they seem like objects of luxury. The band of the Life Guards, instead of helmets, wear little velvet caps, which, with their red coats, give them the air of huntsmen in pursuit of a sling.

All this, however, you are not to infer that English troops are not as sturdy as others; history shows they are; but it is also clear, that a land army in this country is altogether a secondary thing; and that neither its strength nor its intelligence lies there.

To judge how much the English are out of their element when they attempt a military spectacle, it is only necessary to notice the singular and almost grotesque effect caused by the mingling of civilians with the procession of troops. There were Judges of the land in their carriages, with their traditional wigs; then came Bishops and Archbishops, also with their wigs. Then the Speaker of the House of Commons arrived, ornamented with, if possible, more wig still than the Judges and Bishops, and of the group alone in an immense gala coach, gilded from top to bottom, as large as a house, and which must have been made after the pattern of Noah's Ark. It was still better when the procession arrived at Temple-bar, which is, as you know, the gate of the City. There the Lord Mayor, who was on his own territory, took up his place in the procession, with an abundance of wig, and also with a gala coach, such as one only sees in old pictures, and in the City of London. The Lord Mayor's place was immediately before Prince Albert. He gave up the inside of the gala carriage to the husband of the Queen, and it was an act of voluntary politeness on his part, for the Lord Mayor is King of the City, and gives precedence only to the reigning Sovereign.

Together with the civic coaches, the car, on which the coffin was placed, was the most monumental part of the procession. The English papers state it was 27 feet long, 10 feet wide, and 17 feet high, and that it weighed 12 tons. I will not speak of it out of respect for him it carried. It was necessary that the car should pass through Temple-bar, and that was not an easy operation. The builder had provided for this by a mechanism which allowed the enormous machine to be lowered a few feet when passing under the arch. Thus, the old Duke of Wellington, even after death, did homage to the ancient laws of this country, and the representative of military power bowed for the last time to salute the civil power.

And thus the body of the Hero of England was carried to St. Paul's, and laid by the side of Nelson.—Around the coffin was Prince Albert, holding Hutton as Field-Marshal, and the Duke of Cambridge as Admiral. The pall bearers were old companions-of-arms of Wellington; and at the head, his successor in the Command-in-Chief of the Army, Lord Hardinge. The Duke's baton as Marshal was carried by the Marquis of Anglesea; and the three insignia turned on the left hand by Lord Rolle, and who is now 84 years old. All the *corps diplomatique* were there, including the French Ambassador. Belgium rendered still higher honours to the Duke of Wellington. She was represented by her King's sons—the Duke of Brabant and the Count de Flandre.

The English papers will come to you with twenty columns, bordered in black, containing the description of the day of the funeral. It is quite natural that they will find everything superb. As for me, two things appeared particularly striking: they were—first, the popular manifestation, in itself; and, next, the almost cosmopolite character of the honours rendered to the memory of Wellington. In presence of the homage of all Europe, one recollection necessarily occurred to all minds—and that was Waterloo.

The Duke of Wellington had seven bâtons of Marshal from foreign countries: at his funeral each of those countries had sent a general officer to bear the bâton; Austria alone was not represented by a General. You are aware that the Emperor formally refused to allow the uniform, torn off the back of General Haynau, by Barclay's brewers, to appear in London. All these foreign uniforms following the body of Wellington, seemed to be the Europe of 1815 paying its final homage to the man she had chosen to command at last battle; the Allies again came together, after thirty-seven years' interval.

As to the national demonstration the English demonstration—it was universal; and, under this point of view, it was indeed magnificent. More than a million and a half of men, women, and children assembled from the extremities of the kingdom, to follow in the train of the greatest of England's sons. The day before, and all the night, was very bad weather. The old dictum could never have been better employed, that "the sun always shines on a funeral." But on the day of the funeral, the English sky manifested itself more English than ever, by showing itself in mourning and in cataracts. But nothing could stop the people. The railways had organised *bonnes affaires*, which, during all the previous afternoon and night, brought thousands of persons to the London sands passed the night in the streets, exposed to to rents of rain, for they might have the best places the next morning. Those that left their houses at the dawn of day, saw an enormous crowd behind the barriers and behind the palisades, and boldly mounting guard in two feet of mud, and in icy cold weather.

It is this universal concurrence of a whole nation which appears to me the most striking trait of this solemn funeral. The Duke of Wellington, for more than a half of men, women, and children, and, on the contrary, always treated them with *hauteur* and a certain contempt; and, nevertheless, the masses rushed eagerly in the train to pay him the last popular homage. The fact is, they recognised in him a man profoundly national.

On all the line of the procession, there was but one inscription; and that was—" *Non sibi, sed Patriæ.*" It was for that the English people honoured Wellington the citizen, for whom his country was everything to him. And to him, that is following the funeral car of the conquer at Waterloo, England bore in mind, not only the battles of the past, but also reflected on the sombre presage of the future, and that on the very day that Wellington descended into the tomb, a Napoleon was about to ascend a throne.

THE CHARGER "COPENHAGEN."—In the *Times* of Nov. 22, has appeared a letter, signed "ARMS GROSVENOR," containing the following statement in correction of the quotation in our Journal of last week, from *Bell's Life in London*:—" Lady Catherine, the dam of the horse was the charger of Marshal (then Major-General) Grosvenor, at the siege of Copenhagen, when, in his own presence, received the thanks of the House of Commons, in company with his associate, Sir Arthur Wellesley, on the 1st of February, 1808, both Generals being members of the House. The mare gave birth soon after to a colt foal, which, in memory of the event, was named 'Copenhagen,' and was reared by General Grosvenor. The horse went afterwards into other hands, before he became the favourite charger of the illustrious man we have lost."

"THE IRISH GLEANER."—FROM AN ORIGINAL SKETCH.

THE IRISH GLEANER.

THE DAWN OF A BRIGHTER DAY.

BY FRANCIS BLNNOCH.

From the bustling east to the idle west—
From the north to the southmost shore—
O'er hill, through bog, in light and fog,
You may travel all Ireland o'er.
Where energy, liberty, love, were dead,
Or in senseless stupor lay,
Hope—smiling beams,
And its radiance streams
On the dawn of a brighter day.

The pestilence came like a quenchless flame
On the breath of a poisonous wind;
You might reckon its force and track its course
By the ruin it left behind:
Nor beauty, nor youth, nor sex was spared—
Its mission was still to slay!
From the desolate past
There cometh at last
The dawn of a brighter day.

Though kindred fled from kindred dead,
They have found a home afar;
They have labour and rest in the beautiful West,
Where trusty brethren are.
And those who remain in their own dear land
While justice bears the sway—
Have prosperous lives;
For labour thrives
In the dawn of a brighter day.

What matter, although the pauper's rags
May flutter before the breeze!—
Dead leaves are seen 'mid the living green
Of the leafiest forest trees.
Though poverty lurks, and beggary work,
In the South, wherever we stray;
Yet, all around
Is increasingly found
The dawn of a brighter day.

Here many will find hearts warm and kind;
Maids beautiful, lithe, and sweet—
You might envy the favoured grass they press
In the tread of their naked feet!
A flood of melody swells the voice,
And stealeth the soul away.
'Tis beauty supreme
Fulfilling the dream
That told of a brighter day

By head and hand, on sea and land,
The present its future weaves;
By hill and plain, or where ears of grain
Are gathered among the sheaves,
A spirit of love in labour lives,
Bringing health and wealth alway
The night has flown,
The light has shone—
'Tis the dawn of a brighter day:

TOMB OF LOUIS PHILIPPE.

SOMEWHAT more than two years since, on the morning of September 2, 1850, the remains of Louis Philippe were interred in the vault of the beautiful little chapel, built in the garden of Miss Taylor, at Weybridge. The tomb beneath which the Royal remains were deposited was made in London, and completed at Weybridge, in about four days before the burial, under the superintendence of Mr. Banting, of St. James's-street, to whom the funeral arrangements were confided.

The monument having been duly consecrated, the coffin was inclosed within it. It is an altar-tomb, of simple design, covered with a large slab attached by the upper end to the wall, and supported at the foot by a pair of small columns. On the portion nearest to the wall are sculptured in relief the arms of the ex-King, surmounted by a Royal crown, and beneath the escutcheon is engraved the following inscription:—

Depositum juxta
hoc lapide
donec in patriam,
avitos inter cineres,
Dilecti adjuvante, transferatur,
Reliquiæ
Ludovici Philippi primi,
Francorum Regis,
Carmouthi, in Britannia,
Duncth
die Augusti MDCCCXXVI,
Anno Domini MDCCCL.
Ætatis LXXVI.

Requiescat in pace.

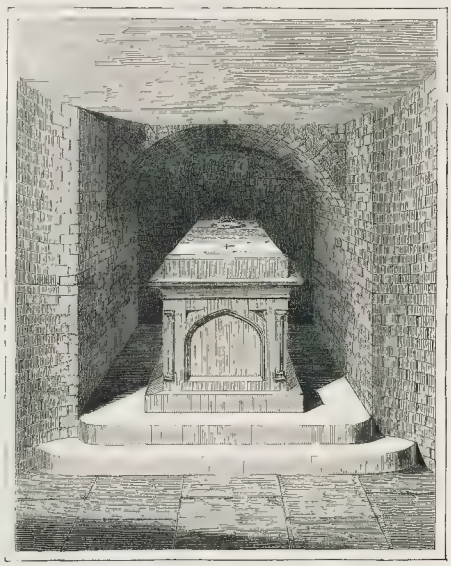
The above interment is still considered as temporary; since it is the wish of the family of Louis Philippe that his remains should be removed to France.

THE AFRICAN MAIL STEAMER, "FORERUNNER."

THIS new vessel, the first of a set of five screw steamers to conduct the mail contract service between this country and the coast of Africa, arrived from Sierra Leone on Sunday evening, at Plymouth.

The *Forerunner* left Plymouth, with the mails, &c., on Sept. 24; arrived at Madeira, Sept. 30th; Teneriffe, Oct. 1; Goree, Oct. 6; Bathurst (Gambia), Oct. 8; and Sierra Leone, Oct. 12. Having discharged her mails and cargo, landed her passengers, and taken in fresh cargo, and received the mails and passengers for England, she left Sierra Leone, on her homeward voyage, Oct. 18; Bathurst, Oct. 23; Goree, Oct. 24; Teneriffe, Oct. 31; Madeira, Nov. 2; was dismantled Nov. 4, arrived at Gibraltar, Nov. 8; left Nov. 14; arriving at Plymouth Nov. 21.

On the 4th of November, when the wind was blowing from the west-north-west, the *Forerunner* running under double-reefed topsails, the wire rigging gave way, and foremast, mainmast, and funnel were swept away. There was a very heavy sea at the time, but the vessel was brought to the wind under close-reefed mizen, and she rode out the gale in fine style. At sunset Captain Atkins brought his vessel up under lower studding sails set on a jury foremast, for Gibraltar, to refit: in consequence of the loss of the funnel it was impossible to get up the steam to even half power; but, using two headless casks as a temporary funnel, sufficient draught was obtained to get steam to a 5-lb. pressure. The *Forerunner* in this way arrived at Gibraltar on the 8th instant, for the purpose of refitting the vessel. There every assistance was received from the Hon. Captain Grey and Captain Codd, of the *Firebrand*, and, having refitted, the *Forerunner* left Gibraltar on the evening of the 14th; Captain Atkins having been presented by the passengers with a letter congratulating him on the coolness and ability with which he had encountered the storm, and thanking him for his uniform kindness. She experienced strong head winds in passing through the Gut, and encountered heavy weather all the way home, notwithstanding which she made the distance from the Rock to Plymouth Sound in the short space of a week. She passed the ship *Arthur* on the morning of the 21st in the Channel, bound from Calcutta to Cork.



TOMB OF LOUIS PHILIPPE, AT WEYBRIDGE.

THE AFRICAN MAIL STEAMER "FORERUNNER."

The *Forerunner* has been proved to be a good vessel, possessing great powers of speed during the voyage; and it would seem, by the cargo of palm-oil, gold, bees-wax, oranges, &c., and the passengers she has brought, that she has been the precursor in steam communication with parts of the world which promise a considerable increase to the trade of this country.

The *Forerunner*, having landed her passengers, left Plymouth for London on Monday morning.

This new vessel was built by Mr. Macgregor Laird, at Birkenhead; and is 160 feet in length, between the perpendiculars; has 22 feet beam, and 12 feet 6 inches depth. She is rigged as a three-masted schooner, and propelled by two engines of 80-horse power, constructed by Fawcett and Preston, of Liverpool.

The *Forerunner* is handsomely and strongly constructed: her iron plates are made to overlap each other, inwardly and outwardly alternately. She is sharply moulded forward and aft, and under the water remarkably so; while she runs into much wider bearing amidships. The vessel has an elliptic stern, and for a figure-head she bears Mr. Laird's arms.

The vessels to complete the line are to be named *Faith*, *Hope*, *Charity*, and the *Northern Light*: each of which will be considerably larger than the *Forerunner*. The same principles will be applied in their build; and the speed is required to be at a good average rate. It is interesting to find that these vessels are building on the banks of the Mersey—not only as regards the credit of the port, but as significant that an important share of the trade in iron shipbuilding is returning to Birkenhead, where it originated upwards of twenty years ago.

THE DUKE AND WILLIAM IV.—Dining at Queen Charlotte's table, on his return, in 1814, from the Peninsular campaigns, Wellington happened to be placed next to the Duke of Clarence, who observed to his mother, "that on entering the port of Cork, while in the naval profession, in 1787, an escort of honour awaited to conduct him to the city, commanded by a young officer, whom he was then happy to find seated beside himself, a Royal guest, invested with all the distinctions which merit could carry or power bestow."—From *Notes and Queries*.

POOLE.—(From a Correspondent.)—Those who were unable to pay their tribute of respect to the lamented Duke, by swelling the crowd at his funeral, evinced their feelings here by the general suspension of business in the town, the shops being closed and the bells tolling from an early hour. The shipping had their flags half-mast high, and at Brankses Castle, the residence of Major Waugh (10th Hussars), minute guns, to the number of eighty-three, were fired from the batteries, at three o'clock in the afternoon.

THE WELLINGTON TREE ON THE FIELD OF WATERLOO.

We have been favoured by a Correspondent with the accompanying accredited account, by the late Mr. Children, F.R.S., of the Wellington Tree, upon the field of Waterloo; beneath which, it will be recollected, the Duke was stationed during part of the memorable battle.

"Brussels, Sept. 30th, 1818.

"On Sunday morning last, I visited the field of battle, accompanied by François Brasgine, one of the guides from Mont St. Jean, who attend

THE WELLINGTON TREE.—SKETCHED ON THE FIELD OF WATERLOO.

travellers, to point out the positions of the French and Allied armies. My daughter had seated herself to take a sketch of the tree, when François called to us to proceed; and on my explaining the reason of our stopping, he exclaimed, "*Ma foi! en bon temps! car demain il est tomber!*" And so it was: the earth was already cleared away, and the roots prepared by the axe to receive the saw, which, the following day, was destined to bring it to the ground. The eager but unfortunate desire of thousands to possess a morsel of the tree had completely removed the bark, through its whole circumference, for nearly three feet in height, and in many places considerable portions of the wood had been cut off. In this state it would have been impossible to preserve the life of the tree, even had the owner, who occupies the farm of Papilotte, been willing to suffer it to stand. The injury done annually to his corn, which was trampled under foot by the visitors to the tree, determined him to make the tree a sacrifice. Anxious that it might remain, though in death, a triumphant memorial of the great events it had witnessed, I directed my guide to treat with the farmer for the sale of it, and became the purchaser of the tree. It is now on its way to England, and I trust the purposes to which it is destined will not be thought unworthy of this illustrious, though silent, record of the skill and gallantry of the greatest General and bravest troops that ever fought and conquered.

"Although it has thus fallen to my lot, to be the temporary possessor of this treasure, I hope I shall not be accused of having become so unworthy, and that I may be allowed to express my regret that proper measures were not taken to preserve the tree till removed by age and natural decay.

(Signed) "JOHN GEORGE CHILDREN."

The most remarkable relics of this tree are a chair, now in Windsor Castle, presented to his Majesty George IV., by Mr. Children, and engraved in the ILLUSTRATED LONDON NEWS for Sept. 25 last; another chair given by Mr. Children to the Duke of Wellington, in which we have heard he mostly sat for his portrait; and a third chair, in the possession of his Grace the Duke of Rutland, at Belvoir Castle. There is also in the British Museum a very curious portion of the tree, having an iron chain over which the wood had subsequently grown. Mr. Children himself had a cabinet made of this wood to contain minerals, now in the possession of his son-in-law and daughter, and many of his friends possess smaller articles manufactured from the tree.

THE AUDIENCE CHAMBER AT THE HORSE GUARDS THE NIGHT BEFORE THE FUNERAL.—(SEE PAGE 474)

THE DUKE A FREEMASON.

(To the Editor.)

EDINBURGH, Nov. 20th, 1852.

I am induced to copy the annexed account of an event in the life of the late Duke of Wellington, in the persuasion that it is but little known. It is a curious fact that most of the Duke's military friends and associates were members of the Masonic fraternity. Witness Lord Combermere, a very keen Mason; the Marquis of Tweeddale, a Past Grand Master of Scotland; the late Earl of Dalhousie, also a Grand Master of Scotland; and various others, dead or living. It is also remarkable that Soult, and other Marshals of France whom the Duke met in fight, were Brothers of the Craft of Peace. I am, &c., W. P.

"MASONIC INITIATION OF THE DUKE OF WELLINGTON.—This distinguished Brother, when Colonel of the 33rd Regiment of Foot, was initiated into Freemasonry in Lodge 494, which was at the time held in the Castle of Dangan, county Meath, the late Earl of Mornington, his Grace's father, being the Master at the time. He was duly passed after the usual examination, and (in the phraseology of the Lodge) entered at the southern gate and afterwards raised. The following Brethren, being members, were present; many of them in the words of the Irish bard, have been 'famous in story.' viz Sir James Somerville, Bart; Sir Benjamin Chapman, Bart.; Ham. Georges, M.P.; — De'vere, Esq.; John (late) Earl of Westmeath; Robert Uniacke, M.P.; Richard Boyle, M.P.; John Pomeroy, William Forster, George Lowther, M.P.; Earl Mornington, Marquis Wellesley, F. North, (late) Earl of Guilford; Robert Percival, Robert Waller Richard Lesley, Arthur Wellesley. This Lodge has for many years been in abeyance, but has never surrendered its warrant. The venerable Brother, Christopher Carlton, through whose fraternal kindness the above interesting particulars have been communicated, filled the offices of Master and Secretary for several years; and, finding at length that he could not succeed in effecting sufficient gathering of the craft to work the Lodge, he prudently took the warrant into his personal charge, and maintained the credit of the Lodge by payment half-yearly dues from his private purse, as though it were working in prosperity."—*The Freemasons' Quarterly Review* for 1836, Vol. III., p 442.

SURVIVING WATERLOO OFFICERS.

AXMINSTER, DEVON, 21st Nov., 1852.

(To the Editor.)

I take the liberty of pointing out to you an omission in the list of the Waterloo officers, given in your last number, which, as the list purports to be strictly accurate, you will perhaps do me the favour to insert in your next. The omission is the name of Lieutenant-Colonel M'Alester, 35th Regiment who has now the honour to address you, and who then commanded the 2nd Battalion 35th Regiment, attached to the 2d Division of the Duke of Wellington's army.

I have the honour to be, &c., C. A. M'ALESTER,
late Lieut.-Col. 35th Regiment, and an Old Subscriber.

(To the Editor.)

I beg leave to call your attention to the omission in the list of the surviving Waterloo officers, in your paper of Saturday last, of the name of Major D. Hamilton, late of the 73d Foot, who retired on half-pay in June, 1837, and finally sold out of the service in 1841, with the rank of Major; as reference to the Army Lists for 1837—1841 will prove.—I am, &c., your obedient servant,

JAMES A. HAMILTON

17, Great Russell-street, Nov. 23, 1852.

THE FUNERAL TENT AT THE HORSE GUARDS.—TROOPS PRESENTING ARMS.—(SEE PAGE 474.)

MUSIC.

M. Jullien's Promenade Concerts at Drury-Lane Theatre have been well-attended with crowded houses. The florid vocalisation of Mdlle Anna Zerr, and the solo playing of Arban and Koenig (cornet-à pistons), Barret and Lavigne (oboe), Baumann (bassoon), Lazarus and Mayer (clarionet), Cioffi (trombone), Prosjere (opheicleide), Cooper (violin), Remusat (flute), Tutt (harp), &c., are nightly received with the greatest enthusiasm. The Bal Masqué, on the 13th of December, will terminate this brief season, after which M. Jullien will depart for America ——Amongst the musical events of the week must be mentioned the commencement, on Tuesday last, of Miss Dolby's delightful *soirées*, at her own residence, in addition to her charming displays of singing, she is aided by the leading *artistes* of the day, both vocal and instrumental; and taste and tact are evinced in the introduction of novelties, as well as in the execution of the standard classical chamber works ——The Musical Institute in Sackville-street, under the presidency of the Rev. Sir W. H. Cope, Bart., M.A., will soon resume the holding of *conversazioni* on musical subjects ——The Camberwell Musical Evenings have been commenced at the Hall in Grove-lane ——Miss Louisa Pyne, Miss Dolby, Messrs. Francis, Land, and Bodda, of the English Glee and Madrigal Union, at the St. James's Theatre, have just terminated a most successful tour in the northern and midland counties ——Mr. Ella, the director of the Musical Union, has just returned to town from Paris to organise his winter series of chamber concerts —— At the second concert of the Whitington Club, on Thursday, under the direction of Mr. G. A. Cooper, Herr Anschues being the conductor, the vocalists were the Misses Messent, Lizzy Stuart, Mrs. G. A. Cooper, Messrs. Tedder, Lyall, and Wilworth, and the solo instrumentalist as Mr. B. Wells (flute), and Herr Leo Kerbusch (violin) —— Madame Fiorentini is engaged for the concerts of Mr. George Forbes, at St. John's wood; she will shortly make her *debût* at Exeter Hall, in oratorio, having been for some months studying under Sir George Smart for that purpose. Madame Fiorentini, who has been the *prima donna* at the Italian Opera Houses in Berlin and Paris, and at Her Majesty's Theatre, is an Englishwoman; and, with her magnificent voice, it is expected that she will take a high position amongst the vocalists who have devoted their talents to the sacred school of singing. The impression that she produced in Mendelssohn's "Elijah," at Bristol, was of a nature to afford every assurance that she will be a most welcome addition to the present list of leading sopranos, a dearth of which has been felt.——The programme of the music performed at the Town-hall, Birmingham, on the day of the late Duke of Wellington's funeral, included the "Dead March" in "Saul," the airs "Ye Sons of Israel" and "Let the bright Seraphim," from "Samson," the "Holy, Holy, Holy" from "Redemption," Spohr's quartet, "Blest are the departed," Mendelssohn's chorale, "Sleepers, wake," the quartet from Handel's funeral anthem, "When the ear heard him;" the third part of the "Messiah;" a selection from Mendelssohn's "Paul" and "Elijah;" and Handel's imposing chorus, "Then round about the starry throne."——A Baptismal Anthem, the words selected from the Scriptures by Mr. Bartholomew, and the music composed by Mr. Costa, was recently performed in private; and the record of this event, of which it is to be regretted no more at present can be given, suggests the hope that Mr. Costa, in the multiplicity of his labours as a conductor, may yet be enabled to devote some time as a composer, for there is no existing writer who is more thoroughly master of picturesque instrumental-on than Costa ——To the list of singers specified in our last week's notice as forming the choir at St. Paul's Cathedral, on the occasion of the Duke's funeral, must be added the names of Mrs Endersohn and Miss Dolby, and for the name of Hayward that of Hayeroft must be substituted.—— Some new harp compositions by Mr. F. Wright, have been lately performed at Erard's warehouse, in the presence of amateurs and professors.— Advices from St. Petersburgh mention that the *début* of Labocche, last month, in Donizetti's "Don Pasquale" was a complete ovation from beginning to end. He was called for seven times at the conclusion of the opera. Signor Medori was the *Norina* ——Mdme Persiani, Gardoni, Rossi, and Tamburini are about to sing at the Hague and Amsterdam, and the Italian Opera-houses.—— Madame Jenny Lind Go.dschmidt and her husband have taken up their residence at Dresden, having purchased the villa called the "Elys ium."——The first performance of his oratorio of Mendelssohn's death was celebrated in Berlin, in the church of the Garrison, of which he was organist, by the performance of his oratorio "Paul," and of two of the composer's hymns.

THE THEATRES.

HAYMARKET.

A comedy, in two acts, by Mr. Tom Taylor and Mr. Charles Reade, was produced on Saturday last, under the title of "Masks and Faces." It is said, probably, from the French; it is, nevertheless, so thoroughly anglicised, that it assumes, in a great measure, the merit of originality. The heroine is an actress, *Peg Wellington*, the daughter of a poor but married gentleman of Huntingdonshire, *Ernest Vane* (Mr. Parselle), for whom she declines the suit of a *Sir Charles Pomander* (Mr. Leigh Murray). The latter accidentally makes the acquaintance of the neglected wife, and takes her to a party given by her husband to his histrionic acquaintances For awhile, *Mabel Vane* (Miss Rosa Bennett) thinks that the company has been invited by *Ernest* to meet her on coming to town; ultimately, she is undeceived. The second act introduces her to the dwelling of *Triplet* (Mr. Webster), the poor poet by whom the discovery has been made, and who is likewise an actor and a portrait-painter, to whom *Wellington* gives a sitting for her likeness. Dissatisfied with his work, he dashes his palette-knife through the canvas, just at the moment that her friends the critics, such as *Soddy Cobber* (Mr. Lambert), *Quin* (Mr. Bland) and others, are about entering to discuss his merits. *Peg Wellington*, thereupon cuts out the head altogether, and inserts her own in the place, which being mistaken for the picture, undergoes severe censure. *Mabel* afterwards enters, and addresses the portrait in a strain of passion, which causes *Wellington* to reveal herself, and to take measures to demonstrate *Vane*. For this purpose she personates his wife, and receives the addresses of *Sir Charles*, with a diamond ring worth £200. Having thereby succeeded in sundering the husband's jealousy, she at length declares herself; and then, for the purpose of disgusting him, pretends that she has all along been making a fool of him, having wagered with Sir Charles on the possibility. This part Mrs. Stirling acted with a fine sense of humour as put upon delicate a delineation. Mr. Webster also personated the poor poet whose business in the scene is of a much larger amount than it appears in our description—with a singular felicity of aptitude for realising peculiar traits. The piece is written with much elegance, and was deservedly successful.

OLYMPIC.

"Go to Bed, Tom" is the name of an original farce, by Mr. T. Morton, produced on Thursday, the humour of which turns on the familiar *soubriquet* of a certain *Thomas Gotobed Smith* (Mr. Compton), who, twenty years ago, had left England for America, to escape from the consequences of his smuggling transactions. He returns to find his wife just on the eve of marrying a Irishman, and his daughter disconsolate because such Irishman had been her lover. His appearance at first seems to set all matters to rights; but the old warrant against him revives, he has to escape afresh. Fortunately, however, it is discovered in time that the legal document in question had been made out in fact against another person of a similar surname, but spelt with a Y; and thus the required *denouement* is accomplished. The dialogue portion of this trifle is too much extended, but the clever acting of Mr. Compton carries it triumphantly through.

SURREY.

A nautical piece of some merit, entitled "The Life Chase; or, the Marriage Day," has been produced at this theatre. Mr. Shepherd, as *Dick Rolt*, represents the British tar, and was considered successful by the audience

ASTLEY'S

An equestrian drama on the subject of "Uncle Tom's Cabin" was produced on Monday, with all needful accompaniments of scenery, costume, and pageant. It proved a stirring and str king piece of work, and will probably continue to be attractive for a considerable period.

In our last week's impression we omitted the name of Mr. J. T. Cooper in the list of the members of the musical procession, who assisted in the funeral service at St. Paul's Cathedral, on the last day.

THE MANCHESTER SILK TRADE.—A memorial has been presented to the Chancellor of the Exchequer, signed by the majority of firms (37) in the broad silk trade, asking for the total and immediate repeal of the duties on foreign silk goods.

NATIONAL SPORTS.

The Steeple-chase calendar shows only one fixture, viz., Crewe, on Tuesday; and the bill of fare is not by any means imposing The Coursing appointments are confined to the Newmarket Champion, commencing on Tuesday; Knutsworth, on Wednesday; Whitchurch, Ridgway, and Coquetdale, on Thursday.

TATTERSALL'S.

MONDAY—The betting this afternoon was in small sums, but quite as brisk as we usually have it at this period. The laying prices at the close were as follows:—

SHERRY BURY HANDICAP

2 to 1 agst Doubt	5 to 1 agst Kit of se
5 to 1 — Le ta Fawn	7 to 1 — Pill of Pens
	8 to 1 agst Larryheart

COLUMB HANDICAP -2 to 1 agst Warwick (a)

6/5 to 1 agst Muscovite	100 to 1 agst Gaudeamus
100 to 8 — Hobbs Nobbs	100 to 1 — Gr y Tommy
	1000 to 1 agst Redmond O Hanlan

CHESTER CUP.

100 to 1 agst Madeline	
100 to 1 — Tarleton	

DERBY

12 to 1 agst Umbriel	25 to 1 agst Nimrahammer
20 to 1 — Ulysses	33 to 1 — Brocket
20 to 1 — Elmsthorpe	

16 to 1 agst West Australian
16 to 1 — The Baboon
16 to 1 — Pearce

THURSDAY.—No attendance.

SHREWSBURY AUTUMN MEETING.—TUESDAY.

ASTLEY HOUSE STAKES.—Knight of the Whistle (Ashmall), 1. Ada (Aldcroft), 2

SHREWSBURY HANDICAP.—Doubt (Ashmall), 1. Bit of Blue (Waddington), 2

ABBEY STAKES.—Carinetta (Wells), 1. Lady Jane (Kendall), 2.

MAIDEN PLATE.—Lady Jane, 1. Grapple Kate (Astell), 2.

COLUMB HANDICAP.—Bit of Blue (Waddington), 1. Lady Robina (Cliff), 2.

COUNTY HUNDRED STAKES.—Rose (Owner), 1. Diana (W. Jones), 2.

WEDNESDAY.

SEVERN STAKES.—Black Jack, 1. Henrietta, 2.

STAPLE CHASE.—Heroine, 1. Sir Edward, 2.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

During nearly the who's of the week the market for the national securities has been somewhat excited, and prices have continued to advance. In our last week's article we stated that we had great confidence in the future, and the result of the transactions within the last few days has fully justified the accuracy of their conclusions. The main cause, however, of the excitement is the arrival of nearly £1 000,000 sterling in gold, from Australia, and of advices to the effect that a similar quantity is closest hand. From Sydney we have dates to the 4th ult., in reference to the produce of gold are very flattering, most of the diggers having been very successful in their operations, the precious metal being discovered in the neighbourhood of Adelaide, and the shipments largely on the increase The total quantity of go d forwarded to England, to the 31st of July, was not less than £7,500,000 sterling. Of course the stock of bullion in the Bank of England will be steadily augmented; and, on the other hand, we must bear in mind, that every effort will be made by our leading capitali-ts to find a profitable market for their gold in other portions of the globe. For instance, since the commencement of the present year, nearly £7,000 000 sterling in silver has been shipped to India, and it is very probable that gold will become an article of commerce with the East. Since the last week £288,000 has been forwarded to Calcutta, and £2 000 in gold to China, Egypt, &c.; but we have had additional arrivals from other quarters, viz 800 000 dollars from Mexico, 35,000 dollars from New York, and about £25,000 from Paris, notwit standing the the exchange is by no means favourable, gold being only 0 to 1 per cent. dearer in London than in the French capital. That metal is 0.18 per cent. dearer at Hamburg than here; the Crystal Palace exchange shows 0.67 per cent. in favour of England compared with New York.

The trade and commercial affairs of the country are also satisfactory as at present. In the manufacturing districts, nearly the whole of the ar lean are fully employed, while the shipments of British manufactures are rapidly increasing The extension of trade is greatly assisted by the abundance of money, and the comparative ease with which discounts are obtained in all quarters. The revenue of the United Kingdom is improving to an extent which has created no little surprise in many quarters, and yet there is evidently ample room for a further extension in it.

On Monday, the Three per Cents Reduced were done at 100¾; Three per Cent C nsols, 100⅞ 101; Three-and-a-Quarter per Cents, New, 103⅜; India Bonds, 84s. pm; Ditto, under £1000, 80s.; Exchequer Bills, 70 to 72s. pm.; Ditto, for Account, 100, to 101. On Tuesday, the Three per Cents were 101; for Money, and 101⅜ for the Account. On the following day, they were marked 101½. The low interest now allowed upon the Continent has created a very onward movement in the quotations. On Thursday, the Three per Cent. Consols were done at 101⅜; Three per Cents Reduced, 100⅝; the New Three-and-a-Quarter per Cents, 103⅜; India Stock, 278; India Bonds, 85s. to 83s.; Exchequer Bills, 73s. 75s. pm.; Bank Stock, 213; Long Annuities, 19⅛; the Bank Stock, 223; Long Annuities, 19⅛; India Stock, 278; India Bonds, 85s. to 83s.; Exchequer Bills, 73s. 75s. pm.; South Sea New Annuities, 100⅞

The business doing in the For ign House has not been to any extensive, yet very little change has taken place in the quotations. A serious Scrip has been done at a premium; Sardinian ditto, 1½ 2; and Turkish Scrip, 3 premium A meeting of the bondho ders in the latter security has been held, at the offices of the Ottoman Government announced for refusing to fulfil general into eats. Within a short time the whole of the bondholders will be repaid the last amount of their coupons. It was stated at the meeting that Mr. ex. Rovenale was to be a Commissioner of Taxes for Crete, but were objected to as a foreign portion of the revenue would be appropriated to his remuneration. Ten per cent. on their coupons, amounting to £1,000, would be retained by the Turkish Government, and the remainder would be paid in cash. Russian Stock was realised, ditto, Four-and-a-half per Cents, 101; Dutch Two-and-a-half per Cents, 61; Portuguese Four per Cents, 34; Spanish Certificates, 5; Ditto Coupons, 4; Ditto Passive, 4; Peruvian Four per Cents, 77; Venezuela, 41; Austrian Five per Cents, 98; Belgian Four-and-a-half per Cents, 97; Dutch Two-and-a-Half per Cents, 61; Ditto Certificates, 5.

Joint Stock shares have been in request for Commercial, 168½ for East and West India, 103 for London, 99 for St. Katherine, 35 for Southampton, and 6¾ for Victoria.

Extensive transactions have taken place in Australasia Bank Shares, at 70 to 71½; Bank of British North America, 68 to 69; Colonial Gold, 10½ 11; English, Scottish, and Australian Bank, 4½; London Chartered Bank of Australia, 4¾ to 5; Oriental Bank of Australasia, 60; Ditto, New, 7½ to 7⅝; Union Bank of London, 16¾; Australasian Royal Mail Steam, 7½ to 7⅝; Crystal Palace, 5; General Screw Steam Navigation, 29; Peninsular and Oriental Steam Navigation, 98½ to 99; Ditto, New, 49½ to 49¾; Royal Mail Steam, 78½

The last returns of the total circulation of the private and joint stock banks in England and Wales show an increase, compared with the preceding month, of £405,000, the total amount being £6,984,488. These banks are still bearing their fixed issues, £1,186,000

The market for English Railway Shares has ruled rather active, and prices have somewhat improved, and we have to report transactions in the Scrip of the Boston and Midland Counties Railway and Stock Company's Shares at 12s. 6d. to 20s. prem. Foreign Shares have ruled heavily, and the quo ations have to be somewhat revised. The following are the official closing prices on Thursday:—

ORDINARY SHARES AND STOCKS.—Aberdeen, 22½; Ambergate, Nottingham, and Boston Junction, 6¾; Bristol and Exeter, 108; Caledonian, 65¾; Chester and Holyhead, 14¾; Cork and Bandon, 18¾; Dublin and Belfast Junction, 4¾; Dublin, Dundrum, and Rathmines, 5; Dublin and Kingstown, 12½; Eastern Counties, 6⅝; Edinburgh and Glasgow, 78; Edinburgh, Perth, and Dundee, 45; Edinburgh and Northern, 10½; Glasgow, Paisley, and Greenock, 50; Great Northern, 19½; Great Southern and Western (Ireland), 87½; Great Western, 59½; Hull and Selby, 112½; Ditto, New, 28½; Lancaster and Carlisle, 34½; Lancaster and Preston Junction, 16; Leeds and Bradford, 70; Leeds and Thirsk, 10; London and Blackwall, 7½; London and North Western, 94½; London, Brighton, and South Coast, 54½; Manchester, Sheffield, and Lincolnshire, 18½; Midland, 74½; Newry and Enniskillen, 3; Norfolk, 44½; Ditto, New, 9½; North British, 34½; North Staffordshire, 12; Oxford, Worcester, and Wolverhampton, 39½; Scottish Midland Junction, 58½; Scottish North Eastern, Stirlingshire, and Edinburgh, 14½; Shrewsbury and Birmingham, 19½; Shrewsbury and Chester, 17; Shrewsbury and Hereford, 8½; South Devon, 4½; South Eastern, Dover, and Ramsgate, 14½; South Eastern and Dover, 17½; Vale of Neath, 70; Waterford and Kilkenny, 5; Waterford and Limerick, 11; West Cumberland, 9½; West London and Crystal Palace, 11½; West London Extension, 8½; Wilts, Somerset, and Weymouth, 14; Ditto, New, 4½; York, Newcastle, and Berwick, 21; York and North Midland, 24; Ditto, New, 8½; Ditto, Purchased, 9½; York and North Midland, 6.

LOAN SHARES AT LOWER RATES.—Aberdeen Annuity, 18½; Clydesdale Junction, 8½; Gloucester and Dean Forest, 33½; Hull and Selby, 112½; Ditto, Quarter Shares, 27½; Manchester, Buxton, and Matlock, 3½; Midland (Bruxford), 178

PREFERENCE SHARES.—Bristol and Exeter, 10½; Caledonian, 103; East Union, 3½; Ditto, 7 per Cent. 5½; Eastern Union, 17½; Great Northern, 127; Ditto, Preferable at 10 per Cent. premium, 113; Great Southern and Western (Ireland), 2 thirds, 9, ex. New; Great Western, 109; Ditto, New, 10½; Lancaster and Carlisle, 25; Manchester, Sheffield, and Lincolnshire, Quarter Shares, 150½; Norfolk, 5½ per Cent., 6½; North British, 103; North Staffordshire, 10½; Oxford, Worcester, and Wolverhampton, 11½; Shrewsbury and Chester, 17; Waterford and Kilkenny, 2½; Ditto, New, 1½; Wilts, Somerset, and Weymouth, 13; Ditto, New, 4½; York, Newcastle, and Berwick, 21; York and North Midland, 24; Ditto, New, 8½; Ditto, Purchased, 9½; York and North Midland, 6.

FOREIGN SHARES.—Buenos Ayres and Ensenada, 14½; Ditto, Quarter Shares, 2½; Cuba, 14½; Ditto, New, 2½; Dutch Rhenish, 7½; Namur and Liege, 9½; Northern of France, 35½; Ditto, Extra Bonds, 15½; Paris and Lyons, 39½; Paris and Strasbourg, 34½; Quebec and Richmond, 3½; Rouen and Havre, 40½; Sambre and Meuse, 7½; Sicilian, 2 premium; West Flanders, 3½; Western of France, 18½.

MINING SHARES have remained very much unchanged, at very full prices. Agua Fria have been done at 3½; Anglo-Californian, 3½; Australian, 6¾ to 7; Australasian, 3¾ to 4; Ave Maria, 3 to 3½; St. John del Rey, 3½; Liberty, 2½; Nouveau Monde, 3; Santiago de Cuba, 14½; West Maripposa, 1.

FRIDAY AFTERNOON.—The amount of money business doing in the Consol Market to-day has been comparatively small, and prices have ruled a shade lower than last evening. The Three per Cents Consols are 10⅜; and for the next Account, 10½ The Three per Cents Reduced have been done at 100⅞ and 101; the Three-and-a-Quarter per Cents, 103⅜; Bank Stock, 223; India Stock, 275; India Bonds, 85s. and Exchequer Bills 70s to 73s pm In the value of Foreign Bonds and Railway Shares very little change has taken p ace.

THE MARKETS.

CORN EXCHANGE (Friday).—The supply of English wheat up to our market this week to last was large, amounting to 21 quarters, almost wholly from Essex and Kent, and in very fair condition. To-day the show of samples by land carriage was very moderate. All kinds of wheat were in very slow request, and a fair clearance was effected, at Monday's prices. The imports of foreign into the country continue on the full average scale. Several parcels of low wheat changed hands at a reduction to clear on former rates. Floating cargoes were held at the extreme rates of last week. Several cargoes were sold for shipment to the Continent, of which we have no definite account. A very large quantity of English barley is now on offer—upwards of 50,000 quarters—the sale for malting purposes is slow, and nearly last day's prices are barely maintained. Malt was in good supply and moderate inquiry, at previous quotations. Beans were in good request, and fully supported. Peas were in limited supply and steady demand.

ARRIVALS.—English wheat, 21 qrs; barley, 10,500; malt, 28,500; peas, 6130; flour, 2260 sacks.

Foreign.—Wheat, 24,510 qrs; barley, 10,500; malt, 28,500; peas, 6130; flour, 2260 sacks.

ENGLISH.—Wheat, Essex and Kent, red, 40s to 43s; ditto, white, 44s to 50s; Norfolk and Suffolk, red, 39s to 42s; ditto, white, 43s to 48s; rye, 30s to 32s; grinding barley, 25s to 28s; distilling ditto, 28s to 30s; malting ditto, 31s to 35s; Kent & Essex malting, 36s to 38s; brown ditto, 34s to 36s; Kingston and Ware, 36s to 40s; Chevalier, 40s to 42s; Yorkshire and Lincolnshire malt, 77s to 80s; pale ditto, 70s to 76s; Yorkshire and Co. k. black, 46s to 48s; ditto, white, 47s to 52s; tick beans, new, 32s to 36s; ditto, old, 34s to 36s; grey peas, new, 32s to 40s; maple, 34s to 36s; white, 37s to 42s; harlots, 40s to 43s per quarter; Town-made flour, 38s to 40s; Suffolk, 32s to 34s; Stockton and Yorkshire, 31s to 33s per 280 lb.

FOREIGN.—Linseed is in good request at very full prices. Cakes are 10s more dearer Other articles are to the very first —

Linseed, English sowing, 54s to 58s; Baltic, crushing, 46s to 50s; Mediterranean and Odessa, red, 44s to 46s; ditto, white, 46s to 48s; ditto, white, 48s to 50s; Norfolk and Suffolk, red, 39s to 42s; ditto, white, 43s to 48s; rye, 30s to 32s; grinding barley, 25s to 28s; distilling ditto, 28s to 30s; malting ditto, 31s to 35s; Kent & Essex malting, 36s to 38s; brown ditto, 34s to 36s; Kingston and Ware, 36s to 40s; Chevalier, 40s to 42s; Yorkshire and Lincolnshire malt, 77s to 80s; pale ditto, 70s to 76s; Yorkshire and Co. k. black, 46s to 48s; ditto, white, 47s to 52s; tick beans, new, 32s to 36s; ditto, old, 34s to 36s; grey peas, new, 32s to 40s; maple, 34s to 36s; white, 37s to 42s; harlots, 40s to 43s per quarter; Town-made flour, 38s to 40s; Suffolk, 32s to 34s; Stockton and Yorkshire, 31s to 33s per 280 lb.

FOREIGN.—Linseed is in good request at very full prices. Cakes are 10s more dearer Other articles are to the very first —

Linseed, English sowing, 54s to 58s; Baltic, crushing, 46s to 50s; Mediterranean and Odessa, 44s to 46s; Egyptian, 36s to 40s per quarter. Coriander, 6s to 12s per cwt. Brown mustard seed, 7s to 8s. White ditto, 7s 6d to 9s 6d. Tares, 5s 6d to 6s per bushel. Rapeseed, English, £21 to £24 per last of ten quarters. Linseed cakes, English, £8 10s to £9 10s; foreign, £8 5s to £9 0s per ton. Rape cakes, £5 10s to £6 5s per ton. Canary, 58s to 62s per quarter. Clover seed nominal.

Bread.—The prices of wheaten bread in the metropolis are from 6½d to 7d; of household ditto 5d to 6d per 4lb loaf.

Provisions.—Wheat, 39s 2d; barley, 29s 4d; oats, 18s 2d; rye, 27s 6d; beans, 34s 2d; peas, 33s 3d

The Daily Gazette gives the following average:—Wheat, 39s 2½; barley, 29s 4d; oats, 18s 2d; rye, 27s 6d; beans, 34s 1d; peas 33s 11d

Butter.—Best, per cwt, barley, 1s; oats, 1s 2d; beans, 1s, peas, 1s.

Cheese.—The demand for cheese has been limited, but prices are nearly supported. Common sound cheese is selling at from 50s to 56s per cwt. Fine Cheshire, 60s to 64s; Gloucester, 56s to 60s; Derby, 60s to 64s; Wiltshire, 60s to 64s; Suffolk, 50s to 54s; Cheddar, 60s to 64s; Scotch, 50s to 54s; Irish, 50s to 54s; Edam, 40s to 42s per cwt. Rochelle Salt, 2s per lb. Soda, 1s per cwt.

Provisions.—We have a steady demand for all kinds of Irish butter, at fully last week's prices. English qualities have advanced 4s per cwt. Fine weekly Dorset, 94s to 98s; middling ditto, 86s to 90s; Devon, 90s to 92s per cwt; fresh, 8s to 9s per dozen pots. Bacon is in good demand, at full prices. Hams are scarce, and 2s per cwt dearer. Bacon is in best, 52s to 56s per cwt. Irish ditto, 48s to 52s per cwt. Irish lard, 50s to 52s per cwt. Irish pork, 70s to 72s per barrel; Mess ditto, 80s to 82s per barrel.

Tallow.—Our market has become a trifle heavy. On the spot, and for all the year, the best P C is 47s 6d to 47s 9d per cwt. Town tallow, 47s per cwt, net cash. Rough fat 2s 8d per 8 lb.

Oils.—The general demand is steady, and last week's prices are well supported. Linseed, 29s 6d to 30s per cwt.

Spirits.—The market for rum continues active. Proof Leewards is 6d to 1s 7½d; East India, 1s 6d; 8d; Jamaica, 4s 2d to 4s 3d per gallon. Brandy moves off freely, at very full prices. British-made spirit is brisk, at 9s 8d to 9s 9d cash. Geneva, 2s 4d to 2s per gallon.

Hops are in steady request. Mid and fine kinds are scarce. Sussex pockets, 90s to 98s; Weald of Kent ditto, 94s to 102s; Mid Kent ditto, 98s to 110s; East Kent ditto, 100s to 120s; Farnham, 120s to 170s per cwt.

Fruit.—Currants are selling at from 45s to 50s; Valencia raisins 40s to 48s; Smyrna ditto, 30s to 36s; Turkey figs, 45s to 70s; muscatels, 70s to 72

AMUSEMENTS, &c.

No. 594.—VOL. XXI.] SATURDAY, NOVEMBER 27, 1852. { TWO NUMBERS, 1s., WITH LARGE PLATE, GRATIS.

THE GRAND STATE FUNERAL OF ARTHUR DUKE OF WELLINGTON.

So far as our time and space permitted, we presented our readers last week with the more salient points of interest in the unprecedented spectacle which took place on Thursday, the 18th. A great deal, however, still remains to be told; and we have now to ask the reader's indulgence for an attempt to place before him a connected and complete narrative of the last honours paid to the memory of one of the most illustrious of Englishmen. No one can hope worthily to describe the splendour, magnificence, and solemnity of that great state pageant, or the imposing interest which it derived from the countless thousands of human beings who swarmed along the line of route and reverently stood with uncovered heads as the bier of the venerated dead passed before them. England's metropolis—vast, populous, mighty London—empress of modern cities—the huge living wonder of the nineteenth century—never before presented a scene so amazing to men of other lands or even to her own sons.

THE HORSE GUARDS.

The striking military spectacle presented in the Parade-ground in St. James's Park, facing the Horse Guards, began, as we stated last week, with the dim light of early morning. About half-past six the gates of the Park were thrown open—trumpets were heard sounding right and left—and heavy columns of armed men were dimly seen advancing from the Bird-cage-walk on the one side and from the Queen's-mews on the other. As they approached more nearly, their measured tramp became more distinctly heard, and their bayonets began to reflect the dull gleams of morning light. The second battalion of the Rifle brigade—a compact mass of dusky uniforms—took up their position on the extreme left, near the long gun; while on the extreme right (the post of honour), near the Cadiz mortar, was the first battalion of the Grenadier Guards. Next to the Grenadiers were the Coldstream Guards, and then came the Scots Fusiliers, the 33d Regiment, and the first battalion of Royal Marines. The bands of each regiment formed in the rear. A brilliant muster of officers of high rank in full uniform, and wearing military mourning, were assembled under the Horse Guards, awaiting the arrival of Major-Gen. H.R.H. the Duke of Cambridge, to whom, at his special request, was confided the command of the whole of the troops in the metropolis on the day of the funeral.

The entire Parade was reserved for the military and the mourning-coaches, the latter of which were irregularly drawn up at each side of the Parade, ready to obey the order of Garter King-at-Arms, and to take their proper rank in the procession. The troops, which were drawn up in contiguous column, at quarter distance, had thus "ample space and verge enough" for their evolutions. The infantry alone occupied the Parade-ground in front of the Horse Guards; the cavalry and artillery being drawn up along the Mall leading from Buckingham Palace to Carlton-terrace and stables. On the left, near the Treasury, were seen the six state carriages of her Majesty and the Royal family, each drawn by six incomparable horses, and attended by a crowd of the Royal footmen in rich liveries of scarlet and gold lace. The state carriage of the Speaker of the House of Commons was also seen on the Parade, near the Treasury.

Under the shadow of the Horse Guards, and just under the suite of rooms occupied by the Commander-in-Chief, was the gigantic pavilion containing the funeral car, upon which the crimson and gold coffin now reposed, having been removed from the Audience Chamber early in the morning. The sides of the tent were closely secured until a few minutes before eight o'clock, when the tent was struck, and exposed to the view of the military on the Parade the coffin and car. At the word of command, "Present arms!" every musket and sword were raised in respectful homage to the memory of the great commander; while the muffled drums gave a long and heavy roll that sounded like distant thunder. The cavalry and artillery in the Mall now drew their swords. Minute guns in the Park began to fire a funeral salute. The troops were, after a short interval, ordered to "Reverse arms!" and thus in the attitude of mourners, and in view of the body of the illustrious departed, the military awaited the signal to move off.

The moment belonged to history. Here, under the walls of the building with which his name had been so long identified, lay all that was mortal of Arthur Duke of Wellington. The mind reverted to that far distant period when, in 1787, a missive issued from this building which made the heart of the young Ensign of eighteen beat high with joy and

THE DUKE'S HORSE, LED BY HIS GROOM.—(SEE PAGE 479.)

hope. Six short years hardly elapsed before another despatch from this same spot ordered him, then Lieut.-Colonel of the 33rd, to embark at Cork, with his regiment, to join the Duke of York's army in the Netherlands. Hither, too, young Colonel Wellesley repaired, upon his return, to receive the thanks of the Commander-in-Chief for the wary, resolute, and skilful manner in which he had commanded, as senior officer, three battalions on the retreat of the army through Holland. When he next mounted the staircase leading to the Audience Chamber, it was after eight years' brilliant service in the East. He was then the young hero of Assaye; and clerks in the War Office and the Quartermaster-General's Department, hearing of his arrival, left their desks to get a glance at one who had plainly entered upon a career teeming with great exploits, while young aides-de-camp vied with each other in their praises and congratulations. A few years more and the Audience Chamber witnessed the Lieutenant-General of forty explaining to a Prince of the Blood Royal his plans for the campaign in Portugal. He was now in the prime of life, confident in himself, and in the coolness and courage of his troops; nor did he descend the staircase with a less buoyant step as he remembered that he was going forth to measure his prowess with Napoleon's best Marshals, with the probability of bringing down upon him the most irresistible military genius of modern times, with his vast armies. He embarked for Lisbon, and then began to arrive a series of despatches, which, opened in this very building, announced a series of brilliant victories that make the very walls vocal with his praise. Could the Lieutenant-General have even dimly conceived that when he next entered the Audience Chamber of the Horse Guards, after an absence of five years, it would be as a Field-Marshal and a Duke? Waterloo followed; and England, already lavish of her honours, had no higher title wherewith to reward her famous commander. The next and last step was an easy one for such military greatness. It was reasonable that he who had been appointed by common acclaim to the Commander-in-Chief of the Allied Armies of Occupation in France, should at length fill the post of Commander-in-Chief of the gallant army which he had so often led to victory against overwhelming numbers and the bravest antagonists. Here, in the Audience Chamber, from which his pallid and lifeless remains have just been removed, the soldier, who had himself once been ushered with palpitating heart into the presence of his military superiors, was now in his turn to receive timid ensigns and gallant veterans, to whom his nod was fate. Here he laboured unceasingly to increase the comforts, and improve the efficiency of the British army. He never forgot the difficulties and disorganization against which he had to struggle in the conduct of the Peninsular War. His example, his military maxims, his close attention to the minutest details of discipline, and his incessant care for the comfort and contentment of the soldiery have passed into traditions less perishable than the stones of the edifice with which his name will ever be identified.

He had left that building for the last time, and lay under the windows from which he so often had looked out into the Parade upon the household troops, of whom he was so proud. A thousand veterans who had seen him giving his orders unblenched, under the hottest fire, now gazed upon his funeral bier with dimmed eyes and sad hearts; and young and gallant soldiers thought, perhaps, that, if opportunity served, they also could emulate his valour, his coolness, and his unswerving loyalty.

The word of command was given. The infantry, beginning with the Rifle Brigade, moved off in sections, eight in front, headed by their band. They were followed by the Marines and the 33rd Regiment.

Every band played the "Dead March in Saul." A tremendous roll of the drums denoted that the Coldstreams were in motion. A pause—a few measured beats of the drum—and then a grand outburst of slow and solemn music. But it was still the "Dead March." Our bands are satisfied with Handel, and they are right. Heard from all those companies of musicians—now near, and now distant—this sublime strain of grief never tired. Now, in the distance, it reached like a low wail; and then, at a turn of the road, it burst upon us with magnificent fullness and grandeur of harmony. Now it seemed to pierce the skies with accents of a sadness too heavy to be borne; and then, becoming more assuring, the strain whispered of fortitude, manly resolution, and a sustained hope beyond the grave.

The eight cavalry bands, too, being in motion along the Mall, contributed their notes of measured grief. The "trumpet's silver sound" still discoursed Handel's music, and the ear found a new beauty in every accidental combination by which the breeze or the distance imparted novelty to the effect.

The soldiers having filed off, the Kings-at-Arms, in their gorgeous tabards, marshalled the mourning-coaches in their due order of precedence. The Knights Grand Crosses of the Order of the Bath were nobly represented by Lieut.-General Sir E. Blakeney, who fought with the Duke in the Peninsula, and is Commander-in-Chief of the Forces in Ireland; Admiral of the Fleet, Sir G. Cockburn, who conveyed Napoleon to St. Helena; Lieut.-General Sir George Pollock, who forced the Khyber Pass and took Cabul; and Viscount Palmerston. These four filled one mourning-coach.

The mourning-coaches containing the Judges, the Cabinet Ministers, and the Great Officers of State, had long since arrived with their several occupants, and only needed to be marshalled by the heralds. But so soon as the Archbishops were despatched, and the Adjutant-General and Quartermaster-General, with their assistants and deputies, all high and potential authorities at the Horse Guards, had left—a brilliant group—who immediately preceded the Royal carriages, containing Prince Albert and his suite—a series of mourning-coaches drove up to the entrance of the Horse Guards, and there awaited their illustrious occupants. To give greater dignity and effect to the departure of the distinguished representatives of foreign armies, Garter King-at-Arms, in his scarlet coat, upon which the Royal arms of England are most richly embroidered in gold, and bearing his bâton as principal King-at-Arms, himself ushered them, with due heraldic observance, to their carriages. The Duke of Osuna entered the first carriage. You might have guessed the nation he represents by the *empressements* with which the Spanish colonels who accompanied him entreated each other to mount first after him the carriage steps. That old man, with silvery hairs, who, covered with decorations, bore the Duke's bâton as a Russian Field-Marshal, was the Russian General, Prince Gortchakoff, who was present at Waterloo. He is aide-de-camp to the Emperor of Russia, and *chef de l'état*—a position of no mean distinction at the Court of the Czar. The Prince was accompanied by the Count de Benckendorf and two other Russian soldiers, whose breasts bore marks of their valour and the favour of their powerful Monarch. Prussia sent another venerable warrior in the Count de Nostitz, a General of cavalry, and aide-de-camp to the King, who saved Blucher, at Quatre Bras, at the hazard of his own life, and fought at Waterloo. Portugal sent one of her greatest nobles in Marshal the Duke de Terceira, who enjoys the high honorary title of Grand Ecuyer to her most faithful Majesty. From the Netherlands we had a friend of the King in the Baron d'Omphal, an aide-de-camp to his Majesty of Holland, who was accompanied by the King's chamberlain. A hundred veterans at Chelsea Hospital would recognise the representative of Hanover in the old and gallant General Sir Hugh Halkett, whose life is a romance, and who so often led his Hanoverian Legion to emulate the steadiness and valour of English troops in the Peninsular campaigns. All those foreign visitors who carried the Duke's continental bâtons were accompanied by generals and colonels of their respective armies, whose gorgeous military uniforms could not fail to attract attention, even among so distinguished an assemblage as that in St. Paul's Cathedral. Last, and most remarkable of all that gallant company, was the venerable Marquis of Anglesey, the first cavalry officer of his day, who, supported by the Dukes of Richmond and Cleveland, all in military uniform, entered a mourning coach as the bearer of the Duke's bâton as an English Field-Marshal.

Two other mourning-coaches now drew up to receive the pall bearers. When we say that the first contained Viscount Combermere, the Marquis of Londonderry, Sir Peregrine Maitland, and Viscount Hardinge; and the second, Lord Seaton, Sir G. Woodford, Viscount Gough, and Sir C. Napier;—we have given a list of eight of the most distinguished of those gallant veterans who followed the Duke in his Peninsular campaigns.

The twelve horses attached to the funeral car were now urged to a simultaneous effort, and the car was drawn from under the tent. Its ponderous weight is seen in the traces left by the wheels. But the horses walked away easily with their magnificent load. The Colonels carrying the bannerols now surrounded the car, and their gaily-painted flags, the rich bronze of the funeral car, the gilt bier, the trophies of modern arms, the canopy of silver and silk tissue, and the splendid crimson and gold of the coffin, relieved, by the brilliancy of their colours, the funereal black of the rich silk velvet pall, which is, moreover, powdered with silver heraldic collars. With such pomp and statelimess the mortal remains of the hero left the scene consecrated by his labours no less than by his victories.

The pall-bearers and the coffin were preceded by the fine band of the Grenadier Guards (the Duke's own regiment), playing the sublime "Dead March."

After the funeral car came a long train of mourning-coaches, containing the present Duke of Wellington, the chief mourner; his brother, Lord Charles Wellesley; and other members of the Duke's family. Other mourning-coaches, containing his intimate personal friends, followed; among whom were Lord Raglan (so long the Duke's right hand at the Horse Guards as Lord Fitzroy Somerset), the Earl of Westmoreland, the Earl of Ellenborough, Viscount Mahon (to whom has been confided the Duke's biography, and the publication of his papers), Lord Colchester, &c. To these succeeded the Duke's dark-brown horse, led by his body-groom. Suspended from the saddle were the Duke's boots and spurs. The suggestive picture formed by this mute mourner excited great sympathy along the line of route, and caused tears to spring unbidden from a thousand eyes, which had looked upon the long and princely train of mourning-coaches unmoved.

When the mourning-coaches had gained the site opposite the Duke of York's Column, the gate of the enclosure of St. James's Park opposite the Horse Guards was thrown open; and the detachments of the various regiments of the army—which had been drawn up six in front, in single ranks, without muskets, and only carrying their side arms—marched from the enclosure after the procession, of which they formed a most interesting feature. The band of the 93rd Highlanders followed. They also played the "Dead March;" but, in the Strand, they changed the music to the scarcely less noble and solemn "Adeste Fideles." The carriages of the Queen and Royal Family, and several private carriages, closed the procession, which was brought up by an escort of the Horse Guards (Blue). They had need be men and horses capable of enduring fatigue, for we hear that they had been on duty for nearly 24 hours, and that they were to be seen in all parts of London on the previous night, conveying orders and messages for personages engaged in the proceedings of Thursday. When these Blues reached Temple-bar, they turned their horses' heads round, in order to hinder the crowd from following the procession, by which position they prevented all pressure from the rear. Every soldier in the procession, or employed in keeping order in the City, had a shilling presented to him in addition to his pay.

It was about a quarter to ten o'clock when the last of the procession left the Horse Guards, at which hour the Rifle Brigade, which led the advance, were emerging upon Charing-cross.

THE MALL.

The centre mall in St. James's Park, between Buckingham Palace and the Carlton stables was from an early hour in the morning occupied by the cavalry and artillery. The former were drawn up on each side the Mall, in order that the procession might pass through the lines thus formed. No less than eight squadrons of cavalry, making 668 swords, and accompanied by their respective bands, were thus formed into two opposite lines. In the gardens of Marlborough House a large scaffolding was erected by the Department of Works for the accommodation of officers of the civil service, &c.; admission to which was obtained by cards signed by Lord John Manners. Similar accommodation was provided at Stafford House. The Queen, accompanied by the Royal children, and the two young Belgian Princes, the sons of King Leopold, appeared in the centre balcony of Buckingham Palace, and watched from an early hour the effect produced by the waving plumes, the burnished helmets and cuirasses, and the snorting and impatient steeds of the cavalry stationed along the entire length of the Mall. When the successive battalions of infantry, with muffled drums, reversed arms and funereal step, had cleared the Duke of York's column, the band of the Royal Artillery fell into the procession, leading nine guns of the Field Batteries, each gun a 9-pounder. Then came the band of the 17th Lancers, and a squadron of that regiment by threes. The 8th Hussars, the Scots Greys, and the 6th Dragoon Guards, then followed by threes, headed by their respective bands, each of which played solemn music. The cavalry of the line were followed by eight guns of the Royal Artillery. Then the band of the 1st Life Guards, with heart-thrilling strains of plaintive music, led the way before the cavalry of the household brigade, comprising the Horse Guards (Blues), the 2d Life Guards, and the 1st Life Guards. The fine soldier-like bearing of the horse-soldiers, the precision with which they moved after the procession "from the left of squadrons," and the docility with which the noble steeds obeyed the slightest motion of bridle or knee of their gallant riders, rendered this a striking portion of the military spectacle, which was watched with untiring eyes by the crowds assembled upon the noble flight of steps leading to the Duke of York's column, the thousands assembled in the gardens of Carlton-terrace, and the limited numbers of the public who were admitted within the enclosure of St. James's Park, and who hurried to the side nearest the Mall.

When the funeral car had reached the Mall, nearly opposite the Duke of York's Column, its ponderous weight caused the wheels to sink in a small gutter in crossing the Mall. The wheels sank several inches, and the twelve horses could not for some time be brought to pull together, notwithstanding the zealous efforts of the sergeants of the Royal Artillery who accompanied them. Aides-de-camp galloped to and fro—advice was tendered, and orders were given on all sides—the Duke of Cambridge furiously galloped up Constitution-hill and down Piccadilly to tell the commanding officers that the car had broken down, and directing a halt—and her Majesty, alarmed at the delay, sent to inquire into the cause. After a pause of a quarter of an hour, by the assistance of a body of police, of some private soldiers and milkmen, and of a few bystanders who lent their aid by means of ropes attached to the car, the horses were got to pull together, and the car was extricated from the mud. The Earl of Cardigan immediately galloped off to the Queen with the welcome intelligence that the cause of delay had been overcome, and that the car, uninjured, was on its way again. The bands of the various regiments saluted the Queen in passing; and it is deserving of notice that the Royal standard was lowered upon the flagstaff at Buckingham Palace while the funeral procession passed by—a signal mark of respect to the memory of one not of royal blood.

CONSTITUTION-HILL AND APSLEY HOUSE.

It was one of the circumstances attendant upon the Duke's funeral, that almost every one who saw it was not only satisfied with his position, but was inclined to think it better than any other. The spectator upon the roof of the Horse Guards and the Admiralty thought nothing could be finer than the marshalling of the procession and the assembling and evolutions of the troops upon the spacious Parade-ground. The fair occupants of galleries in the gardens of Stafford House, Marlborough House, and Carlton-terrace, would not have exchanged for any other the "sight entrancing" of

> Files array'd
> With helm and blade,
> And plumes in the gay wind dancing."

The persons fortunate enough to gain the roof of St. George's Hospital saw the procession come up Constitution-hill, and witnessed the departure of one-half the cavalcade and the approach of the other. The view from this point also took in the Duke's mansion, the colossal equestrian statue over the Wellington Arch, and the Achilles statue in Hyde-park. The view of the procession from the centre of Piccadilly had also its points of especial interest; for horse and foot, mourning-coaches, and funeral car, were seen stretched along in a magnificent line of pageantry. Charing-cross presented an imposing scene in the vastness of the area, and the dense masses by which it was occupied, and had its point of special interest in being the spot where the eighty-three Chelsea pensioners, in their long scarlet coats, and bearing black wands, joined the procession. The Strand was a sea of heads in such close proximity on either side of the way, and windows, balconies, foot-paths, and house-tops, were occupied with such economy of space, that the pulsation of human life had its own strong and memorable interest. East of Temple-bar, the spectators could congratulate themselves upon seeing the procession with its final additions of Lord Mayor, Aldermen, and Common Councilmen; while the eighteen thousand favoured individuals, who thronged to St. Paul's, would not have been anywhere in the world on that day, save in the metropolitan cathedral, and around the grave of the departed hero. Thus, of the incredible masses who thronged the line of procession, all experienced a sad and chastened satisfaction, in having witnessed the melancholy *cortège* from some point along the line which disclosed some peculiar feature of beauty and interest.

Hyde Park-corner and Grosvenor-place were choked up with human beings, whose first glance was turned to Apsley House. The well-known mansion had a tenantless and desolate air. The household gods were mute. The entrance-gate into the courtyard was closed. Every window was shrouded in darkness, and there were the iron blinds still closed which, looking upon the Park, have long enough told in dumb eloquence the melancholy story of the fickle ingratitude and the violence of an excited populace. A guard of honour of Light Dragoons was placed in front of Apsley House. Wyatt's statue of the Duke upon his favourite horse, Copenhagen, pointed like a spectre to the road along which grim death had now marshalled the way. Westmacott's statue of Achilles, looming in gigantic proportions through the morning mist, stood in silent but emphatic witness not only of the gratitude of the Duke's fair countrywomen, but of the terrible battles of Salamanca, Vittoria, Toulouse, and Waterloo, in which those thirty tons of ordnance metal were silenced and captured. At twenty minutes to nine the detachment of Life Guards, which opened the procession, reached the Wellington arch; and amid intense and respectful silence, the Rifles and the rest of the military passed beneath the arch, and turned into Piccadilly. The several bands played the "Dead March" as they passed Apsley House, but the Life Guards band subst tuted for the march a solemn and subdued roll of muffled drums, which sounded like the muttering of low and distant thunder. A delay (the cause of which we have already described), occurred here, so that precisely two hours elapsed from the arrival of the advanced guard before the sad procession had passed Apsley House.

It was remarked that, whether by accident or design, the funeral car and coffin remained for a few minutes stationary under the Wellington Arch. The scene at this moment was solemn and affecting. The large open space around Hyde-Park-corner, the Knightsbridge-road, the tops of the houses, and even the arches leading into Hyde Park, were filled with people, who maintained a decorous gravity, well suited to the thronging memories of the Duke around them. When the funeral car was passing Apsley House, there was a general cry of "Hats off!" which was immediately complied with; and thus, bare-headed, the vast assemblage did reverence to the deceased, as his corpse passed the mansion so long consecrated by his presence, and teeming with the invaluable trophies of his glorious campaigns.

PICCADILLY.

This fine long entrance into the metropolis was marked out by its position as an eligible and favourite point of view. Most of the mansions at the upper end of Piccadilly, opposite the Green Park, are able more or less to overlook Constitution-hill, and could see the procession soon after it emerged from Buckingham Palace. The mansions of Miss Burdett Coutts and Baron Rothschild were, like Apsley House, entirely closed, and not a single face was visible at any of the windows. But the front wall of the courtyard of Devonshire House was fitted up with wooden galleries, which gave admirable accommodation to many hundred persons of rank and fashion. The houses along Piccadilly are, for the most part, provided with balconies; and these, and the windows of every house, were occupied from an early hour. The balconies of the Coventry Club were covered with rich black drapery: they were occupied exclusively by ladies.

When the procession reached St. James's-street, the crowds seen down this street, and along Piccadilly, seemed to be reaching an incredible climax of grandeur. The people filled the pathways, and swarmed upon the tops of coaches, carts, waggons, and omnibuses, that were brought into the road.

ST. JAMES'S PALACE, ST. JAMES'S-STREET, PALL-MALL.

The course of the procession was diverted from Piccadilly down St. James's-street, in order to allow her Majesty and the Royal Family an opportunity of witnessing the *cortège* from St. James's Palace. The *habitues* of this aristocratic region of clubs determined to avail themselves of this fortunate diversion; and the most extensive and complete preparations were made. St. James's-street and Pall-Mall, indeed, presented almost a continuous line of lofty tiers or galleries, some of them capable of containing from a thousand to fifteen hundred persons. These galleries were covered with black cloth, the outer portion of the framework being in some cases hung with heavy folds of black drapery, gracefully festooned and looped with black and white cords. The Oxford and Cambridge, in addition to these marks of respect, placed at intervals along their spacious tiers of galleries mantles of black silk, fringed with silver, upon which were placed escutcheons, bearing the initial letter "W," and surmounted with the ducal coronet. The St. James's Club, Crockford's, the Travellers', the Army and Navy, Brookes's, Boodle's the Reform, the Athenæum, and the other princely edifices in this quarter, took the opportunity afforded by their extensive frontage to construct tiers of substantial galleries, more or less in accordance with

the architectural features of their respective mansions, and covered and draped with the signs of mourning. At the entrance of Marlborough House was a spacious gallery, occupied by two or three hundred persons. All these galleries were crowded to excess by distinguished spectators, most of them ladies, and all in the deepest mourning. No portion of the route could have made a deeper impression upon the distinguished foreigners in charge of the Marshal's bâtons than the line along St. James's-street and Pall-Mall. The Carlton Club alone had no visitors and no public breakfast. The Duke was one of the founders of the Carlton, and remained a member until his death, and these indications of mourning stood out impressively amid the general preparations

In front of St James's Palace a guard of honour was placed; and in apartments close to the main entrance were her Majesty, the Prince of Wales, the Princess Royal, Prince Alfred, and the Princess Alice. The youthful Princess Charlotte of Belgium, whose brothers had repaired to St Paul's Cathedral after witnessing the passing o. the procession from Buckingham Palace, accompanied her Majesty and the Royal family. The Royal group also included the Duchess of Kent, their Serene Highnesses the Princess of Hohenlohe-Langenburg, and the Princesses Adelaide and Feodore of Hohenlohe. A scene of indescribable beauty and solemnity immediately began to open upon the view of the Royal and illustrious party.

The sun shone resplendently, as, at a quarter after nine, the advanced guard of the Life Guards slowly turned into St. James's-street from Piccadilly. The sounds of plaintive melancholy music, softened by distance, had prepared the eager but hushed crowd for the approach of the procession; and when the band of the Rifles came into view the solemn strains of the "Dead March in Saul," and its exquisite appropriateness, were soon recognised. The dark and sombre uniform of the Rifle Brigade, which alone of all the battalions carried no colours, made them appear in the distance like a dusky mass of armed men, and furnished an artistic foil to the scarlet and gold of the Life Guards who led the way. Then came the fine band of the Chatham division of Royal Marines, also playing the "Dead March." The red jackets of the Marines contrasted finely with the dark uniform of the Rifles. As this amphibious body of troops passed down the street, with their colours containing the red cross of England upon a ground of rich blue, a hundred officers in the galleries declared that the Royal Marines were as fine, as steady, and as gallant a body of men as any in her Majesty's service; and before the procession arrived at the Senior United Service a thousand naval and military veterans had endorsed the opinion. And now, as another regiment turned the corner, the military men recognising their scarlet facings and coats, exclaimed "Here is the 33d, the Duke's first regiment! It is to be called 'Wellington's Own!'" The colours of this regiment were regarded with peculiar interest, and the Ensigns who bore them, and the sergeants with fixed bayonets who guarded them, seemed conscious of the honour they enjoyed in carrying the colours which the Duke himself once bore. The colours of the 33d—a red cross upon a white ground—carry two names which mark the commencement and the close of the Duke's long military career, "Seringapatam" and "Waterloo." They are not picked men, but form a very good specimen of an average British infantry regiment—men who cannot plume themselves upon being all "five foot ten," or of parading as steadily as the Guards, but rough and ready fellows, who would be as fresh after a forced march as their comrades, and quite as forward in a row at an escalade.

The Rifles were now out of sight, and St. James's-street and Pall-Mall were a bright mass of moving scarlet. In the distance was heard a band of music of extraordinary power, and soon the un tended bands of the Coldstreams and the Scots Fusilier Guards turned into St. James's-street with a burst of overpowering richness and harmony. The very air seemed laden with heaviness and sorrow. The simple and swelling strains of the "Dead March" increasing in grandeur as the musicians drew near the Palace, broke into an irresistible volume of sound which penetrated every soul, and brought a tear into many an eye. The battalion of the Scots Fusilier Guards, another steady mass of moving scarlet, marching with sad but soldier-like step, then filled the street. They were followed by a similar battalion of the Coldstreams, and these by the first battalion of Grenadier Guards—the latter the Duke's regiment. No band of music was permitted to break the solid columns of these three battalions of English Foot Guards, the pride and infantry of Great Britain. The battalions were of 600 men each; and when they filled the two streets there was something imposing and massive in their air and march, which gave their countrymen, and perhaps their Queen, the assurance that they would encounter the shock of war with the same steadiness as when they met the Old Guard at Waterloo. Less grim in their appearance than the veterans of Napoleon, they are quite as grand and warlike in their port. The colours of each regiment of Foot Guards carry the honourable names of Egypt, Talavera, Barossa, and Waterloo.

Another of the contrasts which gave brilliancy to military spectacles! The band of the Royal Artillery, with their brass instruments and dark-blue uniform, were now seen. Then, a nine-pounder, drawn by a fine team of six horses, was seen, with six men walking on each side. A small party of artillerymen followed the gun; and then eight more guns, similarly accompanied, came thundering down the street. These were the field batteries; and admirably served, and in the highest degree of efficiency, this most important arm of the service appeared to be. During all the best years of his life, the old man who now lies coffined and in his shroud was more familiar with the thunder of their fire than the ladies in those balconies were with the slamming of a door. Did they then, on looking upon those powerful horses and those murderous guns, remember how necessarily a soldier's sense of hearing becomes dulled amid incessant cannonades; and did they cease to wonder at that deafness which grew upon the venerable warrior, and made the conversation of his friends often a painful effort rather than a pleasurable gratification?

Another band turned the corner, and we had the beautiful blue uniform of the 17th Lancers, which reaches the height of beauty and richness in the Colonel, Lord de Ros, the premier Baron of England, who served that day upon the staff of the Duke of Cambridge, as his Royal Highness's Quartermaster-General. The Lancers carried upon their lances the red and white pennons, which fluttered in the breeze—"the last relics of the weapons of ancient chivalry, as the cuirasses of the Life Guards are of its armour." The brass band of the 13th Light Dragoons brought upon the scene another picturesque-looking regiment, in an elegant uniform of blue and gold, and mounted upon light and fleet chestnuts: their colours have the names "Peninsula" and "Waterloo." Another brass band, with its piercing notes, succeeded; and next we had the Hussars, with their dark jackets hanging loosely from the shoulders. Their horses are small and wiry, forming a marked contrast with the powerful grey chargers of the Scots Greys, who, in their bright red uniforms, nodding plumes, and handsome black caps, came proudly down the street, not unmindful of that terrific charge at Waterloo, in which, supported by the Inniskilling Dragoons and the English Life Guards, and commanded by the gallant Marquis who carried the Duke's English baton, they performed such prodigies of valour, and asserted to convert an obstinate battle into a triumphant victory. The Dragoon Guards followed, upon large black horses: their brass helmets and heavy swords flashed out brightly from their dark-blue uniforms. The Horse Artillery succeeded, with six guns, each drawn by four horses, and served by mounted artillerymen. The wonderful celerity of the manœuvres of this force has impressed our continental visitors with an opinion that its efficiency, which strikes them with astonishment, is somewhat underrated by our countrymen.

A halt was commanded just as the Duke of Cambridge and his staff appeared in sight, at the head of the Life Guards, and the delay gave her Majesty and the Royal children an opportunity of admiring the contrasts of colour which the various cavalry regiments within sight supplied. The word was soon given to march again: and the brilliant Life Guards, upon their large and shining black steeds, appeared in their magnificent uniforms of scarlet and gold, richly accoutred and caparisoned, with gleaming helmets, glittering cuirasses, and superb snow-white plumes. The splendid cavalcade now reached its climax; and probably her Majesty and her Court may have thought, with the veterans of the Clubs, that never had the Queen's cavalry and infantry turned out in finer order, or made a more gallant show.

The soldiers from every regiment in the service destined to represent the army in the Cathedral, heralded in the private carriages of the deputations from public bodies, and the heads of great departments in the State. The Judges, in their robes of ermine and scarlet, and the Ministers, in their Windsor uniforms, almost escaped observation in their close mourning-carriages; although Mr. Disraeli, Mr. Walpole, the Earl of Malmesbury, and the Earl of Derby were eagerly looked for, and recognised. The carriage of the Duke of Northumberland was easily known, by the bright blue equipage; and the Archbishops of York and Canterbury were also objects of respectful interest. The state carriage of the Speaker of the House of Commons formed, too, a beautiful feature in the procession, as it rolled down St. James's-street. The Standard or Pennon, the Guidon, the Banner of Wellesley, carried by field officers, to be handed over to the most illustrious officers in the army at St. Paul's, gave some life to the long and sombre train of private carriages and mourning-coaches. By-and-by the Royal children quickly recognised the state carriage drawn by six horses, containing Prince Albert, and attended by the state footmen. When three of his Royal Highness's carriages, each with six horses, had turned into St. James's-street, they made a gallant show, which agreeably relieved the monotony of the mourning coaches. The band of the Royal Horse Guards followed the Prince, and preceded the Great Banner, which was the place of honour in the procession. It was borne by Colonel Chatterton, and was handed over, in St. Paul's Cathedral, to Sir James Macdonell, the hero of Hougoumont, to whom the Duke awarded the palm as one of the bravest of the brave who fought at Waterloo.

The foreign generals, in their splendid uniforms and brilliant decorations, were received with respectful and admiring glances. But all eyes impatiently watched for the funeral car: and soon the twelve black horses, covered from head to foot in black velvet housings, emerged, three abreast, from Piccadilly.

There was the car at last, with its venerated burden—stately, towering, and massive. We described it last week, but sometimes the terms employed by one pen may be understood by those who fail to realise distinctly the phrase of another. The funeral car then, "is a series of repetitions of designs, forming a majestic whole. In shape something like a railway carriage truck, it is a flat surface upon wheels, upon which is raised a golden dais, elaborately ornamented, and terminating in halberts, which support a rich tissue of woven black and gold, the latter predominating, and producing a lustrous effect over the whole The wheels of the car are formed by repetition of truncated oaks, the circle of the wheels being formed by double dolphins extended between the points of the cross. These are of solid bronze, and the centre of each wheel is formed by a lion's head, sharply moulded and vigorous in model. These wheels are six in number, and the body of the truck is brought down between each of them, so as to take off that meagreness of outline which would be occasioned by mere straight lines upon wheels. In each department between the wheels is a figure of Victory, or Fame, holding in either hand a laurel and an olive. This figure is repeated in high relief, and larger proportions, upon each corner of the truck, which is also all of bronze. In the centre of the front rises a boldly-conceived design of the arms of the Wellington family, with the supporters. At each side of the dais is constructed a splendid military trophy formed of two cuirasses, surmounted by a helmet. From these radiate, in the first instance, swords, bayonets, and other small arms; the effect being completed, on each side, by the flags of an infantry regiment, beyond which extend a cavalry ensign. The pyramidal form of these trophies has been artistically attained by small drums under the flags, above which were deposited splendid arms, holsters, &c., of Indian manufacture. At the corners of the truck were laid, as if without order, heavy pieces of artillery, also of Eastern make. Wreaths of laurel and cypress were pendent on the side of the car, whilst garlands of boy were laid on other parts, and on the coffin and by its side were laid the palm with crowns of *immortelle*. It may be interesting to note that in obtaining this palm—the true date-palm that grows about Jerusalem—there was much difficulty, and it was only through the kindness of Sir William Hooker that a supply was obtained from the only available source—the gardens at Kew. At each side of the dais are five entablatures, each of them containing the titles of three victories gained by the late Duke. All above this was expressive of death, for upon that dais lay the coffin. The coffin rested upon a pall of rich black velvet, powdered with the ensigns of the Duke's honours, having a border of bay-leaves, the stems and berries of which were exquisitely intertwined; underneath which is the legend, 'Blessed are the dead who die in the Lord,' and terminating in a silver fringe of a foot and a half in depth.* In the panels of the rich pediment of gilding is inscribed the following immortal series of victories:—Ahmednuggur, Assaye, Argaum, Gawilghur, Rolica, Vimiero, Douro, Oporto, Talavera, Busaco, Torres Vedras, Fuentes d'Onor, Ciudad Rodrigo, Badajos, Salamanca, Vittoria, Pampeluna, Pyrenees, St. Sebastian, Nivelle, Nive, Orthes, Toulouse, Quatre Bras, Waterloo. The fringe of silver was two feet deep. The coffin was covered with superb crimson Genoa silk velvet, the ornaments and heraldic decorations of which were silver richly gilt. Upon the coffin were placed the Duke's hat and sword. The gigantic vehicle, which is 27 feet long, 10 feet broad, and 17 feet high, weighs from ten to eleven tons, and is said to have cost £11,000. To steady its passage down St. James's-street, a body of police was employed, who, by means of ropes fastened to the back of the car, prevented it from attaining a velocity which might have been fatal to the horses nearest to the ponderous machine.

Mournfully, amid the tears of the spectators in the balconies, the gorgeous and towering car approached St. James's Palace. In a few minutes the stately dais, with the sacred remains of the Queen's fastest friend—her greatest but yet most loyal subject—her paternal adviser in seasons of difficulty, doubt, and danger—the warrior who had given her land peace for nearly forty years—slowly passed before the gaze of the Sovereign and the Royal children. We shall not intrude upon the grief of the illustrious circle; but her Majesty's subjects may be certain that sweeter and more honourable tears of respect and gratitude were not shed by any of the countless mourners who saw the Duke sadly carried to his long home.

CHARING-CROSS AND THE STRAND.

The "argent pageantry" of the procession now gave place to a new and more striking demonstration. An astounding sight was presented in Trafalgar-square, and the great arteries of the metropolis that open upon the "finest site in Europe." A sea of faces, in every part of the square, was turned anxiously towards the west. As far as the eye could reach along the Strand, every window, every balcony, the top of every house, were thronged with people. They swarmed everywhere, like hives of bees. The dense multitudes filled the quare, and the foot pavements contained closely-packed masses of men and women. The side streets, leading out of the Strand, were completely built up with living masses of men and women, forming, to all appearance, a mound or rampart of heads, which were all respectfully uncovered as the stately funeral car swept by. The people were everywhere "built into the walls, swarming in the streets and clustered like hives on every projection and parapet." No capital in Europe could have presented a spectacle of such strong human interest as the presence of these living and breathing masses supplied. Thousands had remained in the streets all night. The occupants of windows were in the streets two or three hours before break of day. Anon the melting strains of distant plaintive music caused a breathless silence, and battalion after battalion, and squadron upon squadron, each accompanied by the same melancholy music, and marching to the same measured and solemn step, traversed the populous thoroughfare. They were followed by pennon and banner and gilded coaches; and yet, before strained to the uttermost to miss no feature in the great pageant, gleamed with new light and interest as the coffin and canopy were seen in the distance. There was a cry of "Hats off!" and the crowds stood bareheaded as the bier passed by; and with this touching and universal mark of respect the multitudes took their last gaze at the enshrouded mortal remains of England's Great Duke.

TEMPLE-BAR AND LUDGATE-HILL.

The last accession to the procession took place near Temple-bar, in the persons of the Lord Mayor and Corporation of the city of London. Great solicitude was, therefore, felt to view the ceremonial from this spot, and two and three guineas were given for seats commanding a good view. The Lord Mayor, in his state carriage, and the Sheriffs, in theirs; the Aldermen and Recorder, in their official robes, and the Common Council, in their mazarine gowns, awaited in Fetter-lane the arrival of the procession. The Lord Mayor had waived his claim to take precedence over Prince Albert, and, in return, was permitted to take the next place of honour, enjoying precedence over the Archbishop of Canterbury and all the other great officers of State. The splendid funeral decorations at Temple-bar were minutely described in our last Number; and, we have now only to add, that the immense sweep of the black cloth curtains, with which the Bar was covered, the rich silver cornices, which marked out the great Roman funeral arch into two stories, the silvered funeral urns, and the ten large silvered flambeaux, which emitted a flare of gas from an early hour in the morning, until shortly before the arrival of the *cortège*—all the decorations, wreaths, and trophies suggestive of a great military conqueror, invested with a new solemnity the entrance of the funeral car into the city of London. Strong wooden barriers had been erected along the kerb-stone on each side of the road from Temple-bar to St. Paul's Cathedral, which were kept by the soldiery. At the open space where Farringdon-street and Bridge-street intersect Fleet-street, a vast expanse of faces was seen, while even the crown of Blackfriars-bridge was occupied by persons anxious to catch this distant view of the procession. The infantry battalions, soon after passing the Bar, drew up in line along the street, beginning with the Rifles and ending near St. Paul's with the Grenadier Guards; the two flank companies of the latter battalion having been detached to join the flank companies of the 2d and 3d battalions of the same regiment, which had been posted from an early hour within the railing of St. Paul's Churchyard. Each battalion successively presented arms to Prince Albert as the carriage of his Royal Highness proceeded along the line. As the funeral car passed the battalions, the soldiers presented arms, reversed arms, and then rested upon the firelocks so reversed, until the carriage of the chief mourner had passed; and thus, with all outward marks of sorrow and regret, the procession emerged, at eleven o'clock, into the view of the innumerable multitude congregated in the streets, windows, balconies, and house-tops which lie under the shadow of St. Paul's. The sounds of military music, now near, now distant—the deep and solemn tones of the great bell of St. Paul's—the booming of the distant Tower guns—gave great solemnity to the scene. The band of the Grenadier Guards marched into the cathedral yard at the western entrance. The cavalry and artillery presented an animated picture as the various squadrons successively crested the hill, and filed off on the south side of the cathedral. At ten minutes past twelve o'clock the funeral car safely reached the area of the cathedral yard, and was drawn to the temporary erection, where arrangements had been made for removing the ponderous bier into the cathedral. A delay of nearly an hour occurred, during which, the general officers who were to form part of the procession, and the clergy, who waited in double lines near the great western door, were exposed to a searching November blast. The procession, being at length marshalled by Garter King-at-Arms, entered the cathedral; and the remains of Arthur Duke of Wellington bade an eternal adieu to the light of day!

THE CATHEDRAL.

Nearly 20,000 people assembled in St. Paul's: the population of a considerable town congregated under one roof! A fact difficult to realise. The great cathedral of Protestant Europe embraced within the shadow of its mighty dome the rank, genius, learning, eloquence, wisdom, valour, and enterprise of a nation unsurpassed for arts, arms, and dominion. Its Princes, Judges, priests, senators, warriors, merchants, heralds, were here marshalled in picturesque and glittering splendour around the tomb of a hero. His severe Roman virtue and great exploits rendered him the preserver and defender of the State; and at his grave his countrymen were gathered, to catch a new spark of patriotism and new incited means to heroic self-denial in the service of their cherished country

The sublime architectural proportions of the dome were delineated as its mighty base by a line of brilliant light beneath the whispering-gallery. The rim of flame leaped along the deep, rich cornice of the nave. Seen at a midnight ceremonial, or with the daylight carefully excluded from the windows and doors of the edifice, there would be but one finer sight in the world—the exterior illumination of St. Peter's at Rome on the night of Easter Sunday. But the sun, as usually bright and clear for a November day, threw into the building a flood of light which converted the gas into a somewhat sickly yellow flame. A cold, wintry wind entered at the great western door, coursing up the nave, and chilling the bare heads of the male portion of the multitude, until the pain and inconvenience became intolerable, and they were compelled to cover their heads in the sacred edifice. These were *desagremens* against which it would not have been difficult to provide, if they could have been foreseen. But when these failures and annoyances faded from the memory, there remained an indelible recollection of one of the grandest ceremonials of modern times. Yet so crowded was the canvas with illustrious figures, so fertile in incident the scene, so magnificent the spectacle, so solemn the occasion, that, although the pencil of our artist has seldom been animated by greater enthusiasm, or guided by greater skill, much must still be left to the imagination to supply.

Entering the cathedral by the great west door, the spectator found the nave filled on both sides with tiers of seats from about a yard from the floor to the farthest recesses of the lower windows. A capacious gallery was erected over the great west door, draped with black cloth, relieved by white rosettes. The expanse under the dome exhibited a vast sweep of seats, which recalled to mind the proportions of some huge Roman amphitheatre. There was even gallery piled upon gallery, for on the north and south entrances tiers of seats projected at the cornice in a "flying gallery," and were carried far back into the windowed recesses of the north and south porticos. The seats in these galleries and the naves were filled by ladies and gentlemen in deep mourning attire; the

THE HORSE GUARDS.—MARSHALLING THE PROCESSION.

PICCADILLY—HEAD OF THE PROCESSION—THE RIFLE BRIGADE

gentlemen, in compliance with the wish of the Earl Marshal, all appearing in white neckerchiefs, which somewhat relieved the sombre effect of the funeral habiliments.

If the reader would imagine himself in the centre of the space under the dome, and would anticipate by a few minutes the appearance it presented after the arrival of the procession, he would find himself in the centre of a multitude of about 7000 persons assembled under the dome, who were placed as we are about to describe. The two Houses of Parliament worthily occupied the centre compartments. They sat opposite each other, the Lords on the south side of the dome, and the Commons on the north. The Lord Chancellor occupied a chair of state in front of their Lordships; and directly opposite was a similar massive gilt chair, hung with black, which had been provided for the Speaker of the House of Commons. Some of the Peers appeared in uniform as Lord-Lieutenants, &c.; but none of them wore their scarlet and ermined robes The members of the House of Commons, for the greater part, wore the ordinary mourning costume; and, as they mustered nearly 500 strong, their gallery presented a sombre appearance. Sir James Graham, Mr Gladstone, Mr Hume, Mr Macaulay, the Attorney and Solicitor-General, Mr. H. Drummond, and Lord J. Manners were among the members present. Lord J. Russell occupied a seat in another part of the cathedral, among the friends of the Dean of St Paul's. East of the Peers' gallery was a compartment devoted to the Military Knights of the Bath, whose uniforms of scarlet and gold stood out in bright relief between the Peers' and the Peeresses' gallery under the organ. These ladies, to the number of 400 or 500, attired in the deepest mourning, were enabled by their position to command not only a complete view of the dome, but also of the nave and western entrance. The Dowager Duchess of Cambridge and the Princess Mary occupied front seats in this gallery, to which they were conducted after witnessing the arrival of the procession outside, from the gallery under the portico of the western entrance.

On either side of the organ was placed the choir, consisting of more than 200 voices, their white surplices beautifully relieving the dark mass of mourners in the Peeresses' gallery. Below the Knights of the Bath were the distinguished Generals who bore the foreign bâtons. The bright scarlet of the Spanish costume—the dark, but gorgeous, uniforms of Russia and Prussia—and the medals and decorations which all these visitors and their military assistant officers bore, made them objects of the most flattering interest. On the north side, facing the Knights of the Bath, and on the left of the Commons, were the diplomatic body, resplendent with stars, orders, and decorations. There were seen every variety of rich costume, civil or military—sky blue, dark blue, scarlet, gold, green, and white. Each Ambassador was accompanied by an elegantly-dressed party of intelligent *attachés*—the future Talleyrands and Nesselrodes of European diplomacy. The outrage upon General Haynau is alleged as the reason why the Emperor of Austria refused to send a military representative to carry the Duke's Austrian bâton; but there, in the diplomatic gallery, was the Austrian Ambassador, Count Colloredo de Waldsee, and the officers of his embassy and consulate. And there—omen most cheering and honourable!—was Count Walewski, the French Ambassador, the diplomatic representative of the nephew of that Napoleon whom it was the mission of the great English Captain to vanquish and subdue. Be buoyant, Three per Cents! for you have no such assurance of peace and a new *entente cordiale* between France and England, as Count Walewski's presence by the grave of Wellington! The accomplished Chevalier Bunsen was also there; and the Greek Fez bowed to the representative of the Great Western Republic. The Corporation of London, in scarlet and mazarine gowns, occupied seats on the right of the House of Commons. On their right again were the representatives of the East India House and other corporations; and on the right of the corporations was the deputation from the University of Cambridge; directly opposite to whom was the deputation from Oxford, consisting of University "dons," who, in full clerical costume, accompanied the procession from the Horse-Guards. Another compartment was occupied by a large number of the late Duke's personal friends and relations. A few of the lower seats in the centre require notice. Her Majesty's Ministers sat at the base of the Peers' gallery, and the other foremost seats were occupied by the Judges and high officers of State An open space still remained in the centre of the seats thus amphitheatrically arranged; and there was placed a frame about eight feet long, by five feet broad, and about eight feet in height. Around it were placed tabourets, covered with black cloth, edged with white borders, for the principal mourners. The nave was occupied by those ladies and gentlemen who had no official position entitling them to seats under the dome. Three or four rows of the front seats along the nave were more or less completely reserved for officers of the army, whose uniforms gave great and not unwelcome relief to the mourning habits of the civilians along the nave

The occupants of seats in the nave found perpetual objects of interest in observing the naval, military, and official personages, who began to arrive soon after eight, in the costume of their rank. Hussars and Lancers, Life Guardsmen and Dragoons, entered the cathedral with the noisy accompaniment of clanking swords and jingling spurs; and Highlanders in their kilts, and Riflemen in their dark uniform, "foregathered" with Indian officers in light blue and grey. Nor were the rich dark blue and gold uniforms of the officers of the British navy the least honoured or the least attractive costumes in the pageant. The scarlet and furred gowns of Aldermen, and the mazarine robes of Common Councilmen were mixed up in picturesque vicinage with the white and red robes and gowns of the University deputations.

Two light-complexioned, fair-haired youths arrived about ten o'clock, in the uniforms of the Belgian Guides and Lancers. They were the Belgian Princes They were accompanied by the Prince of Leiningen, the Prince of Hohenlohe-Langenburg, and Prince Hermann of Hohenlohe. They had left their Royal sisters and relatives with her Majesty at St. James's Palace. These distinguished visitors of Royalty were accompanied by Colonel de Moerkerke, Lieutenant-Colonel Biddulph, and Colonel Wylde. They took their seats in the foremost places under the dome.

At half-past eleven a solemn dirge from a band at the western portico announced the arrival of the procession. The Chelsea Pensioners tottered up the nave four abreast, and took their seats under the benches in the nave. Many were very infirm, and all seemed tired with their fatiguing and exciting march, and glad to sit down. They, too, felt the biting wind from the western entrance, and covered their thin grey hairs with their handkerchiefs The men selected from every regiment in the service followed and arranged themselves on each side of the nave. A stream of rich and glittering uniforms, civil and military, now came pouring in at the west door. The Standard borne by Sir Harry Smith gave the spectators an opportunity of remarking the gallant hero of Aliwal. The Banner of Wellesley appeared in charge of Lord Saltoun, a Peninsular and Waterloo veteran. The Great Banner was worth by entrusted to Sir James Macdonnell. These banners were carried up the nave, and placed in the area under the centre of the dome. The more distinguished Generals now passed up the aisle. Lord Hardinge, Lord Gough, and Sir C. Napier occupied adjoining tab urets around the bier; and three more distinguished brothers-in-arms it would have been difficult to find, even in an assembly where all were valiant.

The Speaker, in his gold robe of office, repaired to his chair of state, in front of the House of Commons. The members simultaneously rose to mark their respect for the first Commoner of the realm, while the sensation which this event caused showed that it was not the least effective incident in the ceremonial. Her Majesty's Ministers, the Great Officers of State, and the Foreign Marshals carrying the Duke's bâtons, had gained the central area; and now, amid the gay banderols outside, the rich canopy and the crimson and gold of the coffin could just be discerned. The doors of the choir were thrown open, and the Bishop of London and the Dean of St. Paul's, followed by the Prebendaries, the minor canons, and choristers, all in white surplices, swept round the amphitheatre in two lines, divided by the bier, and, uniting in the nave, slowly proceeded towards the central door to receive the body Here, however, occurred that trying delay of nearly an hour, which was consumed in transferring the bier and coffin to the running platform, upon which the body was to be borne up the nave. At length the foreign Marshals were requested to come down to the western entrance. The heralds, with their tabards of gold lace and scarlet worn over their mourning cloaks, stood ready with spurs, helmet and crest, sword and target, surcoat, and coronet. Prince Albert, in his Field-Marshal's uniform, with the Collars and Star of the Garter and the Bath, and the Riband and Badge of the Golden Fleece—the brilliancy of his uniform being toned down by a mourning scarf and carrying his Field-Marshal's bâton, stood the centre figure amid a group of richly-costumed officers. The Body, in its sumptuous crimson *cercueil*, was flanked by the pall-bearers and the officers bearing the banderols; and, all being in readiness, the subdued tones of the organ reverberated through the edifice, and the vicar choral sang in plaintive strains "I am the resurrection and the life," amid the breathless silence of the hushed and tearful multitude, who had risen by a common impulse to their feet. As that most brilliant, yet most sad and most impressive, *cortège* slowly proceeded up the nave, the wind gently stirred the feathers of the Field-Marshal's hat as it lay upon the coffin. This little incident, it has been truly said, "produced an indescribably sorrowful effect, in giving an air of light and playful life to that where all was dead." Close to the coffin walked the present Duke of Wellington, as chief mourner, wearing a long mourning cloak, and supported by the Marquis of Tweeddale and the Marquis of Salisbury, also in mourning cloaks; the former wearing the Collar and Badge of the Order of the Thistle, and the latter the Collar and George of the Garter over his cloak. Lord Charles Wellesley and a group of mourners followed. And thus, amid the blending tones of organ and surpliced choristers, with intervening pauses which gave solemnity to the music, and rendered more impressive the reverberations of the great bell, the coffin reached the centre of the dome, and was transferred, after a short delay, to the bier upon which it was to descend into the crypt. The hat and sword were here removed from the coffin, and their place occupied by the ducal coronet and the Field-Marshal's bâton. Prince Albert, the Duke of Cambridge, the Duke of Wellington, and the other mourners, took the seats prepared for them—the eldest son of the late Duke at the head of the coffin. Prince Albert on his right with his suite, the Peninsular and Waterloo general officers on either side of the coffin, and the foreign Generals with the Marshals' bâtons at the foot. One other mourner should not be forgotten at this instant the Duchess of Wellington, from a distant gallery, beheld the touching ceremony.

Again the notes of the organ resounded beneath the dome, and the choir sang the "Dixi custodiam," and the 90th Psalm, both united to chants of the Earl of Mornington, the father of the deceased. In the latter psalm occur the pathetic and well-remembered words:—"The days of our age are threescore years and ten; and though men be so strong, that they come to fourscore years: yet is their strength then but labour and sorrow; so soon passeth it away, and we are gone." Few there were who failed to notice the appropriateness of this sad strain of the Royal Psalmist's verse. A funeral anthem, a double chant, and a dirge followed, the closing notes of which led naturally but most effectively to the "Dead March in Saul" It is difficult to describe the thrilling and profound sensation which ran round the vast audience as the coffin was now slowly lowered into the dark and silent tomb, while from "pealing organ and the piercing brass" resounded the sublime strains of Handel's music. Tearful eyes were strained in every part of the cathedral, and gallant and gentle mourners still kept they saw the coffin when it was no longer visible except to the princes and aged chiefs who were still endeavouring through blinding tears to pierce the dark chasm into which had descended that loved, honoured, venerated form.

O Melancholy, linger here awhile!
O Music, Music, breathe despondingly!

We have all stood by the grave-side and wept at the words which the choir now sweetly sang from the beautiful ritual of the Church of England:—

Man that is born of a woman hath but a short time to live, and is full of misery. He cometh up, and is cut down, like a flower; he fleeth as it were a shadow, and never continueth in one stay

In the midst of life we are in death: of whom may we seek for succour, but of Thee, O Lord, who for our sins art justly displeased?

Yet, O Lord God most holy, O Lord most mighty, O holy and most merciful Saviour, deliver us not into the bitter pains of eternal death.

Then the Dean, with distinct and solemn utterance, said:—

Forasmuch as it hath pleased Almighty God, of His great mercy, to take unto Himself the soul of our dear brother here departed, we therefore commit his body to the ground; earth to earth, ashes to ashes, dust to dust; in sure and certain hope of the resurrection to eternal life, through our Lord Jesus Christ; who shall change our vile body, that it may be like unto His glorious body, according to the mighty working, whereby He is able to subdue all things to Himself.

Death had entered upon his possession. The glittering stainless coffin was tarnished by the earth thrown upon it, in conformity with the Rubric, which directs that "earth shall be thrown upon the body by some standing by"

The Dean then said, "Lord have mercy upon us." To which the congregation fervently responded, "Christ have mercy upon us!" The Dean rejoining "Lord have mercy upon us."

The Lord's Prayer followed; and the congregation having been requested to join audibly in the responses, every man and woman in the vast edifice, animated by the strong religious fervour produced by the solemnity of the occasion, repeated after the Dean:—

Our Father, which art in heaven, hallowed be Thy name. Thy kingdom come. Thy will be done on earth, as it is in heaven. Give us this day our daily bread. And forgive us our trespasses, as we forgive them that trespass against us. And lead us not into temptation; but deliver us from evil. Amen

Since England was a nation no sublimer utterance of prayer has ever pierced the empyrean. Men were curiously moved by the organ-like depth and reverberation of the universal voice. Strangers looked as if they could shake hands with each other, so deeply stirred were that great multitude by the enthusiasm of a common patriotism and a common religion.

The funeral service ended, Garter King-at-Arms came forward, and proclaimed, as follows, the style and various titles of the deceased:—

Thus it has pleased Almighty God to take out of this transitory life unto His Divine Mercy, the late most high, mighty, and most noble Prince,
Arthur, Duke and Marquis of Wellington,
Marquis Douro, Earl of Wellington,
Viscount Wellington, and Baron Douro.
Knight of the Most Noble Order of the Garter.
Knight Grand Cross of
The Most Honourable Order of the Bath.
One of Her Majesty's Most Hon. Privy Council, and
Field-Marshal and Commander-in-Chief of Her Majesty's Forces. Also,
Field Marshal of the Austrian Army,
Field-Marshal of the Hanoverian Army,
Field-Marshal of the Army of the Netherlands,
Marshal-General of the Portuguese Army,
Field-Marshal of the Prussian Army,
Field-Marshal of the Russian Army, and
Captain-General of the Spanish Army
Prince of Waterloo, of the Kingdom of the Netherlands,
Duke of Ciudad Rodrigo, and Grandee of Spain of the First Class,
Duke of Victoria, Marquis of Torres Vedras, and Count of Vimiero in Portugal.
Knight Grand Cross of the Imperial Military Order of Maria Teresa of Austria.
Knight Grand Cross of the Royal Military Order of Maximilian Joseph of Bavaria.
Knight of the Order of the Elephant of Denmark.
Knight of the Order of St. Esprit of France.
Knight Grand Cross of the Royal Hanoverian Guelphic Order.
Knight Grand Cross of the Military Order of William of the Netherlands.
Knight Grand Cross of the Royal Portuguese Military Order of the Tower and Sword.
Knight Grand Cross of the Orders of the Black Eagle and of the Red Eagle of Prussia.
Knight of the Imperial Orders of St. Andrew, St. Alexander Nowski, and St. George of Russia.
Knight Grand Cross of the Supreme Order of the Annunciation of Sardinia.
Knight of the Royal Order of the Rue Crown of Saxony.
Knight of the Most Illustrious Order of the Golden Fleece, and the Military Orders of St. Ferdinand and St. Hermenegilde of Spain.
Knight Grand Cross of the Royal and Military Order of the Sword of Sweden.
Knight of the Order of St. Januarius, and of the Military Order of St. Ferdinand and of Merit of the Two Sicilies.
Knight Grand Cross of the Order of Military Merit of Wurtemberg.
Knight or the Order of the Golden Lion of Hesse Cassel, and Knight Grand Cross of the Orders of Fidelity and of the Lion of Baden.

The enumeration of these titles occupied several minutes.

Farewell those honours, and farewell with them
The hope of such human barrier!

What toil, what heroism, what self-denial to reach so dizzy a summit of worldly honour, and to accomplish such vast aims of patriotism! Guizot has eloquently and feelingly said of Washington:—"It matters little in de-ign so lofty what labour there have been. *There is no sweet which is not dried by such a wreath on the forehead where God places it.*"

The Comptroller of the Duke's household then breaking his staff of office gave the pieces to Garter, by whom they were deposited in the grave.

The following hymn from Mendelssohn's "St. Paul" was now sung:—

Sleepers, wake! a voice is calling.
It is the watchman on the walls,
Thou city of Jerusalem!
For lo! the bridegroom comes.
Arise, and take your lamps!
Hallelujah!
Awake! His kingdom is at hand.
Go forth to meet your Lord."

The whole of the ceremony was then concluded by the Bishop of London pronouncing the benediction:—

The peace of God, which passeth all understanding, keep your hearts and minds in the knowledge and love of God, and of his son Jesus Christ our Lord: and the blessing of God Almighty, the Father, the Son, and the Holy Ghost, be amongst you, and remain with you always. Amen.

And, thus, beneath the colossal dome of St. Paul's, in the grandest mausoleum in Christendom, was buried ARTHUR DUKE OF WELLINGTON—

Who so sepulchred, in such pomp doth lie,
That Kings for such a tomb would wish to die.

THE CITY AUTHORITIES IN ST. PAUL'S. In the centre area of the Cathedral were—the Lord Mayor, the Aldermen, the Recorder, the Sheriffs, the deputation of the Common Council, and officers of the Corporation. The Lady Mayoress was seated in the Peeresses' gallery. In the north transept lower gallery were the ladies of the Aldermen, Recorder, Sheriffs, Common Council, and officers of the Corporation, together with the members of the Court of Common Council not of the deputation.

OFFICIAL PROGRAMME OF THE PROCESSION.

INFANTRY.—8 x Battalions.
Band of the 2d Battalion Rifle Brigade.
2d Battalion Rifle Brigade.
Major-General Fane { Band of the 1st Battalion Royal Marines
1st Battalion Royal Marines.
Band of her Majesty's 33d Regiment.

Carriage of H.R.H. the Duchess of Gloucester.
Carriage of H.R.H. the Duchess of Kent.
Carriage of H.R.H. the Duke of Cambridge.
Troops to Close the Procession.

THE DUKE'S HORSE, IN THE FUNERAL PROCESSION.

The Duke was a bold rider, but of late years necessarily selected steady riding hacks. The horse led in the procession was one which Paget had bought about four years ago from Mr. Nathan, an officer in the Scots Fusilier Guards. It was a mare, and remarkably steady, never shying, even under the most awkward circumstances. The Duke was accustomed to grasp his horse's mane very firmly, and pull himself into the saddle by this means. He would never allow any person to assist him, and, within a few days of his death, the station-master at Deal nearly incurred his serious displeasure by offering to hold the animal's head while he mounted. The Duke's groom, John Scott, who only just time to prevent the expression of his grace's displeasure

THE FUNERAL PROCESSION PASS

APSLEY HOUSE.—THE ARTILLERY.

PORTRAITS, STATUES, AND MEMORIALS OF THE DUKE OF WELLINGTON.

(THIRD NOTICE.)

PURSUING our researches amongst the art-memorials of the Great Duke, those by Sir George Hayter first claim notice; who, besides the miniature engraved in our last, and which was strictly a private commission, has painted the Duke under a great variety of circumstances, all of more or less public interest.

In 1820, Sir George painted a large equestrian portrait of his Grace, as on a battle-field, standing by his horse Copenhagen, in the plain blue dress and white cloak which he wore in Spain. The late Lord George William Russell, one of his aides-de-camp, for whom the picture was painted, is represented galloping up to receive orders; troops, and the evolutions of a siege, are indicated in the distance. This picture is at Woburn Abbey. On request, the artist painted several repetitions of the head of the Duke.

In 1821 was painted the miniature already mentioned; and in 1822, the Duke sat to Sir George Hayter for his portrait introduced into the great picture of the House of Lords during the trial of Queen Caroline, which was painted for the late Lord Dover, and has been engraved by Bromley.

In 1833, the artist had the honour of remaining on a visit with the Duke at Walmer Castle, to paint a small portrait to be introduced into the great picture of Moving the Address to the Crown in the first Reform Parliament of 1833. The Duke afterwards gave a sitting for the finishing of the portrait in the picture itself. This interesting work presenting an accurate representation of the old House of Commons, and portraits of nearly 400 statesmen of the day—still remains in the studio of the artist.

In the same year the Duke sat to Sir George for his portrait, introduced into the picture of "the Coronation." This picture is in the possession of Messrs. Greaves, who published the engraving of it.

In 1842 Sir G. Hayter made a study of the Duke, when at Stratfieldsaye, for his portrait in the picture of "Her Majesty's Marriage." Of the study two repetitions were made by the artist, the original being in the possession of Prince Albert. The picture itself is the property of the Queen.

In 1845 the Duke sat again to Sir G. Hayter for his portrait in the picture of "The Christening of the Prince of Wales, in St. George's Chapel, Windsor," which is now being engraved.

Finally, in the present year, the Duke sat for his portrait to the same artist, who has thus, for thirty-two years, at various intervals, had opportunities of studying his Grace's features; and the circumstances under which the last sitting was obtained are of considerable interest. The picture is no other than one representing the veteran hero at Waterloo contemplating the Effigy and Relics of his old foe, Napoleon, at the Tussaud Gallery. At first the notion of associating the greatest living man of his age with a portion of wax-work &c., may savour of somewhat questionable taste; but when we recollect that it was the only mode by which the two generals, historically connected as they were, could be brought together upon canvas, and when we know that the incident so embodied was one of actual occurrence, the force of any prejudice upon the point is weakened: to which we have to add that the masterly manner in which the story has been treated by the artist converts all doubtings into confidence and satisfaction. The result being a real triumph over great and undoubted difficulties. To explain the subject of the picture, it should be stated that the Duke of Wellington, who always treasured deep feelings of interest and admiration for the conquered of Waterloo, more than once visited Madame Tussaud's, where some of the most remarkable relics of the late Emperor are exhibited, in connexion with a wax effigy of him as he appeared on his death-bed at St. Helena. On one of the occasions of the Duke's coming to view this great "School for Ambition" (if we might so describe it), M. Tussaud happened to be the only other person in the room, and immediately stooped down to draw aside the curtains of the camp iron bedstead upon which the effigy lay. Upon looking up, he observed that in the meantime the Duke had taken off his hat, and was standing contemplating with feelings of mixed emotion the strange and suggestive scene before him. There lay the mere perishable

LITERATURE.

ODE ON THE DEATH OF THE DUKE OF WELLINGTON. By ALFRED TENNYSON, Poet Laureate. MOXON.

We are not satisfied with this laureate ode. The laureate's ode, it must be confessed, is not the most hopeful of compositions—has generally borne marks of labour and incompleteness—for the most part, has been dry, hard, cold, formal—a forced product, in short, pleasing neither to the producer nor to the consumer; but still it has dealt with august themes, and aimed at a somewhat ambitious style, rather to be blamed for stiffness than carelessness Of these themes, the ode before us has the most august that ever fell to the chance of poet laureate; one to have wakened emulation in the most humble of minstrels. But Mr. Tennyson seems to have thought otherwise, and regarded the occasion as happily intended to illustrate how readily he could sport with a great subject, and reduce its mightiness to the singsong of indolent rhythm and familiar rhyme; spinning verse after verse of mere ballad significance, and with none of the majesty of sound that betokens a lofty argument Most inappropriate, alas! is the mode of treatment to the topic; for the "Great Duke," whom he commemorates was the most unaffected of men; and this self-same method is of all the methods of verse-writing the most affected. The attempt at it is made in the spirit of singularity. Instead of trusting to the recognised metres of the language and the simplicity of the matter, the poet elects a fantastical form, a free and easy manner, promising indeed variety of tone and measure, but achieving monotony—setting the composer at large to combine every possible harmony, and ending in producing no music at all. The shepherd's sea-mel-pipe has more of melody than has the harp or organ of our courtly bard.

With what regret we are compelled to pass such a verdict as this may be naturally imagined. In admiration of the Great Duke's character and conduct, in estimation of the importance of his career, and in reverence for his funeral ceremonials, we yield to none. In respect, moreover, for Mr. Tennyson, as a poet, we are exceeded by few. We, therefore, sincerely desired that honour should be done both to the dead and to the living, both to the subject of song and to the singer: and, as sincere was our disappointment in the national tribute paid to a mighty memory by the State-appointed minstrel, not only so inadequate but so inappropriate. While the sentiments scarcely ever reach to the elevation of the theme, the injudicious style of expression lowers the best of them to the level of a contemptuous familiarity, offensive to well-educated taste.

It is evident that the poem begins without plan or purpose. The singer, of course, feels that it should be *something apropos* to the great Duke's funeral, and the choice of the topic so sees it at once, dashing his hand across the chords of his shell, indifferent to the notes that may be produced The hand is a well-practised one, chance is in its favour, and such a theme will, of course, take care of itself; or, rather what mastery over it will be displayed, when it can be announced and accompanied with so little preparation. That, therefore, it begins:—

> Let us bury the Great Duke
> With an Empire's lamentation,
> Let us bury the Great Duke
> To the noise of the mourning of a mighty nation,
> When laurel-garland'd leaders fail,
> And warriors carry the warrior's pall,
> And sorrow darkens hamlet and hall.

This, and much more, is what one of Shakspeare's fools calls "the false gallop of verse"—most full and most facile in its rhymes; *e.g.*:—

> Load out the pageant: sad and slow,
> As fits an universal woe,
> Let the long, long procession go,
> And let the sorrowing crowd about it grow,
> And let the mournful martial music blow;
> The last great Englishman is low.

The description of the Duke is better; but still poor to what it might and ought to have been:—

> Mourn for the man of long-enduring blood,
> The statesman-warrior, moderate, resolute,
> Who'e in himself, a common good.
> Mourn for the man of amplest influence,
> Yet free'st from ambitious crime,
> Our greatest yet with least pretence,
> Great in council and great in war,
> Foremost captain of his time,
> Rich in saving common-sense,
> And, as the greatest only are,
> In his simplicity sublime.

Conceive how the Grecian Pindar would have treated such a lyrical hero: how he would have described him, form and soul, until the stanza with which he was identified had "breathed" with "thoughts" and "burned" with "words." Mr. Tennyson has contented himself with rhetorical common-places, technically expressed, not in the diction of poetry, but of ethics. But this is sublime, in point of language, to much that follows. For instance, this:—

> All is over and done:
> Render thanks to the Giver,
> England, for thy son.
> Let the bell be toll'd.
> *Render thanks* to the Giver,
> And *render him* to the mould.

Could anything be more poor and mean than the point attempted in the words we have italicised? Is it pun, or pathos? In the same strain of what looks very much like doggerel, the lyrist still repeats his admonitions as to the tolling of the bell, until he comes to a few lines where the dignity of the theme is allowed somewhat to vindicate itself:—

> Let the bell be toll'd;
> And the sound of the sorrowing anthem roll'd
> Thro' the dim dome of the golden cross,
> And the vol eying cannon t under his loss:
> He knew their voices of old.

But this touch is followed by some common-places in more verses of the "false gallop" school, with nursery rhymes appended; such as "shame, claim, name, blame," and "fame, name,"—like endings, as familiar to the ear as "breeze" and "trees."

The best passage in the poem follows. The sublime text in Isaiah, from which it is imitated, must be ever fresh in the memory of every poetical reader.

> Who is he that cometh, like an honour'd guest,
> With banner and with music, with soldier and with priest,
> With a nation weeping, and breaking on my rest?
> Mighty seaman, this is he
> Was great by land as thou by sea,
> Thine island loves the well, thou famous man,
> The greatest sailor since our world began.
>
> Now, to the roll of muffled drums,
> To the tread of the mighty soldier comes;
> For this is he
> Was great by land as thou by sea;
> His martial wisdom kept us free,
> O warrior-seaman, this is he,
> This is England's greatest son,
> Worthy of our congenial rites,
> And worthy to be laid by thee;
> He that gain'd a hundred fights,
> And never lost an English gun,
> He that in his earlier day
> Saw not the myriads of Assaye crouch
> Clash'd with his fiery few and won:
> And underneath another sun
> Maz'e the soldier, led him on,
> An ever great and greater crew,
> Beating from the wasted vines
> All the Marshal's banded swarms
> Back to France with countless blows;
> Till their hosts of castles flew
> Past the Pyrenean pines,
> Follow'd up in valley and glen
> With shouts of battle, clamour of men,
> Roll of cannon and clash of arms,
> And England pour'd on her foes.
> Such a war had such a close.
> He withdrew to rest in peace,
> Again the ravenous eagle rose

> In anger, wheel'd on Europe-shadowing wings,
> And barking for the thrones of Kings,
> Till one that sought but Duty's iron crown
> On that lond Sabbath shook the spoiler down;
> A day of onsets of despair!
> Dash'd on every rocky square
> Their surging charges foam'd themselves away;
> Last, the Prussian trumpet blew;
> Thro' the long-tormented air
> Heaven flash'd a sudden jubilant ray,
> And down we swept and charged and overthrew.
>
> So great a soldier taught us there,
> What long-enduring hearts could do
> In that world's earthquake, Waterloo!
> Mighty seaman, tender and true,
> And pure as he from taint of craven guile,
> O saviour of the silver-coasted isle,
> O shaker of the Baltic and the Nile,
> If aught of things that here befall
> Touch a spirit among things divine,
> If love of country move there at all,
> Be glad because his bones are laid by thine!
> And thro' the centuries let a people's voice
> In full acclaim,
> A people's voice,
> The proof and echo of all human fame,
> A people's voice, when they rejoice
> At civic revel and pomp and game,
> Attest their great commander's claim,
> With honour, honour, honour, honour to him,
> Eternal honour to his name.

The following appeal to our statesmen, though prosaically worded, is also in good taste, and highly judicious:—

> O remember him who led your hosts;
> Respect his sacred warning; guard your coasts:
> His voice is silent in your council-hall
> For ever; and whatever t-mpests lower,
> For ever silent; even if they broke
> In thunder, shall not yet remember all
> His spoke among you, and the Man who spoke;
> Who ever told the truth to serve the hour,
>
> The poet, then, rising with his theme, reminds his audience that "the path of duty is the way to glory," enforcing the moral in the following eloquent lines, rich in allusion to Scripture types:—
>
> He, that ever followed her commands,
> On with toil of heart and knees and hands,
> Thro' the long gorge to the far light has won
> His path upward, and prevail'd,
>
> Exhausted by the effort, the poet then again betakes himself to moral common-places and ballad metres, which terminate the strain in other than a sublime manner, leaving upon the mind no impression of music, no feeling of grandeur. Here and there, however, in the midst of all this poverty and humility of thought and style, there is an occasional beauty of phrase which arrests attention. Some of these minute graces are observable in the following passage:—

> O peace, it is a day of pain
> For one, upon whose hand and heart and brain
> Once the weight and fate of Europe hung.
> More than in of man's degree
> Must be with us, watching here
> At this our great solemnity.
>
> Whom we see not we revere,
> We revere, and we refrain
> From the call of battles loud and vain,
> And brawling memories all too free
> For such a wise humility
> As befits a solemn fane:
> For solemn, too, this day are we.

The reader who can be pleased with these small sprinklings of "poetic dew" on the barren stems and branches of a wintry scene, mocking the blossoms and leaves of a more favourable season, will find many such in unexpected places, as his eye wanders over the lines of various length that compose the present lyric. Many of those have the true Tennysonian glitter; but they are cold, and merely ornamental, not the fruit of the warm vital sap within. The whole, in fact, is clear, await Mr. Tennyson's better mood; must become, perhaps, idealized by distance of time, and then we doubt not we shall have a fine poem from his pen, the produce of a leisure consecrated to the high argument, not hurried by the pressure of circumstances, but a free offering from the soul of the poet.

J. A. H.

MONODY ON THE DEATH OF THE DUKE OF WELLINGTON. By J. WESTLAND MARSTON, Esq.

We performed the duty, last week, of stating that this Monody had been delivered at the Princess's Theatre, by Mrs. Charles Kean, on Thursday, as appropriate to the evening of the Great Duke's funeral. The perusal next morning, in the *Morning Post*, of the production itself confirmed us in our opinion of its poetic merit: but we could not repress our surprise that the poem was compiled with generalities in praise of the Duke's abstract virtues and devotion to duty, but never once condescended to particularise his acts, whether in the senate or the field. Still, our suspicions were not aroused; we thought it "strange," but were willing to accept it as "true." The poet, we thought, had chosen to take an ethical view of the subject; and we were well disposed to submit. But we were not long left unstarled from our propriety. A glance at a weekly contemporary gave the matter a very different complexion. Lo! another version of the poem appeared in the columns of the *Sunday Times*, without any remarks; but, with the common-sense abundant allusions both to the Duke's victories and his political acts. This, said we, is as it should be; but why were these passages not pronounced on the stage? why were they omitted in the copy published by the *Morning Post*? Had they been prohibited by the Lord Chamberlain, or any other authority? And, if so, what could have been the object of the prohibition? We then recollected a singular omission on the play bills—announcing the delivery of "a Monody," but not stating on whom. For some reason of false delicacy, the public were left to guess that the poem was in honour of the Great Duke; his name being suppressed. We therefore determined to collate the two versions of the same Monody, to ascertain whether we could, from the internal evidence, discover the motives for this extraordinary proceeding.

The Monody thus commences:—

> A pause; a hush! ye, shapes, awhile retire,
> Thou draw your being from the poet's fire.
> Stand mute, ye heroes, quickened by his will,
> And bodied by the actor's art! All still,
> Kneel with veiled brows, ye forms of sembled woe!
> Not now for *fabled* grief a tear must flow,
> Not now may *fabled* greatness thrill the heart;
> Reality is here! Let *dreams* depart.
> Yes, to each thought, the life of Hero achieved
> What sons has scarce recorded or conceived,
> Is present now: he, on whose single mind
> Heaven stoked the ire of Europe combined;
> Whom, like the law that guides the planet's track,
> Our orb of fame, pursued through storm and rack,
> Rose in the sight of nations, in whose sky
> There flashed alone one meteor prodigy,—
> Rose with calm march, enkindling shore on shore,
> And peaks that bore him! pride's best claim is read;
> Rose to its zenith; when that course was run,
> 'Tis a world was day, and Britain was the sun.
> Our Britain bore him! pride's best claim is read;
> Our Britain holds him! sorrow's worst is said.
> What words may speak that sorrow? what regret
> Measure the hero greatness and our debt?
> For not to him we give the mere acclaim
> That greets the conqueror: his was higher fame.
> The sword that won our agues was to the fight,
> Ne'er drawn in vain—*was ever drawn for right.*

Then occurs the omitted passage, relative to the Duke's victories:—

> Whether with patient foot, on India's shore,
> He tracked the winding "Tiger of Mysore,"
> Or at Assaye—the foe piled rank on rank—
> Breasted a sea of fire, and on its bank
> Planted our banner; or, when Europe cast
> Lay black 'neath hostile thunder, looked and crossed;
> Or built our envy on the en renched height
> Of Torres Vedras, there to sweep in might
> Upon usurping va our; or, last, threw
> His sword into the fate of Waterloo,
> Poised up that scale where realm on realm was hurled,
> And avenged the wronged balance of the world.

Some interpretation of this singular omission may be found, perhaps, in the Lord Chamberlain's crusade against the forthcoming pantomimes, in which, it is currently reported, all references to books alluding to our relation with foreign powers, and particularly in regard to Louis Napoleon, have been mercs essly prohibited. The same spirit seems to have been in operation here; and, in a monody expressly devoted to the memory of the Duke of Wellington, has obliterated the story of his military career. We repeat, we care not by whom the omission has been directed, even if under certain influence, by the author himself; all we look at is the implied motive. What is it come to this, that Englishmen, in their public places, shall fear to hear even mention of battles that our Wellington feared not to win? Are the authorities that sway in all things—the powers that be in England—overcome with such dread of that "great self-seeker, trampling on the right," in Paris—that Englishmen must "bate their breath" and "speak in tones of whispered humbleness"—forbearing to specify the victories of the hero of Waterloo, because the Corsican avenger has enthroned himself in France? Forbid it, pride! forbid it shame! forbid it, old English courage and national independence! forbid it, British freedom, honesty, and conscience! Mr. Marston has been decidedly justified in putting forth that second version of his poem. It is, supposing the passages to be restorations, a complete vindication of himself; but whom else does it implicate?

We proceed with the poem:—

> *Freedom* and *order* were his ends; his star
> Was *duty*, and blest peace the fruit of war!
> Ay, peace, three-best, where peace with conscience joins,
> Where liberty with stable rule combines."

Then follows another significant omission—

> Wh re Order smiles on Freedom from a throne,
> Which to obey—*as now*—and love are one,
> Where hunted game shrill unlistened, nor keep time
> In their free instinct to the torrid chime
> Slaves ring for tyrants—where the mind and soul
> May grow, and swe l rel ion crown the whole.

This contrast between the constitution under which we live, and the absolute forms imposed by foreign despotisms, was likewise expunged, by this Censor before publication of stage literature. The Master of the Elyeés seems, in this instance, also to have inspired a wholesome dread in the critic and reviser of the unspoken monody. But to proceed:

> Such was the peace he won, such hallowed rest
> For England—O, be this his long bequest!
> Bequest? He gives no more. We are bereave.
> Oh, word that almost mocks the wealth it bears.
> When comes his like? Twin column of the State,
> In fight Achilles, Nestor in debate?
> Whose mind was virtue's polar, whom no success
> Might dazzle, no adversity depress,
> No bribe allure, no ambition betray,
> No labour tire, when duty showed the way,
> No danger daunt and no renown e ate;
> His fate soared high, his soul coasoared his fate.
> A youth as fresh as his first laurels were
> He gave his country; and his silver hair
> Honoured the brows of service, brows that caught,
> Thro' near an age no shade of selfish thought.
> The earliest beam that on his path way crossed,
> Behold him where night found him—ar nus Dover.
> Crowd to his bier! Kings, mourn the mighty chief!
> Ye hold your empires as his valour's fief.
> Ye warriors, mourn him! whose bright sword round complete
> Knew every turn of war—except defeat.
> Mourn, statesmen! honesty was all his art,
> His mind's clear vision was his upright heart.

And now, again, occurs a brief passage, which the Censor prior to delivery could not permit to be spoken, consisting of two lines, only these:—

> Of purpose firm, and yet his will could bend
> To those his arm was foremost to defend.

The Duke's concession to popular opinion was, it appears, an incident in his life, not to be recorded in a monody to his memory! All that breathed in the production of patriotism, of liberty, of reform—whether in the church or in the market—was to be carefully expunged. The poet had prepared his oracle; but it was to be falsified by the Pythoness who had to pronounce it!

But we have done with this part of our argument. From this point the poem was permitted to proceed almost unaltered, or, rather, unmutilated.

> Mourn, bard and painter! Fancy's noblest birth
> Is best beloved when greatness treads the earth.
> Our Shakspere's self, who peopled every sphere
> Seeking a hero, had but copied here.
> Mourn him, ye sons of trade! for, by that peace
> He gave your harbours fill, your stores incr ase.
> Mourn him, ye poor! in serrow to your estate
> His bounty spake—the co trast to his fame.
> High into day the palms of his renown
> Aspired; but, 'neath their shade deeds concealed flowed down
> His rills of pity. Mourn! Who mourns him not?
> A hope undreamed. A memory unforgot
> Mourn'd but living! Patient though unseen!
> For *thee* Time's recor' changes! *He has been*
> Is wrot on myriad tombs: *He is* on thine!
> Death but promotes these, all that could decline
> Of thy most honoured being was—its dust:
> *He never thee who holds his life a trust!*
> Hid from thy sight, dear to thy every se se,
> The hero-patriot rules in *influence.*
> A people free, united, just, and brave,
> Will kneel before the altar of his grave;
> And vow that, while the seas shall sweep our strand,
> No foe shall tread, no wrong pollute, the land
> Whose boast shall be, next to its latest sun,
> It nursed the fame, it holds the tomb, of WELLINGTON.

Such is the Monody—a poem of considerable beauty, but mutilated and robbed of its completeness prior to its being pronounced—and restored to its completeness by the act of the poet, on its republication. Had the passages so singularly omitted been innocuous in the tone, *ad captandum* in their expression, and obviously seditious in their motive, the proceeding would have been intelligible. But being such as they are, their exclusion is utterly unaccountable. Are we degenerate, that these things can be suffered

> To overcome us, like a summer cloud,
> Without our special wonder?

One thing is clear, that the anomaly of a censorship on stage literature previous to publication is an evil that ought to be speedily abolished, if only to spare the officials the inconvenience of being suspected, as in this instance, of unwarrantable interference with sentiments in which the honour and gratitude of the country are in question.

WELLINGTON. A HISTORICAL SKETCH. By CHARLES PHILLIPS. This tribute to the fame of the Great Duke has been reprinted from the fourth edition of the author's "Curran and his Contemporaries" (one of whom was the Duke; for he was an associate of Curran in the Irish House of Commons, in 1798).

Mr. Phillips inclines to the opinion, that the Duke was born at Merrion-street; "fortified by the baptismal register, and by the very best private authority." The Sketch is, from first to last, a brilliant piece of writing, bristling with eloquence at every point; the author justifying any phrase of his eulogy by the quotation of established authorities, in foot-notes. Here is one of the most eloquent passages:—

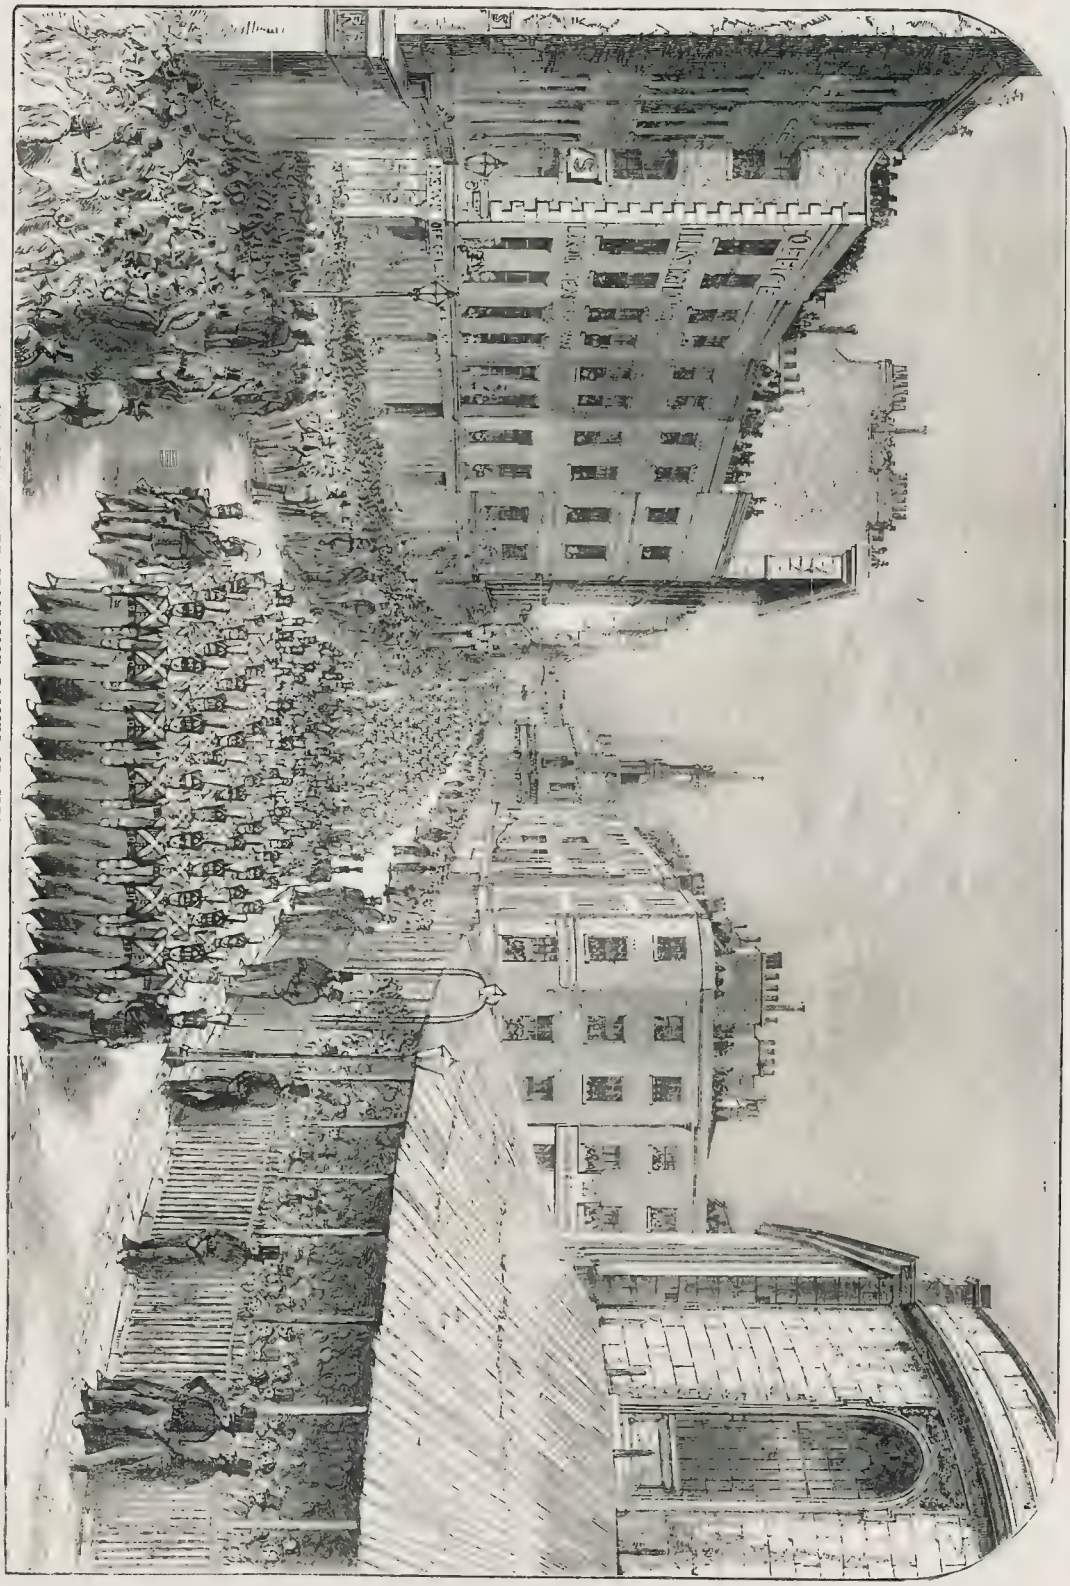
Amid the mingled scenes of Moorish romance and Spanish chivalry, every rock awoke some noble recollection—"visions of glory tired the arch ng sight." The mighty spirit of the Cid himself seemed to arise, in resp nse to a kindred hero-sm. Nor were the hosts ranks unworthy their antagonist. No barbaric horde, an easy prey to discipline—no conscript levy, to whom war was novel; but veterans, inured to danger, familiar with victory, and ignorant of fear. And the chiefs who led these—honour to their memories!—honour to the brave, although they were our enemies!—well were such leaders worthy of such followers! No ancestral shield or heraldic artifice made pedigree supply the place of merit. Nature's own nobility, their cradle was the ranks, their achievements their only title-deeds to distinction; hence, indeed, who, with their own bright swords, carved their armorial bearings; veterans of the bivouac, the battle, and the siege—now crowned beneath the sun of Egypt, now nerved amid the Alpine snows—their names familiar as the fields on which they fought, and their exotic garlands culled from the varieties of the climes in which they conquered. No wonder that their eagle had soared—from Rome to Moscow—over every capital in Europe—over all save London. No great marvel that prostrate dynasties indicate at its course, and rising kingdoms marked its resting-place! But, before Wellington, the standard and its bearer drooped together. The "*Invincibles*" were vanquished One by one, marshal after marshal, fell on the field; until, at last, his crown shivered, his throne in fragments, and his mighty empire a tradition, their glorious master—even the great Napoleon—saw his conqueror.

Nor was it always an individual leader against whom he had to combat. There were occasions on which he stood, and stood alone, against the concentrated energies of France. In one single month, and in one single province, Marc d'Estramadure, six of their ablest generals, Soult, Ney, Mortier, Kellerman, Victor, and Sebastiani, were in the field against him. Another period, though separated, there were in force in the Peninsula, Mortier at Leon, Soult at Zamora, Kellerman at Valladolid, Suchet at Zaragoza, and St. Cyr at the blockade of Gerona. In numerical force, too, the disparity was fearful. Napoleon had at one time available in Spain very nearly two hundred thousand troops. The terrific fight of Talavera—where each army lost a fourth part of its complement—we were by two to one outnumbered. At Fuentes d'Onore there were two to one of infantry, and five to one of cavalry opposed to us. Fearful disparity! But difficulties seemed no longer difficulties—obstacles appeared, as if merely for the purpose of being surmounted. All paled before the star of Wellington. From the first rifle-shot at the village of Obidos, to the last gun which boomed at Toulouse, over an empire's grave—from the day on which he resigned his seat, in Dublin, to that on which—having received twelve votes (the thanks of Parliament) he took his seat among the Peers of England, Baron, Viscount, Earl, Marquis, Duke (honour's fountain being quite exhausted), in right of all, at once, his path was a place of continued ovation.

With these emphatic words the Sketch appropriately closes:—

Regarding the foe he had to combat, the difficulties he had to contend with, and the means at his disposal, Wellington, as a general, never had an equal. No; neither in modern times, nor in remote antiquity. I do mean to express my full conviction that, could the heroes of the past again appear once more amongst us, answering their summons from the roll-call of fame, they would, as the world's writers of our day have done, recognise him as their head, and serve beneath his banner. Yes, we have the solid him, and with the concurrence of his choicest spirits, the chosen of the earth. Marshals and kings and emperors have followed him, the elected leader of their veteran hosts, and never followed him, except to victory; victories, be it remembered, ever welded humanity need not mourn, nor honour blush, for they were unborn of ambition and nourished by rapacity. Through war's dire atmosphere they shine aloof, in constellated grandeur—all radiant with its glory, but divested of its guilt, through their redeeming motive—a world's emancipation. In Wellington's behalf, therefore, we betray no arrogance. We but vindicate the claim which time has accorded, and which has been more than justified by results. We only anticipate what history will record, and what is already has comm-nced recording. We but feebly follow the example of our days, which, with impatient grasp, has located posterity, and unveiled to him, before death, his dawning immortality. Almost canonized in life, he broat s amid his relics. He wa-k abroad, impeded by his monuments. Our streets and squares and bridges, as he passes, speak to him of the name which England's children's children will learn by heart Columns and statues and triumphal arches aw-ke the past and typify the future. Through her Avons and Alpines, the anointed of the shrine, the sword cross itself has spoken. Wellington has heard the deathless words, HERRAFTER is to hear, and which "unborn ages" will accept and venerate.

TRAFALGAR-SQUARE.—CHELSEA PENSIONERS JOINING THE PROCESSION.



THE STRAND—THE PROCESSION PASSING ST. CLEMENT'S—DETACHMENTS OF REGIMENTS

THE DUKE OF WELLINGTON AS COMPANION-IN-ARMS.

It has often been said of the Duke of Wellington that he was bound up in a self-est sified sense of his own glory, and was regarded against him that he was of a cold, selfish, and haughty temperament, and could not appreciate the merits of his younger contemporaries. Such imputations as these are only deserving of notice because they serve as a reason for bringing into light the real character of the man whose reputation they affect, and for adding tributes to his character without ado ation.

In looking through the despatches and speeches of the Duke, we find many instances of spontaneous alacrity in testifying to the merits of companions-in-arms, in doing justice to reputations which, from some cause, were temporarily under a cloud; of a manly resolve to stand between public opinion and the military estimate of the conduct it presumed to judged, of frank and unreserved communication on the great events of the hour. A few of these we will string together, as reminding the countrymen of the Duke of those qualities of the soldier and the gentleman which got paled in the splendour of his exploits, or forgetten in the civil glories of his later social career.

A Portuguese nobleman, of high family, had objected to have quartered on him a British officer, who was married, with children. The Duke took the trouble to write to him a long explanatory despatch, in the course of which he says:—"It is not very agreeable to anybody to have strangers quartered in his house; nor is it very agreeable to us strangers, who have good houses in our own country, to be obliged to seek for quarters here. We are not here for our pleasure; the situation of your country renders it necessary; and you, a man of family and fortune, who have much to lose, should not be the first to complain of the inconvenience of our presence in the country. I do everything in my power to alleviate the inconvenience which all must suffer. We pay extravagant prices with unparalleled punctuality for everything we receive; and I make it a rule to inquire into and redress every injury that is really done by the troops under my command, as I shall that to which I have above referred, of which you complain, in the conduct of ——— tow rds your servant."

Such resolves as these were handed from hand to hand, and produced their effect on others, as Wellington well knew they would.

If he could thus reprove a puntilamious Portuguese, he could not the less do justice to the Portuguese troops, which he described as being, next to the British, the best in the Peninsula. Nor was he slow in doing justice to the few heroic men the Peninsula produced at that period; witness his character of the Marquess de Romana. "In him," he said, "the Spanish army have lost their brightest ornament, his country their most upright patriot, and the world the most strenuous and zealous defender of the cause in which we are engaged; and I shall always acknowledge with gratitude the assistance which I received from him, as well by his operations as by his counsel, since he had been joined with this army." Writing home of the battle of Albuera, he thus expresses himself:—"You will have heard of the Marshal's (Beresford) action on the 16th. The fighting was desperate, and the loss of the British has been very severe; but, adverting to the nature of the contest, and the manner in which they held their ground against all the efforts the whole French army could make against them, notwithstanding all the losses which they had sustained, I think this action one of the most glorious and honourable to the character of the troops, of any that has been fought during the war." In the true spirit of a soldier was his celebrated letter to Damowirez, descriptive of the battle of Waterloo, in which he says:—"Notre Bataille du 18 a été une de géans, et notre succès a été complet, comme vous voyez. Que Dieu me fasse assez pour que je n'en a e pas, parceque je suis dé o é de la perte de mes anciens amis et camarades. Mon voisin et collab rateur (Blücher) est en bonne santé, quo que un peu souffrant d'une chu e qu'il a faite d'un cheval blessé sous lui dans la bataille du 16." Equally also the well-known letter to Marshal Beresford in which he describes the battle of Waterloo as a "pound pg match." More sedate than that characteristic epistle was his letter to the same friend and co-panion-in-arms, on the 16th August, 1813, when he wrote:—"The battl- of Waterloo was certainly the battle fought that has been for many years, I believe, and has placed in the power of the Allies the most important results. We are throwing them away, however, by the infamous conduct of some of us; and I am sorry to add, that our own Government are taking up a line to mislead the people of their rascally newspapers. They are shifting their objects; and, having got their cake, they want both to eat it and keep it. As for your Portuguese concerns, I recommend you to resign, and come away immediately. It is impossible the British Government can support the British officers for the P ruguese army, at an expense even so trifling as it is, if the Portuguese Government are to refuse to give the service of the army in the cause of Europe in any manner. Pitch them to the devil, then, in the most flourishing style you can devise, and come away. Depend upon it, the British Government must and will recall the British officers."

In the House of Lords, in the year 1818, he took occasion to deliver a strong eulogium on the conduct of the Indian army. In the course of his speech, he professed his entire concurrence in the tribute of approbation bestowed on the Marquis of Hastings, for his conduct of the late war in India. There could not remain a doubt in the minds of those acquainted with the facts, but that the wisdom of the plan on which it was commenced, and the vigour of its execution, merited the highest praise. The noble Duke said, "he was pleased that an opportunity like the present had occurred to do justice to the services and gallantry of our troops in India, which were often neglected or disallowed. No troops in the world performed their duty better, or observed a more steady discipline. They had evinced their good qualities in all their late transactions, whether acting in great masses, or small detachments. In all situations they had nobly performed their duty."

This was no grudging praise; and it effectually disposed of the cry that the Duke of Wellington forgot his old comrades, or, in other words, kicked down the ladder by which he had risen.

We may also cite his earnest defence of Lord Londonderry, when, in obedience to the popular feeling, the nom ination of that nobleman to the embassy to St. Petersburg was cancelled. He said:—

My Lords, having learned that it would not be disagreeable to my noble friend to be accosted in the public manner, I did concur in the recommendation; or, rather, my Lords, I did recommend to my right honorable friend, Sir Robert Peel, that my noble friend should be appointed Ambassador to the Court of St. Petersburgh. I made this recommendation, founded as it was on my own personal knowledge of my noble friend for many years past—on the many great and important military services he has performed, and on the fitness he has proved himself to possess for such an appointment in those various diplomatic employments in which he has filled during a long period of time; more particularly, at the Court of Vienna, where for a period of nine years, he performed most important services to the entire satisfaction of the Sovereign with whom he was the immediate subject of his employment. He returned from the discharge of that office, my Lords, with the strongest testimony of the approbation of the then Secretary of State for Foreign Affairs. I was aware, my Lords, of the peculiar talents of my noble friend in certain respects, for this particular office, and of his conversation, fitness for this very description of diplomatic employment, especially on account of his being a military officer of high rank in the service of this country, and of distinguished reputation in the Russian army. I knew the peculiar advantages that must attach to an individual conducting such an embassy on that account. Under these circumstances, I was justified, my Lords, in recommending my noble friend, and I was glad to find that my right honourable friend concurred in that recommendation, and that his Majesty was pleased to approve of it. I may also add, that the nomination of my noble friend having been communicated in the usual manner to the Court of St. Petersburgh, it was received with approbation at that Court. For all these reasons, my Lords, it was with the greatest regret I learned that this nomination had gone no further than nomination—was not approved of in another place; for it is in consequence of that exp ession of disapproval that my noble friend, with that delicacy of feeling which belongs to his character, has declined the office.

Considering that Lord Londonderry at this time laboured under popular odium, and that his past services were either unknown or forgotten, the steadfastness of the Duke to his ancient companion-in-arms cannot but go to detract from the opinion to which we have referred at the opening of this article.

The Duke of Wellington never missed an occasion to do honour to an old companion-in-arms. Witness his eulogium on Lord Sexton. In March, 1840, he said, in the House of Lords:—"I had the honour of being connected with the noble and gallant Lord in service at an early period of his life; and I must declare that, at all times, and under all circumstances, he gave that promise of prudence, zeal, devotion, and ability, which he has so nobly fulfilled in his services to his Sovereign and his country, during the recent proceedings in Canada. I entirely agree with the noble Viscount in all that he has said, respecting the conduct of my noble and gallant friend, in remaining, under all circumstances, at his post, and in taking the command of the troops, although it was not thought expedient by the Government to place him again in the government of the provinces. I agree with the noble Viscount in wishing that such examples as that which has been shown may be always followed in her Majesty's service; for I must say that there never was a brighter example of fortitude and discretion than that which has been manifested by the noble and gallant Lord."

Long ago, the Duke devoted himself to the praise of Sir Charles Napier, to whose talents he afterwards gave such testimony in his well-known and recent recommendation to the East India Company. In 1844, he said, speaking of the gallant veteran:—"My Lords, I must say, that, after giving the fullest consideration to these operations (n Scinde), I have never known an instance of a officer who has shown in a higher degree that he possesses all the qualities and qualifications to e able him to conduct great operations. He has maintained the utmost discretion and prudence in the formation of his plans, the utmost activity in all the preparations to ensure his success, and, finally, the utmost zeal, galantry, and science, in carrying them into execution."

Add to these the Duke's eulogy on the present Viscount Hardinge, and his noble defence of Sir Harry Smith, when assailed for his conduct of the Kaffir War, and there is evidence enough that the Duke was not the cold and impassible man he was represented to be; but that, when occasion required, he could spring up to the aid or the honour of the brave. When the object of his eulogy had been a companion-in-arms, the only perceptible difference was a slightly-increased earnestness, and an approach to something very like tenderness of feeling. To these public proofs may be added innumerable minor instances in private life, proving the Duke to have been sensitively alive to all the feelings of a comrade and all the duties of a commander.

"SEATS TO LET."—MEMORABILIA OF THE LATE FUNERAL.

"The English are a nation of shopkeepers," said Napoleon, in one of his cynical moods; and the consignment of his conqueror to the tomb has led to some strange exemplifications of the imperial sneer as regards our metropolitan population. The pageant itself was characterised by fitting simplicity and grandeur; and the conduct of the people, who stood bare-headed as the car of the warrior's remains passed by, was one of the most impressive features of the spectacle; but there is a host of minor circumstances preparatory to the event, which show unmistakably that what "our good Edmund" said of his being an "age of calculators and economists" was not merely a flourish of rhetoric; and that the "age of chivalry" has not since returned. Watching the market, and turning the penny, have long been the attributes of different grades of our population; but, with all our recollection of their passion for traffic even in sights and scenes, and making hay in the sunshine of their glory, we were scarcely prepared for such a crop of substantial lucre as was reaped by speculators in the national solemnity of the 18th—a practical refutation of the picture, as drawn from a distance:—

Here were none
Who cared to buy and sell, and make a gain,
For one whole day.

The advertising columns of our newspapers have, within the past month, fully shown how ingenuity has been racked to turn the event to best account; and, although we do not propose here to use the inventors precisely according to their deserts, a passing moral may be gleaned from showing up a few of the gentle stratagems, in which it is pretty clear the prospect of gain must have outmastered grief. We question if the loss of gorgeous pageantry and robes has ever drawn from the pockets of curious spectators so large an amount of specie, and through such various channels, as was drawn at the late public funeral. Several instance s border upon the indecrous, from the clumsy attempts of their originators to conceal their motives, and their failure in disguising them. The love of gain may often be traced through the flimsy veil of sorrow, while an unseemly care for creature comforts obtrudes itself at the expense of a snake; and our present object is to point at such instances, with mild reproof, in the same time that we preserve them as so many *curiosities* of the record, and odd contributions to "the history of prices."

Among the earliest arrangements were seats to view the pageant; the tariff of prices presenting some amusing lures. Foremost in the market, the City caterers proved themselves sensible of the advantages of their portion of the line by demanding the most exorbitant prices; though justifiable upon principle, that

The worth of a thing,
Is what it will bring.

In some cases, however, more was held out than could be realised. Thus, one advertiser had "a first-floor to let in Fleet-street, close to Temple Bar, where the ceremony of opening the gate could be seen;" whereas the gate was not closed at all, nor has it been shut for years. The report that a gallery in front of Somerset House was fitting up for the Queen led the advertisers in that quarter to promise by the rumour, which turned out unfounded: these advertisements ran—"The Queen at Somerset House"—"Her Majesty being expected," &c. "Charing-cross decidedly affords the best opportunity for viewing the *cortège*," said one of the morning journals, which opinion some advertisers quoted in their announcements as adroitly as a publisher seizes upon a pleasant recommendation of a new book. The "best view in the line" was, however, to be found everywhere along it; and "first-rate views" abounded from St. Paul's Churchyard to Piccadilly. The former locality was recommended by its "commanding the very best view of this imposing spectacle, as well as the reception, by the clergy, of the coffin, which must necessarily remain a considerable time precisely opposite the house." Cockspur-street was advertised as "decidedly the best position in the whole route:" an early application is requisite, as they are fast filling up. Also a few places on the roof. A most excellent view." Some advertisers stated "present terms, which will be increased, as the period approaches;" another strangely commenced with "Funeral, including the night previous;" and another, "Funeral of England's Hero. The most commanding view," &c. Here is odd confusion: a drawing room "commanding a first-rate view of the procession, by Pall-Mall, suitable for a family of the first notion." A first floor in Fleet-street promised "the best view in the line of route, furnished, suitable for a nobleman and family." elsewhere there was "a choice window, capable of accommodating a party of eight, with every accommodation." But the most pretentious advertisement was the funeral of the Immortal Hero of Waterloo. The only house in the whole route of the procession where a comfortable seat is obtainable, combined with a good view," &c. Perhaps, however, this is eclipsed by a house in Pall-Mall advertised as "commanding at one view the entire procession."

"Wellington Funeral Agency Offices" were opened; plans, models, and drawings, with the places occupied by spectators, were shown in some shops; and curious was it to see persons bargaining for seats in shop-windows, and trying the point of view by sitting in several. *The Prices of Seats*, of course, varied with situation. The lowest we find in the tariff by advertisement were, "cheap seats, in the best part of the Strand. Shop seats, 8s. 6d.; rooms, well warmed, up stairs, from 7s.; entire rooms, moderate; roof seats, 4s. 6d." The house-top location, by the way, was entered by a dangerous flight; for upon the roofs a small, but lofty, (five-storied) house in the Strand, we counted some thirty spectators, several of whom were perched upon the most perilous points. The only fatal accident recorded was that by a fall from the roof of Drummond's banking house, at Charing-cross.

Returning to the prices: in the same column with the above, we find advertised, near somerset House, "a furnished room, with three windows, to accommodate over twenty persons: present terms £25, with an ample cold collation, wines, &c.; per order of chairman." Among the highest prices were, on Ludgate-hill, "a large dining-room, with balcony, on the first floor, price fifty guineas,"—to accommodate fifty persons. In the succeeding advertisement, "on Ludgate-hill, is the best parapet view in the whole line, 15s." Lower down, in the same column (*Times*, Nov. 15,) we find "a first floor in Piccadilly, opposite the Green Park, price £60." On Saturday, Nov. 13, the sum of 30 guineas (agreed upon some days previously), was paid for a first floor in the Haymarket, after trying to evade the bargain; within three days the same sum was paid for a second floor; and for a third-floor bed-room, for three nights, 20 guineas. In some cases, seats were advertised for; and among the "Wants" we find "a second-floor room, with two windows, for a gentleman and his family, not to exceed twelve persons, and for which he is willing to pay £5. and not more." Elsewhere, 20 guineas were offered for a first floor. Buckingham House, Pall-Mall, was put up in 7s. and one guinea seats; "families may bring their own servants." One householder made the most of his locality, by advertising "The Duke's Funeral—Devonshire House, Piccadilly (directly opposite)," &c. In Cook-pur-street we find, "a large first floor window at 1) guineas; and an exten-ive flat roof at 6s. 6d. each person; with good private door, good fires, and every comfort." The following may be taken as an average of the Strand seats: first floor, £20; second floor, £10; third floor, £8; fou th floor, £4: each room for 12 or 16 persons; and single seats in shop at one guinea each.

A few ingenuous traders provided for outward show of grief by "cypress hatbands;" and others, who "keep a post," after sympathizingly referring to the public sympathy and patriotic respect, ventured to suggest, as "the appropriate mediator of public appreciation," "a new run of mourning for the occasion;" the advertisers adding, that they "are in no way desirous of making this a business affair!" In this class we find "a mourning head-dress, suitable for wearing in the Cathedral," and for open-air seats—the gear being warm, protecting the throat, and not impeding the view, as would a bonnet. Nor was the hat itself forgotten; for the proprietors of the "incomparable Hats Manes-ar," indulged in a sort of historical retrospect, associating their own brilliancy with the glories of the Great Hero. Next, a tailor's firm recommended every one to be provided with a fire-preserver, on the 18th; and the proprietor of a bath establishment delicately suggested that "the luxury of a warm bath will be appreciated by those who have witnessed the Duke's funeral."

Science was oddly pressed into the aid of the public appreciation of the pageant, by a few opticians advertising their wares; as "portable perspective glasses, for viewing objects within the distance of a mile, so extensively patronised on this occasion," &c. Another glass "will surprisingly assist the sight in viewing the procession." Another announces "the best View of the Funeral for 12s. 6d. can be obtained by purchasing" a glass, "which will bring out, in a clear and distinct manner, the features of the great men and the most minute objects present on that memorable occasion."

Creature comforts for the day forgotten: here we have "the Duke of Wellington's Funeral Wine, in immense demand;" and there, that "delicious article, the Wellington Funeral Cake;" an extra supply of celebrated lemon biscuits, &c.; while a famous Chelsea tavern was "open for the accommodation of visitors to the great national ceremonial"

We now approach a more censurable mode of "watching the turn of the market," by the raking up of *relics* and *memorials* of the Great Duke, and advertising them for sale to the highest bidder; though, in some cases, the strange proceeding is qua ified by the owner promising that the sums realised shall be appropriated to charitable purposes. First on our list is a "genuine and unique relic of the late Duke of Wellington—A lock of hair will dispose of a Lock of his Grace's Hair, which can be guaranteed; the date of its being cut, and circumstances of possession, will be imparted to the purchaser. The owner would not like to part with it under 50 guineas; but is open to a liberal offer." Again: "Memento of the late Duke of Wellington.—To be disposed of, a Lock of the late illustrious Duke's Hair. Can be guaranteed. The highest offer will be accepted." Next: "A valuable relic of the late Duke of Wellington.—A lady having in her possession a quantity of the late illustrious Duke's Hair, cut in 1841, is willing to part with a portion of the same for £25. Satisfactory proof will be given of its identity, and of how it came into the owner's possession." Again: "A Lock of Hair of the late Duke of Wellington to be disposed of, from the possession of a widow lady. Cut off the morning the Queen was crowned," &c. Next: "The Greatest Relic of the Age.—A Lock of the Mane of the Horse the late Duke rode in the Battle of Waterloo. Cut off by the Duchess. The property of a private individual. The most indisputable evidence given of its genuineness. It being supposed that this will, in all probability, be the only piece offered to public competition, the advertiser declines naming a price, but the most liberal offer will be accepted within a week," &c. Again: "For Sale, a Wreath, composed of the Laurels grown by his Grace some years back, which can be well authenticated as such." But, more reprehensible, is the following piece of cupidity, from the *Times* of the 19th (we omit the name): "Relic of the Duke of Wellington for sale.—The son of the late ——, of Hounslow, bird-lime hair-cutter to his Grace the Duke of Wellington, at Strathfieldsaye, has a small quantity of Hair, that his father cut from the Duke's head, which he is willing to dispose of. Any one desirous of possessing such a relic of England's Hero, are requested to make their offers for the same," &c. In the *Times* of the 23rd, also is offered a small portion of the Duke's Hair to be disposed of, "with unimpeachable testimony," &c.

The traffic in autographs has considerably revived since the death of the Duke, for whose letters very large sums have been demanded. The *Times* of Nov. 10 contains advertisements of three notices for sale: the price asked for a letter, with seal and post-mark, written in 1828, is 20 guineas; of another, 15 lines, with envelope, date 1844, £10; but, in the next advertisement, an autograph note, with stamped envelope and seal, is offered for 30 shillings. In the *Times*, Nov. 19, an autograph letter, "a good specimen of the sternly courteous style of his Grace," is offered at above £3. Next, an "autograph business letter, courteous, and style highly characteristic," is priced at £15.

Such are a few of the memorials of the Duke that have been preserved, under the following circumstances, and as offered for sale by advertisement in the *Times* of Nov. 12. Several years since, there was published in Italian an ode on the death of Napoleon by Manzoni, which was translated into French by one Augustin Fauvel, of Venice. It appears that the Duke was one day reading a copy of this work in passing through Kent. His Grace, we dare say, was not much struck with its merit, for he tore it in pieces, and threw it out of the carriage window. A gentleman on the road side picked up the fragments, and here they are, offered as a memento of his Grace—an appropriation never dreamt of by the great Hero.

The following calculation has been made with some care (in the *Observer*), for the purpose of ascertaining the proximate amount of money paid by the public for mere seats to view the Funeral procession.—

There were in the line of procession, in Piccadilly, 100 houses; St. James's-street, 90; Pall-Mall, 124; Cockspur-street, 34; Charing-cross, 34; Strand, 457; Fleet-street, 208; Ludgate-hill, 90; St. Paul's Churchyard, 30: in the whole, 1167 houses, besides the club-houses, the houses in Waterloo place and Parliament-street, and the houses of the street-crossing upon the line. The enclosures of St. Martin's, St. Clement's, and St. Dunstan's, accommodate 6060 persons; the gallery over the Opera Colonnade, 1000; Crockford's three galleries, 1000; and the Arundel sittings 1000 persons. Now, assuming that there were only 60 spectators in each house (69,420), there must have been private accommodation for about 120 000 persons; and if one-third be deducted on account of those who desired their accommodation for the accommodation of their connections and friends, there will remain 80 000, which, at one sovereign a head, makes £80,000; and this sum must be considered a low average estimate, as it is well known that many gave considerable sums by taking windows, rooms, and houses, at high prices, on speculation, and subletting them at two, three, five, and ten, some cases, ten guineas a head, and that the "scaffold-erecting trade" of the different cities and towns made up by the sums paid by those members who had obtained the privilege of introducing lac es.

Portions of the churchyards in the route of the procession were turned to benevolent account, by letting the ground for sittings and devoting the profits to the parochial charities. Thus, by sittings in the churchyard of St. Martin's-in-the-Fields, and the admission of persons to the roof of the church, the sum of about £200 was cleared. In the churchyard of St. Mary-le-Strand seats were erected for 1655 persons, of which, however, about 1000 only were occupied. At St. Clement's, the erection of the galleries cost about £200, and the receipts for seats were £800. In each of the above cases the profits were added to the funds of the parish schools. At St. Dunstan's-in-the-West, the ground was let for £100, which sum was added to the funds of the Infant School: there were 350 sittings, all which were let, besides about 100 upon the roof of the church.

At the south-west angle of Arundel street, Strand, was a large and lofty pavilion, named "The Arundel Sittings," erected at the cost of Mr. Macey, builder, under the superintendence and from the plan of Mr. H. M. Abraham, the architect. The ground was let for the occasion for £60; there were sittings provided for nearly 1000 persons, the cost was about £200, and the result was a net profit of £300 to the builder, who also seated gratuitously several customers and friends. This was one of the most commodious buildings of its class throughout the line.

Passing from these trivial records of the spectacle to the impressions of its grandeur, how many great and glorious deeds were commemorated in the pageant of last week, when the funeral route glittered with the pageantry of the days of the Field of the Cloth of Gold, when Princes and people alike assembled to do honour to the warrior, whose end was peace.

THE WELLINGTON FUNERAL.—In Kilmore church (of which an Engraving was given in the ILLUSTRATED LONDON NEWS of the 16th ult.) was rendered the further and final, but striking and touching mark of veneration for the lamented chieftain, of a solemn service—chiefly selected from that for the burial of the dead—being performed, as nearly as possible at the moment of interment, by the rector and vicar, the Rev. Dr. Tighe Gregory; up to which period, from noon, the bells tolled without intermission. The appropriate text was, "He is both dead and buried," Acts ii., 29.

AMUSEMENTS, &c.

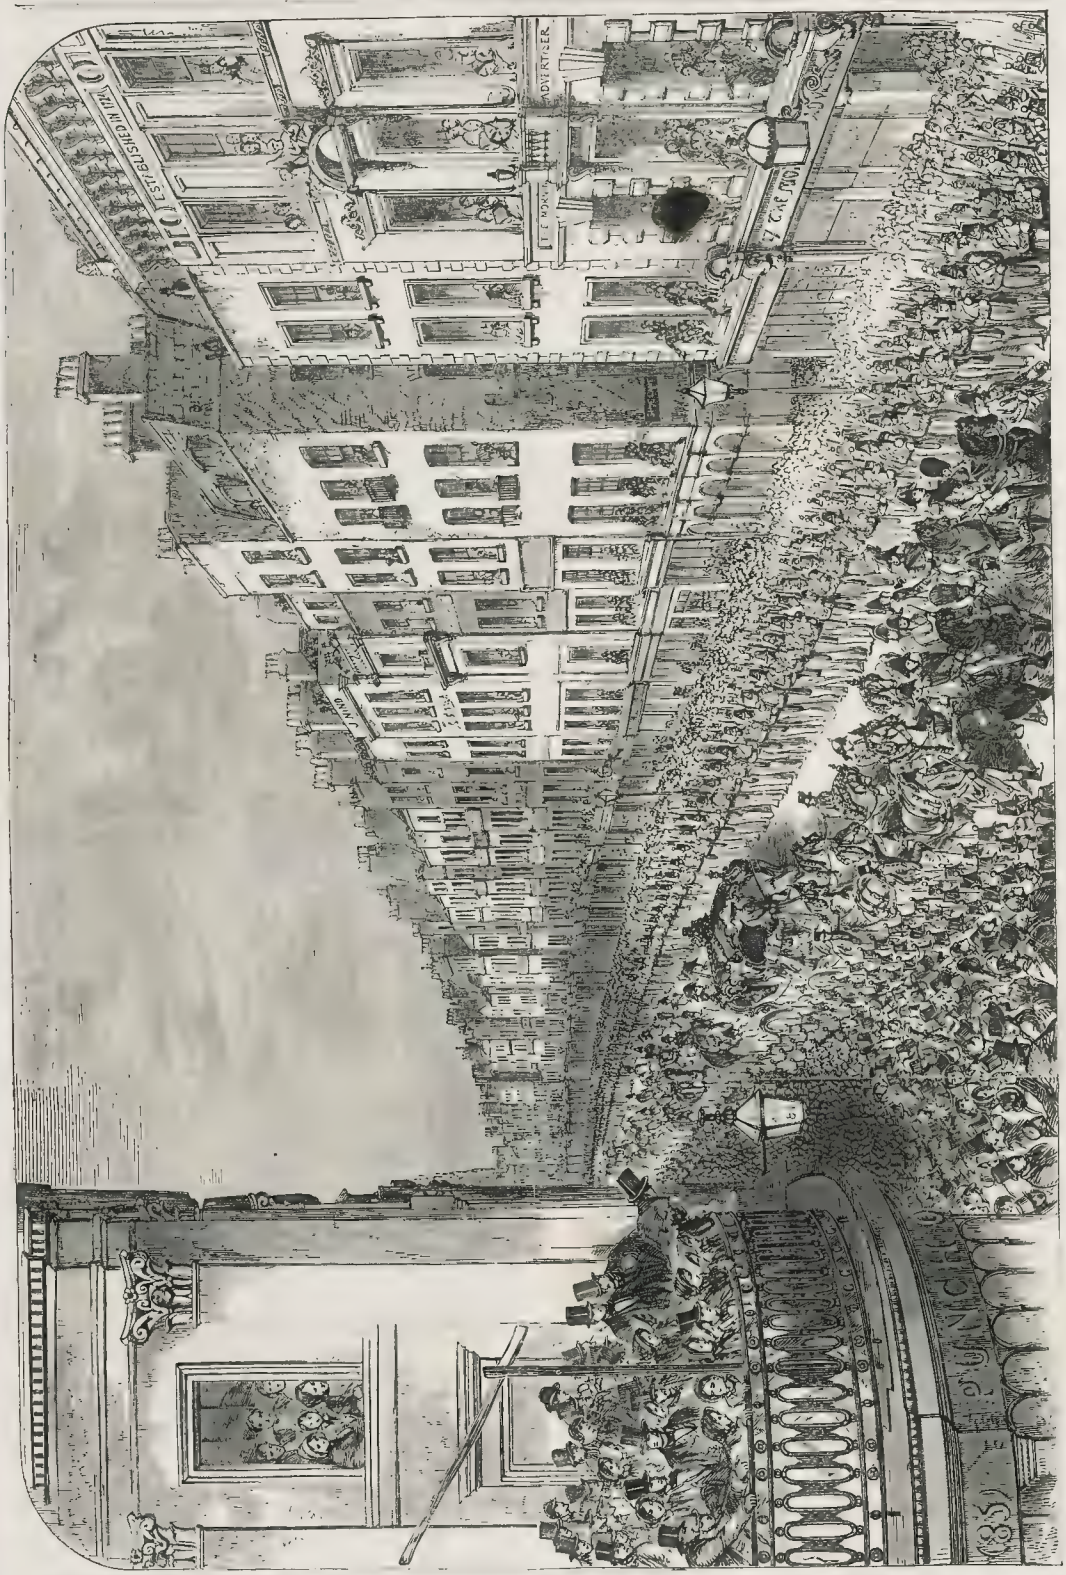
MISS DOLBY begs to announce that the SECOND or her ANNUAL SERIES of THREE SOIREES MUSICALES will take place on THURSDAY, DECEMBER 9th at her Residence. No. 2, Hinde-street, Manchester-square, at Eight o'Clock precisely, when she will be assisted by the following eminent artistes:—Miss Eliza Birch and Dolby, Mrs. Hill (her 1st appearance this season), Miss Kate Loder, Messrs Alfred Pierre, H. Baggs (violoncello), C. Hargrove, Jones and Herr Pauer. Conductor of the Vocal Music, Mr. Joseph Tickens. Half-a-guinea each to be had at the Music Warehouses, and of Miss Dolby, No. 2, Hinde-street, Manchester-square.

LOVE'S ENTERTAINMENTS.—These celebrated Entertainments will be given on MONDAY, NOVEMBER 29, and DECEMBER 6 and 8, at the Star Rooms, Oxford Theatre, New Inn, a few doors from Holywell-street, Strand. Doors open at Seven, to commence at Eight. Stalls, 3s.; Pit, 2s.; Gallery, 1s. Tickets may be had at the Box-office, Bridgewater-house, 39, Cornwall-road, Lambeth; at the Royal Clarence Hotel, Exeter. Dec. 14 at the Athenæum, Teignmouth. Dec. 20 at Plymouth. Dec. 16, at Sherborne. Dec 20, at the Institution, Johne Co.—Begin at half-past Seven o'clock precisely.

CALDWELL'S SOIREES DANSANTES.—Every Evening, Richt's Tavern, Adelaide-place, City Quarter, 41a Splendid New Ball-room, with all the arrangements of a first-class Mansion. Admission, 6d. Quadrilles, Waltzes, &c., by a Select Band. Lessons given by Mrs. CALDWELL, at Messrs. Hobbs and Co.'s, 38, Gracechurch-street, London.

CAUTION.—S. MORDAN and CO. CAUTION the Public, in purchasing their PATENT EVER-POINTED PENCILS, to see that their name is legibly stamped on the case. A quantity of counterfeits are constantly offered to the public as "Mordan's," to produce a greater profit to the salesman but will be found useless by the purchaser. These remarks apply to their Patent Leads for replenishing the same. Manufactory, 72, Chiswell-street, London.

FINE ARTS.—S. MORDAN and CO. beg to inform the public that they are enabled to SUPPLY a genuine pure CHEMICALLY PREPARED LEAD (free from that mixture of grit or any other impurity, so fatal to the use of the pencil), which in case any such accident should occur, will be found to have been produced, and in confirmation of this the highest testimonials from the first artists, amateurs, and connoisseurs have been received. The following is an abbreviated list:—Charles Barry, Esq., R.A.; Edwin Landseer, Esq., R.A.; E. M. Ward, Esq., R.A.; Richard Dadd, Esq., R.A.; Richard Burchett, Esq., R.A.; Clarkson Stanfield, Esq., R.A.; S. Prout, Esq., R.A.; Mrs. Carpenter, Portrait Painter to the Queen; Mrs. Mary Ann Severn, Portrait Painter to the Queen Dowager; Miss Sharpe, Portrait Painter to the Queen; Miss Corbaux, Portrait Painter to the Queen; Miss Setchel, Portrait Painter to the Queen; Miss Rigby, Portrait Painter to the Queen; Miss Rigby, Portrait Painter to the Queen; Miss Rigby



FLEET-STREET—THE CIVIC AUTHORITIES IN THE PROCESSION.

London Printed and Published at the Office, 198, Strand, in the Parish of St. Clement Danes in the County of Middlesex, by William Little, 198, Strand, aforesaid.—Saturday, November 27, 1852.—Supplement.

THE ILLUSTRATED LONDON NEWS.

No. 595 —VOL. XXI.] FOR THE WEEK ENDING SATURDAY, DECEMBER 4, 1852. [SIXPENCE.

THE GREAT FREE-TRADE DEBATE.

THE debate in the House of Commons on the motion of Mr. Charles P. Villiers, and on the amendment of Lord Palmerston, which ended on the morning of Saturday last, by the triumphant affirmation of confidence in, and adherence to, the great principle of Free Trade, will long be remembered in the annals of this country. The new Parliament, especially elected and convened to pronounce its verdict on the policy or impolicy of Free Trade, and especially of free trade in corn, has declared by the large majority of 468 against 53, its opinion that "the improved condition of the industrious classes is mainly the result of recent legislation, which has established the principle of unrestricted competition, has abolished taxes imposed for the purpose of Protection, and has hereby diminished the cost and increased the abundance of the principal articles of the food of the people." The Parliament by the same resolution, or we should say amendment, proposed by Lord Palmerston, has furthermore determined that it will "prudently" persevere in the same policy. So far there is an end of the quarrel which has so long raged between those who would make dear the food of the people, and those who would make it cheap. Protection, as a principle, is defunct. It has given up the ghost, and ceased to encumber the arena of politics with its inconvenient and unwieldy presence. The Parliament specially convoked to pass sentence of life or death upon it, has sealed its doom; and the thing has gone, never more to be revived amongst us. So far there is reason for rejoicing.

A very similar affirmation was previously proposed for the acceptance of Parliament by Mr. Charles P. Villiers; but, as it contained, according to Mr. Disraeli, some "odious" words—which odious words were simply the expression of its opinion, that the policy of the late Sir Robert Peel, in repealing the Corn Laws, was "wise," "just," and beneficial—a dispute arose, as unseemly as any recorded in the long and unhappy history of the Corn-laws. To end that dispute, Lord Palmerston—"judicious bottle-holder" between contending parties—proposed his amendment; the same in spirit, but different in form. To save the personal pride of men who had been convinced, possibly against their will, and certainly against their comfort, the original resolution was negatived by the majority of 336 against 256.

It may be said that, Parliament having affirmed a right principle in right words, there ought to be an end of the matter. But the question has a deeper interest and significancy. It affects character. It touches the respect entertained by the mass of the people for those who lead opinion in the Legislature, and it tends greatly to impair the reverence hitherto felt amongst us for the representative form of Government.

If we strip the question of externals to examine it more closely, and if we retrace succinctly the history of the last seven years in reference to it, we shall see more clearly what Parliament has sanctioned. If we put the case in its broadest simplicity, as the people "out of doors" put it to themselves, we shall better be enabled to judge upon what dangerous seas the leaders of party have embarked their political fortunes; and we may discover whether a right or a wrong thing has been done by those who have stood between the Ministry and a more satisfactory decision.

It is entirely a question of Consistency. We are not of the number of those who stickle for that principle. There may be consistency in error—deserving no better name than that of obstinacy, or of stupidity, or, in the most favourable sense, of Persistency. In this country, where statesmen but too often lag behind the intelligence of the age, allowance ought to be made for change of opinion. This was particularly the case with the Ministry of Sir Robert Peel and of the great soldier whose recent loss the nation yet deplores, and of many other eminent and illustrious men, alive and dead. If the change be from the wrong to the right, the act deserves praise instead of condemnation. If even it be from the right to the wrong, it deserves respect, if it be conscientious. It is, however, a great misfortune when men in the position of Ministers of the Crown find themselves compelled by the force of circumstances, and the irresistible pressure of facts, to turn round upon their less enlightened, less able, and less advanced supporters, and to carry great public questions which they formerly opposed. Such events are deeply to be deplored, because they shake confidence in public men, and tend to efface the recognised boundaries between right and wrong. Such was the case with Sir Robert Peel and the Duke of Wellington, in two remarkable instances—the Roman Catholic Emancipation Act, and the repeal of the Corn-laws. Both of these conversions—though of infinite service to the country—were accompanied by compensating injury. They impaired the public faith in statesmen. Parliamentary morality—which should be as pure and spotless as the morality of any private man—suffered by them to an extent which we cannot fully appreciate. Yet history has already done justice to the motives of these illustrious individuals: their fame remains pure, and their memory not only bears no blame, but they stand recorded to all time as public benefactors. In the last great instance—the repeal of the Corn-laws—which more immediately led to the disruption of which we speak, the conversion of Sir Robert Peel excited a bitterness of feeling, an amount of ill-will, of anger, and vindictiveness, which has scarcely yet subsided. Yet Sir Robert Peel, in changing his opinions, only yielded to irresistible necessity. That he might do his duty, he sacrificed the friendships and the ties of a long and honourable life. Yet it should never be forgotten that, when he changed his opinions, he went to his Sove-

GENERALS, CARRYING BAT[illegible].

FUNERAL OF THE LATE DUKE OF WELLINGTON.—ENTRANCE OF THE PROCESSION INTO ST. PAUL'S CATHEDRAL.—SEE NEXT PAGE.

reign, and, like an honest man, tendered his resignation of his high office. He said, in effect, "I have been an opponent of Free Trade—I accepted office as a Protectionist—I am no longer of the same opinion. The party with whom I once acted I can act with no longer. I am not the man to carry the repeal of the Corn-laws. I resign office." Thus he acted. On the 10th of December, 1845, Sir Robert Peel ceased to be Prime Minister of England. Lord John Russell was sent for, but failed to form an Administration. After some days of fruitless negotiation, it became apparent to the Sovereign and the country that it was utterly impossible to form a Ministry from the ranks of the Whigs or of any other parties in the Legislature. Under these urgent circumstances, and impelled by a high sense of duty, and of a national peril consequent upon his refusal, Sir Robert Peel, on the express understanding that he should propose the repeal of the Corn-laws, consented once again to conduct the fortunes of England. He re-entered office as a Corn-law repealer—broadly, openly, avowedly, and notoriously.

Compare his case with that of Lord Derby and Mr. Disraeli, which came before Parliament last week. These statesmen, who for six years organised a party opposed to Free Trade—who, by themselves and their subordinates, constantly talked Protection—Lord Derby at one time insisting upon a fixed duty on foreign corn, and Mr. Disraeli, at another, insisting upon compensation to the agriculturists, for the injuries which he pertinaciously alleged that they had sustained—these statesmen, we say, came into power as a necessary consequence of the fall of the Russell Administration, in the spring of the present year. They came into office as Protectionists, or as nothing. But they were no sooner installed in office than their opinions began to change. New responsibilities awakened new intelligence in their minds. They saw in Downing-street and Whitehall what they could not discover in the "cold shade" of the Opposition benches. Facts became too strong for them; and, one by one, they avowed secretly to themselves—if not openly to each other—that they had been wrong. They gradually became Free-traders. On Saturday morning last they set the seal to their conversion, by voting for the Free-Trade amendment of Lord Palmerston. But was this honest? Was this the conduct which the country had a right to expect of them? Was this a course similar to that adopted, in far more pressing circumstances, by the high-minded man whom they or their adherents so aspersed and so maligned? If they had been as independent and straightforward as that lamented statesman, they would have imitated his example, and resigned office. They would have said to their Sovereign, "We have been in error. We were Protectionists. We assumed office as Protectionists. We had and could have no other claim upon your Majesty or the country but that which we have derived from our conduct in Parliamentary opposition. Experience has made us wiser. We are Protectionists no longer. We are Free-traders. We resign into your Majesty's hands the seals of office with which we have been entrusted, and reserve ourselves for a future time, when, this question being settled, we may come into your Councils, unsullied by the imputation of preferring power to principle." This would have been manly and generous. That this was not done will, we are certain, be in after-times widely regretted, and by no men more than by the members of the Ministry themselves. No future good conduct can atone for the omission. No Budget, however excellent; no series of measures, however admirable, will save the Administration of Lord Derby from the imputation that lies upon it—of preferring so cheap and miserable a thing as office to so priceless and excellent a thing as character.

The new Parliament, in its first expression of opinion, has made itself a party to what we cannot but consider a cowardice and a mistake. It has done a right thing in so wrong a way, that the thing had been better left undone. Like Mr. Sidney Herbert, we can see humiliation on the Treasury benches; but we can see it also in other parts of the House.

FUNERAL OF THE DUKE OF WELLINGTON.

UPON the preceding page we have engraved the impressive scene of the entrance of the procession into St. Paul's Cathedral, after the body had been removed from the Car, and received by the Bishop, Dean, Canons, and Prebendaries, attended by the minor canons and choir, and thus borne into the Church, attended and supported as follows:—

The Spurs, borne by York Herald.
The Helmet and Crest, borne by Richmond Herald.
The Sword and Targe, borne by Lancaster Herald.
The Surcoat, borne by Chester Herald.

Then came the General Officers bearing bannerols, and carrying the batons of the great Duke: altogether, perhaps, the most various and splendid portion of this memorable pageant.

CHURCH, UNIVERSITIES, &c.

CONSECRATION OF THE BISHOP OF MEATH.—The consecration of the Rev Dr. Robert SEYMOUR, Archdeacon of Dublin, to the bishopric of Meath, as successor of the late Rev. Dr. Townsend, took place on Advent Sunday, in the chapel of Trinity College, Dublin.

APPOINTMENTS AND PREFERMENTS.—The following appointments and preferments have recently been made:—*Rectories:* The Rev. J. E. Dalton, B.A., to Manton, near Marlborough.—Lindsay, Lincolnshire; the Rev. T. C. Owen, M.A., to Llandebrog, Carnarvon. *Vicarages:* T. & Rev. R. Croly, M.A., to Dunkeswell and Dunkeswell Abbey, near Honiton, Devon; the Rev. S. K. Webster, M.A., to Ingoldsby, Lincolnshire: The Rev. C. C Sharpe, M.A., to Ince, near Chester; the Rev. E. W. Taunton, B.A., to St. George's Church, Kendal, Westmoreland. The Bishop of Peterborough has licensed the Rev. J. W. Sharpe, B.A., to the Rudby-with Newton. *Chaplaincy:* The Rev. C. S P. Parish, M.A., has been appointed to Moulmein, in India.

The Rev G. H. Nobbs, chaplain of Pitcairn's Island, was, on Tuesday, admitted to priest's orders, by the Lord Bishop of London, in the parish church of Fulham.

UNIVERSITY OF LONDON.—On Tuesday afternoon a general meeting of the graduates in this University was held at the Freemasons' Tavern, to adopt measures for urging upon the Legislature the claim of the University to be represented in Parliament. Mr. Heywood, M.P., presided, and was supported by the Right Hon. Edward Strutt, M.P.; Mr. Thornely, M.P.; Mr. Collier, M.P., Mr. Carter, M.P.; Dr. Birkbeck, Dr. Carpenter, and other gentlemen.—In opening the proceedings, the chairman remarked on the necessity of an addition to the number of scientific men in the House of Commons, and where the medical profession was very insufficiently represented.—Dr. Foster read a report, which stated at some length the circumstances connected with the foundation of the college, and its present history. The number of schools and colleges now affiliated to the University was above 100, in which between 7000 and 8000 young men were under instruction. As some of these pursued their studies at two schools at the same time, the number of students in connexion with the university might be estimated at 5000, which was more than the number at Oxford Cambridge, and Dublin taken together. It was now a matter of doubt which had the most wealth Oxford, Cambridge, or London. Upwards of 700 graduates were now connected with the London University, which would be a larger constituency than the University of Dublin possessed when the Reform Bill gave it a second member. Upwards of thirty members of the House of Commons had promised to support the claims of the university, amongst the number being Lord J. Russell, Mr. Goulburn, Mr. Gladstone, Mr. Strutt, Mr. Hume, and Lord D. Stuart.

TESTIMONIAL TO COLONEL MACKINNON, C.B.—From the *Graham's Town Journal* of October 1 we learn that a testimonial had been presented to Colonel Mackinnon, late Chief Commissioner of British Caffraria, by the British settlers of Lower Albany, in token of their appreciation of his services in the difficult and onerous duty he has so efficiently fulfilled in that country. The testimonial consists of an ornamental box, pencil-case, and chain, purchased by subscriptions, limited to half-a-crown each subscription, and was presented with an appropriate address, to which Colonel Mackinnon has replied, in the Castle in Cape Town.

GOLD CAMEO MEDALLION OF THE DUKE.—This interesting memorial has just been issued by Dodd, of Corah II. It consists of a miniature cameo portrait of the Duke, in gold, set in an ivory case bearing the ducal coronet and cypher.

FOREIGN AND COLONIAL NEWS.

FRANCE

(From our own Correspondent.)

PARIS, Dec. 1.

The voting being over, and the examination of the numbers pretty well concluded, we feel in less danger than last week of falling into the deep abyss of politics; though we flatter ourselves that, all things considered, we manfully resisted the epidemic. We have so much small talk and gossip for you this week, readers, gentle and simple, that we hardly know where to begin; and if our glass beads are "at random strung," you will remember they are but glass beads, and therefore not worth a very careful and systematic arrangement. We will begin with a little bit of inedited and here ineditable, gossip, which has the rare peculiarity of being authentic. In the midst of all the cares of State, the interests of the nation, the great political questions of the day, the "amber bay" has stepped in most inopportunely, and cast a dark with more success than the infernal machine of Marseilles. A certain *fair* Spaniard (we use the word in its precise and literal, as well as its general, sense) has, by the force of her charms, mental and physical, so enthralled the heart of the *chef de l'état*, that it is difficult to say where this influence may stop; and some even go so far as to hint at the possibility of its interfering with the matrimonial designs, which, lately more than ever, have become the subject of general interest and conversation. The best-informed assert that the news of the lady—who is young, rich, nobly born, accomplished, and, we need hardly add, ambitious—stops at nothing short of a share of the Imperial throne; but that *sa Majesté* elect hopes to be able to arrange matters by a morganatic marriage a compromise which those best acquainted with the haughty damsel of the *sangre azula* declare she will indignantly reject, should he venture to propose it. Whatever be the result of the affair, it is positive that at present this influence is most powerful.

The lady, with her usual tact, has been the constant guest of Louis Napoleon at St. Cloud. The best horse in his stables has been placed at her disposal to join the hunting parties; she is invited wherever *soi-disant Impériale* goes; she gives the list of such ladies as are to be asked to the *reunions* at St. Cloud; and, in short, in all such matters, the Sovereign for the time being. It is, however, but justice to add, that, notwithstanding the perilous game she is playing, not the slightest suspicion of what, in such cases, is commonly called dishonour, attaches to it; her position in the whole affair; and she even takes an insolent pleasure in displaying the chains of her captive and her own freedom from any such fetters. This, however, is of course the under-current of affairs, and it is declared in public that the Wasa marriage is positively to take place: that the betrothal is to be performed by proxy at Vienna, in the month of January; and that plans are being discussed for the household of the Empress on a magnificent scale. For that of the Emperor, the Duc de Mortemart is spoken of as *Grand Maréchal des Palais*, the Duc de Guiche as *Grand Veneur*, and the Duc de Mouchy as *Grand Chambellan*. Louis Napoleon is said to purpose following the plan of his uncle in placing about his person all the old historic names he can induce to accept the position.

Abd-el-Kader is deposed from his post of lion of the day by another noble infidel, Vely-Pacha, the new Turkish Ambassador, who is at present the object of curiosity in general, of female curiosity in particular. He is barely thirty, good-looking, courtly in manner and address, speaks French like a Parisian, and possesses a princely fortune: if these are not elements of success, we should like to know where they are to be discovered.

Fêtes and galeties are becoming each day more frequent and brilliant. One of the first was the dinner given by the Princess Mathilde to the President, at which were assembled most of the *notabilités*, both of the *haute société* and the *hauts fonctionnaires*. The halls of the Tuileries and the Hotel de Ville are shortly to commence, with the balls of the Opera; are to begin with that of the latter, which is unusually early. Many of the French diplomatists at foreign Courts are, it is said, to come to Paris for the celebration of the Empire, while others are to give splendid entertainments at their various Embassies in honour of the event. In preparation for all these splendours, the looms of Lyons and St. Quentin work merrily, night and day, and even then can hardly suffice for all the orders they receive for the richest and most costly stuffs. *Tant mieux*, if it will but last.

It is reported here that the object of M. Thiers's visit to England is to obtain from Lord Mahon information of the contents of such of the papers of the Duke of Wellington as may afford, for his history of the Empire, intelligence respecting the campaign of the Peninsula in Portugal.

The Odéon, that theatre which, though so many succeeding managements has seemed fated to misfortune, and has but lately rallied from its last fall, is now flourishing under the benign influence of a most successful piece. The "Grandeur et Décadence de Joseph Prudhomme" is, however, a study of which no idea can be given by a critique. The plot is a mere framework to connect together the personages; the incidents are (and must be, or the thing loses its character and *transcendence*) trivial and common-place. It is upon the latter parts are significant; all and everything is known into the shade to bring forth in strong relief the hero of the play. M. Joseph Prudhomme is a fictitious and fantastic personage of the *genre épicier*, as well known in France as "Paul Pry" is in England. It has, however, been reserved to M. Henri Monnier, who is both author and actor in the work, to embody and bring before us in a living form the hitherto sketchy outlines of Joseph Prudhomme; to present him to us in the flesh tangible and palpable; to bring our wandering speculations as to the personnel of that individual into exact shape. He has done it, and done it with a truth, a closeness of observation, a consistency on all points, that utterly baffle description. Nothing is left out—nothing overdone. Joseph Prudhomme cannot enter the room, speak, be silent, walk, sit, blow his nose, but we exclaim, in delight, "Tout lui!" Every movement, look, word, is instant with the same character of self-complacent, unconscious, preposterous *bêtise*; of egotistical, pompous, heavy, credulous self-importance. In short, Joseph Prudhomme is a study which deserves to be placed beside the *Mercadet* of Balzac, than which we conceive no higher praise can be accorded it.

The Italian Opera is giving "La Sonnambula," for the *débuts* of Mdlle. Bettramelli, a young singer of considerable promise, but who is, as yet, so paralysed with fear as to leave us a good deal in the dark as to the real extent of her talents. Belletti and Calzolari perform their *rôles* with considerable skill, and altogether the performance is tolerably successful.

At the Gymnase, the "Fils de Famille," by MM. Bayard and Brésille, is warmly applauded. It is full of interest, and abounds in characters well and indeed, and, as is always the case at the Gymnase, admirably acted and *costumé*. The names of Rose Chéri, Bressant, Lafontaine, and Lesueur, are a sufficient guarantee for both points.

Auber is, it is said, to be, with M. Théodore Sobarre, charged with the superintendence of the chapel of the Imperial household. He is employed in finishing an opera, entitled "La Fiancée du Brigand." The libretto is by Scribe, and the principal *rôle* is to be performed by Mdlle. Caroline Duprez. Berlioz has just returned from Weimar, where, by the direction of the Grand Duke, he was invited by Liszt to assist at the first representation of the grand opera of the latter, entitled "Benvenuto Cellini"—a work which has had the most brilliant success—and to preside at a concert composed of his own music.

Berlioz is engaged in the preparation of the "Te Deum," which he has composed for the approaching official solemnities. Of these we have, as yet, little to say. The mere details of the grand affair of the proclamation will, of course, be found in all the journals: we will try to collect some of the episodes for our next writing letter.

The Empire is definitively proclaimed. On Wednesday the vote of the nation was conveyed to the Emperor, at St. Cloud, by the Corps Législatif Legislative Body. The Emperor replied to the announcement as follows:—

Gentlemen,—The new reign which you, this day, inaugurate, derives not its origin as so many others recorded in history have done—from violence, from conquest, or from fraud. It is, you have just declared it, the free result of the will of a whole people, who consolidate in calm that which they had founded in the midst of agitation.

I am penetrated with gratitude towards the nation which, three times in four years, has sustained me by its suffrages, and each time has only augmented its majority to increase my power. But the more that power increases in extent and in vital force, the more does it need enlightened men, such as those who every day surround me—independent men, such as those whom I address to guide me by their counsel, to bring back to party strife just limits, if it should ever quit them.

I am, from this evening, with the Corps, from the name of Napoleon III., become the chief of the house he has restored to upon me in their acclamations; because the choice has been legally proposed it; and because the whole nation has ratified it.

It is then to be inferred that in accepting this title I fall into the error imputed to the Prince who, returning from exile, declared null and void all that had been done in his absence? Far from me be such a wild mistake. Not only do I recognise the Governments which have preceded me, but I inherit in some manner all that they have accomplished of good and of evil; for Governments which succeed one to another are, notwithstanding different origin, liable for their predecessors. But the more completely that I accept all that, for fifty years, history transmits to us with her inflexible authority, the less it is permitted to me to pass in silence over the glorious reign of the head of my family, and the regular, though ephemeral, title of his son, whom the two Chambers proclaimed in the last throes of vanquished patriotism.

Thus, then, the title of Napoleon II. is not one of those dynastic and supernatural pretensions which seem to be an insult to good sense and to truth. It is the homage of a Government which was legitimate, and to which we owe the brightest pages of our modern history. My reign does not date from 1815; it dates from this very moment when you have announced to me the suffrages of the nation.

Receive, then, my thanks, *Messieurs les Députés*, for the *éclat* that you have given to the manifestation of the national will, by rendering it more evident by your superb size, more imposing by your declaration.

I thank you also, *Messieurs les Sénateurs*, for having been the first to address congratulations to me, as you were the first to give expression to the popular wish.

And me, all of you, to set firm in this land, upset by so many revolutions, stable institutions, which shall have for its bases religion, probity, and love for the suffering classes.

Receive further my oath, that to sacrifice shall be nothing on my part to ensure the prosperity of my country: and that, whilst I am main peace, I will yield in nothing which may touch the honour or the dignity of France.

PRUSSIA.

The chambers were opened on the 29th inst., by the Minister President, with an address, of which the following are the most essential points:—

The administration of finances has been conducted with the customary regard to our necessities, and with order and economy. The September proposition has not, up to the present time, obtained the assent from all sides, but the Government feels assured of the consent of the country in the political negotiations it has pursued. Propositions respecting designs relative to the communal, district, and provincial regulations, as well as the first Chamber, will be presented. The last proposition concerns the freedom of the Crown from limitations which are not grounded upon the interests of the country. Generally, the Government will be maintained in the exercise of all party endeavours. No interference with legal freedom will be permitted; but no weakening of the Royal power by division will be tolerated. It is the legal path of constitutional development which gives security and enduring success.

THE OVERLAND MAIL.—THE BURMESE WAR.

The papers and letters from Bombay of November 3, and Calcutta of October 27, have been received in the metropolis of the Overland Mail. The first division of the expedition against Prome, under General Godwin, left Rangoon between the 18th and 24th of September. The vessels which conveyed the troops to the place of destination met with no resistance until the 9th of October, when they were in the immediate neighbourhood of Prome. The Burmese, who had planted a long range of guns on both sides the river, upon perceiving the approach of the British squadron, commenced firing upon each vessel as it came within reach, which was gallantly replied to by the several ships composing the squadron. In two hours the enemy's fire was silenced. The casualties on our side were insignificant. The loss sustained by the enemy was not known. In the afternoon some of the 80th Regiment landed, and pushing onward, dislodged the enemy at all points, until they reached the Golden Pagoda, which was defended by 500 men. Here the contest was sharp, but of brief duration, and the enemy took to flight in all directions. In the course of the night Prome was abandoned by the Burmese, and on the following morning (the 10th), about 3000 men marched into Prome, and took possession of it without opposition. Strong stockades were erected some few miles from Prome, which were defended by about 6000 Burmese; but General Godwin thought it prudent not to attack them until the second division should arrive. General Godwin returned to Rangoon on the 15th, leaving the captured city in charge of Sir J. Cheaps. The war was considered to be over; but nothing was known as to future movements. Admiral Austen died from cholera on the 8th of October, near Prome.

PROVINCIAL INTELLIGENCE.

THE RECENT FLOODS.

The provincial journals still teem with accounts of the damage done, and the loss that is consequence of the heavy floods which have been experienced in all parts of the country. The waters still continue to cover the land for a great distance round Windsor, and much inconvenience to all parties, with a vast deal of injury, is suffering among the poorer classes, is the natural consequence. Subscriptions to relieve the necessities of the latter have been set on foot at Windsor, Eton, and Datchet, and it is understood that her Majesty, previous to the departure of the Court for Osborne, with considerate benevolence, commanded that the most deserving of the lumble claimants should be ascertained and relieved. At Maidenhead, the cellars of Mr. Lovegrove, at the Bear Hotel, were entirely filled with water. The corporation supplied the inhabitants with the use of punts gratuitously. In Berkshire, numerous sheds, outhouses, and ricks have been entirely swept away, and a great loss of cattle sustained. The same on the banks of the North Western line, between Peterborough and North mpton, had not, in the beginning of the week, been able to resume their ordinary traffic, many parts of the rail being literally swept away. Many of the farmers in the eastern counties, who have sown it or early seed, will be nearly ruined.

In the west matters are no better. Scarcely a grain of wheat has been put in, and what has been sown will be exceedingly little or nothing. The ground is so completely saturated with rain as to prevent the ordinary preparations for the reception of the seed being carried out. The low lands around Bridgewater are flooded to a great depth, and in many instances the roads are nearly impassable, except by means of boats or on horseback. Cottages at Burrowbridge have been washed down, but, fortunately, no lives lost. In the moors many of the houses are so inundated that the inhabitants are confined to the upper stories, and communication from house to house is by the means of boats, by which also food is conveyed. The Avon has overflowed its banks, and upwards of eleven hundred acres now stagnate beneath its waters, visited with such an inundation, the water having reached ten feet above the ordinary level. From the neighbourhood of Wells we hear that the moors are completely under water, and in many places the waters have extended on every side by water, rendering communication difficult, and the ordinary traffic for the time wholly impracticable. At Farringdon, in consequence of the continued rains, the lower part of the town is full as far as the eye can reach, in one vast sheet of water. In Biscot, Lechlade, Clanfield, &c., a great number of families are compelled to reside in the upper parts of their houses. At Cricklade, owing to the continual rains, many of the houses in the surrounding farms are under water, labour is quite suspended, and great numbers are thrown out of employment. Salisbury is described as the centre of an extensive lake. Heavy and continuous rains have fallen in most of the districts in the West. Riding on Thursday, Friday, and Saturday last. The rivers in all instances have been unusually swollen; and down towards Goole and Selby the waters have overflowed the banks to a considerable extent, and many houses are being paved under water. Goole stands in almost the same position, cottages on the banks of the river being near submerged in some cases. At Wakefield the current has again been very rapid and swollen. On Friday morning a new "billboy" belonging to Mr. Craven, boat-builder, was washed from its moorings above the large weir, and carried over the dam. A woman was on board, but she was fortunately rescued from her peril ous position on the boat went over.

Notts, and has been visited by another inundation. On Saturday morning last the water had risen three feet since the preceding afternoon; this was in part owing to the immense downfall of rain in Derbyshire and Leicestershire on the day and Friday. Shrewsbury was, by the last accounts, still surrounded with the waters of the Severn. In Montgomeryshire the water rose to within 2½ inches of the height it attained during the memorable season which has ever since been termed the year of the great flood in 1795. There was a meeting held on Monday, at Shrewsbury, of the relief committee and others interested in relieving the poor—the Mayor, Richard Taylor, Esq., in the chair; when it was announced that upwards of £500 had been subscribed, including £50 from George Tomline, Esq., one of the members for the borough.

THE CAMBRIDGE CHESS-CLUB.—This old-established society, which boasts of possessing many distinguished members of the University, and several of the most respectable persons connected with the town, will hold its anniversary meeting and dinner at the Red Lion Hotel, on Tuesday, December 7th. Applications for particulars should be made to G. D. Lyeing, Esq., St. John's College, Cambridge.

THE POPE AND THE QUEEN'S COLLEGES.—Authentic intelligence has at length been received from Rome regard ng the final determination of the Pope to adhere to the decision already announced, prohibiting Roman Catholics from holding any connection whatever with the Queen's Colleges in Ireland. In consequence, the Rev. Dr. O'Toole has resigned his connexion with the Galway College. There is, however, no prohibition against the attendance of the laity at these colleges.

A SCOTCH BARDGAIN.—In the Scotch papers an "eminent publisher" announces a money-prize for the best piece of "poetry for the million" from the pens not to exceed twenty-four lines, to be sent to the publishers, and to be sold at pennets at a shilling the hundred. The man "having the largest sale before 1st February will be entitled to the prize."

The Count de Chambord (Henri V.) was thrown out of his carriage last week, but fortunately received no damage.

MUSIC.

STATE OF MUSIC IN GERMANY.

The subjoined communications from private correspondents, competent to report on the present condition of music in Germany, will be perused with great interest:—

LEIPSIC, November 22.

There has been already much music performed in this town, which is famed as the seat of the celebrated "Gewandhaus Concerte," conducted by the world-renowned Mendelssohn, and now under the direction of David, the violinist (brother of the late Madame Dulcken), and the Danish composer, Gade. These concerts are given weekly, and their programmes are much the same as the old Philharmonic Society in London, with this important difference, that they not only consist of the great works of Beethoven, Mendelssohn, Haydn, Mozart, &c., but the schemes include also the cleverest productions of living composers; and thus every year there are one or two new symphonies, several new overtures, concertos, and cantatas, which last form of writing is now very much in vogue. It is in this region of Germany that the new school is in full force, of which Liszt, the pianist and composer, is the grand priest and protector and Schumann (brother of the late Madame Dulcken), Berlioz, Schumann and R. Wagner (needs of the vocalist) are chiefs and apostles. These three musicians are next of immediate to, even if the possessor of great genius be denied to them by their opponents. That their school contains many defects, there can be no doubt; but art can never retrograde with inquiry, discussion, and novelty. The chief fault I find with their works is that of unmelodiousness (I mean, in German, "*Unmelodisch*"), but their discords go far beyond the boundaries of their masters, and declare that a new era in art has arrived; that all music, like that of Gluck, Mozart, and Beethoven—except the Ninth symphony of the latter, &c.—is old-fashioned, and is merely instrumental, and that real music only began with the Ninth Symphony of Beethoven; and that since that great work nothing has been done, except by Schumann and Wagner, particularly in the two operas of the "Nibelungen," and "Tannhäuser," by the last-mentioned writer. This party is very extensive in Northern Germany, and the public are so led by this style, that it music be not of the most complicated kind, they are not satisfied. Leipsic is the only place where most of the music is printed, you hear nothing but discordances, the principal feature of this school; and you are, indeed, in a state of bliss if, now and then, you can catch the common chord, in this case of frequent occurrence. Mendelssohn is regarded as a much inferior light, and it is with difficulty the admission can be extorted, that some of his works are really fine. Now, I recognise in the productions of Berlioz, Wagner, and Schumann, an earnestness of purpose which calls for esteem, even if we do not concur in all their principles and innovations. I have the highest admiration for Berlioz, though I disapprove of his exaggerations. Wagner is of a very great genius, but I think he will never write only for the stage, and seeks to reform the modern opera. Wagner is more simple in his system than Berlioz, but has not a genius of the latter. The means employed by both are assured by common consent, but may be stated to steer between the two extremes of Wagner and Berlioz. I think his style is more pure and genial; and he is more thoroughly master of the means to accomplish what he desires than his two rivals. I think Schumann, to say, Mendelssohn is regarded as a much inferior light, and it is with difficulty the admission can be extorted, that some of his works are really fine. Now, I recognise in the productions of Berlioz, Wagner, and Schumann, an earnestness of purpose which calls for esteem, even if we do not concur in all their principles and innovations. I have the highest admiration for Berlioz, though I disapprove of his exaggerations. Wagner is of a very great genius, but I think he will never write only for the stage, and seeks to reform the modern opera. Wagner is more simple in his system than Berlioz, but has not a genius of the latter. The means employed by both are assured by common consent, but may be stated to steer between the two extremes of Wagner and Berlioz. I think his style is more pure and genial; and he is more thoroughly master of the means to accomp lish what he desires than his two rivals. I think Schumann's nature is superficial, and he ought to be heard in England. He has written four symphonies, an opera, and innumerable chamber compositions. I have heard the symphony in B flat, which is brought beautiful, and the orchestration is perfect. He has the same faith, however, as Berlioz and Wagner, of elevating the harmony too much at the expense of the melody. It was only Beethoven who knew how to combine both in such perfection. Amongst the new overtures of more ordinary merit I must specify Gade's "Nachklänge Ossland," Schumann's "Genoveva," &c The overtures and symphonies of Lachner are attracting much attention in Vienna.

WEIMAR NOV. 23.

Liszt is actively carrying out his notions for the regeneration of music in Germany. After producing the operas of Richard Wagner, he invited his rivals from Paris, to bring forth the "Benvenuto Cellini," the opera composed for the Grand Opera in the French capital, but which was not successful, so startled were the amateurs at the daring departure from the conventional operatic forms displayed by Berlioz. The two representations here, on the contrary, have proved a signal triumph to Berlioz, who was called before the curtain at the end of the third act with such enthusiasm by the public, that the attendant of the theatre was glad to request the presence of the composer to settle the applause. The Kapellmeister Liszt directed the performance on both occasions. On the 20th instant, Berlioz conducted, at a concert, his "Romeo and Juliet" Symphony (the whole of which was executed), and the two first parts of Spohr's "Last Judgment." The singing Academy of Weimar, for the first time consented to join the artists of the theatre, in order to give more effect to the choruses: the beautiful voices of the lady amateurs were heard to the greatest advantage. At the end of the concert, after several encores and the most rapturous demonstrations, to Grand Duke and Grand Duchess of Saxe-Weimar sent for Berlioz to their box, and after complimenting him in the most gracious manner, the Grand Duke presented on the composer the order of the White Falcon. On the following day Berlioz was invited to dine with the Court by Franck Envoy, M. de Talleyrand being present. Last Saturday the artists of the theatre, as well as a large number of amateurs and strangers from all parts, gave a grand banquet at the Town-hall to Berlioz. The dinner was followed by a ball: at the former, various toasts in German and French were proposed, in honour of art and the artists. The members of the Dinec. Chapel presented, also, to the composer a silver baton, and finally, at three o'clock this morning, the guests went in procession to the station, to see him off, and give him a parting cheer on his return to Paris.

MUSICAL EVENTS.

Mr. G. Forbes, the pianist, gave the second of his St. John's Wood Subscription Concerts last Tuesday, playing with Mr. Blagrove, the sonata, in E minor by Mendelssohn, and a duo concertante by Alexander, and joining Mrs. Thompson (Kate Loder) and Mis's Reid, in a trio by Czerny, for two pianos. The vocalists were Miss Brah, Miss Dolby, Mdlle. Hermann, Mr. Wrighton, and Signor Nappi. For the third concert, on the 15th inst., Madame Lavenu is engaged, as also Signor Belletti and Madame Ferrari, Mr. Lonkey, Regondi, and Mr. W. H. Holmes.——

The Cecilian Society, on Thursday, performed at the Albion Hall, under Mr. Shoubridge's direction, Handel's "Allegro,"——Paris letters state that the debût of Mdlle. Baltramelli, at the Italian Opera, as *Amina*, was not very successful: Calzi hari and Belletti were the *Rivino* and *Count*. Verdi's "Luisa Miller," with Cruvelli as the heroine, was in rehearsal.——The *début* of Mdlle. Caroline Duprez, the daughter of the great French tenor, will take place at the Opéra Comique, in a new work by Scribe and Auber.——The Norwich Choral Society has presented Dr. Beckfield with a tume-piece, to compliment the first performance of the oratorio "Israel Restored," at St. Andrew's Hall.——Miss Louisa Pyne has been delighting the audiences of Edinburgh in English opera.

HOOD MEMORIAL FUND.—On Monday next, a literary and musical entertainment, consisting of selections from the writings of Thomas Hood, will be given at the Whittington Club in Monkton Milnes, Esq., M.P., in the chair—the proceeds to be devoted to the erection of the monument in Kensal-green. The "Bridge of Sighs" and the "Song of the Shirt" are included in the programme of the concert.

THE THEATRES.

ADELPHI.

The long-anticipated version, by Messrs. Mark Lemon and Tom Taylor, of "Uncle Tom's Cabin," was produced on Monday, under the title of "Slave Life." The compilers have aimed at something more than usual, not contenting themselves with placing certain disjointed scenes on the stage calculated to recall the novel from which they are taken, but not to explain the plot to the uninitiated spectator. They have dared to conceive a dramatic unity of their own, and delighted the *materiel* of the romance into a modified expression of an original purpose. New combinations of incidents and characters have accordi gly been effected; such, for instance, as an amalgam between *Tom Loker*, *Haley*, and *Legree*—between *Topsy* and the boy who follows *George* in his escape and adventures—and between *Emmeline* and *Eliza*. *St. Clare*, likewise, is sunk in *Shelby*, while *Cassy* is extended into a pervading guardian personage, worthy of being represented by Mdme. Celeste. *Uncle Tom*, as on other boards, is also on these, shorn of his "methodism;" and, thereby, the character shorn of its chief significance. Thus, the terrible *Legree*, excited to irrepressible passion by his slave's continuney, stabs with a bowie-knife; but is afterwards himself killed in pursuing *George Harris*, the incident being transferred to him from *Tom Loker*, with the addition of a fatal result. The acting is, of course, throughout excellent. Mr. Emery, as *Legree*, had a part which, however repellent, agrees with his style and his ambition, and which he plays with genial earnestness. Mr. Wigan, as *George*, performed the mulatto well, but the American trader better, assuming the latter as a disguise to aid in the deliverance of his wife and child by purchase. Mrs. Keeley was *Topsy*; so, also, was Miss Woolgar *Eliza*, whose escape on the ice is admirably managed, the incidents being arranged for realising the ice-blocks from which the fugitive bounds in succession until she finds safe landing. Mr. O. Smith, as *Uncle Tom*, did his best to supply the necessary incompleteness of the sketch, and succeeded as well as possible. The whole getting-up of this piece is admirable, and it well merited the vehement applause with which it was received. Some of the scenes are novel in their effect. Thus we have a double scene becoming a moving panorama, and changing into one, rendered impressive by a vis tation from *Cassy* to *Eliza*. An arrangement, too, of *Legree's* plantation, whereby the negroes on one side are heard singing psalms, while on the other their master and his guests are at high revel, vociferating curses and profane songs, is very striking. There is also something tragic in *Cassy's* situation, while the drunken monster sleeps, hovering over him with her drawn knife, until prevented by the pious *Tom* from assassination. Altogether, it is but fair to say that we look upon this production as accomplishing the most artistic combination possible of the incidents and interest. The success of these adaptations will unquestionably give impetus to the cause of slave liberation: at any rate they show d make America ashamed of herself for suffering such an anomaly in her institutions to continue, after full experience of its vicious consequences. The house was crowded.

ASCENT OF MONT BLANC.

Mr Albert Smith recommenced on Monday his entertaining lecture, with Mr. Beverley's illustrative views, of his now celebrated ascent. "The Monarch of Mountains" once more appeals to the British public through its old venturous viandant. On the present occasion the room has been most carefully arranged to represent a Swiss chalet, with plants and flowers and appropriate rustic decorations; and the views have been increased in number and effect. One, in particular, is presented between the parts, representative of Chamouni during the late inundation, of which a personal description is rendered in the programme. The entrees in the *Lovres des Voyageurs* still make a favourite part of Mr. Smith's entertainment; and the song "Vellgrum's Messenger" has been modified, including the most salient topics of the latest date.

THE MARIONETTES AT ST. JAMES'S THEATRE.—THE favourite little Troupe who acquired so great a reputation last season at their theatre, Adelaide-street, are to make their reappearance in London, at the St. James's Theatre, on Monday next; and we have no doubt that they will meet with a warm welcome in their new location.

MR. WOODIN'S SERIES COMIQUES AND THE MARIONETTES.—Mr. Woodin's "Carpet Bag" is no sinecure still, and no vain merits to be so. that the Marionettes are compelled for awhile to abandon their prop r home, while the excellent entertainment of that gentleman proceeds, as usual, in Adelaide-street. The Theatre Royal St. James's, from the 6th inst., furnish a stage for the amusing little troupe, whose untiring energies are equal to any effort, and embody foreign inspirations with unerring aptitude. Of the two pieces produced on Monday, the first, in point of subject to no more than a display of hands in favour of Mr. Heald. In the absence, through ill health, of Mr. Fox, Sir J. Walmsley addressed the electors. At the close of the poll on Thursday Mr. Fox was returned by a majority of 111, the numbers being Mr. Fox, 290; Mr. Heald, 784.

DURHAM, at the same time, also met to elect a representative in the room of the late Mr Grainger. The candidates were Mr. Fenwick (Libera.) and Lord A. Vane (Conservative.) The show of hands was in favour of the former. The voting took place on Thursday: the numbers at the close of the poll being Lord Adolphus Vane, 544; Mr. Fenwick, 490: majority, 54.

On Thursday the nomination for BURY, took place, when the show of hands was in favour of Mr. Oakes (Conservative). A poll was demanded on behalf of Mr. Hardcastle (Liberal).

Mr. Francis Macdonough, Q.C., has offered himself to the electors of CARLOW as a candidate for the seat left vacant by the death of the late Colonel Bruen.

The death of Sir John Guest creates a vacancy in the representation of MERTHYR TYDVIL. Mr James, the Chancery barrister, has already taken the field on the Liberal side.

The number of petitions against returns presented to the present Parliament is unusually large, it being no less than 84, and affecting no less than 120 members.

LAW AND POLICE INTELLIGENCE.

THE EMIGRATION CASES.—Captain Lean, the agent to the Emigration Commissioners, waited upon the Lord Mayor, on Monday, for the purpose of reporting to his Lordship the result of the reference of the soldier in cases made to him on the preceding Thursday. His statement was corroborated by Mr. Hu chinson, the broker of the ship *Progress*, in which they expected to have been to sangers to Australia, and Mr. Peachey, of the house of Stevenson, Lavie, and Peachey, who had engaged for the conveyance of the passengers, and gave information to those who had suffered from the disappointment and delay. The sum which had been handed over to the c ptain's amounted to between £1300 and £1400, and they had most gratefully to the Lord Mayor for having so promptly interfered, and to the highly respectable firm of Steve son, Lavie, and Peachey, for having recommended the course of negotiation, which had been, they admitted adopted with a unanimity by Mr. Hutchinson.

FALCAS BETWEEN M.P.'s.—At Bow-street on Wednesday, the Hon. Butler Johnstone, M.P., was bound over to keep his tra. at the next Middlesex Quarter Sessions for an assault on Mr. Benjamin Oliveira, M.P., on Saturday morning, after the discussion on Lord Palmerston's resolutions. The cause of dispute was as to whose right it was to use a cab that each party had hailed.

THE QUEEN *v.* HAMP AND OTHERS.—At the Nisi Prius sittings of the Court of Queen's Bench, on Wednesday, this case came on. It was an indictment for conspiracy to extort money, for the purpose of compounding a felony. The trial arose out of the card cheating case at Brighton, and it was alleged that a cheque for a sum of money, amounting to £400, had been obtained by Hamp from Mrs. Broome, for the purpose of inducing him to abs ain from appearing against her husband for a former case of false cards. The case closed on Thursday, when a verdict of "Guilty" was returned.

LORD FRANKFORT.—Lord Frankfort's case came on on Friday, in the Court of Queen's Bench. He was found guilty of libel, and sen e ced to twelve months' confinement in the Middlesex House of Correction.

THE REVOLUTIONS IN THE RIVER PLATE.

IT will be remembered that in February, of the present year, a successful movement against General Rosas, the Dictator of Buenos Ayres, was made by General Urquiza, President of the Confederated State of Entre Rios. The system pursued by Rosas for a long course of years, had not only been highly oppressive to the other States that, in conjunction with Buenos Ayres, were known under the general designation of the Argentine Republic, but extremely hostile to the trade of all the civilised nations of the world, especially of Great Britain with the rich provinces of the River Plate and its numerous tributaries. An account of the two battles—the one by land, the other by sea—which led to the downfal of Rosas, will be found in the memoirs of Urquiza and Admiral Grenfell, which follow in another part of our paper. The fall of Rosas was hailed with almost universal acclamation; and the Free-Trade policy established by his successor tended greatly to increase the satisfaction of the commercial community with this new solution of Argentine politics. Urquiza, however, has not long held the reins of power. The new revolution—not headed, however, by the partisans of Rosas, but by a new party in Buenos Ayres, more anxious for the separate nationality of that republic than for a confederation with Entre Rios and Santa Fé—has broken out, the result of which is that Urquiza has retired to his own Republic.

The intelligence last received, and announced in our Journal of the 20th ult., is interesting. The following are the details:—

On the 11th September, while General Urquiza, Provisional Director of the Argentine Confederation, was on his way to Santa Fé, to meet Governor Cabanas, the Buenos Ayrean party, consisting chiefly of members of the Parliament which Urquiza lately dissolved, seized the Government.

The revolution was of both a military and civil character, and was headed by Generals Pinan and Madariaga.

At midnight of the 10th, two Correntino battalions formed in their barracks in the Retiro-square, headed by General Madariaga and a brigade of artillery, under the command of Commandant Solano, and came to Victoria-square. The battalion stationed in the fort, under the command of Colonel Tejerina, and the battalion San Martin, under that of Colonel Echagaracia, followed and formed in the square before daybreak. During the night, the officers of the Correntino division of cavalry were engaged with the requisite secrecy in providing horses for the discharge of the service. Shortly after, the same division, under the command of Colonels Haynes and Ocampo, arrested General Virasoro and Urdinarrain, known to be faithful to Urquiza. Before daybreak, the Cabildo bell was rung, to assemble the people in the square.

In consequence of these proceedings, the late Chamber of Representatives assembled in the forenoon, and having recognised the movement, declared themselves reinstalled, and elected General Pinto Governor of the province, who has named Dr. Alsina Minister General.

On the 14th the Government issued a decree, calling under arms, within 24 hours, all citizens capable of serving in the National Guards, as well as those who were already enrolled, and appointing Bartolome Mitre colonel of the corps. On the 15th, General Flores, commandant-in-chief in the north, joined the Government, with 1600 men. A considerable displacement of troops now took place, with a view of preparing for the retaliatory measures of Urquiza; but they proved unnecessary. The General having heard of what had taken place, sent off Colonel Baez to Buenos Ayres, to state to the Government that General Urquiza ordered all the Entre-Rioano troops then at San Nicolas to embark for the province of Entre Rios, that he commanded the Scottish ian forces to retire back, and left the Government of Buenos Ayres in the full enjoyment of its rights; that he wished this movement to be concluded without a single shot being fired between Argentines; that he requested General Urdinarrain and the Entre-Rianos forces to be conveyed to their provinces with their arms; and, finally, that he does not wish to see them destroyed by anarchy.

It appears that no blood was shed in this revolution, General Urquiza preferring to leave Buenos Ayres rather than sacrifice human life.

Thus, although Urquiza has thus retired from Buenos Ayres, he has not resigned the direction of the Confederation. The *Uruguay Nacional* of October 2, contained Urquiza's circular to the foreign Consuls, dated Paraná, September 25, in which he speaks of what has happened at Buenos Ayres as a thing of no importance; and announces his attention of leaving that province to take its own course, directing them to treat exclusively with him in all that may concern the foreign relations of the Confederation: and the entire fleet is to be destined to instal the Sovereign Congress, assuming for himself the style and title of Director.

A letter official despatch, dated San Nicolas, Sept. 20th, says:—"At this hour, quarter past six P.M., the compromise is fulfilled which General Urquiza had contracted with the province and the Republic, of retiring from the political scene, and leaving the province of Buenos Ayres the free mistress of its destinies."

A late commercial circular of the house of John Galt Smith and Co., of Buenos Ayres, dated the 30th of September, states as follows in reference to these events:—

Since our last respects, important political changes have occurred in this country, which with instant flattering results to the Argentine Confederation, have taken place. Urquiza has left Buenos Ayres, and the Congress: he was not popular, and reports got abroad that a rising was looked for against his power, which was realised on the morning of the 11th, and completely successful, the people being unanimous. He has since retired with his army to his own province, Entre Rios, giving up all interference with the affairs of the Confederation, and this Government have confirmed all the Free-Trade measures which had been in force previously. Business is going on as if nothing had happened, and will be better, as all parties have united and done away with their party distinctions which have been so injurious to the country. We give this explanation that our friends may feel tranquil.

GENERAL URQUIZA.

GENERAL DON JUSTO JOSE DE URQUIZA is a native of Entre Rios, and was born about the year 1800. He is of middle height, strong and well made, and of active and temperate habits, neither using wine nor smoking tobacco. Since the year 1840, Le has been Governor of the province of Entre Rios, which he has ruled with singular ability, transforming it from a state of general confusion and ruine to be a model of order and security.

As General of the Argentine Confederation, Urquiza commanded a division under General Rosas, during the civil wars against the Unitarian chiefs, Lavalla and Fructo Rivera, when he completely routed the latter, at the battle of Indas Muertas, in 1846.

The policy and acts of Rosas, and his system of eluding the federal principles to which Urquiza was devoted, at length decided him to join the forces of Entre Rios and Corrientes to those of the Empire of Brazil, and to put an end to a tyranny that had for twenty years disgraced the Argentine Confederation.

When Admiral Grenfell, of the Brazilian navy, first met Urquiza, at Gualeguachu, in June, 1851, he had no force in the field; but he assured the Admiral that if the Brazilian squadron would keep the rivers Paraná and Uruguay from the Buenos Ayrean fleet, Urquiza would, in eight days cross the Uruguay with 5000 cavalry, and march on the army of General Rosas, which, 8000 strong, commanded by General Oribe, maintained the siege of Monte Video. Sure of the co-operation of the Brazilian forces, he gave orders for the immediate assemble. In few days, 6000 men presented themselves armed and equipped with four horses each for remounting, and all this without the expense of a single dollar; the recompense for this service being the protection of their families and property, and the only allowance for the campaign to officers and men, being one head of cattle for each hundred men daily, as rations.

In a short campaign, peace was restored to the Banda Oriental; the siege of Monte Video raised, and all ready to commence operations against Rosas; who declared war against Brazil and her allies; and decreed by a law that Urquiza was a savage Unitarian, a madman, and a traitor, worthy to die.

The Dictator determined to pursue a policy diametrically opposed to that of General Rosas, immediately abolished the odious legend and device in the public acts and correspondence of "Death to savage Unitarians!"

Urquiza possesses moral courage in a high degree. On the surrender of the troops of Oribe, before Monte Video, in October, 1851, Urquiza had his tent pitched in the midst of them, encamping his own cavalry at a considerable distance and out of sight. He afterwards embarked with Admiral Grenfell in the Brazilian steamer *Alfonso*, bringing with him 1200 of his late enemy's infantry. Admiral Grenfell took every precaution, but it was not without serious apprehension that he saw his ship, his person, and that of the General-in-Chief at the mercy of the soldiers of Rosas. Such, however, was the moral influence of Urquiza, and the effect of his courage, that no one dared to think of revolt.

Urquiza's punctuality and combination are admirable. On separating from Admiral Grenfell on the Uruguay, in November, 1851, he told them he would reach the Paraná at Diamante, distant by land about 300 leagues below Santa Fé, on the 20th of December. Much was to be done—infantry, cavalry, artillery, and ammunition had to be transported a great distance, and across many rivers.

General Madariila, with a division of the Buenos Ayrian army, had fortified the pass of the Tonelero, on the principal branch of the Paraná. The pass, however, was forced by the Imperial squadron; and on the evening of the 19th of December the squadron reached El Diamante, three hours after the arrival of the General. On the day appointed, the passage of the troops commenced.

At the final triumph at Monte Caseros, General Urquiza displayed no ordinary military talent. Rosas awaited him in a strong position at Monte Caseros, with 20,000 men and 60 guns, thinking that Urquiza's excellent cavalry would be of no use against entrenchments and artillery. In fact, Urquiza had no other infantry than that formerly belonging to Rosas, of whose desertion the latter was sure.

The whole strength of the Brazilian Cabinet, for the purpose of avoiding the renewal of the ancient antipathy of the Portuguese and Spanish races, was to leave as much as possible to the Argentines the decision of the question.

Urquiza, however, requiring the assistance of the Brazilian army. 15 000 men of all arms were ready to embark at Colonia in front of Buenos Ayres; but only the first division, commanded by Baron de Porto-Alegre, and composed of 3000 infantry, 500 cavalry, and 12 guns, effectually crossed the river, and assisted Urquiza in the battle of Monte Caseros. It is just to mention here that not a single man of Holstein cavalry ever existed in the Brazilian ranks; and that the 2000 infantry and artillery of Holstein engaged in 1850 were at Colonia with the whole army of Baron de Caxias. Only 50 men were distributed in the ranks of the first division, to try their mettle.

Rosas exhibited great talent in the choice of his position, and in the distribution of his troops. His right was defended by a marsh; his centre occupied the rising grounds and fortified buildings; and his left extended to some enclosures and a wood. His infantry and artillery formed his front line, his cavalry being kept in reserve in rear of his left and centre.

Urquiza prepared to attack them in the following manner: On the right was General Virasoro with the Correntino division; in the centre, General Baron de Porto-Alegre, with the Brazilian infantry, and on the left the Oriental infantry, under Colonel Cesar Dias. The entire army was composed of 22,000 men, and 90 guns. The whole of the cavalry—12,000—were massed by Urquiza, in one body, being the vanguard to the 2nd regiment of the Brazilian Lancers, under Colonel (now General) Osorio. All the troops advanced simultaneously against the enemy.

The Brazilians, in columns of battalions, advanced steadily against the centre, in the face of the fire of the fifty pieces of artillery, concentrated against them. As soon as the action became general along the line, Urquiza, with the whole body of his cavalry, fell on Rosas' left, broke through it, and charged the cavalry in the rear, putting them to

THE LATE REVOLUTIONS IN THE RIVER PLATE.

GENERAL DON JUSTO JOSE DE URQUIZA, GOVERNOR OF THE PROVINCE OF ENTRE RIOS.

VICE-ADMIRAL GRENFELL, OF THE IMPERIAL BRAZILIAN NAVY.

rout, and following them in hot pursuit to Buenos Ayres. The 50 guns were all taken by the Brazilians at the point of the bayonet; but the greatest glory of these fine troops was in this outcry of the vanquished —"Surrender to the blue pants (the Brazilians)—they don't kill their prisoners."

A body of troops, occupying one of the fortified houses, refusing to surrender to the Orientals, the General deputed to them the Brazilian Captain, Petra, and they immediately laid down their arms. Altogether, the 8000 Brazilians took 5000 prisoners.

The use made by Urquiza of his power for the purpose of securing the liberty and prosperity of his country is well known. This conciliatory and enlightened policy is proved by his abolition of punishment by death for political offences; the restoration to his mortal enemy, Rosas, of all his confiscated property; and the opening of the rivers to the commerce of the world. Notwithstanding the result of the recent revolution in Buenos Ayres, in the history of the Argentine Confederation, the appearance of this distinguished chief must always be considered as the opening of a new era of progress and civilisation.

VICE-ADMIRAL GRENFELL.

It has ever been a source of pride to consider the great influence which the sons of England have exercised in foreign countries in the establishment of those principles of liberty and civilisation to which the prosperity of this country is due.

The services of Lord Byron to the Greeks; those of Lord Cochrane to the independence of Chili and Brazil; the influence of the British Legion in the liberal cause of Spain; and the immense assistance ren-

THE BATTLE OF TONELERO. "AFFONSO" STEAMER, ADMIRAL GRENFELL.

dered to Donna Maria by Admirals Sartorius and Napier, are yet fresh in our minds

One of our most conspicuous countrymen engaged in foreign service is Vice-Admiral Grenfell, of the Imperial Brazilian Navy, who has recently arrived in England, after his brilliant achievements in the River Plate, in the last struggle between civilisation and liberty sustained by the ruling Prince of Brazil and his allies, against the dictator Rosas.

John Pascoe Grenfell is the son of Mr. John Granville Grenfell, of the city of London, and was born at Battersea, in the year 1806.

In 1812 he entered the naval service of the Honourable East India Company, in which he continued as Midshipman and Mate until the year 1819, when he joined the navy of the Republic of Chili, and served as Lieutenant with Lord Cochrane, now Earl of Dundonald, during the Peruvian War of Independence. In 1820 he commanded one of the boats at the boarding and cutting out, from under the Castles of Callao, of the Spanish frigate *La Esmeralda*, on which occasion he was severely wounded. In 1823 he accompanied the Earl of Dundonald to Brazil, and entered the service of that empire, then engaged in struggling with Portugal for its independence.

He assisted at the reduction of Bahia and Maranham; and from the latter place was detached by Lord Dundonald, with the rank of Commander, in a captured brig of war, to attempt the liberation of the province of Para. In this he completely succeeded, taking possession, in the harbour, of a 50-gun frigate, and several other armed vessels.

In 1826, when Brazil was at war with Buenos Ayres, he commanded, with the rank of post-captain, one of the Imperial squadron in the River Plate; and lost his right arm, at the shoulder joint, in an action with the Buenos-Ayrean Admiral Brown.

In 1830, he commanded one of the squadron which escorted to Brazil the Empress Donna Amelia and the Queen of Portugal, Donna Maria II.

In 1842, he was appointed to the command of the naval forces on the lakes of the province of Rio Grande do Sul, where a rebellion was on foot. In this command, his usual success attended all his operations. The rebel flotillas were successively attacked and captured, the enemy driven from their positions; and, in October, 1836, the principal rebel chiefs, with a division of their army, all the artillery and baggage, were compelled to surrender, in the Island of Tamfa, in the River Jacuinay.

In the disastrous campaigns which followed, the naval forces mainly sustained the cause of the Empire. In 1841, Captain Grenfell was promoted to the rank of Rear-Admiral, and continued commanding on the Lakes until the re-establishment of the Imperial authority in the province by the Count de Caixas, in 1844, when he was appointed to command the squadron in the river Plate, having on this occasion obtained her Britanic Majesty's permission to continue in the Imperial service.

In 1845, he was appointed to command the squadron which conveyed their Imperial Majesties to the southern provinces of the Empire. In this squadron were incorporated her Britannic Majesty's ship *Grecian*, the United States' ship *Raritan*, and her most faithful Majesty's ship *Don John II*.

The Admiral now desired repose; and his services in the navy not being required, he obtained the appointment of Consul-General in England, with residence in Liverpool, and was entrusted to superintend the construction of two steam-vessels of war for the Imperial navy. In the first of these, the *Affonso*, commanded by Captain J. Marques Lisboa, in company with his Royal Highness Prince de Joinville, he assisted at the rescue of the passengers from the burning wreck of the *Ocean Monarch*, for which he received a gold medal from the "Shipwreck Society" in Liverpool.

In 1851, when the war with the Platina States broke out, Admiral Grenfell was recalled to Brazil, and appointed Commander-in-Chief of the squadron in the River Plate. At the head of one of its divisions, in the month of December last, after a sharp action, he forced the passage of the River Parana, defended by the forces of General Rosas, and, co-operating with the allied army under General Urquiza, materially contributed to the overthrow of the Argentine ruler. We give an Illustration of the forcing of the pass of Tonelero, in which our readers may recognise the Admiral standing on the larboard paddle-box, exposed to the full fire of the enemy.

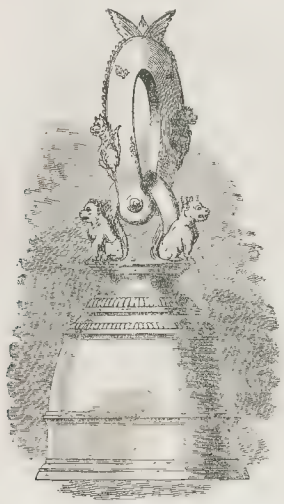
For his brilliant services, Admiral Grenfell has been raised to the rank of Vice-Admiral of the Brazilian Navy, made a Grand Cross of the Imperial Order of the Rose, a Dignitary of the Order of the Southern Cross, and decorated with two gold medals for the wars of the Independence and the River Plate. He also enjoys a well-earned pension from the Government. He was married in 1829 to Donna Dolores Maani of Monte Video, and has a numerous family.

His fine manly form, and handsome but weather-beaten countenance, were distinguished during the late solemnity in St. Paul's, among the Foreign Ambassadors.

THE BURMESE WAR.—THE DAGON PAGODA, AT RANGOON.—(SEE NEXT PAGE.)

THE BURMESE WAR.

We have been favoured by a Correspondent with the accompanying Sketch of the Bell captured by the British troops at the storming of the Dagon Pagoda, at Rangoon, where it formed one of the most costly ornaments which decorated that beautiful pagoda. The probable value of the Bell is estimated at £17,000 (about 170,000 rs.), which is not to be disbelieved when it is known that the Burmese largely contribute to their bells by casting into the crucible containing the metal, gold and silver, and thus greatly enhancing the value of their bells.



BELL OF THE GREAT DAGON PAGODA, AT RANGOON.

The barque *Defiance* conveyed the Bell to Madras; and it is intended that it should find a resting-place at St. Thomas's Mount, a small cantonment about eight miles from Fort St. George, and the head-quarters of the Madras Artillery. W. E. F.

The lower Illustration on the preceding page shows the great Dagon Pagoda, at Rangoon wherein this valuable Bell was kept. The sketch was taken a few days after the capture of Rangoon, already detailed in our Journal.

The following news from Rangoon we take from the *Hurkaru*:—

RANGOON, October 3rd and 4th.—The three river steamers just arrived are loading with the horse-battery brought by the *Hermes*, and are putting up stalls for the cattle. Two adventurers have left us to diligently surveying the quality and capabilities of the land. Their first object is to establish indigo factories, if possible, and then to extend agricultural experiments as far as the soil will admit of. The arts of peace are being pursued at Rangoon, while the sanguinary banner of war is about being unfurled over Prome. The engineer officers who are left behind are busy planning surveys and preparing plans for making Rangoon into a Retiro, Barrackpore, town. Old roads are being repaired, a net-work of drains to admit of being cut, and new thoroughfares are in progress of being undertaken. Major Fraser has come up to exercise his architectural skill in the construction of barracks, godowns, &c., in the "up-country stations;" and Lieutenant Fraser, who takes his place in Rangoon, is diligently occupied in the municipal and conservancy work.

THE COURT.

On Saturday last her Majesty held a Privy Council at Windsor, which was attended by the Ministers; and afterwards a Court was held.

On Sunday the Queen and Prince, the Prince of Wales, the Princess Royal, and Prince Alfred, the Duchess of Kent, the Prince of Leiningen, and the Princess Adelaide of Hohenlohe, with the ladies and gentlemen of the Court, attended divine service in the private chapel of the Castle.

On Monday her Majesty and the Prince, with the Royal children, accompanied by Princess Charlotte of Belgium and the Prince of Leiningen, left the Castle, for Osborne, where her Majesty arrived in safety at two o'clock; since which day, the Royal Family have been staying there, in the enjoyment of good health, and taking their usual exercise.

The Court will return to Windsor on the 2nd inst., for the Christmas holidays.

His Royal Highness the Duchess of Gloucester has arrived at Gloucester House from Brighton. His Royal Highness the Duke of Cambridge visited Her Majesty yesterday at Osborne.

His Excellency the Prussian Minister gave a grand entertainment on Thursday evening, at the residence of the Prussian Legation, on Carlton Terrace, Pall-mall, to his Royal Highness the Duke of Cambridge, Viscount Hardinge, Commander-in-Chief, the Earl of Malmesbury, and a distinguished circle, invited to meet the Prussian Generals deputed to attend the funeral of the late Duke of Wellington. Madame Bunsen, on this occasion, opened her saloons for the first time since the extensive alterations effected in the mansion. A very numerous circle of the *corps diplomatique* and aristocracy were present.

The Earl and Countess of Derby gave a grand dinner, on Saturday last, at the noble Earl's official residence in Downing-street, to the representatives of foreign Sovereigns and armies deputed to attend the funeral of the late Duke of Wellington, and the distinguished guests. The dinner was served in the banqueting-room, and the guests appeared in uniform. After the banquet, the Countess of Derby had a "reception," at which a very brilliant assemblage of the aristocracy congregated.

OUR NATIONAL DEFENCES.

Orders have just been issued for the enlistment of 2000 additional artillerymen, and for the purchase of 1000 horses, which are to be exclusively appropriated to this branch of the service. Nor is this all. Vigorous measures are in progress for the construction of so many carriages and ammunition-waggons as may be requisite for 200 field guns. At the present rate of preparation these batteries will be ready for service by the latter end of winter, or early in the spring; but if any greater expedition were necessary, the time of preparation could be very materially shortened.

It is true, the 5000 men proposed this year as a reserve for the navy, will be added to the regular force of seamen for 1853-54; and the *Herald* says the vote for steam-machinery will be comparatively enormous. During the last two or three years a vote only of £50,000 has been taken for steam-machinery. We believe that, awake to the requirements of the service, no less a sum than £380,000 will be demanded by the Government for steam-machinery alone, to restore the Royal Navy to its proper position. Messrs. Penn and Co., and Messrs. Ward, by all reports ordered to construct new machinery for eight of the line-of-battle ships in course of conversion. Orders have recently been issued to essen the progress of contracts for commencing the construction of the batteries in the Isle of Wight, and to expedite the works as much as possible. It is proposed in the new estimates to add to the present strength of the Royal Marines 1800 men.

PROMOTIONS IN THE LIST OF THE SURVIVING WATERLOO OFFICERS.—(Gazette, Nov. 26.)—Major-General W. Dyrne (27th Foot); Captains William Wharton (half-pay), Knight (half-pay), Lieutenants E. W. Drane (27th Foot), W. D'Arcy (1st Dragoon Guards)—Ensigns Henry Lascelles (now Earl of Harewood), and G. Thomson Jacob (1st Regiment of Foot Guards).

CALENDAR FOR THE WEEK.

SUNDAY, December 5.—Second Sunday in Advent. Mozart died, 1792.
MONDAY, 6.—St. Nicolas.
TUESDAY, 7.—Algernon Sidney beheaded, 1683.
WEDNESDAY, 8.—Conception of B. V. Mary. Mary Queen of Scots born, 1542.
THURSDAY, 9.—Cadley Cobbet died, 1792. Gay died, 1732.
FRIDAY, 10.—Charles XII. killed, 1718.
SATURDAY, 11.—Louis XVI. brought before the National Convention, 1792.

From the great demand for the ILLUSTRATED LONDON NEWS of last week, and the extra time required in working the Large Print, we are compelled to defer until December 11 the Double Number announced for this week, with the Large Interior View of St. Paul's, GRATIS.

The Large Print of the Wellington Funeral Car (which has been thus unavoidably delayed) will be delivered as soon as printed.

Another Large Print, of the entire Funeral Procession, is in the engravers' hands, and will speedily be presented, GRATIS.

The WELLINGTON SUPPLEMENT of SATURDAY, DECEMBER 11, will contain the following Engravings:—

The Funeral Procession passing the Athenæum and United Service Club-houses, in Pall Mall.
Arrival of the Car at St. Paul's Cathedral. (Two Pages.)
Temple-Bar, the Night before the Funeral. Drawn by Dodgson. (One Page.)
The Duke's Barons.
Portrait of the Duke, by Isabey.
Portrait of the Duke, by Pellegrini.
Room in Dangan Castle, where the Duke was born.
The Duke's First School at Trim.
The Duke's Coffin in the Crypt of St. Paul's Cathedral.
The Hero and his Horse at the Field of Waterloo.
The Duke receiving the Thanks of the House of Commons.

Also, the Number, with Illustrations of the Proclamation of the French Empire; Sketches of the War in Burmah; the Smithfield Club Cattle Show; and all the News of the Week.

Price of the Number and Supplement, ONE SHILLING; with the LARGE PRINT of the INTERIOR of ST. PAUL'S, GRATIS.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, DECEMBER 4, 1852.

OUR readers will excuse us for making a few observations respecting our labours during the last week; the more so, as we have to express our regret for the disappointment which we fear has been experienced by many news-agents, and by our subscribers throughout the country. At the last moment, an accident happened to our machinery in working the Large Engraving of the "Wellington Funeral Car." It took a considerable time to repair the unfortunate damage which was thereby occasioned, and to get the Plate to work again. Ultimately, however, the difficulty was surmounted, and the re-issue of the Engraving has been going on during the present, and will be continued in the approaching week; so that all purchasers of our Journal of the 27th November, yet unsupplied, may receive the Print on application to their respective news-agents.

From the extreme and unprecedented demand, many of our subscribers have, we fear, not only been disappointed in the receipt of the print, but of their papers also. We are bound to state, in explanation, that every exertion has been used to meet the demand; and that every arrangement possible has been made to prevent irregularity in the delivery. We may add, that never, since the establishment of this Journal, in the year 1842, has there been anything like the public excitement which has been created on the occasion of our Wellington Numbers. At the commencement and during the progress of the Great Exhibition, so large was the demand for our paper, that all the mechanical resources at our command, or to be obtained in London, proved inadequate to the emergency. But since the commencement of our Wellington Series, the public excitement has proved far greater than even at that memorable period; and though working night and day, without a moment's cessation—with fresh relays of hands, and at the fastest possible rate at which steam could impel our machinery—we have been unable within the week to meet the week's demand, and the public, and have thus been compelled to prepare for the publication of a new number of our Journal long before the extraordinary demand for the previous one had been supplied. So great were the public curiosity and eagerness to receive early copies of the ILLUSTRATED LONDON NEWS, especially during last week and the week previous, that instances have been reported to us in which copies were sold at sums ranging from Five Shillings to five shillings, although the regular price, as announced, was one shilling only. We may state, too, as an interesting fact in the history of newspapers, that, for our Double Numbers and Grand Supplements of the last two weeks we required the unprecedented number of nearly 2,000,000 (two millions) stamps!

THE marvellous drama of French politics approaches its climax. Louis Napoleon has been voted to the Empire, by the requisite number of millions. Frenchmen, drilled into obedience to the central authority, whatever it may happen to be, have with acclamation voted away for a time—and for a time only—the liberties of their country. That great nation—so intelligent, so refined, and so impatient—lies slavishly at the feet of a man who has neither the *éclat* of ancient pedigree, of personal prowess, or of approved genius, to recommend him to their admiration, their respect, or even their acquiescence. By an extraordinary concurrence of events, aided by the inordinate fears of a middle class, that more than any other in Europe deserves to be stigmatised as a *classe bontiquière*; and by the fears, animosities, jealousies, and, we may say, necessities, of contending and bitterly hostile factions; and, to a large extent, by the sublime daring of a cool-headed adventurer, France has accepted for her despot a man whose greatest merit consists in his being the representative of a name and of a system that were not allowed to die peaceably of out nearly forty years ago. There remains but one scene to be enacted in the great drama, before the spectators will be so far satisfied as to confess that the play has been duly played. Louis Napoleon must not only be Emperor in name, as he has for a twelvemonth been in fact; but he must be crowned, as the first Napoleon was, with all befitting pomp and ceremonial, by the Pope, in the Cathedral Church of Notre Dame de Paris. Any other affirmation of his dignity, any other completion of his astounding career would lack in his own eyes, and in those of Frenchmen generally, the natural and expected fulness. At present the Pope is said to manifest much coyness, if not reluctance, to yield to the entreaties that have been made, that he should transfer himself from Rome to Paris for this purpose. When it is remembered, however, that the Pope owes all his temporal power to Louis Napoleon and the French army, there is little room for doubting that he will yield to the arguments of his powerful protectors. His refusal might please the young Emperor of Austria, but the Pope would scarcely be unwise enough to weigh that advantage—if advantage it be—against the positive danger of offending the man who, far more than Austria, upholds him in his position as the chief magistrate of the Papal States. To England—and, in fact, to all the other Powers of Europe—the coronation of Louis Napoleon by the Pope, is a matter of as much indifference as any other spectacle that has been provided in France during the last four or five years. Indeed, we believe that some disappointment would be felt in this country if the Pope did not accede to the new Emperor's wish. It would seem hard and inappropriate if the man who had succeeded so wonderfully in every other object of his ambition, should be foiled at the very apex of his fortunes in to essentially unimportant, but so theatrical a matter as this.

It is probable that the inauguration of the Empire will be the signal for some relaxation of the stringency of despotism which France has suffered since the 2d of December, 1851. Having conquered all enemies, surmounted all opposition, and arrived at the summit, seen afar off, and painfully but successfully reached, Louis Napoleon may find it politic to try the Imperial virtues of clemency. It is time that the French nation should be allowed to breathe a little. A homœopathic allowance of freedom of opinion might be safely conceded, and an amnesty to such political enemies as the banished generals of the Algerian army, and even to such literary hot-heads as M. Victor Hugo, might strengthen rather than weaken the props of the new throne. But Louis Napoleon has worse foes to fear than these, however virulent they may have been. He has a growing deficit in the national exchequer; he has a greedy army, that he can neither afford to keep idle nor to employ; and he has theorists and speculators—Hebrew and Christian—who are precipitating the country into the bottomless vortex of a stock-jobbing and money mania. A State Bank, licensed to issue paper money to any conceivable extent that it pleases—the shares of which, before it has commenced its operations, are selling on the Bourse of Paris at a premium of 400 per cent,—is a danger far more real than the Socialism which the Emperor and his advisers have turned to such remarkable account. Such a bubble as that will not collapse without mischief; and the finances of France are not at present in a condition to be trifled with.

PROJECT FOR THE PROMOTION OF THE ARTS.

SECOND REPORT OF THE COMMISSIONERS OF THE EXHIBITION, 1851.

The gracious recommendation of her Majesty to the House of Commons at the opening of the session, that they should take into consideration measures for the promotion of the Fine Arts in this country, has been followed up by a "Second Report of the Commissioners for the Exhibition of 1851," which throws some light upon the views entertained by those who may be supposed to have prompted that suggestion. Seldom has a more important document—important as involving the interests of the whole scientific and industrial community of the empire—been laid before Parliament, and it will doubtless receive much attention both from the Legislature and from the country at large. It propounds the first step towards a very useful object—a grand and combined movement for the advancement of Science and the culture of the Arts upon a scale never before attempted in any country in the world; but it is not too much to say, as the very outset, that upon the amount of wisdom and practical talent which marks such first step, must entirely depend the amount of co-operation which the enterprise may expect to receive from the practical intelligence of the people; and, as a consequence, its ultimate success or failure.

We need hardly remind the reader that this second Report, and the project which it sets forth, are due to the fact, that the Commissioners of the Exhibition of 1851, finding themselves, after the termination of that Exhibition (most unexpectedly), with a considerable surplus in their hands, supplied to the Crown by, and obtained, a further charter, empowering them to devote "a scheme for the application of such surplus, in accordance with the expectations held out to the public" in connection with the Exhibition itself. Armed with this power, the Commissioners received suggestions from a great number of public institutions, local committees, and individuals, as to the best mode of disposing of the surplus. Mechanics' institutions, twenty-seven in number, all recommended the establishment of mechanics' institutions, or schools of design, or both, amongst populous communities; eight memorials from "manufacturing" districts were for a Central College of Arts and Manufactures in connexion with provincial schools; the local committees of six towns urgently applied for the return, of the amounts respectively subscribed by them (one suggesting a bonus in addition), for the establishment of local schools; and, lastly, forty-six individual or corporate memorialists suggested divers plans—a great proportion of them being for grants for local purposes: upon all which conflicting advice the Commissioners state—

We are of opinion that the surplus should be applied in further aid of one large institution devoted to the purposes of instruction, adequate to the extended wants of industry, and in connexion with similar institutions in the provinces, it would be productive of important results; whilst, if subdivided amongst many local institutions, as suggested by some of the memorials (such as those for Warrington, Blackburn, &c.), the effects produced would be comparatively insignificant.

They then come to the conclusion that London, or the neighbourhood thereof, is the fittest place for this central institution, to which the National Gallery, and, as it seems, great part of the contents of the British Museum are to be removed; and they also are of opinion that a great saving in rental, and great convenience to individual members, would result from bringing into juxta-position, as part of this large central institution, the learned and scientific institutions of the metropolis, of which, all above one hundred in number, at present located in various parts of the town. The extent of ground required for such a comprehensive project would not be less than 80, and might more properly be 180 acres; and the Commissioners, considering that the obtaining of such a site would be one of the greatest difficulties in the way of carrying out their project, proceed to apply the whole of the surplus in their hands towards purchasing ground which they deem well adapted for the purpose. They have not ventured upon this step, however, without first obtaining a promise "that her Majesty's Government would engage to recommend to Parliament the contribution of a sum of like amount towards the purchase contemplated, *either for account of the Royal Commission, or for the joint account of the Commission and the Government, or for division between them, as might afterwards be determined*." And hence the passage in the Queen's speech, specially addressed to the "Gentlemen of the House of Commons," which always implies a pecuniary requirement.

In a word, the Royal Commissioners, with a surplus of £170,000 in hand, have commenced by purchasing the Gore House estate, at Kensington (21½ acres in extent), for £60,000; and have contracted for the purchase of the Villiers estate adjoining (being 48 acres in extent) for £183,500—of which latter sum, upon the faith of the Government pledge, they have paid £15,000 as a deposit. The total space thus secured by them is about 70 acres, at a total cost of £218,000. The Government stands pledged to go halves in an outlay of £200,000 for land, so that nearly £100,000 remains as yet unappropriated. This sum, it is right to notice, however, the Commissioners do not consider adequate to the requirements of the case; for, in a subsequent passage of their Report, they recommend a further purchase of neighbouring ground, making, with that already purchased, about 100 acres so that the total cost of the Land alone wherein to establish the projected institution may be set down in round numbers at £300,000, of which the Commissioners say they have

With regard to the apportionment of the land, the expenses of building, &c., the Commissioners do not define anything at present; they vaguely suggest, however, that they look for the collection of the necessary funds to that old and truly British resource—"voluntary contributions."—

We propose to trust (they say) for the carrying out of our plan to the same principles which have governed the progress of large and undertakings in England, that is, by appealing to the public with a limited sum of money in hand, and leaving it to the voluntary efforts of individuals, corporations, and authorities, to carry out the promotion of the different interests with which they

are themselves connected, on which they are dependent, and of which they are therefore, the best guardians and judges.

Now, without for the present going into an examination of the abstract merits of the scheme itself, in which we see many points open to contention, we must say at once that its financial prospects, as defined in the above passage, are not such as to give earnest of success. We can hardly believe that, in absence of some more definite and tangible security, the House of Commons would consent to make a preliminary advance of £450,000. It would be vain and useless to disguise the difficulties of a case like this, and the complexion which it must naturally wear in the sight of a plain-going public would be to affect to overlook the fact—which is the very essence of the whole proceeding—that a commission specially appointed for a specific object, long completely carried out, now seek to be created a permanent commission, with enormously increased powers, influence, and patronage; and with a trust capital augmented out of the public funds, in the very first instance, from £180,000 to £500,000. This is a position suggestive of jealous comment; but we shall indulge in none, preferring to leave the matter in the meantime to the House of Commons.

WELLINGTON DOUBLE NUMBERS OF THE ILLUSTRATED LONDON NEWS.

(To the Editor of the ILLUSTRATED LONDON NEWS.*)*

Sir, Fearing that an imposition has been put upon the public by the vendors of your interesting paper for the last two weeks, by demanding the increased price of 1s. 6d., and in many instances 2s., for such Double Number, *the reason assigned being that the extra charge had been made at your office to themselves*, I take the liberty of informing you thereof, and asking if such be the fact or not? I am led to doubt this statement from seeing the usual price named in the title-page as hitherto.

You will, of course, understand that I do not question whether the Double Number be really worth the money. I have paid it myself readily rather than go without one.

I am, Sir, your most obedient servant,

J. F. G.

[NOTE OF THE EDITOR.—We publish the above letter—one of many that have reached us upon the same subject—in order to state emphatically, for the benefit of our subscribers generally, that no extra charge is made to the trade for our Double Numbers. If our friends and subscribers do not receive copies for One Shilling, it is a matter that entirely rests with the news-agents from whom they receive their supplies.]

POSTSCRIPT.

HOUSE OF LORDS.

On Friday the Earl of Clancarty and the Earl of Bradford took the oaths and their seats as members of that House.

IRISH NATIONAL EDUCATION.—The Earl of CLANCARTY having referred to a petition presented in the early part of the week, by the Earl of Carnarvon, purporting to come from certain Presbyterian clergymen in the north of Ireland, who expressed their approval of the present system of education in Ireland, and prayed that no alteration might be made in that system, said he regretted to hear the noble Earl at the head of the Government say that there was no intention on the part of Her Majesty's Ministers to make any alterations in that scheme. He wished to ask the noble Earl whether he would have any objection to the appointment of a Committee to inquire into the working of the system, with the view of making such amendments in it as would be found, upon inquiry, to be advantageous, and such as would render national education in Ireland more in harmony with the existence of the Church established in Ireland? He believed that at least four-fifths of the clergy of the Established Church were desirous to co-operate in the system.—The Earl of DERBY repeated the observation he made, in reply to the petition presented on the same subject last evening; namely, that it was not in the intention of the Government to make any alteration in the system. He, however, would have no objection to the appointment of a committee of inquiry upon the subject, for he thought much advantage would arise from a general knowledge of all the facts connected with the schemes.

HOUSE OF COMMONS.

The Speaker sat at four o'clock on Friday, soon after which the House became unusually crowded.

CASE OF LEOPOLD DE ROSE.—In reply to Lord Dudley Stuart, Mr. WALPOLE said it was the intention of the Government to discharge from custody Leopold de Rose a Polish officer, who was imprisoned in Westminster gaol, at the instance of Captain C. B. Hamilton, R.N.

CLERGY RESERVES IN CANADA.—In reply to Sir William Molesworth, Sir JOHN PAKINGTON said it was not the intention of the Government to bring in a measure on the Canadian Legislature to dispose of the proceeds of the Clergy Reserves.

THE BUDGET.

The CHANCELLOR of the EXCHEQUER, on the question that the House go into Committee of Ways and Means, rose to make his Financial Statement to the House. It was his duty for the House to say whether they could maintain the present system, and likewise to consider whether they could not deal with other matters which were of an important nature not properly belonging to finance. Under these circumstances, and considering that two-thirds only of the financial year had expired, he hoped he might be excused from deviating from the usual course. After the result of the last session he should not hesitate to acknowledge that the unrestricted system of competition had not established, and it, therefore became the duty of the Government to review the whole of the fiscal system. He also thought that it was the duty of the Government to consider what were the grievances of those connected with the landed interest, and what the complaints made by them were. He thought it was his duty to take the earliest opportunity of investigating the complaints and claims of the shipping, sugar, and agricultural interests. The agricultural interest complained that they were subject to peculiar burdens; and if they came to an understanding on that point, they would be able to take a compresensive view of their condition on sound and beneficial financial basis. He would then first proceed to consider the claims of the shipping interest. Nothing could be more unwise or injurious than that considerable classes of the community should labour under the impression that they were subjected to grievances and burdens from which other classes of the community were free. The Government, after careful consideration, thought the shipping interest was subject to burdens, and were compelled by reflections which impeded the prosperity of that interest. It was, therefore, their duty to see if they could alleviate the burdens of that class of the community. The shipping interest complained of their being subject to the vexation of rights of search and passing tolls. They also complained of the system of impressment—they complained of the system of salvage and anchorage; and also as to the restrictions as to how the vessels were manned, besides other complaints. All of them of great weight and importance. Now they had considered, that, with respect to the last class, the complaints of the shipping interest were founded in fact. The Government thought the shipping interest should not be subjected to the payment of private lights, nor be obliged to pay for the charter of the Corporation of the Trinity House; and they would therefore confine the charge to the benefit which the ship received from the lights and buoys, and refund the money to private lights, the Trinity Corporation, and all passing tolls. The consequence of the alteration would be an expense to the country of £100 000 a year, but that re-set the shipping interest had a right to look for. The next subject was that of pilotage. That question was a very complicated one; but he would not detain us all the morning in discussing it. It was enough for him to develop the policy of the Government on the subject. It was the intention of the Government to propose the appointment of a committee to take into consideration the whole system of pilotage and beaconage. They all knew that some of the crew of a vessel on a foreign station were taken from a ship and impressed in the navy. He desired to do nothing to affect the efficiency of the Royal navy; but they proposed to enact that a seaman quitting the mercantile marine for the Royal navy should not have his wages until the end of the voyage had been paid off. They proposed further that the Royal navy getting the benefit of the crew of a merchant ship, the country should compensate the owners of such ship. He must question the system of salvage; and, with respect to ship repairs, he thought it unnecessary to enter into details. He wished to throw no discredit on the navy, for he believed a more gallant race was nowhere to be found in it, but instances of improper work and dishonesty did occur. There was no doubt that the mercantile marine had not been treated with the consideration to which it should be by a commercial people. At this moment there was a system in reference to salvage which was a gross imposition; and the Government thought, therefore, that the system of salvage should entirely cease. It was not necessary for him to say much as to anchorage. They proposed to abolish that system entirely, and that the navy should not have in that respect any advantage over the mercantile marine. He entered into the point of manning the navy and the mercantile marine. The Government trusted that on due time they would be enabled to submit to the House a measure with reference to an improved system of manning the Royal navy. The time had arrived when that became essential (Cheers.) There was no reason why they should apply a different system of manning the Royal navy to that of manning the commercial marine. (Cheers.) On that subject the Government would submit a plan to the House which he hoped would give general satisfaction. He had now touched on all the points connected with the shipping interest, except bills of lading and bottomry bonds. He hoped would give general satisfaction. He had now touched on all the points connected with the shipping interest, except bills of lading and bottomry bonds requiring stamps, and as to them he did not then intend to treat of the subject; but the country might be assured that the Government would deal with it. With respect to the light dues, they proposed to terminate them for the paying of £100,000 annually out of the Consolidated Fund, and they proposed that all the other subjects of complaint on the part of the navy should be submitted to a committee of the House of Commons. He would next consider the claims of the sugar-producing colonies. They must regret that sugar was the battle field of party here now, and treat the question with respect to the present, and not the past. They must regret that great lastiness of legislation had taken place on that subject, and see what they could now do for the colonies. He sympathised with the West India planters in the position which had forced results. He was not responsible for the measures which had forced results. He was not responsible for the measures which had been passed, and he believed that the measures of the Government would tend to the benefit of the whole object. They thought it was their duty to place the navy of England in the position in which all Englishmen wished to see it. (Cheers.) The Government had, therefore, taken those steps to perfect the national defences, and, for that purpose, a supplemental estimate was necessary, which would amount to about £500,000. He was happy to say that the state of the revenue was very prosperous. He had calculated that there would have been an increase in the revenue to the ex cent of £650 000. He expected there would be a diminution of the Customs to the extent of about £100 000. He had expected an advance on the Excise of £50,000. He estimated the sums at the same as last year, but he was happy to say there was an increase of £500,000. He expected a loss of £140 000 on the Property-tax; and there was an increase of £167,000. He might say that there would be an increase of £300 000 on the inland revenue. He had estimated generally an increase of £400 000, but he thought they might safely take the increase at £1,000 000, and the vote for the increased expenditure would come from that surplus. The Government expected to be able to reduce the general expenditure of the country. It was the determination of the Government to effect administrative reform. It was their intention to bring forward a measure to bring the whole of the revenues of the country under the control of Parliament. After all the reductions, he expected to have a surplus of £1,450,000; and he hoped he would never have another vote to propose with respect to the Kaffir war. For 1853 54, he thought his surplus would be about £1 670 000. The right honourable gentleman then stated that it became necessary at that moment to contemplate what would cost the revenue a loss of £2,100,000 to find ways and means to supply it. This he proposed accomplishing by means of the surplus of £1 300,000, which he had alluded to, and their intention to bring forward a measure for the alteration of the Malt-tax, so as to apply it to all houses of the value of £10 per annum. He also thought they ought to increase the rate for private houses to 1s. 6d. in the pound, and the shops to 1s. This would make a plus to offset all the reductions which he contemplated, and would still leave the finances of the country in a sound position.

The right hon. gentleman, after a speech occupying five hours and a quarter, resumed his seat amidst much cheering.

In reply to Lord John Russell, the CHANCELLOR of the EXCHEQUER proposed that his resolutions should be different on that day week, and those which hinged on them would be brought in immediately. On Friday next he would therefore, move a resolution that the House-tax should be re-adjusted, and the Tea Duties reduced.

SYNOPSIS OF THE BUDGET

Introduced by the Chancellor of the Exchequer, December 3rd.

TAXES PROPOSED TO BE REDUCED.

Light Dues now paid by the merchant-service to the extent of £100 000 annually.

Malt-tax reduced one-half: present tax, 2s. 7¼ per bushel The reduction to commence from October 10th, 1853.

Duty on Tea to 2s 6d per lb.; and gradually to be reduced to 1s. in six years. Present tax, 2s 4½d. per lb.

Hop Duty reduced one-half.

Income-tax on precarious incomes to be 5½d. in the £1, commencing at £100 per annum.

Property-tax, 7d. in the £1, commencing at £50 per annum.

Stamps on Leases to be reckoned at one-third their rental, instead of one half, as at present.

TAX PROPOSED TO BE INCREASED.

Houses, at a yearly rental of £10 and upwards, to pay 1s. 6d. in the £1.

Warehouses, £10 and upwards, to pay 1s. in the £1. Present tax on dwelling-houses, 9d. in the £1; and on shops, 6d. in the £1; for £20 yearly rental and upwards

Income-tax, on funded property and salaries, to be extended to Ireland.

ACCIDENT ON THE LONDON AND NORTH-WESTERN RAILWAY.—On Thursday evening, as the express up train, which leaves Liverpool at 5 p.m. was passing through a deep cutting between Wolverton and Stony Stratford, the earthwork gave way, from the late heavy rains, ran off the embankment, when the engine-driver and stoker were killed on the spot, although the passengers escaped comparatively unhurt.

LATEST FOREIGN NEWS.

THE NEW EMPEROR OF THE FRENCH.

On Thursday, at ten o'clock A.M., the proclamation of the Empire was made at the Hôtel de Ville, by the Prefect of the Seine, who was surrounded by the Municipal Council, and attended by a body of troops and the National Guards. The weather was so wet, wet, and miserable, which detracted considerably from the excitement that would otherwise have been manifested among the mass of the people collected together to witness the ceremony; but at the close of the proclamation, which was followed by the usual salute of guns, at nine before one o'clock Louis Napoleon made his first public entrance into Paris as Napoleon III., Emperor of the French, attended by a brilliant staff, and accompanied by all his Ministers of State. An immense force of cavalry, infantry, and artillery surrounded his Imperial Majesty. Cannon was fired off from the Invalides and Mount Valerien to announce the event. Cries of "*Vive l'Empereur!*" were everywhere heard. As the Emperor entered the garden of the Tuileries, the shouts were renewed. In the evening the grand entrance to the palace was splendidly occupied by the different members of his family, and other personal friends, who had assembled on the occasion. The Emperor shortly afterwards appeared on the balcony, accompanied by his uncle Jerome, Princess Mathilde, and other ladies. On the left of the balcony stood Abd-el-Kader and his suite, who seemed to look on with feelings of intense interest and admiration. The crowd below was immense, who repeatedly raised the cry of "*Vive l'Empereur!*" which was no frequently made response to by the Emperor, who, on all sides. At length withdrew from the window, and the people quietly dispersed. The theatres and other public buildings were magnificently illuminated in the evening.

Handel's "Messiah" was creditably performed on Monday evening, by the Surrey Harmonic Society, at St. George's school-room, Southwark, under the direction of Mr. J. J. Ogle.

A funeral pageant in honour of the late Secretary, the Hon. Daniel Webster, took place in New York on the 10th ult.

Last month, 36 ships left Liverpool for America and Australia, having on board a total number of 12,188 souls.

Since the year 1801, no less than 17,120 Acts of Parliament have been passed.

THE EMPIRE IN FRANCE.

THURSDAY WEEK, the 25th ult., being the day fixed by M. Berger, the Prefect of the preceding official, the Senate, and the ballot throughout the department of the Seine, the mayors of the various communes began to arrive at the Hôtel de Ville shortly after nine o'clock. Many of them appeared in full costume—cocked hat, dress coat embroidered with gold lace, and sword at their side, and a sweeping the more independent adoption of office—the tricoloured sash. The magnificent Salle St. Jean was prepared for their reception, with seats and tables; a portion was reserved for the [illegible], whose [illegible] At two o'clock the Prefect made his appearance at half-past nine o'clock, and took his seat with his assistants on a raised platform. The mayors of Paris were then called in turn to produce their lists, which were severally read aloud by one of the officers. The mayors of the different communes in the department of the Seine were similarly called in alphabetical order. When the returns were all read, the Prefect rose, and, in a short address, thanked the mayors for their exertions during the election. The few words he said were delivered with much energy. He told them that the Government was indebted in a great measure to their zeal and

M. BERGER, PREFECT OF THE SEINE, PROCLAIMING THE VOTES FOR THE EMPIRE TO THE MAYORS OF THE ARRONDISSEMENTS.

activity for its success. The Mayors replied to the compliment by waving their hats, and loudly shouting "*Vive l'Empereur!*" The Prefect then withdrew, with the Council, to add up the several lists. He returned in about twenty minutes, and proclaimed that the number of the Ayes was 310,658—the Noes, 54,753. The meeting then separated. Outside the Hôtel de Ville, and contrary to the custom observed on all previous occasions, there were no troops; indeed, an absence of military display has been observed throughout the whole of the proceedings. On the occasion of the proclamation of the ballot on the last *plébiscite*, a battalion of infantry was stationed in front of the Hôtel de Ville to keep order, but in the present instance no such precaution was adopted. It was observed that the artillerymen belonging to the battery of guns placed in the Hôtel de Ville in the year 1848 were sauntering about, while the guns themselves were under the charge of the ordinary sentinels in the back court.

As if to mark more strongly the important change in the form of the Government of France, a most unusual elector has made his appearance, and claimed to exercise the franchise. This is no less a personage than Abd-el-Kader! The *Moniteur* says:—

The Emir Abd-el-Kader has desired to give a new proof of his gratitude and devotedness to the Prince. He has asked leave to take part in the vote for the re-establishment of the Empire, and has addressed the following letter to the Mayor of Amboise:—

"Infinite praise to God for His infinite grace! To the first magistrate of the town. Trouvé, Mayor of Amboise, salutation! The Emir Sid el Hadj Abd-el-Kader has the honour of asking leave to exercise the right of the citizens of France for the nomination of the Sultan, for we ought at present to regard ourselves as Frenchmen, from the friendship and affection which are manifested towards us. Our children have seen the day in France, and your daughters have suckled them; our companions, deceased in your country, repose among you; and the Sultan—just among the just, and generous among the generous—has placed us among the number of his children and of his soldiers, deigning to return to me a sword with his imperial hands. May God be propitious to the Prince, and long continue his power, his grandeur, and his glory! Amen! Written this 9th Day of Dafar, 1269. S'Hamy (Khalifa), by order of Sid el Hadj Abd-el-Kader. May God be our aid and direct us in the way of good by His grace and protection. Amen!"

The Mayor of Amboise complied with the wish thus expressed, and received the Emir's vote, and that of his officers, in a special urn.

The *Patrie* gives the following as the last returns of the votes on the *plébiscite*:—

	Yes	No
For the 86 Departments	7,468,160	237 066
Army	234 e 0	8 456
Navy	47 706	2 0:0
Civil population of Algiers	5,107	721
	7,782,903	248,263

To complete the returns, there are only wanting the votes of a few communes in eight departments, those of the army of Italy and the army of Algeria, and the votes of the civil populations of the provinces o Constantina and Oran.

ABD-EL-KADER VOTING FOR THE FRENCH EMPIRE.

THE INUNDATION AT OXFORD.—(SEE PAGE 500.)

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.

MILITARY PENSIONERS.—Lord Panmure, on Monday, asked Lord Derby what was the intention of Government with regard to the 220 pensioners which had been sent out to Toronto on the same conditions as those on which pensioners had been sent out by other parcels; viz., that they should have grants of land to cultivate, but which conditions at present had not been complied with.—Lord Derby answered by deprecating the policy of sending out old pensioners, and by stating that, in particular cases referred to, the Government had not sufficient land, and what they had there was actually wanted for ordnance purposes. The late Government were to blame for thus deceiving the pensioners, but he (Lord Derby) hoped that ultimately a satisfactory arrangement would be made.

THE NATIONAL SYSTEM OF EDUCATION IN IRELAND.—On Tuesday, in answer to the Earl of Clancarty, who complained of the Presbyterian committee in Marlborough-street of Ireland, praying that the system of National Education in Ireland might not be altered, Lord Derby stated:—"My noble friend the Lord-Lieutenant of Ireland has felt it his duty to propose very great consideration to this question, and with every desire to remove, as far as possible, the feelings or the prejudices of those who are opposed to that system. All I can say is, that I consider it would be a very great evil if we were seriously to disturb the existing system; and the Government, not seeing their way to make any alteration with the view to which I have alluded, have no intention of bringing forward any measure to effect what one party had in view, seeing that it would be offended many others, and probably many persons strongly approbated."

SCOTCH UNIVERSITY TESTS.—In answer to the Duke of Argyle, Lord Derby stated that it was not the intention of her Majesty's Government to bring forward any measures for the amendment of the law with regard to them in the present session.

The Earl of Donoughmore presented a petition from certain electors of Cork, complaining of the manner in which the peace-officers did their duty at the late election.

MAYNOOTH COLLEGE.—The Earl of Winchilsea gave notice on Thursday that he would, on an early day, move for a committee to inquire into the system of education in vogue at Maynooth, in order to ascertain if it were reconcilable to the spirit of the Protestant institutions of the country.

FREE TRADE.—On Thursday, the Marquis of Cranbicarde who had introduced the subject on Tuesday evening, and he should wish to see any Free-Trade question that might be brought forward supported by the unanimous, or nearly unanimous, vote of their Lordships. He thought it would be of great advantage that the resolutions adopted by the House of Commons should also be adopted by their Lordships, in order, in so doing, however, with the noble Earl at the head of the Government, and find up that the noble Earl had approved rather of words which he himself had drawn up as the draft of a resolution, than of the Marquis of Granby's, would not save their Lordships the trouble of dividing or of entering into a warm discussion on the subject, but would adopt the form of words suggested by the noble Earl—inasmuch as he thought that, with the fully recognised principle of Free-Trade as a key to as the basis of their future commercial legislation, they would at the same time secure that unanimity upon the subject which they so much desired. He therefore gave notice of his intention to move the following resolution:—"That this House thankfully acknowledges the general prosperity; and, deeply sensible of the evils attendant upon frequent changes in the financial policy of the country, adheres to the commercial system recently established, and would view with regret any renewed attempt to disturb its operations or to impede its progress."—The Earl of Derby expressed his satisfaction at the calm and temperate manner with which the noble Marquis had treated the subject. He concurred with the noble Marquis in thinking that the question ought to be settled in that House by a formal resolution which should in no wordet as to lead to the east possible chance of a conflict of opinions. He was sure of no man that his resolution should be such as would recognise their firm adherence to the principles of Free Trade as the future policy of the country. Such a resolution as he was bound to say, would be in accordance with the general opinion of the country.

HOUSE OF COMMONS.

THE DERBY ELECTION.

On Monday Sir A. Cockburn brought this matter before the House. The factory the case, as he had seen it, was as follows:—At the last election for Derby Mr. Bass and Mr. Hayward, who represented the Liberal interest, were opposed by Mr. Horsfall on the Conservative interest. Previously to the election Mr. Horsfall had been a stranger to the borough, except in so far as that he had married into a family several members of which were established there. One of Mr Horsfall's relations by marriage was a solicitor, another was a wine merchant, and a third carried on extensive lead works in the town. In the house of the latter gentleman, (Mr. C.), Mr. Horsfall was a guest during the election. Up to that period he had always been considered one of the strongh lds of the Liberal party, but shortly before the election there was a report spread that a offer had been made and probably by realised, and among the parties on the Conservative side it was said that money would not be wanting to secure that object. The sequel showed that this report was not without foundation. Informat on was conveyed to Mr. Moss, chairman of Messrs. Bass and Hayward's committee, that bribery was going on, and that information enabled him to trace the proceedings, and to expose them to public observation. This primary information came from a tipsy and excited source, although the subsequent details of the system which existed were substantiated by the result. The circumstances occurred thus. There was an attorney living in Derby, of the name of Fawker, who has been leading agent on the Conservative side. In the course of the last election, it had been greatly discontented with the parties for whom he had formerly acted. That discontent arose in the following manner. Having been the agent in 1847 for the Conservatives, he proceeded, a period of five years, to return Messrs. Evans and Gore, and was remunerated for getting them elected by those proceedings he found himself out of pocket £700 or £800. He applied to his friends in the borough to remunerate him to that amount, but he received no one shilling of the money. Nothing made a man so sore as losing his money, on being applied to at the last election to act for [illegible] he would be would take no part in the election. Fawker was then found in this state of mind, when Mr Hufford, also an attorney, made a last effort to secure his services, and at length he (Mr. Fawker) consented to act. Mr. Hufford then told him that preparations had been made to carry the election by money—that a stranger was in the town "to do the thing" that he was at the County Tavern and that he (Fawker) was to go to the tavern, and ascertain whether the stranger's arrangements were sufficient. Mr Hufford told him that access to the room would be given to him, and he (Fawker) the [illegible] and learned gentleman had up a card)—which he was to show to the landlord of the tavern, telling him that he came from Mr. Radford, that he might thus be known as a confidential person. The name "Mr. T. Morgan, Chester," was inscribed on the card. Mr. Fawker accordingly proceeded to the County Tavern, where he saw a man in a private room. This was a stranger to him, and he showed him the card which he had received from Mr. T. Morgan. During the interview some allusion was made to his coming from Chester, when Morgan said, "I don't come from Chester—I come from Shrewsbury, and Mr. Frail sent me." Mr. Fawker then said he had not any letter from Mr. Frail, and he replied, "I have no letter by me of Mr. Frail's, but I have another letter. He then took a letter from his pocket, and as soon as Mr. Fawker saw the writing he knew it at once to be the writing of Major Beresford, and he exclaimed, "Dear me! this is the writing of Major Beresford; I know it very well." Morgan then told him how he intended to conduct the business. Mr. Fawker having ascertained that the arrangements were complete, went back to Mr Radford, and observed that Morgan had not come from Chester, but from Shrewsbury. To this observation Mr. Rad ord replied, "Never mind; he is to have £100 for doing the job." Mr. Rad ord then asked Mr Fawker to go to Nottingham, for a purpose he would state. There was at Nottingham a man named Hubbert, who had at his command an organised body of men, who looked to him for pay, and took their orders from him alone. This Mr. Hibbert and his band transacted many delicate transactions at elections. An attorney named Hulsh was one of the agents of Mr Horsfall, at Derby. This Mr. Hulsh had sent a man named Simpson, an inhabitant of Derby, to an attorney at Nottingham, requesting him to secure the services of Hubbert and his men. This gentleman, hearing what was doing at Derby, thought it better not to have anything to do with the election. Mr. Hulsh then wrote to Hibbert to come to Derby, and bring his men with him Hibbert declined to comply with this request, having had a previous misunderstanding with Hulsh. Mr. Hufford, under these circumstances, asked Mr Fawker to go over to Nottingham, and bring back Hulsh and his man. Mr. Fawker accordingly went over to Nottingham, and there saw Hibbert, who told him that he had received a letter from Hulsh, but that he would not go over to Derby at his solicitation, as he had no confidence in him. He, however, stated that he was willing to go to Derby and take his men. If Fawker would promise to pay him. He stated at the same time that he would not allow him to go to Derby until the afternoon. Mr. Fawker, however, during his stay at Nottingham, saw a person named Cox, to whom he told his business. Mr. Cox happened to be a relation partner of the Lord in Waiting interest, so he went immediately to Mr. Hulsh, the town-clerk of Nottingham, and got a letter of introduction to Mr. Moss, the chairman of Messrs. Bass and Hayworth's committee, to whom he communicated the facts he had learned. Fawker afterwards returned to Derby, and became the medium of communication between Mr. Fawker and Mr. Bass. Meanwhile the meantime Fawker returned to Derby with Hibbert and his men, and found that Mr. Hibbert had brought Cox in company with a gentleman named Lund. He followed him to Mr. Cox's, and there told him that he had brought Hibbert and his men. Radford told him that he would provide for the men, but that he was told there was a house exactly opposite the County Tavern from which a man that went forward in that place might be watched, and that it would be well to go to the County Tavern and see that proper measures had been taken to prevent observation. Mr. Fawker accordingly went to the County Tavern, and went took Lund on the way. He (Fawker) proceeded to Morgan's room, and when Clare Lund came in and said, which is private matter I speak to Morgan upon. Fawker then left the room, and Lund went into the room and told Morgan that he had brought him [illegible]. A conversation then ensued with reference to the house opposite, and Morgan said there was no fear of his being watched by the other side as there was a double means of communication to his room, a separate access being by means of a back-staircase, which opened into a yard. The landlord of the tavern showed Mr. Fawker the rooms, and he declared that the place was quite secure from observation. While Fawker and Lund were in the house, a person named Rias came to see Morgan on the subject of a Mr. Peters, which included the names of persons who were known to be not inaccessible to a pecuniary consideration. Morgan observed that this list would not see any one who did not give "the sign"—the same being to place the forefinger of the right hand to the upper lip, and say, "It's all right; Radford sent me." Upon this Mr Fawker went to Mr. Radford's house, and was told that he was not well, and was not yet up. He then desired the servant to take up a message to Mr. Radford, that the man at the tavern wanted more horse-nails, and that he must have them immediately. The servant having given this message, in came Mr. Cox, the attorney; and he, hearing the message sent up, also sent up a message that he must see Mr. Radford without delay, and that Mr. Radford was to get up immediately, as he would not see him very much. This message was brought back: that "the horse-nails" would be sent, and that the gentleman who would bring them would be with Mr. Radford during the whole of the day. All these circumstances were communicated by Mr. Fawker to Mr. Cox, of Nottingham, and by Mr. Cox they were communicated to Mr. Moss, the chairman of Messrs. Bass and Hayworth's committee. Having received this information, Mr. Moss having communicated with Mr. Bass and Mr. Heyworth, these gentlemen called in the assistance of a sergeant of police, and three or four of his men, who went in plain clothes to the County Tavern. They found the room which they had been directed to look for guarded by a man who was a stranger to them; but, on making the sign and giving the pass-word, he opened the door and admitted them within. There they found the man Morgan, whom they apprehended, and £2500 in gold and a further sum of £40 in notes. They also found a book, in which were entered the names and the numbers of the voters on the register, and various sums which were affixed to their names which they had received or were to receive. They further found this letter:—"A good and safe man with judgment and quickness is wanted immediately at Derby. I suppose that you cannot leave your own place. If not, send some one whom you can trust to your place. Let him go to Derby on receiving this, and find the County Tavern, in the centre of the town. Let him send his card to Cox Brothers and Co's lead-works, Chesterfield, from Chester. That will be [illegible] Yours truly W. B.—Monday."—The police, besides this document, found on the man a card, which was delivered by Mr. Radford to Mr. Fawker, and which bore this address—"T. Morgan, Chester." That individual was taken into custody and brought before the magistrates on the following morning. He made no secret of the business in which he was engaged. He admitted freely that the book did contain the names of persons who had received sums of money from him, and he spoke with contempt of the borough of Derby, saying that it was a small place, and that one vote at Shrewsbury would cost as much as twenty votes at Derby Nor, as Sir A. Cockburn, came the far more important and far more painful question; namely, how far, upon the evidence of this letter, the right hon. gentleman the Secretary at War was to be considered as having been an accessary to those proceedings? This letter had been sworn to be in the handwriting of the right hon gentleman. It was found in an envelope addressed to "John Frail, Clerk of the Course, Shrewsbury," and was sealed with the seal of the Carlton Club. The right hon. gentleman had never denied the genuineness of the letter, and has (Sir A. Cockburn's) belief was that it was genuine. Sir A. Cockburn said, additional particulars as to the complicity of the Secretary-at-War had been brought to light. It appeared that the right hon. gentleman had been in correspondence with Mr. Fawker on a previous occasion. In a letter to Mr. Fawker, dated the 21st of November, 1847, the right hon. gentleman said, "I received your letter yesterday, just as I was entering the House. I should think a good deal hinged to unseal Mr. Strutt for Derby. But I have not had time to make any personal just after a general election to pay the expense of a petition." He (Sir A. Cockburn) supposed that the funds were more flourishing now, although they had recently had a general election. You got up a case, and a subscription for the purpose, I may perhaps subscribe £100.—W. Beresford." Again "I am glad to hear so good an account as the one which you give me of the prospect of the success of the Derby petition. I shall be glad to give you any assistance in my power, when the case comes on." He (Sir A. Cockburn) did not exactly understand what that meant. (Hear, hear.) Again, on the 25th of February, 1848, Mr. Fawker wrote to the right hon. gentleman thought that he could render a valuable assistance by sending Mr. Frail down to Derby, and therefore, in a letter, dated the 28th of February, 1848, he said:—"My dear sir, I have an agent who is skilful in all election matters, and understands every manner of schemes with regard to petitions. He will be in Derby next Tuesday, and will bring an introduction from me. You can trust him most implicitly, and I set every value upon having him from his respecting your petition.—W. Beresford." The next letter, dated the 27th of February, was to Mr. Fawker, and was brought by Mr. Frail:—"Dear sir, I send you Mr. Frail, in the party of Tuesday. Yours truly, W. B." This letter showed quite conclusively that, up to the 25th of February, 1848, Mr. Frail was a total stranger to the borough of Derby. On the 28th of that letter to Mr. Fawker, the right hon. gentleman says—"I have sent Mr. Frail, who gives me a good account of the case against the sitting members. I will give you every assistance in my power. I shall be happy to see you when you come to town." What that meant he (Sir A. Cockburn) did not know. "Your policy is to collect funds, and to keep the case quiet until it comes before the committee." The next letter was from Mr. Frail himself. A aid was important, because it showed that Frail had put himself on a footing of intimacy with the borough. It was dated from Carlisle. It appeared an election petition having been presented on the 28th of February, one of the members for that city was unseated, and Frail had been successful. A new election took place to fill the vacant seat. Frail was sent down, and, if not by the direction, with the concurrence of the right hon gentleman, for the purpose of leading the petition being presented. The letter was as follows:—"Dear sir,—I read your letter this day. I am much engaged in the election. It will be over on Saturday, and I hope to be in London on Friday. If you can, get Andrews under"—these were two very distinguished names in the annals of the Parliamentary bar—"but if you cannot, get Dyles." His learned friend Serjeant Byles was one of the most able advocates known in Westminster Hall; but he was, personally, not known to him. gentlemen opposite as the author of a most profound work on political economy—"The Fallacies of Free Trade." This letter contained a most significant fact. It was signed "Frail," but above the words "Swans in great haste" there was added "W. Nixon, The King's Arms Hotel, Carlisle." Then there was this addition, "My best wishes to Mr. Hibbert, our friend at Nottingham—Thomson, not Jolly." The next letter was from the right hon. gentleman:—"Dear sir,—I shall be been out of town on very important business for several days. I think he will reach Derby on Wednesday morning. I have sent him to speak to a gentleman at Derby." This communication appeared to establish, he thought, the fact and the right hon. gentleman had nothing to do with the election of 1847, and that it all was a stranger to Derby until the election of 1848. The letter, therefore, found on Morgan at the late election gave a flat contradiction to the previous election. Sir A. Cockburn then at some length contended, the idea of a conspiracy on the part of the Liberals to bring the Conservatives and Major Beresford into disrepute at Derby, and he therefore hoped that the House would not think that the House could refuse inquiry, and this also was the course which, to do him justice, Major Beresford had all along loudly demanded. He moved the appointment of a select committee to inquire into the allegations contained in the petition.

Sir John Yarde Buller was fully convinced that the inquiry should be granted, and therefore he would second the motion. This course met the approval of Major Beresford.

Mr. Stuart Wortley would offer no opposition to the motion; but he would protest against the constitution of the committee which was granted. An election petition was pending, and if Major Beresford was found guilty of the charge alleged, the election must be declared to be void

Mr. Walpole did not think that any conscientious scruple would be entitled by conceding the committee. There was only a choice of evils; but of the two he thought the appointment of the committee would be attended with the least degree of inconvenience. After the statement which had been made, it was impossible to say that a case for investigation had not been made out. Mr. Walpole suggested that the committee should be appointed by the Committee of Selection.

Lord J. Russell approved of the view taken by Mr. Walpole.

Mr. Horsfall (the Conservative member for Derby) repudiated all connexion with the election.

Sir C. Wood suggested that the committee should consist of five members, and that they be selected by the general committee of elections.

This met with general approval, after some conversation, it was agreed that each party may be assisted by counsel, should they think proper.

The motion was then agreed to.

MINISTERS' MONEY IN IRELAND

Mr. Fagan, on Tuesday, moved that the House should, on Thursday next, resolve itself into a committee, to take into consideration the law relating to the rates or tax called ministers' money, in Ireland, with the view to repeal so much thereof as relates to the tax or rate payable by the Roman Catholic inhabitants by the Act 3d and 4th Will. 4, c. 37, called the "Church Temporalities Act," for the purpose of amending the same, so as to provide thereby a substitute out of revenues of the Ecclesiastical Commissioners as a provision for the Protestant [illegible] out of by them under and by virtue of the Act 17th and 18th Charles 2, c. 7th. The colonus tax (said the hon. gentleman) amounted only to the paltry sum of £17,000 per annum, and it was collected entirely in the towns and cities in Dublin, Waterford, Limerick, Kilkenny, Clonmel, Drogheda, and Kinsale; while the corporate towns of the great Protestant province of Ulster contributed nothing whatever to the tax. The towns of Belfast, Enniskillen, Londonderry, and Armagh there the population were almost entirely Protestant were entirely exempt; while the Roman Catholic towns he had mentioned were subjected to the impost. Another grievance connected with the subject was, that [illegible] was [illegible] Poor-law valuation; the consequence of which was, that as no house was rated higher than at £60 per year, the more wealthy and respectable part of the inhabitants were exempted from contributing their just share. A report of a select committee upon this subject suggested that an augmentation of the cess assistant could might be made a substitute for ministers' money. At the present moment the revenues of the Ecclesiastical Commission are in the most prosperous condition. They now exceed £20,000 per annum to what they did in 1847, when the commutes made the suggestion to which he had referred. What he proposed was, that, instead of a bonus of 4 per cent, which there was at present, the bonus should be increased to 10 per cent. That would induce the tenants to purchase at 17 years' purchase, by which means the funds of the Ecclesiastical Commission would be greatly increased. For many years after the Church Temporalities Act had passed into a law, the commissioners were in the habit of appropriating the sums they received out of the perpetuity fund. They did so up to the year 1846. Now, he admitted that the commissioners ought to be allowed to apply some of the perpetuity fund to the purpose of abolishing the impost of ministers' money. The immediate tenants under the Ecclesiastical Commissioners did not renew yearly; but the immediate tenants under bishops' leases must renew every year, under penalty of losing their property. He would, therefore, propose that the tenants under the Ecclesiastical Commissioners should be still to renew as yearly tenants, and the fine thus paid would increase largely the means at the disposal of the commissioners. He proposed to introduce a clause in the bill to that effect. Again, the under tenants never purchased, although they were at liberty to do so, owing to difficulties in the way. To remove those difficulties he had also devised a clause which would obviate the objections now entertained by under tenants. There was a sum of £20,000 now due to the Government by the Ecclesiastical Commissioners, out of a sum of £100,000 which they had borrowed when they first commenced their operations, to meet the exigencies of the moment. There had been over £120,000 paid, including interest, of that £100,000. He proposed that the Government should give up this £20,000, to meet any difficulty which might occur in the proposed abolition.

Mr. Walpole said he would not attempt to negative the motion; but if the hon. member would permit the previous question to pass, it would be his duty to bring forward a measure upon the subject after the recess.

After some discussion, in which Sergeant Murphy, the Attorney-General for Ireland, Messrs. Hume, Maguire, Viscount Bernard, Sir J. V. Shelley, Captain Jones, Messrs. Fortescue and Monsell, took part,

Mr. Fagan said he felt bound by a sense of duty to divide the House. The measure contemplated by Government would merely transfer the tax from the occupiers of house to the landlords, to which he could not consent.

On a division, the previous question was carried by a majority of 46.

THE DIVISION OF FRIDAY NIGHT. EXPLANATIONS.—Mr. Newdegate (on Monday) entreated the indulgence of the House whilst he referred briefly to a matter which was personal to himself. He had had the honour of being a member of the House of Commons for nearly ten years, and, at the present moment, found himself in a position that he had never stood in before. Having taken deliberately stated in that House that he would not do that which he had done—that he would not vote on the division which was taken on Saturday morning, on the amendment of the right hon. gentleman the member for Tiverton (Lord Palmerston), he felt that, by having voted against it, he was in the posit n of one who had broken his word. He begged the House, therefore, to allow him the opportunity of explaining the circumstances which had fully intended to leave the House immediately after the division upon Mr. Villiers's motion, and not to have voted against the amendment of the noble Lord; and he assured them that what he had done was perfectly unintentional, and entirely owing to the circumstance of his having been accidentally locked in on the occasion.—Mr. Knogh said that, after the division on Mr. Villiers's motion, another division took place upon the amendment of Lord Palmerston; and he had been informed, that, whilst the latter was being taken, there were some honourable members, namely, the hon. and learned gentleman, the Solicitor-General (Sir W. Erle), the noble Lord the Member for West Sussex (the Earl of March), and he believed the hon. Member for Middlesex (Mr. B. Osborne), concealed in a room at the back of the Speaker's chair. (Loud laughter.) For what reason those hon. gentlemen were so concealed he was not for him (Mr. Keogh) to say, he had risen on the present occasion merely to ask, for the information of himself and other hon. members, whether that room was a place of legislative retreat, for any portion of the Government who might be indisposed to vote, and desired to absent himself from a division? whether, in fact, the division was properly taken in that respect on Friday night; and whether the Solicitor-General (Sir W. Erle), the noble Lord the Member for West Sussex, and the hon. Member for Middlesex, ought not to have been brought to the table of the house, and compelled there to say "Aye" or "No" to the motion? The Speaker said, that if any hon. members happened to be in the chamber at the back of the chair during a division, they were entitled not to vote. Those rooms had always been considered "out of the house," and therefore the tellers could not compel the members to vote who chanced to be in them on such occasions.

EXTENSION OF THE FRANCHISE.—Mr. P. Duncombe, on Monday, gave notice that, immediately after the recess, he should move the following resolution:—"That it is the opinion of this House that the state of the representation of the people in Parliament demands immediate attention, with a view to the enlargement of the elective franchise, and the correction of those abuses which the Reform Act of 1832 was intended to effect, but has failed to accomplish."

INTIMIDATION AT ELECTIONS.—Mr. H. Berkeley gave notice, on Monday, that, on the day after the Christmas recess, he should ask leave to introduce a measure to protect the Parliamentary electors of Great Britain and Ireland from intimidation, violence, and general malversation of the franchise.

BUDDHISM IN CEYLON.—In answer to a question from Sir R. H. Inglis, on Monday, Sir J. Pakington said, that Government had entered into with the King of Candy, we have certain certain obligations; and one of these obligations was that we should take part in the Buddhist ceremonies, assist in the performance of their religious rites, and give them the offerings of the materials which were necessary for the performance of those rites. This practice had been long discontinued. It was finally put an end to by Sir R. Horton, then Governor of Ceylon, in 1844. A sum of money (£3000 was agreed to be paid to the Buddhists in lieu of the contributions which had been formerly paid for the performance of the Buddhist rites. He had now to state generally, in answer to the questions of his hon. friend, that after grossly considering the matter, and proper advice, which he had received not only just recently, but previously to a sale place for its custody. The £300 a year, agreed to be paid by Sir Robert Horton, in lieu of the other contributions which were previously made, having, in his (Sir J. Pakington's) opinion, been withdrawn with very great injustice to the parties, he proposed to issue instructions that, as a compensation for its loss, the Governor should give the Buddhists an extent of land equivalent in value to £300 a year. He (Sir J. Pakington) may should not be very much off in that respect than they were before. With regard to the third point, the instructions he proposed to send out were, that the governor should request the Buddhists to provide for themselves the means of appointing the priests, who had hitherto been appointed by the governor of the island.

METROPOLITAN COMMISSION OF SEWERS.—In answer to a question from Sir S. Hall, Lord J. Manners stated, on Monday, said it was the intention of the Government to introduce a measure for the purpose of amending the constitution of the present Commission of Sewers, and to introduce it in sufficient time to admit of the ratepayers of the metropolis expressing their opinion upon it previous to its passing into law.

CHRISTMAS-BOXES TO LETTER-CARRIERS.—Mr. G. Hamilton, on Tuesday, in reply to Lord Dudley Stuart, stated that the Postmaster-General had decided that, for the present, the letter-carriers in the metropolis should not be prohibited from soliciting Christmas-boxes.

The Court of Common Law (Ireland) Bill was read a second time on Tuesday, as was also the Weal India Colonies Loans Act Amendment Bill.

THE COUNTY ELECTIONS BILL was proceeded with on Wednesday.

On the order for going into committee, a discussion of some length took place upon the details of the bill, and the various suggestions offered for amendment. In the course of the discussion, Mr. Duncombe moved that the House do resume, for the purpose of moving that the bill be committed that day six months; but he afterwards withdrew that motion, and the House went into committee, when the clauses of the bill were considered seriatim. After some amendments

THE BERBY ELECTION.—On Wednesday, the General Committee of Elections reported that they had selected the following five members, namely, Mr. Gou burn, Lord H. Vane, Lord Barrington, Sir W. Molesworth, and Mr. Ingee, for the committee to take into consideration the matter of the petition of the inhabitant householders of the borough of Derby.

THE TRUCK SYSTEM.—Mr. Walpole, on Wednesday, stated it was the intention of the Government to introduce a bill to amend the laws relating to the truck system.

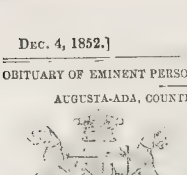
PARLIAMENTARY REFORM.—Mr. Hume on Thursday, wished to ask the Chancellor of the Exchequer whether it was the intention of her Majesty's Government to introduce any measure for the extension of the franchise, the registration of the voters, and the equalisation of the number of electors to the number of representatives? The Chancellor of the Exchequer said that, if the Government should intend to bring in such a measure, due notice would be given of it. (Laughter.)

CAMBRIDGE UNIVERSITY.—Mr. Phinn wished to ask the Secretary of State for the Home Department whether, in consequence of the report of the Cambridge University Commissioners in reference to King's College, Cambridge, her Majesty's Government were prepared to recommend to the authorities of Eton College to concert measures with the Provost and Fellows of King's College, for the improvement and better application of the funds [illegible]? Mr. Secretary Walpole said, he would send copies of there [illegible] and when he received an answer he would communicate to the House the result of the answer.

THE ELECTIVE FRANCHISE.—Sir D. L. Evans obtained leave to bring in a bill to extend the period for payment of rates and taxes for the elective franchise. The principle of the bill having been admitted by previous Parliaments, it was not necessary for him to discuss its details on the present stage; and he would, therefore, postpone his statement to a subsequent stage.—Mr. Secretary Walpole would not then offer any opposition to the introduction of the bill.—Mr. T. Duncombe protested against the bill, because it did not go far enough, and he thought that borough and county elections should be put on the same footing with respect to rating.

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

AUGUSTA-ADA, COUNTESS OF LOVELACE.



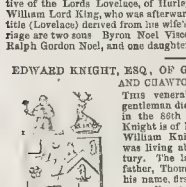
THE Countess of Lovelace, "Ada, sole daughter of Byron's house, and heart," died on the 27th ult., after a lingering illness of more than a year's duration, at the Earl's town residence, Great Cumberland-place. Her Ladyship was born 10th December, 1815, at Lord Byron's house, 122, Piccadilly, and was, at the period of her decease, in her 37th year, the same age at which her illustrious father died.

The name of Ada came into the Byron family through the marriage of Sir Richard Byron with Johanna, daughter of William de Colwyke, of Colwyke, Notts, from the ancient house of Dakeney, or Dakeyne. Sir Baldwin Dakeney (the first husband of Johanna de Dunstanfield, the great-grandmother of Johanna de Colwyke, who wedded Byron) left an only daughter, who was named Ada. The descendants of the Dakeneys, or Dakeynes, were subsequently seated in the counties of Derby, York, and Nottingham.

In a letter from Ravenna, dated October 8, 1820, the poet, Byron, thus refers to the word -"If you turn over the pages of the Huntingdon Peerage case you will learn how common was the name of Ada under the Plantagenets. I found it in my own pedigree in the reigns of John and Henry."

Lady Lovelace was only child of the poet, George Gordon Lord Byron, by Anne Isabella Noel, his wife (co-heir to the Barony of Wentworth), daughter and heir of Sir Ralph Milbanke, Bart., and representative of the Lords Lovelace, of Hurley. She married July, 8th, 1835, William Lord King, who was afterwards (in 1838) made an Earl, under a title (Lovelace) derived from his wife's ancestors. The issue of the marriage are two sons Byron Noel Viscount Ockham, born in 1836, and Ralph Gordon Noel, and one daughter, Anne Isabella Noel.

EDWARD KNIGHT, ESQ., OF GODMERSHAM PARK, KENT, AND CHAWTON, HANTS.



THIS venerable and much-respected country gentleman died at his seat, Godmersham Park, in the 86th year of his age. The family of Knight is of high respectability in Hampshire: William Knight, of Chawton, in that county, was living about the middle of the 16th century. The late Thomas Knight, Esq. (whose father, Thomas Broadnax, Esq., had changed his name, first to May and then to Knight, on succeeding to the estates of Godmersham and of Chawton), died *s.p.* in 1794, having devised his property to his cousin, Edward Austen, Esq., who adopted the testator's surname and arms, and was the gentleman whose death we record. He married, in 1791, Elizabeth, sister of the late Sir Brook Bridges, Bart., and had six sons and five daughters; the eldest of the former, Edward Knight, Esq., of Chawton House, being the succes or to his father's estates. Miss Jane Austen, the accomplished novelist, author of "Emma," was the youngest sister of Mr. Knight, of Godmersham, the subject of this notice.

LOUISA, MARCHIONESS OF SLIGO.

THE death of Lady Sligo occurred on the 23d ult., at Westport House, county Mayo. Her Ladyship had not completed her 30th year, having been born Feb. 21, 1823. She was the second daughter of the present Viscount Strangford, and was married May 3, 1847, to the Marquis of Sligo, by whom she leaves an only child, Katharine-Philippa-Ellen, born April 25, 1850.

LIEUTENANT-GENERAL WEMYSS.

THIS distinguished officer expired on the 30th ult., at his residence, Cumberland Lodge, Windsor Great Park, after a lingering and wasting illness of twelve months' duration. Prior to that, the gallant general, who was about sixty-two years of age, was in the enjoyment of robust health, and was remarkable for his commanding presence. His active professional duties and great conversational powers rendered him the idol of the circle in which he moved!

Lieut.-General William Wemyss was the second son of Lieut.-General Wemyss, and great-grandson of James, fifth Earl of Wemyss: he was born in 1790. His military career extended over more than forty years. He took part in the Peninsular war, having been present at the engagement of Fuentes de Onore, on the 5th of May, 1811, for which he received the silver medal granted under the general order of the 1st of March, 1847. On the 10th of May, 1850, he was gazetted Colonel in-Chief of the 93d Highlanders. For many years he had enjoyed the confidence and esteem of the Queen and the Prince Consort. Soon after the marriage of her Majesty, General Wemyss was appointed Equerry in waiting to Prince Albert, and at that period had the entire control and management of his Royal Highness's extensive equestrian and agricultural establishments. It was thus he became acquainted with all the leading agriculturists of the locality, with whom it was his great delight to associate. As a member, and occasional president of the Royal East Berks and Windsor Royal Associations, he was universally popular; while, as the master of Prince Albert's pack of harriers, his fine flow of spirits in the field and sterling hunting qualifications, won for him the affectionate respect of both gentry and farmer.

General Wemyss married, in 1820, Lady Isabella May, eldest daughter of William, 16th Earl of Erroll, by whom he has had issue two sons, both in the British army, and a daughter.

METROPOLITAN NEWS

REPEAL OF THE TAXES ON KNOWLEDGE.—The annual meeting of this association for this object took place on Wednesday night, at Exeter Hall; Doug as Jerrold in the chair. The large room was filled in every part. The chairman said, Mr. C. Knight in his "Shilling Shakspeare," had shown how a book had to wrestle with the Government; how the very last Act of the Exchequer might get the whole stripped up by the Chancellor of the Exchequer. Messrs. Chambers had also shown that a work popular y addressed to the people, a work which at once came out 30,000 strong, had never been able, or not strong enough to conduct its own paper: having been wr tten down by the Government. He said "written down by the Government," for it had been written down by the Excheman. With respect to the stamp on newspapers, the remarks had, he thought, sufficiently shown. If it needed a further illustration, the injustice and absurdity of that tax Why not tax barrister's going the circuit? The advertisement tax, which the State demanded from every advertiser, man, woman, or child—for, if they would open their mouths in print, even wet-nurses and errand-boys must pay their 1s. 6d was a double tax. It was a tax upon industry and upon want. Consider, the annualties and injustice of this tax. Why should those widespread news columns be taxed, when the widely-circulated omnibuses were allowed to run as free vehicles of any licence? Why should the house of Messrs. Longman, Brown, and Co. advertise to every lady and gentleman in the "Atlas" or the "Favourite" that they continued to make their everlasting shirts at 36s. the half-dozen? Why should they be allowed to send forth their gilt tidings for the benefit of the human race, without being called upon to pay a tax for such beneficence? Besides, almost everything was an advertisement. The tradesman's brass door-plate was an advertisement "Smith, tailor," was an advertisement. It would be quite as good for the Chancellor of the Exchequer just for once bending his mind to the consideration of brass (Laughter.) to tax the brass plate of the tradesman, as well as the type of the printer.—Mr. Cobden, M.P., said that were three propositions before them—the paper duty, the advertisement duty, and the stamp duty on newspapers; all of which were most injudicious, and most inconsistent burdens upon knowledge. The largest claimings for the benefit of the human race, when

THE INUNDATION OF CHRISTCHURCH MEADOWS, OXFORD.

THE INUNDATION AT OXFORD.

The neighbourhood of the city of Oxford has suffered greatly from the recent floods; and the large illustration engraved upon page 497, and that upon the present page, fully attest the state of the inundation at the close of last week. The *Oxford Chronicle* of Saturday last states the floods to have undergone but little abatement within the last eight days; and in the districts to the south and west of the suburbs large breadths of meadow land are still submerged, and boats are seen rowing where the eye was accustomed to recognise tracts of fine pasturage. The height of the water has fluctuated considerably in accordance with the unsettled state of the weather, some heavy showers having fallen at intervals in the early part of the week, by which the floods, as soon as they began to subside, were temporarily replenished. After a temporary interruption on the Great Western line, a mile or more from the Oxford station in the direction of Abingdon, arising from the action of the water in shifting the ballast, the rails were last week again rendered steadfast, and the direct communication resumed. The line, however, continued partially under water at the above spot referred to; and a further interruption, resulted from the same cause, took place at this very part of the line, on Wednesday last (the 24th. These casualities on the Great Western are not attended with any risk to passengers; on the contrary, the caution which has been observed in passing along the portion of the line referred to, and the promptitude with which the convenience of the passengers has been provided for, so as to occasion the least possible delay, deserve to be acknowledged. Thus, on Wednesday, the down-train from London, due at 3.58 P.M., not having arrived within ten minutes of its appointed time, by which the starting of the up-train from Oxford was correspondingly delayed, Mr. Larkman, the station-master, set out with the latter train to explore the way, taking every precaution to avert accident. On reaching the Abingdon-road bridge, at Cold-harbour, the down train was found at a stand-still a few yards beyond that bridge, having been unable to proceed, owing to the operation of the water in unsteadying the rails. Further accounts state that the Cherwell and Isis are, in extent, more like seas than rivers. All descriptions of property were to be seen floating down the waters, and carcases of sheep, pigs, and horses, were seen lying in many parts of the country where the water has been drained off. On Thursday, the 25th, a boatman found the body of a woman, and an inquest was held on the deceased: she had been overtaken by a sudden rush of water while walking in the meadows, and was too old and infirm to gain the high ground. In the course of the inquiry, the coroner said this was the third inquest he had held during that day alone, on the bodies of persons who had been drowned; and three other bodies were then awaiting inquests. On Friday, the driver of a waggon was jerked from his seat into the road, owing to the vehicle dropping into a deep pool: the poor man was killed upon the spot. No fewer than seven boats, rowed by University men, had been upset, and several of the occupants escaped with the greatest difficulty. The railway passengers have for several days been rowed to and from the station to the city in boats.

BIRMINGHAM.

The disastrous floods commenced at Birmingham on the 11th ult., when the river Rea, a small stream which runs through the lower part of the town, rose to between eight and ten feet; and the arches of the bridges being inadequate to convey the water pouring down the river, the surrounding neighbourhood was speedily inundated. For some miles south-west and north of Birmingham, the fields on both sides of the river were covered with water, and presented the appearance of one immense lake.

The streets connecting the parish of Birmingham with the hamlets of Deritend and Bordesley—Moseley-street, Cheapside, Bradford-street, and Digbeth—were rendered impassable except by vehicles; but the most serious injury was done to property in those streets which run parallel with the Rea.

In Rea-street, and other streets in the vicinity, the inhabitants of the houses were flooded out or obliged to take refuge in the upper stories of their dwellings.

The family of one poor woman had a narrow escape. A new row of houses has recently been erected, one of which abuts on the river in Mill-lane, in the neighbourhood of Deritend-bridge. About half-past six o'clock a crack was heard; the inmates fled, and the end wall of the house was almost immediately precipitated into the river. No person, very fortunately, was hurt.

In the foreground of the accompanying Illustration are shown the remains of the house in Mill-lane, a short distance below Deritend-bridge. Wherever the houses receded from the stream, so as to permit the expansion of the water, it overflowed its banks, giving to all the lower parts of the town the appearance of an immense lake, above the surface of which the street lamps were just visible. Sheep, pigs, and property of various kinds were swept away by the current.

THE INUNDATION AT BIRMINGHAM, SKETCHED BELOW DERITEND-BRIDGE.

FOYNES HARBOUR, RIVER SHANNON.—(SEE NEXT PAGE.)

THE LATE DR. MANTELL.

The renowned geologist, Gideon Algernon Mantell, LL.D., F.R.S., died on the 10th inst., aged 64. Dr. Mantell, who derived his claim to the honorary appellation of Doctor from the degree conferred by a foreign University, commenced his professional career as a general practitioner at Lewes, in Sussex; and, although better known to the public of Great Britain as a man of science and a lecturer, had good success in his profession, and enjoyed a large business at Lewes. He found also time to cultivate the literature of medicine. The medical journals contain many of his papers—more especially one on the use of the Ergot of Rye, published in the *Lancet* in 1834—which, as the reputation of the author as an accoucheur was great, excited considerable attention at the time.

In 1835 Dr. Mantell left Lewes, and began practice at Brighton. Thence he proceeded to London in 1839: residing first at Clapham, and subsequently in Chester-square. His prosperity as a medical man in London, was scarcely commensurate with his provincial fame and his undoubted ability; but his talents had become prominent, and deservedly popular, in another sphere of knowledge. Dr. Mantell had imbibed, at an early period of his life, a taste for natural history pursuits, and while at Lewes, was led to devote himself, with great natural enthusiasm, to the investigation of the fossils of the Coalk and of the Wealden of Sussex. Little attention had been excited among geologists to the wonderful organic remains of this district: to a mind of Dr. Mantell's penetration and sagacity a rich field presented itself for observation. So early as 1812 Dr. Mantell commenced forming, at Lewes, the magnificent collection of 1800 specimens of fossil bones, which is now in the British Museum. In 1822 appeared his "Fossils of the South Downs," a large quarto work, with forty plates, engraved by Mrs. Mantell, from drawings by the author. Another work was published by him about the same time, entitled "The Fossils of Tilgate Forest," and, compared with the geological literature of the period in which they were written, they are of superior merit. In 1825 Dr. Mantell was elected a Fellow of the Royal Society, and he has contributed some important papers to its "Philosophical Transactions." For his memoir "On the Iguanodon" he had the honour, in 1849, to receive the Royal medal. He was also an active member of the Geological Society, and in 1835 was presented with the Wollaston Medal and Fund, in consideration of his discoveries in fossil comparative anatomy generally. When Dr. Mantell removed to Brighton, his collection being materially added to, was purchased by the trustees of the British Museum for the sum of £5000. In London his fame as a geologist stood pre-eminent. Dr. Mantell took great delight in imparting to others a knowledge of his favourite science: he was fluent and eloquent in speech, full of poetry, and extremely agreeable in manners to all who manifested an admiration of his genius. He now turned his attention to the more popular and attractive works for which his name will be chiefly remembered—"Wonders of Geology," "Medals of Creation," "Geological Excursions round the Isle of Wight," and an enlarged edition of his "Thoughts on a Pebble"—all of which are profusely illustrated, and have passed through several editions. His latest work was a handbook to the organic remains in the British Museum, entitled "Petrifactions and their Teachings." To these may be added, "Thoughts on Animalcules," and "A Pictorial Atlas of Fossil Remains," selected from Parkinson's and Artis's palæontological illustrations; and among his early productions, a handsome quarto narrative, with portraits, of the "Visit of William IV. and Queen Adelaide to the Ancient Borough of Lewes," which included some original poetry. Dr. Mantell was a most attractive lecturer, filling the listening ears of his audience with seductive imagery, and leaving them in amazement with his exhaustless catalogue of wonders. His style, both in speaking and writing, was fluent, and singularly free from technicalities—qualities which went far to render his works popular, and make him a favourite amongst our institutions for diffusing knowledge amongst the people.

THE LATE GIDEON A. MANTELL, LL.D., F.R.S.—FROM A DAGUERREOTYPE BY MAYALL.

SCENE FROM "ANNE BLAKE," AT THE PRINCESS THEATRE.

We this week present our readers with an illustration from this highly-poetic drama, by Mr. Westland Marston. The incident we have selected is one in relation to the portrait. It occurs at the end of the fourth act, in which, after touching the heart of *Anne Blake* with the story of her parents, *Colonel Thorold* places in her hands the likeness of her mother. The dramatist has shown extraordinary skill in the management of all that relates to this miniature; introducing it early in the play, and preparing with the nicest tact for the crowning effect. Mr Kean's acting in the scene is admirable; and, indeed, throughout the piece, his performance maintained a mysterious and increasing ascendancy, only to be realised by the subtle artist; and, moreover, exceedingly difficult in the presence of so majestic an assumption as Mrs

SCENE FROM THE NEW PLAY OF "ANNE BLAKE," AT THE PRINCESS' THEATRE.

Kean's *Anne Blake*. The excellence of this, indeed, made us at first overlook the general acting of the play.

Due praise, however, must now be rendered to Mrs. Winstanley, for her most elaborate and powerful interpretation of *Lady Toppington*, whose worldly sarcasm was such as might have withered her plebeian husband, had he not been too obtuse for feeling. Mr. Addison, somewhat extravagant on the first night, has since improved in the latter part. Nothing, therefore, now remains to impair the elegance with which this fine play is calculated to impress the mind—conducting, as it does, the purest poetry with the simplest and most graceful of dramatic forms. The scenery with which it is adorned is beautifully painted—a series, in fact, of the most handsome interiors that we ever recollect to have witnessed.

FOYNES HARBOUR, RIVER SHANNON.

In a former Number of this Journal we gave to our readers some Illustrations descriptive of the Port and Town of Galway, in Ire and. The public are aware of the fierce local contest which has been for several years maintained between the rival ports of the Shannon and of Galway Bay, touching their respective merits. It is a great proof of the milder genius of modern times that this civil, or uncivil, warfare has not been settle l in the manner which might have been resorted to in the days of Sir Callaghan O'Brallaghan, and that it has produced blue books in place of duels, consuming printer's ink rather than gunpowder, and substituting pens for hair-triggers. The weighty question, in place of being fought out by the Claddagh fishermen and the Garryowen boys, was by the late Government referred to the gentler tribunal of Lord Granville, the Hon. Wm Cowper, and their colleagues. These accomplished gentlemen pronounced a sentence which was grounded on the memorable dictum of Sir Roger de Coverley, and which declared that "much was to be said on both sides." Lord Derby on being appealed to in the last session, and knowing well that a state of blame is not a state of fact, tossed a new e ement to settle the knotty point. The last commissioners' report has been given to the public by the Board of Admiralty. It decides the question which had been left undetermined by the predecessors, and expresses the strongest preference for the Shannon over Galway. It is the highest glory the river of St Senan has won since Edmund Spenser described it as "the spreading Shenan spreading like a sea." In justice to the victor, having already noticed Galway, we think that it will neither be without interest nor importance, that we should introduce our readers to the port which has now received the naval crown of victory from Captain Beechey and his associates.

The river Shannon flows for upwards of 60 miles, from Limerick to the Atlantic, and may be divided into two parts; the one extending from Limerick to the Harbour and Island of Foynes, distant from Limerick about 22 miles by land; the other from Foynes to Kerry-head and Loop-head, where, by an *embouchure*, 8½ miles in breadth, it rolls its vast volume of water, accumulated during a course of between 200 and 300 miles, into the ocean. It is marked in approaching it by the high peaked "Mountain of Brendon," the highest land full in the Irish Islands; and, as Captain Beechey's report informs us, it may be safely approached at any time "when it would be prudent to run for a port at all." From the heads to Foynes Island, and, indeed, beyond Foynes, the Shannon may be considered one great tidal harbour, with successive anchorages on the north and south shores. In this, the lowest part of the river, the navigation is so clear as to be safe for vessels of war, or steamers of any size, with no other guidance than the Admiralty charts and sailing directions. From Foynes to Limerick, and more especially for the last ten miles of the way, the channel becomes narrower and more difficult; some rocks and shallows intervene; and though heavy merchant-ships pass to the quays, and will, since the construction of the docks, do so with greater facility and safety, it is still but a bad navigation, liable to de ay and occasional disappointment.

The Harbour of Foynes is thus the natural outport of Limerick, a city of considerable trade, a port of the third class, in which nearly £200,000 of Customs dues were received even in the year 1848. The tonnage of the port, in 1849, as entered and cleared out, was 1428 vessels, with a tonnage of 219,856. The population, by the last census, was 53,438; and it is the seat of many large establishments, mercantile stores, and all that is characteristic of active trade. There is now in progress a splendid flax-mill, the first of the kind erected in the district. It is founded by J. N. Russell and Co., to whom this district is indebted for great local improvements and prosperity.

The Harbour of Foynes consists of a natural port between the island and the main land, 60 miles in extent. "To the south and east of the island," observe the Harbour Commissioners, "between the island and the main land, there is a spacious sheltered harbour, 60 acres in extent, capable of containing many vessels, in depths from three to six fathoms water, and in the best quality of holding-ground." These soundings are taken at lowest springs. "Upper Foynes," observed Captain Beechey, in 1832, "because it lies in dead water, and has a wide navigation to the very anchorage." Similar reports have been made to Parliament in subsequent years, all confirmatory of the evidence already quoted. But what is more material is, that, in addition to the natural harbour of 60 acres, already described, there has since been completed an artificial basin for the embarkation and landing of goods, giving 10 feet water at lowest springs, and with a rise of tide of 16 feet, and which, with a slight addition in the way of jetty, would provide 20 feet water at lowest spring-tides. These works are described as follows, in the report of the Board of Works for 1850:—" The works consist of a leading wharf and a slip for boats: the former 278 feet, the latter 210 feet in length From the wharf a pier projects towards the deep channel of the river for a length of 345 feet, and 40 feet in breadth. The harbour basin adjoining the pier, will be excavated to the depth of ten feet below low-water springs, and as the tide at springs rises to the height of 16 feet, there will be a depth at the pier of 26 feet high-water. Foynes Harbour basin, when complete, will consequently give secure quayage to sea-going ships at all times of tide; and, in fact, will be the only port in the Shannon possessing that advantage." The Ballast Board, which in Ireland performs the functions of our Trinity House, is now engaged in laying down buoys in both channels, and thus completing this useful work.

Such is the port to which Lord Derby's commissioners have assigned the superiority for Western Navication over all other naval stations in Ireland. We have been thus minute in our description, because we are aware that it is interesting and important to our commercial, British, and Irish readers, as well as to our readers both in British North America, and among the citizens of the United States. Navigators who wish to pursue the subject further, will find the latest information in the Admiralty charts, and in the sailing directions of the late lamented Captain Wolfe.

But we have some words to add in our capacity as artists. The country between Limerick and Foynes is nearly level, being part of the great limestone plain of Ireland. At Foynes, we enter the coal formation; and the slate clay rocks rise into bluff hills, picturesque and wild; over the face of which beautiful plantations have been scattered, giving relief to school-houses and to an elegant parish church and Roman Catholic Longhill, an adjoining village. We add Sketches of the Harbour and Basin, taken on the spot, showing not only its two approaches, but the finely-engineered line of road cut through the rocks. We also give an outline of the official map of the Port.

It would mislead our readers, however, if we were not to add that as yet, though much has been done in this harbour, there is one great deficiency, without supplying which, all that nature and art have accomplished, will still be incomplete. Foynes is situated 22 miles from Limerick. It is you need to connect the parent port with its out-port of Foynes by a railway, which, we learn from the commissioners' report, may be completed for less than £5000 a mile. This is absolutely required either to give the public generally, or the banks of the Shannon, the full benefit of the unexampled advantages of their most fortunate position.

We have abstained altogether, in this article, from entering into the controversy between the ports of Great Britain and those of Ireland in this matter. That can be settled at another occasion. It is a somewhat curious coincidence that it should have been the Right Hon. Edward Stanley, who, in 1831, as Irish Secretary, should first have brought the Shannon and the Harbour of Foynes under the notice of Parliament; and that it should have fallen also to his lot, as Earl of Derby and First Minister, to have completed his early work by the issue of the late commission, which has pronounced so favourably on objects recommended thirty years back by himself, and by the able and excellent General Sir John Burgoyne, who then presided over the department of Public Works.

THE LATE DUKE OF WELLINGTON'S FIRST REGIMENT.—Upon several occasions the 33rd has been mentioned as the Duke's *first regiment*; whereas, he was appointed Ensign, 7th March, 1787, to the 74th Regiment, then the Royal Highlanders; and, in the "Army List" for 1788, his name stands among the Ensigns of that corps as the "Hon. Arthur Wesley." His Grace afterwa ds transferred into the 33rd Regiment, in which he so long served, and which was honoured by attending at the funeral.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

It having been asserted, on what may be considered good authority, that a large augmentation is about to be made to our naval forces, the market for Consols has ruled very inactive during the whole of the present week, and prices have given way one quarter per cent. The *Bears* have operated largely, yet a full average money business has been transacted on account of one public.

On Monday the Three per Cent. Consols were flone at 101¾ ⅜; the Three per Cents Reduced, 100⅝ ⅞; the New Three-and-a-Quarter per Cents, 103¾ to Consols for Account, 101⅝; India Stock was 277; India Bonds sold at 80s. to 83s.; Ditto, under £1 000, 75s. to 83s.; Exchequer Bills, 70s. to 73s. premium.

The changes, on Tuesday, were trifling; but, on Wednesday, the Three per Cents fell to 101 and 101⅛, the Three per Cents Reduced (since marked 100⅜) and the New Three and-a-Quarter per Cents, 103⅝. Bank Stock was 272½; Exchequer Bills realised 70s. to 72s.; and India Bonds, 80s. to 83s. premium. The chequer Bills realised 70s. to 72s.; and India Bonds, 80s. to 83s. premium. The Market, on Thursday, was inactive; yet the quotations were a shade higher. The Three per Cents Reduced were quoted 100⅝ ⅞; the Three per Cent. Consols, 101⅛ ⅜; and the New Three-and-a-Quarter per Cents, 103⅝ ⅞. Long Annuities marked 6 7-16 ⅜, and 6⅞; India Bonds, 83s. Exchequer Bills, 72s. 68s. premium, Bonds £1 000, 72s.

Since we last wrote the imports of bullion have been large, viz., £438 000 in gold from Sydney and Port Philip and 101 000 do. lars in specie from New York. In addition to the above arrivals, about £20,000 in silver has come to hand from France.

The total nole circulation of the United Kingdom, according to the last returns, was £19,342,968, or not less than £2 800,000 more than in the previous month, and £1 ··· 105 above the total at the corresponding period in 1851.

The value of French 20f. pieces, American eagles, and Dutch guilder pieces at the Bank of England is now £3 lss 7½d per ounce.

The transactions in the Foreign Bond Market have been devoid of interest; Spanish securities—owing chiefly to the refusal of the Government at Madrid to re-consider the existing law in reference to the fisheries having ruled heavy. Mexicans have slightly advanced. Northern Bonds have been well supported. Austrian Scrip has had an upward tendency. Turkish Scrip—as no intelligence has yet been received of the future intentions of the Ottoman Government in regard to the loan, has fallen to 1¾ prem. Swedish Scrip has been heavy, at 1¼ discount. On Monday, Aust ian Scrip was quoted at 5⅛; Brazilian Bonds, 101; Ditto, New Four-and-a-Half per Cents, 97; Danish Bonds, 1825, 99 per Cents, 100; Equador, 5; Granada, Deferred, 11¾; Mexican Three per Cents, 25 to 25⅜; Portuguese Four per Cents, 36½ to 36⅝; Spanish Three per Cents, 22 to 22½; Ditto, New Deferred, 9 to 9¼; Spanish Committee's Certificates, not funded, 5½; Swedish Loan, 1⅛ dis.; Turkish Ditto, 1¼ to 1⅜ prem. The fluctuations in prices on Tuesday and Wednesday, were comparatively small. On Thursday, Brazilian Bonds and Half per Cents were 98 to 97⅜; Ditto, New Five per Cent Bonds, 101, Granada, Deferred, 13½ to 13⅝; Mexican Five per Cents, 25½ to 24⅞; Portuguese Four per Cents, 36½; Russian Four-and-a-Half per Cents, 104⅜; Spanish Three per Cents, 21½; Ditto Passive, 6⅛; Spanish Committee's Certificates, not funded, 3¾ per cent.; Austrian Five per Cents, 83; Dutch Two-and-a-Half per Cents, 66½ to 67; Dutch Four per Cents, 97⅞ to 98. A communication has been received from the Earl of Malmesbury, in reply to the memorial forwarded to his Lordship a short time since, respecting the Turkish Loan. Government does not appear likely refuse to interfere in the matter; but it intimates that sufficient caution has not been shown by the scrip holders.

The Foreign Exchanges have undergone some slight changes. From them, we perceive that gold is now about the same price in London as in Paris; but at Hamburgh it is 29 per cent dearer than in London. At New York, the exchange is 0 67 per cent. in favour of England.

In miscellaneous securities, a very extensive business has been doing, at higher rates. Sales have taken place in the Bank of Australasia, at 71½; Bank of British North America, 60⅜ 60; Colonial Bank, 10; English, Scottish, and Australian Bank, 5⅜; London Chartered Bank of Australia, 5 to 5⅛; Provincial Bank of Ireland, 4⅞; Union Bank of Australia, 6¾ 6⅞; Ditto, N·w (£2 10· paid), 8; Victoria Docks, 6¾; Australian Agricultural Company, 56 to 56½; General Screw Steam Shipping, 3¾ ex New, Neptune Shipping Company, 1¾ ex Land Endowment, 2¾; Ditto, Preference, 4 Oriental's Steam, 9¾ to 9⅞, ditto (£99 paid), 51 to 50; Mediterranean Steam, 4 to 4 prem.; Bank of India Australia, and China, 1¾ to ⅞; North of Europe Steam, ¾ dis. to ¾ prem.; French Crystal Palace, ¼ to ⅜ prem.; General Steam Navigation, 2¾ to 2½; Patent Steam Fuel, ¾ prem.

Notwithstanding the immense demand for money for commercial purposes, the private bankers and others have not increased the rate of discount, which upon approved security, is still 2 per cent. per annum. English Railway Shares have been in fair request, yet, mostly, full quotations; but foreign lines have ruled heavy. The sales for the present month are £731,983. The proportion held by brokers comprises £219,640. The total "calls" for the present year are about £8,000,000 against £6,000,000 in 1851. The following are the official closing prices on the 3rd inst.:—

ORDINARY SHARES.—Aberdeen, 23½; Bristol and Exeter, 110; Caledonian, 7⅞; Chester and Holyhead, 20; Cork and Bandon, 10⅞ Dublin and Belfast Junction, 4⅜; Dundee, Perth, and Aberdeen Junction, 7½; East Anglian, 1½; Do. A, £16 Paid, 16; Eastern Counties, 12½; East Lancashire, 7⅜; Edinburgh, Perth, and Dundee, 30; Great Northern Stock, 8⅝; Ditto, A Stock, 59, Great Southern and Western (Ireland), 107; Great Western, 56½; Lancaster and Carlisle, 8⅞; Lancashire and Yorkshire, 87½; Ditto, Fifths, 11⅜; Leeds, Northern 18½; London and Blackwall, 9⅝; London and Brighton, 108⅜; London and North-Western, 103½; South Western, 95⅛; Londonderry and Enniskillen, 2½; Manchester, Sheffield, and Lincolnshire, 32⅝; Midland, 80⅜; Ditto, Birmingham and Derby, 40⅝; Newry, Warrenpoint, and Rosstrevor, 8½; Norfolk, 51½; Ditto, New, 7½; Northern and Eastern, 20⅜; North British, 42½; Ditto, A, Deferred, 2½; North Stafford-shire, 13⅜; Oxford, Worcester, and Wolverhampton, 54½; Scottish Central, 98½; Scottish Midland, 58½; Shrewsbury and Birmingham, 16½; Do. A, £16 Paid, 8; Shropshire Union, 12½; South Eastern, 7⅜; Waterford and Kilkenny, 5½; Waterford and Limerick, 2⅞; York, Newcastle and Berwick, 76; Ditto, Extensions, 14½; Ditto, G.N.E. Purchase, 7½; York and North Midland, 62.

LINES LEASED AT FIXED RENTALS.—Midland Bradford, 108; Royston and Hitchin, 151½; Preston and Wyre Half-shares 2½; Wilts and Somerset, 106.

PREFERENCE SHARES.—Aberdeen 4 Cent., 103; Great Northern, 128; Ditto, redeemable at 10 per cent. pm., 112; London and Brighton, 6 per cent., 158½; North British, 10¾; South Devon, New, 1½; York, Newcastle, and Berwick, 103.

FOREIGN.—East Indian, 97⅝; Namur and Liege 5½; Paris and Strasbourg, 35; Rouen and Havre, 22¾; Sambre and Meuse, 11¼; West Flanders, 6; Western of France, 20½.

Moving Shares have ruled very steady. Australian have been done at 6; British Iron, 8; Copiago, 7⅛; No ream Monde, 2¾; Santiago de Cuba, 13½; Tth Creek, 11½; United Mexican, 8½.

Friday Afternoon.—As most of the jobbers have refused to operate until after the contents of the Budget are known, Consols have been heavy to day, at drooping prices. The Three per Cents, for Money and the Account—have been done at 100 to 101; the Three per Cents Reduced, 100 to 100½; and the New Three-and-a-Quarter per Cents, 103⅜. India Stock is 277, Bank Stock, 273, India Bonds, 83s., and Exchequer Bills, 68s. to 72s. premium. Foreign Bonds and Railway Shares have commanded very little attention.

THE MARKETS.

CORN-EXCHANGE (Friday).—The present week's arrival of English wheat up to our market coastwise is 3,000 quarters, and to 2 20 quarters, chiefly in the inland counting. By land carriage the supplies fresh on Monday were very moderate, and the show of samples was comparatively small. As millers in general hold the mid-week stocks, the demand for fine qualities of wheat was pretty steady, at rates fully equal to those of Monday last; indeed, in some instances, that day's quotations were somewhat exceeded. From distant markets the imports of wheat have been reported chiefly from the Baltic. Most kinds commanded a firm inquiry, at fully the late advance in prices. Floating cargoes of wheat were mostly held for more money, but the business doing was not extensive. Fine malting barley moved off steadily, at per-lone rates; but grinding and distilling sorts met a very limited demand. In the value of malt no change took place. The quantity on offer was but moderate. We had rather an improved sale for peas. In prices, however, no change took place. Beans, peas, and flour firm. The top price of the latter was 43 per 280 lb.

ARRIVALS.—English wheat, 2700 barrels; foreign, 1270 quarters; flour, 2100; flour, 1900 sacks and barrels.

[illegible] Wheat, [illegible] to 6d; barley, [illegible] to 6d; malt, [illegible] to 6d; oats, [illegible] to 6d; beans, [illegible] to 6d; peas, [illegible] to 6d; flour, [illegible] to 6d per sack.

Barley, [illegible] to 6d; malt, [illegible] to 6d; oats, [illegible] to 6d; beans, [illegible] to 6d; peas, [illegible] to 6d; flour, [illegible] to 6d per sack.

Liverpool, Aug. 14th.—Wheat, [illegible] to 6d; barley, [illegible] to 6d; malt, [illegible] to 6d; oats, [illegible] to 6d; beans, [illegible] to 6d; peas, [illegible] to 6d; flour, [illegible] to 6d per sack.

Hull, Aug. 14th.—Wheat, [illegible] to 6d; barley, [illegible] to 6d; malt, [illegible] to 6d; oats, [illegible] to 6d; beans, [illegible] to 6d; peas, [illegible] to 6d; flour, [illegible] to 6d per sack.

Leeds, Aug. 14th.—Wheat, [illegible] to 6d; barley, [illegible] to 6d; malt, [illegible] to 6d; oats, [illegible] to 6d; beans, [illegible] to 6d; peas, [illegible] to 6d; flour, [illegible] to 6d per sack.

Bristol, Aug. 14th.—Wheat, [illegible] to 6d; barley, [illegible] to 6d; malt, [illegible] to 6d; oats, [illegible] to 6d; beans, [illegible] to 6d; peas, [illegible] to 6d; flour, [illegible] to 6d per sack.

Cork, Aug. 14th.—Wheat, [illegible] to 6d; barley, [illegible] to 6d; malt, [illegible] to 6d; oats, [illegible] to 6d; beans, [illegible] to 6d; peas, [illegible] to 6d; flour, [illegible] to 6d per sack.

Dublin, Aug. 14th.—Wheat, [illegible] to 6d; barley, [illegible] to 6d; malt, [illegible] to 6d; oats, [illegible] to 6d; beans, [illegible] to 6d; peas, [illegible] to 6d; flour, [illegible] to 6d per sack.

Belfast, Aug. 14th.—Wheat, [illegible] to 6d; barley, [illegible] to 6d; malt, [illegible] to 6d; oats, [illegible] to 6d; beans, [illegible] to 6d; peas, [illegible] to 6d; flour, [illegible] to 6d per sack.

Limerick, Aug. 14th.—Wheat, [illegible] to 6d; barley, [illegible] to 6d; malt, [illegible] to 6d; oats, [illegible] to 6d; beans, [illegible] to 6d; peas, [illegible] to 6d; flour, [illegible] to 6d per sack.

Waterford, Aug. 14th.—Wheat, [illegible] to 6d; barley, [illegible] to 6d; malt, [illegible] to 6d; oats, [illegible] to 6d; beans, [illegible] to 6d; peas, [illegible] to 6d; flour, [illegible] to 6d per sack.

Sligo, Aug. 14th.—Wheat, [illegible] to 6d; barley, [illegible] to 6d; malt, [illegible] to 6d; oats, [illegible] to 6d; beans, [illegible] to 6d; peas, [illegible] to 6d; flour, [illegible] to 6d per sack.

Galway, Aug. 14th.—Wheat, [illegible] to 6d; barley, [illegible] to 6d; malt, [illegible] to 6d; oats, [illegible] to 6d; beans, [illegible] to 6d; peas, [illegible] to 6d; flour, [illegible] to 6d per sack.

Londonderry, Aug. 14th.—Wheat, [illegible] to 6d; barley, [illegible] to 6d; malt, [illegible] to 6d; oats, [illegible] to 6d; beans, [illegible] to 6d; peas, [illegible] to 6d; flour, [illegible] to 6d per sack.

Foreign: Amer can flour 19s 6d to 20s per barrel, French 35s to 36s per sack.

Seeds: Clover and timothy are in short supply, but the amount of business doing in those articles is very moderate [illegible] to 6d per cwt., crushing, 6s to 6s; Mediterranean and Odessa, 6s to 6s; Bombay, 6s to 6s per cwt. Coriander, 8s to 10s per cwt. Brown mustard-seed, 7s to 9s; white, 7s to 10s. 6d. Tares, 6s to 8s 6d per bushel. Rape cake, 6s to 6s 6d per ton. Linseed cake, £5 5s to £5 10s per ton. Coleman and Morton, £5 5s to £5 10s per ton. Rape cakes £4 10s to £5 5s per ton. Canary, 38s to 42s per quarter.

Tea.—Sales of 1 kinds of tea the demand is less active; in some instances, prices have a shade lower than last week. Common congou is selling slightly at 9½d to 10d per lb.

Sugar.—Since our last report, very limited business has been doing in a descriptions, and prices have undergone but a trifling change. Fine grocery Barbadoes, 39s 6d to 40s; middling to good, 36s to 38s; fine grocery Mauritius, 36s to 37s 6d; fine brown, 33s; fine grocery and fine crystallised, 36s to 40s; low to middling ditto, 30s to 32s; fine to good refining, 34s to 35

AMUSEMENTS, &c.

ROYAL PRINCESS' THEATRE.—Last SIX Performances of Mr. BARTLEY previous to his final retirement from the stage. On MONDAY, LE MARIAGE, &c. will be performed in Duchess's in Much Ado about Nothing, and Captain Dudley in Charles the Second. On Thursday, Sir Edward Mortimer, Harry Wilders; and on Saturday, 11th, Sir Peter Teazle, in Twelfth Night, as Malvolio, for the Author and Co. To be engagement will conclude with Mr Bartley's Benefit, under the patronage of her Majesty and his Royal Highness Prince Albert, on Monday, 13th, when the day will be the 50th anniversary of his first appearance in London.

ROYAL PRINCESS' THEATRE, Oxford-street.—Under the management of Mr CHARLES KEAN.—On MONDAY, DECEMBER 6th, will be performed Shakespeare's comedy of MUCH ADO ABOUT NOTHING, and CHARLES the SECOND. Tuesday, Mrs Alfred Wigan, Mr Charles Selby, and the Spanish Gypsies. Wednesday, 8th, Anne Blake, the Foreign Brothers, and the Spitalfields Weaver. Thursday 9th, the Merry Wives of Windsor, and Sweetheart and Wife. Friday, 10th, Much Ado about Nothing, the Corsican Brothers, and the Spitalfields Weaver. Saturday, 11th, Twelfth Night and the Spoiled Child.

ASTLEY'S ROYAL AMPHITHEATRE.—Lessee and Manager Mr. W. BATTY.—Great and numerous additions to the Company of UNCLE TOM'S CABIN which nightly increase in popularity and attraction. Monster and Madness Act and the Amusement Artistes from Franconi's Cirque National, Paris, having been received with the utmost approbation, will appear every Evening. On MONDAY DEC. 6, and during the week, the entertainments will commence with the new and highly successful Equestrian Drama of Usurer from Cabin, with all its stirring, exciting, and interesting scenes from the Novel of the same name, to be followed by Batty's Juvenile SCENAS in the ARENA, supported by the first Native and Continental Talent. To conclude with the pantomime as performed at the Drury-lane Theatre. Every Evening. Private Boxes can be had of Mr. Batty. Private Boxes can be had of Mr. Batty. Private Boxes can be had of Mr. Batty

THE NEW SCREW STEAM-SHIP "ADELAIDE."

Britain, which also owe their origin to him. The engines of this vessel have been constructed at Millwall, by Messrs. Scott Russell and Co.; as also the ship, of which the lines are by Mr. Scott Russell.

The chief dimensions are as follow:—

Length over all	..	..	..	..	..	288 feet
Beam	..	..	..	..	..	38 ,,
Depth	..	..	..	..	..	27 ,,

Tonnage, 1822 tons.

Under these dimensions, space has been obtained for engines of 450-horse power, and for coals to last for 20 days' steaming; or, if required, for 32 days' steaming. Of goods, provisions, water, and stores, the forehold can carry 1275 tons, and the afterholds 350 tons. Besides the crew, these vessels can carry 80 first-class, and 120 second-class passengers

One of the most striking peculiarities of these ships is their shape, which combines very fine lines of entrance, and of run, with full bodies for capacity, great length of floor for easy motion when pitching, and a much rounder side than is usual in merchant ships, so as to give easy motion when rolling.

A second point of importance is the unusual strength of hull of these vessels. The wales are doubled, and exceed one inch in thickness, and the upper iron waterways are also doubled; in addition to which, an iron waterway of great strength, and a second stringer, and longitudinal angle-iron, extend the whole length of the lower deck.

Another provision for strength, serving also for safety in case of collision or touching the ground, is to be found in these vessels. It consists in the unusual number of water-tight iron bulk-heads which traverse the ship longitudinally and vertically, so as to form on the whole fifteen separate compartments, any one of which may be damaged without communicating with the others. Were this plan general, the safety of iron vessels, as well as their strength, would be greatly increased

Besides these bulk-heads, and intermediate between them, are numerous partial bulk-heads, which communicate strength to the ship, but without interfering with storage; of these there are nine.

The wood work of the ship has also been so formed as to add very much to the strength of the iron. The bulwarks, stanchions, covering-boards, and water-ways of the ship, are of the finest East India teak, as also are all the parts of the ship where strength is wanted. The whole of the beams of the spar-deck are teak, as also the skylights, and all parts much exposed to wear and tear. From its oily nature, teak is much more valuable than any other wood, when in combination with iron, as it preserves it from decay.

In consequence of her great length, this ship has four masts, so constructed, as to carry a large quantity of sail when in favourable circumstances, and to be housed very snugly in adverse weather.

The engines are of a peculiar construction, similar to those of the *Wave Queen*, which are distinguished for their rapid motion, and the absence of vibration and tremor, usually so annoying in steam-ships There are four engines and four boilers, so arranged that in case of any one or more getting out of order, or meeting with an accident, the others can all continue to work independently.

Amongst the accommodations for passengers are peculiar arrangements for ventilation to an unusual amount. On the deck is a handsome dining-saloon, fitted up with great taste, and decorated with panels designed and painted by Messrs. Crace, of Wigmore-street.

SMITHFIELD CLUB CATTLE SHOW.

We understand that the arrangements for the Prize Cattle Show held at the Bazaar in King-street, Portman-square, are upon a more extended scale than hitherto; the entries for every kind of stock, as well as implements, far exceeding those of former years.

In the cattle classes, the new plan comes into operation for the first time this year; so that the Devons, the Herefords, the short-horns, and in fact, all distinct breeds, compete only with their own class. Such has heretofore been the case with sheep; but the competition among the cattle has had relation solely to feeding, without any distinction as to breed This alteration is considered likely to afford a greater opportunity of judging of the respective merits of the cattle in the double success of breeding as well as feeding.

On Tuesday evening the arrangements for the reception of the prize cattle and implements were finally completed, under the direction of Mr. S. T. Braudreth Gibbs, the hon. secretary, and Mr. Halling, the manager. During the day the implements intended for exhibition—many of an entirely new and novel character—were received. The last hour up to which the specimens in that department were to be received was fixed by the rulers of the club for three o'clock on Thursday afternoon; while with regard to animals the admissions were extended to ten o'clock on Saturday night. The showyard, notwithstanding the vast addition made to it last year, has again been considerably increased by the removal of some stabling which intervened between the grand area and that portion formerly appropriated to the sheep and pig classes, and thus a commanding view of the entire show, from end to end, is now obtained. The building was lighted up on Tuesday evening for the purpose of trying the effect of some improvements in the illumination, introduced by the Imperial Gas Company, under the management of Mr. Richardson, the company's superintendent, and it was unusually brilliant and effective. The judges will make their inspection and award of their prizes on Monday, and in the evening the show will be illuminated for the private view. On Tuesday morning the exhibition of the cattle will open to the public, and continue open daily until Friday night, the 10th inst., when it will finally close.

In the Illustration the reader will recognise, in the centre of the Show-yard, the zinc statue of her Majesty, from the Great Exhibition of 1851.

THE BUDGET.

It cannot be said that any "factiousness" has been displayed towards the present Government; or that, in extraordinary circumstances of transition, and of irresistible, because necessary, change of opinion, any party or personal advantage has been taken, in or out of Parliament, of the past professions or present perplexities of any member of the Ministry. On the contrary, every disposition has been shown to give the Government a fair hearing and a fair trial, and to receive its new indications of policy, without criminatory reference to its old asseverations of unchanged and unchangeable fidelity to an exploded doctrine. Yet, it must be allowed, that while factiousness was allayed, curiosity was very much excited; and that, in reference more particularly to the Budget, a degree of alarm in some quarters, of wonderment in others, and of interest in all, was excited, which has not been equalled since the memorable day when Sir Robert Peel reformed the British Tariff, and inaugurated the now triumphant policy of Free-trade. Seldom or never has a Chancellor of the Exchequer addressed the House of Commons under more favourable circumstances than those which surrounded Mr. Disraeli on the night of the 3rd instant. The friends of the Ministry, fresh from a compromise that wore the air of a triumph, looked forward to a new victory; and its opponents, though quite sure that the State conuror could not "jump into the quart bottle" of an impossible readjustment of the national burdens, on the footing once promised, were quite prepared to applaud the Ministerial Budget, and to vote for it, if it dealt with the various and complicated items of the national revenue in a sensible, a far-seeing, a philosophic, and a statesmanlike manner.

In an exposition of unparalleled length, which occupied the Minister five hours and a half in its delivery, the Budget was slowly and deliberately, if not painfully, evolved. That which "had loomed in the future" vaguely, and without form, was rendered visible and palpable to an attentive legislature, and submitted on the morrow to the scrutinizing eyes of a vigilant public. We shall not imitate the example of some of our contemporaries, and consider the Budget simply as the production of a Minister converted against his will, but will endeavour to weigh it solely on its own merits, without reference to the past career of the particular Minister who framed, or the colleagues who supported it.

It is impossible to read over the details of this large project without coming to the conclusion that it was devised for popularity, and with a view to the conciliation of what Mr. Disraeli very justly calls "powerful minorities." There can be no doubt that some of these minorities will be thankful for what has been attempted on their behalf. In the case of the shipowners and the mercantile marine in general, the relief offered will meet with no opposition. Mr. Disraeli deserves credit for so unreservedly adopting the policy chalked out for him by many able public writers and speakers, in the abolition of the many anomalous and vexatious imposts that impeded that particular branch of Trade and Industry. In this respect the Budget is so unexceptionable that the wonder is, not so much that Mr. Disraeli has adopted such a course, as that preceding Governments were supine and careless enough to leave him the opportunity. So in regard to the Sugar-duties, the Chancellor of the Exchequer, notwithstanding his past professions, and those of his colleague, the Colonial Secretary, has acted wisely, both in what he has avowed his determination to do, and in what he has resolved to leave undone. If any Protectionist should reproach him with doing too little, it must be remembered that Protectionists are now few, and too powerless to render their opposition of any avail; Free-traders, on the other hand, will be well disposed to concede that the Minister has exercised a wise and just discretion.

But these two preliminary portions of the Budget happen to be the most unimportant. When the agriculturists are offered their particular boon, the weakness of the Minister, and the unsatisfactory nature of his Budget, become apparent. Refusing wisely to consider a point, which he once dwelt upon as of essential importance—the transfer of certain local burdens to the general fund—and treating the Poor-laws as if they required no special legislation on behoof of farmers, the Minister proposes to relieve agriculture—which he still asserts to be distressed, although the country is prosperous—of one-half of the Malt-tax, and one-half of the Hop-duty. If a Malt-tax be a bad thing, if it impede the growth of barley, if it injuriously affect the farmer, if it render the poor man's daily beverage dear, it is certainly a fair subject for discussion whether it should not be totally repealed. The only question in that case would be whether the revenue could afford to lose the large sum which it produces. But, if its reduction to one-half should be attended with a loss of revenue to the amount of £2,500,000, or thereabouts, without a corresponding benefit to the farmer, without any sensible diminution of price to the consumer, and with the same cost of collection as before, Parliament will have to consider whether such a remission of duty is not a most reckless sacrifice of the national resources. The same argument applies even more forcibly to the Hop-duty. Such taxes, if meddled with at all, should be abolished. No classes but monopolists and middle-men are benefited by a half-repeal.

The reduction of the Tea-duties, wise in itself, is open to a similar objection. There is no valid reason, that we are aware of, why so long a period as six years should be suffered to intervene between the present anti-commercial tax, and the prospective equitable and trade-encouraging tax of one shilling per

TRIUMPHAL ENTRY OF THE EMPEROR NAPOLEON III. INTO PARIS.—(SEE PAGE 514.)

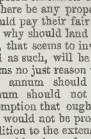
pound on tea. These, however, are the two boons which the Government promises the people, as the sum total and result of the benefits to accrue from Mr. Disraeli's Budget. Beer, that may be made cheaper to the extent of one farthing per pint, if the great brewers and the licensing system will allow; and tea to be made cheaper two or three years hence, and only as cheap as it ought to be six years hence, as the boons that are to be purchased at the price of an extension of the Income and Property-tax, and the doubling of the House-tax. The country has already begun to ask itself whether the boons, if boons they shall prove, would not be purchased too dearly at such a price as this. In these particulars, short as is the period since its promulgation, the Budget has already raised a storm of unpopularity which it will be found difficult, if not impossible, to allay.

In point of theory, there can be little, if any, objection to the proposed extension of the Income and Property-tax. It is right, if there be any property and any income in Ireland, that they should pay their fair share to the imperial burdens of the State; but why should land in that country be exempt? This is a point, too, that seems to involve the national faith with the fundholder, and as such, will be duly and carefully considered. There also seems no just reason why, if the possessor of an income of £150 per annum should pay a tax, the owner of £100 per annum should not be equally liable. The only line of exemption that ought to be drawn is that line under which the tax would not be profitable to collect. But, when we find that, in addition to the extension of this tax to the large, industrious, and estimable class of people who earn incomes between £100 and £150 per annum, and who enjoy an amount of interest on realised property ranging from £50 to £150 per annum, this very same class is to be made liable to a double house-tax, it is impossible to avoid the expression of an opinion that the new Budget is unjust and impolitic. Millions of influential people, whom it is not wise to offend, would much rather pay the old price for their beer and their tea than enjoy the questionable reductions which Mr. Disraeli promises them, at the cost of so immediate and so severe a drain upon their scanty resources. In this respect the Budget appears to us to be a huge mistake. We have not left ourselves room to dwell upon some of the other points involved, such as the alleged breach of faith in taxing the fundholder while the landholder goes free, or the reduction of Income-tax, calculated to benefit farmers and the owners of properties and perishing, as distinguished from fixed income. In the latter respect the Budget might possibly become popular; but as a whole, both for its omissions (which are many and unwise), and its commissions (which are grossly unfair to by far the most restless, powerful, and influential portion of the community—the poorer stratum of the middle classes), we conceive Mr. Disraeli's long-expected Budget to be a gigantic mistake, and a measure which will never be allowed to pass.

The signs of opposition are gathering thickly around it, both in and out of Parliament; and it is felt on all hands that the great question of our future financial policy still awaits a solution.

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

LIEUTENANT-GENERAL SHULDHAM.

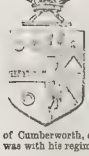


EDMUND WILLIAM SHULDHAM, Esq., of Dunmanway, county Cork, Lieutenant-General in the Hon. East India Company's Service, andmany years Quarter-master-General at Bombay, died at Dunmanway, on the 17th ult., aged seventy-three.

The ancient family which the General represented, and of which the late Admiral, Lord Shuldham, was a junior member, held at an early period, the estates of Shuldham and Marham, in Norfolk; which were eventually conveyed by the heiress of Humphrey de Shuldham to the family of Sir Thomas Hare, Bart., of Stow Bardolph. The first settler in Ireland was Humphrey's grand-nephew, Edmond Shuldham, who married Mary, daughter and heir of the McCarthy Spanagh, and thus transmitted to his descendants the representation of one of the branches of the Royal Milesian race of McCarthy, Princes of Carbery. Through his grandmother, Judith, daughter and coheir of Beverley Usher, Esq., M.P., General Shuldham was fourth cousin to the late Duke of Wellington; his Grace having been fourth in descent from Sir William Usher, Beverley Usher's brother.

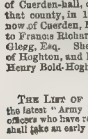
General Shuldham married Harriet, daughter of T. Rundell, Esq., of Bath, and leaves three surviving children; viz. Edmund, who succeeds to the estates in the counties of Cork and Limerick; Leopold; and Harriet-Maria-Catherine, married to Lord Carbery.

D. F. HAYNES, ESQ., LATE OF LONESOME AND ASHSTEAD, SURREY.



THIS gentleman, the brother-in-law of the poet Shelley, and the personal friend of Lord Byron and Sir Walter Scott, died, deeply regretted, on the 11th ult., at Leatherhead, and was buried in the family vault at Woodcote Church. Mr. Haynes was the author of "the Romance of the Castle," and several other works. His family, one of antiquity in Scotland, suffered severely in the rebellions of that country. By Mary, his wife, daughter of the late Sir Timothy Shelley, Bart., of Castle Goring, he leaves one son, Edward Haynes Esq., of the Inland Revenue department, and two daughters Mary, married to Henry Burnard, Esq., of Wells; and Flora Brenda, married to William Henry Emerson, Esq., of Cumberworth, county Lincoln, an officer in the 10th Regiment, who was with his regiment at the battle of Sabraon.

DAME SUSANNA HOGHTON, RELICT OF SIR HENRY PHILIP HOGHTON, BART.



THE death of this venerable lady, who had passed her 90th year, occurred on the 2nd inst., at her seat, Astley-hall, county Lancaster. She was daughter and heiress of Peter Brooke, Esq., of Astley, whose great-grandfather, Richard Brooke, Esq. (second son of Sir Peter Brooke, of Mere, Cheshire), married Margaret Charnock, a considerable heiress, and acquired with her the estates of Astley, Charnock, &c. The family of Charnock was one of the oldest in the county of Lancaster. Richard, son of Adam de Chernoc, gave lands in Chernoc to the Hospital of St. John, in Jerusalem—temp. Richard I.

Susanna, Lady Hoghton, married first, Thomas Townley Parker, Esq., of Cuerden-hall, county Lancaster, by whom (who died High Sheriff of that county, in 1794) she had one son, Robert Townley Parker, Esq., now of Cuerden, M.P. for Preston; and two daughters—Susan, married to Francis Richard Price, Esq.; and Anne, married to John Baskerville Glegg, Esq. She married, secondly, Sir Henry Philip Hoghton, Bart., of Hoghton, and by him, who died in 1836, had a son, the present Sir Henry Bold-Hoghton, Bart.; and a daughter, Fanny-Elizabeth.

THE LIST OF SURVIVING WATERLOO OFFICERS was drawn up from the latest "Army List," and, therefore, does not include the names of those officers who have retired from the service since the period of the Battle. We shall take an early opportunity of completing this list.

FOREIGN AND COLONIAL NEWS.

FRANCE.

(From our own Correspondent.)

PARIS, DEC. 8.

THIS is a strange country, and a strange people. The result of the voting certainly seemed to intimate that they desired the Empire, and the establishment of Louis Napoleon at its head; we all know how dearly they love sight-seeing and splendour, and parade; and yet, let the papers say what they may, it is an unquestionable fact, that the passage of the *cortège*, down the Champs Elysées, brought neither crowd (comparatively speaking) nor excitement; there was abundant room to circulate on foot and on horseback; few cries were heard; and the whole thing passed almost as an affair of every-day occurrence. The weather, which was cold, grey, damp, and gloomy, *may* have had some little influence in keeping people away, and certainly added to the *tristesse* of the affair; but really the enthusiasm that could be thus easily chilled, could not have been of a very energetic nature. The best critique we have heard is from a witness of two very different ceremonies—one in England, the other in France—namely, that the proclamation of the Empire was far less magnificent than the funeral of the Duke of Wellington, and a great deal more melancholy! *Sa Majesté Impériale*, however, seemed to be perfectly satisfied with his reception, and looked better and brighter than it is his custom to look: success is a wonderful cosmetic!

It seems to us but as yesterday that we saw Louis Napoleon in London, after his return from Ham: we also knew him well ere he was sent there, when a keen sense of the ludicrous, a certain *esprit moqueur*, though not *méchant*, rendered him sufficiently gay and amusing in private society.

A cloud of weariness, fatigue, and discouragement habitually overshadowed his brow; his toilette was, in general, *peu soignée*; few things amused or interested him, and nothing long: even ambition seemed for the moment dead, or, at least, dormant in his breast, and there was, as we know, a moment, when, setting aside the dreams of greatness and power that from his boyhood he had cherished, he contemplated forming a quiet domestic home and circle in England, there to accept what fate might bring, without further striving or struggling with her decrees. Was the inspiration a happy one? He would now say, No; but time will answer the question better than the Emperor can at present.

There seems to be, at this moment, a lull in the excitement that preceded the proclamation of the Empire. A reaction was, indeed, inevitable; and the enormous quantity of money spent in public and private could not continue to flow on in the same uninterrupted profusion. There is, however, no doubt but that the winter will be a very brilliant one; principally, however, among the official and commercial worlds: much less among the highest class of private society, which, in general, continues to *bouder* the Empire and its representatives. Perhaps the arrival of an Empress of Royal blood may work some change in this respect. Rumour—which has for so long positively asserted the certainty of the Wasa marriage, and has even entered into so many circumstantial details concerning the event, declaring that the Emperor had shown her portrait to his family and intimate friends, as being that of his intended consort—has now got up another story, and destines the Princess for the Emperor of Austria. Some whisper that Napoleon's change of position inclines him to look for a higher alliance, while others, on the contrary, really suspect that the influence to which we last weak alluded, disposes him at least to defer marriage for the present. Be that as it may, this influence continues with unabated force, and without any attempt at concealment.

At the theatres there is little that is new: we have already given an account of almost all the pieces that are being played at this moment. The Palais Royal has one of its usual amusing absurdities, depending almost wholly on the comic powers of its admirable *troupe*, and with them, inexpressibly ludicrous. "La Perruque du Cafe d'Or" is the title of this farce, the hero of which having run through his very small capital, by dint of the constancy of his visits to the Chaumière, Mobille, and other equally fashionable and select resorts, resolves to seek to repair his broken fortunes from the purses of two uncles, each 24 are never wanting in the *properties* of the Palais Royal. For this purpose, he informs the one, *la digne M. Prevollet*, that he has mended his ways, and taken to himself a wife, in the form of a Spanish *Marquesa, pur sang*. The uncle *Prevollet*, in high delight at the idea of being son-in-law to a real live *Marquesa*, sends wherewith to furnish the *trousseau et corbeille* of his noble niece. Wishing, however, to afford to the uncle *Blancmignon* as much pride and satisfaction as he has given to the uncle *Prevollet*, our *étudiant* informs him that he has just returned from a voyage to Gretna-green with the *blonde Lady Penelope Braybrooke*. *L'oncle Blancmignon*, no less delighted than *Prevollet*, follows his example; the coffers of M. Hector are better filled than they have been for many a day, and all goes well until the fine day, each of the worthy uncles takes it into his head to visit his nephew with his *brune Andalouse* and his *blonde Anglaise*. Such an honour has never entered into the calculations of our friend Hector, and all is about to be discovered, when an amiable *grisette* comes to the rescue, takes upon her the double *rôle*, which she carries through to the satisfaction of all parties; and Hector, in gratitude for her services, marries her at the shortest notice. Grassot and Hyacinthe are, as usual, irresistibly comical in this piece, which goes off with all the gaiety and lightness of these things, when in the hands of such actors.

We give our readers the following authentic document, written and published by a public functionary in the neighbourhood of Caen, as a specimen of the schoolmaster's influence in these parts:—

Le garde-champêtre de la commune d'A. Prévient les publiques que, tous ceux qui seront trouvées se baignands dans la rivière sans avoir convers leur décence par un caneaux à tous autres propels occupies par les femmes et filles aiavait leurs âages et lectres, seront punis conformément aux loi et reglement.

Cléisinger, who is now certainly one of the first, if not the first, of French sculptors, has been appointed to execute a bust of the Emperor, for which Louis Napoleon has given the first sitting.

The Empire is accepted cordially by foreign powers. The representative of the King of Naples was the first to recognise the Government of the new Emperor. On Monday, the British Ambassador, Lord Cowley, presented his credentials.

Great satisfaction has been felt in Paris at the recognition of the Emperor by England in a manner so gracious and friendly. The speech of the Chancellor of the Exchequer on Monday evening, communicating to the House of Commons the conduct of the British Government with regard to the re-establishment of the Empire, has caused a very favourable impression. The *Moniteur* continues to publish despatches from Presents and sub-Prefects, describing the enthusiasm with which the proclamation of the Empire was received in the departments.

SPAIN.

The news from Madrid of the 3d instant is of a highly-important character. The *Gazette* of that day contains the projects of a new constitution, published on the sole authority of the Government. The principal features in the projected Consitution are to make the Senate a body of hereditary legislators, and to reduce the number of the Chamber of Deputies to 171. It is proposed that the country be divided in 171 districts, each of which is to elect one deputy; the electors to be 25 years of age, settled two years at least in the district, and to form one of the 150 highest ratepayers in that district. The Presidents, Vice-Presidents, and Secretaries of both Chambers are to be nominated by the Crown. The Cortes have been dissolved. Great excitement prevails. The Government has taken precautions of a military character.

THE WEST INDIA MAIL.—The *Medway* steamer, with the West Indian mails, arrived at Southampton on Tuesday; but in consequence of the yellow fever having prevailed since she left Jamaica, the vessel and cargo are, for the present, to remain in the river until orders are received from London. There were seventeen cases altogether, twelve of which were fatal. There is no case at present.

The King of Hanover has modified the conditions under which the Royal permission is granted to officers of the army. The late King was particularly strict on this point.

The *Gazette* of Friday last announces the dissolution of partnership of Thomas Usman and John Hunter, schoolmasters, of Epping, Essex: the former of whom, although a schoolmaster, was unable to write his own name, substituting his mark on the deed of attestation in Lee Chancery.

A great many arrests have of late been made at Naples. An infernal machine is said to have been discovered there.

The deliveries of tea in London last week were 524,491 lb., being rather less than in the preceding week.

THE LARGE PRINT

OF THE

FUNERAL OF THE LATE DUKE OF WELLINGTON IN ST. PAUL'S CATHEDRAL.

Given with the Present Number of the ILLUSTRATED LONDON NEWS

A LITTLE month has not elapsed since the last funeral honours were paid to the Great Warrior who, "making his country his executor, left to it the rich inheritance of his memory." The solemn toy of a few hours will be perpetuated in ages to come: "in every grateful panegyric pronounced upon his memory—whether from the press, in the pulpit, at the forum, or in the senate—the chief prominence has been given to his public virtue;" and it is this pre-eminence which has made the spectacle a propriety beyond the show of grief, and a fit event for commemoration by the pencil, which "speaks the tongue of every land." Such is the characteristic of the Large Picture which is this day presented to the hundreds of thousands of readers of the ILLUSTRATED LONDON NEWS; to which it may be useful and interesting to append a few details explanatory of the last sad scene represented.

The Cathedral of St. Paul has been wisely chosen for the sepulchre of our heroes; and the association of glorious structures with immortal deeds was never more felicitously illustrated than in this choice: for

> Majesty,
> Power, glory, strength, and beauty—all are aisled
> In this eternal ark of worship, undefiled.

Early in the arrangement for the late funeral, it was proposed to fit up the central portion of the Cathedral with draperies, but this plan was wisely cancelled; for nothing could be more appropriate for the solemn grandeur of the occasion than the stupendous edifice itself, unadorned beyond the state in which it was left by its great architect; the only addition upon the present occasion being the erection of seats for the accommodation of the persons who assisted in the ceremony. The vast area beneath the dome, the octagon, as it is termed, formed by eight solid piers, was the scene of the solemnity, around which the seats rose, in amphitheatrical form, to more than half the height of the pilasters of the piers, and extending to a yet greater height in the transepts, where, also, two tiers of galleries, draped with black, were erected—thus carrying rows of spectators almost to the very ceilings of the transepts.

A solemn and subdued tone of light was considered appropriate for the due effect of the funereal rites; and to obtain this a ample mode of illumination, by means of gas, was adopted; the jets following the entablature, and the lower arches which spring from it in the octagon. There were also gas jets upon the massive cornice, which, supported by elegant trusses, forms the floor of the whispering gallery. It is impossible to convey the exact effect of this lighting in the picture, where its lines are denoted by a white *fringe-like* appearance, but exact instead of pendent. To aid this artificial light, the windows between the pilasters, in the drawing of the view, were, with two or three exceptions darkened. The effect of these long trails of light upon the sculptural decorations of the octagon was remarkably fine. Cibber's beautifully carved keystones of the great arches, the rich capitals of the Composite pilasters, and the bold bosses of the cornice supporting the whispering-gallery floor, were thus seen to advantage; whilst the upper zone of gas threw upon Thornhill's eight paintings from the life of St. Paul a greater flood of light than they had ever before received, making us the more regret their decaying condition. How glittering would have been the effect of this light upon mosaic, such as Wren proposed to have employed for lining the cupola!

The arrangement of the seats beneath the dome was in the form of a long ellipse; the galleries, as already mentioned, running high up into the transepts, and all the angles of the octagon, formed by the piers. On the south side of the picture are seated the House of Lords, presenting a sombre appearance, from their plain black costume; the Lord Chancellor occupying in the front a seat elevated two steps. Behind the House of Peers are general spectators. In the first row within the ellipse is seated the Archbishop of Canterbury among the personal friends of the late Duke of Wellington. The deputation from the University of Oxford are seated at the south-east angle of the space under the dome; and at the opposite or south-east angle are the Knights of the Bath, who, from their being in uniform, presented a brilliant appearance. Immediately in front of the organ are seated the choir, chief musicians, and principal singers; and on a level with the organ are the trumpets and opheocleides, whose loud funereal wail poured through the vast area with saddening intensity at certain points of the ceremony.

The screen to the choir is hung with simple drapery: and on each side, and below the organ, are the tiers of galleries for Peeresses, forming dark groups in the picture, from their black dresses in brilliant contrast, at the north-east angle, are the members of the *corps diplomatique*, who, in the variety of their official costumes presented a rich assemblage of colours. The House of Commons, seated in the centre of the north side, from many of the members wearing uniform, also appeared far from sombre, the Speaker's chair, like the Lord Chancellor's in front of the Peers, was raised above the rest of the seats. Next the Commons are the Aldermen of London, in their chains and scarlet gowns, presenting a striking appearance. The deputation from the University of Cambridge occupy the north-west angle of the space. Behind these various important bodies are seated the general visitors; and, supported by massive framing, the two tiers of galleries filled with spectators, almost to the ceilings of the transepts, the immense mass of human heads having an extraordinary effect.

The foreground of the accompanying Picture shows a portion of the tiers of seats in the nave, occupied by general officers, the brilliancy of whose uniforms is set off by the sombre lining of the seats, the fronts of which are relieved by the ducal escutcheons. Below, on each side, stand the Chelsea pensioners, who walked in the procession; the intervening group in the foreground consisting of officers, heralds, messengers, and other officials of the College of Arms, military, &c., congregated at the entrance from the nave.

In the centre of the area is the body placed upon the bier, the pall being removed, and the hat and sword being placed upon the lid of the coffin. On each side are the pall-bearers, and the supporters of the banners. At the head of the body stands the chief mourner, his supporters and assistant-mourners on either side, the train-bearer behind; with the relations and friends of the deceased. On the right stands his Royal Highness Prince Albert; and immediately near him the Lord Mayor, holding the City sword of state, which his Lordship bore during the whole of the ceremony. On the opposite side of the body is the very Reverend the Dean, reading at the lectern the latter portion of the service; and at the foot of the body are the white-robed choristers, and clergy in lines converging opposite the entrance to the choir. Within the area, also, on each side, are heralds in their superb surcoats, some bearing the heraldic insignia of the deceased, besides officers with the richly-emblazoned standard.

Although the monuments in the Cathedral were mostly unseen, it was scarcely possible to forget the applicability of the poet's graceful lines:—

> Along the walls, where speaking marbles show
> What Worthies form the hallow'd mould below:
> Proud names, who once the reins of Empire held;
> In Arms who triumph'd; or in Arts excell'd;
> Chiefs, grac'd with scars, and prodigal of blood;
> Stern patriots, who for sacred Freedom stood;
> Just men, by whom the impartial Laws were given;
> And Saints, who taught and led the way to Heaven;
> Ne'er to these chambers, where the mighty rest,
> Since their foundation, came a nobler guest.
> Nor e'er was to these chambers mourning brought
> A fairer spirit, or more welcome shade.

"ARRIVAL OF THE CAR AT ST. PAUL'S CATHEDRAL."—The Large Engraving, between pp. 576 and 577 of the WELLINGTON SUPPLEMENT, published with the present Number, represents the scene within the Cathedral railing, at the moment of the arrival of the Funeral Car at the western door. The magnificence of the Car, the brilliant variety of the military uniforms, and the rich emblazonry of the banners, were here very striking; but the back-ground was marred by the rough timber erected, which fore shortened the Cathedral front; whilst the timber-work was not draped with black, as originally intended, the workmen failing, through exhaustion, to complete the work. Our Artist's Sketch for the illustration we have just described, was taken from a window of the house, No. 1, St. Paul's Churchyard.

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.

FREE-TRADE.

The Earl of CLANRICARDE, on Monday, moved the following resolution:—"That this House, thankfully acknowledging the general prosperity, and deeply sensible of the evils attending frequent changes in the financial policy of the country, adheres to the commercial system recently established, and is of opinion that it would view with regret any renewed attempt to disturb its operation or impede its further progress." And in doing so, his Lordship referred to the objections taken to his resolution. In the first place, it had been objected that any motion should be made on the subject in that House; in the next place, the original motion which he proposed, and which he now understood, only after he entered the House to-night, that a noble Lord behind him meant to move as an amendment—viz., that their Lordships should accept the same resolution as had been adopted by the other House,—that motion was objected to by the noble Earl at the head of the Government. He (the Marquis of Clanricarde) then framed another resolution, to which the noble Earl also objected, and he then, for the purpose of obtaining, as he hoped, the unanimous vote of their Lordships on the subject, adopted the words prepared by the noble Earl himself; but which, under other circumstances, he should not have liked. Nevertheless, he found himself in that unfortunate position, which he believed it was not uncommon for a man to be placed in when he endeavoured to gain unanimity by concession—he found in the end that he was opposed more or less by all parties. He thought it was necessary that that House should move on the subject for two distinct reasons—first, in consequence of the circumstances in which the House was placed; and next, because it was desirable for the question itself that the House should pronounce an opinion decidedly approving of the commercial system now so happily established.

The Earl of ABERDEEN apologised for disturbing the unanimity which at one time appeared likely to prevail. He did not think it was necessary to pass a Free-trade resolution. Since 1846 the whole course of legislation had been in accordance with Free-trade. Another reason why he considered the question had better have been left was, that practically, their vote could have no effect—"I say," continued his Lordship, "this question is settled. I think it right that it is so when I look at the result of the late elections—when I look at the unequivocal demonstration of public opinion—when I look at the recent votes of the House of Commons and the declarations of her Majesty's Ministers themselves. I think the question is not only settled, but the time is come when I may say, as one of the oldest and most intimate of the friends of the late Sir Robert Peel in this House, that I feel myself fully justified in congratulating the friends of that great Minister, in congratulating the House, and in congratulating the country, on the final and complete success of that system for which he suffered so much, and for which he laboured so long."

Lord BEAUMONT expressed his surprise that the noble Earl at the head of the Government had not agreed to the resolution passed in the Commons

The Earl of DERBY said, in the first place, of calling attention: what passed last week on this subject. "On Tuesday last the noble Marquis (Clanricarde) gave notice of his intention to move a resolution on the subject of the Free-trade policy of the country, without giving previous notice of the words which it was his intention to move. In the course of a short conversation I stated to him the grounds upon which I hoped that your Lordships would be spared the necessity of any conflict of opinion on this subject; and I now stated to the noble Marquis the substance of the amendment which I wished to submit to your Lordships, in order to see if it would not meet his views and that of the noble Lords who act with him." The noble Earl then entered into a lengthened review of the position of parties as Free-trade progressed, and his own views on that subject; alluded to his protest against the third reading of the act for repealing the Corn-laws; and referred to the bad faith said against the late Sir Robert Peel:—"From 1846 to the present I will defy the warmest friends of the late Sir Robert Peel to point out a single expression of mine, either in writing or speaking, derogatory to the character or affecting the integrity of the motives of that statesman. And the only serious misunderstanding which I ever had with my noble and much-lamented friend, the late Lord George Bentinck—a misunderstanding of an extent which was thoroughly removed before his untimely death—was upon a full and frank expression of my opinion that nothing could be more unfitting or more impolitic than to load with the terms of vituperation those whom he had been compelled conscientiously to differ." His Lordship concluded by entreating their Lordships not to go back to useless and ceaseless arguments about the past; and, above all, not so far to depart from a established practice of this House as to sanction the adoption of an amendment which could be looked upon only as a surprise to the party supporting the Government.

The Marquis of LANSDOWNE said, he certainly felt himself precluded from voting for the amendment, whatever were its merits, by what had taken place the other night in their Lordships' House with respect to the present question.

After a few words from the Earl of Radnor, the Earl of Harrowby (in the course of which his Lordship suggested that the preamble of the motion should be omitted), and Lord Stranglord,

The Duke of NEWCASTLE said he thought that they would be acting more wisely and prudently, as regarded their own credit and the object they all professed to have at heart, if they confined themselves to the practical part of the resolution, omitting all the preamble.

The resolution, as altered by the Earl of Harrowby, was then agreed to, in the following terms:—

"That this House adheres to the commercial system recently established, and would view with regret any renewed attempt to disturb its operation, or impede its future course."

The Earl of CLANRICARDE desired that it should be entered on the journals that the resolution was passed *nem. dis.* ("Hear," and laughter).

UNIVERSITY REFORM.—Lord LYNDHURST, on Tuesday, drew the attention of their Lordships to the report of the Commission of Inquiry into the University of Cambridge. The noble and learned Lord read several passages from the report of the Commissioners, which went to show the desire of the authorities of the University to improve the method of education pursued there, and to enlarge the cycle of its operations.

The Oaths in Chancery Bill, and the Bank-notes Bill, passed through committee in the House of Lords on Tuesday; and on Thursday was read a third time and passed.

HOUSE OF COMMONS.

THE INCOME-TAX.

Mr. GLADSTONE, on Monday, with reference to the late financial statement, suggested that it was impossible to form a satisfactory judgment upon the Honourable and learned Member's motion for a committee, that the proposal of the House was bound to consider the question of the continuance of the Income-tax before any minor questions were dealt with, especially as the Income-tax was to be reconsidered. Mr. Disraeli, he observed, proposed to make large and great changes in that tax—to extend it to Ireland, to remove exemptions, and to vary the rate of the tax. He could tell him that a formidable question of principle would be opposed to those changes—a question which had been the most opposition on the part of those who considered that they involved a breach of national faith with the public creditor.

After a few words from Mr. Hume,

The CHANCELLOR of the EXCHEQUER thought it was inexpedient to discuss incidentally the principle of the Government plan, which they thought involved no breach of public faith, but was founded upon principles of justice. At the proper time he would be prepared to vindicate the course they had taken; they were only anxious to obtain the general verdict of the House upon their whole proposition.

Lord JOHN RUSSELL thought it was highly expedient to decide the questions of the House-tax and the Income-tax before any remission of taxes was resolved upon.

Mr. Gladstone's statement in explanation of the somewhat remarks in reference to administrative reform. There were two votes: the one was for seamen and marines, and the other was for steam machinery. He (Mr. Stafford) was willing to own that the sum granted for steam machinery was somewhat enormous amount. First, a Channel fleet had to be established, and, secondly, a screw fleet; and the count ties would look to the future, unless they wished the British navy to be behindhand in comparison with others. What the Government proposed was, that 6500 additional men should be employed in the sea service for four calendar months—namely, 5000 seamen and 1500 marines. To diminish the expense as much as possible, it was assumed that 2000 men would be raised for the first two months. Though it was impossible to pronounce that one ship more or less should be stationed at a particular port, or suppose that a ship should anchor perpetually at one particular port, it would be necessary that the fleet intended to be raised should be exercising itself up and down Channel; and what was proposed was, that at the Nore there should be stationed 1000 seamen and 250 artificers; at Plymouth, four sail of the line, two frigates, and six large steamers; and, at Portsmouth, five sail of the line, two frigates, and six large steamers, which, taking into account the exposed nature of the coast, and other considerations which the loyalty of the country would suggest, would not, he believed, be thought too much. The Government felt that the time had come when, with the usual pacific intentions, it was absolutely necessary to place the Channel defences in a new condition.

After remarks from Mr. Hume against, and Lord John Russell, Sir G. Pechell, Captain Scobell, Sir F. Baring, and Messrs. Corry, and W. Williams, in favour of the vote, it was agreed to, as were also the following votes:—£100,000 to defray the necessary expenses of steam machinery; £73,971, for the wages of the additional seamen and marines; £1200 for medicine, and £37,929 for victualling the additional seamen and marines.

Col. DUNNE said, he had to propose to the committee an augmentation of 2000 men for the Artillery service, and of 1000 horses. For these additional men, up to the 31st of March, 1853, the estimate which he had to submit was £91,258, including also £8000 for iron guns of a larger calibre. The vote was agreed to, as were those of £5315 for forage for 1000 horses; £27100 for additional labour in making up ammunition; and £14,000 for iron ordnance and projectiles.

INDUSTRIAL UNIVERSITIES AND ART-MANUFACTURE.

The CHANCELLOR of the EXCHEQUER, in moving a vote of £150,000 towards the purchase of land for a national gallery and museum connected with science and the arts, in aid of the fund in the hands of the Royal Commissioners of the Great Exhibition, observed, that the time had now come when more attention must be paid to the intellectual question of the prosperity of this country, and to bringing the influence of science and the arts to bear upon their instruction. At the Great Exhibition it had been found that there was a superiority in the style of design manifested in the productions of our own manufactures to had the contrast of the raw materials. The Royal Commissioners had found themselves in the possession of a surplus of not less than £150,000, and they had considered that an opportunity had offered of realising the want of space which existed in the national institutions, they had expended their surplus in the purchase of land, and had applied to the Government to recommend to Parliament to contribute a sum equal to that which they had expended. The site would allow space enough to form a complete industrial school, combining repertories of raw materials, machinery, and manufactures, with a national gallery of arts, and to assemble all the scientific and literary societies in the metropolis on one spot The vote was a joint contribution, and he believed that the appeal he made to the House was a legitimate one.

Lord SEYMOUR said, the House was entering upon a very large scheme, which required great consideration. He had no objection to the scheme if properly carried out, but he desired to know in whom the property was to be vested.

Lord J. RUSSELL approved of the principle, and could not but believe that this was the commencement of a very great improvement.

Mr HUME objected to a vote of public money until he knew in whose hands it was to be placed.

After some observations from Mr. Drummond, Mr. Ewart, Mr. Berkeley, and Mr. Spooner, the CHANCELLOR of the EXCHEQUER said, the present question was, whether the House would contribute an equal sum to that applied by the Royal Commissioners to the purchase of land, which grant would be under the control of a Minister of the Crown. When the purchase was completed, whatever buildings were to be erected upon the land would be dealt with under the consideration of the House. The whole of the purchase would belong to the nation, which would, for £150,000, obtain property worth £300,000.

The vote was ultimately agreed to.

THE TENANTS COMPENSATION (IRELAND) BILL.

On Tuesday, on the second reading of this measure, Mr. Serjeant SHEE drew a picture of Irish distress, which he compared with English prosperity, and for which he sought to find a cause. It had been ascribed to Celtic blood; but the Irishman, Scotch, the English, and even the Italian, had Celtic blood. Some said it was religion; but most of the countries of Europe professed the same faith. Everybody agreed that the Irish wanted energy and habits of industry. But before they could enjoy those advantages they must have a motive for exertion, which did not exist at present. The Irish labourer was alone in the world. If he was industrious and prudent, nobody but his landlord was the gainer; if he was lazy and intemperate, it was as his landlord's expense. The disease which he asked the House to remedy was the result of an exceptional law, an exceptional custom in Ireland, that had no existence in this country. After going minutely into the various grievances under which the Irish occupation had so long laboured, and to which he traced the generally unsettled and occasionally disturbed condition of the country, he came at last to the measure which Government proposed for their relief. In conclusion, the hon. and learned gentleman stated that his object was to obtain a good bill for Ireland this session; and for this purpose he would allow his own measure to go before a select committee with that of the Government.

Mr. E. HOWE opposed the mode in which Mr. Serjeant Shee proposed to remedy the grievances under which the agricultural tenantry of Ireland were supposed to labour; and denied particularly that the tenant right of Ulster, to which the hon. and learned gentleman had frequently alluded in terms of approval, could be adopted as a system

Mr J. DALY supported the views of Mr. Serjeant Shee.

Mr. BROTHERTON moved that the debate be adjourned; upon which motion several hon. gentlemen attempted to speak, and considerable confusion ensued, caused by adverse appeals to order.

Mr. M'MAHON, by dint of some perseverance, was at length partially heard. It was the first time that he had ever spoken in the House, and he was somewhat surprised that at that early hour (twelve o'clock) an attempt should be made to adjourn. He volunteered to inform them what was the real state of the case, and proceeded to do so amidst frequent signs of impatience. He recommended that the proposal of Mr. Serjeant Shee should be adopted, and the two bills referred to a select committee.

After a few words from Mr. LUCAS,

The House divided on the motion for the adjournment of the debate, which was carried by 93 to 57.

Mr. WALPOLE stated that, in order to facilitate the settling of the question, he would agree to Mr. Serjeant Shee's bill going to the select committee with the measure of the Government.

A somewhat personal conversation arose in consequence of Mr. Keogh accusing Mr. Napier of having adopted the substance of his bills from a pamphlet written by Mr. Tighe Hamilton. Mr. Napier repudiated the charge "on the honour of a gentleman."

Mr. WHITESIDE, in reply to Mr. Osborne, indignantly denied that any bills had been left by the late Government in pigeon-holes at Dub in Castle, from which it was possible that the present Government could have adopted their measure. The bills had been prepared in a perfectly legitimate manner.

Several gentlemen attempted to speak, and some confusion ensued, which was partially quieted through the interference of the Chancellor of the Exchequer.

The bills were then read a second time, and referred to the select committee.

THE FRENCH EMPIRE.—On Monday, the CHANCELLOR of the EXCHEQUER informed the House that her Majesty's Government had received information of a change in the form of the Government of France, and that an Emperor had been proclaimed under the title of "Napoleon III.;" and her Majesty's Ministers, acting upon the principle of recognising every *de facto* Government, had advised her Majesty to recognise the new form of Government in France. At the same time it had been announced to her Majesty's Government in a friendly and unofficial manner, and formally and officially that, in accepting the title of "Napoleon III." the Emperor of the French did not in any way wish to assert an hereditary claim; on the contrary, that his only claim was his having been elected by the people of France; and he voluntarily declared that he entirely accepted all the acts of the Governments that had taken place from 1814.

WESTMINSTER-BRIDGE.—In answer to a question from Sir R. INGLIS, on Monday, Lord J. MANNERS said, he had been in communication with the engineer attending to the bridge to know what the state of it was and the engineer had informed him that the bridge was almost daily under repair, and though some of the piles required to be renewed, and were now being so renewed, yet there was no immediate cause for alarm, any more than there was in March last. He had also to state that it was the intention of the Government, as soon as the forms of the House would allow, to introduce a bill for the purpose of erecting a new bridge on the site of the present one, but the Government had not yet decided whether the designs should be open to competition, or whether one of those already sent in would be selected.

THE FUNERAL OF THE DUKE OF WELLINGTON.—On Monday, Mr. HAMILTON moved for a vote of £40,000 to defray the expenses of the Duke of Wellington's funeral, which was not agreed to until after 4 o'clock.

DUTY ON NEWSPAPERS.—The ATTORNEY-GENERAL, on Monday, obtained leave to bring in a bill to amend the law relating to the stamp duties upon newspapers, the object of which was, he said, to give such a definition of a newspaper as would exclude from the operation of the law Zschokke's "Household Narrative," and other publications which were not published at intervals of less than twenty-six days.

RAILWAY AMALGAMATION.—Mr. HENLEY, in moving for the appointment of a select committee to consider the question of amalgamation, as applied to railway and canal bills, detailed the subjects which would fall under the consideration of the committee, and the powers they would have; observing that, in providing for the control and regulation of railways, they should not be carried so far as to relieve railway bodies from responsibility for their own acts.—The motion, after some remarks by Mr. Locke, Mr. Hudson, Mr. Laing, Mr. Gladstone, Mr. Cowan, General Anson, and other members, was agreed to.

On Tuesday the Tenant Compensation (Ireland) Bill was read a second time.

LITERARY AND MECHANICS' INSTITUTIONS.—On Tuesday, Mr. TOTHILL obtained a select committee to inquire into the expediency of distributing, gratis, under certain regulations, a selection from the reports and returns printed by order of the House of Commons, among the literary and scientific institutions, and mechanics' institutes, throughout the United Kingdom.

THE SCREW STEAM-SHIP COMPANY.—On Tuesday Mr. W. BROWN moved for copies of all applications made by the London, Liverpool, and North American Screw Steam-ship Company to the Board of Trade for a charter; and of all correspondence between the said company and Board of Trade on the subject thereof; and of all letters, memorials, and other communications received by the Board of Trade from other companies, and associations formed for such application. A long debate ensued, in which most of the speakers deprecated the establishment of a chartered company as an invasion of unrestricted competition, and the motion was withdrawn.

COUNTY FINANCIAL BOARDS.—Mr. GIBSON, on Tuesday, obtained leave to bring in a bill to establish County Financial Boards, for the assessing county rates, and for the administration of county expenditure in England and Wales.

PARLIAMENTARY ELECTORS BILL.—On Wednesday Sir DE LACY EVANS moved the second reading of the Parliamentary Electors Bill; but, on a division, the numbers were—For, 67; against, 103: majority, 36.

SUGAR DUTIES.—On Thursday Mr. WILSON, pursuant to notice, called the attention of the House to the effects of the Sugar Acts of 1846 and 1848 upon the British sugar colonies, and upon the sugar trade of the United Kingdom, with the view of showing that the legislation for the colonies since the year 1846 had not been harsh and unjust, as stated by the Chancellor of the Exchequer in his financial statement.—Sir JOHN PAKINGTON justified the statement complained of, and quoted returns to show that, from the passing of the Act of 1846, there was an enormous stimulus given to the Slave-trade in the Brazils and Cuba, the importation of slaves having increased to an immense amount up to 1850. In 1831 and 1839 there was no doubt a great falling off in the importation of slaves to the Brazils, but that he attributed to the extraordinary glut of slaves in the preceding years

THE SEARCH FOR SIR JOHN FRANKLIN.

"THE ISABEL" ENTERING THE POLAR BASIN THROUGH SMITH'S SOUND, IN THE HEAD OF BAFFIN'S BAY.

ANOTHER gallant officer, Commander Inglefield, has lately returned from a search in the Arctic regions for the Franklin expedition. We regret to add that he brings no tidings of the missing vessels; but his voyage was undertaken under such interesting circumstances—himself supplying at once intellect, capital, and enterprise in this endeavour to aid a brother officer—that the event merits pictorial commemoration; while the report shows Captain Inglefield, in four months, to have established almost beyond doubt a great fact, namely, that a Polar sea exists to the northward of a range of islands, by some heretofore looked upon as portions of a continent; and that he has so far solved a portion of a great geographical problem.

The *Isabel* screw-steamer, 140 tons, and 60-horse power, in which Captain Inglefield performed this memorable voyage, was engraved in our Journal of April 17 last. The vessel was originally fitted out by Lady Franklin, assisted to some extent by the President and Fellows of the Geographical Society; and, her Ladyship's original plan not being carried into effect, she offered the ship to the Admiralty, as an addition to the expedition which was being fitted out by the Government for the exploration of the Northern Seas. The proposal was declined, and Lady Franklin then offered to give the vessel to any competent person who would convey to Sir Edward Belcher an ample supply of provisions and stores which had been placed in the steamer. Captain Inglefield accepted the offer, undertaking the further equipment of the vessel, the wages of the crew, and other charges, for which he was to be compensated, on his return to England, by the sale of the ship.

At a meeting of the Geographical Society on the 22nd ult., Captain Inglefield having briefly narrated these introductory facts, gave the following very interesting *précis* of his enterprise:—

He said that he sailed from the Thames on the 6th of July last, and from Peterhead on the 10th of the same month. He had first proposed to go by the route proposed by Mr. Peterman; but, by the advice of his friends, he had relinquished the idea, and turned his attention to the Northern Sounds, at the head of Baffin's Bay, hitherto unexplored, and, indeed, only named as at a distance of 70 or 80 miles. Failing in his attempt to reach Smith's or Jones's Sounds, he proposed visiting Beechey Island, the depôt of Sir Edward Belcher's squadron, and making offer of his surplus stores, in compliance with Lady Franklin's original intention; and, failing that again, to make the much-desired search for the crews of the berg-borne ships along the western coast of Baffin's Bay and Labrador. Leaving Upernavick on the 16th of August, where he obtained dogs for sledges, should he need those ice carriages, Captain Inglefield pressed forward with all speed in the direction of Cape York, taking observations whenever practicable. In sailing and steaming through that archipelago of islands, numbers of icebergs of vast dimensions were encountered, which were ever and anon splitting with the roar of a thousand cannon, and sending from their reeling bases a swell that was sometimes perceptible at an incredible distance. At the entrance of Melville Island, a great quantity of drifting seaweed was seen. Passing the Crimson Cliffs, alluded to by Sir John Ross, there were counted from the crow's-nest 180 icebergs, many of them of gigantic proportions. Captain Inglefield then proceeded to Cape Athol; and on the 23rd he paid a visit to Ominack, the spot named by Adam Beak as that on which Captain Franklin and his crew had

PERILOUS POSITION OF "THE ISABEL" IN THE ICE, OFF TALBOT INLET.

THE SEARCH FOR SIR JOHN FRANKLIN.

been murdered, and on which he said their bones would be found buried in a cairn. He (Capt. Inglefield) accordingly landed, and closely examined the place, but no traces of anything European could be found, except a piece of a handkerchief, a piece of rope, a piece of iron hoop, and a nail on which the Queen's arms had been impressed; and these articles had no doubt been left by her Majesty's ship *North Star*, which had wintered near to this spot. He (the gallant Captain) found an ugly cairn upwards of six feet high, and covered with very heavy stones. His desire to view the contents was much whetted by the fact that on removing the upper stones a quantity of bones were found. The cairn was soon levelled to the base, and the earth dug out to a foot depth through the frozen soil, but great was his satisfaction at finding, upon the authority of their naturalists, that the bones were those of the whale, the walrus, and of different fishes; and that there was nothing like those of any human being. He was consequently satisfied beyond all doubt that there was no truth whatever in the statement of that reprobate Adam Beck, and that no such fate as he had related had befallen their missing countrymen. On the shores of Whale Sound he found a number of natives, who, on seeing the crew, indulged in immoderate

ESQUIMAUX OF LIEVELEY.—SOPHIE RHODERG.—(SEE NEXT PAGE.)

laughter, and expressed the utmost astonishment at their clothing. They had evidently never seen Europeans before, but they soon became friendly, and many of the small articles that lay on the table were purchased of them; the most singular of these, perhaps, was a vessel called a pot stone, which they used to melt their blubber. These vessels were hollowed out of solid stones by means of a harder kind of stone, and the formation of one was a work requiring immense time and labour. Notwithstanding that Captain Inglefield left England three months later than the expedition of last year, he succeeded in reaching a considerably higher latitude than had been attained by Ross and Parry in their voyage of 1818; and he had explored and laid down 600 miles of new coast line; determining, also, that the entrance into Whale Sound was a great strait passing into the Arctic Basin, and thus apparently defining Greenland as an island. At the entrance of this strait he had discovered a cluster of islands, which he had rapidly surveyed, and laid down upon his chart. To this strait he had given the name of Murchison's Strait, and the principal island he had called Northumberland Island. Leaving this sound, as it had hitherto been termed, he sailed northward in the direction of Smith Sound, and there found a great extent of sea stretching far before him. On the 27th of August, at two P.M., he attained the latitude of 78 deg. 35 min. (nearly 120 miles farther north than any former voyagers). He was then in a great sea, the entrance of which was thirty-five miles across, only partially encumbered with ice, and which, upon the eastern shore, seemed perfectly navigable. He had thus entered the great Polar Basin, and he believed that he would have pushed through in the direction of Behring's Strait had not a gale arisen which fairly blew him out of it, and defied his utmost efforts; for the small high-pressure engine with which the *Isabel* was fitted was only equal to pushing the vessel in calms or light winds. After some hours of great exertion he was providentially released from the ice which had surrounded him, and then, closely examining the western shore, he entered Jones Sound on the 30th of August. Here he penetrated to long. 84, and found at this point that the coast suddenly trended away to the north-west, whilst the southern shore continued westerly as far as the eye could reach, but no land could be distinguished at the bottom of the sound, or could any trace of the missing expedition be discovered. On the 1st of September he sailed from Jones Sound with the intention of communicating with the squadron of Sir Edward Belcher. He reached Beechey Island on the 7th of September and, after depositing his letter bags, and receiving others in return for England, sailed the same day with a view to commence a more detailed examination of the western shores of Baffin's Bay than former navigators had been able to bestow on that coast. Again he was unsuccessful in finding any traces of the missing expedition on these shores, which he explored as far south as the River Clyde, where the ice fixed to the land, and stretching nearly across Baffin's Bay, had carried him over to the eastern shore in the neighbourhood of Disco Island, where he encountered a succession of gales the most violent he ever witnessed, and which rendered the vast icebergs that surrounded the coasts doubly dangerous. After several fruitless efforts to get into Northumberland Inlet (where the commander intended to winter) he was, at the earnest representations of his ice-masters, forced to relinquish the attempt, and bore up for England on the 14th of October, arriving at Peterhead exactly four months from the day he sailed. Captain Inglefield then made some observations upon the search for the missing vessels, and gave it as his opinion that the Government expedition was undoubtedly on the right track. Reviewing his geographic discoveries, and taking into consideration the strong current which he found setting from the southward into the Polar Basin and through Murchison's Strait, he could not but feel sure that he had discovered and entered the Polar Basin, and that possibly the Strait and Smith Sound were both entrances into that basin. The formation of the land, and other circumstances to which he briefly alluded, induced him to believe that Baffin's Bay could no longer be considered as a mere bay, but rather as an arm of communication, and that the Polar Sea might be said to commence from Lancaster Sound on the westward, and from Whale Sound on the eastward. With respect to the animal life which existed in the parts that he had visited, he drew particular attention to the fact that the species of Mollusca —viz., the Clio Borealis and the Sagitta, two of that class upon which the whale principally feed — were found by the surgeon of his expedition, Dr. Sutherland to be more numerous and larger in Whale Sound than in any other locality he has visited; and that the sea birds Mollys (Fulmar Peteer) and Ioora (Uria Troile), were abundant. Captain Inglefield stated that, upon one occasion, he sailed through positive shoals of birds, and that as far as the eye could reach the surface of the water was covered with these creatures, and that they appeared to be so completely gorged as to be apparently unwilling to move as his ship ploughed her way among them. It was evident, therefore, that plentiful supplies of food might be within Franklin's reach.

ESQUIMAUX LADIES OF THE HUNDE ISLANDS, SOUTH OF DISCO.

Mr. Peterman and Captain Penny briefly combatted the theory of Captain Inglefield as to the communication of Baffin's Bay with the Polar Basin, upon arguments based upon the currents of those seas.

Captain Inglefield defended his hypothesis. He rested his view of Adam Beck's story upon the almost entire absence of wood, and upon the careful manner in which a bit of iron, evidently intended for a needle, had been found wrapped up in a tent at Ominack, which was admitted to be, at all events, near the scene of the supposed murder of Sir John Franklin and his crew. Had that catastrophe really taken place, it was impossible but that more iron and wood would have been found.

The Duke of Argyll inquired if the natives spoke of any communication between Baffin's Bay and the Arctic Sea?

Captain Inglefield replied that they had been unable to procure an interpreter, there being an indisposition on the part of the Danish Government to permit them to go. They had made, however, all the inquiries they could, but the natives did not speak of any such communication. The gallant captain, in conclusion, trusted that he should not be compelled to part with the *Isabel*; but that he should again be able to offer his services to the public and to Lady Franklin; for he still thought that Sir John was to be found (Loud cheers). He was most anxious to attempt the track described by Mr. Peterman.

Captain Inglefield has kindly placed at our disposal the Sketches made during his exploration; whence the following are engraved:—

The first View shows the *Isabel* (Captain Inglefield's yacht) entering

FISHERNESS, A DANISH SETTLEMENT, IN THE SOUTH OF GREENLAND WITH "THE ISABEL" AT ANCHOR.

the Polar Basin through Smith's Sound, in the head of Baffin's Bay. Time, one o'clock in the morning.

The view of the ship in the ice represents the perilous position of the *Isabel* on the 29th of August, off Talbot Inlet. Time, four A.M.

The landscape shows Fiskernoes, a Danish settlement in the south of Greenland, with the *Isabel* at anchor.

The portraits of the Esquimaux women were made at the Hunde Islands, to the southward of Disco. These ladies are drawn in the costume they wore at a native dance, at which they were Captain Inglefield's partners. The entertainment was in honour of the birthday of the King of Denmark.

By the above patriotic humane act of setting out an expedition in search of Franklin, and thus entailing upon himself great pecuniary sacrifices, Captain Inglefield has added very considerably to his other claims for promotion; and we hope shortly to be able to congratulate him and the profession upon the attainment of the reward which his excellent services have so richly merited.

Commander Inglefield is the eldest son of the late Rear-Admiral Inglefield, C.B., who died Commander-in-Chief in the East Indies; served as Acting Commander of the *Comus* at Obligado, on the Parana, for which service he and his First Lieutenant were promoted; he commanded the *Rinaldo* for two or three years, and subsequently brought home the *Meanee*, the largest line-of-battle ship built in the East Indies.

SIR EDWARD BELCHER'S ARCTIC EXPEDITION.

Private letters have just been received from some of the officers of Sir Edward Belcher's squadron. Although of an earlier date than the last despatches published—which announced that Sir Edward Belcher had proceeded, with Commander Sherard Osborne, of the *Pioneer*, up the Wellington Channel in clear open water,—the following extracts will, nevertheless, be read with interest:—

Assistance, June 6, 1852.—Lieveley Harbour, Disco.

We arrived in safety at Stromness on Sunday, April 25, in company with the squadron; and again proceeded on Wednesday, 28th. At two P.M. the steamers took us in tow.

May 8. Parted company with the steamers.

May 26. After variable and contrary winds, we have at last crossed the Arctic Circle, and may now consider ourselves fairly on our noble mission.

May 29. Anchored in the Whale Fish Islands—a miserable rocky place, inhabited by a Dane and a few squalid "Huskies." If a Dane marries, or lives with an Esquimaux, after a certain period he is forbidden by the Danish law to return to his country. So here, as well as at Lieveley, the unfortunate creatures are cut for life; but they appear perfectly naturalised—live and dress quite the same as the natives.

Saturday.—Got under way, and proceeded over to Lieveley. Arrived there on Sunday, June 6. We had the governor to dine with us, and saluted the gentleman with three cheers; but he spoke little or no English. However, we managed to get a few skins from him, and also twelve dogs. The settlement consists of seven or eight very good wooden houses, and two stores. The natives are a broad between the Huskie and Dane, and some of the women rather good looking. We gave them a sort of dance, which they enjoyed exceedingly. They were perfectly *au fait* in the polka, valse, and jig; and also sung several English songs, and wound up with "Hearts of o.k" and "God save the Queen!" They wear seal skin and deer-dresses, which consist of a jumper with a hood, pair of short trousers, stockings up to the trousers, and boots—all seal-skin, tastefully ornamented with dogs' fur. They wear their hair drawn tight up from the forehead and back, something *à la Chamouni* tied with a ribbon. It is then stuck up for about three inches, and finally terminates in a large knot. I enclose a hurried sketch I took of one of them, and got her to write her name underneath. We got under way again on Thursday, and attempted to get through the Waigat Straits, having been informed by the governor that they were passible; but, after proceeding some distance, found them blocked up with ice; so ob uged to go round the island. We landed on the island (Disco), where we were informed coal was to be procured, but found it very poor stuff.

Through the kindness of Mr. Barrow, we have been enabled to engrave the above portrait-sketch upon the preceding page.

CALENDAR FOR THE WEEK.

SUNDAY, December 12.—Third Sunday in Advent. Cromwell declared Protector, 1653.
MONDAY, 13.—St Lucy. Dr. Johnson died, 1784
TUESDAY, 14.—Washington died, 1799. Izaak Walton died, 1683.
WEDNESDAY, 15.—Ember Week. Earl Stanhope died, 1816.
THURSDAY, 16.—Cambridge Term ends.
FRIDAY, 17.—Oxford Term ends. Guy, founder of the Hospital, died, 1724.
SATURDAY, 18.—General Bolivar died, 1830.

ENGLISH SONGS AND MELODIES.

THE POETRY BY CHARLES MACKAY.

THE SYMPHONIES AND ACCOMPANIMENTS BY SIR H. R. BISHOP, KT., PROFESSOR OF MUSIC AT THE UNIVERSITY OF OXFORD.

WITH THE

ILLUSTRATED LONDON NEWS

FOR SATURDAY next, DECEMBER 18th, will be presented

A MUSICAL SUPPLEMENT, GRATIS.

Price of the Number, with the Supplement, SIXPENCE.

With the present Number of the ILLUSTRATED LONDON NEWS is published a WELLINGTON SUPPLEMENT. Price of the Two Numbers, One Shilling. With which is presented a LARGE ENGRAVING of the Funeral of the late Duke of Wellington in St. Paul's Cathedral.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, DECEMBER 11, 1852.

THE re-establishment of the French Empire, and the accession of Louis Napoleon Bonaparte to the throne, have been officially notified to both Houses of Parliament—by the Earl of Malmesbury in the Lords, and by Mr. Disraeli in the Commons. It appears from both of these statements—more particularly from that of Mr. Disraeli—that the new Emperor is anxious to have it believed that his assumption of the numeral III.—implying as it does the pre-existence and former reign of a Napoleon II.—is not intended as a quasi-denial of the Treaty of Vienna, or as a notification to Europe that the engagements contracted by French Sovereigns between 1815 and 1848 are to be held null and void. The matter, it appears, is to be considered as of no importance—not intended for Europe at all; but simply to please the taste of the French people. Certainly, if it pleased them to call their Emperor, Napoleon the 99th or the 100th, Europe would have no right to complain. Its politicians might smile or sigh at the folly, as the whim or sentiment of the hour might dictate; but, beyond such manifestations of its harmless opinion, Europe would no doubt refrain from troubling itself. At present the *mot d'ordre* given by the Emperor is peace with all the world—more especially with Great Britain; but, if the sentiments avowed by M. Ducos, the French Minister of the Marine, with regard to the increase in the British naval forces, are not immediately disavowed, it will be difficult to avoid the conclusion that the Emperor's desire for peace is not quite so sincere and warm as he would have the world believe.

It seems evident, also, that whatever may be the personal predilections and intentions of the Emperor himself, his army, without which he is nothing, has opinions and feelings of its own, and looks to war as the natural result of the re-establishment of the Empire. At a dinner of military men of high rank, given in celebration of the last turn in the wonderful wheel of French politics, one of the speeches delivered and received amid "the loudest applause," was to the effect that the Empire meant the extension of the French frontier to the Rhine. We hope the French nation is more sensible than the military men, who now ride rampant over its liberties; and that it has yet sufficient energy to prevent aggression upon any State in Europe. But it is the obvious duty of every State that, by circumstances or position, is likely to be involved in a strife with such an opponent as the heir of the ideas and the necessities of Napoleon, to be forearmed. The alacrity with which the British nation has aided the enrolment of the new Militia, the cheerfulness with which it has consented to pay whatever may be required for the increase of our steam navy, and the proper defences of the coast, and the certainty felt by every class of the people, that, come what may, Great Britain will be prepared for every contingency, will tend to preserve the peace of Europe far more than any mere declaration on the part of the Emperor of the French. We implicitly believe that there will be no war; but we as implicitly believe that this country is quite right in being prepared for one.

THE Royal Speech on the opening of the session of Parliament, and the announcement that has since been made in the House of Commons, have informed the country that the Government is at length about to do what it should have done long ago—promote the Arts and Sciences in Great Britain by a new and "comprehensive scheme." We had hoped when these announcements were made, that, while Art and Science were thus honourably remembered, Literature would not have been forgotten. Literature claims no aid from the State. The aid of Governments might prove dangerous to its independence, subversive of its usefulness, and perhaps destructive of its very existence. Literature, therefore, only claims to be let alone. While the canvas upon which the painter paints is untaxed; while the musician fears no visit from the tax-gatherer or the excuseman for his violin or his pianoforte; and while the sculptor can model untaxed clay and carve untaxed marble, the man of letters is impeded by the imposition of a heavy tax on the material of which books is composed, in distributing them to the public, by whose encouragement he must live. It was hoped that if the Government did not feel itself at liberty to meddle with the Stamp-duty on newspapers, or even with the tax upon publicity, known as the Advertisement-duty, it would, at least, have remembered the claims of literature, to the extent of remitting the Excise-duty upon paper. This, however, has not been done. The Chancellor of the Exchequer, himself a literary man, has failed to say a word for it when he came to his Budget, and has omitted—for reasons that are doubtless sufficient, in his estimation, if he have thought of the subject at all—to take off a tax that operates as a positive discouragement to education and to religion. Even as bearing upon the extension of a love and knowledge of science and the fine arts among the people—objects which her Majesty and the Government have emphatically avowed—it might be urged that literature has a claim for exemption from the Excise. Books and newspapers have certainly done much, and will yet do more, to spread abroad among all classes a love of art; and it does seem to us not a little contradictory, to continue upon them an impost which, by rendering the manufacture of literature precarious and unsatisfactory, prevents the extension of that particular form of knowledge which the Government desires. But the question is one of far more than this, and the emancipation of the material which we call paper, besides encouraging a particular manufacture which might employ many scores of thousands of extra hands—would not only give an impetus to several dependent branches of manual and intellectual industry, but would serve that great cause of public education which every true statesman ought to have at heart. We have nothing to say against the project for the encouragement of the fine arts, or the expense it will entail upon the country;—on the contrary, we could allege much in favour of the movement thus made; but we think it would be wrong to allow the introduction of a new scheme for the remission and the imposition of taxes to pass without an expression of surprise that not the slightest recognition of literature has been made, or the slightest hope held out that its claims to justice would, at some future period, be duly recognised.

POSTSCRIPT.

HOUSE OF LORDS.

LANDLORD AND TENANT (IRELAND).

On Friday the Earl of RODEN referred to the bill commonly known as Mr. Sharman Crawford's Tenant Right Bill, and asked the Earl of Derby whether it was with the consent of the Government that that bill had been referred to a select committee of the House of Commons; and, in case such committee unhappily sanctioned that measure, whether the Government were prepared to carry out its provisions?

The Earl of DERBY said that the Attorney-General had introduced into Parliament three bills relating to Ireland with a view of developing the resources of that country, of encouraging the application of capital in Ireland, and of improving the relations between landlord and tenant in the latter country. On the same evening on which these bills stood for a second reading, the bill alluded to by the Earl of Roden, which had been introduced by Mr. Serjeant Shee, also stood for a second reading. The Government, therefore, thought the most convenient course for them to take was to refer all these bills to a select committee, with a view of having the subject thoroughly investigated. In taking this step the Government, however, had by no means indicated their assent to the principles of Mr. Crawford's Bill, which had been repeatedly rejected, and very properly rejected, by the House of Commons—principles which he had no hesitation in saying were entirely subversive of all rights of property, and such as no Government or House of Commons could ever countenance.

The Earl of WICKLOW expressed his satisfaction at hearing the noble Earl's observations, as he believed an impression had gone abroad that the Government had more or less assented to the principles of the bill in question by consenting to its being referred to a select committee.

After a few words from Earl St. Germans and the Earl of Derby in reply, the subject dropped.

The West India Colonies, &c. Loans Act Amendment Bill and the Commons Enclosure Bill were read a second time.

HOUSE OF COMMONS.

THE BUDGET.

On Friday, on the motion that the Speaker do leave the chair for Committee of Supply,

Mr. T. DUNCOMBE thought the time had now arrived when they ought to oppose the measures that were to be brought forward, and in order to spare the time of the House. He might be called factious in the course which he was now taking; but this was not enough to deter him from doing what he considered to be his duty, and he knew that he could not do so without being called factious by one party or the other. They had already heard the measure that was to be proposed, and the country had already, to a considerable extent, decided against it. They did not want the Budget; they did not want the Government (Cheers). The House-tax, which the Government proposed to introduce was one which would press very heavily upon the country, far more so than did even the odious Window-tax, of which it took the place. They might endure this if any equivalent were proposed to be given. But all that was held out to them was the remote prospect of an extra cup of tea ("Hear, hear," and laughter). The entire scheme of the Government he could characterise only as iniquitous and unjust, and he moved that the House divide upon the motion.

Mr WALTER would divide with him, if the hon. gentleman insisted upon his amendment. But, as the Chancellor of the Exchequer seemed determined to commit suicide, they ought to give him a little time for repentance (Laughter).

Mr. ALCOCK supported the Government scheme, and particularly commended the reduction of the Malt-tax, which was but the earnest of its entire repeal. Other parts of the Budget were open to objection; the reduction of the duty on salt and tea was most commendable, but the deficit should be made up by an extension of the Income and Property-tax to Ireland (Cries of "Oh, oh," and "hear, hear").

Sir E. BULWER LYTTON thought the reduction of the price of the chief beverages of the working-classes most desirable. The reduction of the Tea-duties would benefit every class of consumers, and would largely increase our trade with the East. He congratulated the Chancellor of the Exchequer on the Budget, and especially on the extension of the House tax and that on income and property.

The House-tax had Mr. MILLS' unqualified approbation, and he considered it the fairest of all—recommending even the transfer of all other taxes to one on houses. Measures of Free-trade policy were now brought forward; yet, after the hon. member for Wolverhampton had invited the Government to adopt that policy, it was proposed to reject the first enormously Free-trade Budget that had ever been introduced into Parliament. Not only in the Budget, but in their measures of reform in the law, and their indications of retrenchment and economy in the great divisions of our administration, the present Government had shown a disposition to meet the requirements of the time, and leave the condition of this great country greatly improved (Loud cries of "Divide," and "Hear, hear").

Mr. GLADSTONE called on the House to sacrifice their own prepossessions in order to approach this discussion in its natural order. He did not see why this should be considered a vote of confidence or no confidence in the Ministry. It was a course which he thought tending to exempt the House of Commons in the faithful discharge of its duties to make every financial proposition one of confidence in a Ministry. He could not vote with the motion of the hon. member for Finsbury; for, after what took place on Friday last, he did not see how they could refuse to go into committee. But he protested against the arrangements of the Budget, a resolution, which he supported, was made on the 30th of June, which proposed to the House to consider whether it was consistent with a due regard to the maintenance of public credit to make a portion of the sinking fund applicable to the purposes under such circumstances. This motion was made when the House was about to go into committee. On the present occasion the Chancellor of the Exchequer showed altogether a surplus of £1,600,000. Of this sum he proposed to expend £900,000 by the remission of light dues, &c., and 500,000 by the reduction of the duty on tea. He thus left himself nothing over for the services of the country—a state of things against which he protested; and in support of this resolution that the Chancellor of the Exchequer could be quoted, for it was that right hon gentleman who proposed the motion (in 1851) to which he had alluded (Hear, hear). He now proposed to do exactly the same thing which he condemned in the late Chancellor of the Exchequer—to remit taxation when he had not already provided for his ways and means (Hear, hear).

The CHANCELLOR of the EXCHEQUER was surprised to hear that the surplus on which he calculated was entirely a fictitious surplus. He thought, however, that the right hon. gentleman (Mr Gladstone) had addressed the House in complete ignorance of the facts of the case (Hear, hear). He was prepared to show that, instead of being borrowed money, the surplus on which he reckoned was the accruing revenue of the country—that not one shilling of it was borrowed money, and that he had the highest authority for the course which he proposed to pursue. He hoped to show to the House that the course was salutary to the country. The right hon. gentleman (Mr. Gladstone), seemed to have been offended that he did not adopt the course which he had recommended the other night. He had the very greatest esteem for the abilities of the right hon. gentleman—perhaps no one in the House appreciated more highly his varied talents (Hear, hear)—but he really must follow the course which to him appeared the preferable. The circumstances of the present case were quite dissimilar to those of 1851, to which he had alluded. The Income-tax, at the time he made his motion, was under the investigation of a committee, and it was very doubtful what might be the result of their inquiry. It might have been fatal to the continuance of the Income-tax. Now in the present case he believed there was not a single individual in the house, wherever he sat, who had the very slightest doubt that a sum of money equal to that which had been produced the former year would be raised by an Income-tax of some sort (Hear, hear). What scheme would be adopted he could not say; many hon. members had views upon the subject, which they would probably press upon the House. But no one had the least doubt that about five millions would be raised this year by the Income and Property-tax (Hear, hear). There was no parallel between the case of the present Government and that of any previous Government. Had they not been taunted from the beginning with not bringing forward their measures? (Hear, hear.) Had not the most vulgar insinuations (of course not in that House) been thrown out against them, that they clung not even to power, but to office, from selfish and personal considerations? (Cheers). Their object was to assimilate the financial system of the country to the commercial policy which the country and the House had now formally adopted; and with this view they had brought forward a Budget which they now wished to submit to Parliament. He was astonished at the course taken by the hon member for Finsbury. The Government had a right to place their policy before the House without reserve, and there was nothing they would shrink from in maintaining and justifying that policy.

Mr DUNCOMBE had understood from the right hon. gentleman that the Government was prepared to stand or fall by the decision upon each portion of the Budget. Was this the case?

Lord JOHN RUSSELL expressed his willingness to go into committee at once, and deprecated a division on this motion.

Mr OSBORNE called on the right hon. gentleman (the Chancellor of the Exchequer) to give an answer to the question of his hon. friend (Loud cries of "Divide!" from Mr. Hudson). He was astonished to see the old gentleman (Mr. Hudson) interrupting the proceedings at that early hour of the evening. There would be excuses for it at a later hour (Cries of "Oh!" and uproarious laughter). If the right hon. gentleman did not answer the question of his hon. friend, he hoped the House would show by their votes their sense of the conduct of the Government on this occasion.

Mr. HUDSON, amidst renewed laughter and cries of "Hear," indignantly repudiated the imputation which had been cast upon him by the hon. member for Middlesex. He was mistaken if he thought he would put up with such an aspersion, and he told the hon. member, or any other hon. member who repeated it, that he was now, and at any time, ready to meet him there or elsewhere (Renewed laughter).

Mr HUME joined the hon. member for Middlesex in requesting an answer to the question of the hon. member for Finsbury.

The CHANCELLOR of the EXCHEQUER explained that he thought it understood by every one that the Government did not intend to stand or fall by every item of the Budget; but that there were certain principles involved in the Budget, which, if approved, would be regarded by the Government as negativing the whole measure.

Mr. DUNCOMBE withdrew his motion, and the House then went into committee. The first resolution related to the Inhabited House-duty.

Mr. W. WILLIAMS moved as an amendment, "That, in lieu of the increase of the tax on houses, real property should be made to pay the same probate and legacy duties as are now payable on personal property." The House-tax was most unfair and unjust, and even in a political sense, unadvised—whilst the substitute which he proposed was unobjectionable.

Mr. HUME thought the amendment premature.

Sir R. H. INGLIS deprecated the manner in which the House-tax would press upon the clergy, and recommended their exemption from its operation.

Mr. BARROW concurred in the view taken by Mr Hume; and the amendment was withdrawn.

Mr. PENNY objected to the Budget, as emanating from no settled principle or intelligible system.

Mr. BALL did not find the Budget altogether to his mind. He had expected relief to county, highway, and poor-rates; but, taking the Budget as a whole, as applied to the country at large, he could not, under the circumstances, be could get. Hon. gentlemen opposite had annihilated Protection. He now gave it over, and meant to become henceforth an honest Free-trader (Loud cheers). He called on them to come as far in Free-trade as he did now, and repeal the 10 per cent import duty which was still imposed upon a large number of manufactured articles.

Mr. MONCKTON MILNES conceived that the question of that night would turn upon the Malt and House-taxes. With regard to the former, there was a large and increasing number of persons who would derive no benefit from its reduction, for they used no fermented liquors; and to the rest the benefit would be small, and even doubtful. With regard to the House-tax, it was unjust and unnecessary, and would yield less to the revenue than was expected whenever it was extended beyond a certain class.

The subject was further discussed by Mr. SANDARS, who general y supported the Budget; by Mr. VIVIAN, who opposed it; by Mr. HENRY DRUMMOND, who partly supported it, but thought that direct taxes would always be difficult to collect, and in times of distress almost impossible; by Mr. HEADLAM, who disapproved of almost every point of the Budget; by Mr. CAYLEY, who especially advocated the repeal of the Malt-tax.

Sir CHARLES WOOD trusted that the was the last time that he should hear in that house of suffering interests. The shipping interest of Britain had been able to compete more successfully than ever with foreign shipping; yet, in order that they might do so with still greater advantage, he approved of the removal of the Light dues and other obstructions to navigation. He quite agreed with the manner in which the right hon. gentleman had treated the so-called claims of the West Indian colonies. He had never denied the existence of distress in the West Indies, or his sincere wish to alleviate it. But he had always maintained, and the result proved it even to the satisfaction of the right hon. gentleman, that,

by the application of science to the cultivation of sugar, free labour would eventually be able to compete with slave labour (Hear, hear). The third class of suffering interests, of whom he hoped to hear nothing more, was the agricultural. The right hon gentleman who had so long been the [illegible] class, had now definitively rejected their claim to compensation [illegible], he presumed the subject was put an end to. In the Budget, the reduction of the Malt-duties and the Hop-duties was [illegible] to be for the benefit more particularly of the farmer. But, if it were born at all, it was to the farmer who had never suffered by recent legislation, the hop-grower. He thought, however, that although the abolition of the whole of the Hop-duty might do good, the reduction of it to one-half would do no good at all. Care should be taken in the future that the right hon. gentleman expected to have a surplus of £1,500 000, and he proposed to remit one-half of the Malt-tax and one-half of the Hop-duty to meet that expected surplus. What surplus he would have would be produced not by a surplus in the year from the taxation of the country, but would be derived from a sum which originally was a loan. He disapproved of such a course. The right hon gentleman proposed to put an end to levying money for public works in the shape of taxation. He must say that some of the most valuable public works, such as lunatic asylums, hospitals, drainage works, &c., in this country and in Ireland, owed their origin to this tax. He had no objection whatever to the increased consumption of the Tea-duties; the repeal of the Malt-tax, he had already said, would not benefit the agricultural much; neither would it benefit the consumer, and the loss to the revenue would be greater than the right hon. gentleman imagined (Hear, hear). It was a curious fact that when at various times the Malt-tax had been reduced, the consumption of beer had not been lately increased with it, but had frequently decreased, and that was only when the duty was raised. Now it was as calated by Mr. Barclay that the abolition of the Malt-tax would only increase the consumption by one-third; whilst taking off one-half the Hop-duty would increase the consumption one-twelfth. Where was the novelty of the [illegible] consumption laid down by the right honourable gentleman? [illegible] the indirect taxes he had selected with very [illegible] selected. [illegible] and he had contrived to make the list of taxes need only oppressive [illegible] dear, hearty! Let them look at the practical operation of what was proposed. He quite approved of the removal of the duty on teas; but it [illegible] be taken as inseparable from the [illegible]. It must stand on [illegible] independent footing, and be treated without reference to [illegible] the matter of the Hop-duty, the right hon. gentleman [illegible] two [illegible] blunders as it was possible. The [illegible] duty at present was two [illegible] proposed to make it a penny, and to charge five per cent additional. He left all the excise restrictions—all that was inconvenient and disagreeable in the operation of this tax. Now he [illegible] that they should not continue any [illegible] which did not produce a considerable revenue. All that it would produce, according to the right hon. gentleman's own statement, was £120,000, a sum so paltry to justify the tax. With regard to the House-duty, he could not see on what principle the right hon. gentleman proposed to tax the Irish landholder and let the Irish proprietor go free (Hear, hear). To extend the Income-tax at all to Ireland was an imprudent measure at a time when it was rather their duty to encourage and develop the improving resources of the country; but to do so in a manner now proposed was highly objectionable (Hear, hear). There was another point in which he could by no means approve the policy of the right hon. gentleman, and this was in proposing to [illegible] the Funds. He could not but agree with the right hon. the member for the University of Oxford, that to do so would be a breach of faith; and he could not proceed with the scheme of this Budget would be fatal to public confidence (Hear hear). That part of the Income-tax which referred to the farmers he looked upon as a most ingenious mode of removing the whole burden from among the liabilities of almost every farmer in the country. Every one knew the farmers would be taxed with it. The profits of a farm were to be assumed at one-third of the rent. The average rent was £100, so that the tax to be paid would escape the operation altogether. Though ingenious, the device would be most injurious, and it was directly contrary to the principles the Government had laid down for their guidance (Hear, hear). To give them the benefit of every circumstance he would say that this was merely a mere calculation (Laughter). On the whole, the Budget gave to the party he represented in any way equivalent to the increased taxation which it would impose. The effect of the Income-tax would be to remove large manufacturers and farmers, and to make up for the deficiency by tax on the poor classes, of whom the Budget showed a great outward. It was that we carried into effect the House, by doubling the House-tax and extending the Income-tax, make direct taxation so unpopular, that they would endanger those principle supporter (Cheers). He was right hon. friends gentleman give the people their tea cheaper; let him give up the House tax and the reduct on of the Malt-tax, and he would have a Budget which ought to (Cheers). He [illegible] to the amendment now taken advice from the Opposition (Laughter). Lord Liverpool had to do so, and he had a stronger Government than the present. He must do so at last, for this Budget could not pass the House. It was obvious that the Government knew very little about the subject, or that they had not had time to consider it fully. Nothing could be said, but that the Budget, which was proposed for their acceptance was one which could not be entertained by the House, without [illegible] by the sacrifice, which imposed taxes that would be most oppressive and injudicious, and which tampered with the credit of public promises.

It was then moved that the chairman report progress.

The House having resumed, the orders of the day were disposed of.

LORD JOHN RUSSELL AT LEEDS.—The most brilliant and successful [illegible] ever held, is commemoration was Lord Mayor Carbutt's festival. The literary society took place on Wednesday, [illegible] the presidency of Lord John Russell. The scene of the [illegible] was the Music-hall, which was crowded to excess by a most enthusiastic audience. On Thursday the Town-council presented his Lordship with an address.

MURDER IN IRELAND.—On the 6th September last, a Mrs. Kirwin, the wife of an artist, was said to be accidentally drowned while bathing at a small island called "Ireland's Eye," near Howth; an inquest was held, and a verdict in accordance with the previous circumstances returned; however, on the apprehension of Mr. Kirwan, and he was committed on a verdict of "Wilful murder." The trial commenced on Thursday, and was concluded on Friday morning, when the jury found the prisoner guilty, and he was sentenced to death.

The following additions to the screw steam navy will be ready in 1853:

The *Royal Albert*	..	..	120 Building at Woolwich.
The *Duke of Wellington*	..	..	131 Fitting at Portsmouth.
The *Royal George*	..	..	12 To be converted as sheerhess.
The *St Jean d'Acre*	..	..	100 Building at Devonport.
The *Prince Consort*	..	..	80 Building at Pembroke.
The *Agamemnon*	..	..	91 Building at Sheerness.
The *Leander*	..	..	50 Building at Devonport.
The *Curacoa*	..	..	84 Building at Devonport.
The *Sans Pareil*	..	..	80 Fitting at Devonport.
The *Majestic*	..	..	80 Building at Chatham.
The *Orestes*	..	..	80 Building at Chatham.
The *Impregnable*	..	..	80 Fitting at Woolwich.
The *Barrosa*	..	..	80 Building at Chatham.

Making a total of 1175 guns of large calibre. The above vessels are all in advanced a state that there will be no difficulty in completing them next year should any emergency arise to require their services; and, with the vessels already fitted with screw-propellers, will form one of the most powerful Channel fleets ever posse ed by this country. The above list does not include any of the gun-brigs, or any of the ships now building, which are ordered to be fitted with engines already in store. The *Algiers*, 90, building at Devonport; the *Ascension*, 90, building at Sheerness; and several others, being ordered to be fitted with engines already made for screw ships of war.

LATEST FOREIGN NEWS.

FRANCE.

PARIS, Thursday, December 9.

The *Moniteur* announces, in its non-official part, that the Emperor will restore to liberty, to their families, and to their country, all those suffering from the consequences of civil discord, except such as have been guilty of crimes reproved by morality, on the sole condition of submitting to the national will, and engaging not to commit henceforth any act against the Government of the elect of the country.

THE OVERLAND MAIL.

We have received the following despatch in anticipation of the Overland mail, dated "Trieste, Thursday. The steamer *Adria* arrived today with the Indian mail. The *Hindostan*, with the Calcutta mail of the 7th November, arrived at Suez on the 1st inst." The Irrawaddy was not [illegible] for large vessels. General Godwin was [illegible] with the second division. It had been decided to advance by land upon Ava. The Chinese rebellion continues gaining strength. Exchange on London: at Calcutta, 2s. 0¼d. to 2s. 1d."

SMITHFIELD CLUB CATTLE SHOW.

THE annual exhibition of this influential and important agricultural society took place during the present week. The extra arrangements and extensions for the accommodation of stock and the convenience of visitors, have already been noticed in the columns of the *Illustrated London News*; we have, therefore, little more to add on this point than that of performing the pleasing duty of confirming to the fullest extent all that has been favourably stated on this point. The first inquiry on the concurrence of all annual exhibitions is, Does the project exceed, or fall short of, the last? Without any hesitation we reply in the affirmative. We have, however, for the last four or five years always been prepared to find occasional instances of the general character of the animals exhibited, being, as a whole, slightly inferior to those shown on former occasions. These remarks apply to the exhibition as a whole, and not to a comparison between individual animals; for, if so confined, doubtless, in one class or other, solitary animals may be discovered of such surpassing excellence that their equal may not be again produced for some years. The generally improved character of the exhibition on every periodical recurrence is, however, a most healthy symptom of the progress of British agriculture: it displays in the most marked manner two things—first and most important, that our principal breeders and graziers—owing to the healthy and praiseworthy emulation engendered by these exhibitions—have, by common consent, adopted only those breeds of animals which, by general experience, have been found most kindly in their feeding properties. In the second place, the money value of the cloth have found—experience that nothing but animals of the rarest excellence have any chance of obtaining the premiums; consequently, that the general character of the show increases every year in quality.

Of the principal animals for the greatest merit—namely, the gold medals—the reverse of what usually occurs took place on the present occasion: the one for oxen being awarded to a short-horn, and the one for heifers and cows to an animal of the Hereford breed. The first was obtained by Mr. Richard Stratton, of Broad Hinton, near Swindon, Wilts, for a 4-years and 10 months old short-horned ox, bred by himself, and fed on cake, turnips, and hay; this was an extraordinarily fine animal, and has elicited no small amount of admiration from the best judges. The gold medal for cows and heifers was awarded to Mr. John Dunne Cooke, of Brampton Brian, near Ludlow, Hereford, for a 6 years and 11 months old Hereford cow, bred by himself, and fed on grass, hay, turnips, barley, pea and wheat meal; had three calves: this was also an exceedingly beautiful animal.—*(See the Illustration.)*

The gold medal for the best pen of long-woolled Leicester wethers, was obtained by the Marquis of Exeter for a pen of three 21 months old sheep. The gold medal for the best short woolled sheep, was awarded to Mr. Salusbury, for a pen of three 2 years and 9 months old Southdowns. As a whole, we conceived there was a larger falling off in the quality of the Southdown than any other class of sheep. Whether this has arisen from the extraordinarily wet character of the season, we are not sufficiently informed; but, as the Southdown sheep are more seriously injured by excess of moisture than any other breed, it is quite possible that this circumstance may have had an unfavourable influence on them. The Duke of Richmond was, on the whole, the most successful exhibitor; and Sir John V. Shelley, Bart., M.P., had also some animals of great merit.

Of the merits of the pigs it would be difficult to give a fair analysis, within anything like a moderate compass. The competition was exceedingly close, and there were several new exhibitors who have so frequently carried off the palm of merit. Mr. Fisher Hobbs appears to have retired from the field of competition. We regret this; because to no gentleman has the improvement in the breed of small pigs been so much indebted as to Mr. Fisher Hobbs. On the present occasion the gold medal was obtained by Mr. John Coate, of Hammoon, near Blandford, Dorset, for a pen of three 24 weeks and 3 days old improved Dorset pigs. Sir J. Conroy, Bart., had also a pen of very fine pigs, some formidable rivals to those

£15 PRIZE, AND SILVER MEDAL.

ARRIVAL OF THE DEPUTATION FROM THE LEGISLATIVE BODY AT ST. CLOUD.

THE EMPIRE IN FRANCE

Last week we announced the brief ceremony that took place on Wednesday evening in the Chamber of Deputies; its ratification by official acts of Thursday morning; and its confirmation by a grand military spectacle on the afternoon of that day. We now illustrate these important events; and subjoin additional details of the ceremonies.

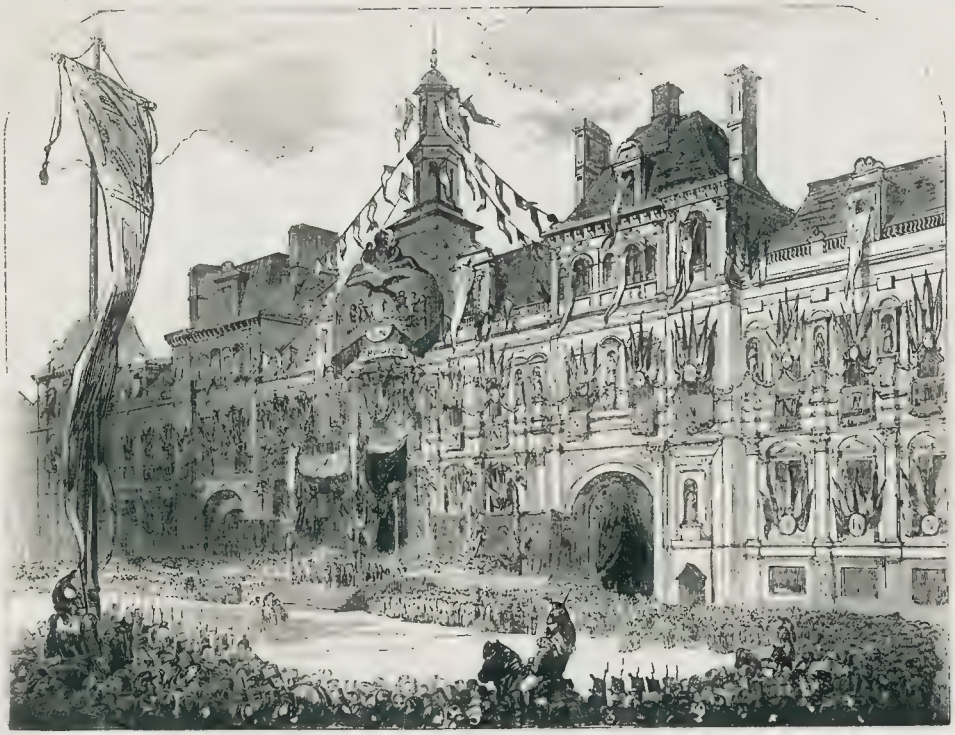
THE DEPUTATION OF THE LEGISLATIVE CORPS AT ST. CLOUD.

On Wednesday evening, at seven o'clock, the members of the Legislative Corps held their sitting—the last under the Republic—to proclaim the result of the votes, and to declare in an official manner the re-establishment of the Empire. The tribunes were crowded, and all the persons occupying them apparently belonged to the higher classes of society. The number of deputies present was 240, and all wore their grand official costume.

A solemn silence took place when M. Billault, the President, preceded by the Messengers of State and the Ushers, and accompanied by the Vice-Presidents and Secretaries, entered the House.

The President, after having taken his seat, proceeded to read the official declaration of the Legislative Body, to the effect that the French people has, by an immense majority, called Louis Napoleon to be Emperor of the French.

On concluding his report, M. Billault drew himself up erect, waved his hat over his head, and cried "*Vive l'Empereur!*" The whole of the Deputies also stood up, and uttered the same cry, waving their hats; and many repeated it a second and a third time. It is against the rule of the House, of course, for any cry to be uttered by strangers but several ladies joined in the applause, waving their handkerchiefs. The President then retired, and was followed by the Deputies. In the large courtyard of the Chamber, the carriages to convey the members to St. Cloud were already drawn up in order: they were 200 in number. The façade of the Chamber towards the Place de Bourgogne was brilliantly illuminated. The President, accompanied by the members of the Bureaux, preceded by the four principal officers of the Chamber, and the two messengers of State, appeared first in the court, and entered his carriage; he was followed by the Deputies, while the drums of the 28th of the line and the trumpets of the Lancers, paid him military honours. The carriages of the seven reporters, MM. Bavoux, Leroux, Delamarre, Ravell, Lemercier (the Imperialist poet), Belmontet, and Faugier, followed at the rear of the President; and then came the Vice-



PROCLAMATION OF THE EMPIRE, AT THE HOTEL DE VILLE, PARIS.

Presidents, the Secretaries, the Questors, and, lastly, the Deputies. The night was dark and cold, but fine. The *cortège* was accompanied by an escort of the 7th Lancers: men on horseback, placed at regular distances, with torches in their hands, lighted the way. They passed along the Rue de l'Université, the esplanade of the Invalides, the Quay d'Orsai, and crossed the Bridge of Jena, the flame of the torches gleaming on the river.

As the *cortège* approached St. Cloud, signal fires were seen from different points, and the houses were illuminated, and a considerable crowd filled the approaches to the Palace. Our Illustration shows the arrival of the Deputation at the gate of St. Cloud. The *cortège* of Deputies alighted from their carriages in the courtyard of the Palace at a few minutes past eight o'clock: the Senators and Council of State had arrived a few minutes previously. The Legislative Corps were introduced into the splendid saloon called the Salon de Mars; the Senators and Council of State occupied the saloons of Venus and Diana.

After a short pause, Count Baciocchi, Grand Master of the Ceremonies, assisted by M. Fenfiet de Conches, the Deputy-Master, introduced the Senators into the Gallery of Apollo. The Cardinals, Marshals, Admirals, and the Archbishop of Paris were with the Senate, on the right of the throne erected at the end of the gallery. The Legislative Body took their places on the left. The Council of State next entered. The Procureur-General Delangle, M. de Royer, Baron Renter, M. Heurtier, General Daumas, M. Grisrein, M. de Sibert Cornillon, and M. Darlcan sat with the Councilors of State.

Louis Napoleon, in the uniform of a General of Division, entered the Gallery of Apollo, without his brother-in-law, Count Baciocchi and M. Feuillet de Conches leading the way. Louis Napoleon had on his right the ex-King Jerome Napoleon Bonaparte, as Marshal of France; on his left Prince Jerome Bonaparte, in plain clothes; and behind him the Ministers of State, M. Baroche and M. Berger.

The moment Louis Napoleon appeared he was saluted with loud acclamations of "*Vive l'Empereur!*"

M. Billault, President of the Legislative Body, advanced, and, in a firm and emphatic voice read a speech, frequently interrupted by applause and cries of "*Vive Napoléon III!*" and "*Vive l'Empereur!*" M. Billault afterwards presented the declaration of the Legislative body, with the result of the vote.

M. Mesnard, Vice-President of the Senate, then delivered a speech; and in the midst of the most profound silence, the Emperor, in a firm voice, replied in the speech which we gave last week.

His Majesty, after several times bowing to the persons assembled, withdrew with the same ceremony as he entered.

The members of the Senate and of the Legislative Body returned to Paris at ten o'clock.

PROCLAMATION AT THE HOTEL DE VILLE.

Ten o'clock was appointed for the proclamation of the Emperor, on Thursday, at the Hôtel de Ville. In the grand square in front, a square was formed at half-past nine o'clock by four battalions of Infantry of the Line, two of the 43rd Regiment, two of the 44th, and one of the National Guard of the Seine. The vacant space was filled with bodies of operatives, with banners decorated with Imperial emblems. A crowd of people had arrived from various directions, and warmed themselves as best they could on the quays and the bridges. The façade of the edifice itself was covered all over with tri-colored flags, emblems, and lofty streamers. At a few minutes past ten o'clock, M. Berger, Prefect of the Seine, came forward on the grand balcony of the Hôtel, followed by the Mayors and Municipal Council, and, while deep silence prevailed, read the important decrees proclaiming the Empire. M. Berger gave the signal, and "*Vive l'Empereur!*" burst from the multitude, and ran through the square and along the quays. The troops then beat to arms, dressed up, and defiled. The corporations of trades, with the standard-bearers in front, unfurling their ample flags, and raising aloft their oriflammes, each with its appropriate inscription and emblem, marched in regular order along the quays towards the Place de la Concorde, and then by the Champs Elysées to the triumphal arch of the Barrier de l'Etoile, to meet and do honours to the newly-proclaimed Emperor; and shortly afterwards the Prefect of the Seine, attended by the Mayor of Paris, those of the Banlieu, and the members of the Municipal Council, followed slowly in the same direction.

The morning was certainly unpropitious for a ceremony out of doors; but the fog gradually melted away. So early as five o'clock the guns of the Invalides thundered forth the announcement that the Empire had begun. The salute was taken up by the Barrière du Trône and the forts, and continued till past seven o'clock. A signal from the Hôtel de Ville announced that the Empire was proclaimed by the civil authorities, and the cannon of the forts instantly replied as before. At nine o'clock, the bands of the troops were heard as they marched along the Boulevards towards the Champs Elysées, and crowds of people followed in the same direction. At a few minutes past ten, the forts of Vanves and Issy again fired a salute, which was instantaneously responded to by the cannon of the Invalides. The National Guards of the rural districts began shortly after to arrive, their fine martial music and their bands playing, in the avenue of Neuilly; each battalion took up the position allotted to it on the right side of the avenue, from the Port Maillot to the Triumphal Arch. The windows of all the houses along the avenue were filled with spectators, and the fronts of many were decorated with tri-coloured flags and Imperial emblems. At half-past eleven o'clock the 7th Regiment of Artillery rode down the avenue, and drew up near the gate of the Bois de Boulogne; and then in the avenue and the other on the route de la Revolte. Three regiments of infantry marched in about the same time and took their station on the left of the avenue, lining the whole distance of the Triumphal Arch.

In the meantime, General de Lawestine, Commander-in-Chief of the National Guard of Paris, rode before the lines of the National Guard, and placed himself, with his staff, at the Porte Maillot. Marshal Magnan likewise passed before the troops, and, having conferred with the Commander-in-Chief of the National Guard, galloped off to the Triumphal Arch.

ENTRY OF THE EMPEROR INTO PARIS.

Shortly after twelve o'clock, M. de Persigny, Minister of the Interior, dressed in his grand uniform, arrived on horseback from St Cloud, and informed General Lawestine of the departure from the Palace of the Emperor; whilst the Aide-de-camp to give the same in ormation to Marshal Magnan. Instantly, the drums beat to arms along the whole line. The approach of the Emperor was announced by a detachment of *gendarmerie*. Anon, a cloud of dust appeared, and of heavy dragoons dashed from the forest of Boulogne in one serried mass, galloped at full speed, and halted their sabres in hand, waved them round their head, and shouted again and again "*Vive l'Empereur!*" whilst the kettle-drums and trumpets of the other mounted corps, approaching nearer and nearer, made the scene the most animated and the most exciting that can well be imagined. Louis Napoleon had arrived in a carriage to this point. He stopped, alighted, and his staff forming itself behind him, he mounted his beautiful chestnut charger arrayed in splendid housings, and took the advance of his escort, riding at least twenty paces in front, an aide-de-camp at some distance on each side. He was dressed in the complete uniform of a General of Division, and wore his grand *cordon*, star, and cross of the Legion of Honour, as also the military medal of which he is the founder. Still in front of his escort he advanced slowly, amidst cries of "*Vive l'Empereur!*" uttered by the multitude, the National Guards, and the troops of the line. The latter, along the entire line, gave their shakos in their bayonets, and thus presented arms. On reaching the Triumphal Arch, the Emperor was received by Marshal Magnan, the Prefects of the Seine and Police, the members of the Council of Prefecture, of the Municipal Commission, &c. Rockets were then fired off, to announce his entry into Paris, and the cannon of the Invalides and of the citadel of Mont Valerien fired Imperial salutes of 101 guns. It was about a quarter to one o'clock when the *cortège* issued from beneath the Triumphal Arch, and made its appearance in the Champs Elysées. (*See the Illustration on the front page of the present Number.*) It was preceded by the cavalry of the National Guard, the Lancers, and Dragoons; and was followed by a most numerous and gorgeous staff of general officers, while an escort of Carabiniers and Cuirassiers followed

The Emperor entered the grand gate of the Tuileries, which faces the Place de la Concorde, and as he approached the Palace the standard was unfurled, and the cannon again fired a salute. The terraces of the garden were full of spectators. He alighted at the entrance, and the instant he trod the ground under the portico, the tricoloured flag was hoisted from the dome of the central pavilion. He ascended the grand staircase, where he was met by the members of his family. Having received their congratulations, and those of his friends, he made his appearance on the central balcony looking into the garden, when his presence elicited another assent. Louis Napoleon was accompanied by his uncle Jerome, the Princess Mathilde, and several other ladies. On the balcony to his left came Edward Aide-de-Kader and his suite, dressed entirely in white. The crowd was very dense.

The Emperor, after acknowledging the acclamations of the people by repeated salutations, retired from the window, and proceeded to the throne in the saloon, facing the Carrousel, where a similar exchange of congratulations took place.

The crowd then began to disperse in the most perfect order.

M. Berger gave the ceremony last night a splendid breakfast of 180 covers at the Hôtel de Ville. He proposed a toast to the health of the new Emperor, and delivered a speech, which was hailed with cries of "*Vive l'Empereur!*"

In the evening the illuminations were not only more brilliant, but more general, than on any previous occasion, for a considerable time. At half-past eight o'clock the Tuileries was thrown open for the first reception, and the saloons that have been so long under the hand of the decorator are described as presenting much magnificence. The reception-room was the grand "Hall of the Marshals," where the Marshals of France, in their uniforms and orders, all the Ministers, the Marshals, the Cardinals, the Archbishop of Paris, the Senators, the Deputies, the Councillors of State, the great functionaries, thronged the saloons and corridors. The reception was, on the whole, very brilliant. Though not forming part of the Imperial family, nor even of "French Princes," Pierre Bonaparte and Lucian Bonaparte, brothers of the Prince of Canino, were present.

DEATH OF MR. F. W. N. BAYLEY.—We regret to record the decease of Mr. F. W. N. Bayley, well known for his contributions to the magazine and newspaper literature of the last twenty years. Mr. Bayley died on the 1st inst., at Bromsgrove, of bronchitis, and was buried in the Church of England Cemetery. He has left a widow to deplore his loss.

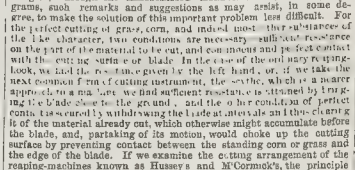
The deposits received in the Paris Savings Banks on Sunday and Monday last amounted to 590,366 f. The deposits withdrawn on those days amounted to 443,099 f.

REAPING MACHINERY.

AMONGST the most valuable results of the Great Exhibition must be classed the *re introduction* to the attention of the English agriculturist of the Reaping Machine, which, from a few hasty and inconclusive trials during the harvest of 1851, acquired a notoriety to the public in a great measure destroyed by the greater experience and more practical tests of the past harvest of 1852. It cannot now be denied that the reaping-machines have been fairly tested, giving results that must encourage us to persevere in the endeavour to produce a machine that shall retain whatever may have been found useful in the present systems, with such improvements as may form an implement of general use to every class of farmers. The value of the machines known as Bell's, M'Cormick's, and Hussey's has been greatly exaggerated, and the recent reports of their numerous failures might lead some persons to suppose that human skill in this particular branch of mechanical science was exhausted; but the time that must elapse before we have a perfect reaping-machine, will, as in the case of nearly all inventions, depend on the necessity there is for them. Granting that this stimulus exists at the present moment, invention and adaptations will continue without ceasing until the necessity is satisfied by the completion of a machine that will cut almost any character and condition of crop.

It is to hasten the arrival of this desideratum that we have been induced to give, through the ILLUSTRATED LONDON NEWS, aided by diagrams, such remarks and suggestions as may assist, in some degree, to make the solution of this important problem less difficult. For the perfect cutting of grass, corn, and indeed most other substances of the like character, two conditions are necessary—sufficient resistance on the part of the material to be cut, and continuous and perfect contact with the cutting surface or blade. In the case of the ordinary reaping-hook, we find the resistance given by the left hand; or, if we take the next common form of cutting instrument, the scythe, which a nearer approach to a machine we find sufficient resistance is attained by bringing the blade close to the ground, and the other condition of perfect cuts is secured by withdrawing the blade at intervals and the clearing of the material already cut, which otherwise might accumulate before the blade, and, partaking of its motion, would choke up the cutting surface by preventing contact between the standing corn or grass and the edge of the blade. If we examine the cutting arrangement of the reaping-machines known as Hussey's and M'Cormick's, the principle being nearly alike in both machines, we shall find their imperfect success may be traced in a great measure to the difficulty of keeping the blade clear of cut material.

The cutting arrangement of their machines is represented in the following diagrams, and consists of a long horizontal blade (*b*), or saw, vibrating



at a certain speed; the action of the blade is like that of a common saw with a very short stroke. It is quite clear that, with sufficient resistance and perfect contact, this arrangement for cutting will work sufficiently well; but what is to ensure perfect contact or a clear blade when the crop is heavy and combined at the bottom with much loose and pliant grass? Accumulation of the cut matter must take place, and give rise to frequent choking of the machine. In addition to the horizontal blade, there is also a peculiar form of spear-head (*c* and *d*), serving, in a slight degree, as a fulcrum or point of resistance for the corn.

But the primary element of keeping the blade clear is entirely absent; and without this condition I cannot imagine that any form of machine will ever cut grass or corn in such a way as to be of extensive and general use. The jury in their report on the Agricultural Implements at the Great Exhibition anticipated certain formidable difficulties in the application of these machines to English agriculture:—"Their (American Reaping Machines) respective merits time will discover, but there is one caution which applies to the introduction of both in England. They both cut by a *sideling vibration*, the frequency of which must be determined by the number of straws to be cut in passing over a given space; now, as the average yield of England is nearly double that of America, our straw, it is probable, stands much thicker than in the crops their reapers have been accustomed to deal with, so that both implements, when applied to heavy crops, must be adapted to the superficial area they will have to encounter."

Abandoning the idea of ever constructing a good implement on the sideling cutting or sawing principle, we will now examine a mode of cutting in which the action of a pair of scissors serves as a model, and which is unquestionably a sound and valuable principle for imitation; although a literal copy of the scissors action in any machine can never, I think, be attended with complete success. A machine which has a constant progressive motion should be furnished with an apparatus that will be cutting constantly, and not at intervals like the scissors, which, during the act of cutting, are stationary; and as they cut only at intervals, also only move at intervals. Take, for example, the following

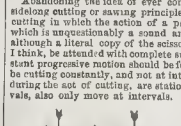


diagram as exhibiting a cutting apparatus working on the scissors principle, where *a* and *c* are fixed blades; and *b* is a vibrating blade, sharp on both sides, and cutting alternately with *a* and *c*. Whilst *b* is in the act of cutting with *a*, the space between *b* and *c* will be apt to get filled or choked with the corn or grass, and this risk will increase with the dullness or sharpness of the blades. I am not aware whether Bell's machine, which is said to imitate the scissors, is constructed on this principle, in combination with the vibrating blade; if not, it is not impossible such a form of cutter might be useful.

But there is another form which, I believe, will some day supersede all others, and that is what I call the rotatory reaping machine. Let it be imagined that an instrument is so arranged that the blades are perpetually cutting. In this case each stem of corn, as it comes in contact with the machine, will be divided, and no time will be allowed for a mass of grass and corn to accumulate and choke up the blades. Common instinct seems to tell us this is the desideratum, viz., a perpetually cutting-machine, and not a sawing or chopping-machine. It is this system of constant cutting by rotatory shears which, I believe, will some day be the solution of the present difficulty in cutting corn, &c., by machinery.

Figs. 1, 2, 3, 4 show in detail an arrangement for cutting with circular shears or discs. Fig. 1 is a plan of the cutters; Fig. 2, a vertical section of the machine; Fig 3 is an isometrical view of the working portion; and Fig. 4, a plan of the same: D is a driving shaft, acting upon the pinions A A A, which give motion to the wheels B and the axles of the cutters E F, Fig 2

FIG. 1

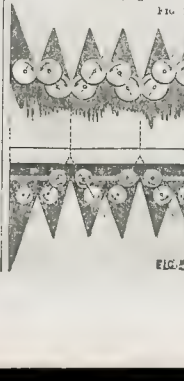

FIG. 3

FIG 4

In the combination of a number of such discs it is important that each pair should have the same amount of duty to perform; and, as their opposite sides, when the machine is in motion, move in a direction against the corn, and thus have no tendency to draw the stems in, it becomes necessary to adopt a double series—one behind the other—in such a way as is shown by the diagram.

The collecting of the corn after being cut is entirely a question of experience, but when a machine is once constructed that will cut its way clean through any character or condition of crop, human ingenuity will not fail in adopting some good and simple contrivance for gathering the cut corn.

The present rate of emigration, and the probable scarcity of labour during a season when there is *the* greatest demand for it, with other important considerations, will make the application of machinery to the cutting of corn a question of vital and increasing necessity. Experience may suggest many improvements to this system, but it seems clear that we shall only have a complete reaping-machine by adopting *the rotatory and perpetually-cutting shears.*

METROPOLITAN NEWS.

THE LORD MAYOR'S DINNER.—This event, which was postponed on account of the death of the late Duke of Wellington, came off on Wednesday night, when about a thousand ladies and gentlemen partook of the splendid hospitality of his Lordship. Many of the guests were habited in rich Court dresses, the Aldermen and Common Council appeared in their official robes. On the right of the Lord Mayor were the Earl of Derby, the Chancellor of the Exchequer, Viscount Hardinge, and the Duke of Northumberland. Amongst the principal guests were also Lord D'Eyncourt, M.P.; Sir John Pakington, M.P.; Mr. Henley, M.P.; the Earl of Lonsdale; Mr. A. Stafford, M.P.; Mr. F. Maccabe, M.P.; Sir W. Joliffe, M.P.; Lord John Manners, M.P.; Mr. W. Brown, M.P.; Mr. Christopher, M.P.; Sir J. Duke, M.P.; Mr. Masterman, M.P.; Lord Claude Hamilton, M.P.; the Lord Chief Baron of the Exchequer, Mr. Baron Parke, Mr. Baron Alderson, Mr. Justice Talfourd, Mr. Justice Coleridge, Vice-Chancellor Turner, &c. The Duke of Northumberland responded on the part of the Navy Lord Hardinge for the Army—and Mr. Ingersoll, the American Minister, for the Foreign Ambassadors.—Lord Derby, in returning thanks for her Majesty's Ministers, referred to the good order which prevailed on a late pub is solemnity as striking all foreigners with astonishment and admiration.—In returning thanks for the Commons, the Chancellor of the Exchequer said, "We are now in an interesting moment in the history of the House of Commons, for a new Parliament has just assembled. It is not for me—nothing is farther from my thoughts than to excite any political feelings, or to make any political allusion in this scene and on this occasion; but I trust I may be permitted to say, because I feel sure that I am giving expression only to your feelings, I trust I may be allowed to express a hope, and even a belief, that the legislation of the new House of Commons will be such as will entitle itself to the sympathy of the country—that the members of that House will meet together to take a large view of the national circumstances—that they will meet together to forget all petty feelings—that they will be prepared to legislate, not for a class, but for the community." The most attractive additions to the ornaments of the Guildhall were two busts—one of the late Duke of Wellington, and the other of the late Sir Robert Peel; both by Mr. Matthew Noble, admirably sculptured.

TAXES ON KNOWLEDGE.—In answer to a deputation on this subject, Lord Derby said he thought the present Government had shown no inclination to discourage the dissemination of knowledge. The question of these various taxes—more particularly the advertisement duty—was already under their notice, although, from financial considerations, they had been precluded, at the present moment, from dealing with it.

THE NEW PALACE OF WESTMINSTER.—During the last few weeks great progress has been made in the completion of this building. From the Victoria Tower the screen-work to the private entrance to the House of Commons has been greatly advanced. In New Palace-yard the building is also in a state of forward progress. The river wall of Westminster Hall has been almost pulled down, and a new face in keeping with the style of architecture adopted in the New Palace is being erected. From Westminster Hall to the entrance to the strangers' and reporters' gallery, a Gothic edifice is being erected.

FREEHOLD LAND CONFERENCE.—At the fourth conference of this movement, Mr. Scholefield, M.P., in the chair, held on Wednesday, at the King's Arms, Palace-yard, Westminster, the report of the council, stated that there are 130 societies, 85 000 members, 120,000 shares, 310 estates purchased, 19 900 allotments made, and the sum actually received is £790,000 sterling. Estimating the shares at the average of £30 par share, the total sum being subscribed for is no less than £3,600,000.

ROYAL ORTHOPŒDIC HOSPITAL.—On Thursday a meeting of the friends and committee of this charity took place at the board-room in Bloomsbury-square. From the report, it appears that the institution has been the means of restoring to less that 14,000 cripples, without the occurrence of a single death or case of permanent injury. The number of patients now under treatment amounts to about 700, to which there is a weekly addition of twenty to fifty new cases. A building fund is in progress, towards which her Majesty and Prince Albert have graciously extended their patronage.

VACCINATION.—In consequence of the frightful and fatal spread of small-pox during the last two years—in which period 30,000 persons have fallen its victims, exclusive of several others who have been disfigured and lost their sight by it—an official notice has been issued by all the metropolitan parishes, announcing that those parties who are convicted before a magistrate, of having spread the disease through negligence or otherwise, will be punished with a month's imprisonment, and that those who neglect complying with the Vaccination Act, are guilty of a misdemeanour.

CUSTOMS REFORM.—On Tuesday a deputation from the committee of London Merchants for Reform of the Board of Customs, had an interview with the Premier and the Chancellor of the Exchequer, at the official residence, Downing-street. Lord Derby said he had great hopes that her Majesty's Government would shortly be able to come to some conclusion on this matter

SANITARY CONDITION OF THE METROPOLIS.—Births registered in the week ending Saturday, December 4:—Males, 851; females, 783: total, 1639. Deaths during the same period:—Males, 537; females, 505: total, 1042.

METEOROLOGICAL OBSERVATIONS.—At the Royal Observatory, Greenwich, the mean reading of the barometer last week was 29.710 in. The mean temperature of the week was 42·4 deg., which is rather below the average of the same week in ten years. The mean daily temperature was below the average on three days (Monday, Tuesday, and Wednesday), and on the rest above it. The rain in the week was 0.33 in

Letters from Vienna, of the 4th December, report a sanguinary collision between the Montenegrees and the Turks on the Albanian frontier.

FINE ARTS.

EXHIBITION OF SKETCHES AND DRAWINGS.

The third annual Exhibition of Sketches and Drawings was opened on Monday last, at the Gallery, 121, Pall-mall. It is an improvement upon the two former displays, and is on all accounts a most interesting and gratifying exhibition. We have here in little the original studies in all schools of painting—mere portraiture alone excepted—by most of the best artists of the day, and have an opportunity of tracing the patient steps by which they arrived at the realisation of their favourite conceptions. The aspect of the walls is that of a miniature Trafalgar-square, and Suffolk-street with the two Water-Colour Societies added; and in not a few instances we apprehend the comparison must be acknowledged to be more complete and successful than the picture afterwards painted from it. Whether this be accepted as a compliment or not, it is undoubtedly the case, that the original sketches for some of the favourite works of our leading artists are now eagerly sought after, and command high prices; prices quite disproportionate to those which the works themselves once fetched. This says much for the prospects of art amongst us, and we hope artists will improve upon it.

Amongst the most interesting works in the present collection are three by the late J. W. Turner—one the "Rock;" the other the two, views on the "Washburn, under Folly-hall," and of "Plymouth"—both specimens of his early style, and remarkable for their genuine character, both of outline and effect. Alfred Elmore exhibits a "Sketch for the Picture of Hotspur and the Page," remarkable both as a study, and for its high finish. Alfred Clint has a charming "Heath Scene, Dorsetshire," and another landscape; Copley Fielding, a "View of Tintern Abbey," full of warmth and tenderness; John Callow some admirable sketching in Sussex, among which one especially spirited—"In the Yarmouth Roads;" Duncan a sweet "Sketch on the River Lea," and a "View of Yarmouth Harbour," vigorously treated. E. R. Lee, Boddington, E. Armitage, J. Uwins, A. W. Williams, and others, also contribute largely and successfully in the landscape style. W. Gale produces a very careful sketch from the wall of the Refectory at the Convent of the Delle Grane, at Milan, showing Leonardo da Vinci's grand fresco of the "Last Supper," in its present (we fear hopeless) condition. A sketch in grey and brown of "Russian Peasant Fraying at Dice," by A. Ivons, claims our notice alike for the original and life-like conception and the masterly execution. "A Sketch of My Partner," by J. G. Naish; "The Morning of Life," by Miss M. A. Cole; and "Finette," by J. W. Glass, are three female studies of various character, but all cleverly treated. There are pre-Raffaellite efforts in the room, most of which are already ticketed "sold"—an unmistakeable evidence of the tendency of the public taste in that direction.

PORTRAIT OF JOSEPH HUME, ESQ., M.P. BY LUCAS.

A portrait of the veteran reformer, the member for Montrose, by John Lucas, is now on view at Messrs Graves, previously to being engraved. This portrait owes its origin to a subscription raised under a committee of themembers of the House of Commons, as a mark of their high estimation of the honourable member's long and valued services. It is full-length, standing, and is an excellent likeness, though of a date some ten or fifteen years back, when the honourable gentleman was in the full vigour of his parliamentary life. A table with books on it, and a great leather arm-chair complete the simple back-ground. After it has been engraved every subscriber will receive an autograph proof in return for his subscription; and the picture itself will then be deposited in some public institution to be chosen by the subscribers.

THE LYING IN STATE and FUNERAL of the DUKE of WELLINGTON By HAGHE.

Mr. Haghe has just completed two very spirited and accurate paintings, representing the Lying in State and the Funeral of the great Duke of Wellington; and they are now on view at Messrs. Ackermann's, preparatory to being engraved. The artist has been extremely successful in both these efforts; though, of course, the interment scene, beneath the great dome of St. Paul's, from the vastness of the scene and the variety of brilliant grouping, is the most effective.

BIRTHPLACE OF THE LATE DUKE OF WELLINGTON.

SINCE the Illustrations of Dangan were engraved (see Supplement published with the present Number), the long disputed points of the place and day of the birth of Wellington have been satisfactorily settled by the Rev. Dr. John Murray, of Dublin, in a pamphlet, wherein he has traced the evidence on both points, and most satisfactorily established, as follows:—

As to date. The *Public Register* of May, 1769, and *Pue's Occurrences* of the same date, copy this announcement from the *Dublin Mercury* of May 4:—"Birth. In Merrion-street, the Right Honourable the Countess of Mornington, of a son:" without date. In the *Dublin Gazette* for May 2—4, there is a similar notice:—"A few days ago, in Merrion-street, the Countess of Mornington of a son." *Exshaw's Gentleman's Magazine*, a Dublin periodical, of May 1, announces —"April 29th, the Countess of Mornington, of a son." And in the baptismal register of St. Peter's Church, Dublin, there is the christening:—"April 30-b, Arthur, son of the Right Honourable Earl and Countess of Mornington," attested by Isaac Mann, Archdeacon.

As to place. Merrion-street is mentioned in one of the birth announcements: the *east* side of Merrion-street is in St. Peter's parish. *Watson's Almanack* for 1783 mentions Merrion-square as the Dublin residence of the Mornington family. At the date of Wellington's birth, Merrion-square was so called prospectively, for it was unbuilt; and there is a house in Upper Merrion-street, situated in St. Peter's parish, which would have been at the corner of the street in the vacant space called the square. This house is mentioned by Lord Cloncurry in his "Personal Recollections":—

"I graduated in arts in the year 1791, as it happened, upon the day on which my father entertained the Lord-Lieutenant (the Earl of Westmoreland) for the first time, at Mornington House, *a residence in Merrion-street*, which he had purchased from the late Marquis Wellesley. * * * * *It is at present occupied by the Ecclesiastical Commissioners.*"

It will be recollected that in the Memoir of the late Duke, in the Illustrated London News for Sept. 18, page 226, we stated our conviction that Mornington House, Dublin, was the place of the Duke's birth; although his Grace's biographers had almost invariably assigned it to Dangan Castle, the erroneous suggestion of which is attributed to the witness who was brought from Dangan to answer the allegation of Mr. Wesley's minority at his return for Trim in 1790

We understand that it is intended to place a tablet upon the front of Mornington-house, in Dublin, commemorating the now proven fact of the Duke's birth within its walls.

"GLORY," IN THE WELLINGTON DESPATCHES.—(*To the Editor of the* Illustrated London News.) A paragraph has gone the round of the papers, stating that the word "glory" never occurs in the despatches of the late Duke of Wellington; and this is alluded to as a fact in a leading article of your valuable journal of November 20th. That the statement has, however, inaccurately, been discovered, by merely running a random to the *Gazettes* of 1813, containing a despatch, dated Orville, June 29, 1815, transmitting lists of the officers killed, wounded, and missing at Waterloo (and published in the *London Gazette* of July 3, being a supplement to that of July 1, in the same year). His Grace observes:—"Notwithstanding the *glory* of the occasion, it is impossible not to lament such men, both on account of the public and as friends.—A Subscriber.—Dec. 4, 1852.

CHURCH, UNIVERSITIES, &c.

APPOINTMENTS AND PREFERMENTS.—The following appointments and preferments have recently been made:—*Sub-Deanery:* The Hon. and Rev. S. W. Lawley, M.A., to, in the Cathedral Church of York. *Rectories:* The Rev. Thomas Bacon, M.A., to King's Wortley, Hampshire; the Rev. Henry Anthony Flow, D.D., to Bradley, near Andover; the Rev Charles Worley, B.A., to St. Werburgh's, Dublin, and to the Chancellorship of St. Patrick's Cathedral; the Rev. R. Parker, M.A., to Wells, with Claxby Deathorpe vicarage annexed, diocese of Lincoln; the Rev. J. T. Walker, M.A., to Ashdon, Essex; the Rev. John Beauvoir Dalison, M.A., to Manton, Lincolnshire; the Rev Washington Shirley Maturin, M.A., to Thurgarton, Norfolk; the Rev. William Wright, M.A., to St. Peter's, Worcester; the Rev. A. C. Smith, to Tatesbury, near Calne, Wiltshire. *Vicarages:* The Rev. S. K. Webster, M.A., to Ingham, Lincolnshire; *Curacies:* The Rev. W. C. Welsford to Stanfield, Kent; the Rev R.W. Tarleton, B.A., to St. George's Church, Kendal, Westmoreland; the Rev. C. A. A. Craven, B.A., to Wells, Norfolk; the Rev. James Fuge, M.A., to Over-Peover, Cheshire, the Rev. C. H. Cooke to Burford-cum-Fulbrook, Oxon; the Rev. Clement S. Sharpe to Ince, Cheshire; the Rev. William Calder, B.A., to Fairfield. *Chaplaincies:* The Rev. Henry Flowes Edgell, B.A., to her Majesty's ship *Agamemnon*; the Rev. G. Thompson to be chaplain to the House of Correction, Walsoch; the Rev. W. Barham, M.A., to be chaplain to the Lambeth Borough Gaol.

WESTMINSTER SCHOOL.—The play selected for this year's performance is the *Adelphi* of Terence. The nights of representation are Monday, the 13th; Thursday, the 16th; and Monday, the 20th inst. The entrance to Dean's-yard will be by Great College-street.

On Friday last, near Davizes, was shot one of the very rare and beautiful species of "Turkey Buzzard," (*Meliosus strigo*, Linnæus).

CHESS.

TO CORRESPONDENTS

M P — Hall.—The Treatise of Ruy Lopez was first published at Alcala, in 1561. See an article on the "Classical Chess Authors," in the present month's number of the *Chess-Player's Chronicle*. The article, we are told, is one of a series intended to include every writer of note on the game, from the time of Lucena to the present day.

CRAB: B K G, Monmouthstreet.—You will have seen from the confirmation of the game given in our last, that you have failed in hitting upon the only winning line of operation.

F A M.—Your four-move problem can be solved easily in three moves.

T R.—Before venturing to enter on the sanctuary of Chess Problems, frequented and elaborated by the first masters of the science, you should at least acquire some knowledge of the mere rudiments of the game. The Problem upon God are in every respect correct, and cannot possibly be solved in less than the stipulated number of moves.

AMATEUR.—You should regulate the price of some dealer in such articles. How can we possibly guess without knowing the size and materials?

HERMES.—Your solutions are correct, but should have been sent earlier

C S, Brighton.—You shall have our opinion on their merits in the next Number. They are now under examination.

F R S.—We cannot reply to communications which come unsigned. The letter you allude to had no initials or signature of any kind whatever

T E S.—Be content with solving the Problems of others for the present

C F S.—Received with thanks

F W M, Hall ex. Nova Scotia.—Your suggested system of Chess Notation, by means of the Greek or Roman alphabet, has ever ingenious, we find few favourers in Europe. The problem shall be examined and reported on in our next

W G, of York.—A private acknowledgment has been forwarded

J B, of Staffordshire.—The lesser one is too simple; and the idea of the other, since the publication of the Indian Problem, has been more than once forestalled

SOLUTIONS OF PROBLEM No 461, by Hydra, Gaslight, Constant Subscriber, E F H of Hasketon, Rev T J of Hasworth, are correct

SOLUTIONS OF PROBLEM No 462, by M P, Dray, Guppy, Stella, D D, Cantab, T E B of Woodford, are correct. All others are wrong

* * * Pressure for space compels us to postpone the answers to a multitude of Chess Correspondents until next week.

SOLUTION OF PROBLEM No. 460.

WHITE.	BLACK.	WHITE.	BLACK.
1. B to Q 6th (ch)	K to R sq (best)	4. K to Q Kt 2d	Q to Q Kt 8th (ch)
2. B to R 5th	P to K B 7th (best)		(best)
3. P "Queens"	P "Queens" (ch)	5. Q takes Q	Q takes Q
		6. B to K 4th (ch)	Q to Q B 3d
		7. B takes Q—Mate.	

SOLUTION OF PROBLEM No. 461.

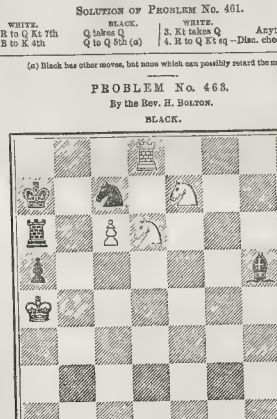
WHITE.	BLACK.	WHITE.	BLACK.
1. R to Q Kt 7th	Q takes Q	3. Kt takes Q	Anything
2. B to K 4th	Q to Q 8th (a)	4. R to Q Kt sq —Disc. checkmate	

(a) Black has other moves, but none which can possibly retard the mate.

PROBLEM No. 463.

By the Rev. H. BOLTON.

BLACK.



WHITE.

White, playing first, mates in seven moves.

MATCH BETWEEN MESSRS. HARRWITZ AND WILLIAMS.

TERMINATION OF THE FIRST CONTEST.

The first series of games between these combatants has terminated in a decisive victory for the German player; his "celebrated" opponent (as a contemporary has praematurely designated him), out of ten games, not having been able to score a solitary one! The second match, in which both parties are bound to play P to K 4th for their opening moves, has already commenced, and we shall report progress in our next.

CHESS IN RUSSIA.

The following Game was contested lately between Prince ODROUSSOFF the Younger and M. SCHUMOFF.

(*Guoco Piano*).

WHITE (Mr. S.)	BLACK (Prince O.)	WHITE (Mr. S.)	BLACK (Prince O.)
1. P to K 4th	P to K 4th	20. Q takes Q (b)	B takes Q
2. Kt to K B 3d	Kt to Q B 3d	21. B to Q B 3d (c)	B to K B 4th
3 B to Q B 4th	B to Q B 4th	22. P to R R 3d	B to Q 6th
4. P to Q B 3d	Kt to K B 3d	23. P to Q R 3d	P to Q sq
5. Castles	Kt takes K P	24. Kt to K 5th	Kt to Q 5th
6. P to Q 4th	P takes P	25. Kt takes P (d)	Kt to K 7th (ch)
7. P takes P	P to Q 4th (a)	26. Kt to R 2d	K takes B
8. P takes B	P takes B	27. P takes Kt	R to Q 4th
9. Q to K 2d	Q to her 6th	28. Kt to K 3d	R to Q 3d
10. R to K sq	P to K B 4th	29. Kt to Q B 4th	B to K B 4th
11. Q Kt to Q 2nd	Castles	30. B takes R (e)	B takes R
12. Kt 4th, takes Kt	P takes Kt	31. Kt to Q R 6th	B to Q B sq
13. Q takes P	B to K B 4th	32. K to his Kt 3d	K to B 3d
14. Q to K R 4th	Q R to K sq	33. R to B 4th	K to K 3d
15. B to K 2d	Kt to Q Kt 5th	34. R to K 4th	P to Q Kt 3d
16. Q R to Q sq	Q to K 5th	35. Kt to Q B 4th	B to Q Kt 2d (ch)
17. Q to R Kt 3d	Kt to Q B 7th	36. K to his 3d	B takes P
18. B to Q 4th	Q to K Kt 5th	37. P takes P	Q B P takes P
19. R takes R	R takes R	38. P to K R 4th	

And the Game was abandoned as drawn.

(a) This variation of the Giuoco Piano is hardly so favourable to the defending player as the ordinary mode of conducting the opening

(b) If he had ventured to take the Q P Pawn it would have cost him the game.

(c) Threatening to enter Q with the Knight.

(d) He would not have improved his game by first taking off the Kt.

(e) If to Q 6th would, perhaps, have been better.

CHESS ENIGMAS.

No. 773.—By P. P. P., of India.

White: K at K 5th, Q at K Kt 7th, Rs at Q B sq and Q Kt 4th, Ps at K Kt 5th and K 4th, Kt at Q R 5th.

Black: K at Q B 4th, Q at Q B 5th, R at Q B 3d, B at Q 6th, Kt at Q Kt 4th, P at Q 5th.

White to play, and mate in three moves.

No. 774.—By W. GILBY, Esq.

White: K at K R 2d, Q to Q R 4th, Ps at K R 4th, K B 6th, and Q Kt 5th.

Black: K at K 3d, Rs at Q 8th and Q Kt 8th, P at K B 2d.

Black to play and draw the game.

Black: K at Q B 5th, Ps at Q B 2d and Q R 3d.

White, playing first, mates in four moves.

No. 778.—By STELLA (*ci-devant* JUDY)

White: K at K B 6th, B at Q 2d, Kt at Q Kt 7th; Ps at K B 3d, Q B 3d, and Q R 2d and 3d

Black: K at Q 3th, P at Q B 4th.

White to play, and mate in six moves.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

Letters from Stockholm, of the 26th ult., state that a most favourable change has taken place in the King of Sweden's health.

Viscountess Palmerston gave a grand dinner on Saturday evening last, at the family mansion, in Carlton-gardens. Viscount Palmerston was prevented joining the party by slight indisposition. After the banquet the noble Viscountess had a "reception," which was attended by a very numerous circle of the *corps diplomatique* and aristocracy.

We regret to announce the sudden death, on Sunday last, at Kemptown, Brighton, of the Hon. Mrs. Crut, wife of Lieutenant-Colonel the Hon. Peregrine Cust, and sister of Viscount Sydney.

The potato crop in Newfoundland has proved an entire failure.

The Corporation of London has made a grant of the fittings of the Gerard's-hall Crypt to the Crystal Palace Company.

The Rhine has overflown its banks for the fourth time since May last.

A lecturer on chemistry has been expelled by the police from Frankfort, for stating before an audience that by cutting the wires of an electric telegraph the communications would infallibly be interrupted.

One hundred and twenty-seven ingots of copper, from the copper region of Lake Superior, were sold during the present week at Birmingham, the price of £103 10s per ton. It is believed to be the first sale of copper from the United States ever made in England.

Prince Puchler Muskau has written to the *Allgemeine Zeitung*, denying the fact of his conversion to the Roman Catholic Church.

A fever of a very bad type is raging at the Kingswood collieries near Bristol.

Mr. Napier, fourth engineer on board the *La Plata*, died of malignant fever, on Sunday, at Southampton.

The British residents in New York, observed the 18th ult., in honour of the funeral of the late Duke of Wellington. This day also was kept at Montreal.

Five insurrections have lately taken place in Mexico.

The Emperor of Russia will in a few weeks have concentrated on his western frontier an army of 240,000 men, composed of the troops in Russian Poland and Lithuania.

One of the latest seizures under the Prussian press-law is a translation of Thomas Paine's "Rights of Man," found on the premises of a Berlin bookseller.

The Egyptian frigate, which left Southampton on Saturday, took out an immense quantity of iron materials and machinery for the construction of the railroad now forming in Egypt.

The seven principal ports of the Canary Islands were opened as free ports on the 10th of October.

The copyright in M Victor Hugo's works has been purchased, for 82,000, by MM. Lebigre and Delaphays, from the society which was formed ten years since for the purpose of circulating the writings of the celebrated poet. They will now be published in cheap duodecimo editions.

Accounts from Jerusal m, of the 26th October, mention that the Commission appointed to settle the question of the possession of the Church of the Holy Sepulchre, raised by the Governments of France and Rome, separated a few days before, without being able to accomplish that object.

St Paul's Cathedral on Monday was restored to its ordinary uses.

In the week ending last Saturday, 380 despatches were forwarded from and received at Cornhill by the Submarine Telegraph Company, giving a return of £238 12s. 11d. sterling for that week.

Orders have been given to strengthen the fortifications on the western coast of France, and the measure is said to be "an answer" to the announced addition to the British navy.

The English agents instructed to make an offer to the Frankfort Diet for the six war-steamers which remain of the "German fleet," have been informed that they are theirs at the price of 240,000 thalers.

Colonel Rawlinson, the decipherer of the arrow-headed inscriptions, has been elected a member of the Royal Academy of Sciences, Berlin, in the room of Burnouf.

The envoys of the New Crystal Palace have entrusted the German antiquarian, Dieter Brandt, with the execution of an extensive series of casts from the *chef d'œuvres* of ancient and modern sculpture in Rome.

Mr. Leadbitter, the Bow-street officer, who was killed by a cab falling over him last week, was buried on Wednesday in the Brompton Cemetery.

The Government of Hesse Darmstadt has concluded with the house of MM de Rothschild a loan of 1,200,000 florins, at four and a half per cent interest, for the construction of a railroad.

Active efforts are still being made to induce the Pope to come to France.

Parliament, it is said, will adjourn for the Christmas recess on the 16th or 17th of the present month, and meet again early in February.

A copy of Rauch's monument at Berlin, of Frederick the Great, has been bought for the Crystal Palace at Sydenham.

Prince Charles of Prussia, while hunting last week, fell off his horse, and received injuries which will probably leave him lame for life.

The Grand Duchess of Tuscany was delivered of a Prince on the 25th ult. In consequence of the event the Grand Duke has granted a general pardon for all offences within the jurisdiction of the police.

General de Lamoricière left Frankfort on the 30 h ult., with his family, for Belgium.

Galignani says, an important improvement in the mode of purifying gas has just been made by the use of peat charcoal instead of lime.

The gold coin in France last year was treble the amount of that coined in 1850, making the large sum of 254,588,622 francs.

M. Guarducci, a clerk in the bank of Messrs. Fenzi and Hall, has been arrested in Florence for the crime of Protestantism!

Baron Ward, the English Premier of Parma, by a ducal decree, has had conferred on him the Grand Cross (in brilliants) of the Order of St. Louis

The twenty-seventh anniversary of the accession to the throne of the Emperor of Russia was celebrated at Warsaw on the 2d inst., with great solemnity. Divine service was performed in all the churches, and salutes were fired from the citadel.

The new Imperial crown of Napoleon III. is said to be not only a masterwork of the jeweller's art, but one which will surpass every Royal ornament in its richness in pearls and precious stones.

Application has been made for an Act of Parliament for power to incorporate a company to denote time by the agency of electricity, and for the supply of electrical time to clockwork and machinery throughout the country.

Gibson's statute of Sir Robert Peel will be finished in three months. It is to be placed in Westminster Abbey.

The Saxon Government has addressed a notice to that of England, declaring that it shall henceforth require all passports given to British subjects to contain a description of the persons of the bearers on the margin, as is the case with the passports of subjects of all other countries.

Itinerating village libraries are being established in Yorkshire.

At Liverpool all party processions are now rigorously forbidden.

The colleries in North Wales are filled with water, and the works are suspended on that account.

In London there are 12,514 houses assessed to the inhabited House-duty in Westminster, 19,714; and in Middlesex, 101,857. The total duty paid was £273,446. The Window-tax amounted to £548,053 annually,

The Swilly rocks, Menai Straits, are to be removed by blasting.

The *Dublin Evening Post* says:—"Lord Jocelyn, who is married to the step-daughter of Lord Palmerston, is to be appointed to the government of Bombay."

The total number of sailing vessels and steamers registered as British vessels employed during last year, not including repeated voyages, was 18,184. The tonnage was 3,360,935, and the number of men employed, exclusive of masters, was 141,537.

The law on the press has passed the Belgian Chamber. An amendment was accepted that no prosecution for offences committed by Belgians against a foreign Government will take place, unless the Government so sets, and should demand it.

A Supplement to the *London Gazette* of Friday, the 3rd of December, contains an official account of the public funeral of the late Duke of Wellington, with the names of all the persons who took part in the ceremonial,

MEXICAN PONIES PRESENTED TO THE PRINCE OF WALES.

PRESENTS FROM MEXICO TO HER MAJESTY AND THE PRINCE OF WALES

We have been favoured with a view of some interesting presents recently sent to her Majesty and the Prince of Wales, by the President of the Mexican Republic.

The present to the Queen consists of two boxes, in mahogany, beautifully manufactured. They bear inscriptions upon silver plates, and contain two other boxes, full of chocolate. As regards the material and workmanship, these boxes are objects of great curiosity. The smaller

PART OF THE MEXICAN "MANGA."

boxes are made of the fibrous part of a root, called camelote, which is perhaps the lightest of all vegetable substances; when dry, its colour is very white. It can be cut into any shape, and receives any kind of colour with remarkable facility. It is very generally employed in the manufacture of flowers, figures, statuettes, and many other articles. It cannot, however, be used for ordinary purposes, in consequence of its being of such delicacy that the touch of the fingers tarnishes its surface and injures its texture. Such is the material of which these boxes are made. They are ornamented with flowers in bas-relief, made from the camelote. Upon an interior cover there are a great number of small quadrilions, each of which contains a little figure, beautifully executed, from the same material. These figures exhibit every variety of costume of the Mexicans. It would be scarcely possible to illustrate the exquisiteness of such minute workmanship.

The present to the Prince of Wales consists of three Mexican ponies, a saddle, with a bit and spurs; and a kind of cloak, which in Mexico is called "manga."

The ponies are beautifully formed, and of remarkable grace. They possess great spirit and courage. Two of them are horses, and the third is a little white mare, which closely resembles a charger in miniature. They were placed under the care of a Mexican boy, as groom, who accompanied them to England. This young fellow is clothed in the dress of a Mexican farmer, and exhibits much skill in horsemanship, being easy and firm upon the saddle. The little mare evinces much impetuosity and fire. At the least command of the boy she puts forth all her strength and agility; but at the same time is exceedingly docile, tractable, and light of action.

The saddle is an especial object of interest; and our readers may judge of the great beauty of the design, richness of the materials, and perfection of the workmanship, by the accompanying diagram, sketched by our artist from a stereoscopic daguerréotype by M. Claudet: the elaborate embroidery, adorned with silver filligree, is of extreme delicacy. The beautiful harness is made from the Mexican model, which is derived from the Spaniards, who appear to have themselves copied it from the Arabs. It consists of a frame, covered with solid silver, ornamented with a variety of arabesques, executed with great taste, and engraved at the sides with the arms of England. The interior part of this frame, as seen in the diagram, is terminated with a lion's head of the same metal. In the hinder part are holsters with silver guards, and covered with an elliptical piece of leather, embroidered with gold and silver over a blue ground of silk, divided by very minute scarlet fillets. The stirrups are of solid silver

MEXICAN SADDLE, BRIDLE, AND SPURS.

covered on the front with filligree of the same metal. All the harness rests on the horse over a saddle-cloth of blue velvet, richly embroidered with silver and gold. The bit and spurs are of silver, gracefully chased; and the reins, buckles, and other parts of the harness consist of leather and silver filligree.

The bit is not less worthy of attention, as it is of extraordinary efficacy, and of such power, that the horse obeys it at the slightest touch. It is not constructed with a simple hinge, as the English bit, but it has in the centre a lever, which acts against the horse's palate. A bit of this powerful character is necessary to govern the Mexican horse, which runs wild in its youth on the prairies. At the age of four years the horses are caught, and subjected to the saddle: before using the bit, they are tamed with a single cord bound to their head; and the bit is not made use of until they are able to bear it without a struggle.

We have also engraved the circular part (which is embroidered in the centre) of the Mexican cloak, which is called manga. It has in the middle an aperture for the head. These vestments vary exceedingly in design and quality; some of them being as rich as that sent to the Prince of Wales—which, as shown in the illustration, is embroidered with silver, and fringed.

We have likewise portrayed the ponies; one ridden by the groom, in his native costume.

FLOOD AT FISHERTON, SALISBURY.

FLOODS AT SALISBURY.

The City of Salisbury has been recently visited with serious floods. All the lower parts of Fisherton have been from two to three feet under water. The inhabitants of several of the cottages were compelled to betake themselves, with their furniture, to the upper floors; and, in many cases, considerable suffering and distress have been the result. Of course the foot passenger traffic was suspended, and horses and carts plied for hire between the infirmary and the turnpike. The ordinarily shallow stream that traverses Back-lane, became a roaring flood; and the Avon extended its swollen waters right and left, so as to threaten the stability of the town-mill, and the adjacent premises. In Back-lane two cows, which had strayed into the water, were carried down by the flood, but were saved from drowning by the coming into contact with Summerlock-bridge, the arch of which being covered with water, stopped the cows, and thus enabled them to be rescued. A correspondent of the *Salisbury and Winchester Journal* states, that on the 26th ult., while Dr. Finch and Mr. Jackson were (in heavy rain and knee high in water) on the north side of Fisherton-street, distributing 1s. per head to the poor families, two men, in the employ of Mr. James Blake, landlord of the Waggon and Horses Inn, Fisherton, went from door to door distributing a quart of strong beer to each family. Both acts of kindness were gratefully received; and the assistance in money enabled the poor to provide themselves for pressing necessity. The accompanying illustration, from a sketch by our own artist, shows a portion of the flooded district of Fisherton.

Fisherton has, however, experienced a longer visitation of flood than that we have just described; for, in the winter of 1809, the water ran through many of the houses there for nearly six weeks.

THE LATE MISS BERRY.—FROM A BUST BY THE HON. ANNE SEYMOUR DAMER.

THE LATE MISS BERRY.

HORACE WALPOLE, Earl of Orford, was a lively boy, and amused the grave statesman his father, when George I. was King. Horace Walpole was a youth of fashion, and began to be an author under George II. Early in the reign of George III. he delighted the world with his famous "Castle of Otranto." In mind, and scarcely in body, Horace Walpole never grew old: he lived to be a gay lover while the French revolution occupied Europe. One of the heroines of his pleasant evening of existence passed at Strawberry-hill, forms the subject of this notice.

Miss Berry (such was her name) was the elder of the two daughters of Robert Berry, Esq., of South Audley-street; a Yorkshire gentleman, of fortune, and the disappointed heir-at-law of an uncle, who unexpectedly left his wealth away from him. The names of these girls were, Mary and Agnes; or, as they were called in society, *Old* Berry and *Elder* Berry. Mary, even when Walpole knew her, was acquainted with Latin; and Agnes painted in water-colours, and had a taste for sculpture. Walpole is said to have first become personally acquainted with Miss Berry, and her sister, at Lord Strafford's, at Wentworth Castle, in Yorkshire. He met them before 1789, and was soon enamoured. The result, on the part of the ladies, was a Platonic attachment of lasting duration towards "the forlorn antique of seventy-one"—for to such age had the author of "The Castle of Otranto" then come. A perpetual correspondence between the Berrys and their fantastic inamorato heightened the charms of this loving friendship. The ladies were his frequent visitors at Strawberry-hill. "Walpole," says the *Athenæum*, "was fond of his two wives, as he called them—would write and number his letters to them—and tell them stories of his early life, and what he had seen and heard, with ten times the vivacity and minuteness that he employed in telling similar stories to Pinkerton or Dalrymple. The ladies listened: and it was Walpole's joy—

Still with his favourite Berrys to remain.

Delighted with what they heard, they began with notes of what he told them; and soon induced him, by the sweet power of two female pleaders at his ear and in his favourite 'Tribune,' to put in writing these charming 'Reminiscences' of the Courts of George I, and his son, which will continue to be read with interest as long as English history is read. In the opening sentence of his 'Reminiscences,' Walpole tells the origin of his now printed recollections, and gives us to understand, that he had 'no greater pleasure' than to please both the ladies. So his contemporaries understood:—and Courtenay, somewhat to his annoyance, described him as one—

Who to love tunes his note with the fire of old age,
And chirps the trim lay in a trim gothic cage—

alluding to some rather mediocre verses which he had addressed to his 'dear wives,' and printed at his private press."

After Walpole's death, which occurred on the 2nd of March, 1797, the two Misses Berry and their father, published an edition of his works in five volumes. From this period the sojourn of the ladies was either in South Audley-street; Curzon-street; or at Richmond, in the vicinity of the well-loved Strawberry-hill. Their time was spent agreeably in the society of wit, authors, and people of fashion. In 1817, their father died at Genoa. In 1844, Mary Berry brought out a collection of her own writings, in two octavo volumes, entitled—"England and France; a Comparative View of the Social Condition of both Countries, from the Restoration of Charles the Second to the Present Time: to which are now first added, Remarks on Lord Orford's Letters;" "The Life of the Marquise du Deffand;" "Life of Rachel, Lady Russell;" and Fashionable Friends," a comedy. Miss Berry subsequently wrote a "Vindication of Macaulay's Character of Horace Walpole." The publication, in 1840, of the letters of Walpole to herself and her sister, proved the most prosperous of her literary speculations.

On the 20th ultimo, in her ninetieth year, Mary Berry departed this life, having survived her sister Agnes about eighteen months. Her death severs the last literary link that connected with our age the days of Horace Walpole, which were the days of great men: for in his time lived and died Pope and Swift, Johnson and Goldsmith, Gibbon, Robertson, and Burns; and how many more mighty contemporaries.

The accompanying Portrait is copied, by permission, from the bust by the Hon. Anne Seymour Damer, in the possession of Sir A. Johnston; engraved in Miss Berry's "England and France" (Bentley), 1844.

PARLIAMENTARY PORTRAITS.

MR. GEORGE ALEXANDER HAMILTON, M.P. FOR DUBLIN UNIVERSITY, JOINT SECRETARY TO THE TREASURY.

It is not always the man highest in office who is really the most important person in the Government. In every party there are one or more gentlemen who wield a kind of mysterious influence, and are very extensively courted, though, seemingly, scarcely entitled, by their position to such distinction. They are also honoured with the intimate confidence of their party chief to an extent not vouchsafed to many important members of the Government who are not of the chosen few called the Cabinet. These gentlemen are the Secretaries to the Treasury one of whom is especially known, in the conventional language of the political world, as the patronage secretary. His duties are various and anomalous; and the most agreeable of them is the communication to the favoured objects of ministerial patronage of the acts of grace extended to them. Mr. Geo. Alex. Hamilton, on the accession of the present Ministry, was nominated by Lord Derby to this delicate and responsible office. Like the appointment of Mr. Walpole, it was Lord Derby's own act—

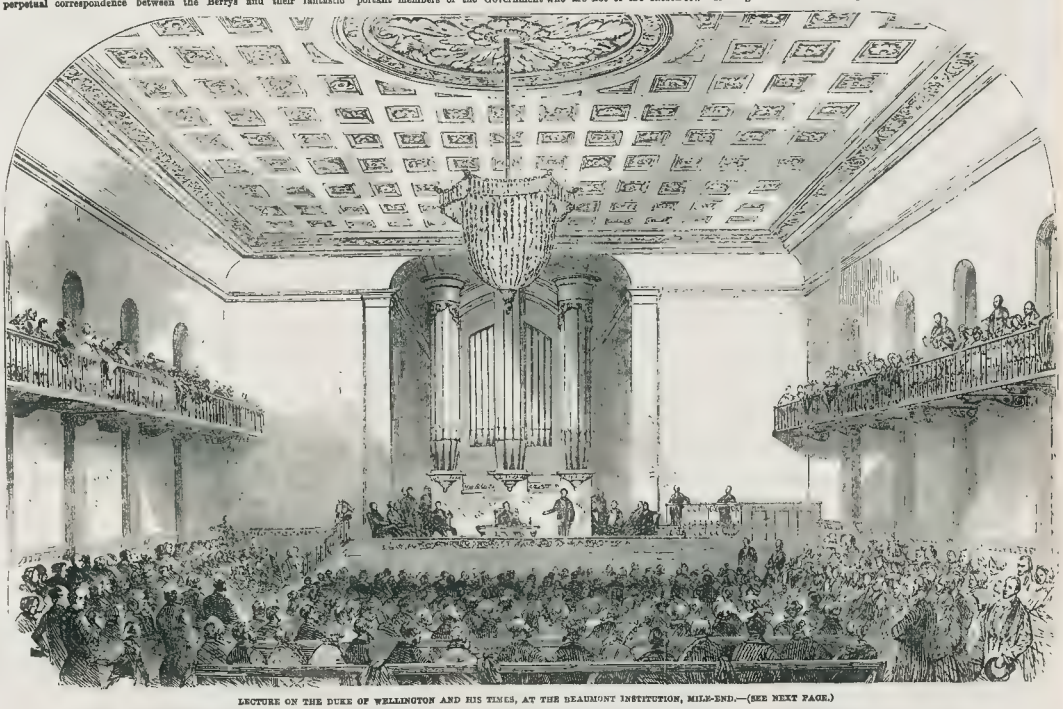
MR. G. A. HAMILTON, M.P. FOR DUBLIN UNIVERSITY, JOINT SECRETARY TO THE TREASURY.

little expected, we believe, by Mr. Hamilton, and perhaps less by the Ministerial party.

Mr. George Alexander Hamilton is the eldest son of the late Rev. George Hamilton, of Hampton Hall, by Anna, daughter of T. Pepper, Esq., of Ballygarrel Castle, county of Meath. His grandfather was Mr. Baron Hamilton, a high legal authority in his day, and one of that rare species—the patriotic Irishmen. He is said to have been mainly instrumental in introducing in Ireland such cotton manufactures as there are there, and in establishing and extending the fisheries.

The family of Mr. Hamilton, it appears, has been settled in the county of Dublin for nearly a century and a half. Previous to that they were in the county of Down. The family is descended from an old Scotch baronial family of the same name; and we find that the founder of this family was one of the delegates sent over by King James I., when King of Scotland only, to advance his interests in Ireland.

Mr Hamilton was born in the year 1803. In 1835 he married Emilia Fancourt, daughter of Joshua Uhthoff, of Bath, a gentleman of foreign origin; but who was in the English service, and of whom honourable mention was made by the Duke of Wellington, in his despatches from India. Mr. Hamilton graduated at Oxford; and, when he left college, appears not to have entertained the idea of becoming a political character. He went to Ireland, where he resided on his estate, and where he bears a reputation common, we must admit, to so many of the Irish Conservatives, of being a good landlord. Circumstances drew him from his retirement. It is stated that this occurred on the occasion of a public meeting convened by the High Sheriff of the county of Dublin, to present an address to the Lord-Lieutenant in reference to an insult publicly offered to him in the theatre in Dublin. Mr. Hamilton was induced to attend this meeting, and, on a resolution being moved, describing the affair as an attempt at assassination, Mr. Hamilton rose and



LECTURE ON THE DUKE OF WELLINGTON AND HIS TIMES, AT THE BEAUMONT INSTITUTION, MILE-END.—(SEE NEXT PAGE.)

defended his own party so ably and earnestly as to draw forth an especial compliment from Daniel O'Connell, for his firmness and good temper. Whatever were the faults of the agitator, he was always ready to acknowledge and admire talent and uprightness in his opponents, if they were good landlords and not very violent partisans. Mr. Hamilton appears always to have, thus far, commanded the respect and allayed the exuberant spirit of the greatest master of abuse in the, or perhaps in any age.

Once on the arena of politics, Mr. Hamilton seems to have relished the excitement; for we find that, at the election for the county of Dublin, which followed the meeting spoken of, he proposed Sir Compton Domville as the Tory candidate; when he very strongly denounced O'Connell's anti-tithe resolutions. In 1831, Mr. Hamilton was himself the Conservative candidate for Dublin, opposed by the present Lord Talbot de Malahide and Lieutenant-Colonel White, on the Roman Catholic side. The contest lasted for fourteen days, and Mr. Hamilton himself polled a thousand plumpers. At length, however, the contest was decided in favour of the candidates supported by the priests. Mr. Hamilton petitioned the House of Commons against the return, on the ground that undue spiritual influence had been exercised; but the House refused to entertain the case. In 1832, when Lord Talbot de Malahide ceased to represent Dublin, Mr. Hamilton again came forward, but was beaten by Lord Brabazon, who obtained a majority of sixty over him. In 1833 Mr. Hamilton again offered himself as a candidate, but failed. In 1834, one of that four the "Conservative Society," as it was called, was formed in Dublin, which afterwards formed the base of the long and successful opposition of the Tories under Sir Robert Peel. In this society Mr. Hamilton took a prominent and active part. In August, 1834, he became the honorary secretary of the Lay Association for the Protection of Church Property; and in 1835 he came forward in opposition to O'Connell as candidate for the city of Dublin. After a spirited contest, the numbers were—for O'Connell, 2678; for Hamilton, 2461. Mr. Hamilton, who seemed predestined to severe election contests, at once petitioned against O'Connell's return. A committee of the House of Commons was appointed, consisting of eight Whigs and three Conservatives, which alone, in those days, seemed to determine the issue beforehand. A committee-room in Dublin was granted, for which an examination was conducted on the spot, which lasted from May, 1835, to January, 1836. In the February of the latter year a Parliamentary committee resumed its labours, and sat till the following May, when Mr. O'Connell and his colleague were unseated, and Mr. Hamilton and Mr. West were declared duly elected.

Mr. Hamilton was not destined long to enjoy his dearly-purchased honours. In 1837, Mr. O'Connell contested the seat with Mr. Hamilton, who, it is said, was as far as the last moment behind Mr Hamilton again petitioned, but this time he was assisted in the cause by the celebrated Scotch-wode subscription. The result was that Mr Hamilton was declared duly elected, to the ousting of O'Connell's liberal colleague. In 1841, on the elevation of Mr. Serjeant Jackson to the bench, Mr. Hamilton first came in for the University of Dublin, which he has since continued to represent. During the short time that he enjoyed a seat in Parliament, up to this date, he was known as the earnest but not intolerant or factious champion of Irish Toryism. In January, 1837, it was to him that the petition of the great Protestant meeting was intrusted for presentation, which formed the groundwork of the Earl of Roden's celebrated Committee of Inquiry into the General System and Principles pursued in Ireland. Mr. Serjeant Jackson to the bench, Mr. Hamilton has always taken a deep and active interest in the vexed question of scriptural education in Ireland.

On the 2d of June, 1845, Mr. Hamilton delivered a most clear and temperate speech on the "Godless Colleges" Bill. Admitting the necessity of a religious, he at the same time deplored the want of a good secular, education; and, although he could not give the new measure his unqualified support, still, as the means of obtaining religious education were also afforded, he could not make up his mind to oppose the measure.

When, on the 10th July following, Mr. Bernal Osborne moved for a committee of inquiry into the revenues of Trinity College, Dublin, as an amendment to the motion for the third reading of the Colleges Bill, Mr. Hamilton opposed the motion in a speech of great eloquence and research. On the other hand, Mr. Hamilton spoke earnestly and well consistently against the Maynooth Endowment Bill. Although he took no part in the debates on the Corn-law Repeal Bill, Mr. Hamilton's name was found in the division lists by the side of those of Mr. Disraeli, and Lord George Bentinck

The subject of education in Ireland is one which has always much occupied Mr. Hamilton's attention. On the 21st of June, 1849, he moved an address, praying for such an alteration in the system as would make it acceptable to the clergy and laity desirous of scriptural instruction. The speech of the hon. gentleman was confessedly able and temperate; but, on a division, his motion was lost by 162 to 102. Mr. Hamilton renewed his motion on the 21st June, 1850, when he was again defeated by a majority of 83.

When Lord Derby proposed to Mr. Hamilton to join his Administration as Secretary to the Treasury, his scruples on the subject of the National System of Education, the work of Lord Derby himself in his earlier days, were overcome by an announcement that the Premier's views on the subject had somewhat changed, and that there should be modifications of the system that would extend aid to schools exclusively Protestant or Catholic. This assurance relieved Mr. Hamilton from the necessity of following up a pledge he had given again to force the subject on the attention of the returning Government.

Mr. Hamilton is a clear and forcible speaker on his favourite topics; but he does not very frequently address the House of Commons. We believe that, during his tenure of office, he has given very general satisfaction, by a combination of firmness and suavity, and a rigid regard for his duty to the public. Lord Derby has shown tact in his choice; but it was the least he could do for a gentleman who has been such a martyr to the interests of his party. It is easy to ride into office on a party and to get a reputation by making fine speeches; but to go through five heavy contests, and fight three election petitions, is no joke, as all who know anything of election expenditure will promptly admit.

BEAUMONT INSTITUTION.

The Life and Times of the Duke of Wellington have, since his Grace's lamented death, been illustrated by several lecturers, in various parts of the kingdom. One of the most successful instances was the first of two lectures delivered at the Beaumont Institution, Beaumont-street, Mile-end, on the 21st of October last, by the Rev. T. J. Rowsell, M.A., Incumbent of St. Peter's, Stepney; the proceeds to be given to the charities of that parish. The attractiveness of "The Duke of Wellington" as the subject of the lecture was evidenced by the largeness of the attendance, the body of the hall being completely filled, the ladies forming a very large portion of the audience. At eight o'clock the rev. gentleman, accompanied by several clergymen and gentlemen, arrived, and was very cordially received. He commenced by expressing his sense of the kindness he had experienced from Mr. Beaumont and the directors of the institution, in granting him the use of the hall, for the purpose, as he felt would accrue to the Charities in which he was interested. The lectures were intended for the benefit of the subscribers, and it was the desire of the directors that the lectures given in this institution should be of a strictly secular character, and that that room never should be made the arena of political or theological discussion. The rev. lecturer then proceeded to observe, "that the history of a great man was the history of his country, and unless he benefitted his country he could not be a great man—unless he substantially benefitted it, and made it the object of his actions and his desires. It was that peculiarity which made the Duke of Wellington great; and they might truly say that, had it not been for him, the country would have taken a very different direction, and its history would have been written in a different character, and in a different tone. The Duke of Wellington managed, as long as he lived, to exhibit a standard of greatness to which future heroes would look up. It might be that, going over his achievements, they would be more impressed with a sense of his greatness, and the more they would see that he was one of the brightest patriots that had ever served their happy country.

The rev. lecturer then sketched the memorable career of the Great Duke, and concluded by intimating his intention of alluding, in his next lecture, to the more important events of the Peninsular War; but we regret to learn that Mr. Rowsell was prevented from fulfilling his engagement, by the illness of his son.

It may be interesting to add, that the Beaumont Institution originated with Mr. Barber Beaumont, who designed and erected, at a cost of £8000, the noble building, containing a spacious hall (such is the capacity), fitted for concerts and lectures; a library, since increased to upwards of 4000 volumes; a museum of natural history; committee and class-rooms, &c. At the same time Mr. Beaumont invested the sum of £10 000 in the funds, and appointed trustees and guardians of the property, to apply the income arising therefrom to the maintenance of the institution. The munificent founder's son, Mr. John A. Beaumont, has, by the contributions he has made to the institution, proved his resolve to carry out the object his father so sedulously strove to promote; a spirit largely shared by individuals of rank within the district, whereof Beaumont-square is the centre. Several of the wealthy inhabitants of Stepney, Limehouse, and the adjoining parishes, and persons who have an interest in the results which eventually must spring from the institution, in the densely-peopled neighbourhood which the late Mr. Beaumont wished to be the scene of his benevolent project have likewise greatly added to the efficiency of the institution, by presents of books, maps, works of art, and specimens of natural history; and under such auspices, the Beaumont Institution, double-less, effects much good in its own district, and presents an example worthy of being followed in other quarters.

MUSIC.

SACRED HARMONIC SOCIETY.

Handel's oratorio, the "Messiah," was performed last night at Exeter-hall, under Costa's direction, the principal vocalists being Madame Florentini, Miss Birch, and Miss Dolby, Mr. Lockey and Mr. H. Phillips, with Mr. Bennett as organist. In the present number of the ILLUSTRATED LONDON NEWS a notice of the performance cannot be published, owing to the hour the paper must go to press; but it may be here mentioned, that the first appearance of Madame Florentini at the concerts of the Sacred Harmonic Society, as a singer of the sacred school, has created quite a sensation in the musical circles, the dearth of leading sopranos being now so severely felt. Having recorded in these columns the great effect produced at Bristol by Madame Florentini's singing of the soprano part in Mendelssohn's "Elijah," no doubt can be entertained of the high position she must take, with her unrivalled organ, in the oratorios of the great masters; especially as she has been under the experienced training of Sir George Smart, for life, the grandest style of vocalisation, in which to succeed thoroughly, not only the finest quality of voice is required, but intellectual and dramatic declamatory powers of the highest order are exacted.

AN EVENING WITH HOOD.—Last Monday night, a literary and musical entertainment, based on selections from the writings, serious as well as comic, of Thomas Hood, was given at the Whittington Club, under the patronage of R. Monckton Milnes, Esq., M.P. The proceeds will be devoted to the Hood Memorial Fund. Mr. and Mrs. G. A. Lennox were the vocalists; the recitations were from Mrs. T. C. Foster, Messrs. E. Copping, G. Grossmith, Heylin, W. Roberts, G. H. Watkins, M'Combie, and W. J. Brind. The members of the institution and its friends assembled in force on the occasion, and filled the admirable object of the even-ng's entertainment. The sculptured sarcophagus will be seen by the public in due course, but the more lasting monument of the poet's genius will be the mighty musings of the mind, the humorous and pathetic strains Hood has left to the world, and the poetry of which it is difficult to decide whether the heart or the intellect has the mastery.

MUSICAL EVENTS.

Jullien terminates his month's series of promenade concerts at Drury-lane Theatre, this evening (Saturday); winding up his too brief campaign with the brilliant Bal Masqué, on Monday. Despite the badness of the weather, his entertainments have met with more than ordinary success. He will leave for the United States at the end of the summer. Prior to his departure, he will make a farewell tour in the provinces.——Miss Dolby assisted by Miss Cicely Nott, Mrs. Maria Greenbach, Signor Ciabatta, Mr. Benson, Mr. Lindsay Sloper, Mr. Dando, Mr. Lucas, Herr Koenig, Mr. Frank Mori, and Signor Regondi—gave the second of her *soirées musicales* at her residence, on Tuesday night.——At the Amateur Choral Meetings, under the direction of Mr. C. Salaman, on Wednesday, Spohr's "Jessonda" was performed.——Another harp *matinée* was given at Erard's, in Great Marlborough-street, last Tuesday. Mr. T. H. Wright started these novel and interesting meetings, in conjunction with Herr Oberthür, Messrs. Boleyne Reeves and Faust. The grand national quartet for four harps, on themes from the "Huguenots," is the composition of Herr Oberthür.——At the *conversazione* of the Musical Institute, last Saturday, Mr. Oliphant, the hon. secretary of the Madrigal Club, read an interesting paper on "The Dramatic Music of the Seventeenth Century," more especially referring to the music in "Macbeth" The "Macbeth" music, ascribed to Matthew Lock, was contrasted with the music, a copy of which is in the British Museum; and the superiority of the latter is so strongly affirmed, that, at the next revival of the tragedy, a manager would gain credit, and perhaps profit, by enabling amateurs to come to a judgment on its merits. The musical illustrations of Mr. Oliphant's address were sung by Miss Dolby, Mrs. A. Newton, Miss Chambers, Messrs. Coward and H. Phillips, with Mr. Lucas as the pianoforte accompanyist.——The Greenock Philharmonic Society's concerts commence on the 27th instant. Engagements have been made (for the season of two months) with Mrs. A. Newton and Miss Dewar; and with the popular instrumentalists—Mr. Pratten (flute), Mr. Nicholson (oboe), Mr T. Harper (trumpet and cornet-à-pistons), Mr. C. Harper (horn), Mr. Maycock (clarionet), Herr Hausmann (violoncello), Mr. Thirlwall (violin), Mr. Larkin (bassoon), and Mr. Bellia (violoncello). The "Classical Harmonists," at Bristol, gave, last Monday, Shakspeare's "Midsummer Night's Dream," with Mendelssohn's divine music. Mrs. Fanny Kemble read the play beautifully. The usual orchestra was strengthened by the addition of the following amateur performers: Messrs. H. Cooper (violin), Howell (double-base), Phillips (violoncello). Nicholson (oboe), Jarrett (horn), Larken (bassoon), and R. Pratten (flute)

Signor Arigotti, the tenor, gave an evening concert at the Brighton Pavilion last Monday, at which Madame Frezzini, Mrs. Wallack, and Miss Alleyne, aided him in the vocal gleanings. Madame Oury, the *pianiste*, and Mr Oury, the violinist, were the solo instrumentalists; and Mr. Turner, of the Chapel Royal, was the conductor. Miss Alleyne (a highly-promising pupil of Signor Garcia), has made such a successful *début* at the Norwich Musical Festival, sang Rossini's cavatina "Bella Rosa," and a German song, "The Echo," by Joubert, the well-known composer and conductor of the Grand Opera in Berlin. In addition to the above concert, three others at Brighton have been active. Under the patronage of the Duchess of Gloucester, Mr. Aptommas, the harpist, had a *soirée* at the Old Ship Room; with the co-operation of the Misses Bassano and Messent, and Mrs. A. Stone; Mr. Richardson (flautist), Mr. Salaman (pianist), Mr. Hill (violinist), &c. Madame de Lozano, the Spanish vocalist, had a concert at the Pavilion; aided by Signor F. Lablache, Regondi, Mr. Apthomas, Herr Kuhe (pianist), &c. The second and third of the Sacred Concerts of Mr. and Mrs. Bond have also been given in the Montpelier-road Room, the selection being from Handel, Mendelssohn, and Mozart.——The Harmonic Union will be opened at Exeter Hall next Friday, by a performance of the new oratorio, "Joseph," by Mr. Charles Horsley; the work which was produced by the Liverpool Philharmonic Society, and now executed for the first time in London. Mr. Benedict is the conductor of this new musical institution, and Mr. Henry Smart is the organist. J. S. Bach's motett, No. 6, and the National Anthem will precede Mr. Horsley's oratorio; the principal singers in which are Miss Birch, Miss Eliza Hughes, Miss Williams, Mr. Lockey, and Mr. Lawler. The principal performers from the Royal Italian Opera orchestra are included in the band. The directors of the Harmonic Union promise to bring out, during the present season, Mr. Pierson's "Jerusalem," and perhaps a new sacred work by Sterndale Bennett; besides Bach's "Passione," Mendelssohn's "Elijah" and "Lobgesang," Handel's "Messiah," Haydn's "Creation" and "Seasons;" and compositions by Mozart, Spohr, Weber, Cherubini, &c. Secular productions, such as Handel's "Alexander's Feast," Macfarren's cantata "Leonora," Mendelssohn's "Walpurgis Night," Beethoven's "Mount of Athens," a new overture by Mr. Henry Leslier, and a new pianoforte concert by Sterndale Bennett, to be performed by Miss Arabella Goddard, are also mentioned in the prospectus of the ensuing season.——Madame Fiorentini will sing at the third of the St. John's Wood Subscription Concerts, under the direction of Mr. G. Forbes, next Tuesday.——Sir Henry Bishop's elegy, "Mourn for the Mighty Dead," the words by Dr. Maginn, published in the ILLUSTRATED LONDON NEWS), will be performed by the London Sacred Harmonic Society, under Mr. Surman's direction, on the 23d inst., prior to Mendelssohn's "Elijah."——Blumenthal, the pianist, has arrived in London from Germany.——The second appearance of Madame Fiorentini, at Exeter-hall, will be on the 22d inst.

FOREIGN MUSICAL NEWS.

Vienna advices mention the success of Madame de Strantz as *Fidès*, in Meyerbeer's "Prophète;" she is contralto, and it is reported will make her *début* in London at the Royal Italian Opera, next season. Herr Ander was the *Jean of Leyden*, at Vienna, and Mdlle. Nay, *Bertha*. Letters from Stockholm state that the "Prophète" had been produced with immense success, after a year's preparation for the *mise en scène*, which is declared to have been perfect. At the end of the opera, the cries of "Meyerbeer for ever!" were incessant. Not only were the principal singers called before the curtain, but the same honour was bestowed on Herr Rodberg, who played the organ, at the cathedral of Munster. The singing master of the Copenhagen Theatre Royal, Herr Henrici-Hung, has been highly successful in a one-act opera, "Flight and Danger."——Correspondence from Rome, of a recent date, dwells on the enthusiasm with which the *début* of a new *prima donna* at the Argentina Theatre has been received. She is no less a personage than the Princess Donna Maria Piccolomini, daughter of the Prince, and niece of the Cardinal of that name. She possesses a beautiful soprano voice of remarkable compass, particularly in the upper notes, as was proved in Donizetti's "Polyeucto" (the Martyr). Her relations in vain endeavoured to prevent her appearance on the stage; the Princess *prima donna* declared that her desire to face the lights was irresistible.——We learn from St. Petersburgh that Ronconi and Labiache, in "Donizetti's "Don Pasquale," and in Rossini's "Cenerentola," have created quite a *furore*; De Bassini had delighted the Russians as *Don Carlos*, in Verdi's "Ernani." The new tenor, Signor Stecchi Botardi, had produced no effect; but Tamberlik, in *Otello*, excited the utmost enthusiasm. Signora Medon has a magnificent voice and much energy, but her studies have been neglected, and she was not regarded as a sufficient substitute for Grisi; and neither Madame Spezia nor Mdlle. de Merie (the contralto) pleases the Russians. Mdlle. Marray, a vocalist of the light florid school, was liked. Tagliafico and Polonini were appreciated as nullities; but the tones of Formes, the basso, is much regretted. Balfe was in St. Petersburgh; and his engagement as conductor at the Italian Opera, was reported. M. Apollinaire de Kontski (the violinist), Madame Parish Alvers (the harpist), M. Mortier de Fontaine (the pianist), were also in the Russian capital.——Verdi's "Luisa Miller" has been produced at the Italian Opera-house in Paris, for Mdlle. Cruvelli; and is also in rehearsal at the French Grand Opera. Vieuxtemps (the violinist), Marc Bohrer (the violoncellist), and Mdlle. Clauss (the *pianiste*), are in Paris.——Furstenau, the celebrated flute-player, died last month, at Dresden.——The New York papers record the successful first appearance on the operatic stage of Mr. Augustus Braham (son of the Nestor of tenors), in the part of *Edgardo*, in Donizetti's "Lucia." Mr. Augustus Braham went out to America as a concert-singer, with Miss Catherine Hayes. Madame Anna Bishop was the *Lucia*. The opera was produced in Niblo's Theatre, under the direction of M. Bochsa.

THE THEATRES.

SADLER'S WELLS.

A clever play, in five acts, entitled "Might and Right," was produced on Wednesday. There is much interest in the plot, and novelty in the scenery and costumes. The latter were highly creditable to the *artistes*, Mr. Finlay, Mr. Coombes, and Miss Bailey; the former was well arranged by the anonymous playwright, fabricator, or translator of the drama. "It is a known piece of wax-work," the hero, *Obolenski* (Mr. Phelps) being employed by *Helena*, Czarina of Russia (Mrs. Ternan), to entrap a young confiding damsel from Florence, and, on pretence of love, to persuade her to follow him to Russia, which she does. The play opens on the frontier of Muscovy, with the young *Olga* (Miss Cooper), in contest with the serfs of *Obolenski*, who seek to effect their freedom by his assassination; but whom she buys off from their project by distributing among them a sum of money, as the largess of their master. *Obolenski* is tortured with remorse when he finds that his life has been saved by the poor girl whom he has been employed so cruelly to deceive. Circumstances, however, conspire, and he is compelled to proceed with his fateful mission. In the second act we have the *Czarina* anxiously awaiting the advent of her favourite and his victim. But, instead of coming directly to court, he rests, a few leagues distance, at his own palace. Thither, accordingly, *Helena* resolves on going, moved by jealousy or other motives. Previous to her arrival, however, a Jew—otherwise *Belksi* in disguise (Mr. Bennett)—appears on the scene, and bargains for a bracelet, which he discovers to be *Olga's*, and thus learns that the orphan girl, whom he had placed in Florence, is in Russia. The *Czarina* has an interview with *Olga* and *Obolinski*, at first concealing her rank and identity, and thus drawing from *Olga* the state of her sentiments, which are anything but favourable to herself, and only too favourable as regards the minister. To make all sure, she places the poor mystified girl in custody, and commands the attendance of her lover to dine with herself. In the third act the *Czarina* declares her policy to her council. *Olga* is none other than *Teodora*, the daughter of her deceased husband, left under her regency. Dreading partizanship in favour of the infant ruler, and having to defend herself against political revolts, she would have *Olga* by means to rid herself and the state of all these evils, but that *Belski* had removed the source of them in the person of the child; whose place of retreat in Italy she had at length discovered; whose presence in Muscovy she had now ensured, and whose death she incontinently commands. Having announced her purpose, she dismisses the council; but soon hears that *Obolenski's* palace is in the hands of *Belski*, its proper owner, who, by the aid of his serfs, has effected a revolution. In the fourth act, we find *Olga*, or *Teodora*, in the hands of the protectors, who explain to her her position and her rights, but when she finds that she may only mount her throne by bloodshed, and particularly by the death of *Obolenski*, she refuses to lend herself to their plans. But they force her along with them, though ultimately she escapes, and thus again falls into the power of the *Czarina*, who places her in confinement. In an interview which follows, the latter informs her victim of the real character of *Obolenski's* pretended attachment, and proves it by presenting her with the letter written by himself, containing the clue of the transaction. Believing in the baseness of the *Czarina's* agent, *Teodora* indignantly refuses to be delivered by him from prison. He proceeds to use force; she shrieks; the guards are alarmed, and she is hurried away to execution. A timely rescue, however, intervenes; and the heiress of the throne is again in the custody of her true friends. The pontiff is at hand to crown her; *Helena* is reported to have fled and left the field clear for a successor; and *Obolenski* is, of course, forgiven. The future relations of the parties are left to be guessed. The merits of contrivance are due to the play, but the blank-verse diction is of the poor and needlessly inverted. Wanting in poetry, and indeed in the usual elegance of dramatic diction, it may take rank as an exceedingly clever melodrama, but has no claim to literary eminence. Mrs. Ternan, as the *Czarina*, acted the haughty, ambitious, and jealous potentate, with a true feeling for such a character, but continually failed in her efforts, because the language she had to speak, and which has very much the air of a bald translation, was unequal to the situation she had to interpret. The part of Miss Cooper, being one of position, was more easy, but lacked the effect which well-pointed, or poetic dialogue would have given to the interest. The repentant kidnapper, enacted by Mr. Phelps, was utterly without attraction. It is only as a whole—by the combination of pictorial scenes, foreign dresses, and ingenious situations, involving some picturesque groupings of serfs, nobles, and guards—that the play succeeds: in a word, as we have already intimated, as a five-act well-appointed melodrama, but in this class, let it merit be freely acknowledged: and that they are considerable, the reception of its first representation may be fairly accepted as sufficient proof. On the author being called for, Mr. Phelps announced that he had not the pleasure of knowing his name, and believed he was not present. The house was well attended.

LYCEUM.

The old farce of "The Jenkinses" was revived at this theatre on Monday. The humour is rather thin, but it will, probably, help on the management during the preparation for their Christmas piece, which is expected to be distinguished by remarkable attractiveness.

SOHO.

This theatre was opened on Monday under the management of Mrs. Brougham, not for the usual amateur performances, but for the exhibition of the legitimate drama. The play selected for the purpose was "Richelieu," the part of the *Cardinal* being performed by Mr. Walter Shelley, a young actor, whose name has frequently reached us from the provinces, and whose style of acting is indicative of much practice and care. He is still young, and the youth would occasionally look out at his eyes, notwithstanding the remarkable diligence with which he assumed the appearance of senility in the character thus chosen for his metropolitan *début*. Mr. Shelley made all the usual points with wonderful precision, seemed perfectly self-possessed, showed a thorough command of the stage, and was altogether effective. He will show to yet more advantage in less taxed parts. The small but important part of *Francois*, was performed by Miss Ellen Fleat, with a picturesque aptitude which won deserved applause. Miss Kate Saxon, as *Julia de Mortimar*, was correct and graceful, though wanting as yet in flexibility of tone and schon. The theatre was attended by a respectable audience, but Mr. Shelley's talents; but this will probably increase as the experiment becomes better known, and its merits more appreciable. The entertainments of the evening concluded with a ballet divertissement, under the direction of Madame Louise.

THE MONODY ON THE DUKE OF WELLINGTON AT THE PRINCESS'S THEATRE.

We are requested, by Mr. Westland Marston, to state, in justice to the Lord Chamberlain, that the interposition attributed to him, in connexion with the above monody, never took place. The monody was, it appears, confided by Mr. Marston to the management of the Princess's Theatre, with a general sanction to curtail it, should it be thought too long for recitation; the author being, of course, aware that the *complete* version of his offering could subsequently be made public through the

medium of the press. It was thought advisable by the management to not upon the license thus accorded, and hence occurred the omissions which have been made the subject of remark. That the *abridged* version appeared in one or two journals, arose simply from an error on the part of the copyist.

THE MARIONETTES AT ST. JAMES'S.—These mirth-moving puppets, which lately witched the world last season at their theatre, in Ade-aide-street, at present occupy with another entertainment, made their re-appearance in Lower James's-street, on Monday last, upon the aristocratic boards of St. James's and, if we may judge by their reception, an equally prosperous season as the last await them on their new stage. We observe that they are going to alt-mpt operatic pieces, as "Don Giovanni" is announced for early presentation; and from the really clever vocalists who form part of the company, no doubt these little actors will approach very nearly to their full-grown competitors.

POLISH BALL AT GUILDHALL.—On Wednesday next the committee for the management of this brilliant *fête* will add greatly to its attractions by availing themselves of the novel accessions and pictorial effects displayed at the Lord Mayor's banquet. In addition to the ball on Wednesday, a very attractive concert will be given in the Council Chamber of Guildhall, supported by Mrs. Enderscan, Madame Weiss, Miss Messent, Mr. Stansfeld, Miss Kate Hickson, M. s Lascelles, Miss Cicely Nott, Mdle. Coulon; Mr. Wrighton, Mr. T. Williams, Mr. Weiss, and Mr. Frank Bodda; under the direction of Mr. Lindsay Sloper. The prospects of the Committee augur for this benevolent and rising a most gratifying s.cess.

LES ORRAUX MERVEILLEUX.—Mdlle. Emile Vandermeersch gave her very interesting performance with her *troupe* of learned birds at the Whittington Club, on Thursday evening, with great *éclat*.

PROVINCIAL INTELLIGENCE.

DESTRUCTIVE INUNDATION NEAR MANCHESTER.

An inundation resulting in an immense destruction of property occurred on Sunday in the neighborhood of Bury, Lancashire, through the bursting of an extensive reservoir. We have, happily, not been able to hear of any loss of life occasioned by this disaster was a valley about three miles in length, in the north-east of Bury, in which is situated the village of Elton. At the head of the valley, in a narrow gorge, are the dye and bleach works of Mr. John Whitethe-valley, in a narrow gorge, are the dye and bleach works of Mr. John Whitehead, called the Lower Croft Bleachworks, consisting of a number of buildings reservoirs of water—the further one at the head of the valley, and the nearer one occupying somewhere about an acre of ground. Above these works two large the Undertaker," as it is called in the neighbourhood, is an accumulation from three narrow streams rising in Cockey-moor. An immense embankment, in a manner very similar to that adopted at the Holmfirth reservoir. Owing to the heavy fall of rain during the last week, there was an unusual body of water in the reservoir at the time of the accident, and it had become a source of serious and well-founded alarm to the inhabitants of the district. During the whole of the preceding night the rain fell in torrents, and numbers of people were on the embankment anxiously watching the progress of the accumulation. About seven o'clock on Sunday morning it became evident that the by-wash of the "lodge" was no longer sufficient to carry off the spare water, and almost immediately afterwards the waves commenced making a clear breach over the central portion of the embankment. The earth forming what is called the "backing," which supports the puddle-wall in the centre of the embankment, was first washed away. The alarm was spread down the valley, and a property hastily removed as was cleared away, but no steps could be taken to insure the safety of the manufactories. About nine o'clock the puddle-wall, becoming so far undermined, gave way in a body, and a breach, from which the backing had been entirely washed away, was made in the embankment measuring 36 feet in height by about 40 in breadth, was made in the embankment measuring 36 feet in height by about 40 in breadth, was made in the embankment. The pent up water rushed from its lodgment in an immense volume until it reached the second reservoir, where it required a momentary check. A great portion of this second reservoir, where it required a momentary check. A great portion of this second reservoir completely over this, however; while the pressure of the rest in a short time burst the right-hand side of the embankment of the second lodgment. In this way the flood made two clear breaches through the portion of bui dings forming Mr. Whitehead's bleach-works, and made a complete wreck of a large portion of the property. Ten finishing rooms were washed entirely away, and were also the dressing-house, part of the starting-rooms, and printing-house were also the dressing-house, part of the starting-rooms, and printing-house. The valuable goods, chiefly consisting of twilled cottons for bleaching and finishing for dyeing, were many of them almost entirely spoiled, and the dressings and dyewoods were carried away or destroyed. Portions of the property now and dyewoods were carried away or destroyed. Portions of the property now lie scattered about the valley below the works for nearly a mile. The total extent of the damage inflicted cannot yet be estimated; much property remains in the bed of the stream, and there were many thousand pieces, valued at injury done to the cloths, of which a large number will not fall much short of from £2 to £3 each. The proprietors fear that it will not fall much short of £30,000. Nearly 300 workpeople are also deprived of their employment by this catastrophe.

The flood swept down the valley for nearly a mile further, without inflicting much damage beyond destroying one or two small road bridges and doing much damage beyond destroying one or two small road bridges and doing Mr. Whitehead has a second mill lower down the valley, called the Elton Bleachworks; but here, except making a breach through the mill by the windows and destroying them, except making a breach through the mill by the windows and destroying them, the damage done was not considerable. A little below this is Mr. Woltenholme's cotton-spinning and weaving-establishment, belonging to Mr. C. Woltenholme's cotton-spinning and weaving-establishment, belonging to Mr. C. Woltenholme, employing forty power-looms, and employing forty operatives. In me, with about forty power-looms, and employing forty operatives. In this mill, as well as the adjoining houses at the flood caused another lodge of water, belonging to this mill, to burst the bridge leading to the works was carried away, as well as the retaining house at one end of the mill. The lower room of the mill was flooded, the windows were burst out, and the machinery (consisting of looms) was left imbedded in mud, and covered with branches of trees, which had been brought down by the flood. Altogether, the damage here committed could not be much less than £1000. The next establishment committed could not be much less than £1000. The next establishment in the valley, only a few hundred yards below the chemical works of Mr. Edward Schunck. The works are supplied by a double lodge of water; and the flood, destroying in its course these reservoirs, is described as having risen in the buildings in a body of water twenty to fifteen feet high. Across the valley the buildings in a body of water twenty to fifteen feet high. Across the valley was erected a new three-storey building, about fifty yards long, in which garancine was manufactured. About forty yards' length of the building was thrown down, the away in an instant. A portion of another large building was thrown down, the away in an instant. A portion of another large building was thrown down, and the extensive works presented a scene of destruction and ruin greater even than at Mr. Whitehead's. Of course, all the valuable chemical preparations were spoilt, and the damage is estimated at from £30 0 to £4000. The cotton-mill of Mr. Openshaw was flooded, and the damage done to £2000. The cotton-mill of Mr. Openshaw was flooded, and the damage done was reported at £15,000. Altogether, in private and public property, it is was reported at £15,000. Altogether, in private and public property, it is also stated that the damage done by the flood will not be much less than £30,000 to £35,000.

SINGULAR ACCIDENT.—On Monday, William Glover, a joiner, living in Newcastle, was found lying outside his own door. It appears he had been annoyed by repeated robberies, and some weeks ago placed a loaded gun in his room, the trigger of which was in some way connected with the door, which, when he was absent, was always locked. By some contrivance he was able to when he was absent, was always locked. By some contrivance he was able to discontinue the cord before entering; while any person, ignorant of the contrivance attempting to enter, would receive the discharge of the gun. It is supposed he forgot the precaution, and death was the result.

LAW AND POLICE INTELLIGENCE.

BREACH OF PROMISE.—In the Court of Exchequer, on Monday, a Mr Langley, a farmer in the neighbourhood of Walsall, was sued for breach of the promise of marriage. The plaintiff, who was about 25 years of age, is the promise of marriage. The plaintiff, who was about 25 years of age, is the daughter of a flannel and worsstead surgeon at Walsall, and grand-daughter of daughter of a flannel and worsstead surgeon at Walsall, and grand-daughter of a clergyman. This is the second occasion on which she had appeared as plaintiff in an action of this kind. In 1849 a sum of £100 was awarded to her as plaintiff in an action of this kind. In 1849 a sum of £100 was awarded to her Bartom, to whom she had been engaged, and recovered, by the verdict against him, a sum of £400. In September, 1851, the defendant first paid his addresses to the plaintiff, and after a short time he formally proposed for her hand, in the usual manner, and after a short time he formally proposed for her hand, in the usual manner, by the plaintiff's father, to whom he paid a visit, accepted presents of her by the plaintiff's father, to whom he paid a visit, accepted presents of her ha ir and other the defendant's proposal. It was determined that the marriage should take place in London, where the defendant was employed in entering on business at the Swan Hotel, Bishopsgate-street, preparatory to entering on business at the Swan Hotel, Shrewsbury. The plaintiff and defendant accordingly proceeded to London together; but as the negotiations respecting the business were not completed, the marriage was postponed. A second journey to London was afterwards made, but with the same result. Soon after the return from the second expedition the defendant began to show coldness towards his intended, and upon being remonstrated with by the plaintiff's father, he broke into a passion and used very abusive language to the plaintiff and her family. The jury returned a verdict for £125

CHEAP JEWELLERY.—At Guildhall, on Wednesday, two respectable young persons, named Newman, applied to the Lord Mayor for advice in the following case:—They visited the shop of Messrs. Samuel and James William Benson, jewellers, of Ludgate-hill, and purchased a couple of curi-chains, which were represented to them as being gold. They bought it in each for the chains, but, on having them subsequently tested, they found the chains were nothing but brass, or some equally base and valueless metal, and consequently not worth half-a-crown. They returned to the shop and complained, when they were told that if they liked to pay £5 more, they could have a very much better article in exchange. Alderman Copeland said, unfortunately, there was no remedy in the case of proceeding prematurely, by means of the electro-type process, in much of the sort of proceeding practised, by which if they would only the present day, but many persons might protect themselves if they would only be careful to ascertain if the usual mark of "18" or "32" and a "hospital head," identifying pure gold from counterfeit, was properly stamped on a articles so purchased. Two summonses against Messrs. Benson were then granted.

REAR-ADMIRAL SIR Fleetwood Pellew, C.B., K.C.H., has received his commission, appointing him Commander-in-chief in the East Indies. The gallant commission, appointing him Commander-in-chief in the East Indies. The gallant officer, it is said, will proceed overland to India, and hoist his flag on board the *Winchester*, 52.

An order has been issued to the authorities at our different dockyards, directing that foreigners are not to be allowed, to enter the workshops or view the vessels at present constructing.

NATIONAL SPORTS.

We do not find a single steeple-chase in the calendar for next week, nor the prospect of anything of the kind "coming off" before the commencement of February; nor is the coursing register by any means strong, only four meetings being fixed between this day of the date he-of" and our next publication—viz., Southminster and Mor kwell-munch on Tuesday, Deptford inn on Wednesday, and Hopton on Thursday: of these Deptford inn alone offers any attraction to the public counter.

TATTERSALL'S.

MONDAY.—The occasional outlay of a "tenner" enabled us to gather the following brief quotations:—

5 to 2 agst Carrig	WOLVERHAMPTON STEEPLE CHASE. 5 to 1 agst Vengeance	5 to 1 agst Peter Simple
WOLVERHAMPTON HURDLE STAKES.—5 to 2 agst Victress; 4 to 1 agst Oldham.		
6 to 1 agst Nancy	CHESTER CUP. 25 to 1 agst Alcestis	66 to 1 agst Weatherglass
66 to 1 — Dearcrow	66 to 1 — Merry Bird	
18 to 1 as at West Australian	DERBY. 18 to 1 agst Fleam	66 to 1 agst Plon-ma-coul
15 to 1 — the Baron	40 to 1 — North Pole	

ABD-EL-KADER.—The Marquis of Londonderry, a few days since, invited our host to visit Ireland before his departure for Brussels, whither the French Government has appointed a ship to convey him. Abd-el-Kader has replies to Lord Londonderry's invitation, expressing his thanks for his Lordship's kindness, adding an excuse for its non-acceptance.

OPPOSITION TO THE BUDGET.—The proposed extension of the [illegible] a vacancy existing considerable opposition. Public meetings were [illegible] on Wednesday, at Kingsland and Southwark; on Thursday, at Marylebone, Lambeth, and St. Pancras. At Islington and Exeter, meetings for similar purposes were held on Tuesday. Bath and Dover will follow the example. At Shields and Plymouth petitions on the same subject are being numerously signed.

THE GREAT EXHIBITION SURPLUS.—From a report just published, we learn the Commissioners have at their disposal £170,000. They also possess a collection of articles presented to them as the nucleus of a Trades Museum, and temporarily deposited at Kensington Palace, the value of which is estimated at £50,000.

NEW TELEGRAPH LINES ON THE CONTINENT.—The lines of electric telegraph, which have just been completed in the Netherlands, connect the following places:—Amsterdam, Breda, Rotterdam, Haarlem, Dordrecht, Arnhem, Alkmaar, Utrecht, Leyden, Amersfoort, Nimeguen, Arnheim, Zutphen, Deventer, Almelo, Groningen, Leeuwarden, Harlingen, Sneek, Meppel, Zwolle, Hengelo, Enschede, Oldenzaal, Coevorden, Assen, Winschoten, Delfzyl, Helder, Middelburg, Flushing, Ostend, Paris, Mayence, Mainz, Frankfort, Hanau, Hoechst, Wiesbaden, Mannheim, Carlsruhe, Basle, Berlin, Bonn, Cologne, Aix-la-Chapelle, Antwerp, Liege, Augsburg, Arnheim, Bodan

AMUSEMENTS, &c.

ROYAL PRINCESS' THEATRE, Oxford-street.—Under the management of Mr CHARLES KEAN.—LAST FOUR PERFORMANCES of Mr BARNETT previous to his final retirement from the Stage. On MONDAY, DEC 13th, and Thursday, 16th, he will perform Dogberry, on which Acts also about Reading; and Captain Copp, in Charles II. On Wednesday, 15th, Falstaff, in The Merry Wives of Windsor; and on Saturday, 18th Doe, Falstaff, in Henry IV (part 1), being his LAST BENEFIT, under the patronage of her Majesty and H R H Prince Albert, and final retirement from the Stage.

ROYAL PRINCESS' THEATRE, Oxford-street.—Under the management of Mr CHARLES KEAN.—The CORSICAN BROTHERS will be performed on TUESDAY, the 14th, and FRIDAY, the 17th after Anne Blake; to conclude with Mr Wright in the splendid Farce of WAIVER.

ASTLEY'S ROYAL AMPHITHEATRE.—Proprietor and Manager, Mr. W. BAYNE.—The genius Novelty of the present day is UNCLE TOM'S CABIN, to be witnessed Nightly at this house.—On MONDAY, DEC. 6, 1852, and During the Week, the Entertainment will commence with the superior Spectacle of UNCLE TOM'S CABIN; to be followed by Unparalleled Feats, by Equestrian and Gymnastic Artists of the Establishment. Mr. Rarey, with M. and Mdlle Lalande, and the wonderful Brothers Seigrist, from the Olympic Olympia, Paris. To conclude with the highly amusing Farce of the DEVIL TO PAY.—Stage Manager, Mr W West. Stalls, One open daily from Eleven to Four.—N B. In consequence of the crowded state of the theatre, Mr Batty begs to inform his patrons that one 2 cannot be kept after the commencement of the first act.

MR. GEORGE GENGE respectfully announces that his CONCERT and BALL will commence at the LONDON TAVERN, on THURSDAY, the 30th DECEMBER. The Concert, with Mr Farquharson as Conductor, commences every Half-past Eight, the Ball at Half-past Ten. Adams's Band will attend. Master of the Ceremonies, Mr Frampton.—Tickets to seat, to be obtained of Mr GENGE Peckham-grove, or at the Office of the London Tavern. Season Tickets will be provided at One o'Clock.

MR. ALBERT SMITH'S ASCENT of MONT BLANC, every evening at Eight o'Clock. Stalls, 2s; Area, 1s.; Gallery, 1s.—A MORNING PERFORMANCE every SATURDAY, at Three o'Clock.—EGYPTIAN HALL, Piccadilly.

THE GOLD FIELDS of AUSTRALIA.—This New MOVING PANORAMA, painted from Sketches made upon the Spot, by J B PROUT, member of the New South Wales Palissya in Water-Colours, is EXHIBITED DAILY, at 209 Regent-street (next the Polytechnic). Among the principal features are: Plymouth Sound—Madeira—Cape of Good Hope—South Sea Whale Fishing—Melbourne—Geelong—The Road to the Diggings—Mount Alexander—Sydney—The Blue Mountains—Summer-hill Creek —Ophir—Encampment of Gold Diggers by Moonlight. A Descriptive Lecture is given by Mr Prout.—Admission, 1s; Central Seats, 2s; Gallery, 6d. At Three and Seven o'Clock.

LIFE of WELLINGTON.—WALMER CASTLE and the DUKE'S CHAMBER is EXHIBITED immediately preceding the DIORAMA of the WELLINGTON CAMPAIGN, with the additional Pictures—The Lying in State, Funeral Procession, and Interior of St. Paul's. Afternoons, Three o'Clock. Evenings, Eight o'Clock. Admission, 1s; Stalls, 2s 6d; Reserved Seats, 3s.—ROYAL GALLERY of ILLUSTRATION, 14, Regent-street.

ELECTRO-BIOLOGY.—HANOVER-SQUARE-ROOMS.—Mr G W STONE has the honour to announce that his first series of EXPERIMENTS since his return from America will take place at the above Rooms, on the evenings of TUESDAY, DECEMBER 21st; Thursday, 23rd; Tuesday, 28rd, and Friday, the 24th.—Doors open at Half-past Seven; to commence at Eight o'Clock. Reserved seats, 5s; back Seats, 3s.

THE ZOOLOGICAL GARDENS, Regent's Park, are OPEN DAILY. The Red Hiving Anteaters, of CHOIROPOTAMUS were seen in Europe is now added to the Collection. All visitors are admitted to Mr. Gould's exhibition of Humming Birds without extra charge. Admission, 1s; Members, 6d.

CHARING-CROSS HOSPITAL, West Strand.

PRESIDENT.—The Most Noble the Marquis of Salisbury, K.G.

TREASURER.—The Dean of Manchester and A M Drummond, Esq.

The committee earnestly solicits the affluent for the Nightingale, which is entirely dependant upon voluntary subscriptions and bequests, and the deserved benefactions, and to which there have annually been admitted from 18,000 to 20,000 sick and disabled poor. Upwards of 1,000 in-patients and 8000 cases of accident, many of which, but for such an asylum, might have perished.

Relief to none are thankfully received by the Committee and Secretary at the Hospital; and by Messrs Drummond, 49 Charing-cross; Messrs Coutts, 59, Strand, Messrs Hoare, 37 Fleet-street, and through all the principle bankers JOHN RUSHTON, Hon. Sec.

MR. WILLIAM BROOKES, PATENT AGENT, Radnor Chambers 78, Chancery-lane, London.—Provl. Ionsul Protection and Patents procured for the United Kingdom also, Pa ents for America, France, and generally for all parts of the Continent. Designs Registered.—N.B Mr Brookes having, for upwards of 16 years, been successfully engaged in making applications for Patent property, can render material assistance to all persons interested therein.

Minutes of evidence taken before the Select Committee on the West Coast of Africa; Lord Stanley, Chairman —

Query, 1868. Is it the fact that the Slave-trade has decreased in proportion as the trade in palm oil has increased ?—Mr Clegg. Yes, it is. Observation and experience on the coast, as best calculated to promote civilisation in Africa, and put down the Slave-trade ?—Captain Bailey: See "Blue Book," August 5, 1848, pages 89 and 163; and for account of the manufacture see "Exhibition Jury Report," vol ed. page 852)

BELMONT, Vauxhall, Surrey.

NEW BOOKS, &c.

ON SATURDAY, JAN 1, 1853,

Will be commenced the publication

THE UNIVERSAL LIBRARY OF THE BEST WORKS of the BEST AUTHORS of ALL NATIONS.

In all Departments of Literature;

Beautifully and uniformly Printed in Royal 8vo, with two or more first-class Illustrations to each Number, and a handsome Cover.

In adding to the number of cheap popular Libraries now in course of publication, it is necessary briefly to describe the characteristic features of the present undertaking. These may be stated as

1. The Standard Excellence of the Works selected
2. The Variety and Number of Subjects and Authors
3. The Excellence of the Type, the Printing, and the Paper
4. The Beauty of the Illustrations
5. The Cheapness
6. The Convenience of the Mode of Publication

1.—THE STANDARD EXCELLENCE OF THE WORKS SELECTED.—No work will be included in this Library which has not already acquired completely gained universal approbation as to have become an indispensable part of the world's literature; such works as ought to be found in every public library, and which the present undertaking will place within the reach of the humbles of every house where the English language is spoken.

2. THE VARIETY AND NUMBER OF SUBJECTS AND AUTHORS.—The Library will embrace works in

I.—HISTORY and BIOGRAHPY | IV.—FICTION
II.—VOYAGES and TRAVELS | V.—CRITICISM and CRITICISM
III.—POETRY | VI.—MISCELLANEOUS WORKS

The authors from whose works selections will be made, will include the best writers of all countries, as the following selection from the list will show:—

ENGLISH.	Shakespeare	SPANISH AND PORTUGUESE.
Addison	Sterne	Cervantes
Alison	Thompson, &c.	Camoens
Anson		Cervantes
Bacchie	FRENCH.	Lope de Vega
Bell	Abbadie	Quevedo, &c.
Burns	Bossuet	
Chalmers	Le Sage	SWEDISH.
Cooke	Molière	Bremer.
Collins	Montaigne	Carlen, &c.
Crabbe	Rabelais	
Dryden	Racine	GERMAN.
Goldsmith	St Pierre	Fouque
Gray	Voltaire	Goe he
Isaak Walton	Voltaire, &c	Schiller
Johnson		Wieland, &c
Kirke White	AMERICAN.	
Leake	Allen	
Milton	Brooks	
Park	Channing	
Pope	Beecher	
Robertson	Emerson	
Scott	Irving	
Southey, &c	Longfellow, &c	

With a varied selection of works from the Greek and Roman Classics and from Oriental writers. The works chosen from the writers enumerated will be printed from the best text, and the translations from foreign authors will be made with accuracy and spirit. Original Notes will be added wherever they are deemed necessary.

3. THE EXCELLENCE OF THE TYPE, THE PRINTING AND THE PAPER. The work will be printed in a clear readable type in double columns on superior paper, mak ng pages for the Library

4. THE BEAUTY OF THE ILLUSTRATIONS.—Each Number will contain two or more high y-finished Engravings, some in the stipple of Portraits of the Authors, or representations of scenes from the subject of the works The portraits of these engravings have been entrusted to the eminent artists among whom may be mentioned Dodgson, Duncan, Gilbert, Harvey, &c.

5. THE CHEAPNESS.—As a general rule, each number will contain, in addition to the engravings, about 112 pages of letter-press, and the price will be One Shilling. As, however, it is intended that each volume shall be complete in itself, the price will occasionally vary according to the size of the work, but the charge will be at the above rate of 1½ large octavo pages for one shilling.

6.—THE CONVENIENCE OF THE MODE OF PUBLICATION.—No Number of this Library will be issued which does not contain one or more perfect works, so that the purchaser of an entire work will be under no obligation to subscribe to or continue the series. When it is found convenient to include more than one work in one number the works thus embraced, will be similar in character. The numbers will be issued on the 1st and 15th of each month, and the order specified in paragraph 2 will follow each other in succession. As soon as a sufficient number of works on one subject are issued, they will be collected and pub lished in volumes; but, for the convenience of those who prefer to purchase the numbers, covers for the volumes will be sold at such a price that the cost in both cases will be the same.

On JANUARY 1st, 1853,

Six numbers will be issued, embracing works in all the above specified departments of literature; namely:—

1.—HYDE'S "LADY of the LAKE" and "LAY of the LAST MINSTREL."

2.—GOLDSMITH'S "VICAR of WAKEFIELD" and SAINTINE'S "PICCIOLA."

3.—AMSON'S "VOYAGE ROUND the WORLD."

4.—ISAAK WALTON'S "LIVES OF DONNE, WOTTON, HERBERT, HOOKER, and SANDERSON."

5.—ALISON'S "ESSAYS ON TASTE."

6.—STERNE'S "TRISTRAM SHANDY."

The Spensering at the outset of this important series of volumes, a specimen of each of the departments of Literature which they will embrace.

NEW MUSIC, &c.

MESSRS. ROBERT COCKS'S LATEST MUSICAL PUBLICATIONS

THE SUNSHINE of OUR HOME.—At the concert lately given at Croydon, the accomplished vocalist Miss Dolby sang this favourite song, which was re-demanded by general acclamation. Words by J. E. CARPENTER, music by EDWARD LAND. 2s.

THE FLOWER-GATHERERS; Vocal Duet. By the authors of "When are the Hills White Vith Snow" 3s.

THE HIGHLAND EMIGRANT; Ballad. By EDWARD LAND. 2s.

IF THOU MUST SING TO-NIGHT; Ballad. By EDWARD LAND. 2s.

THE GIPSY QUADRILLES. By STEVEN GLOVER. Piano Solo, 3s.; Duet, 4s. These highly-lanciful and spirited Quadrilles will certainly rival the long-celebrated and still favourite "Lancers." The Gipsy Quadrilles are played everywhere, are at once brilliant and easy of execution, and are the subject of frequent encores.

London: ROBERT COCKS and Co., New Harington-street.

D'ALBERT'S ALBUM for 1853, just Published, sequ ate'y Illustrated in Colours by Brandard, and containing a great variety of entirely new Music of every description for the Ball-room. Splendidly bound in watered silk, price 10s. This book will be found even more attractive than any of its predecessors CHAPPELL 50, New Bond-street.

D'ALBERT'S KING PIPPIN POLKA, beautifully Illustrated, price 3s.—"One of the most sparkling Polkas ever written."—Musical Review. Also, the Third Edition of D'Albert's celebrated LA NINETAS POLKA, as sung by Madame Sontag. Price 3s.—CHAPPELL, 50, New Bond-street.

D'ALBERT'S FLOWER of the FIELD and LA BELLE RUSSE WALTZES each 1s.—Solos or Duets. "La Belle Russe" is one of the finest waltzes Strauss ever composed, and "The Flower of the Field" is even more beautiful than the long-celebrated and still favourite "Last Rose of Summer." Each of the above Waltzes is followed by a Quadrille on the same subject, by D'Albert's ALBUM for 1853, CHAPPELL, 50, New Bond-street

D'ALBERT'S IRISH QUADRILLES, Price 3s.—IRELAND; a new set of Quadrilles on Irish Airs. "The most stirring and spirited Quadrille M. D'Albert has ever written. A fit companion for, perhaps, a formidable rival to, the celebrated Scotch Quadrilles by the same author, D'Albert's ALBUM for 1853, CHAPPELL, 50, New Bond-street

JULLIEN'S CADEAU for 1853, price 5s., contains the Original GALOP, QUADRILLE, and two POLKAS, performed this season at M. Jullien's Concerts; beautifully illustrated in Colours by Brandard. BEFORE YOU BUY YOUR TOP COATS you should see the unrivalled stock of SAMUEL BROTHERS, 39, Ludgate-hill. The only production of genuine workmanship, combined with economic charges, have gained for this establishment such enormous patronage that they are enabled to sell at better prices to the public than any other house in the trade. Every article is marked in plain figures. This system has gained for the proprietors their present high position. The system in the bespoke department is to charge separately for the cloth from the making and finishing. The ready made department contains the largest stock of Gent emen's Coats, Vests, and Trousers of the newest styles, and equal to bespoke, which are marked to meet wi h no any other house. Samuel, Bros. have, in addition to several new designs in Overcoats. Coats. Trousers, and vests of persons, plate of fashions, guide to self-measurement, are sent free.—SAMUEL BROTHERS, 39, Ludgate-hill

PATENT REVERSIBLE OVER-COATS, &c., which obtained the Great Exhibition Prize Medal.—W HERDOG, 96, New Bond-street, and 69, Cornhill (only).—Novelty utility, economy, and taste recommending the invention to general adoption; the Patent Cloth, having two perfect and totally dissimilar sides, can be worn either side outwards. Thus each garment, at a cost of ONE dollar supplements TWO. For Over-Coats of any kind, the New Angleseu and all other Capes, Shooting and Morning Coats, this invention is particularly appropriate; also for LADIES' CLOAKS, MANTLES, &c. A variety of the materials and garments kept for immediate wear. Observe the largest stocks in London of superior Over-coats of every description; Capes, Shooting-jackets, Tweed Over-coats, &c., all guaranteed to resist any amount of rain.

TO LADIES.—A Sample STAY, carriage free, to any part of the country, on receipt of a post-office order. Waist measure only required.

Coutil Corsets, 2s 6d per pair
Elastic Bodice (recommended by the Faculty) 10s 6d
Ditto ditto, for Children 5s 6d

Every other variety of Stay, at equally low prices. Patterns and Instructions for self-measurement sent free to any part of the kingdom within two miles of London, free of expense.—CARTER and HOUSTON, 5, Blackfriars-road (near the Bridge), and 3, Stockwell-street, Greenwich.—Established 1812.

NEW DESIGN-BOOK of FURNITURE.—W H COOPER, Manufacturer of Fashionable Cabinet and Upholstery FURNITURE, 42, Great James-street, Bedford-row, London, begs to draw the attention to Furnish who require articles combining taste with economy, to obtain the new and elegant BOOK of DESIGNS, containing four suites of Furniture. Sent post free on application. Purchasers are also solicited to view his superior Stock, which comprises every article corresponding with the Designs, all marked in plain figures, at unusually low price. New Patterns Drawingroom Chairs, in Walnut, with stuffed seats, from 40s each.

THE DUKE OF WELLINGTON
AS ADMINISTRATOR OF THE ARMY.

On the character and conduct of the Duke of Wellington as Commander-in-Chief, and as the principal administrator of military affairs in this country, much has been written and spoken that might lead to the belief that this part of the duties of the Duke were ill discharged, either towards the country and its interests or towards the service and the individuals composing it. Such animadversions will always be made in a free country, where there is no restraint on discussion; but they are calculated to produce the more effect on the public mind in England, because here it is the practice of the military authorities, in a great measure, to shroud their proceedings from public observation, and thus to appear negligent or apathetic when they are perhaps most actively engaged in measures of amelioration. The dislike of the English people for change—or, at least their disposition to defer it to the latest possible moment—is notorious. Our history is full of examples, and our private life is made up of the operation of this fixed habit of mind. The same opposition to innovation is to be found in the army, at least among its chiefs, and this—when combined to a disinclination to admit external opinions, or influences—may fully account for the prejudices which prevail on the subject, even in the service itself. The Duke of Wellington was as averse as any of his old colleagues to mere changes, especially such as were not intimately connected with the welfare or the efficiency of the army; but on the other hand, as an administrator of this branch of the public service, he was always alive to the importance of adopting it more completely to the military wants of the age, and to the competition it was likely to encounter. We have on record his own assurance that he had repeatedly urged on the Government the subject of the comparative inefficiency of some portions of our military establishment; yet all his efforts were met with the plea that public opinion would not sanction the necessary expense, the general belief being that the occasion for augmentation would never arise. The same difficulty attended his strenuous efforts to procure the more complete establishment of the national defences. The celebrated letter, which gave rise to so much discussion a few years since, was one fruit of his anxiety on this subject; and, to the last day of his life, he was engaged in carrying out his plans—the altered attitude of affairs abroad having at last aroused the national doubts, and obtained the sanction of Parliament to the formation of a militia force. It must have been a source of satisfaction to the Duke in his latter days to reflect that at length his perseverance had even partially succeeded, and that his countrymen were alive to the necessity for, at all events, the least expensive precautions against a successful invasion.

The Duke of Wellington's administration of the internal affairs of the army, as Commander-in-Chief, has also given rise to much severe criticism. He was charged with being a cold, hard martinet, who acted on an exaggerated sense of duty, and brought all affairs within a narrow rule. If we reflect that the Duke was the target for all the discontented spirits—for all those who, having served their country in the field, or in the drawing-room and on parade, conceived that their services were not duly acknowledged—that the impertinent and unfounded claims on his consideration and administrative bounty usually far exceeded those that were based on real unrequited merits, we may naturally suppose that an adverse public opinion might, be generated against him, when he had to treat all these persons on their merits, and oppose to persevering egotism the cold front of duty and repulsion. In order to arrive at a correct estimate of the Duke of Wellington's conduct in this capacity, it would be necessary to disregard the complaints of the discontented, to sift their several cases to the bottom, and then to ascertain

FUNERAL OF THE LATE DUKE OF WELLINGTON.—THE PROCESSION IN PALL-MALL.

whether their ill-success had been owing to their own demerits, or want of perception in the Commander-in-Chief. Now this would be a hopeless task; and, failing its performance, the next best thing is to take the opinions of officers who are well qualified to judge—who had the means of knowing the duties, sentiments, and principles of action, and could best judge whether he was actuated by caprice, negligence, prejudice, and, above all, by a disregard of the claims and services of his old companions in arms. Military men are proverbially apt to consider themselves neglected; it is natural that they should. Each man knows what he has gone through, the wounds he has received, how he has been passed over in promotion, and how this or that man was put over his head who to his eyes did not deserve it. But such men, although entitled to our utmost respect, cannot be permitted to monopolise public opinion on a topic so important as the character of the Duke of Wellington as Commander-in-Chief. It is in the nature of things that they should take a confined and microscopic view of things; that they should magnify their own merits, and dwarf those of others; above all, that they should regard the subject from a limited point of view, and so lose sight of many minor considerations which might have influenced the decision of their official superior. We have reason to believe that the opinion of those officers whose opinion is really worth having—who possessed the means of judging for themselves the character of the Duke and the exigencies of the service—is really in his favour; and that, if their verdict could be taken, they would one and all declare that, with some exceptions, the conduct of that illustrious man at the head of the Horse Guards was ever regulated by a high and noble spirit of justice and impartiality.

It has been said of him that he neglected his old Peninsular soldiers. It would be well to know the grounds of this charge beyond that mere grumbling which is the notoriously privilege of the veteran. Each old soldier may think that it was the prowess of himself and such as he that gained the battles, of which the Duke monopolised all the honours, not obtaining for them even the poor consolation of a medal. With regard to the case of non-promotion, or non-recognition of claims, those must rest on their individual merits; and with respect to the question of the medals, the Duke's satisfactory and triumphant answer may be found in the Eighth Volume (we believe) of the Despatches. We rather think that the Duke of Wellington was accustomed to deal with each individual case on its merits; and without reference to whether the applicant had served under him or not. And for as many cases of alleged neglect, there might be brought forward as many where he had far exceeded the most sanguine expectations of the persons whose cases were brought before him. We have heard of some few instances which would seem to counterbalance these vague complaints; and we do not doubt that our military readers will be able to supply many more. The Duke was guided by the merits of the case. An old Indian officer who had been passed over, wrote, stating his case to the Commander-in-Chief. He had no interest, had never served under the Duke, and had nothing whatever to appeal to but the justice of his cause. The Duke took the greatest pains in investigating the case, and the result was that the officer in question, who was away on distant duty, was insisted in all that he had a right to claim. The daughter of the same officer on his death, applied to the Duke for a pension. Upon the same principle that had actuated him in the first instance, although he could not himself do what was desired, he backed up the application in the proper quarter to the extent that his duty permitted. Yet both these persons were wholly unknown to him, and his sole guide was the record of the services of a meritorious officer, whom he conceived to have been unjustly treated. In another case, a young gentleman, the son of an old officer, was suddenly cast on the world by the death of his father, and far away from all his friends and connexions, if, indeed, he had any who could have aided him. Amid-t the most trying difficulties he made his way home, where he at length arrived in no very promising plight for one bound to seek his fortune. The thought struck him to apply to the Duke of Wellington. He did so. The Duke inquired into his case, investigated his personal antecedents, and the result was that the young gentleman was gazetted to a Lieutenancy, which he now holds. We do not give these as extraordinary cases, or as anecdotes that possess even the ordinary interest of such anecdotes; but cases coming within the writer's own knowledge that many popular opinions as to the Duke's indifference to the claims of the meritorious were unfounded; and that, on the other hand, he disregarded the suggestions of favoritism, and sought to reward merit.

Of the Duke's close application to business, of the pertinacious perseverance with which he read every document, and probed every case, there are records enough. That he should do these things in his military capacity only to be expected from his known conduct in the other departments filled by him in the public service. One day's duty at the Horse Guards was a repetition of another. Almost as regularly as three o'clock struck he was at his post, seated in his plain unpretending room, and busy with the various matters crowding on his attention. Towards the close of his life fatigue would creep on him; but knowing how little he liked ever to seem to give way, these occasional lapses—even to the extent of a "nap"—were not taken cognizance of. All went on as if the illustrious old man were really as actively engaged as he wished to be. Of his indomitable resistance to the approaches of infirmity there is an anecdote—one of a hundred such—that is worth preserving. On the last occasion the Duke went his round of inspection as Constable of the Tower, his feebleness was very apparent to those around him; but he would not abate one jot of his allotted duty. Coming to the steep steps near the Traitors' Gate, his military friends who accompanied him, were alarmed lest he should fall. One of them offered to aid him, but was *brusquely* repulsed, the Duke persisting in descending the steps with tottering steps and slow, and at the imminent risk, at each moment, of being precipitated to the bottom. While, at the Horse Guards, he was always difficult of access, except to those who had an absolute claim on his attention, or who had been appointed to come. On one occasion, a nobleman, distinguished for his military descent, wished to see him on public business, but could not obtain admittance. He persisted in asking to have his name sent to the Duke, and was allowed to remain outside the door, when it was taken in. What he heard was quite enough to induce him to retire, hopeless of obtaining an audience. Had he received an appointment to attend, the case would doubtless have been different. Even in this incident may be traced the methodical habits of the Duke, whose time had no doubt been apportioned, minus the unexpected visit of the nobleman in question.

THE DUKE OF WELLINGTON
AS AN AGRICULTURIST AND LANDLORD.

Almost all great men—indeed, almost all public men engaged in state affairs—have been more or less devoted to agriculture as a pursuit. Men of the most opposite characters and habits of mind appear to be subject to the fascination of an occupation which they often follow with great personal toil, at great expense, and too frequently with very unremunerative results, except in the pleasure of planning and labouring.

Among our own living public men, the names of three occur to the mind as having developed this preference. Sir James Graham, when spared from his parliamentary labours, works hard and long at his favourite farm. Lord Brougham, at Brougham Hall, has spent no little capital and time in the same pursuits; and at Cannes, has followed them under very different conditions, and in a more genial climate; and Mr. Roebuck, although not of the stuff whereof farmers are made, devotes—or, till recently, devoted—much of his leisure to the hard work of practical farming, somewhere down near Bath. The late Earl Spencer, better known as Lord Althorp, varied his literary, political, and financial pursuits with scientific farming, on no insignificant scale; and we remember to have encountered, among many others, John Temple Leader, once the popular member for Westminster, with so many of the rough traces of his mother earth upon him, as to make it very difficult to discover the legislator under what appeared to be a not very robust farm-labourer.

The Duke of Wellington, too, was an agriculturist, not so much from choice as from necessity or duty. The munificence of the nation having provided him with the domain of Stratfieldsay, he could do no less than cultivate it. To say the truth, it required no little attention. Those who selected it for the national purchase, can scarcely be said to have well exercised their judgment; for it was, in regard to agricultural value, little better than a waste. The Duke's own remark about it was that any man less wealthy than himself would have been ruined by it. As it was, besides an amount originally laid out, the Duke spent every year a rental upon it, and still there was much remaining to be done.

Stratfieldsay is situated in the north of Hampshire, and on the edge of the county of Berks. It is near the railway from Basingstoke to Reading, and is distant about fifty miles from London, and between eight and ten from Reading. The soil of the estate is clayey, very strong, and difficult of drainage, being very wet. The first thing the Duke had to think of was the drainage, which he commenced at once, and continued to the last. Without it nothing whatever could have been done with so uncongenial a soil. In addition to this, his Grace resorted very extensively to chalking, a very expensive process, in consequence of the cost of conveyance. Since the railway has been completed, this part of the Duke's agricultural expenditure has been lessened, the chalk being conveyed from the railway landing.

The land is chiefly used for producing corn and beans. The mode of cultivation is thus described by Mr. Caird:—"The system of cultivation pursued is to plough up the clover lea after the second crop is consumed in autumn, that the furrow may be exposed to the pulverising effects of the frosts and thaws of winter; after which it receives a clean summer fallow, being repeatedly ploughed and harrowed until it is brought into fine condition, when it is sown with wheat in October. After the wheat is reaped, the land lies untouched during the winter; and, as soon as it is dry enough in spring, a heavy dose of manure is spread upon it, which is immediately ploughed in, and the ground planted with beans. The beans are dibbled in by women, who are employed by task-work, and who set the seed in rows, marked by a garden-line. During the summer, the land is carefully hoed between the rows; and, after the bean crop has been removed, it is ploughed and sown with wheat. After that follows barley, a portion of which is laid down with clover, the rest being reserved to be sown in the following spring with peas, of which an excellent variety, called the Victoria Marrowfat, is in great favour, selling at 40s. the quarter. The average produce of wheat is from 26 to 30 bushels per acre. From the nature of the land, it is found very injurious to work it when wet, and a great number of horses are, therefore, kept to push forward the work in favourable weather, a farm of 300 acres having as many as sixteen work-horses upon it. The only other stock consists of a few milch cows, some colts, and a number of pigs, which go loose in the yards. Stall-feeding is little practised, and, when tried, has been found very unprofitable; but this is not surprising, as fattening-oxen are fed on cake and other substances, costing 10s. 6d. a week for each animal." In fact, the Duke did his farming as he did all other things, well; but with a regard to the end to be attained by the outlay. By dint of perseverance and judicious expenditure, he had contrived very much to enhance the value of the property before he died. It is recorded, that he determined to "do the best he could without it"—his unvarying maxim, as a practical man, even in British political affairs. He is said to have declared that he did not consider himself entitled to lay by one shilling of the rental at Stratfieldsay. "I am a rich man," said he, "my son will not be; therefore he shall receive his patrimony in the very best condition to which I can bring it. If he cannot keep it so, the fault will not be mine." This is so characteristic of the Duke's mind and character, that we conceive it must be true. A deserved compliment was paid to the Duke, as an agriculturist, by Professor Buckland, at the meeting of the British Association, in 1845. The Prussian Minister, he said, had called the attention of the assembled agriculturists of England to the example of good farming set them by the most illustrious of living warriors, the Duke of Wellington, who had turned his glorious swords into no less glorious ploughshares. Near Stratfieldsay may now be seen rich fields of barley and turnips on naturally peat or clay lands, which, two or three years ago, were reeking with moisture, and incapable of that rotation of green and grain crops which all good farming requires. The Duke of Wellington was, year after year, improving his clay lands, first, by thorough draining, which is the indispensable precursor of all other improvements; and, after drainage, spreading large quantities of chalk over the surface of the clay. Not less than one thousand waggon-loads of this he had, during the last year, been brought from the neighbourhood of Basingstoke to that of Stratfieldsay."

In point of fact, the Duke very early participated in that agricultural movement which has created more than any other cause to enable England to make her great commercial sacrifices.

As to the Duke of Wellington's character as a landlord we have heard conflicting statements. A man of his iron stamp, with his rigid ideas of order, and habitual command, is one of his own profession to his sense of duty, would necessarily find himself from time to time compelled to exercise his authority, or to resist encroachments. He might, also, from his more conspicuous position, be more exposed to those animadversions always ready of petitioning to which all country gentlemen are more or less open, who do not choose to adopt the popular side. There would not be wanting local politicians to improve any such dispositions. It is more than probable that the Duke was a just without being always a kind landlord, and that many of his good acts fell on thankless soil, because the manner of doing them was not cordial. In no other way can we reconcile the statements we have heard; one class of persons declaring that the Duke was an excellent landlord and much respected, while others will tell you that the whole neighbourhood was disaffected and discontented. It is certain that he did much good, according to his ideas; but there is also reason to think that his time and attention were so occupied by his multifarious duties, that many of the minor kindnesses were left unperformed. Kind words often do more than the best intentions or even the most serviceable acts. As it was, the Duke did his duty. After his near relative, the Rev. Gerald Wellesley, came to reside on the estate as the pastor of the place, the condition of the people is said to have improved, and there was a stronger tone in the landlord; but this may be attributed not so much to any previous neglect on the part of the Duke, as to the effects of personal communication and superintendence. All that good landlordism could do was done. Cottages were built, and plots of land were given, with every facility for cultivation. One writer, quoted in "Wellingtoniana," says, that "go where you would, whether far or near, you would no where see a body of tenantry better lodged, better provided with offices, better supplied with all manner of conveniences for the preservation of their cailing, than those which call the Duke of Wellington their landlord. As a matter of course, the Duke's tenants were extremely well pleased with their lot; indeed, a more popular man than he, among all classes were his neighbours, it would be hard to find.

The Duke, besides paying the expense of drainage, used to contribute the greater portion of the expense of "chalking" his tenants' lands. The farm buildings are far superior to any of those on the estates around. In this respect, the Duke was far superior to the neighbouring landowners. Wood and thatch gave place, on his estate, to brick and slate; and from time to time the farm-houses were rebuilt, or substantially repaired. The cottages of his labourers are also unusually well built and provided, all being done with an especial view to health and comfort. There were no middlemen on the estate, every tenant holding direct from the Duke himself. Each cottage has a quarter-of-an-acre allotment of garden ground, and for both the rental is 1s. per week, or £2 12s. per year. This is a lower rent than is paid by the Belgian cottiers, they pay frequently a hundred francs per year for worse accommodation. Rent on the Stratfieldsay estate is about £1 an acre; to which has been added 7s. an acre for tithes; and for rates, 3s. 6d. an acre. That the tenants, on the whole, are prosperous cannot but be proof. Upon the whole, therefore, the balance of testimony is in favour of the Duke as a landlord; and much must be allowed for the natural grumbling of people who are never contented, as also for that instinctive antagonism, founded on political feeling, which almost always opposes a well-known public character of opinions opposed to those of the multitude in his country-home. It is a gratifying reflection, that the Duke of Wellington, in this phase of his character is as worthy of our respect as in most aspects of his civil life and career.

THE DUKE'S ESTATE IN BELGIUM.

The Duke of Wellington was also a holder of property in foreign countries. It is, of course, generally known that after the Battle of Waterloo, in addition to the many honours conferred upon the conqueror, the then King of the Netherlands, William, conferred upon the Duke-Prince an estate. Of this he retained possession during the remainder of his life.

The King evinced much delicacy in his choice of the locality of this gift. It closely borders the scene of the great victory. The domain consists of about 1200 hectares, detached from the celebrated forest of Soignies. The hectare measures about two acres and a third; so that the extent of this property in English measurement would be about 2800 acres—rather more than less.

The domain is situated about half way between Genubloux and Waterloo, and is in the midst of a country where agricultural improvement is carried on to a very great extent. The writer had an opportunity, not long since, of himself seeing the great activity of the landed proprietors, and their anxiety to place their properties in a position to compete with the English agriculturists, who are to them objects of greater fear than even the foreigner used to be to the English producer.

The Duke of Wellington was not a man to be behind hand in any measures of improvement. The same spirit that led him to improve Stratfieldsay also led him to do his utmost with his Belgian estate. When it first came to his hands, it was covered with more or less valuable trees; but was otherwise unfit for agricultural purposes. Its estimated value at that time was about 1,500,000 francs, or nearly £60,000 in English money.

The Duke placed the management of the estate in the hands of M. Halley, Notaire Royal at Waterloo; a gentleman who has, with the utmost ability and integrity, administered its affairs. His first efforts were directed to clearing the land of the wood, which was from time to time sold, and the proceeds applied to the improvement of the property. The next step was thoroughly to drain the land, which having been done, it was discovered that the soil was of the best quality, peculiarly adapted to the culture of grain of all kinds, and also of clover, flax, and hemp. By degrees the greater part has been brought under cultivation, with very great success; so much so, that the estate is now valued at double the amount made in the first instance, or about £120,000 English money. Nor is this all: the gradual improvements of the soil gives reason to hope that the value will be still greater hereafter. Although the Duke of Wellington had not here, as at Stratfieldsay, the merit of having personally superintended these improvements, it was in consequence of his liberality and confidence that M. Halley was enabled to bring its estate to its present high condition; and the name of the Duke at Wellington ranks with the most distinguished of the enterprising landed proprietors of Belgium.

The Duke held, we believe, the estate voted for him in Spain; that offered in Portugal he declined; but received about £7000 per annum for his pay as Marshal in the Portuguese army.

DR. CUMMING'S LECTURE ON THE CAREER
AND CHARACTER OF THE DUKE OF WELLINGTON.

An address upon the life and character of Wellington, as an exemplar, was delivered by the Rev. Dr. Cumming, in connexion with the Young Mens' Christian Instruction Association, in Exeter Hall, on Tuesday evening. The hall was, probably, never more crowded, and the audience included the present Duke and Duchess of Wellington, many of the members of the family and of the nobility, and other persons of distinction. The Rev. Doctor opened his subject by setting forth those salient features in the character of the hero, which were suggestive of guidance, encouragement, and progress to young men. Amid the splendour of so illustrious a hero, we are apt to lose sight of the more quiet and suggestive features of so earnest and great a man. Anybody can applaud those brilliant victories which he achieved, but it is not all who can or care to comprehend the almost hidden springs of his success, or the latest secrets of his might. The genius of Wellington we can neither command for ourselves nor bequeath as a legacy to others; but the pure and severely disinterested character and conduct of the man under every order he wore, and shining forth through every dignity he received, we may imitate. His high sense of duty, his untiring loyalty, his temperance of living, his moderation of speech, and his devotedness to duty, we shall all do well to aspire to. (Cheers.) His unparalleled success, his worldwide popularity, never tempted him to seek a higher position than that of first subject of the Queen. With more than imperial *prestige*, he never dreamed of more than a subject's place. About the Duke there was nothing vulgar or common-place. He never sought fame; not a fact or trait detected in his career is indicative of anxiety for *éclat*.

The Doctor then proceeded to grapple with the possible objection that a soldier is not the best study for young men. It should not be forgotten that nine-tenths of the elements that are required to make a good soldier, are no less necessary to form a good citizen. If we wish to get rid of them, we must improve ourselves so as to do without them. The soldier does not create war, any more than the lightning-conductor generates lightning, or the quick pulse makes fever; rather, he averts it. Horrible as war is of himself, the fierce flame that would devastate his country, and wrap in one wide blaze its prosperity and peace and happiness. War is a stern necessity, but when it comes it is less awful under some generals than other acts. Napoleon, regardless of blood, sought his own aggrandisement as conducive to his glory; Wellington fought for duty, safety, and peace. The widows and orphans of Waterloo lament their losses, but meekly speak of them, and patiently bear them; the widows of Austerlitz, Marengo, and Jena cursed the mad ambition that clutched at its prizes at so terrible a sacrifice. The splendour of Napoleon's successes invested him with a sort of romantic, supernatural glory. Wellington, although really greater, appeared less splendid, because he valued life and loved to save it. He sought victory at the least possible expense of suffering. The dazzle of the mystic splendour of Napoleon; but saw in Wellington a quiet greatness that, like a distant star, grew brighter the nearer it was approached. His name and deeds, and renown, are familiar to us as household words. He never sought applause, but until he mastered the essential facts, and he rarely, or never, meddled with other people's business; but in whatever was his duty he fulfilled the precept, "Whatever thy hand findeth to do, do it with all thy might." Unity of object and simplicity of aim were strong characteristics and leading features of Wellington. His familiar reply, "F. M. the Duke of W. never meddles with things that do not belong to his department, and over which he has no controul," is familiar to us all. He put no more irons into the fire than he could manage. Whatever Wellington had in hand, he did thoroughly. Further, the Duke never gave up what he accounted a good cause on account of any discouragement or opposition, however formidable. The Duke could scarcely get 30,000 soldiers for the Peninsula, in order to meet the Marshals of Napoleon with 300,000 lines his force. The very rations the poor fellows ate, and the ragged coats they wore, were grudged by a misguided Government at home, and all sorts of complaints reached him from head-quarters. But Wellington stood erect and firm where so many had faltered. He was—

> Justum et tenacem propositi virum.
> Non vultus instantis tyranni
> Non civium ardor prava jubentium
> Nec vultus instantis tyranni
> Mente quatit solida.

His inward force enabled him to bide his time, and he felt he must succeed. (Cheers.) Another striking trait was his abnegation of self, his disregard of a selfish or even personal ends in his public career. Arthur Wellesley set out just to do his duty, and never once dreamed of Arthur Duke of Wellington. He never complained of adverse circumstances; he never complained of fortune, as he never depended on fate; he was never known to attempt a great, a good, or a brilliant end by consciously wicked or unrighteous means; he rejected with magnanimous scorn the offer to assassinate his most formidable antagonist; he would not be a party to the proposal of a foreign General to put to death Napoleon, who left a legacy to the man who attempted to shoot the Duke. Patience in the path of duty was another characteristic.

> We have not wings—we cannot soar;
> But we have feet to scale and climb
> By slow degrees—by more and more—
> The cloudy summits of our time.
>
> The mighty pyramids of stone
> That wedge-like cleave the desert airs,
> When nearer seen, and better known,
> Are but gigantic flights of stairs.
>
> The distant mountains that up-rear
> Their frowning foreheads to the skies,
> Are crossed by pathways, that appear
> As we to higher levels rise.
>
> The heights by great men reached and kept,
> Were not attained by sudden flight;
> But they, while their companions slept,
> Were toiling upward in the night.

Courage is the mission of a few—patience is the duty of all. The Rev. Doctor then proceeded to comment upon the Duke's attention to his religious duties. The Duke, no matter what the weather was, when in town, regularly attended, even amidst a heavy fall of snow, the morning service in the Chapel Royal, St. James's.

After Waterloo, he says in his despatch:—

> My heart is broken by the terrible loss I have sustained of my old friends and companions, and my poor soldiers. I have escaped unhurt: the finger of Providence was on me.

* * * * * * *

The only mode of avoiding party spirit in the army is for the commanding officer to be of no side excepting that of the public; to employ indiscriminately those who best serve the public, be they what they may, or in whatever service.

Again:

I would sacrifice Gwalior, or every portion of India, ten times over, in order to preserve our credit for scrupulous good faith, and the advantages and honour we gained by the late war and peace (1803), and we must not fritter this away. What brought us through many difficulties in the war, and the negotiations for peace? The British good faith, and nothing else.

Again:

I am one of those who have probably passed a longer period of my life engaged in war than most men, and principally in civil war; and I must say this, that if I could avoid, by any sacrifice whatever, even one month of civil war in the country to which I was attached, I would sacrifice my life in order to do it. I say there is nothing that destroys property, eats up prosperity by the roots, and demoralises the character to the degree that civil war does. In such a crisis, the hand of man is raised against his brother and against his father; servant betrays master, and the whole scene ends in confusion and devastation.

Several other extracts all equally characteristic, were read by the Rev Doctor. He then proceeded to observe:—"A review of the character of Wellington without a few thoughts on Waterloo, awful as it was, would be singular indeed. It has been the means of national safety and peace. Indeed, to use the last words of the great Duke in the senate of his country—

It was a battle of giants, an operation by which the peace of Europe, my Lords, has been preserved now these seven-and-thirty years.

Two great captains met in their strength—one warring for glory, the other for his country. Their armies different as much as their aims. Each knew his soldiers thoroughly. Napoleon's army was intensely French—Wellington's, British to the heart. Napoleon caculated on the electric enthusiasm of his men sweeping before them all opposition, as does a mountain's torrent, rushing to the sea; and Wellington calculated, and most justly, that the exhaustion of this would be Bonaparte's ruin, and a protracted battle the surest way to seal it. Wellington appreciated exactly the elements of his opponent's strength. He measured no less exactly the temper, the mettle, and the resources of his own battalions, deficient in French passion, but strong of nerve, overflowing with subdued but inexhaustible energy patient, persistent, full of dauntless and glorious obstinacy.

We see the French cuirassiers, and last, but not least, the Imperial Guards, advance to the conflict like the shining waves of the sea when roused from their lair by the fierce tempest, threatening to cleave irresistibly their course to victory. Opposed to them were the battalions of Britain, rooted to the earth on which they stood, receiving the charging squadrons as the rocks of the ocean, unmoulded in their purpose, accept the sea waves, and fling them back shattered whence they came. Some of our soldiers chafed at being so held, and fancied at times that there was fear and hesitation in the breast of their great commander. There was none; but there was a cool and well-weighed estimate of the issue, and of the only way to reach it. He allowed a sad but unavoidable loss of life, and not only allowed but encouraged the French to expend their enthusiasm and exhaust their strength; and when the overbold Emperor was complaining that the British kept coolly my own beloved countrymen, the Highland regiments—(Loud cheers)—did not know when they were beaten, the Duke gave his last and longed-for order, "Up, Guards, and at them!" and the cheer that rolled along the lines of our army, like a peal of thunder, told to the Napoleon for the first time to the master tactics of his foe, and the terrible certainty of his own defeat. It was no common mind that endured that ordeal. It was no common soldier that penetrated the secret of Napoleon's victories. It was no common struggle—that centenary conquest—that saved us from utter ruin as a nation. Wellington defended our national life when the sword of an invader was not yet to the heart. It is ours to maintain it. It was saved that it might be sacred to us. Our national responsibility is deepened by our loss. Napoleon for the first time in the history of Europe, left a successful rival behind. Other times the profound sagacity, the unrivalled forethought, the experienced and ripe wisdom of him whose spirit remained to the last unimpaired in any of its powers; and nations that envy or hate us will draw fresh courage from our loss. The noble heart that so loved his country is still and cold beneath the pavement of St. Paul's; the mighty spirit that saw further than most men has gone to his appointed place; the venerable form, for whom the crowd in every thoroughfare made way with reverential awe—on whom the eyes of seven tyrants of a nation's trust, is loved and lov ng daughter, that now wears meekly his resplendent name—is seen no more. The image is indelible on every memory, but the original is gone. The Parliament that once rang with congratulations gave, a few days ago, expression to the depths of its sorrow and the greatness of its loss. The cypress has taken the place of the laurel, and the funeral anthem rises where songs of rejoicing swelled before.

The reverend gentleman proceeded to the spiritual improvement of the funeral obsequies of the hero, concluding by calling upon young men not to be diverted from the call of duty—their chief and most imperative duty being to attend now, in the accepted time, to the obligatory demands and requirements of the Gospel. At the close of the address Dr. Cumming was loudly applauded by the audience.

THE GREAT DUKE RECEIVING THE THANKS OF PARLIAMENT.

To obtain the public thanks and acknowledgments of both Houses of Parliament has always been considered one of the greatest honours which a British subject can receive. By the Army and Navy this signal mark of distinction has ever been most highly prized. The favour of the Crown has in past ages been sometimes unworthily bestowed and lightly esteemed; but there is no instance upon record where Parliament has set the stamp of its approval upon a base and ignoble action. No subject of the Crown of this country has ever left upon the rolls of Parliament the record of so many formal votes of thanks for the services he had rendered to the State; nor is there inscribed upon the gold coffin-plate of the illustrious dead any testimony more honourable, or any title to fame more lasting. Be it ours to supply the omission of Garter King-at-Arms, and to recapitulate the occasions on which the Duke of Wellington received the unbought and nobly-deserved homage of the British Parliament.

The Duke's services in the East first procured him a distinction which afterwards awaited him at almost every step in his brilliant military career. The thanks of the King and Parliament for his conduct in command of the army in the Deccan, were communicated in general orders by the Governor-General, and read everywhere to the army in India.

In 1807 Lieutenant-General Sir Arthur Wellesley being appointed to command in the army under Lord Cathcart in the expedition of Copenhagen, and having been selected to negotiate the capitulation of that place, received the thanks of Parliament for his conduct on the occasion.

On the 1st of January, 1808, Sir Arthur being in his place as member of the House of Commons, the Speaker rose and thus addressed him:—

I should indeed be wanting to the full expression of those sentiments which animate this House and the whole country if I forebore to notice that we are on this day, once more, with our thanks, one gallant officer, long since known to the gratitude of this House, who has long trodden the paths of glory, whose genius and valour have already extended our fame and empire; whose sword has been the terror of our distant enemies, and will not now be drawn in vain to defend the seat of empire itself and the throne of his King. I am, Sir Arthur Wellesley, charged to deliver the thanks of this House to you; and I do accordingly thank you, in the name of the Commons of the United Kingdom, for your zeal, intrepidity, and exertion, displayed in the various operations which were necessary for conducting the siege and effecting the surrender of the navy and arsenal of Copenhagen.

The House cheered, and the plaudits were renewed when Sir Arthur rose in his place, in full military uniform, and addressed the House in the following modest and manly words:—

Mr. Speaker,—I consider myself fortunate that I was employed by his Majesty on a service which this House has considered of such importance as to have marked with its approbation the conduct of those officers and troops who have performed it. The honour which this House has conferred upon my honourable friends and myself, is justly considered by the officers of the navy and army as the highest which this country can confer; it is the object of the ambition of all who are employed in his Majesty's service; and to obtain it, has, doubtless, been the motive of many of those acts of valour and good conduct which have tended so eminently to the glory, and have advanced the prosperity and advantage of this country. I can assure the house that I am most sensible of the great honour which they have done me: and I beg leave to take this opportunity of returning you, Sir, my thanks for the handsome terms respecting myself in which your kindness to me has induced you to convey the resolution of the House.

Sir Arthur's friends expected that the victorious soldier would have said something of the future, and would have solemnly dedicated his sword to the service of his King and country. But, although Sir Arthur's modesty and good taste led him to confine himself to the past, men of penetration did not think the less believe that a great military career lay before the young soldier, who could veil so much sagacity and energy under an exterior so simple and unpretending.

The glories of the Peninsular campaign began with Vimiero. On the 23rd January, 1809, the Earl of Liverpool moved "the thanks of the House of Lords to Lieut.-General Sir A. Wellesley, K.B., for the skill, valour, and ability displayed by him on the 17th and 21st August, and particularly on the latter day, in the battle of Vimiero." On the 26th, Mr. Perceval proposed a similar vote in the Commons, which was eventually agreed to, but not without discussion. Sir Harry Burrard was actually in command of the army, and, after the battle, stopped the pursuit. This order saved the French army from rout and capture. The Minister resisted the attempt to insert Sir H. Burrard's name in the vote of thanks; and the debate called up General Stewart, who said he had arrived at head-quarters soon after the battle of Vimiero, and who bore witness to "the sentiment of enthusiasm in favour of Sir A. Wellesley which prevailed, from the general to the drummer." This testimony, at the very commencement of the Peninsular war, is an important contribution to the annals of the Great Duke's military career. The prevailing impression is, that the Duke owed his high command to his aristocratic connexions, and that it was not until after he had gained a series of victories that his soldiers began to have confidence in his military genius, and to believe him invincible. General Stewart not only gave the House the result of his own observations, but repeated a statement made by one of Sir Arthur's most promising officers, General Anstruther, who died from fatigue in the operations which followed the battle. General Anstruther said:—"It was impossible for him to conceive anything more admirable than the conduct of Sir Arthur Wellesley in the combinations, and the operations, to the result of the battle of Vimiero; that there was no difficulty which he did not contrive to obviate; that his mind was full of resources; that he managed his army like a machine, of the nature of which he was complete master; and that no officer whom he ever saw conducted the operations of an army with more distinguished ability. There was nothing that army would not attempt under that commander, and few things that they would not achieve." Mr. Whitbread's amendment, to include the name of Sir H. Burrard, was then withdrawn, and the resolution of thanks to Sir Arthur Wellesley put and carried. On the 27th January, 1809, Sir Arthur—having returned to England in the interval—again received the thanks of the House of Commons in his place, and again replied to the Speaker.

The battle of Talavera was rewarded by a peerage. On the 26th January, 1810, the Earl of Liverpool, in the House of Peers, moved—

"That this House do return their thanks to General Lord Viscount Wellington for the skill and ability displayed by him on the 27th and 28th of July, 1809, at Talavera." The Lords were by no means unanimous; for the Opposition in both Houses mistrusted, not only the policy of the campaign, but also the skill of the General, until he had effected a series of splendid successes which made even envy dumb, and factions mute. The Marquis of Wellesley made a noble defence of his absent brother, in reply to his detractors. He showed that the British troops succeeded in repulsing the attack of a French army almost double their number; and that the victory of Talavera had saved the entire Spain from absolute destruction. The motion was carried, as was also the vote of thanks moved in the Lower House by the Chancellor of the Exchequer, on the 1st of February; although there were not wanting members who stood up and averred that the battles of Vimiero and Talavera were fought merely for a peerage. Still the vote was carried without a division.

After the retreat of the French, Parliament, on the 26th of April, 1811, voted its thanks to Lord Wellington for the liberation of Portugal.

Cinded Rodrigo gained him an earldom. The awful struggle at the storming of this place, followed by the capture of Marmont's batteringtrain, and an immense quantity of military stores, gained the great soldier another vote of thanks on the 10th of February, 1812.

Badajos next fell before the impetuous valour of the British troops, after terrible slaughter on both sides. As soon as the news arrived, Parliament (on the 27th April, 1812) hastened again to tender its grateful thanks.

The battle of Salamanca opened Madrid to the army of the victorious Wellington, and gave him another step in the British Peerage. As soon as Parliament met—namely, on the 3rd December, 1812—both Houses were called upon to give him a vote of thanks for Salamanca. But the failure of the siege of Burgos, and the retreat to the frontier of Portugal, had occurred in the meantime, and the Opposition were not slow in availing themselves of these reverses, to repeat their real or pretended doubts about Wellington's capacity for command, and to convert the success into occasions for charging the Ministry with inefficiency and want of energy. The accusations against the Government were, upon this occasion, endorsed by the Marquis of Wellesley, who, in a defence of his brother animated by the strongest fraternal attachment, could not acquit Wellington without impeaching the Liverpool Ministry, and convicting it of mal-administration. The noble Marquis said that his brother's plans had been continually cramped by a deficiency of strength; that scanty and tardy supplies were sent him; that the cooperation which he had a right to expect from the Government at home was feeble and ill-directed; and that the system adopted by Ministers was "timid without prudence, and narrow without economy; profuse without the benefit of expenditure, and slow without the benefit of caution." Every one believed that these complaints against the Ministry would not have been sent home by Wellington to the Marquis of Wellesley if he had not himself first exhausted the language of remonstrance in his representations to the Government at home; and the publication of Colonel Garwood's Despatches confirms the accuracy of the popular belief. Parliament again voted its thanks, and superadded a grant of £100,000, to be laid out in the purchase of lands of that value, as a reward for services, and to enable him to support the dignity of the peerage. The debate was followed by another result, which the Peninsular hero regarded just then with more delight, perhaps, than the thanks of Parliament or the grant of money. The Ministry were stirred up to greater activity. Large reinforcements of men, horses, and ordnance to Portugal; and Wellington now found himself at the head of 200,000 men—British, Spanish, and Portuguese. His army was not only large, but well appointed; and, full of confidence in themselves and their General, his troops were led against the foe.

At Vittoria the French made their last stand upon Spanish soil. This great battle, in which a French Marshal's staff and 150 pieces of cannon fell into the hands of the conquerors, obtained the blow of a Field-Marshal for the Marquis of Wellington. The thanks of Parliament, for the victory of Vittoria, followed on the 8th July, 1813.

On the 8th October, 1813, Parliament was called upon to vote its thanks for the capture of San Sebastian and the operations subsequent to the battle of Vittoria.

The year 1814 crowned the successful warrior with the highest honours that can be conferred upon a subject. On the 24th March, the Prince Regent and Parliament awarded him their thanks for Orthez. After the battle of Toulouse, he was advanced to the Dukedom of Wellington. Parliament voted him £400,000 in addition to former grants. In June, the Duke arrived in England, and immediately proceeded to pay his respects to the Prince Regent, who was then at Portsmouth with the Allied Monarchs. He was received by his countrymen with every demonstration of admiration and gratitude, and Parliament prepared to award him those thanks which, since the affair of Vimiero, he had until now been prevented from receiving in person. From April, 1809, when he was appointed to command the army in Portugal, until the month of June, 1814, the Duke had been absent from England. He had now returned, with his patents of nobility in his pocket, and both Houses of Parliament became the scene of a grand historical picture.

On the 27th of June, 1814, Earl Bathurst, in the House of Lords, said it was now upwards of five years since the Duke of Wellington had accepted the command of the army in the Peninsula. At that time almost the whole of Spain was in the possession of the French. From April, 1809, when he was appointed to command the army in Portugal, until the month of June, 1814, the Duke had been absent from England. He had now returned, with his patents of nobility in his pocket, and both Houses of Parliament became the scene of a grand historical picture.

On the 27th of June, 1814, Earl Bathurst, in the House of Lords, said it was now upwards of five years since the Duke of Wellington had accepted the command of the army in the Peninsula. At that time almost the whole of Spain was in the possession of the French. From April, 1809, before he closed his renowned and glorious campaign, not a Frenchman was left in the country. The noble Earl also reminded their Lordships that the Duke had never once left his command, although he had the same inducements to return home as other individuals, to which were superadded the desire he must have felt to acknowledge in person the several votes of Parliament. Now that he had returned victorious to his country, the noble Earl hoped their Lordships would show that they were sensible of his great and splendid services, and he moved "That the thanks of their Lordships' House be given to his Grace the Duke of Wellington for his eminent and unremitting services to his King and country; and that the Lord Chancellor do deliver the same to the Duke of Wellington in his place." The motion was unanimously agreed to.

But that place in their Lordships' House the Duke had not yet taken. The following day (Tuesday, June 28) was a memorable epoch in the history of the august assembly of which the Duke of Wellington was henceforward the most distinguished ornament. The space before the bar was crowded at an early hour. An unusual number of Peers were present. Two ladies sat below the throne whose feelings every mother and wife in Great Britain might have envied. One was the venerable mother of the Duke, and the other his wife. Several other ladies were present; and the House of Commons furnished a considerable proportion of its members. Lord Chancellor Eldon having taken his seat upon the woolsack at about ten minutes to three, the Duke of Wellington in his ducal robes entered the House, preceded by the Duke of Norfolk, as Earl Marshal of England; Sir Isaac Heard in his gorgeous gold lace coat, as Garter King-of-Arms; and Sir Thomas Tyrrwitt, Gentleman Usher of the Black Rod. The Duke was supported by the Dukes of Somerset and Richmond; and, having delivered the several writs to the Lord Chancellor, he went to the table. The Clerk of the House now took up the writ creating Sir A. Wellesley a Peer by the title of Baron Douro, of Wellesley, and Viscount Wellington, of Talavera. Then followed in order the patents of nobility for the Earldom of Wellington, the Marquisate, and ending with the Dukedom. His Grace then took the oaths of allegiance and abjuration, and sat down with the attendant Dukes on the ducal bench.

The Lord Chancellor was unequal to the greatness of the occasion. He was probably overpowered by its novelty, and by the grandeur of the deeds which it devolved upon him to eulogise. He of course drew their Lordships' attention to a circumstance singular in the history of their House; viz., that, on the noble Duke's introduction, he had gone through every dignity of the peerage in this country which it was in the power of the Crown to bestow. He added:—

I decline all attempts to state your Grace's eminent merits in your military character—to represent those brilliant actions, those illustrious achievements which have attached immortality to the name of Wellington, and which have given to this country a degree of glory unexampled in the annals of this kingdom. In this setting, I believe I best consult the feelings which evince your Grace's character—the character of a truly-great and illustrious man.

The Duke rose, and made a plain and brief expression of his thanks. He begged their Lordships to believe that he was "entirely overcome by the honours which have been conferred upon me;" and concluded by saying: "I can only assure your Lordships that you will always find me ready to serve his Majesty to the utmost of my ability in any capacity in which my services can be at all useful to this great country." How nobly and how faithfully the Duke redeemed this solemn pledge, our readers do not require to be reminded.

After a few minutes, during which his Grace received the congratulations of most of the Peers present, he retired to unrobe, and then reentered the House dressed in the uniform of a Field-Marshal, and decorated with his various orders.

It was now the turn of the House of Commons; but we must here go back a few months to mention that on the 10th May the Prince Regent had sent down a message to the Lower House that he had conferred the rank and title of a Duke and Marquis of the United Kingdom upon the Duke of Wellington, and recommending a grant to support the dignity. On the 12th, the Chancellor of the Exchequer (Vansittart), moved that the sum of £10,000 be paid annually out of the Consolidated Funds for the use of the Duke of Wellington, to be at any time named for the sum of £300,000 in the purchase of an estate. Several members of the Opposition who, at the beginning of the Peninsular war had spoken slightingly of the Duke's military character, now bore the handsomest testimony to his high merits, and objected to the grant as too small. The motion was made in committee, the Ministry being nothing loth, for an additional £100,000, making in all the sum of half a million voted by Parliament to the Duke.

In addition to the pecuniary remuneration thus liberally voted by Parliament, and their House of Commons resolved to pay him the highest tribute of respect in their power, by a vote of thanks accompanied with a deputation of its members to congratulate him on his return to this country. Lord Castlereagh reported from this committee that it was the Duke's desire to express in person his acknowledgments; and the following day, July 1, 1814, was appointed for the solemnity. (*See Illustration.*)

The Speaker, upon this great occasion, appeared in his gold robe of office. The House presented a brilliant appearance from the circumstance that the members had that day attended the Speaker to Carlton House with an address to the Prince Regent upon the signing of the definitive treaty of peace. The naval and military members were dressed in the uniforms of their rank, and a number of gentlemen appeared in Court dresses. The House was crowded with members at a quarter before five, when Lord Castlereagh rose amid breathless silence, and acquainted the House that the Duke of Wellington having desired that he might have the honour to wait upon the House, was now in attendance.

The Speaker, who was careful to conduct the proceedings of the House with due form and order, said:—"Is it the pleasure of the House to call in his Grace?" Loud cheering from all parts of the House gave the reply, and the Speaker said, "Call him in."

The serjeant-at-Arms, with the gold mace, proceeded to execute the orders of the House; and a chair having been placed for his Grace on the left hand of the bar, towards the middle of the House, the Duke of Wellington came in, making several obeisances to the Speaker. The Duke wore his Field-Marshal's uniform, with the Garter, the Fleece, and other foreign Orders. The whole House rose as one man upon his entrance within the bar, and remained standing.

The Speaker having informed his Grace that there was a chair in which he might repose himself, the Duke sat down, and, putting on his hat, remained covered for some time, the Serjeant-at-Arms standing on his right hand, with the mace grounded. When the Duke sat down, the members also resumed their seats. His Grace then rose, and, uncovered, spoke to the following effect:—

Mr Speaker—I was anxious to be permitted to attend this House, in order to return my thanks in person for the honour they have done me in deputing a committee of members of this House to congratulate me on my return to this country: and this after the House had animated my exertions by their applause upon every occasion which appeared to merit their approbation, and after they had filled up the measure of their favours by conferring upon me, at the recommendation of the Prince Regent, the noblest gift that any subject had ever enjoyed.

I hope it will not be deemed presumptuous in me to take this opportunity of expressing my admiration of the great efforts made by this House and the country at a moment of unexampled pressure and difficulty, in order to support the great cause of operation by which the contest was brought to so fortunate a termination.

By the wise policy of Parliament the Government were enabled to give the necessary support to the operations which were carried on under my direction; and I was encouraged by the confidence reposed in me by his Majesty's Ministers and by the Commander-in-Chief, by the gracious favour of his Royal Highness the Prince Regent, and by the reliance which I had on the support of my gallant friends (turning to Generals Clinton, Sir W. Stuart, and General Fane, who, in the full costume of their rank, sat near him), and on the bravery of the officers and troops under my command, in such a manner as to keep free for me those marks of the approbation of this House, for which I have now the honour to make my humble acknowledgments.

Sir, it is impossible for me to express the gratitude which I feel; I can only assure the House that I shall always be ready to serve his Majesty in any capacity in which my services can be deemed useful, with the same zeal for my country which has already acquired for me the approbation of this House.

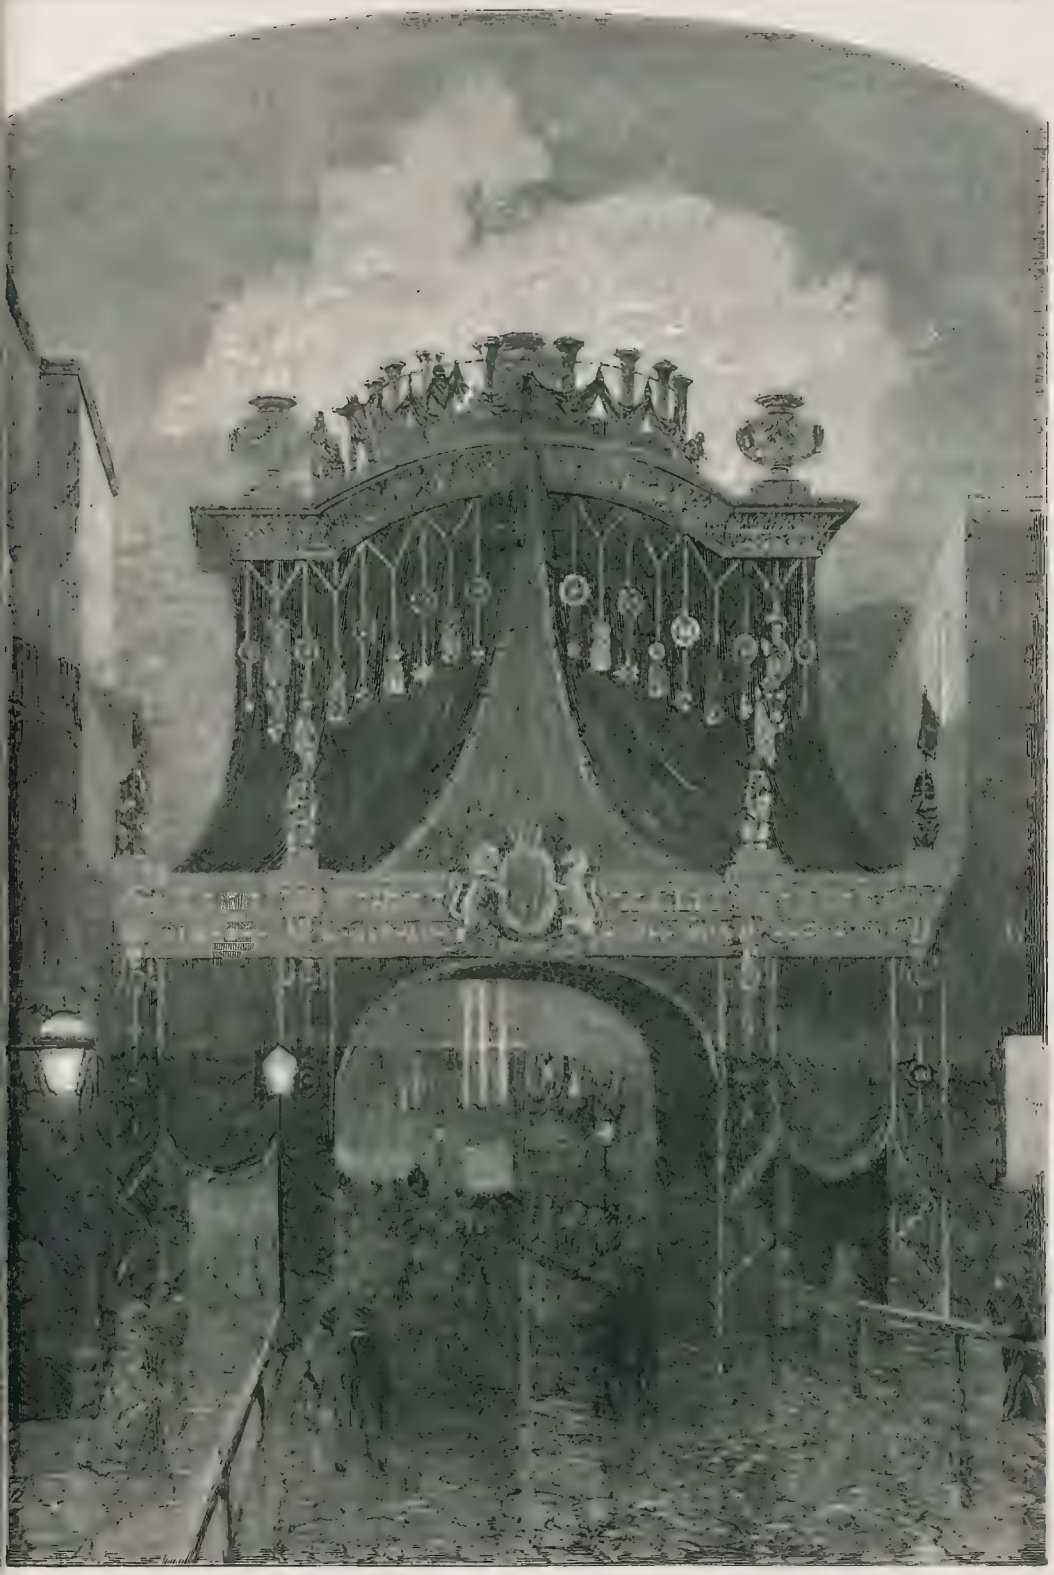
Immense cheering followed this speech, at the conclusion of which the Speaker, who, during the foregoing speech sat covered, now stood up uncovered, and addressed his Grace in these most memorable words:

My Lord,—Since last I had the honour of addressing you from this place, a series of events, years has elapsed; but none without some mark and note of your name and glory.

The military triumphs which your valour has achieved upon the banks of the Douro, and the Tagus, at the foot and the Pyrenees, have called forth the spontaneous plaudits of admiring nations. Those triumphs, it is needless on this day to recount. Their names have been written by your conquering sword in the annals of Europe, and we stand hand them down with exultation to our children's children.

It is not, however, the grandeur of military success which has alone fixed our admiration or commanded our applause. It has been that generous and lofty spirit which inspired your troops with unbounded confidence, and taught them to know that the day of battle was the day of victory; that moral courage and firmness are no less requisite in perilous times, when all on and doubt fast beset and ring to rude, which in perilous times, when all on and doubt fast beset and ring to rude, which in perilous times, when all on and doubt fast beset and ring to rude, which

THE LATE DUKE OF WELLINGTON AT THE BAR OF THE HOUSE OF COMMONS, ADDRESSED BY THE SPEAKER.—(SEE PRECEDING PAGE.)



TEMPLE BAR, ON THE NIGHT BEFORE THE FUNERAL OF THE DUKE OF WELLINGTON.

illustrious warriors who have recently visited our country, we could prevent to them a leader of our own, to whom all, by common acclamation, conceded the pre-eminence. And when the will of Heaven, and the common destinies of our nature shall have swept away the present generation, you will have left your great name an unperishable monument, exciting others to like deeds of glory, and serving at once to adorn, defend, and perpetuate the existence of this country amongst the ruling nations of the earth.

It now remains only that we congratulate your Grace upon the high and important mission on which you are about to proceed, and we doubt not that the same splendid talents—so conspicuous in war—will maintain, with equal authority, firmness, and temper, our national honour and interests in peace.

During the Speaker's address the cheers were loud and frequent. His Grace then withdrew; making his obeisances in like manner as upon entering the House: and the whole House rising again whilst his Grace was conducted by the sergeant from his chair to the door of the House. The cheers were described as the loudest testimonies of approbation that had ever been heard in the House of Commons, and the cheers in the lobby, &c., were heard for some time after the Duke had left the House. As soon as the excitement had subsided, Lord Castlereagh rose and said:—

Sir, in commemoration of so proud and so grateful a day—a day on which we have had the happiness to witness within these walls the presence of a hero never excelled at any period of the world in the service of this or of any other country;—in commemoration of the eloquent manner in which that hero was addressed from the chair on an occasion which must ever be dear to Englishmen, and which will ever shed lustre on the annals of this House, I move, Sir, "that what has been now said by the Duke of Wellington, in returning thanks to the House, together with the Speaker's answer thereto, and the proceedings upon the above occasion, be printed in the votes of the day."

The Speaker having put the question, the same was agreed to *nem. con.*; and thus ended a scene which old and experienced members of Parliament declared had been the most dignified, and at the same time the most affecting proceeding they had ever witnessed in Parliament.

We may briefly notice the thanksgiving day in St. Paul's (July 7, 1814), when the Prince Regent, the Royal Dukes, and the two Houses of Parliament, went in all state to the metropolitan cathedral, to hear the "Te Deum" sung for the restoration of the blessings of peace. The Prince Regent in a state-carriage, drawn by eight cream-coloured horses, was accompanied by the Duke of Wellington, who was warmly greeted by the dense multitudes assembled to witness the most magnificent procession that had been hitherto seen in the streets of the metropolis. The Duke walked on the right hand of the Prince Regent from the carriage to the place of honour in the cathedral, bearing the Sword of State, and afterwards took a seat on the right hand of the Prince. People who had seen his Grace before he left to take the command in Portugal, thought they perceived the marks of six years' incessant labour and anxiety in his countenance. But, since the arrival of the Allied Sovereigns it had become the fashion to discontinue the use of hair powder; and, as the Duke of Wellington had followed the mode, somewhat of the change in his appearance may fairly be attributed to this circumstance.

The Emperor escaped from Elba, and the Duke was appointed Commander of the British Forces on the Continent of Europe. He was resisting at the Congress of Vienna when Napoleon landed in France. Hurrying from Vienna, he joined the army at Brussels on the 11th April, 1815.

In a few weeks London was thrown into a state of intense excitement and wild delight, at the news of the battle of Waterloo. Parliament was sitting; and, four days after the battle, a message from the Prince Regent recommended Parliament to enable his Royal Highness to grant additional provision to Field-Marshal the Duke of Wellington.

The Regent's message having been read in the Lords, the Earl of Liverpool uttered a tribute to the Duke's disinterestedness in pecuniary matters, which appears to us to possess great value and interest. He could speak of the Duke from a long personal knowledge of him, and could say, that he never knew a more disinterested man. Since his appointment to high command, there could not but have been many occasions when he must have been in difficult and even distressed circumstances; and yet he had never made any applications for money. He alluded to the time when the Duke, in the Peninsula, had only the staff allowance, without any increase for the maintenance of his table. This must have involved him in considerable difficulties, though, at that time *white frequently making applications on behalf of others, he never made any demand for himself.*

On Friday, June 23, 1815, Earl Bathurst in the Lords, and Viscount Castlereagh in the Commons, moved the following resolution:—

"That the thanks of this House be given to Field Marshal the Duke of Wellington, for the consummate abilities, unexampled exertions, and irresistible ardour, displayed by him on the 18th June, on which day a splendid and decisive victory was gained over the French army commanded by Bonaparte in person, whereby the glory of the British nation was exalted, and the territories of our ally the King of the Netherlands were protected from spoliation and invasion."

The motion was put and agreed to in both Houses, without dissent and amid loud cheering.

In the Commons, the Chancellor of the Exchequer proposed a grant of £200,000, for the purpose of building and furnishing a house, fit for the residence of the Duke of Wellington.

The resolution was unanimously agreed to.

The thanks of both Houses were afterwards voted to many officers of distinction in the Duke's army; and to Marshal Prince Blucher, the Prussian army, and to the allied troops under the Duke's command. A motion was afterwards made in the House of Commons by Lord Castlereagh for an address to the Prince Regent, that he would be pleased to give directions for erecting a national monument in honour of the victory at Waterloo, and in commemoration of those who gloriously fell in achieving it.

With Waterloo ended this great and striking series of thanks, felicitations, and addresses from the grateful Legislature of a free State. With what an incomparable union of modesty and dignity they were received and acknowledged, has been seen. The Duke of Wellington was, indeed, a "finished model of that respect for the public and for himself which makes the moral grandeur of power."

TEMPLE-BAR ON THE NIGHT BEFORE THE DUKE'S FUNERAL.

We have already described the funeral decorations which converted the ancient City gateway on both sides into a Roman funeral triumphal arch. But some additional details are necessary to enable the distant reader to imagine the scene presented by Temple-bar on the night before the Funeral, when the gigantic flambeaux and silvered urns, giving out huge volumes of gas-flame, threw a lurid light upon the surrounding objects.

The two stories of the Funeral Arch were indicated by two silver cornices. The lower story was marked out by a large horizontal cornice of very bold projection; and these beautiful cornices being, with the entire enrichments, gilt in silver, stood out in strong relief from the black velvet and black cloth draperies which covered the arch. The draperies were looped up to large rings attached to ten silvered flambeaux, the latter five feet high, and disposed in an oval form on the top of the arch. The black draperies of the curtains were still further relieved by pendent silver wreaths of laurel, emblematic monograms of the Duke, and also by badges of his numerous orders. The opening of the curtains displayed a rich background of gold tissue, before which was placed the Duke's coat of arms, executed in proper colours, and encompassed by flags and military trophies.

The pedia on each side of the arch were richly hung with black velvet, and relieved by central and boldly executed trophies gilt in silver. The whole of the lower draperies were formed of black velvet, fringed and relieved by massive silver escutcheons, monograms, &c., in black and white, and by silver ornaments. The projecting portions of the lower cornice over the four piers were sufficiently large to place a lion (the Duke's crest) seated upon his haunches, and bearing a shield.

These striking cornices, entablements, trophies, flambeaux, and vases, all gilt in silver, reflected back from their glittering surfaces the brilliant flames of gas which streamed out of the flambeaux and urns.

During the whole of the week the streets through which the funeral procession was to pass the crowds assembled in great numbers, anxious of seeing the preparations. On Wednesday, the popular desire to perambulate the route of the procession reached its climax. Never, probably, on any day, not itself a day of show and spectacle, did Fleet-street and the Strand exhibit so dense a tide of human life. The free circulation of the thousands who filled the streets was a good deal impeded by the barriers put up from Temple-bar to St. Paul's, to hinder the crowd upon the foot pavement from breaking in upon the procession. Another cause of obstruction was Temple-bar, which was literally besieged throughout the day by two meeting and contending streams of pedestrians. The decorations upon Temple-bar aroused popular interest and curiosity in a degree proportioned to their novelty and magnificence; and so compact was the crowd on both sides of the City barrier, that it was almost impossible during the day to fight one's way through the arched footpaths, and a work of no slight danger to get through the carriage way, so continuous was the influx and reflux of vehicles passing.

At night, when the men of business had retired and left the thoroughfare to the night-scene, the neighbourhood of Temple-bar presented the crowds and the same appearance as at a public illumination. The pencil of Mr. Dodgson, in the illustration on the preceding page, has succeeded in re-producing for our readers the picturesque scene presented by Temple-bar on Wednesday night; but the moment chosen by the artist was a late hour in the night. If the reader would imagine the scene about nine or ten o'clock, he must fill the roadway along Fleet-street and the Strand with vehicles so close together that a walking pace was alone possible. At Temple-bar, thousands of upturned faces were lit up by the glare from the flambeaux on the top of the Bar; and so crowded were the streets, that to get quickly through the Bar, it was necessary to run under the arched carriage way, at the risk of being crushed against the City barriers, or trodden down by the horses. During all this time, the streets were ankle-deep in mud and water from the incessant rains; and no one was sanguine enough to hope for so brilliant and cloudless a day as broke upon the state ceremonies of the Duke. The gas was kept burning all night, and also next morning during the advance of the funeral procession—the urns representing upon this occasion the incense-burners of classic antiquity.

Temple-bar was occupied by Lady Jersey and a party of her friends during the passing of the funeral *cortège*, not by any favour of the City authorities, but because Lady Jersey being the grand-daughter of old Mr. Child, the banker, and the apartment over Temple-bar having been long rented from the City by that firm as a place of security for books and papers, her Ladyship had the right to occupy the Bar, and to avail herself of so excellent a position for seeing the funeral *cortège* enter the City.

The construction of the barriers in the City on Tuesday night deserves mention for the rapidity of the picturesque effects which it produced. The night was thick and rainy; and the pavers who took up the flags at intervals along the kerbstone, and the workmen employed in ramming down the massive beams and nailing the horizontal railing, were assisted by lads holding torches, which blazed away at every three or four yards along Fleet-street. The figures of the stalwart workmen who were plying the mallet and hammer, thus seen by torchlight through the misty night, and the faces of the bystanders and lookers-on, produced some striking effects, which would have furnished the old Dutch masters with not a few subjects for their canvas.

The demeanour of the crowds on Wednesday night was in the highest degree orderly and well disposed. The predominance of persons in mourning in the streets gave a gravity to their appearance highly becoming to the occasion, and one which promised well for the good order prevailing on the great day of the funeral.

The great thoroughfares and suburban roads of the metropolis presented an unparalleled scene during the night. Soon after midnight vehicles began to pour in from all points of the compass; and for two or three hours before daybreak there was hardly a high-road leading to the metropolis which did not present the spectacle of a continuous stream of carriages. Now and then a band of pedestrians, who had been walking all night from some suburban town or village, asked the policeman on duty how far it was to Westminster-bridge or Blackfriars; and then, through mud and rain, pursued their toilsome journey with unabated vigour and cheerfulness. Thousands in the metropolis never went to bed at all. How richly all this curiosity and perseverance were rewarded our readers do not now require to be told.

WELLINGTON TRIBUTES.

Being an Answer to certain Correspondents.

The name of the writers of verse is "Legion." At the present moment they are out like the floods. There is no end of them. They pour upon us without measure—and beyond measure. There is a madness, which like *Hamlet's*, has a method in it; and this method may serve to the gentleman for a very suitable and altogether convenient law. But it is a far harder lot to have to methodise the madness of others, and pass them off for sane. This feat we have been expected to accomplish for some scores if not hundreds of individuals, who seem to think that by the Duke of Wellington's death they have in some mysterious manner been gifted with the "fine frenzy," which Shakspeare predicates of the poet, and thereby justified in requesting us to print and publish their verses to his memory. Their number, fortunately, precludes us from the possibility of granting the request of one tithe of them, even if the quality were at all equal to the quantity; and most of the authors have to be reminded of the Italian poet's dictum in regard to good intentions mainly serving for pavement to a certain hopeless but never-needing-to-be-mentioned region. Nevertheless, such acknowledgment as we may we are wishing to render, and shall pass in review a few of these invaluable copyrights, which have to dread, as we conjecture, no copy-wrong, as Tom Hood phrased it, on either side of the Atlantic.

The mountain Parnassus has steps, or degrees, for all aspirants. At the foot may be seen anxious pilgrims, "numerous as midges in the sunny beam," who have just begun to count their syllables on their finger-tips, but as yet have not learned to count them correctly; and, having no ear, are, besides, totally regardless of rhyme and accent—to say nothing of sense, grammar, or syntax. A few specimens may amuse our readers. The first we light upon claims attention in right of her sex. The lady's qualifications will become apparent in a stanza or two:—

> Thou hast coped with the nations and millions in war,
> Thou hast ruled the fair world, thou Wellington star;
> And made England the diamond and wonder of earth;
> Thou hast loved her and left her, *son of Erin by birth.*
>
> Farewell to thee, England, remember me, *then.*
> My heart has been thine, and I've made thee a *gem.*
> I've belted thy realms with the sound of my voice—
> Then remember, oh, England, the son of thy choice.
>
> Round the brow of our statesman the laurels entwined;
> Drop a tear of regret o'er his soul taking mind.
> As he pass by his tomb, where his ashes are *laid,*
> Breathe a sigh for the great warrior, statesman, and *guide.*

We cannot compliment our next correspondent on having either the daring fervor or careless elegance of the lady; he is also a trifle more grammatical; but his metre would bear mending, and his diction is not always what it should be. We meet with a jar even in the second line; and some violent compression of a syllable in the first:—

> O'er Wellington's death behold a nation weep,
> The soldier and the statesman's fame lies as sep.

We are also told—

> The laurels he was destined in his life to win,
> Have been there throughout the world most clearly seen!

In verse equally valuable, the various victories of Wellington are recounted, in lines varying from ten to fourteen or fifteen syllables, doubtless to the great convenience of the writer, and to be justified only on that principle. Of the manner of their celebration, a few lines will give some notion:—

> Assaye and Argaum he brought to know their fate,
> For which he was awarded a *Sword* and *Plate.*
> At Copenhagen he went the attacks to settle,
> And here alike displayed a warrior's mettle.

A little of such "poetry" will satiate the most voracious reader.

Our next rhymer dates from Chambers' printing-office, Edinburgh. The writer has not yet learned to spell, but he has an uncle, an old veteran, who "followed the Duke's army through the Pinnsniar campaigne," and who says "people say what they like about the Duke's severity to his soldiers, but he says he had to be severe, for he had a strange set to deal with—and, he says farther, that he never could have kept his command, had he not shewn an example by hanging some of them." The writer, who gives this important information, thus continues his uncle's narrative:—"And now since he (meaning the Duke) is gone," "he (meaning his uncle) is still in the same mind, that the Duke's courage was surprising. He has seen him riding along the line, encouraging his men, when the balls were flying like hail, and never cowering nor seeking shelter behind dishes or rocks, as some have stated." After this specimen of the young printer's prose, our readers will scarcely desire his poetry; but they may take our word for it, that it is rather worse than better.

Another correspondent rises to his highest flight in the following concluding stanza of his brief lyric:—

> With heart-felt grief, they loss deplore,
> The brightest jewe. in Victory's crown:—
> Has death to'en from his setting. No more
> Shall mortal eye see that *jion* of world renown.

This writer also needs a lesson in orthography. Another, too, spells "Britania" with two t's, perhaps for the sake of emphasis; and, in order to be just, both to the tutelary goddess and the laud she protects, repeats the surplus literal in "Britain." One truth, however, he tells in spectrophuting the departed:—

> The proud ones of the world, and all of high degree,
> Exalted higher are by justly honouring the.e.

The lame, the halt, and the deaf accumulate upon us. The next manuscript ode we adventure upon begins—

> When I first heard of the Warrior's death,
> It 'mared my soul and stopped my breath.

Notwithstanding this estoppal of his breath—which, of course, is nothing but a sublime poetical exaggeration—the writer splits from his fertile brains some fifty verses, which he piquantly entitles, "Shadows of the late Duke of Wellington." Such shadows! The seer sees his hero in the different scenes of his career, and records his second seeing in such stanzas as this, and so spelled:—

> I see the Marital Pier by his Sovere'gn's side
> With nob'e form supporting the Sword of State,
> Graced with honours England's pride,
> Titles of his fame to many to numerate."

The author, however, is not always so "coldly correct" in his "like engings." The following is a daring exception:—

> I see the Minister of State on British boards
> With love sight trust the nation *ruining,*
> And all is gone—Knights and Lords,
> A hat on's pow'y and statesman's powers *disgaining.*

Strange to say, the advantages of education, even such as is accorded by our universities, do not secure writers, when they attempt verse, from falling into solecisms and errors. Here now is a poem dated from "—— College, Cambridge," which opens thus fatally:

> Oh raise the banners high that *waved* of yore
> Triumphant, over the bloodstained fields of Spain,
> And *rouse* as it is life *those* centuries roar
> That *rolled* their thunders o'er the Belgic plain.

In the next stanza we are twice told to "let them *wave* and let them *rear*;" and in the third, his knell "*rouses* nobles" and "wakes the savage." A few stanzas on, the last trump shall "*rouse* and call them," and a little afterwards the Spaniard is commanded to remember "his armies bank, like ebbing tides, would *roll.*" Thus, it would appear, that in the first stanza just quoted, we have the writer's entire stock of poetic diction. "Wave," "roar," "rouse," "roll," do persistent service throughout eighteen stanzas, in which there is not one suggestive of an image or a thought worth a moment's consideration.

But this is better than the song of the "Mocking Bird." A Dissenter in verse robs the ode on General Moore of its structure and tone, and thus transfers it to Wellington:—

> Through the streets of St. Paul's rolled the music along,
> As the body was borne to its rest;
> Not a voice disturbed the melodious throng,
> Not a sound broke the swell of the chorus.

And thus through the remaining stanzas.

A heavy charge of mediocrity lies against "Lines occasioned by the late Duke's Death." The Republican party is described as—

> Those who bent their bosoms
> On Kings, and *crushed their crowns?*

This writer also tells us that our hero

> Hath lost his living breath,
> And smashed the roads of death,
> And comes no more.

But enough of such platitudes. We hasten to another quarry. Here we have a Doctor of Divinity, a clergyman of the Church of England, who commends his production to us in the following mysterious terms, which he repeats in a second and third letter, "As an elegy that, from its *English verbiage* and *terse* style, harmonises with the character of him whom it commemorates." What can a D.D. and a rector of an English parish mean by this same "verbiage"—of "verbiage," too, harmonising with the Duke of Wellington, who never was guilty of using it, and resting with a "terse style." It is plain that this learned gentleman does not understand the language in which he writes. We suspect that he means to commend his poem as an example of pure Saxon English; but what hope may we entertain that such a man can write either English, or Saxon, or French, who, being classically educated, and having obtained a Doctor's degree, could fall into such an error? The Elegy, however, has a Greek motto, from Luke's Gospel. This, however, does not preclude similar inappropriateness of terms in his stanzas. The writer is an ecclesiastical *mae Malaprop*, and cannot conceal his relationship. He begins with piously declaring that we should not say of his hero that he is either "departed" or "gone," though dead, and then proceeds—

> Oh no, we are not persuaded,
> Though fourscore years have flown,
> That vigorous mind is *jaded,*
> That iron frame broke down.

Surely, no man, knowing the meaning of the word "jaded" would be used in reference to a corse, notwithstanding the hard necessity of rhyme, had he ever looked into the precise signification of words. What, moreover, do the following four lines mean?

> The life that we have guarded
> By Providence on high,
> Which thousand dangers *warded,*
> Drove thousand perils by!

Before we can admit the reverend Doctor's poetry into our columns we must really consult the English dictionary for the "verbiage" which he vainly thinks he has already mastered.

We take a leap at once from the pulpit to the level of Grub-street. Here a Seven-dials halfpenny broad-sheet, adorned with a choice wood-cut, we know what we have to expect. The thing, too, has been already part of the literature, and lauds literature, and maintains an existence independent of criticism. We make no apology, therefore, for presenting the following characteristic effusion on the "Death of the Duke of Wellington." There is, with all its bad grammar and metre, a smack of true old Percy ballad about it; and it is evident the genuine production of one of the Catnach regulars:—

DEATH OF THE DUKE OF WELLINGTON.

> O Britons give ear to these lines I relate—
> There was never a General more balder;
> The leader in war, the pilot in state,
> A noble and gallant old soldier.
> Respected, revered, beloved, too, and feared,
> No tyrant did e'er dare molest him;
> He is gone, he is dead, his bold spirit hath fled—
> The Duke of Wellington's gone, and God rest him!
>
> In the Councils of State of old England's fate
> One Queen he did oft call upon [her:
> He is gone, we may see, aged near 83,
> Full of age, full of glory and honour.
> He fought and he conquer'd in France and in Spain—
> No power on earth could mo.est him;
> And at great Waterloo he made Boney to rue:
> But he now is no more, and God rest him!
>
> He at Walmer did die; in his shroud he doth lie—
> The glory and pride of Britannia;
> He made tyrants to quake, and the world for to shake—
> Our gallant and noble commander.
> He was never seen fear; death and danger he met,
> And the friends of Britannia oft bless'd him:
> He has gone to that home where he'll never return—
> Our gallant old Duke, God rest him!

pecuniary sacrifices which Humboldt himself cheerfully made in the cause of science.

Humboldt's journey to Russia has been attended with permanent results most beneficial to civilisation. Through his influence a regular system of observations has been established through that vast country on the state of the barometer, thermometer, and hygrometer, on the temperature of the soil, the direction of the wind, and the moisture of the atmosphere. Among the Russian mining superintendents of the Ural mountains, he left valuable instructions how to conduct future experiments. Thus he appeared in the noble character of a national educator, and the Russian Government, animated by his zeal, instituted a physical observatory at Petersburgh—a lesson to all how much can be effected by the energy of a single mind.

In 1827-8 Humboldt delivered a course of sixty-one lectures in Berlin; and these, carefully revised, compose the "Cosmos"—perhaps the most remarkable work of our times. The tenth chapter of the book before us gives a clear analysis of this wonderful cyclopædia of science, and we strongly recommend it to all who have not leisure to study the original. The style of Humboldt is lucid, nervous, and beautiful—of which some specimens are given in a supplementary chapter—being scenes of travel and descriptions of natural phenomena. Among these are the "Ascent of the Peak of Teneriffe," and a curious account of the method of catching electric eels in the marshes and standing waters near Calabozo, which is effected by driving horses into the pools, on which the eels expend their electricity, and being rendered torpid or powerless, are easily taken. But we must resist the strong temptation we feel to extract from this fascinating biography, and turn to the sketch of the life and labours of William Humboldt.

His favourite pursuits were literary, rather than scientific. Schiller, Goethe, and Wolf were his intimate friends; Poetry and high art, Greek antiquities, and all ancient languages, dominated over his mind. His Asiatic researches were extensive and profound. At Rome, at Vienna, at Berlin, wherever he resided, his hospitable mansion was freely thrown open to the students of every nation. But he was not only one of the finest scholars of his time, but a statesman and diplomatist, incorruptible, firm in mind, far-seeing in his views, jealous of the honour of his country—a patriot in the mould of Washington. He held high appointments in the Prussian Government; was Ambassador at the Papal, Austrian, and British Courts, and attended the Congress of Vienna after the overthrow of Napoleon. After the pacification of Europe, his honest convictions were distasteful to the Court party. He required that the promises of a constitution, so solemnly pledged during the struggle against France, should be fulfilled, and he stood aloof from those who yielded to the dictation of Austria and Russia. He violently opposed the Carlsbad decrees, demanded the impeachment of the Minister Wittgenstein, violently attacked the Chancellor Hardenberg, and thus sealed his political fate. He was no fawning time-server, but one of those highly-principled men who may be broken but never bend. He was considered the chief supporter of Liberal opinions in Prussia.

His statesmanlike talent (says his biographer) showed itself in that he, when he had to do with the reality, followed not only the bent of his own mind, but consulted also the wants and wishes of the majority of the educated men of his nation and of his people; that he penetrated by the feeling that there was something higher in the prevalent ideas of any epoch, sought out those ideas, connected them with his own views and thoughts, and thus endeavoured to act with the universal spirit of progress. It was his firm conviction that a people could only be strengthened and elevated by free institutions. He would have realised this conviction in the manner most consonant to his feelings had not the practical mind prevented him. He, therefore, remained true to his principles, but studied more nearly the most urgent wants of the nation and the relations of things of the age, which were directed to constitutional life, and the commingling of the people with the affairs of the state. Humboldt asked nothing from a Prussian constitution which was impossible under the circumstances. He wished to found the commencement of constitutional life, and pave the way for further privileges, which might easily be added. He did not wish Prussia to make a rash leap forwards, but to advance steadily with the whole, not half measures. The Government was to acquire the means, by representative deputations, of knowing the wishes of the people.

Humboldt's philological researches were extensive. He investigated the origin of the Spanish people through the medium of the Basque language, and of those of the Indian Archipelago through Sanscrit. He published several sonnets, and devoted many years to his translation of the "Agamemnon" of Æschylus; by German critics it has been pronounced a masterpiece. To him was entrusted the organization of the University of Berlin, founded in 1807, and he selected the first professors; among whom were Fichte, Solelermacher, Klaproth, Spalding, Niebuhr, Wolf, and Boeckh. His biographer points to Humboldt "as a pattern of the deep and diversity of the German mind, and as the promise of a richer future for the German nation. He stands like the representative of a change from spirit to life, from idea to reality, in which the German mind is engaged, for he was one of the first and ablest who took this step. He adhered to the past, advanced boldly forward, and put his trust in humanity and his country."

NARRATIVE OF THE UNITED STATES' EXPLORING EXPEDITION DURING THE YEARS 1838, 1839, 1840, 1841, 1842. By CHARLES WILKES, U.S.N., Commander of the Expedition. 2 vols. With numerous Engravings. Ingram, Cook, and Co.

The exploring expeditions of the United States redound much to the honour of Brother Jonathan; and that which forms the argument of the volumes before us is remarkably instructive. The extent of the investigation is one of its marked characteristics. There is a largeness in its very conception which is emphatically comprehensive a Titan vastness that implies a mighty Republic—ambitious, daring, and of an inclusive spirit. Within the circle of adventure are comprised Madeira, Rio Janeiro, the Brazils, Terra del Fuego, Valparaiso, Chili, Peru, Tahiti, the Paumotu, Samoan, Feejee, and Hawaiian groups of islands, New South Wales, the ice islands of the Antarctic, New Zealand, Tongataboo, Oregon, California, Soolo, Singapore, Cape of Good Hope, and other places. The information given of all these localities is systematically arranged, and neatly expressed. The descriptions of countries and people are uniformly graphic, full, clear, and discriminative. Indeed, there is a pervading vitality in the work which demonstrates Commander Wilkes to be a writer of apt and various observation, and a gentleman in every way suited to conduct and record the proceedings of the expedition confided to his care and energy.

In describing a circuit of the extent here accomplished, we meet with, of course, old places and old faces familiar enough; but there is a large amount of matter both original and new; and, after all, it is the completeness and practical utility of the survey that constitute the value of the work. It was originally undertaken, as the title-page imports, in 1838, and continued for the four following years. Passing over more well known portions of the route, we prefer at once to enter upon the southern cruise, in which the wonders of nature begin to make themselves felt in the grandeur of wild scenery, and the untamed impulses of savage life. Among these wonders, the phenomena of volcanoes hold a prominent position in Commander Wilkes's description. After receiving a visit from the "quite naked," but "good-humoured and contented," natives of Wollaston's Island, they reached Orange Harbour, and took the opportunity of visiting an old crater, about 1500 feet in diameter, and found near the east end the water boiling in many places, and the surface-water uniformly milk-warm, though a few inches below it was perceptibly colder. The ground near the boiling springs, it is added, was quite hot; and there were several small craters, of three or four feet in diameter, from which a heated vapour constantly issued, accompanied by much noise. Hot springs were also found on the Feejee Islands, particularly near Savu-savu Point. On landing, Orange Harbour, and the beach absolutely steaming, and warm water oozing through the sand and gravel, often too hot to be borne by the feet. The springs are frequently used by the natives to boil their food. But these marvels are all of a peaceful character, contrasted with the features that distinguish the Volcano of Kilauea.

The Hawaiian group is likewise distinguished by the crater of Mauna Ha eakala; or, House of the Sun, where it was said that in former times the dread goddess Pele had her residence, and driven out by the sea, when she took up her abode on Hawaii, where she has ever since remained. Traditions of this kind abound; and we are particularly pleased and instructed by the elaborate description of these and other particulars in the chapter devoted to the Kingsmil group of Islands. The manners, customs, and, for the most part, the creeds of the different peoples visited, are carefully and honestly compiled. The author has here shown much judgment.

The state of opinion and belief among savages is always a subject of interest. The religion of the Samoans, for instance, has many salient points, and their notion of the creation is at least curious.

Among the Feejee groups, also, we find traditions of the origin of races and of a deluge.

But into these and other subjects we have not space to enter fully. The work before us exhausts them all, and may be pronounced a cyclopædia of information relating to the route comprised in the United States' Exploring Expedition, of which it is the result and memorial.

THE PASSIONS of the HUMAN SOUL. By CHARLES FOURIER. Translated from the French by the Rev. JOHN REYNELL MORELL; with Critical Annotations, a Biography of Fourier, and a general Introduction, by HUGH DOHERTY (Henry Lea, Warwick-lane

Fourier, as our readers are probably aware, sprang a numerous, but now dwindling, political sect. His theories have given names to journals, and have called a peculiar literature into existence. Lowly born, and never rising to a high station; in his latter days poor almost to destitution; with no power but his "reflective habits," and his pen, he made himself a large name, if not an abiding one, in the memory of his countrymen. He died in 1837, leaving behind him, after having written and published much in his lifetime, seven large octavo volumes, as the completion of the great work that was to make all men wise unto earthly happiness. The present work (containing 500 pages) is a translation of one of those volumes, selected as one of the best; and we opened it as we have opened other writings of Fourier, hoping to find some justification of the honour conferred on him in France, and reflected back with additional lustre from the rest of Europe. But either it requires a distinct organ to comprehend Fourier, of which we are destitute—as some persons are destitute of an organ for music—or there is no peculiar knowledge in his writings to comprehend. It cannot be said that it is not possible to explain them in such a compass; a compendium of the whole science of mechanics, and philosophy taken into the bargain. The "Wealth of Nations" is published in one volume, about half as large. The first edition of the celebrated "Essay on Population," that established a reputation for Mr. Malthus throughout Europe, and impressed his name in all the political literature of the day, was scarcely a fourth as large. Mr. Ricardo's "Elements of Political Economy" are contained in a comparatively small octavo volume. All that M. Fourier ever learned of good and new might have been explained in one part of the space, and its immeasurable mass of words is employed to seem better calculated to conceal ignorance or mask imposture, than to display truth. The very title of his work is redundant, and calculated to mislead. The "Passions" would have been sufficient; but, adding "of the Human Soul," implies that the body has no passions, or that he does not treat of them, and thus ignores hunger, animal love, and other important motives, to action. "Fourier," says his friendly commentator, "often bids adieu to common-sense in his descriptions of detailed and complicated plans. When he will apply his mind to work at solving the problem of practically realising his conceptions, he imagined many schemes of operation which are utterly impossible in practise." As a practical man, then, his most devoted disciples give him up. But, it is said, M. Fourier's ideas are beautifully grand and simple in conception:" "that some of his ideas are beautifully grand and simple in conception:" "that the Bible is the only book which treats of human destiny more deeply and more luminously than the writings of this man of genius." In the present chaos of political science, when the whole world is planning schemes of political regeneration, and eagerly seeking, almost distracted with doubt, for political truth, it would be unjustifiable to reject, without examination, any clue which we are told will guide us out of the labyrinth. We would study M. Fourier's writings with great earnestness and great will, if we had but by such an inspection of them as is sufficient to understand their drift, become thoroughly convinced that they are theoretically as erroneous as they are "practically impossible." We would not speak lightingly of any man who proposes his ideas earnestly and sincerely to the investigation of any class of phenomena, but we cannot consent to accept the outpourings of a confused and misty monomania for the deductions of science and the words of wisdom. Still less can we, either by silence or praise, suffer our readers to suppose that we assent to them.

The present work almost begins by telling us that the secret of other inquirers' vacillations on the subject of the passions is, that "they are ignorant of the fact that the passions are distributed like a tree which, beginning from the trunk or focus, gives subdivisions progressive in number." Taut the passions are distributed like a tree is, therefore, the leading principle in the writings of this man of genius who treats of "human destiny only less luminously than the inspired writers." M. Fourier, or rather his translator, who has, we have no doubt, endeavoured to give M. Fourier's meaning correctly in our language, says, proceeding in his work of instructing mankind:—

> It is important to class the passions according to the degrees of a generative scale, i.e., potential degrees, which, setting out from a common stem, successively give birth to each other.
>
> Thus, ambition will give us in sub-division the genera of avarice, cupidity, ostentation, generosity, which will be the branches of genus, if you consider ambition as the branch of order.
>
> The analysis of the passions ought, therefore, to ramify as follows:—stem; first, classes; second, orders; third, genera; fourth, species; fifth, varieties; sixth, simulations; seventh, harmonies.
>
> This divis on will be named pentadian scale—that is to say, the passions of order, such as ambition, will be of the second power, the branches arising out of unity from ambition, such as avarice, cupidity, will be passions of genera of the third power. The series of these subdivisions will compose the scale of potential degrees, which must be continually graduated up to the complete octave.
>
> It would be a waste of time to attempt any analysis, or to give any explanation of this passage. It is merely a jumble of words representing nothing in nature; but establishing a comparison where two things compared—a tree and the passions—have no common properties or similitudes. In a tree and the human body physiologists may discover a common type. The writer of such a passage must be ignorant of the elemental fact that words are meant to represent things; and "passions classed according to the potential degrees of a generative scale, continually graduated up to the complete octave," is more like the ravings of an idiot or a maniac than the use of significant language. The whole book is composed of such strange confusions. To quote more of them would be unpardonable, but we may give the reader an idea of the sort of subjects, if he can comprehend them, discussed in the book, by mentioning the headings of a few chapters taken almost at random:—"Subversive state of right in the accords of powers, nought, first, second. Subversive state of right in cardinal accords, the third, fourth, fifth, and sixth powers." "Fastine of adderal correspondence transmissive of the universal language, and of the knowledge acquired in all the worlds." "Integral gamut of the generical distribution of the potential scales of 810 characters." There may be some deep and important mysteries concealed under such expressions, but the burning thirst now is for knowledge easily comprehended, not for mysteries; and to present to us as knowledge, or as expanding human destiny on the earth, is like the parched mockery which the fevered imagination of the travellers in the desert conjures up of the deceitful mirage. We would not have said so much of this book but would have merely said it was utterly worthless, to be classed with the cabalistical nonsense of astrologers—which it resembles more than any other kind of writing we are acquainted with—but we not known that there are many persons in England, as in France, who believe in Fourier. We can assure them that his writings are a tangled mass of vain fantastical theories, groundless hypotheses, and conjectures as alien to nature as they are impracticable in application to the affairs of life. That such writings should have had even a momentary influence, is a sure indication of a very ravenous appetite in a great multitude hungry for political and social improvement.

ESMOND: A STORY of QUEEN ANNE'S REIGN. By W. M. THACKERAY. London: Smith, Elder, and Co.

We consider these volumes the most finished and able of all Mr. Thackeray's contributions to literature. The story of "Esmond" is witty and wise; keen satire, noble sentiments, and deep thoughts embellish its varied pages. The narrative never flags, and the transitions from scene to scene are skilfully contrived from the commencement to the end. All the characters introduced are marked by a very distinctive individuality. The author, in his preface, announces his intention to "copy the manners and language of Queen Anne's time;" and he has eminently succeeded. Nothing can be more felicitous than his imitation of the style of Richard Steele, in the "Spectator," in the letter styled "Jonathan," p. 69 of the third volume. All the dialogues are animated, rapid, and characteristic. With the construction of the story we are not so well pleased as with its execution. It is a fictitious biography entwined with an historical novel, in which history is made subservient to fiction, so as to create a special interest in the chief actors of the story. We object to this principle altogether. Even the genius of Walter Scott could not surmount the difficulties it involves. His predilections in favour of Royalists and Cavaliers prompted him to throw a false colour over events such as he drew from his imagination, and he could not hold the balance with an even hand between Covenanters and their opponents. These feelings led him into error and exaggeration, even when he laid his scenes in foreign countries; and Guizot particularly accuses him of not understanding, or at least of misrepresenting, the great leading task, on such points the most careful and the least partial of professed historians widely differ; but when the leaders of the people are introduced into an historical novel, where fiction is obviously blended with fact, we may rest assured that their political portraits are drawn by fancy, and their features fashioned to the caprice. Such sketches may be very ingenious, and very exciting, but they can never afford any instruction.

When this story begins Esmond is a little boy, ignorant of his parentage, and is regarded as illegitimate, his father having concealed his marriage with his mother, and taken to himself a second wife. The father is Lord Viscount Castlewood, and the child is brought up at the family mansion of Castlewood, and educated by a Jesuit, named Father Holt, a devoted partisan of the unfortunate Stuarts. This nobleman and the Jesuits are engaged in conspiracies for the restoration of James II., in which they fail; and Lord Castlewood, after having fought at the Boyne, dies. He is succeeded in his title and estates by Colonel Francis Esmond, who has a wife, a son, and a daughter, who play a very conspicuous part in these volumes. The hero of the tale is now placed under the charge of the new family. He becomes the preceptor of the two children, and is warmly patronised by their parents, who ultimately send him to Oxford, with a view to his becoming a clergyman, and succeeding to the rectory of Castlewood. He passes his vacations with his patrons, who are visited by Lord Mohun, a man of dissipated habits—a gambler, a duellist, and seducer, who wins large sums at play from the easy Lord Castlewood, and seeks to disgrace her Ladyship. Then arise jealousy and upbraiding; and young Esmond, devoted to the family, endeavours to act the part of a conciliator, but without success. Lord Mohun lingers in the house, and affects to have the good of the family at heart, but for his departure, and suspects the artifice. They take an airing together in Mohun's carriage, and during the ride the following spirited conversation takes place, which we quote as a fair specimen of the style of the book:—

> "My Lord," says Harry Esmond, after they were got into the country, and pointing to my Lord Mohun's foot, which was washed in flannel and put up rather ostentatiously on a cushion, "my Lord, I studied medicine at Cambridge."
>
> "Indeed, Parson Frank," says he; "and are you going to take out a diploma, and cure your fellow-students of the——"
>
> "Of the gout," says Harry, interrupting him, and looking him hard in the face, "I know a good deal about the gout."
>
> "I hope you may remember it," says the other. "Tis an infernal disease," says my Lord, "and its twinges are diabolical. Ah!" and he made a dreadfully wry face, as if he had just felt a twinge.
>
> "Your Lordship would be much better if you took off all that flannel it only serves to inflame the toe," Harry continued, looking his man full in the face.
>
> "O! it only serves to inflame the toe, does it?" says the other, with an innocent air.
>
> "If you took off that flannel, and flung that absurd slipper away, and wore a boot, continued Harry.
>
> "You recommend me boots, Mr. Esmond?" asks my Lord.
>
> "Yes; boots and spurs. I saw your Lordship three days ago run down the Harley road in pursuit of a hare on foot." "I am sure that hedge grass at night is not so pleasant as claret to your Lordship; and, besides, it keeps your Lordship's head cool for play, whilst my patron's is hot and flustered with drink."
>
> "Sirrah, sir, you dare not say that I don't play fair?" cries my Lord, whipping his horses, which went away at a gallop.
>
> "You are cool when my Lord is drunk," Harry continued; "your Lordship gets the better of my patron. I have watched you, as I looked up from my books."
>
> "You young Argus!" says Lord Mohun, who liked Harry Esmond; and for whose company and conversation he seemed during many months after to have taken a certain fancy too. "You young Argus! you may look with all your hundred eyes and see me play fair. I've played away an estate of a night, and I've played my shirt off my back; and I've played away my parsley and come home in a plain-cap. But no man can say I ever took an advantage of him beyond the advantage of the game. I played a dice-cogging scoundrel in Alsatia for his ears and won 'em, and have worn 'em in my periwig ever since, as a memorial of his folly."
>
> Harry Mohun will play any game for anything—always would."
>
> "You are playing awful stakes, my Lord, in my patron's house," Harry said, "and more especially as you are on the sick list."
>
> "What do you mean, sir?" cries my Lord, turning round, with a flush on his face.
>
> "I mean," answers Harry, in a sarcastic tone, "that your gout is well—if ever you had it."
>
> "Sir," cries my Lord, grating hot.
>
> "And as for the truth, I believe your Lordship has no more gout than I have. At any rate change of air will do you good, my Lord Mohun. And I mean fair, if you had but better go from Castlewood."
>
> "Am I to receive you message to me this message?" cries Lord Mohun.
>
> "Did Frank Esmond commission you?"
>
> "No one did. 'Twas the honour of my family commissioned me."
>
> "And are you prepared to answer this?" cries the other, furiously lashing his horses.
>
> "Quite, my Lord; your Lordship will upset the carriage, if you whip so hotly."
>
> "By George, you have a brave spirit," my Lord cried, laughing into a laugh. "I suppose 'tis that infernal *botte de Jesuite* that makes you so bold," he added.

Harry, however, disclaims this insinuation, which referred to a new move in the art of fencing, which father Holt had taught his pupil, and which Lord Mohun that he suspects him of endeavouring to seduce Lady Castlewood, and urges him to refrain from his efforts, which are useless, but calculated to disturb the peace of the family. Mohun drives on furiously, the carriage is upset, and both are injured, his Lordship severely. When he recovers, he takes his departure. Lord Castlewood follows him, picks a quarrel, and falls in a duel by Mohun's hand.

Harry Esmond enters the army, and takes part in the campaigns of the Duke of Marlborough. He meets Holt in Flanders, who makes himself known to him as the secret of his birth, and shows him his papers. Harry now learns that he is legitimate, and entitled to the rank and estates of Castlewood, which he determines never to claim, from gratitude to those who protected his orphanage; and this self-denial on his part is wrought out with great skill, showing much forbearance and elevation of mind. In the story it leads to many beautiful results.

Beatrix, daughter of Lord and Lady Castlewood, is a remarkable character. She is described as a peerless beauty, but heartless; her sole ambition is to make a brilliant marriage. Esmond loves this girl, and, in spite of many rebuffs, and of several engagements with various suitors, all of which Beatrix breaks off, he is constant to her for ten years. At length the young lady succeeds in ensnaring the Duke of Hamilton. He is appointed ambassador at Paris; bespeaks his wealth to be placed at her disposal to celebrate her nuptials, and make a brilliant display at the French Court. But all her hopes are disappointed. Before the marriage is effected, Mohun and the Duke fight a duel, in which both are killed. The character of this lady is drawn with great power. We must give some passages taken from a conversation with Esmond, after he is assured that she has accepted the Duke:—

> "Yes, sir," says she; "a Duke is a taller man than you. And why should I not be grateful to one such as his Grace, who gives me a position such as my name? It is a great gift he endows me with; I know 'tis a bargain between us, and I accept it, and will do my utmost to perform my part of it. 'Tis no question of sighing and philandering between a nobleman of his Grace's age and a girl, who was forced to go about in an old gown. Eh! cousin, a goddess in a stable-cap, that has to make her husband's gruel, ceases to be divine—I am sure of it. I should have been sulky and scolded; and of all the proud creatures in the world Mr. Esmond is the proudest; let me tell him that. You never fall into a passion; but you never forgive. I think Heaven has made you a great man for me; and I make no doubt, cousin Esmond, all the while you are writing your love to Beatrix, you are thinking of the black man Dean to the woman in the play that

(Continued on page 534.)

"THE HERO AND HIS HORSE ON THE FIELD OF WATERLOO, TWENTY YEARS AFTER THE BATTLE."—PAINTED BY B. R. HAYDON.—ENGRAVED BY PERMISSION.

THE HERO AND HIS HORSE.

This picture was painted by Haydon. The Duke gave the requisite sittings at Walmer, in 1839; and of the painter's visits he has left the following anecdotic records in two letters to a friend:—

Extract from a Letter from B. R. Haydon, to ——, dated Walmer Castle, October 11, 1839.

I arrived last night, and was most friendly received by the Duke. I have my first sitting to day. The deep interest of being under the same roof, sleeping on the same level, and eating at the same table with the conqueror of Napoleon, produced no trifling emotion, I assure you. His faculties are quite unimpaired, his conversation prompt, his stories fresh from nature, and capital. I prefer them to Scott's, they were too strained for telling home. The Duke gives you an admirable touch of human nature, as if it escaped from him. He is, as Johnson said of Beauclerk, freer from a smile when a good thing is coming and after it is out, than any man I ever saw. He talked till twelve, and then said, "Now we'll go to bed." He lighted two candles and gave me one, as a stranger; Sir Astley and Mr. Arbuthnot lighting their own. The Duke took command, of course, and away we all marched behind him. Sir Astley went to Mr. Pitt's room, saying in a loud voice, "God bless your Grace." I was the last, and blessed him too, as I saw his venerable white head disappear into his chamber. This is the distinguishing intellectual treat of my life. His anecdotes of Napoleon, Madame de Staël, De Pradt, English armies, French generals, Allied Powers, battles, bivouacs; and his remarks on people in middle and low life, his unaffected good nature; his stories, showing the same man in everything—the same smooth, sturdy honour, uncommon sense, and shrewdness, really make up a wonderful instance of uncompromising principle.

Think of Grey never having the moral courage to invite me to his table, and this the Duke defying my misfortunes, and planting me by his side: he is a noble fellow.

Extract from a Letter from B. R. Haydon, to ——, dated London, 16th October, 1839.

I returned to town last night, rich in sketches from the Duke: nothing could exceed his kindness. He gave me one sitting for a chalk drawing, two for an oil study, and two for figure, back and sideways. In fact, the whole house seemed interested in seeing me dash away; and when I did both his hands in two minutes, he looked at me with his eyes, through my soul, if possible. On Monday there was a grand party, the Russian Ambassador, &c., &c.; and yet, surrounded as he was, he kept his word for a last sitting, and would not suffer me to remove from the dining-room till the last moment. The room was mine from six in the morning till five—eleven hours—and nobody dared intrude—not all the ambassadors of Europe. The Duke had passed his word, and told me to choose my light, and keep it. I did so. They all told me, "You will have no more sittings now the Duke is with the Ambassador." I replied, "I shall be at my post;" so, *soyez tranquille*, at my post I was; and in he came, and said, "Now for it;" and sat down, according to his promise. He manages his time better than any man I ever saw, by method. I was up at sunrise, and before it. It was a beautiful morning: he must have been up too, for he said to me, "Was it not a beautiful morning?" I got my head in; and as the clock was striking nine, the door opened, and in he walked, according to agreement the night before. My impression of his character, and goodness, and *bonté* have been trebled in intensity. I can now account for the attachment of the soldiers. He made them better men by discipline—he attended to their comforts—he spared their lives, and never sacrificed them to vain objects: but when their lives were requisite for a grand one, he expected every man to do his duty like himself; without descending to flatter their vices, or weaknesses, like Napoleon; he gained their hearts by curbing the follies and evil propensities which an army always contains, and which Napoleon let loose. "Combien des armées avez-vous servi?" said the Duchess d'Angoulême to an old soldier. "Vingt ans avec Napoleon, et un an avec le Roi." "Ah," she said, "Vingt ans de brigandage, et un an de service."

At last watching him in the drawing-room, after dinner, reading the paper, with a candle on each side of him, I was quite abstracted. "He looked like the eagle of Jupiter in a human shape beginning to get silvery with age." One night, not a word was spoken by his Grace, Mr. Arbuthnot, or myself, for two hours. The Duke read, I affected reading, and Mr. Arbuthnot dozed. I studied the Duke till I got faint; he then burst out of a dream of politics, and it was delightful beyond belief to listen.

* * *

Taking a general view of his condition, I can say, from narrowly watching him, his health is decidedly better than it has been for four years. His head, from a rheumatic affection of the nape of the neck, droops a little more. He hunts, and rods twenty miles on Saturday, and able to bear it, and all the better for it: he eats heartily, and drinks abundantly of coffee at breakfast. He eats heartily at dinner, but only takes half a glass of sherry in a glass of soda water; eats no lunch between, except with visitors. He placed me at table on Monday night, in a splendid party, with high honour. In fact, he has treated me as his equal, and as if I honoured him. In thus having been in the very depths of the private life of the two great heads of the two great parties—Grey and Wellington—doing full justice to the accessibility, amiability, and goodness of heart of Lord Grey, I think Waldington the greater character. He has no vanity, no childishness; flattery has no effect on the Duke. You might as well flatter Mont Blanc. I said to Lord Grey, "The light hurts your eyes, I fear." "It does," said he, and moved round for his own convenience, but to my utter discomfiture. "The light hurts your Grace's eyes," said I to the Duke. "Not the least," said the old hero; and he looked fiercely at the light, because it was his duty. You should have seen his look.

There is a repetition of "the Hero and his Horse," in the Duke of Sutherland's gallery. Our Illustration has been engraved, by permission from the plate last published by Mr. M'Lean, of the Haymarket.

BATONS OF THE LATE DUKE OF WELLINGTON.

In our Engraving, we represent the various bâtons given to the late Duke of Wellington by the Allied Sovereigns, and which were carried by officers deputed from the different kingdoms at his funeral. For more easy reference, we have numbered the bâtons in the Engraving, and their description we now proceed to give:—

No. 1, the Bâton of Portugal, is of burnished gold; it is surmounted by a Crown, and on a shield are the arms of Portugal.

No. 2, the Bâton of Prussia, is of burnished gold, and is of classic ornamentation; it bears two eagles displayed, holding the sceptre and orb of sovereignty.

No. 3, England, is of gold, and is surmounted with the group of St. George and the Dragon. This bâton is excessively rich in its decoration, as our Engraving shows; and at the end of it is engraven this inscription:—

From his Royal Highness
George Augustus Frederick,
Regent
of the United Kingdom of
Great Britain and Ireland,
to Arthur, Marquess of Wellesley, K.G.,
Field-Marshal of England.
1812.

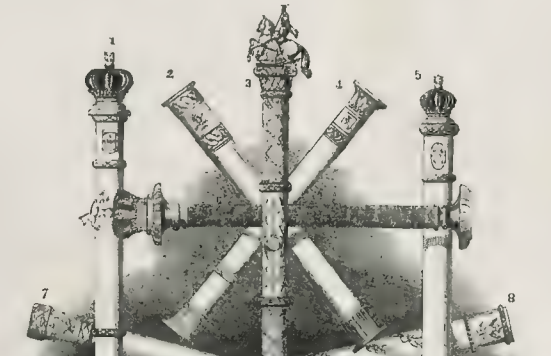
No. 4, the Netherlands. This is one of the simplest, but perhaps the most elegant of the bâtons, the Greek ornaments being introduced very tastefully. The arms of the Netherlands are in the upper division.

No. 5 is the bâton of Spain. Like that of Portugal, it is crowned; but it is shorter in its proportions. It is of burnished gold, and bears the armorial ensigns of Spain.

No. 6 (lying across in our Engraving) is Hanover. The crown and ends of the staff are gold; but the chief part of the bâton is covered with crimson velvet, powdered with silver horses—the Hanoverian arms; and a silver horse is placed above the crown.

No. 7 is Austria. This bâton is of burnished gold, and the wreaths round it are in dead gold. The other portions are extremely plain; whilst

No. 8, the bâton of Russia, is of gold, and the alternate wreaths of laurel and oak, which twine round it; and the collars round the staff are set with diamonds of great value. The ground is frosted gold.



1. Portugal. 2 Prussia 3. England. 4. Netherlands. 5. Spain. 6. Hanover. 7. Austria. 8. Russia.

BATON THE LATE DUKE OF WELLINGTON.

THE LATE DUKE OF WELLINGTON.—PAINTED BY ISABEY.

THE LATE DUKE OF WELLINGTON.—PAINTED BY PELLEGRINI.

MINIATURE OF THE DUKE OF WELLINGTON.
BY ISABEY.

This extremely elegant portrait was painted by Isabey, the celebrated French-miniature painter, and engraved by Mécon, and published in Paris, in 1814—the year in which the Duke was Ambassador to Louis XVIII. for the Court of England. The artist has thrown back the head of the Duke, giving him an air of authority, not without dignity; whilst a slight smile warms up the expression. The original of this beautiful miniature was purchased by the Marquis of Hertford a few weeks ago, at the sale of the Countess d'Hijar's property at Versailles, for the large sum of 10,601 francs, or £424.

PORTRAIT OF THE DUKE OF WELLINGTON
BY PELLEGRINI.

Amongst the variety of portraits painted of the Duke at different periods of his life, that painted by Pellegrini at Lisbon, in 1810-11, is by no means the least interesting. It exhibits the Duke in the Portuguese uniform, with Ribbon, Star, &c.; and, though rather stiff and formal in style, is characteristic. It was engraved by Bartolozzi, ætat 83 (1811), who died at Lisbon, from whose engraving we copy the above.

THE DUKE'S BIRTH AND SCHOOL-DAYS.

We have received from Mr. W. F. Wakeman, of Dublin, the accompanying Sketches, illustrative of the birth and early education of the Duke, to which are appended these corroborative details of the Artist's visit. First is the room pointed out by all the inhabitants of the neighbourhood of Dangan, as the very room in which the Duke, and after him Feargus O'Connor, were born, as already alluded to in our Journal. Until very lately a wing of the castle, which escaped the conflagration by which the place became a ruin, was inhabited by a family named Allen, who, seven years ago, showed our Artist this apartment as the room of the Duke's birth. Next is a view of Talbot Castle, Trim, a fine mediæval structure in the county of Meath.

ROOM IN DANGAN CASTLE

It was (says the Rev. R. Butler, in Nash's "Historical and Genealogical Researches") built by the great scourge of France of the fifteenth century, the famous Sir John Talbot, afterwards Lord Furnival, and immortalised in Shakspeare's "Henry VI.," part 1, act 2. During his different Lieutenancies, Talbot frequently visited Trim, and erected the castle, which afterwards became the diocesan school of Meath. The signature of "A. Wesley" is to every act of the Corporation from June 1789, to September 1793; for a portion of that time he lived in the small five-windowed house with a court before it in "Dublin-gate-street," which is now terminated by a column erected to his honour; but he principally resided at Fostertown, called "Wellington" on the Ordnance Survey. Upon its humble door may be written the words of Evander ("Æneid," viii., 369). When he was at school at Trim he must have been a very little boy, for one of his school-fellows reports that when Crosbie (afterwards Sir Edward), of balloon notoriety, had climbed to the top of the Yellow Steeple, and had thrown down his will, disposing of his game-cocks and other boyish valuables, in case he should be killed in coming down, the future Iron Duke began to cry when he found that nothing had been left him. When a boy at Angers Military College, the late Dr. Benning, when travelling with Lord Blayney, asked the head of that establishment if he had any English boys of promise under his care, and he replied he had one Irish lad of great promise, of the name of Wesley, the son of Lord Mornington. A gentleman in Trim has a letter from Lord Wellesley, in which he states that the Lord-Lieutenant had been for two years under promise to procure a commission for his brother Arthur, and had not been able to fulfil it. Wellington's name, added to the great military names of De Lacy, Mortimer, and Talbot, throws an imperishable splendour on the ruins of Trim.

The following "descent of the Castles of Mornington and Dangan," is interesting in illustration of the Duke's ancestors:—

Nicholas de Castlemartin seised of the manor and castle of Mornington and other manors, married Catherine, sister, and eventual heir, of Simon Cusack, Lord Culmolyn, and niece of Simon Cusack, Lord of Dangan. Of this marriage there were two daughters: Joane, who married first Richard Fitzgerald, and had an only daughter; Anne, wife to Sir Christopher Plunket, who, on the death of Thomas Cusack, Lord Dunsany, became (17 Henry VI.) Lord Dunsany. The second husband of Joane was Richard Wellesley, who had issue four sons—Walter, Gerald, James, and Christopher—of whom Christopher alone left descendants. The other co-heir of Nicholas de Castlemartin, Anne, was wife to Thomas Cusack, Lord Dunsany, who, with Richard Fitzgerald, and afterwards with Richard Wellesley, had pardon of intrusion into the manors of Dunsany, Mornington, &c. Of these manors, Mornington became the inheritance of the Wellesley family; and Dunsany went, as mentioned above, to Anne, wife of Sir Christopher Plunket. Simon Cusack, Lord of Dangan or Dengyn, by deed dated 1380, granted the manor and castle of Dangan to his son John; remainder to his grandsons, Thomas (husband of Anne de Castlemartin), and Walter; remainder to their heir; remainder to the issue of himself by his second wife, Joan Bermingham, Simon Peter Richard Christian Susanna, Joan, wife of Will Fycard, and Ela, wife of Nicholas Crompe. Under the limitation of this deed, the castle of Dangan passed to Ela, wife of Nicholas Crompe, on the death of Geoffrey Cusack, who was killed at the siege of the castle, 1411. By Nicholas Crompe she had two daughters; Elizabeth, wife to Barnabe Cusack, ancestor of the Gerardstown family of that name; and Genet, wife to Christopher Wellesley, son of Richard Wellesley, and Joana, his wife, as mentioned above. Between these co-heirs the inheritance of Simon Cusack, Lord of Dangan, was divided, and Dangan became the property of the Wellesleys.—(Pat. Rot. Hib., 13 Rich. II., 9 Henry V., 3 Henry VI.)

FIRST SCHOOL OF THE LATE DUKE OF WELLINGTON, AT TRIM.

PORTRAITS, BUSTS, AND MONUMENTS OF THE DUKE OF WELLINGTON.

Although we have already published three articles of considerable length in reference to the various portraits, busts, historical pictures, and other memorials of the Great Duke, we cannot hope, with all our industry, to have noticed every work of the kind which has appeared. We shall be glad, however, from time to time, to supply unavoidable deficiencies as the materials present themselves, and, begin now with two historical subjects of considerable interest.

The Duke's triumphant entry into Madrid after the brilliant victory at Salamanca, formed the subject of a fine picture by Hilton. On this occasion the intoxication of delight of the inhabitants of Madrid at being rescued from their French oppressors, was such that the ladies strewed the ground with their costly shawls, and afterwards, it is said, hugged the conqueror in the very streets. This picture, which was the grand prize at Mrs. Parker's Fine Art distribution some years ago, was afterwards, as we are informed, purchased by the Duke of the fortunate prize-holder. It has been engraved by Bromley.

In the hall of the secretary's office, at Chelsea Hospital, is a fine picture of the "Battle of Waterloo," by G. Jones, R.A. It was painted in 1820, for the Directors of the British Institution, at the cost of 600 guineas, and presented by them to this national institution.

In our list of Busts, we omitted to mention that of colossal dimensions executed in 1851 for the King of Prussia, by Behnes. It is a highly-successful performance, of noble character, and the very ideal of the stern straightforward commander. A cast of it is now on view, at Messrs. Graves'; where also a cast of Noble's finely-marked bust, and a new bust, in marble, by Carew, may be seen. The latter is a very agreeable portraiture, though by no means so remarkable for feature and expression as the others we have mentioned. It has more of the poetic and abstract character of a reminiscence, in which the effects of time and accident upon the natural conformation are not exhibited. It is also young in appearance, as compared with other recent works, looking not more than fifty years old.

(Continued from page 531.)

you're so fond of. What's the creature's name? *Desdemona*. You would, you little black-eyed *Othello* "

"I think I should, Beatrix," says the Colonel

"And I want to run such endless. I intend to live to be a hundred, and to go to ten thousand routes and balls, and to play cards every night of my life till the year 1800. And I like to be the first of my company, sir; and I like flattery and compliments, and you give me none; and I like to be made to laugh, sir; and who's to laugh at your dismal face, I should like to know; and I like a coach-and-six, or a coach-and-eight; and I like diamonds and a new gown every week, and people to say 'That's the Duchess. How well her Grace looks. Make way for Madame l'Ambassadrice d'Angleterre. Call her Excellency's people.' That's what I like. And as for you, you can't expect a woman to bring you children and cup, and to sit at your feet and cry 'O, Caro! O, Bravo!' unless you read your Shakspeares and Miltons, and stuff. Mamma would have been the wife for you, had you been a little elder; though you look ten years older than she does—you do, you slim-faced, blue-bearded, little old man. You might have sat, like Darby and Joan, and flattered each other, and billed and cooed like a pair of old pigeons on a perch. I want my wings, and to use them too."

The death of the Duke of Hamilton revives the hopes of Esmond, who still aspires to conquer the reluctance of Beatrix; and he determines to distinguish himself by bringing the Pretender to London, and defeating the Hanoverian succession. Such an exploit, he knows, will dazzle Beatrix, and secure his marriage with her; but, unfortunately, he intrigues with the Prince of Wales, and has a disposition to become his mistress. This thoroughly disgusts our hero. The scheme for restoring the Stuarts fails, and Henry Esmond, strange to say, marries the mother of Beatrix, and retires with her to America.

Such is a rapid outline of this powerful novel. Steele, and Addison, and Swift, and other celebrities of Queen Anne's reign, are introduced with great skill and judgment. The whole work is flavoured with the epoch. To be appreciated, it must be read thoughtfully, and it will well repay a diligent perusal.

Portuguese a Translation and Self-Instructor. By ——— the anonymous and interdicted comedy of "Richelieu in Love." The temporary suppression of this drama, eight years ago, had a greater signification then than it could have at the present moment, and excited more interest than would now be justified. The Lord Chamberlain's authority had just then been extended. The Government had demanded and obtained, in return for the boon which it had granted—namely the legitimization of all the theatres—that the Chamberlain's authority should equally extend over all. With this important condition, the Lyceum, the Olympic, and every theatre had been and still remains clogged; and there was accordingly no Surrey Theatre in reserve, as there had been but a few months previously, to which a rejected or prohibited author might resort for redress. No tragedy of "Essex" or "Elizabeth" might again find refuge on a transpontine stage. The writer of "Richelieu in Love" found himself in an unparalleled "fix," and uttered a wail of despair loud enough to be heard over land and water. There are, in fact, few compositions more remarkable than the preface to the published comedy. One might think that the whole temple of the drama had been undermined, and its foundations ruined for ever; as if the entire interests of the theatre depended on the performance of this one play. For this exaggerated state of feeling the author had some excuse. For an unknown dramatist to get his piece accepted by an old manager, hemmed in by all manner of close-borough interests, was difficult enough; but, that, cape-weathered, it was hard to have to encounter a new and unexpected impediment—the introduction of another passage altogether—and insisting on immediate return. The proper appeal would have been to the House of Commons, by memorial; praying for inquiry, whether the Lord Chamberlain had not abused his authority; and thus to have brought into question, whether the new enlargement of his powers was not injurious, or, whether indeed his office, in relation to the Stage, be not an unwarrantable interference with one special branch of literature, from which all its other branches are totally free. It is a censorship before publication. But the arguments in Milton's "Apology for Unlicensed Printing" apply in full logical force, and necessary sequence. To this proper course, the author preferred an appeal to the public, in an over-noisy, but very witty preface. To this appeal the answer, having been eight years on the road, at last arrived.

Well! "Richelieu in Love," reduced in form and condensed in substance, has at length been performed; but not with the *éclat* expected. Clever as the drama undoubtedly is, it is not nearly so clever as it is in many of its parts—pointed as are all its sentences—eloquent as are many of its speeches;—the effect on the audience is not that of a piece brilliantly written, and elegantly conceived. We believe this to arise in great measure from the rearrangement of the whole business cast, and its general unsuitableness to the present company at the theatre. But there is also a fault in the drama itself—in the constant artificiality of the style, in the perpetual point and antithesis; and in the accumulation of small effects in the dialogue, for the production of more than

ADVERTISEMENTS.

CLERICAL, MEDICAL, and GENERAL LIFE ASSURANCE SOCIETY ADVANCE.

EXTENSION of LIMITS of RESIDENCE.—The Assured may reside in most parts of the world, without extra charge, and in all parts by payment of a small extra premium.

MUTUAL SYSTEM WITHOUT THE RISK OF PARTNERSHIP.

The small share of Profit divisible in future among the Shareholders being now invested for, without increasing the amount of the regular Premium, the Assured will hereafter derive all the benefits obtainable from a Mutual Office, with all the same time exemption from liability, secured by means of an ample proprietary Capital—thus combining in the same office all the advantages of both systems.

The Assurance Fund already invested amounts to £850,000, and the Income exceeds £150,000 per annum.

CREDIT SYSTEM.—On Policies for the whole of Life, one half of the Annual Premiums for the first five years may remain on credit, and may either continue as a debt on the Policy, or may be paid off at any time.

LOANS.—Loans are advanced on Policies which have been in existence five years and upwards, to the extent of nine-tenths of their value.

BONUSES.—FIVE BONUSES have been declared at intervals of last—in January, 1850—which sum of £59,119 was added to the Policies producing a Bonus varying with the different ages from 2½ to 5 per cent. on the Premiums paid during the five years, or from £4 to £13 10s. per cent. on the sum assured.

PARTICIPATION IN PROFITS. Policies participate in the Profits in proportion to the number and amount of the Premiums paid between every division; as to that of 1847, one year's Premium received prior to the books being closed for any division; the Policy on which it was paid will obtain to the share. The books now close for the next Division on 30th June, 1856; therefore, those who effect Policies before the 30th June next will be entitled to one year's additional share of Profit over later assurers.

APPLICATION OF BONUSES.—The next and future Bonuses may be applied in cash, or during the first seven years, in reduction of any other way.

NON-PARTICIPATING.—Assurances may be effected for a Fixed Sum at considerably reduced rates, and the Premiums for Term Policies are ever less than half the usual rates.

PROMPT SETTLEMENT OF CLAIMS.—Claims paid thirty days after proof of death, and all Policies are indisputable, except in cases of fraud.

INVALID LIVES may be assured at rates proportioned to the increased risk.

POLICIES are granted on the lives of persons in any station, and at every age, and for any sum on one life, from £10 to £10,000.

PREMIUMS may be paid yearly, half-yearly or quarterly; but if payment be withheld from any quarter's sum, the Policy can be revived within fourteen months.

The Accepted and Balance Sheets are at all times open to the inspection of the Assured or persons desirous to assume.

Facts of Rates and Proposal can be obtained of any of the Society's Agents, or of

GEORGE H. PINCKARD, Resident Secretary.

39 Great Russell-street Bloomsbury, London

CHUBB'S FIRE-PROOF SAFES and LOCKS.—CHUBB and SON have now on SALE, at their warehouses, an assortment of their FIRE-PROOF SAFES, which gained the prize medal, with special approbation, at the Great Exhibition, this obtained being awarded to them solely for the Chubb's Detector Lock. A full and careful comparison with those of other makers from all parts of Eng and. These safes embodied the most recent improvements, and are sold at moderate prices. Chubb's locks, with all the recent improvements, cash boxes and deed boxes of all sizes may be lad separated. Iron doors and frames for strong rooms. Complete lists with prices, will be sent on application.—Chubb and Son, 57, St Paul's Churchyard, London; 28, Lord-street, Liverpool; 16, Market-street, Manchester, and Hornsby-lane, Wellington-street.

WATCHES and JEWELLERY of the best description can be purchased at SELIM, DRAN, and CO'S, 9, Coventry-street, Haymarket, at prices considerably less than at any other house. Their Gold Watches at £3 10s., and Silver ditto at £2 15s. are not to be equalled. Gold Chains, of the newest designs, commencing at 2s. each. Gold Brooches from 3s each. A large assortment of Brooches, Rings, Studs, &c., at prices equally cheap. Diamonds, Pearls, old Gold and silver bought, or taken in exchange. 9, Coventry-street, Haymarket.

RICHMOND.—PRIVATE LESSONS in HEBREW, GREEK, LATIN, and Modern Languages; and Four Resident Boarders prepared for College, by a most successful and experienced Teacher. With university honours and very high testimonials. Address L. L. D. Lamd-street, Richmond, Surrey.

Commercial Academy, Lyndhurst, Hampshire.
And in thy right hand bring with thee
Mirth and youthful, jollity.—MILTON.

THE FESTIVITIES of the approaching season may be greatly enhanced, and the number of providing relieved by applying to Messrs PURKISS, 15, Cornhill, near the Exchange, who undertake the entire supplying of the Table at BALL SUPPERS WEDDING BREAKFASTS, and DINNERS. Ices of the choicest possible quality, and in any quantity, at the shortest possible notice. Messrs PURKISS, 15, Cornhill, near the Exchange.

NO CHARGE for ENGRAVING ARMS, NEW CREST& INITIALS, at LOCKWOOD'S well-known Establishment, 75, New Bond-street. Good Cream laid Note Paper, five quires for 2s. 6d.; Envelopes to match, 6d. per 100; Card Plate engraved for 2s 6d.; Gold Cards printed for 2s 6d. A large assortment of Drawing-cases, Writing-cases, Travelling-cases, Envelope-cases, Envelope-boxes, Blotting-books, Inkstands, Pocket-books, Cutlery, &c, at the manufacturer's charges, at WILLIAM LOCKWOOD'S, 75, New Bond-street. N.B Old Dressing cases, &c, repaired or taken in exchange. Country orders for 20s sent carriage free

METCALFE and CO'S NEW PATTERN SMALL FOUR-PRONGED and SMALL THREE-PRONGED SPOONS AND FORKS. The Fonts—such scarches thoroughly into the divisions, and cleanses them in the most satisfactory manner. Have never used this Powder.—Signed, Mrs. Bentley, Hair-brushes, with the durable, unbleached Russia bristles, which will not shed nor lose the common hair. Improved Cheap brushes that cleanses harmlessly in one-third the time. An immense stock of genuine unbleached Smyrna Sponges, at METCALFE'S, BINGLEY-hall, and Old Bond-street Establishments, 130, Oxford-street, one door from Holles s reet.

GAS CHANDELIERS, HALL LANTERNS, &c.—Gasfitters, Ironmongers, and the trade generally, are the most complete assortment in London of every description of gasfittings made for Drawing and dining-rooms, libraries, halls, &c. Every article manufactured on the premises, and marked with the wholesale price. Sir Arnold's improved Moderator Lamps, without smoke, &c at 39 HUNTER and CO 76, 78 and 80 High Holborn.—N.B Large patterns book of engravings, with price lists, 10s, small ditto, 3s 6d Illustrated price lists sent free on receipt of stamps.

Established in 1778

BASSINETTES and BASKETS.
Bridal Trousseaux, Baby Linen, and Complete Equipments of Underclothing for Home, India, and the Colonies.
LISTS, with PRICES sent, POST FREE, on application.
The prices are economical, the material and workmanship excellent.
All parcels carriage free within the limit of the London Delivery Company.
Parcels of £3 sent, free of railway carriage throughout the Kingdom.

RITCHIE and M'CALL'S HOUSEHOLD PROVISIONS—consisting of ready dressed Soups, Sauces, Game, &c, are an invaluable acquisition to the family in their leisure moments, and to be warmed in remarkably few minutes, and may be had of all the principal Italian Warehousemen and Grocers in town and country; and wholesale of RITCHIE and M'CALL 137 Roundsditch.

WHEN are SPECTACLES REQUIRED? When the eyes water, or become so much fatigued by short exercise, as to lead to be frequently closed, or relieved by viewing different objects

When objects cannot be seen without removing them to an increased distance

When the letters of a book appear to blend with one another.

When more light is required than was necessary a few months ago.

When the candle is passed between the eye and the book.

When much difficulty is found in threading a needle

When the eyes appear as if they had a mist before them.

When black specks seem flo ting in the sight

When any of the above mid tations arise, all after action should be had recourse to, and spectacles carefully selected and adapted to the eyes, "Pebble" purchased in MAN HARDY and SON'S PATENT SPECTACLE Manufactory, 4 Cockspur-street, Charing-cross, will not only retard its progress and prevent the sight from becoming worse, but restore it to the natural state when first used, and a pair of "Pebbles

THE LATE DUKE'S REMAINS, IN THE CRYPT OF ST. PAUL'S CATHEDRAL.

THE CRYPT OF ST. PAUL'S.

LOWERING THE BODY OF THE DUKE OF WELLINGTON.

We have already described the last scene of lowering the coffin into the Crypt. The apparatus used was of the simplest, yet most effective kind. It consisted only of two "crabs" connected together, so that they acted simultaneously, and four chains, one to each corner of the platform, on which the bier was placed, which received the coffin from the bier of the funeral car. As the "crabs" were worked by men, the chains gradually lowered, and the coffin, on its temporary resting-place, descended slowly and gently below the pavement of the Cathedral. To admit the coffin in a horizontal position, a portion of the pavement immediately under the centre of the dome was removed, and a strong framing of timber raised in the Crypt beneath this woodwork, carried the platform on which was the bier, and all the chains and pulleys used in lowering the platform, so that there was no strain on any of the vaulted groining of the Crypt. The gloomy appearance of the vast Crypt, the tomb of Nelson, and memorials of some of his companions in war, and the massive framing for the lowering of the Duke's body to its last resting-place, formed a striking and impressive picture. Add to this scene the slowly-descending platform, with its sepulchral burden, the bright glare of light streaming down the opening, as lower and yet lower the coffin descended into the vaulted space; and then could be faintly seen figures round the grave, the King-at-Arms proclaiming the titles of the illustrious dead. This, the *last* scene, was probably the most impressive of all.

FAMILY OF SIR CHRISTOPHER WREN.

(To the Editor of the Illustrated London News.)

Sir,—In the number of the Illustrated London News for November 13, describing the Crypt of St. Paul's, and some of the monuments therein contained, you speak of the members of Sir Christopher Wren's family who lie buried there, and make mention of a marble tablet, recently erected "to the memory of his great grand-daughter, the *last* of her race!" I beg to correct this statement. The lady here spoken of was the daughter of the *younger* of the two sons of Sir Christopher's only son. The descendants of the elder branch still exist, in three separate families. The last male representative of the family being the fourth in descent from Sir Christopher, was Christopher Roberts Wren, of Wroxhall Abbey, Warwickshire. He died in 1828, leaving three daughters. The eldest and youngest have subsequently married. Sir Christopher's family, therefore, remains represented by the eldest daughter of the last male and her descendants. Pardon this intrusion on your time from

The Lineal Descendant of Sir Christopher Wren.

Worcester, Nov. 27, 1852.

AN AFTER-DINNER SPEECH OF THE DUKE.

(From a Correspondent.)

A County Hospital was to be built, and the Duke of Wellington accepted an invitation to dine at the Town-hall, where you will please to fancy him sitting on the right of the chairman. The chairman is on his legs eulogising the honoured guest, who becomes, therefore, uneasy. The terms patriot—benefactor—liberator—produce an unpleasant effect upon the Duke. The speech proceeds, and the epithets rising in a climax, reach to the word saviour of his ——, at which word the Duke starts to his feet, and cuts off the rest of the sentence, thus:—"Gentlemen,—I beg to notice the remarks which have been made by your chairman, by calling your attention to the purpose for which we have met together in this room, namely, to benefit by our example and our *subscriptions* (emphasised) a most excellent institution, established for the relief of the sick poor in this county." Though a trifling incident, this is one which aptly and happily illustrates the habit of the Duke's eminently practical mind.

THE MODEL-ROOM, AT ST. PAUL'S CATHEDRAL.

Among the historical curiosities of St. Paul's is the [model of one of Wren's earlier designs for the cathedral, which is kept in a loft over the north-west chapel of the nave; on that account, known as the Model-room. Here, also, hang some of the colours which were formerly suspended beneath the great dome: some are entire, but others are in a tattered condition.

The Model we may, with some reason, suppose to have been Wren's favourite. It is in a very mutilated state, and is equally worthy of notice with the existing building itself, if not more so, as showing the great master's ingenuity in the higher branches of his art, which the executed fabric cannot be said to do; the general form and proportions being none of his, but settled, partly by Romish views, more by stubborn routine, and merely given him to construct and decorate as he best could.

This Model is of one storey only, and much more simple in all other respects than the present Cathedral.

THE MODEL-ROOM, ST. PAUL'S CATHEDRAL.

THE DUKE'S BIRTHPLACE.

(To the Editor of the Illustrated London News).

As the interest in all that relates to the Laurelled Dead still continues fresh and vigorous, and the minutest particular is not destitute of value, you will probably be desirous to correct an inaccuracy, into which the gentlemen met at the hotel probably led your Correspondent, quoted in publication of 16th ult., page 324, where he observes, "When the Marquis of Wellesley, then Earl of Mornington, was appointed to the government of India, the paternal estate and reversion of Dangan, were let on lease to a tenant, Mr. Roger O'Connor;" and that his devastations "were always understood there to be the cause of the Marquis Wellesley and the family parting from that estate never to return, even to look upon their birth-place."

It was *not* that illustrious statesman's birth-place, he having been born in Dublin, 20th June, 1760, the same year in which his father, second Baron Mornington, of the Kingdom of Ireland, was advanced to an earldom; at whose death, in 1781, the original wealth of the families of Colley and Wesley, *also as was*, had been found so much impaired, as to suggest to the noble and amiable, no less than firm and talented relict, the prudence of a removal to England with the numerous family left to her sole and judicious care; in some time subsequent to which the Castle and Demesne of Dangan were alienated; the purchaser having been, not Mr. Roger O'Connor, of questionable notoriety, but my late revered and lamented friend, Colonel Thomas Burrowes, of 3, Hill-street, Berkeley-square, London (who was united to the daughter of William, Archbishop of Tuam, and first Baron Decies, and father of the Baroness de Cetto); and whose son, holding similar military rank, at this moment retains the fee of that part of the manor: which a reference to the "particulars and conditions of sale" will show was not included in the 12,800 acres, comprising the sale by Robins, in 1816.

The late Colonel Burrowes, after for many years being a blessing to the estate and vicinity, by constant residence, and a princely and well-directed expenditure, took a final leave of Dangan, and fixed his location at Conway Castle, accepting Mr. Roger O'Connor as tenant, at a rent of £1400 per annum, in the year 1803; the turbulence and ingratitude of the misdirected peasantry, succeeding in this, as in many other instances, to effect a justifiable absenteeism: in the recoil they have severely suffered.

The cutting down of the noble timber; the sale of the splendid gates, and their tasteful adjuncts; and even, where a purchaser could be found, of the demesne wall by the yard; the Saints' Island, in the beautiful sheet of water which embellished the sylvan scene, becoming the retreat for an organised gang of mail-coach robbers (see trial at Trim for robbery of the Galway mail, and murder of the guard, on the night of 24 Oct., 1812, at Cappagh turnpike); the avenue being the place where the sub-agent of Colonel Burrowes, named Doyle, immediately after receiving the rent, muffled by a sack, tied to a tree, and *safely* robbed in the daylight; the ultimate draining of the lake; and burning of the Castle a few days after an insurance had been effected at the Royal Exchange Assurance Office; the self expatriation of Colonel Burrowes' tenant; and the present inhabitancy of the blackened ruins of Wellington's birthplace by the filthy family of a wretched herdsman; complete the records of Dangan, from that proud event to his death! Even the humble but industrious family, named Allen, who farmed the land, and had so far repaired a small part of the ruins as to make it a miserable and comfortless residence, and who so courteously entreated your Correspondent already alluded to, have been swept away in the stream of emigration. The entrance he described, is that next Trim; not the grand entrance, which is at the other extremity of the demesne, one mile from the once beautiful village of Summer Hill, and was very fine and of ample dimensions; its noble sweep is now disgraced by a whisky-house, built as if to intercept the view and drive likewise: while, of all that beloken tasteful grandeur throughout the splendid park and grounds, the crumbling remains of two obelisks, preserving yet some architectural beauty, and situate on judiciously-selected eminences, alone arrest the attention.

The manor of Dangan, independently of the castle and demesne, comprises 3093 acres, Irish plantation measure; that of Trim, 575; of Ballymaglosson, 820; of Mornington, 738; and the lordship of Moyare, 2398: total, 8224 Irish, which is above 13,000 English acres; and netted an income therefrom of £6670 only: a pretty good proof of the exaggerations as to rack-rents so plausibly paimed on English credulity.—I have the honour, &c.,

E. Tighe Gregory, D.D., LL.D.
Rector and Vicar of Kilmore, Meath.

Paget Priory, Peet Town, Kilcock,
Nov. 29, 1852.

Memorial to the Duke of Wellington.—At the Court of Aldermen held on Wednesday, the Lord Mayor stated that he had received a letter from Lord Derby, intimating, "that it is proposed to erect and endow by public subscription, a school or college, to bear the name of the Duke of Wellington, for the gratuitous, or nearly gratuitous, education of orphan children of indigent and meritorious officers of the army. The execution of the proposed plan, and the scale upon which it can be undertaken, must depend upon the degree of support given by the country to the object contemplated. It may be assumed that each capital sum subscribed of £1000, representing a permanent annuity of about £30, will provide for all time to come, exclusive of the expense of building, for the education of one child, and a considerable sum will be required for the erection of a building which shall be worthy of the proposed object. No payment will be required until the total sum subscribed shall amount to £100,000, when application is proposed to be made for vesting the capital in trustees, to be nominated in the first instance by her Majesty from among the subscribers, and to be be incorporated, as in the case of Harrow, Rugby, the Charter-house, and others. Donations may be made by instalments, spread over two, three, or four years. Her Majesty and his Royal Highness the Prince Albert have been pleased to signify their approval of the project, and to place their names at the head of the subscription list for the respective sums of £1000 and £500." The Lord Mayor said it was his intention to invite the merchants and bankers of the City of London to a meeting at the Mansion House, to consider what steps it would be most advisable to take upon the subject; and he also intended to ask the Court of Common Council what sum of money they would be desirous to contribute.

London Printed and Published at the Office, 198, Strand, in the Parish of St. Clement Danes, in the County of Middlesex, by William Little, 198, Strand, aforesaid.—Saturday, December 11, 1852.—Supplement.

THE ILLUSTRATED LONDON NEWS

No. 598.—VOL. XXI.] SATURDAY, DECEMBER 18, 1852. [SIXPENCE { WITH MUSIC SUPPLEMENT, GRATIS.

ART AND SCIENCE IN ENGLAND.

We desire this week to turn awhile from the political topics which have so long engrossed the public mind, and to devote some portion of our attention to a more graceful and grateful subject. In her Majesty's Speech, at the opening of the present session of Parliament, there was one paragraph of startling but agreeable novelty. It announced—we trust to a sympathetic and approving auditory—that a "comprehensive scheme for the advancement of the Fine Arts and of practical Science" would shortly be laid before the Legislature. That scheme, if not yet matured in all its details, has been sufficiently developed to be made matter of public criticism, and we hasten to devote to it something more than a mere casual notice.

The public has been so much accustomed to be treated only to half confidences in fiscal matters, and to have money extracted from it by little and little, as projects crept into daylight, that it is often startled if the full truth be told, and feels assured that, large though any new project may be, something still larger is kept out of view. But the Royal Commissioners have simply treated the public with that unreserved confidence which served their purpose so well in the Great Exhibition; and they have come boldly forward, telling everything they intend to do; and not even hiding the proportions of any part by keeping it in the background. Never has such a large and truly "comprehensive" scheme for the promotion of Science, Art, and Industry, been presented to the consideration of the country; and it is easy to see that the design has been sketched by the same master-hand which impressed universality and success upon the Exhibition. The whole is so harmoniously blended that the parts of which it consists lose magnitude, though not position in the result—a total absence of petting any special science or art being, perhaps, its most marked feature. This is precisely what a Prince should do, and no other person could blend contending and special interests, often exaggerated in importance by their advocates, into one common interest of the nation. The Royal author, however, comes before the nation well supported and aided by the most eminent politicians and philosophers of the age, who are associated with him in the Commission, and with the *prestige* of success in an undertaking which many men deemed to be far more chimerical than the present one. This alone would demand the respectful attention of the public; but its general merits leave no unwillingness on our part to enter fully into its discussion. We therefore proceed to sketch its general outline on the present occasion, having already given an abstract of the details upon which it is based.

Notwithstanding the general belief that in England little is done for Science and Art, it may be questioned whether there is any other nation which devotes so much money in the aggregate to their advancement, although certainly no adequate results flow from the expenditure. More than a quarter of a million is expended every year in the support of metropolitan institutions professing to encourage and develop them both in all their various ramifications; but the results are small. The reason for their want of success should be elicited. The Commissioners declare it to be "want of space and want of system." The want of space is certainly a crying evil in the metropolis, acting detrimentally in many more ways than those referred to by the Commissioners, and causing some of the more serious evils of our social existence. Our museums, galleries, and colleges were ushered into the world with fair hopes; but, having no room for their natural development, they were cramped and stunted in their proportions; and, becoming despairing and apathetic, they always failed to realise the objects of their founders. Our public museums actually bury their choicest collections in their damp cellars, having nowhere above ground to display them, while the capital expended in amassing them lies dead and useless, and the immense labour employed in procuring them remains hopelessly unproductive. After the immense sums expended in the enlargement of the British Museum, the nation is told that it is quite paralysed from want of space, for the library is eating up the collections, and the collections are devouring the library. Scarcely a year has passed since the public hailed with pleasure the opening of a

THE GREAT WESTERN HOTEL, PADDINGTON.—P. HARDWICK, R.A., ARCHITECT.—(SEE NEXT PAGE.)

Museum and School of Mines in Jermyn-street, and we are now told that its collections are rotting in cellars, that its space for instruction is absolutely insufficient, and that it must be immediately enlarged if success be expected to attend its operations. But the public, saved at the expenditure incurred in the twin Museum in Bloomsbury, resolutely button up their pockets and refuse further grants without due consideration—the more resolved on this point, as they hear rumours of fabulous sums being asked for the leases of premises contiguous to it. A national warehouse of pictures—gallery we cannot call it—has grown up to be a hideous excrescence on one of the finest open squares in the capital. Every Britannia blushes to introduce a foreigner to its unmeaning collection; which is not even divided into Schools of Art, and is, therefore, [illegible] for instructional purposes to all but [illegible].

But there is a greater evil than this, and that is *want of system*. Marlborough House, the Museum in Jermyn-street, and that in Bloomsbury, use or abuse the public money in buying [illegible] collections of pottery, glass, and metal-work. The Geological Society, in Somerset House, the British Museum, and the Linnæan Society make collections of fossils and minerals at great expense, and the Museum in Jermyn-street does the [illegible]. Several societies in the metropolis keep their distinct [illegible], and its secretaries, and clerks, paying separate rents and [illegible] incurred inconveniently about the metropolis, which a [illegible] would enable the public money, so [illegible] to them members, but so injudiciously squandered, to be devoted to the true objects of the advancement of the special sciences; while, at the same time, the labours of their cultivators would be rendered easier by ready means of consultation and reference. These are a few instances of those cited by the Commissioners in evidence of existing evils, and few will be inclined to doubt their force.

The Commissioners come boldly forward, and say to the public "Let us jointly provide the *space* and we will labour to furnish the *system*." So the Commissioners, with the aid of Parliament, have purchased a large property at Kensington, having frontages both to Kensington-road and to Brompton. Seventy acres are now the property of the public, while 150 acres may be [illegible] ample enough for the growth of [illegible] metropolis for many generations. [illegible] the National Gallery shall occupy [illegible] Hyde-park, while an [illegible] or Museum of Manufactures, is to [illegible] responding site fronting Brompton. [illegible] devoted to Societies, and the [illegible] for the departments of Practical Science and Practical Art. The special interests are invited to co-operate in carrying out the scheme; and, provided that they merely accept the common system so as to economise public powers and resources, they may do so in the most free and unfettered way. Already some of them, as the Royal Society, long [illegible] that the sacrifice of its individual comfort of some of their members may lead to a [illegible] advantage, protest against the site, but would gladly accept the advantages of the system in some hypothetical site of their own, which they are not likely to find. But it will be their own loss if they do not accept the scheme in its integrity; as they are at perfect liberty to do. The Commissioners inform the Government, that it would be better, and actually cheaper, to annul new museums and schools here, rather than attempt to enable up new additions, which, at the best, will only afford a temporary relief. The building of the British Museum is not larger than that required for its rapidly-growing library, and its valuable antiquarian and historical treasures. Its [illegible] could [illegible] removed to some place where they may be used as [illegible] instruction—for at present they are as dead as [illegible] to the public as the extinct animals which form so large a portion of them. The building in Jermyn-street is, perhaps, not larger than that property required for the geological survey of the kingdom, and for the collections of fossils forming the only evidences of that great national work; but if its industrial collections and its staff of instructors were removed to the great site at Kensington, they might be made useful to the public through the national collections generally. The schools of design are rapidly increasing in importance, but are now [illegible] provided with accommodation, that the lady artists receive instruction while sitting on the benches of the kitchen in Marlborough House. Government must provide immediate accommodation for these schools; but, by all means, let it be done on the site where the soil has will be cultivated in taste by the National Gallery, then worthy of the name, while they will learn the wants and resources of industry from the School of Manufactures, to which every collection is to lend its instructional power.

This last conception is the grand and leading one of the Commissioners. Museums are found to be of little use to any one but ready-formed philosophers, unless accompanied by oral instruction or practical demonstration. The principles of Art and Science are indeed the foundation-stones of an advanced manufacturing industry, and this fact in political philosophy has received the unanimous confirmation of a deliberate vote in the House of Commons. It is now felt, as a State necessity, that we must cultivate at home the intellectual element of manufacture, and not allow it to flourish [illegible] only on the Continent. Truly did the Chancellor of the Exchequer declare that the competition of industry is resolved into one of intellect; and that, unless we enabled our industrial population to acquire this element of power, our position as an industrial nation would be seriously affected. But, having adopted this as a principle of State, Government must go forward in its own perception of the truth, and not, as it has already done in the case of Art, even in advance of the public demand. Ignorance is not likely to ask for that knowledge what it knows not how to value. We do not mean that Government should found [illegible] museums and schools, but it must take steps to develop it, and secure the sympathies of the people, and of the private [illegible] in its behalf. The certain institution can only be [illegible] the [illegible] the surrounding wants of the manufacturing towns, and it is far more essential to develop the intellectual element in these, than to raise suddenly a metropolitan tree, which, having no roots branching into and deriving nourishment from the provinces, would have a very ephemeral existence, and be not worth the [illegible] of [illegible]. We are well aware that the Commissioners, and we trust the Government also, fully recognise the importance of the [illegible] [illegible] that of the [illegible] [illegible] [illegible]

IMPERIAL PARLIAMENT.

HOUSE OF LORDS.

FINANCIAL [illegible] Thursday moved for certain returns connected with [illegible] Income-tax. The Earl of DERBY had no objection to the returns, and earnestly hoped that the proceedings [illegible] would be conducted in a spirit of fairness. He regretted the observation, [illegible] Monmouth had made, that the Government had [illegible] an engagement that the [illegible] would not be opposed to the Budget. [illegible] Lords [illegible] by the supporters of the Government, he had no opposition to the proposition of [illegible] motion was then agreed to.

ROYAL COMMISSION. — The Royal Assent was on Thursday given by commission to the following Acts, viz. the Inclosure Bills, the Waste Lands Occupation Leases Act Amendment Bill, and the Common Inclosure Bill. The Lords Commissioners were the Lord Chancellor, the Earl of Lonsdale, and the Marquis of Salisbury.

ADJOURNMENT OF THE HOUSE.—The Earl of DERBY, on the same evening, gave notice that, in the event of the resolutions of the Government being sanctioned by the House of Commons that night, he would, the next day, move the adjournment of their Lordships' House for the Christmas recess. If, however, the resolutions were not agreed to by the other House on that night, he would consider another course to be necessary.

HOUSE OF COMMONS.

THE BUDGET.

The adjourned debate was resumed on Monday, by Mr. DAVISON, who said that the [illegible] constituted [illegible] of [illegible] and [illegible] and [illegible] of [illegible] [illegible] [illegible]

THE BRITISH CAMP, BEYOND THE KEI.

THE KAFFIR WAR.

The monthly summary of the Cape Town Mail, of Nov. 6 (received by the *Queen of the South*, on Monday) states that the war is not yet brought to a close. Operations continue against the Kaffirs, who, although dispersed and pursued, are neither reduced nor driven beyond the Kei. Early in October, General Catheart constructed a defensible post at Hog's Back, opposite the ruined military village of Auckland, in order to clear the Amatolas and the lasger of the rebel Uithaalder. Lieutenant Colonel Eyre had command of the patrol, which consisted of the 73rd Regiment, three companies of the 60th, Armstrong's Horse, Campbell's Fingoes, the Kat River Levy, two brigades of rockets, and a proportion of the Cape Mounted Rifles. They started on the 4th of October, and on the 5th surprised and burnt Uithaalder's lasger, without loss to the troops. This patrol has ever since been incessantly engaged in following up the enemy.

The chiefs decline the General's terms of unconditional surrender. Macomo and Sandilli, with the Gaika Kaffirs, find shelter in the forests which skirt the Amatolas: they are said to be destitute of ammunition, and their herds are fast decreasing.

Captain Hearns, of the 12th, has been killed while out with a detachment of that regiment, escorting a drove of contractor's cattle. Two of the 12th, and a civilian named Riley, were killed at the same time.

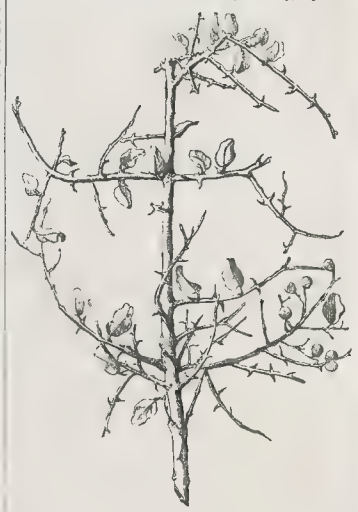
A spirited but unsuccessful effort has been made by Lieut. Whitmore, of the Cape Mounted Rifles, to capture the Chief Sandilli, who had with him fourteen or fifteen mounted Kaffirs and several on foot. Although possessing an inferior force, Lieut. Whitmore dashed on, and having divided the enemy, followed the lesser portion, Sandilli and one attendant, who, having the better horses, escaped into a wood.

On the 6 h of October, General Catheart had an interview with the chiefs of the Siambie tribes at Fort Murray. They consisted of Pato, Cobus Congo, Toise Umhala, Umyke, Jan Tzatzoe, and Siwani and his mother Nonebi, being all the Siambies except the rebel Seyolo. The Governor's address promised protection provided they did not allow any of the rebels who had taken shelter among their tribes to attack the Queen's subjects. These chiefs severally expressed their desire for peace, and a few days after Seyolo delivered himself up, and is now in safe custody.

A correspondent writes that the last *Graham's Town Journal* contains a proclamation offering, with certain exceptions, life to all the Hottentots, on condition of their surrendering themselves. It is understood that those in the Waterkloof are in great want, and anxious to come in. A Commando of the Trans-Vaal Boers, 406 men, has lately invaded the country of the Chief Sechelt; they took the principal town by storm, after six hours' hard fighting, and left four farmers and 300 of Sechelt's warriors dead on the field. The cause of this expedition is unknown.

We are indebted to two Correspondents for the accompanying Illustrations. The "British Camp" is from a sketch by B. Hedley, Esq.

MAP OF THE SEAT OF THE KAFFIR WAR.



'THE WACHE-EM-BETJE, OR WAIT-A-BIT," FROM THE CAPE OF GOOD HOPE

(To the Editor of the ILLUSTRATED LONDON NEWS.)

SIR,—As I think a correct knowledge of all that relates to South African affairs is now absolutely necessary, permit me to correct an error in the account of the "Kaffir bush," which appeared in your impression of Saturday, January 31st last.

The above name I have never heard used: it is known in the colony as the Thorn-tree (*Groote-doorn-boom*); the wood is hard and dense, and is rarely used, except as fuel; the bark is used for tanning; the tree also produces quantities of fine gum, which is largely exported. On the frontier it usually grows either in single trees or in small bushy clumps.

The *Wache-em-betje*, or "Wait-a-bit," is a distinct kind, growing something like the English bramble; the thorns are exactly like fish-hooks, but without the barb; when these catch the clothes they must be removed by the hand; hence the name "Wait-a-bit." The thorn of the mimosa (*Groote-doorn-boom*) being at right angles to the stem on which it grows, inflicts a severe scratch.

The bush, which you state to be "an impenetrable barrier to regular troops, and an excellent cover to the Kaffirs," is composed principally of numerous species of euphorbia, cactus, aloe, and similar plants, with *bourboontjes*, *guoire*, &c.: to burn such a bush would be impossible.

I am, &c., THEK BOER.

I beg to add that I have lived since 1843 on the eastern frontier of the Cape colony, and am intimately acquainted with every part of it, from the country of the emigrant Boers to the sea, and from the George district to the Umzimvooboo.

THE CITY OF SALISBURY, DURING THE RECENT FLOODS.

THE FLOODS AT SALISBURY.

In our Journal of last week we recorded and illustrated Fisherton-street during the recent inundations. We now engrave the interesting old city, as it appeared surrounded with the floods. Salisbury is described in the *Salisbury Journal* of Nov. 27, as being in the centre of an extensive lake, and, viewed from any of the surrounding hills, the spectator would fancy that the city itself had been transformed into a sort of inland Venice; but that rows of willows and isolated haystacks lift themselves drearily out of the circumjacent waters, and indicate the existence of meadow-land underneath. In the nave of the Cathedral, the water oozed up through the pavement, and formed large pools; while the south-western portion of the Close in several places were under water. The chapter-house of the Cathedral was also flooded, and the water approached upon the Palace grounds. Northward, in the direction of Woodford; southward as far as Downton, and, probably, far beyond; and westward, as far as Burcombe, the valleys wore the same gloomy aspect, and the inhabitants of low-lying cottages looked despairingly at the spreading waters at their feet, to the lowering sky over head, vainly hoping for a cessation of the extraordinary fall of rain. In the *Salisbury Journal* of the 4th, it is stated:—"Bad as this season has been, it will be remembered by many of our older readers that the winter of 1809 was much worse. About the middle of January, in that year, a deep snow rapidly melted, and the rivers overflowed their banks. From that time, to the end of February, there was continual rain—not a single fine day intervening. For nearly six weeks service was not performed in the Cathedral. This dreadful winter was followed by a wet harvest. The first week in August there was a tremendous thunderstorm, which was succeeded by heavy rains till the beginning of October, by which the corn was most seriously damaged. In the summers of 1793, 1799, and 1816, more than half the corn was destroyed by the rains. The summer of 1797 was a very wet one, and the corn was very much injured. The winter of 1827-28 was a remarkably wet one, the springs rising to an unprecedented height. This winter was followed by a very wet summer. Let us hope that our next summer may be of a different description." It may be interesting to add, that the city of Salisbury, before the alteration in its boundaries, occupied part of a peninsula formed by the river Avon on the west and south, and by the river Bourne on the east, the village of Fisherton Anger which we engraved last week (now included in the municipal and parliamentary limits), is on the west side of the Avon, at the junction with that river of the united stream of the Wily and the Nadder, which meet at Bemerton, two miles west of their junction with the Avon. The principal part of the city lies immediately to the north of the extensive Cath dral-close; and the principal streets have a stream of water from the rivers conducted through them by canals lined with brick. These inlets, and the city being surrounded with rivers, render the city liable to frequent floods, when the streams are swollen by heavy rains.

The Cathedral of Salisbury is one of the most beautiful in England; the spire and tower are 404 feet in height. In the city is an ancient market-cross, now in course of restoration; and we gather from the proceedings at the recent Cheesemarket anniversary dinner, that it is intended to erect a new Market-house.

The floods still continue. Wales, especially, has been severely visited. A Correspondent of the *Times*, writing on Monday from Carnarvon, says:—"The almost incessant rains which for the last seven or eight weeks have prevailed in this locality, gradually increased the water in the rivers and streams which flow into the Menai Straits; but nothing serious was apprehended until Sunday morning last, when, after a heavy fall during the previous night, the Cadnant river began to overflow its banks. The Cadnant is ordinarily a small rivulet, which, at its source, about six miles up the country, measures but a few inches in breadth. It is fed by contributory streams, and runs into a reservoir which supplies the town with water. Its finds its way thence down the valley, under a portion of the town, into the Straits. About 10 o'clock it became apparent that the low arches erected over the course of the river near its entry into the town were insufficient to contain the rapidly increasing body of water that was poured down into them. The consequence was, that the water soon spread itself over a wide extent of ground on each side—a high wall forming a barrier against its progress towards the town. In about an hour the water had risen to the top of the wall, and immediately afterwards the entire bulwark gave way under the pressure with a tremendous crash. Down came the resistless torrent, sweeping all before it in its course, and inundating some scores of dwelling-houses which stood on the banks of the river. The other low parts of the town were similarly situated, the water being in several places about three yards deep. At night the water had entirely subsided; and we are glad to say that no fatal accident occurred. In addition to this, the estuaries of the Seiont and Gwyrfai, which respectively flow from the Llanberis and Quellyn lakes, overflowed. The Morfa, a marshy ground on the banks of the Seiont, was one sheet of water; and the force with which it swept into the harbour may be estimated when it is stated that the masonry of one corner of the pier was carried away. A bridge on the Gwyrfai, upwards of 200 years old, was destroyed, and the fields on each side flooded to a great extent. These floods are the most extensive known here for many years."

Nottingham has not yet recovered her former position. In the town itself great disease prevails in those parts which have most felt the effects of the recent inundations; and a Correspondent, writing from that neighbourhood on Sunday, says:—"The weather in this district has been again very stormy during the week. Considerable quantities of rain fell on Tuesday, Thursday, and Friday. At Mansfield many of the coal-pits are still unfit to work. The colliers remain at a stand on account of the immense body of water which still continues to flow into the pits, which, although the pumps are employed night and day, it seems impossible to reduce. In this district the protracted rains prevent ploughing and the getting up of agricultural produce, such as turnips, mangel wurtzel, &c.—operations which are highly important to the farmer at this advanced period of the year. In Nottingham the continued moist and unhealthy weather is favourable to the continuance of the fever. Perhaps the greatest amount of damage done in the county by the floods is at the village of Dunham, situate near the Trent, where the embankments which surround the village gave way, and the whole district was overflowed.

The *Lincoln Mercury* says:—"The low lands about Lincoln still continue covered with water, and when the house will be clear of it, it is impossible to predict. The value of the property that has been flooded must be considerably deteriorated."

At Shields, on Sunday, the floods led to some loss of life, and a considerable loss of property. About nine o'clock at night, owing to a great fresh in the river, the consequence of the late heavy continued rain, the third tier of ships moored above the low lights broke adrift in the harbour, when a scene followed which it is impossible adequately to describe. About forty vessels were pitched from their moorings, amongst which were steam tugs and vessels of various descriptions, some driven athwart hawse each other, some carried out to the entrance of the harbour, some striking on the ground and sinking; whilst the noise of the crews on board, and the cries for help of many in the darkness of the night, with the noise of vessel striking against vessel, was most appalling and terrific, and, as a matter of course, the damage sustained by the shipping is immense. Two persons are said to have been drowned belonging to the *Jane and Elizabeth*, of that port, and other seamen are reported to be missing.

Last Sunday was also a most disastrous day for Newcastle-on-Tyne. On that day an extraordinarily high tide occurred in the Tyne, owing to the excessive land floods, occasioned by the incessant rains in the west towards Cumberland, throughout the extensive country drained by the North and South Tyne, the Team, the Derwent, and other tributaries. Newcastle quay was completely under water on Sunday evening, several cellars and underground warehouses were flooded, and large quantities of timber were floated down the river from the adjoining shores. At Scotswood, a village three miles above Newcastle, the water entered two large paper mills, and did great damage, spoiling several tons of paper. On the opposite shore, at Blaydon and Derwenthaugh, the fires of the cinder ovens were extinguished. A row of cottages at Scotswood were flooded nearly up to the ceiling. The water in the Tyne has not been so high during the last twenty years. Further west, some damage was done to the Newcastle and Carlisle Railway; a land slip took place near the Riding Mill station, in consequence of which the rails were displaced, and the train which was due at Newcastle at eight o'clock on Sunday evening was detained several hours.

On Monday it was discovered that the stupendous arch belonging to the South-Western Railway, which spans the Westminster-road near the Marshgate, had sunk, owing to the unusual and continued rain. Men were employed in placing strong girders to prevent any serious accident from occurring.

HOUSE OF COMMONS.—THE BUDGET.

(Continued from page 535.)

yet from more party motives exempted the landed proprietors from bearing any share in the burden. He repudiated the charge of being influenced by any party motives, while he declared that Ireland had been deserted, betrayed, and assailed in the present Budget.

Mr. PEACOCK while declaring himself generally in favour of the Government, sung steel to the Chancellor of the Exchequer the propriety of withdrawing his proposition for the extension of the Income-tax to Ireland; for he might rely upon it that the small sum that would be obtained from it in Ireland would be dearly purchased by the opposition which he would encounter. He, however, ought that there ought to be a thorough investigation into the present licensing system before the Government proposed a reduction in the Malt-tax.

Sir F. BARING reiterated the assertion that the proposed extension of the Income-tax to funded property was a breach of faith towards the public creditor. He did not think it wise to strain direct taxation too far; for, in attempting to obtain too much, they ran the risk of losing what they already had gained. The right hon. gentleman then proceeded to review each of the propositions of the Government; and concluded by saying that, on the whole, he must declare his opposition to the financial scheme of the Chancellor of the Exchequer.

The CHANCELLOR of the EXCHEQUER commenced the defence of his propositions by explaining the reason why he had added to his estimates £400,000 from the Public Works Loan Fund. The commission had been issued when money was scarce and labour abundant. Now that these circumstances were completely reversed, the commission should be abolished. From 1824 to 1850, disbursements had been made under this head, amounting to about £700,000, which had been most unseemly spent. To dispose of this, and to put an end to the loan, was, therefore, a question which deserved the attention of a Chancellor of the Exchequer, and this appeared to him to be the best mode of disposing of it permanently. He would show them upon what authority he had followed this course. In 1822 there was a select committee appointed to consider the most efficient mode of keeping the public accounts; to his report we were indebted for almost all the improvements that had been subsequently adopted. That select committee recommended that all advances should be entered upon the account of income and expenditure; and that, whenever those sums were stopped, the account should be closed. The second arrangement of his financial statement, which had been made by the hon. member for Hilsdon, was the grievous mistake which he (the Chancellor) had made in estimating the debt over that sum which was from the semi-receal of the Malt tax. He had estimated it at £1,700 000. The right hon. gentleman calculated it at £2,500 000. In the first estimate no calculation had been allowed for increased consumption, for this he allowed £200 000; and having shown that his original estimate was strictly correct, it now appeared that the decrease was d altogether be only £1,500,000. The right hon. gentleman (Sir Charles Wood) objected to the view which he had taken of the consequences of the Kaffir war. The war, he still believed, was virtually at an end; the Commissariat were closing their accounts; and he had the best authority for saying that the Amatolas, defeated and dispirited, unable to make a stand against our forces, without territory, food, or security, took to the bush and were dying there. The right hon. member for the University of Oxford had objected to his having made no allowance for loss to the revenue by allowing sugar to be refined in bond. But he had not shown that a loss would take place; and, for his part, he did not anticipate anything of the sort. The next point of the speech of the right hon. gentleman made the widest accusation against him of imposing the House-tax for the purpose of repealing the Malt-tax, and thus benefiting the agricultural classes. This was, perhaps, a good party cry, which, probably, he might have used himself had he been in Opposition (Laughter). This was not, however, the case. Gentlemen opposite had themselves admitted that his reduction of the Malt-tax would diminish the price of production, and would leave the cost of beer to the consumer. He had advocated it as a necessary part of the system of unrestricted competition which had been adopted as the policy of the country. He had on all hands been accused of pushing direct taxation to its further extremes. He could not forget that the right hon. gentleman had himself come down to that House with a proposition in his pocket for doubling the Property and Income-tax (Hear, hear). But he withdrew it at the first breath of opposition, and next day announced that he could get on without it. And now, the right hon. gentleman told him in language hardly Parliamentary, that he did not know his business. Though the right hon. gentleman had said that he did not know his business, that did not prove that the House must decide that. The right hon. gentleman had to learn that: he had to learn other things: he had to learn that pain once was not sarcasm, and that insolence was not argument (Cheers, and loud cries of "Oh!"). The right hon. member for Carlisle had made a most atheistic appeal to the House in favour of that class of persons who had an income of £150 a year. This sympathy was unnecessary, for there was no class who had hitherto been subjected so lightly to the pressure of taxation. He thought they had even escaped better than the really working classes. The Chancellor of the Exchequer then adverted to the observations made by the hon. member for Kidderminster (Mr. Lowe) regarding emigration; but in his remarks, that hon. and learned gentleman had evidently forgotten what he had written of the "unrestrained progressive power of the English people" (Loud laughter). For his own part he thought that this emigration now going on from Europe would be more likely to stimulate than to check the increase of population. In the subject of retrenchment and increased efficiency in public offices, he gave it as his opinion that great retrenchments might be made in consequence of increased efficiency. This could not be brought about in its full extent till 1854-5; but at that time it would be the duty of the House of Commons, if they did not find the public service more efficient and much less costly than it did at present, to do it. He had had advice given him; he had been told to do this and that; but Pitt had done so; others had done so (Laughter). He did not aspire to the fame of some Chancellors, and he would not desire to the degradation of others: he remembered a Budget renewed, withdrawn, and withdrawn again (Laughter). What was the consequence? that he was obliged to remodel the compromise of the House-tax and Window-tax proposed in 1848. He knew what he had to oppose that night. He had to face a coalition (Hear, hear). That coalition might be successful; but coalitions had always found their triumph to be brief. He knew that England did not love coalitions. He appealed from that coalition (Loud cheers) to the public opinion which governed this country, which controlled even the decrees of Parliament itself, and before which even our most ancient and august institutions were as the baseless fabric of a vision (Tremendous cheers).

Mr. GLADSTONE felt that the speech of the Chancellor of the Exchequer called for a reply, and at the moment. There were things which he, too, had to say. Among others, the reason why he should not have spoken as he did upon the subject of emigration. He told the right hon. gentleman that the license of language he had used (Sensation), the phrases he had applied (Cheers and counter cheers) to the characters of men (Uproar) whose public career (Interruption)—he told the right hon. gentleman that he was not entitled to charge with insolence members of that House (Hear)—to say to the right hon. member for Carlisle that he respected but did not regard him. Much as he had already learned, the right hon. gentleman had yet to earn the limits of moderation, of discretion, and temperance, that ought to restrain the conduct and language of every member of that House; disregard of which was an offence in the meanest among them, and which was tenfold more so when committed by the leader of the House of Commons (Loud cheers). The right hon. gentleman then proceeded to show that the proposed scheme would operate most detrimentally upon all classes, and even upon the Chancellor's favourites—the yeomen and clergymen of England.

The Committee then divided, when there appeared—

For the resolution	286
Against it	305
Majority against the Government	19

On the motion of the CHANCELLOR of the EXCHEQUER the Chairman then reported progress, and the House adjourned at a quarter to four o'clock on Friday morning till Monday next.

THE CASE OF MR. BENJAMIN BOYD.—In answer to Mr. Milnes, Lord STANLEY, on Monday, stated that a despatch had been sent in June last to Mr. Crampton, the British Minister in the United States, asking him to obtain the co-operation of the American Government. This had been done; but, as yet, no information had been obtained.

ACCIDENTS ON RAILWAYS.—In answer to Mr. H. Brown, Mr. HENLEY said, that the subject of enforcing regulations for the safety of railway passengers, had been referred to the Board of Commerce, and that Government would do nothing till that committee had made its report. Mr. H. Brown then gave notice that after the recess he would bring the subject before the House.

SMITHFIELD MARKET.—In answer to Mr. Moss Mr. Forster, Mr. WALPOLE said, the City had given him notice in the last summer that they were prepared to construct a new market, and that they had chosen a site in Copenhagen-fields, and his approbation had been given to that site; but, until after the lapse of eighteen months from that time, he had no power to interfere in the mode in which the City proposed to carry out their plan.

THE TENANT COMPENSATION IRELAND BILL was read a third time on Wednesday.

A discussion ensued, in which Sir J. V. Shelley, Lord Naas, Viscount Monk, Messrs T. D. Fitzgerald, Lucas, H. Drummond, Whiteside, Walpole, and V. Scully took part.

The Stamp-duty on Patents of Inventions Bill was on Thursday read a third time and passed.

The Countess of Limerick gave birth to a son, on Sunday last, at Trinity Manor, Jersey.

The Viscountess Downe gave birth to a son, on Monday last, at Wykeham. Her Ladyship, with the infant, is going on favourably.

CALENDAR FOR THE WEEK.

SUNDAY, December 19.—Fourth Sunday in Advent.
MONDAY, 20.—Gray born, 1716.
TUESDAY, 21.—St. Thomas.
WEDNESDAY, 22.—Shortest Day. Holcroft born, 1744.
THURSDAY, 23.—Addison died, 1719.
FRIDAY, 24.—Christmas Eve. Robin Hood died, 1247.
SATURDAY, 25.—CHRISTMAS DAY. Nativity of Our Saviour.

TIMES OF HIGH WATER AT LONDON-BRIDGE, FOR THE WEEK ENDING DECEMBER 25, 1852.

TO CORRESPONDENTS.

LOO.—Persons from the country may get married in London at any time under the special license of the Archbishop of Canterbury. Without that the marriage must take place upon banns at the parish church of one or both of the parties; or upon license at any church in the parish of which one of the parties has abided for fifteen days previous to the ceremony, or upon the registrar's license or certificate, which requires a seven days' residence of one of the parties in the registrar's district, and a lapse of twenty-one days in case of a certificate, or seven days in case of a license, between the notice to the registrar and the actual marriage.

A J.—Sarah Jennys, who became Duchess of Marlborough, was daughter of Richard Jennys, Esq., of Sandridge, in Herts, who was son of St. John Jennys, M.P. for St. Albans, made Knight of the Bath, at the creation of Charles Prince of Wales, and who descended from the family of Jennys, of Islington, in Middlesex, the representative of which, Sir Roger Jennys, purchased the estate of Bottisham, in Cambridgeshire. We cannot trace any details connected with the office of Ranger in the Jennys pedigree. Refer to Beaton's "Political Index" for particulars of the grand falconers.

HORSHAM.—The payment of One Shilling at the Prerogative Office, Doctors Commons, will obtain the perusal of a Will.

A CONSTANT SUBSCRIBER FROM INDIA.—ARIEL of Tempest: "Arg a bend between six martlets sa. *Crest*: a Griffin's head erased per pale arg and sa, beaked gu. *Motto*: Labore ad thone Syndo."

A SUBSCRIBER, Glastonbury.—A whale is of the class Mammalia.

J. H.—We have not room.

DELTA.—Weiss, surgical instrument-maker, Strand.

WELLINGTON DOUBLE NUMBERS OF THE ILLUSTRATED LONDON NEWS.

Subscribers are respectfully informed that all the WELLINGTON DOUBLE NUMBERS of the ILLUSTRATED LONDON NEWS have been RE PRINTED, and may be had, by order, of any News-agent, in Town or Country. Price ONE SHILLING each, with the LARGE GRATUITOUS SUPPLEMENTS.

The SHEET ENGRAVINGS may all be folded so as to bind up with the Volume.

Another SPLENDID LARGE-SHEET ENGRAVING, representing the WHOLE of the FUNERAL PROCESSION, is in preparation. It will be ENGRAVED in the first style of Art, and will be presented (GRATIS) to all regular Subscribers. The date of Publication will be duly announced.

ANNUAL CHRISTMAS SUPPLEMENT OF THE ILLUSTRATED LONDON NEWS.

NEXT SATURDAY (Christmas-day) will be issued the Annual CHRISTMAS SUPPLEMENT of the ILLUSTRATED LONDON NEWS, containing the following fine ENGRAVINGS:—

THE DREAM OF THE THREE HOLY KINGS. By DEGAS.
CHRISTMAS CEREMONY IN EXETER CATHEDRAL.
THE STAR OF BETHLEHEM.
THE ANNUNCIATION AND TRIUMPH OF CHRISTIANITY. By FUHRICH.
A WINTER SCENE: THE FAGGOT GATHERERS. By BIRKET FOSTER.
"THE ELFIN OF HAZELNOOK." Drawn by DODGSON.
"THE STORY OF A COLUMBINE." With Two Illustrations by PHIZ.
THE NEW GAME OF REGATTA.
"THE OLD AND THE NEW YEAR." With an Illustration by JOHN GILBERT.
PLUM-PUDDING: A DREAM OF CHRISTMAS. Twelve Illustrations.

The Literary Matter, besides the Story of "COLUMBINE," by Angus B. Reach, and the "ELFIN OF HAZELNOOK," will include

"THE UNPARDONABLE SIN," by Nathaniel Hawthorn;
"CHRISTMAS SUPERSTITIONS OF SCARBA," by John Oxenford;
"THE TRIUMPH OF LOVE," and "THE TWO LEGENDAS TREE," by Mrs. T. K. Hervey;
And a "NEW SONG" written by CHARLES MACKAY, and composed and arranged for four voices by SIR H. R. BISHOP: together with other interesting articles.

The accompanying Number will contain

And all the NEWS of the Week.

PRICE of the TWO NUMBERS, ONE SHILLING.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, DECEMBER 18, 1852.

THE Ministers have been defeated on the Budget by a majority of 305 against 286. At the time at which we write, it is impossible to state whether they will accept this defeat in all its significancy, and resign office; or, whether they will follow the advice of Sir Charles Wood: "take back their Budget and amend it," in comformity with the decision of the House of Commons. It seems, however, to be generally considered that the defeat is final; and that, in reality, the opinion of the House has been expressed upon the whole principle of the Budget, though nominally upon one portion of it only; and that, as a necessary consequence the Ministers must resign.

The result as to Mr. Disraeli's Budget was clearly foreseen. We stated our opinion last week, that it would never be allowed to pass. Every day added fresh strength to the conviction entertained on all sides, that, so unwise a measure as the remission of the Malt tax, and so unwise an increase of burdens as a doubled House-tax and an extended Income-tax, would not escape the ordeal of a Parliamentary division, whenever it became convenient to put it to that test. A Budget which was condemned by Mr. Goulburn and the old Conservative party; by Sir James Graham, Mr. Gladstone, and the new Conservative, or Peel party; by Lord John Russell, Sir Charles Wood, and the Whig party; by Mr. Cobden, Mr. Bernal Osborne, and the Free-trade and Liberal party, and by all the minor chiefs of the smaller parties into which the House is divided and sub-divided; and supported only by a Ministerial phalanx that is daily becoming more unsatisfied with the Financial Minister, was evidently doomed. At one time the debates upon the subject threatened to be complicated and tedious, if not contradictory and unsatisfactory; but gradually, as if by common consent, attention was fixed upon the very nucleus, kernel, pith, and essence of the whole project—the reduction of half the Malt-tax, and the consequent sacrifice of two millions and a half of revenue.

The Malt-tax, like all other taxes, is an evil; but it is a fair subject of inquiry, whether it is by any means the most unpopular of our taxes; and whether, as long as the national honour and faith, and the public credit, are considered—as they happily are at the present time—of the very highest importance and urgency to maintain untarnished and unimpaired, any tax much less oppressive can be found? Those who have most reason to complain of it, the hard-working population, who consume beer—a class, including navvies and miners and coal-heavers, and all sorts of mechanics and handicraftsmen, as well as farmers and farm-labourers—say very little upon the subject, and have never yet joined in any agitation, or even remonstrance, to force the subject on the attention of the Legislature. In fact the Malt-tax is not unpopular, and thousands of people who drink malt liquor, as well as many who do not, are of opinion that a tax so very productive, and at the same time so lightly felt, would not easily be devised. Yet it is very generally conceded, that, if the State could spare so much money as five millions, it would be matter for congratulation to see it, as well as the whole Excise system, swept away. At present, however, this is simply impossible. But the creation of a deficit of two and a half millions—leaving half the Malt-tax still in existence, with all its cumbrous machinery and vexatious impediments—has been felt to be a very gratuitous, if not reckless, waste of the public resources. But when it becomes necessary—after the deficit be made, to look around for a substitute; and when the Minister can devise none better than the duplication of one direct tax, and the extension of another to classes hitherto exempt from both, we must confess that we are not in the least surprised at the Minister's unpopularity, and at the preference shown by Parliament and by the tax-paying public for the *status quo*.

At the same time, public writers and public speakers who entertain different views, should not do injustice to that large class of persons, the ten-pound householders, or accuse them of "ignorant impatience of taxation," or of want of honesty or of patriotism in the resistance which they have offered. If there were a deficit in the national revenues, caused by natural circumstances and not by a Ministerial act, we are certain that this class, humble as its individual members may be, but powerful in the aggregate, would not object to bear a fair share of the common burden. There is no reason why, if a £20 house pay a tax, a £10 house should not; but there are very strong reasons why a large and struggling portion of the community should not be subjected to two several items of direct taxation—a House-tax and an Income-tax, as the price for a diminished liability to an indirect tax, which at any moment any portion of them might be relieved of, by joining a temperance society. By the vote of Friday morning, Parliament emphatically decided that the doubtful privilege of obtaining cheaper beer would cost too much at the valuation which Mr. Disraeli put upon it; and that the £10 householders, as well as the owners of property worth £50 a year, and the earners of income worth from £100 to £149 19s. 11d., had justice on their side in objecting to the proposed arrangement. The immediate, as well as more remote, results of the decision, upon the Ministry, upon parties, and upon the public, remain to be seen.

We are informed, on what we believe to be competent authority, that the Council of the University College of London has just declined the offer of a gentleman to fill the vacant chair of Oriental languages, on the ground that he is not as conversant with Greek and Latin as with the languages which he professes to be able to teach. Although he has spent the greater part of, if not all, his life in acquiring Arabic, Turkish, and Persian, by a residence in the countries where those languages are spoken, it appears that, because he is not a member of one of the English colleges, nor as intimate with the dead languages of Greece and Italy as he is with the living languages of the East, he is to be held disqualified for the office. When it is considered how important it is that her Majesty's Government should secure the services of persons who, on being entrusted with official situations in India, should be able to communicate with the natives without the intermedium of translators, we cannot but trust that this lamentable indifference to the interests of our Eastern dominions is only temporary. We live in a practical age, and require practical men for the subordinate as well as for the higher functions of government in our immense possessions.

In a lecture read before the Royal Asiatic Society, last January, Professor Wilson ably advocated the merits of the study of Oriental Literature. "It is not to be denied (he said) that the antiquities and literature of the nations of the East have hitherto failed to receive that attention from the public which might have been expected, if not from their own inherent interest, yet from our long and intimate intercourse with the most important countries of Asia, and the political identification of India and Great Britain. Various publications (texts and translations) of Arabic works, especially on grammar and lexicology, have been printed on the Continent, which prove the great interest taken everywhere, EXCEPT IN ENGLAND, in Oriental literature. It cannot but be thought somewhat extraordinary that, so long and so intimately as this country has been connected politically with the Ottoman Empire, such a total neglect should have been exhibited of the Turkish language and literature. We have been hitherto dependent, even for personal communication with the officers of the Government, to Greek or Syrian Dragomans, or more correctly Turjamans, or translators; and, although some few years since a move was made by the British Government to provide a less exceptional class of qualified interpreters, the project has been but imperfectly carried out, and the most confidential communications are still at the mercy of foreigners, who are not even British subjects." Surely such a state of things should not be suffered to continue.

THE COURT.

OSBORNE.

The Earl of Derby and Lord Raglan have been the only guests at the Royal table since the departure of the French Ambassador on Saturday last. The Premier arrived on Saturday and remained till Monday; on which day Lord Raglan reached Osborne, his Lordship's visit extending until Wednesday.

On Sunday her Majesty and his Royal Highness Prince Albert, accompanied by the Prince of Wales, the Princess Royal, and the Princess Alice, and attended by the ladies and gentlemen of the Court, attended divine service at the parish church of Whippingham. The Earl of Derby also attended the service. The Rev. Mr. Tracy officiated.

The inclemency of the weather during the week has generally prevented the Royal family from taking their accustomed riding and walking exercise.

The Court will return to Windsor Castle on Thursday next.

Her Royal Highness the Duchess of Kent continues her residence at Frogmore, and, we are happy to add, is in the enjoyment of excellent health. Her Royal Highness takes carriage airings whenever the weather is favourable.

The Countess de Neuilly, the ex-Queen of the French, visited her Royal Highness the Duchess of Gloucester, at Gloucester-house, on Saturday last.

The Duke and Duchess of Northumberland entertained a select party at dinner on Wednesday, at Northumberland-house. Later in the evening the Duchess received a small circle, among whom were Lord and Lady Lovaine, Lord Polwarth, Lady Agnes Buller, Sir Philips Hornby and the Misses Hornby, Sir Walter Riddell, Sir William Gage, Sir Harry and Lady Dillon, Sir Edward Parker, Sir Thomas Hastings; Colonel North, M.P., and the Baroness North; Admiral Bowles and Miss Bowles, &c.

LITERATURE.

THE LIFE OF FRANCESCO SFORZA, DUKE OF MILAN. By WILLIAM PULLAN and RICHARD HEATH, M.P. Blackwood.

It is not often that the critic has so agreeable a task confided to him as the perusal and notice of a work like that which now lies before us; and we must, in the first place, congratulate the author upon the admirable judgment by which he was guided in his selection of a subject for his pen. Francesco Sforza was undoubtedly one of the most remarkable men of his time; a fact which not even his calumniators have been able to refute; but it was left to the conscientious research and patient and unprejudiced investigation of Mr. Urquhart to present him to posterity in his integral greatness. Strike a name in any age, the architect of his own extraordinary fortunes, the subject of distrust to many of his contemporaries, and of envy to all, the memory of Francesco Sforza has hitherto been overlaid with calumny, emanating from the jealousy of some, and the ignorance of others. In the volume under review, strict justice has been done; while, at the same time, the author has not been betrayed into the error of exaggerating the merits of the man, or of seeking to screen his shortcomings. At once a gentleman and a scholar, Mr. Urquhart has given ample proof of his pen not completely for the task which he undertook, and an intimate knowledge, not only of the personal career of Sforza himself, but also of the age and country in which he flourished. Disregarding the prejudices of the present day, Mr. Urquhart has written Italy, the Italians, and Italian politics, as they existed at the period of Sforza's extraordinary struggle and success, at once lucidly and truthfully No hollow cant nor factitious sentiment defaces his pages; there are no clap-traps to ensnare the applause of party, no puerile attempts to secure a transient popularity; but, with manly independence of spirit, he has redeemed his purpose, which he declares to have been "to illustrate the state of the Italian peninsula, and the genius of its inhabitants in the middle ages, by writing the life and times of the remarkable man who played so important a part in the great drama of her history." The fortunes of Francesco Sforza, on which he ages the main interest of the work, are narrated with all the exciting charm of romance, and with all the authority of truth; and, in this instance, it may indeed be said that "truth is stranger than fiction." We would, however, particularly direct the attention of the reader to the chapter on Italian warfare, which is eminently valuable from the circumstance that it will enable him to comprehend the ease with which the ordinary battles were fought, and the wholesale length and breadth of Italy; for not even among the native historians of that land, whose "fatal gift of beauty" was the cause of her misfortunes, shall we succeed in finding so clear, comprehensive, and candid an exposition of that decadence of patriotism, and that corruption of social habitudes, which degraded its citizens into hireling soldiers, and its nobles into robber chiefs. The sketch of the elder Sforza is a life-like picture, full of interest which awakens all our sympathies for the astute and sturdy peasant, who, by the force of his character, left his humble and peaceful home, and, exchanging the ploughshare for the sword, hewed out, by the strength of his stalwart arm and his iron will, that perilous but honourable path which led to the steps of a throne, to be superseded by his descendants; until we at length reach the last quarrel of his fitful existence, where we find him in the character of a military leader, flushed with success, and eager for further conquest, stooping from his saddle, while fording the river Pesaura, to recover an unhorsed and drowning follower, himself losing his seat, and, heavily armed as he was, disappearing in his turn beneath the waves, which were heaving and tossing under the influence of a recent storm in the Adriatic.

The horse (parsons can smile with us here), freed from his burden, swam to the bank. The warrior was unable to struggle with the billows. Two were his last extended hands seen raised above the waters, clasped together, as if he were imploring assistance, though any words that he may have attempted to utter were drowned by the roar of the elements; after which he sank to rise no more, and his body was never afterwards found.

And well worthy of such a sire was his brave son, the future Duke of Milan; whose lofty ambition, despite his lowly and equivocal birth, Francesco Sforza was destined not only to see the offspring of a peasant, but also the illegitimate child of one Lucia di Torunza, the mistress of his father), extraordinary genius, and indomitable will, bore him up against all opposition, until he found himself surrounded by the ducal crown of Milan. Of the remarkable military Mr. Urquhart says:—

It will not, I think, be denied that he was endowed with all the great and most of the good qualities that generally fall to the lot of mankind. His character was early developed and displayed by the various circumstances in which he was placed. The tact by which he won his way to fame before his marriage with Bianca Maria (daughter of Filippo Maria Visconti, Duke of Milan); the perseverance with which he struggled almost adversity; the manner that then void the death of his father-in-law; the great military skill and political sagacity by which he succeeded, notwithstanding false friends and dangerous enemies, in placing himself on the throne of Milan; the firmness by which he secured himself, combined with the moderation which he exhibited in his new position; the policy by which, after having made himself strong, he laid aside the sword in the early years' peace and prosperity, show a combination of active and reflective powers rarely to be found in one person.

Nor does Muratori (we quote from Mr. Urquhart) give less marked evidence of his appreciation of the wonderful powers of Francesco Sforza than his more recent biographer:—

The more we reflect (says the Italian historian) on the actions of this unrivalled Prince, the more ready must we acknowledge, notwithstanding the opinion of some, that for many centuries Italy has not produced or possessed a hero so Francesco Sforza, in whom there was a rare combination of wonderful valour with uncommon political sagacity. In twenty-two battles which he gave, he ended by being conqueror, and he was never conquered. . . . In Sforza Attendolo, having risen from the lowest condition of life, he inherited the fortunes of the family; but his son, Francesco, proceeding with gigantic steps advanced in a manner that he came to be at the end of his days the sovereign duke of Milan, and the principal city of Genoa, and of which such a fact is true, certainly deserves to be compared with the greatest captains of antiquity, reckoned among the most illustrious people in the history of Italy.

In conclusion, we cordially recommend these volumes to such readers as desire to blend instruction with amusement. A new era has declared itself in historical writing. The mighty spirits of the past are no longer, to the youthful student above all, the mere myths into which the over-strained cupidity of former historians had succeeded in converting them. We now have the mouvres as well as the mans; the individual as well as the sovereign; the substance as well as the shadow; and Mr. Urquhart is a worthy and able workman in this new mart of mind.

FINE ARTS.

PORTRAITS AND MEMORIALS OF THE DUKE OF WELLINGTON.

In addition to the numerous portraits of the late Duke, which we have already described in various notices, we have to mention one by Lucas, painted by express desire of his Grace for his old companion-in-arms the Marquis of Anglesey. It was painted in 1841, and represents the Duke full-length, in his Field-Marshal's uniform, with the cocked hat thrown over his shoulders, and carrying his field telescope in one hand, and his staff in the other. On one side is a cannon, the artillery was a good one, and the general execution of the picture highly successful. It is now on view at Alderman Moon's, preparatory to its being engraved.

Of historical pictures in which the Duke is introduced, we have to mention two by Wyatt, a young artist, a pupil of the late Mr. Haydon, B.A. Royal Academy, Amsterdam. The picture, about 7 feet by 5 feet 6 in., contains portraits of the most celebrated English and Dutch officers who were in the field in the Netherlands in the autumn of six months in London painting the English Generals, and the Grace the late Duke of Wellington gave him several sittings. When finished, the picture was placed in the Gallery, at Brussels; but, on the Revolution taking place, it was removed to Amsterdam, and replaced in the studio of the artist. It was afterwards removed, and is now in the Palace, at Haarlem. A reduced copy of it was, by permission of the Prince of Orange, made by Mr. Hanseelen, a pupil of Pineman's, and which is now in this country.

THE NEW TURNERS AT THE NATIONAL GALLERY.

Two very interesting additions have just been made to the National Gallery, namely, two of the large collection of the works of Turner, bequeathed by the artist to the nation. They are the "Building of Carthage" and the "Sun Rising in Mist," and were left to the Gallery with the express stipulation that they should be hung up between two of our most brilliant Claudes, the Britannia Pompey object being to shut out the prince of bygone landscape painters for the champion of modern days. Accordingly, there they are at the east end of the Great Room, with the "Embarkation of the Queen of Sheba" on one side, and the beautiful "Waterfall" picture on the other. We would gladly avoid the task of making comparisons between the two masters, thus brought into juxta-position; but, "it is forced upon us to do so, we must boldly aver that, whilst our Turner stands pre-eminent above all landscape-painters of his or our day, and, in some points, is even unsurpassed by all who have gone before him, he must still yield the palm to Claude in what once was the highest resources of the art. In his "Sunrise in Mist," Turner has a subject a class which he has made peculiarly his own; and nothing can be conceived more perfect than the effect which he has introduced: the rays of the sun struggling through the damp mists at various planes, and with more or less success, and casting their gold reflex upon the waters. The ship, lying moving in the middle distance and beautifully rendered with exact truth, their relative positions being well defined by the [illegible] of outline bestowed upon them, and of density of atmosphere which surrounds them. In a field like this former effort, and study yet, without a rival; but then it should be borne in mind that Claude, painting Italian skies, had different materials to deal with, and never produced anything of the class to which Turner was peculiarly devoted, but which was equally beautiful and warm; or, when a hint of mist is introduced, it is of that light and transient character known only to the horizon of the sweet South; and serving almost to increase the golden or silvery glitter of the firmament in which it floats. Claude, among all the highest flights of creative art, did not hesitate to represent upon canvas the deepest recesses of bright immeasurable space, illumined by the pure rays of the sun in its noontide effulgence; and how he succeeded all know who have studied his works. Turner, also, in his "Carthage," has aimed at something of the same kind: he has placed the mid-day sun high in the centre of his canvas, surrounded by a golden sky; but, compared with the skies of Claude, this of Turner wants space and fluidity, is flat and opaque, and by no means produces that warm tone of effect which the colour bestowed upon it might lead one to expect. In short, looking at our two Claudes and Turners, we must award to the former supremacy over the glorious sun and the glorious firmament in bright estate; and to the latter the subtle supervision of effects resulting from modified conditions of the atmosphere.

Both the pictures by Turner, now under consideration, are of his best period, and are free from the extravagance in which he indulged towards the latter part of his career. The "Carthage" originated more than a few years ago; and formed part of the collection of Lord de Tabley, at whose sale, some years ago, it was purchased by Mr. Turner. The "Building of Carthage" was painted some ten years later, and never left the possession of the artist, who repeatedly refused large sums of money for it—in one instance as much as £2000—intending always to bequeath it to the nation.

THE CRUCIFIXION. Painted by J. HILTON. Engraved by J. FINDEN

The Art Union Society, in the engraving produced for the subscription of the current year, manifests an inclination to greatly enlarge the field of art than they have heretofore pretended to; they have, moreover, produced in very creditable style, a work which does honour to the arts of the country. Hilton was a painter of superior merit, aspiring to a higher and than a mere severe school than suited the prevailing taste of the day He was, therefore, comparatively but little known while living, and died almost forgotten, except by a few who pay homage for merits seldom rather than for fashion's. The picture of the "Crucifixion" was one of the artist's most ambitious efforts; comprehending in a single picture the whole of the Italian schools, that of sturdy Florence particularity, and carried out with simple, yet resolute purpose. It is in three pieces. Before the early church fashion, a central picture and two wings; the latter occupied with incidents relative to the sacrifice, subject of the former. The grouping of all is powerful, also for the most part expressive and dignified. Some exception, perhaps, might be taken to the placing of the backs of some of the figures in the principal object the whole; unless intended as an artifice—like of those in

LORD JOHN RUSSELL AT THE SOIREE OF THE LEEDS MECHANICS' INSTITUTION AND LITERARY SOCIETY.

the literature of the day is, if not on a par with, at least as pure in point of taste as that which has gone before it, and to take care that we do not, instead of advancing in letters, fall back and decay in the productions of the time (Hear, hear).

Lord John then told his audience the cause of his coming to Leeds to preside over the meeting, which was that he might both see the progress that the Leeds mechanics were making in instructions of all kinds, and also that he might express his hopes and wishes for their welfare in the time that is to come. His Lordship continuing

It has been my fortune, since the active part of my life began, to live in times of peace, and to see great discoveries and great improvements. I think you will feel that we who have had the direction of affairs during that time—I speak not now of any difference of political parties or of religious sects, but taking us all together, all political parties, and men of all religious denominations—I think we have not done ill for the country during that period in which we have borne an active share in its affairs. ("Hear," and cheers.) If you look back to the year 1815, when a bloody and costly struggle terminated, I think you will see that since that period, whether by the judgment of Parliament—whether by the action of great bodies and great societies—or whether by the skill and invention of individuals, the condition of the people of this land has very much improved (Hear, and cheers). While the means of sustenance have become cheaper—while the public burdens have become less—while the means of education have been improved—there has been, with these circumstances, and partly owing to these circumstances, a general progress in society (Hear, hear). I think that we who have belonged to that time—and as, I tell you again, I wish to make no political allusion, or to claim for one party over another any advantage (Hear, hear)—but I say generally, that we who have lived in this time have, upon the whole, not ill performed our duty. It will be for you, when we retire from the more active business of this scene, to endeavour to carry on to still greater knowledge, to still more comfort, to still greater well-being, the country in which you live. There is a great charge imposed on you, and I trust you will properly perform it. Let no insane passion carry you without reason into contests with foreign countries (Loud and continued cheering). Let no unworthy prejudices induce you to withhold from any part of your countrymen that which is their due (Renewed cheering). Let no previous convictions prevent you from examining every subject with impartial eyes, and from placing before you the light of truth, which ought to guide you in your investigations (Hear, hear.) With these convictions I am persuaded you will abide by the institutions which you have, by the faith which you hold, and that you will adorn the country to which you belong" (Loud and prolonged cheering)

The Right Hon. T. Baines, M.P., in a brief address, then proposed as a sentiment, "Prosperity to the Leeds Mechanics' Institution, and to all similar societies." Mr. Robert Hall supported the sentiment.

Mr. Henry Cole, C.B., proposed—"The continued extension of Schools of Design and of Class Instruction among the People: since to these in a great measure do we look for the culture of taste and the progress of such mechanical contrivances as are necessary to maintain the national position of 'the workshop of the world.'" Professor Phillips seconded the sentiment, contending that art-institutions ought to be self-supporting, and advocating periodical exhibitions of noble works of art.

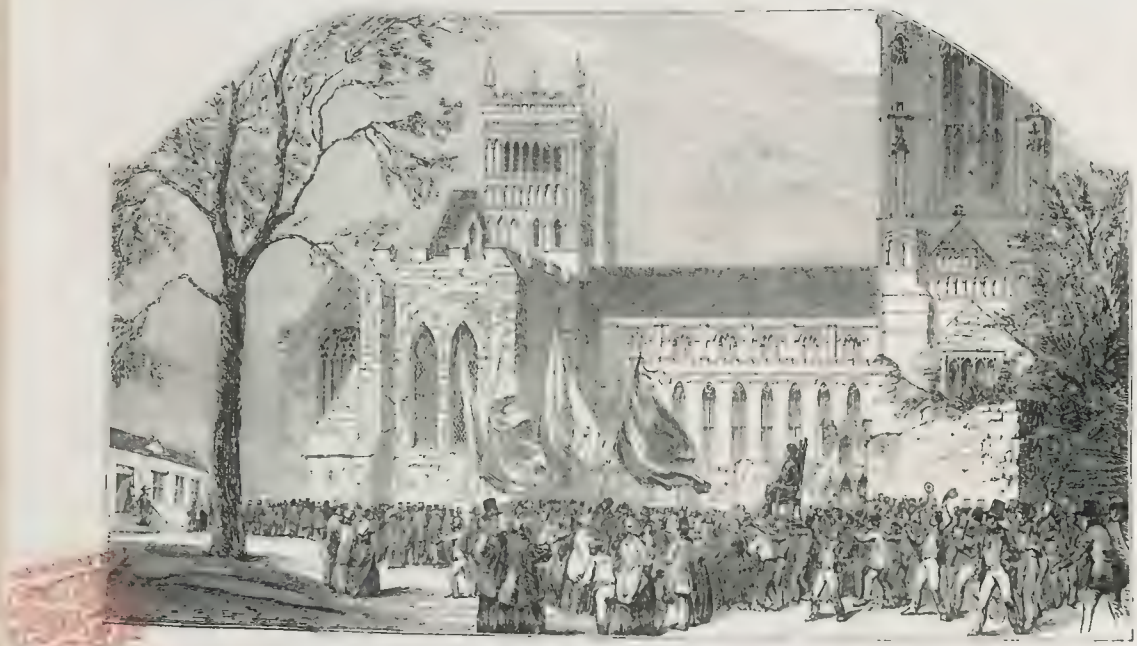
Lord Beaumont proposed "The Education of the People, may it become universal; for the wider its range and the more active its operation, so also will its aim be more noble, and its success more assured."

The Dean of Ripon seconded the sentiment.

The meeting was then addressed by other gentlemen, who proposed sentiments in accordance with the purposes of the institute; but want of space prevents us from giving insertion to their speeches.

Thanks were then voted to Lord John Russell, for his valuable service to the institution in presiding on that occasion; and to Lord Beaumont, and the other friends of education present; and the proceedings terminated.

The Town-council having resolved to take advantage of Lord John Russell's presence in Leeds, waited upon his Lordship on Thursday, headed by the Mayor, and presented an address, which touched upon the principal political events with which Lord John has been connected His Lordship replied in an energetic and powerful speech; first adverting to the course which, in his political career, he had always endeavoured to pursue; and, he believed, in strict consonance with our institutions. In conclusion, his Lordship addressed himself to the consideration of the future.



DURHAM ELECTION.—CHAIRING OF LORD A. VANE, M.P.—(SEE PRECEDING PAGE.)

LIFE AND MILITARY SERVICES OF MARSHAL VISCOUNT BERESFORD.

THE RIGHT HON. MARSHAL VISCOUNT BERESFORD D.C.L., G.C.B., ETC.—FROM A PAINTING BY REUBEN SAVERS.

THE Duke of Wellington used to say of the subject of this memoir that "Lord Beresford and Lord Hill were the only two Generals who could take an army out of Hyde Park in face of an enemy." Our recent campaigns in the East have, we may hope, added one or two names to the list. But no one knew better than the Duke of Wellington that the faculty of handling large masses of troops in war is entirely distinct from the ability which enables an eminent cavalry or infantry officer to lead his particular arm of the service into action, or to decide by a dashing charge the fortunes of some hard-fought field.

William Carr Beresford, son of the first Marquis of Waterford, was born in 1768. In his seventeenth year he was sent to the Military Academy of Strasburg, where he had not remained twelvemonths when he received (in 1785) his commission, as Ensign, in the 6th Foot. Young Beresford arrived in Nova Scotia, where his regiment was stationed, in 1786; and in 1789 became Lieutenant in the 16th, of which regiment he is now the Colonel. In the year 1790, we find him Captain in the 69th Foot, serving as an officer of Marines, on board the *Britannia*, Admiral Lord Hood Two companies of the 69th were then serving *pro tem.* as marines; and it may be remembered that the soldiers of the 69th rendered essential service to Nelson at the battle off Cape St. Vincent, by their alacrity in assisting him to board two Spanish first-rates. Captain Beresford was present at Toulon, and his services are honourably mentioned by Lord Mulgrave, who had accepted the command of the British troops with the rank of Brigadier-General. The French artillery at Toulon was commanded by Bonaparte, then a captain, who during this siege first displayed his military talents.

After the evacuation of Toulon, in 1793, Lord Hood determined to attack the Island of Corsica, with the view of dispossessing the French from the forts which they occupied in the Island. Captain Beresford assisted in the attack upon the celebrated tower of Martello, in the bay of San Fiorenzo; and distinguished himself with so much energy in these operations that he was promoted to a Majority upon the reduction of the fort, and immediately afterwards obtained the rank of Lieutenant-Colonel to command a newly-raised regiment. This regiment was afterwards distributed among others, and Colonel Beresford embarked in command of the 90th Regiment for the West Indies, in an expedition commanded by Sir Ralph Abercrombie. Admiral Christian's fleet, in which Colonel Beresford embarked, was, however, kept back by adverse winds, and the Colonel was stationed in the island of Jersey from 1797 to 1799. In the latter year he was sent to India, and reached Bombay just after the taking of Seringapatam. He formed part of the expedition under General Baird sent to Egypt by way of the Red Sea, to reinforce Sir R. Abercrombie. In Egypt Colonel Beresford remained until the year 1803, when he returned to England, and was appointed Brigadier-General, in which rank he took part, in 1805, in Sir David Baird's expedition against the Cape of Good Hope. Brigadier-General Beresford was afterwards sent to South America with a single regiment (the 71st), with which, assisted by a few marines and a small number of troops from St. Helena—in all 1200 men—he took Buenos Ayres, defended by 8000 troops. Reinforcements arriving from Monte Video, and an insurrection breaking out, he was obliged to capitulate—a contingency which he had foreseen when he took the place according to orders.

Being appointed Major-General in 1807, he was sent to take Madeira, which he did, and remained Governor of the island for eight months. He was then ordered to Portugal, where he arrived just after Sir A. Wellesley had gained the battle of Vimiero. Being sent in command of a brigade to Lisbon, he was appointed to watch the execution of the Convention of Cintra upon the side of England, with Kellermann on the side of France. Beresford's brigade joined Sir John Moore, and he was present at the battle of Corunna. He then returned to England.

The Portuguese Government having requested that an English officer of ability and experience might be sent out to take the command of the Portuguese army, Major-General Beresford was selected by the English Government for this arduous and difficult service. He accepted the appointment, and went to Portugal, with the rank of Marshal in the Portuguese army. It is by many supposed that the army under Beresford was entirely officered by Englishmen; but this is a mistake. There were English officers in it, but the majority were Portuguese. In a few months Marshal Beresford had organized this army, and brought it into a state of efficiency which enabled him to render the Great Duke the most essential service during his Peninsular campaigns. He took part in the fiercely-contested battle of Busaco, and was rewarded by the Order of the Bath (when the order consisted of a single degree). The Order of the Tower and Sword of Portugal was also conferred upon him by the Portuguese Government, and he was made Count of Francoso, in Portugal.

Upon Wellington's retreat behind the lines of Torres Vedras, Marshal Beresford was able to increase and recruit his army, and when Massena, wearied with watching, retreated towards Coimbra, and joined Ney on the other side of the frontier, it was necessary to retake the frontier fortresses. Badajoz was invested by the British and Portuguese under Beresford, but the fortifications being of great strength and extent, the siege made little progress. Soult marched from Seville with a large army to its relief: and Beresford, leaving Badajoz, drew up his force at Albuera, and prepared to fight a pitched battle with the great French Marshal. Beresford's army consisted of 30,000 men, of whom only one-fourth were British. On the 17th of May, 1811, the battle was fought. The Spaniards soon gave way, and the Buffs were surrounded by an overwhelming force of French and Polish cavalry. A large part of the British force suffered severely from the enemy's hussars and lancers, and the French artillery occupying the heights from which the Spaniards had been driven, made dreadful slaughter among the British and Portuguese troops. The doubtful fortunes of the day were changed by the gallantry of a young English officer, Henry Hardinge (now Commanding-in-Chief the British army) who led some troops up the heights occupied by the French. They encountered a murderous fire, but the French were driven from their position, and the day was won. This was one of the bloodiest fields, in proportion to the number of troops engaged, fought during the Peninsular War. "No fewer than 15,000 men were killed or wounded on both sides during a battle that lasted four hours—that is to say, a man was struck down every second of time." That Marshal Beresford, with so small a proportion of British soldiers, should be able, with his Portuguese and Spanish troops, to defeat Soult and his veteran army, under circumstances so disadvantageous, will ever remain a subject for wonder and admiration. Colonel Napier gives his testimony to the personal bravery of our hero at Albuera:—"During the hottest of the action Marshal Beresford exposed himself with a degree of intrepidity which would hardly fall of spreading an example of heroism around. The person of the General-in-Chief was indeed seen everywhere, a gallant soldier." During the battle Beresford was individually charged by a Polish lancer. He grappled his adversary by the throat, threw him from his saddle, and an orderly dragoon despatched him. On the 21st Lord Wellington rode over the field of battle, and examined the position carefully. In a letter written next day, he thus makes honourable mention of the battle:—"You all have heard of the Marshal's action on the 16th. The fighting was desperate, and the loss of the British has been very severe; but, adverting to the nature of the contest, and the manner in which they held their ground against all the efforts the whole French army could make against them, notwithstanding all the losses which they had sustained, I think this action *one of the most glorious and honourable to the character of the troops of any that has been fought during the war.*" Besides 2000 Spaniards and 400 Germans and Portuguese placed *hors de combat*, the British casualties amounted to 4407—an enormous loss, when it is remembered that little more than 6500 English soldiers were actually on the battle-ground. Almost all the field-officers were killed or wounded. The loss sustained by the 57th, known afterwards by the *sobriquet* of the "die-hards," stands without a parallel. Its strength, when led into fire, was about 570 bayonets; and its casualties, at two o'clock, were 23 officers, and above 400 rank and file. Soult's total loss exceeded 8000 men. Beresford, in a despatch to Wellington, said—"It is impossible by any description to do justice to the distinguished gallantry of the troops; but every individual most nobly did his duty, which will be well proved by the great loss we have suffered through repulsing the enemy; and it was observed that our dead, particularly the 57th Regiment, were lying as they had fought in ranks, and every wound was in the front." The Duke also bore this high testimony to Marshal Beresford's success in

THE TOWN-HALL, WINDSOR; WITH THE PORTRAITS OF HER MAJESTY AND HIS ROYAL HIGHNESS PRINCE ALBERT, RECENTLY PRESENTED. (SEE NEXT PAGE.)

organising the Portuguese army. "We do what we please now with the Portuguese troops; we manœuvre them under fire equally well with our own, and have some dependence on them; but these Spaniards can do no thing but stand still, and we consider ourselves fortunate if they do not run away."

Marshal Beresford was present at the siege of Ciudad Rodrigo, and also assisted at the fall of Badajoz. On the 22nd July he was severely wounded at the battle of Salamanca, but was enabled to share in the brilliant victory of Vittoria. In 1813 the Marshal commanded a division at Nivelle and Nive, and had a considerable share in winning the battle of Orthez. He also greatly distinguished himself at Toulouse, where, in April, 1814, the Peninsular campaigns were brought to a final and victorious conclusion.

Marshal Beresford participated in the honours and rewards which were showered upon the Duke of Wellington and his gallant companions in arms at the peace of 1814. He was created a Baron of the United Kingdom under the title of Baron Beresford, of Albuera and Dungarvan; and Parliament awarded an annuity of £2000 to himself and his two immediate successors in the Peerage. After a short sojour in England, Lord Beresford returned to Portugal, where he remained until 1820, the Government of Portugal (the Regency) opposing his arrangements on behalf of the army, and withholding their pay. He then embarked for Rio Janeiro, where the King of Portugal, John VI., still resided, having never refused, since his flight, to return to Europe. The Marshal successfully pointed out the justice of his claims, and he then returned to Lisbon. But, having been detained three months in Rio, he found, on his arrival in Europe, that the Regency he had anticipated had broken out in Portugal, and that a change of Government had taken place. The authorities refused him permission to land, and he accordingly set out for England. Upon his arrival he proceeded to the hands of the Portuguese Minister in London the money he had obtained in the Brazils for the payment of the troops.

In 1823 the Marshal obtained another step in the Peerage, being created a Viscount of the United Kingdom. When the Duke of Wellington took office in 1828, he sent for his old Peninsular fellow-campaigner and offered him the post of Master-General of the Ordnance, which, however, the Viscount Beresford declined. During the entire Wellington Administration.

In November, 1832 the Right Honourable Viscount married his cousin Annie, daughter of the Most Rev. William Beresford, Archbishop of Tuam, and first Baron Decies, and of his wife Elizabeth, sister of Lord Chancellor Clare), and widow of Thomas Hope, Esq., of the Deepdene, Surrey, and Duchess of Loudon, of the Amsterdam branch of the Hope family, also of "Amsterdam," "Costumes of the Ancients," "History of Architecture," &c. &c. Her Ladyship died in July, 1851

The Marshal has earned many brilliant decorations. He has across of seven clasps for eleven battles—Corunna, Busaco, Albuera, Guded Rodrigo, Badajoz, Salamanca, Vittoria, Nivelle and Nive, Orthez, Toulouse, and Pyrenees. He mortified in military decoration may not be aware that no two or three battles were honoured by so many clasps. The Marshal has changed the form of the decorations into a cross. The French as the exceeds above four was again commemorated by clasps from which the cross was suspended. Viscount Beresford has also a medal and two clasps for Egypt and Cabool Ridge. Since the death of the Duke of Wellington, no English General can point to a longer or more splendid List of such achievements and distinctions, as the recapitulation of Marshal Beresford's titles will sufficiently prove.

William Carr Beresford, Viscount Beresford, of Beresford Hall, Staffordshire, (creation March 28th, 1823); Baron Beresford, of Albuera and Bedford Inch, (creation March, 1823); Baron Beresford, of Albuera and Dungarvon (creation, May 17th, 1814). Marquis of Campo Mayor, and Count of Barcosa, in Portugal; Privy Councillor; G.C.B.; G.C.H.; Tower and Sword of Portugal; St. Ferdinand and St. Hermenigilde of Spain; General in the British service (fifth General) brevet of 1825; Colonel-in-Chief of the 60th (King's Royal) Rifles, succeeding H.R.H. Prince Albert in the command of this regiment, when the latter resigned it on the death of the Duke of Wellington; Colonel of the 10th Foot; Lieutenant-Governor of Jersey; Marshal-General "*juxta in real person*" in Portugal, a distinction which gives him the right to be Commander-in-Chief of the Portuguese Army when with his Sovereign; Captain-General of the Spanish Army, a rank analogous to that of Marshal (commission of 1811); Governor of the Royal Military Academy, Woolwich; and a Commissioner of the Military College and Military Asylum.

Marshal Beresford's commission as Captain-General of Spain was issued in June, 1811, upon the same day as the commission of the late Duke of Wellington to the same rank. Since the death of the Duke of Wellington and the Duke of Bayleu, Lord Beresford is head of the Wellington and the Duke of Bayleu, Lord Beresford is head of the armies of Spain and Portugal. He is now the Son or Marshal of Europe, and the only living Marshal who received his baton during the war. Long may this illustrious England human live to enjoy the laurels gained by his chivalrous courage and heroic endurance!

Lord Beresford's seats are Bedesbury Park, Kent, and Beresford Hall, Staffordshire. Of late years the noble Lord has lived a good deal in the country, attending to the improvement of his estates

but the persevered in singing the duet "Sull' aria," with Madame Ferrari. The room was quite full, and the concert went off well, although the illness of the popular *prima donna* caused no little disappointment. —— Miss Ransford is giving a series of *soirées musicales* at her residence in Welbeck-street. On Tuesday's programme she sang, with her father and brother, in Calcott's glee, "When time was entwining," and joined Mr Benson and Mr. Ransford in John Barnett's trio, "The magic-wove scarf." Miss Ransford also gave a brocura by Sir Henry Bishop, "When peace inviting," and a Scotch ballad, very cleverly. Miss Bassano and Mr. Burdini were the other vocalists, and Mdlle Coulon and Mr. Lindsay Sloper were the pianists A new ballad, by Mr. J. L. Hatton, "Son, should breathe of scenes so fair," and a pianoforte duet by Mr. Benson, were one of the most pleasing and attractive items in the scheme. Costa's effective four-part canon, "Ecco quel fiero istante" was well rendered by the Misses Ransford and Bassano, Messrs. Benson and Burdini —— Mdlle. Macher, a pianiste of rising, held an evening concert, on Wednesday, at the Manor-rooms, Hackney, under the direction of Herr Anschütz and Herr Wolfsohn; the solo players were Herr Kreutzer (violin), and Herr Lutgen (violoncello), and the vocalists, Misses Bruen and Lascelles, Mr. Lawler, and the concert-giver. —— Mdlle. E St. Marc gave a *soirée musicale* on Wednesday, at the Queen-Anne-street Rooms, assisted by Misses Cicely Nott, Rose Braham, and Lowe; Messrs. Donald King, Drayton Figheri, V. Collins, R. Blagrove, and Remmers, with Pinsuti and Mdlle Colas as accompanyists. The annual *soirée musicale* and ball given by the gentlemen pupils of the Royal Academy of Music took place at the Institution, in Tenterden-street, Hanover-square, on the 9th inst. The display of talent on the part of the students was highly gratifying. Miss Annie Bundell and the pianiste prize-man, Mr R. Thomas, "Rosabelle") miss Diana Dixon (in a pretty air, by Mr. C. Lucas, "The clouds from out the sky"), and Miss Bessie Broad (in a song, by Mr. A. O'Leary, with a violoncello obligato, played by Mr. Ingle), won the warm applause of the audience. The selection was very judicious, in Mr. Walter Bolton, must be specified: he sang with taste and feeling Macfarren's charming melody, "Beautiful night," from the "Sleeper Awakened" a cantata, which ought to take the proportions of an opera, and which must be sooner or later, heard on the stage, should we ever obtain a really national lyric establishment. —At the *matinée* at Erard's Saloon, in Great Marlborough-street, last Tuesday, Mendelssohn's "Wedding March," arranged for four harps by Herr Oberthur, was executed by the composer, Mr. T. Wright, Mr. Bolsover Lancaster, and Mr. Trust; and Messrs. T. Wright and B. Reeves also performed a grand *duo concertante* for two harps.——Mr. John Edney delivered his vocal entertainment at the Westminster Institution on Thursday.——The first concert of the Harmonic Union took place last night at Exeter-hall, under Benedict's direction: a notice of the performance will be published in the ensuing week's number.——Miss Dolby's third and last *soirée* will be next Tuesday.——On Wednesday the Sacred Harmonic Society, under Costa's direction, will perform the "Messiah," and Madame Fiorentini making her second appearance at Exeter-hall in this oratorio.——Next Thursday Dr. Mackay's elegy, "Mourn for the Mighty Dead," the music by Sir H. R. Bishop, will be performed at Exeter-hall by the London Sacred Harmonic Society.——Mr. Surman's orchestra, preceding Mendelssohn's "Elijah."——Berlioz is no longer the conductor of the New Philharmonic Society, the concerts of which are announced to begin in March at Exeter-hall, and Mr. Beale has withdrawn from the direction; and the society at present has neither head nor staff. It is rumoured that the new managers are in treaty with Spohr; but it is doubtful whether, at his advanced age, he will again visit this country. The loss of Berlioz is irreparable; he was the "great gun" of the performances, not only for his magnificent compositions, but also for his immense tact and skill as a conductor.

M. JULLIEN'S CONCERTS.—These popular entertainments were brought to a close last Monday, at Drury-lane Theatre, with a brilliant Bal Masqué. The house was crowded to excess, the spectators being much more numerous than the masqueraders.

Sir Thomas Lawrence, is an equally convincing proof that Windsor still continued to enjoy the favour of its Sovereign. And here we must note a gap in the silent yet speaking record of the past—a gap which we hope to see speedily filled up—for we have no portrait either of Windsor's most munificent patron, William IV., or of "the good Queen Adelaide."

Beside the Recorder's seat are placed the portraits of Queen Victoria and Prince Albert, already described

At the annual meeting of the Town-council, lately held, a resolution expressive of the deep sense of gratitude felt by the Corporation for her Majesty and Prince Albert for the spontaneous and munificent present of their portraits, wherewith to decorate the Town-hall, was passed by acclamation. At the same time, a letter conveying the thanks of the Council to Colonel the Hon C. B. Phipps, for the kind manner in which he had seconded the wishes of the town, was unanimously adopted.

MUSIC.

SACRED HARMONIC SOCIETY.

The performance of Handel's "Messiah," at Exeter-hall, on the 10th instant, under Costa's direction, was superlatively fine. The choruses and accompaniments were executed in a style of excellence impossible to surpass. It was not merely wonderful exactness and decision in taking up the points, but the highest order of dramatic and picturesque beauty in the general express on was attained; and it is not too much to add, that the *ensemble* was more magnificent than on any former occasion. The *motto tenor*, in the chorus, "For unto us a child is born," and the gradual swelling of the voices, until they arrived at the fortissimo, "Wonderful, counsellor," quite electrified the enormous audience, which filled the hall to overflow.

The principal singers were Madame Fiorentini, Miss Birch, Miss Dolby and Mr. Lockey. It was the first appearance of Madame Fiorentini at Exeter-hall, and unusual interest had been excited in musical circles to ascertain how the *prima donna* of Her Majesty's Theatre, and of the Paris and Berlin Italian Opera-houses, would acquit herself in the sacred school. She was allotted the bravura air, "Rejoice greatly," in the first part; and the air in the second part, "But thou didst not leave." As it was her *début*, it would have been more politic and just to have assigned to her some of the recitatives. It was no ordinary trial for Madame Fiorentini, after the chorus, "For unto us," to begin at once on such a florid, difficult piece of vocalization as that of "Rejoice greatly;" but the superb quality of her unrivalled soprano voice, and her truly Handelian style of executing the divisions, were so unanimously admirable, that a burst of approbation was elicited, from all parts of the Hall, notwithstanding the rules against applause. The demonstrations of gratification at the close of her second air, were equally striking and irresistible. The success of Madame Fiorentini was, therefore, decidedly great, and there is every reason to be gratified at the result, as a person when the number of our leading singers of the sacred school was becoming so limited. Madame Fiorentini now only requires time and practice to complete the studies she has so excellently begun. She recently adhered to the text, and this simplicity, if it had been accompanied with more decision and additional fervour, would have left nothing to be desired. Every allowance must, of course, be made for the nervousness of a *début*, but the qualifications of the new-comer, to occupy a place in the first rank of singers of sacred music, were unmistakable; and the society has every reason to be gratified at the result of its choice being

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

His Grace the Duke of Northumberland, the First Lord of the Admiralty, has conferred the captain's go o berview mansion, relinquished on the promotion of Rear Admiral Sir Thomas I le ceart, K.C.B., on Captain Hoyle Johnstone, the superintendent of Haslar Hospi tal.

The ship *Geelong*, bound for Aust ralia, was totally lost in a gale in the Bay of Biscay, on the 24th of Novem ber. The crew and passengers were saved by the gallant exertions of the cap ain, officers, and crew of the Swedish frigate *Vargarden*, by whom they were sa fely conveyed to Gibraltar.

Admiral Sir Thomas Briggs, G .C.M.G., died suddenly, at the Admiralty house, in Portsmouth Dockyar d, on Thursday, after a short il ness, with which he was se zed on Monday.

In future none but Turkish steamers are to be permitted to convey passengers in the Bosphorus.

A company has been formed with a capital of £600,000, to carry out the scheme for a city railway terminus.

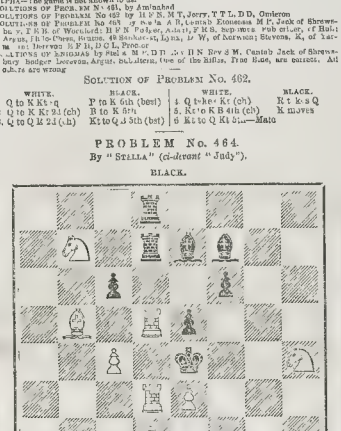
SOLUTION OF PROBLEM No. 462.

WHITE.	BLACK.	WHITE.	BLACK.
1 Q to K Kt 7	P to K 5th (best)	4 Q takes Kt (ch)	K t to Q
2 Q to K Kt 2d (ch)	B to K 6th	5. Kt to K B 4th (ch)	K moves
3. Q to Q K 2d (ch)	Kt to Q 4th (best)	6 Kt to Q B 3rd—Mate	

PROBLEM No. 464.

By "STELLA" (*ci-devant* "Judy").

BLACK.



WHITE.

White, playing first, to mate in four moves.

MATCH BETWEEN MESSRS. HARRWITZ AND WILLIAMS.

In the second series of games between these players, the score at present, we are sorry to say, is—

Williams	 2	Harrwitz	 1

CHESS IN SCOTLAND.

MR. STAUNTON gives the Pawn and two moves to the REV. T. GORDON (Gamma).

(*Remove Black's King's Bishop's Pawn before playing over the game*)

WHITE (REV. T. G.)	BLACK (MR. S.)	WHITE (REV. T. G.)	BLACK (MR S.)
1. P to K 4th	P to K 4th	17. Q Kt to B 5th (f)	P to Q Kt sq
2. P to Q 4th	P to K 3rd	18. P to K Kt 4th	B to Q Kt 2nd
3. B to Q 3rd	P to Q B 4th	19. Kt takes B	R takes Kt
4. P to K 5th	Kt to K 2nd	20. P to K Kt 5th	K Kt to K B 4th
5. P to K B 4th	P takes Q P	21. Kt to K B 6th (ch)	B takes Kt
6. Kt to K B 3rd	Kt to Q B 3rd		
7. Castles	P to K Kt 3rd	22. R takes B (g)	R to Q B 2nd
8. Kt to Q R 3rd (a)	B to K Kt 2nd	23. B takes Kt	K P takes B
9. Q Kt to Q B 4th	Castles	24. Q to Q third (h)	Q to Q R sq (i)
10. Q Kt to Q 6th	K Kt to Q 4th	25. P to Q B 3rd	P to Q B 5th
11. K Kt to K t 5th (b)	Q Kt to K 2nd (c)	26. R to Q 3rd	Kt to Q Kt 3rd
12. R to K 3rd	K Kt to K 6th	27. P to K t 5th (ch)	K takes P (j)
13. Q to K 2nd	Q Kt to Q 4th	28. R to Q B 3rd	R to Q B 5th
14. P to K Kt 3rd	K Kt to K B 4th (d)	29. Q to K R 7th (ch)	K to K sq
15. K Kt to K 4th	K Kt to K 2nd (e)	30. B to K 8 6th (m)	Q to K 5th
16. B to Q 2nd	P to Q Kt 3rd	31. Q takes K P.	R takes Q B P
		32 Q takes Kt P (ch)	

And the game was finally drawn.

(a) P to Q B 3rd would perhaps have been better play

(b) With his two Kts so well posted in the heart of Black's game, Gamma has half achieved the victory already

(c) If Black had played his K Kt to K 6th, White would have taken it off; and then, by moving P to Q B 3rd, have effectually prevented the advance of the other Kt

(d) At this stage of the game Black could now have taken the K Pawn with his Bishop, safely. As he examined and knows, however, that he could not, for, suppose—

WHITE.	BLACK.	WHITE.	BLACK
14.	B takes K P	16. K takes B	Kt takes Kt
15. K Kt to K B 7th	B takes Kt (best)	17. P takes B discovering ch. &c)	

(e) This may be called a batt'e of the Kn'ghts, for up to the present point the manœuvring has been nearly executed by them

(f) He might als have played 17 P to Q B 4th, with much advantage.

(g) Gamma has now succeeded in winning a Pawn which he long sought to establish it; but perhaps he would have done bet er in getting rid of the adverse Q Pawn first.

(h) Q to K 8th would have been still stronger. In either case, however, White obtains a capital position.

(i) His only resource, and this but a poor one.

(j) To make a retreat for the creature to die.

(k) If he had taken with the Rook White would have replied with B to Q B 3d and have forced his adversary to give up the exchange.

(m) Up to this moment White has played with remarkable spirit and ability; but now with the victory in his hands, by energetic measures, he allows his adversary to escape with a couple second hopeless. If he had played 30. R to K 8d (ch), Black might have to resign at once, for, suppose—

WHITE.	BLACK.	WHITE.	BLACK
30. R to K 3rd (ch)	K to K 5th	31. R takes B (ch)	P takes R

If Q takes R, then follows R to K sq, and the Queen is cut.

32 B to Q Kt 4th—and the Game is won.

THE CHESS-CLUBS OF BRITAIN.—The Secretaries of the following Clubs have forwarded to me the names and places of meeting of their respective Clubs:—The Senior Birmingham Chess Club, the Southampton Chess-Club, the Glasgow Chess-Club, the Halifax Stock Exchange Chess-Club, the Hyde Chess-Club, the Leamington Chess Club, and the Chess-Club of the Dublin Mechanics' Institute. We earnestly hope the example they have set will be immediately followed by the heads of other Clubs, that a general registry of Chess-Clubs throughout the kingdom may be formed and made public.

THE MEXICAN PRESENTS TO HER MAJESTY AND THE PRINCE OF WALES.

To the Editor of the ILLUSTRATED LONDON NEWS.

Referring to your description of the beautiful Mexican saddle, recently presented to his Royal Highness the Prince of Wales, it may not be unnecessary to explain that the lion's head, which terminates the branswork, has a purpose beyond that of mere ornament. In the common saddles of the country, this part forms a powerful iron peg, which, being part of the entire framework (of the same metal), offers a strong resisting medium. It is to this peg that the lasso is attached; by means of which horned cattle and wild horses, &c., are taken, and the native horse is so well trained, that the moment he feels resistance at that part (although the lasso is thrown within a few yards of his head), he will put out his fore legs and turn in the direct on like a top to lighten the lasso—a habit artificially taught by the spur; but which, after a time, has become almost perfectly acquired.

I am, &c.,
ANGLO-MEXICAN.

CHURCH, UNIVERSITIES, &c.

TESTIMONIAL.—The congregation of St. Peter's Church, De Beauvoir Town, have just presented their *officiating* minister, the Rev. Irwin Lloyd with a purse containing seventy guineas, and Edwards's works, in two volumes. This is in addition to the rev. gentleman having received from the flock within a period of three years. their first present consisted of 100 guineas, and Heber's Epis on of Bishop Jeremy Taylor's works: second, pocket Communion service, from the candidates for confirmation.

Her Majesty's Commissioners "for inquiring into the state, discipline, studies, and revenues of the University and Colleges of Cambridge," having published a report containing several important recommendations relative to those subjects, the Vice-Chancellor has given the following notice at the Congregation, to be held on Wednesday, the 2nd of February, 1853: "To appoint a Syndicate to consider whether it is expedient to adopt any measures—and, if so, what—for augmenting the existing means of testing the studies of the University by public professors and public lecturers, and for regulating and encouraging the studies so taught; and to report thereon to the Senate from time to time until the end of the Easter term, 1853."

SOCIETY FOR IRISH CHURCH MISSIONS TO THE ROMAN CATHOLICS.—A meeting of the friends and supporters of this society was held on Wednesday, in the large room of the London Tavern, Bishopsgate-street, to hear statements relative to its missionary progress from the Rev. A. R. C. Dallas and the Rev. R. Richardson, the honorary secretaries. The chair was taken at twelve o'clock, by the Lord Mayor. Resolutions in accordance with the objects of the meeting were moved and seconded by the Rev. Dr. Dallin, Mr. Maguire, M.P., the Rev. R. Richardson, Mr. O'Malley, and Mr. Charles Burton; and the proceedings terminated with a vote of thanks to the Lord Mayor for the interest which he had taken in the proceedings of the society, and for his kindness in presiding.

PREFERMENTS AND APPOINTMENTS.—The following promotions and appointments have recently taken place: *Archdeacon*: The Rev. H. Sandam, M.A., to Ovington, near Alresford; the Rev. E. Wickham, B.A., to Preston Candover, near Basingstoke; the Rev. C. Smith, B.A., to Yaxley, near Caine, Wilts; the Rev. E. Thompson, M.A., to Mucleton Scriven, near Bridgenorth; the Rev. W. D. Astley, M.A., to East Langdon, near Dover. *Vicarages*: The Rev. J. W. Watkin, M.A., to Stanwell, near Hadnesalle; the Rev. W. St. George Sargent, M.A., to Kimberley, near Nottingham; the Rev. W. Morrice, M.A., to Longbridge Deverill, with Monkton Deverill and Cro-kerton annexed, near Warminster; the Rev. H. E. Warin, B.A., to Llanspyddid, near Brecon; the Rev. E. H. James, M.A., to Lathom Regis, near Wigan. *Incumbencies*: the Rev. J. Pigot, M.A., to Horwich, near Bolton; the Rev. T. B. Mackarness, M.A., to Christ Church, St. George, near Hartshead, Staffordshire; the Rev. T. Fell, M.A., to St. Matthew's Church, Rugby; the Rev. W. R. Lawrence, M.A., to St. Michael, Two Mile Hill. *Curacies*: the Rev. F. Davis, B.A., to St. Peter's Church, Macclesfield; the Rev. T. Melvile Raven, M.A., to Daventry, Warwickshire.

THE "IRELAND'S EYE" MURDER CASE.

THE great interest excited by this extraordinary trial has induced us to illustrate the remarkable Island upon which the body of the deceased was found. The following is a brief recapitulation of the trial, which took place in the Dublin Commission Court, on Wednesday and Thursday (last week):—The evidence was circumstantial. Mr. Kirwan was an artist, living by sketching. He had been married twelve years; but the whole of that time he had been living also with another woman, by whom he had eight children. Neither of the women knew of her rival until, six months before her death, Mrs. Kirwan learned the fact. On the 6th of September, the Kirwans went to the little Island called "Ireland's Eye," in Dublin Bay, to sketch. Kirwan had a sword-cane with him. Another party visited the Island, and at four o'clock saw Mrs. Kirwan alive; the couple being then left alone on the island. At seven o'clock cries of distress on the island were heard. When the boatmen returned at eight o'clock, according to their instructions, Mrs. Kirwan was missing; and, after a search, her body was found on a rock. The incident is thus described by one of the boatmen:—"Her bathing-dress was up under her arms, and there was a sheet under her; her head was lying back in a hole, and her feet were in a pool of water about the full of my hat—about half a gallon. I saw cuts on her forehead and under her eye: there was blood coming down by her ears, from her side and breast, and other places." Kirwan told the boatman that his wife left him to bathe at half-past six o'clock; but the continued lull of the tide proved that she could not have been drowned or carried by the water to the spot where she was found. The boatmen found her clothes in a spot which they had previously searched, *after* Kirwan had been a short time absent from them. The body showed marks of violence; but a Coroner's jury found a verdict of "Accidental death;" and the body was buried in a part of Glasnevin cemetery to wet that in two months the body was decomposed.

Dr. Hatchell, who examined the body after its exhumation, saw abrasions on the right eye, right cheek, and right arm. The lobe of the right ear and the ring were gone; the upper lip was cut, and the tongue lacerated, and was marked by the teeth above and below; there were also marks of bruises in various parts of the body; and he was of opinion that death was caused by stoppage of the respiration.

For the defence, Dr. F. Ryan and Dr. Adams gave it as their opinion, that the contusions and appearances in the brain might have been caused by drowning. There would be more froth about the mouth in the case of a person who had struggled than in one who had been accidentally drowned. A person going into the water upon a full meal would be liable to apoplexy.

Mr. Hayes spoke in reply to evidence, and Judge Crampton having summed up, the jury retired at seven o'clock in the evening. At twenty minutes before eight o'clock the Judge directed the foreman to summon the jury, and on their entrance into court the foreman and other jurors said they were not likely to agree. They were then directed to retire again, and at eleven o'clock at night his Lordship returned, and on the jury being called one of the jurors asked for Lordship to repeat the evidence being given of Dr. Adams. He (Lordship) did so. As the evidence was that the appearance of the body, &c., would be caused by drowning, whether by accident or by foreign influence.

The jury then retired for a few moments, and returned with a verdict of "Guilty." The prisoner, whose appearance indicated that he had expected an acquittal, or at least the disagreement of the jury, seemed overcome by the announcement, and was removed from the dock.

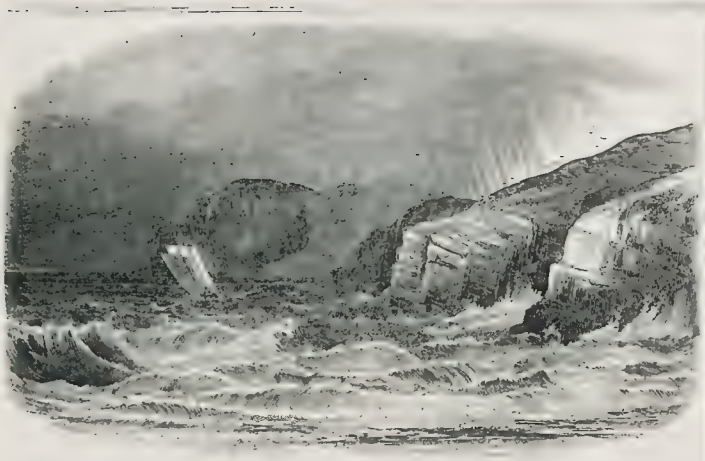
On Friday morning the prisoner was again brought up to the Court and, having made a long statement, concluded with protesting his innocence. Mr. Justice Crampton then proceeded to pass the last solemn sentence of the law. He adverted to some of the leading facts, and said that neither he nor Mr. Baron Greene saw any reason whatever to be dissatisfied with the verdict that had been returned. He strongly admonished the prisoner to avail himself of the short time that remained to him in this world, in endeavouring to reconcile himself to the Almighty, through whom only he could be saved. His Lordship having stated that he could hold out no hope of life whatever to the prisoner—that the die was cast, and his doom sealed—sentenced him to be hanged by the neck until he was dead, and that his body should be buried within the precincts of the gaol.

The prisoner, who appeared to be wholly unmoved during all this time, then said, in a loud, clear, and firm voice:—"Now that I consider my hopes in this world are at an end, I solemnly declare, in the presence of this Court, and of that God before whom I must soon appear, that I had neither act nor part in the death of the late Mrs. Mary Kirwan; and I will further declare that I never treated her unkindly."

The prisoner was then removed.

We quote the accompanying description of Ireland's Eye from the speech of Mr. Sanjay, Q.C., who opened the case for the prosecution:—

"The jury," he said, "were well acquainted with a little island in the neighbourhood of Howth, called Ireland's Eye: it lay directly oppo-



"IRELAND'S EYE," DUBLIN BAY.

eits the harbour of Howth; the nearest point to the latter being a place called Broad Patch, situated at the extreme end of the island. Slanting to the west from this place were two strands, one of which was considerably longer than the other—that at the extreme west end leading towards the remains of a martello tower, and being one of the points where boats usually landed, and which was the place at which Mr and Mrs. Kirwan landed on the 6th of September last. Upon a flat ground between the tower and the Black Patch were the ruins of an old church; and at the back of the Black Patch, at a part of the island which was out of view of Howth Harbour, was a place called the Long Pole, into which the tide came, and which was always filled with water when it was fully in; but when the tide was completely out, the Long Pole was left altogether dry. The boatman and Mr. Kirwan, in searching for Mrs. Kirwan, went through a considerable portion of the island until they came to the Long Pole: there was a small rock there, and on this rock the body was found. At the time it was found, ten o'clock P.M., the rock was quite dry, and the tide was removed six feet from it."

THE LONDON NECROPOLIS AND NATIONAL MAUSOLEUM.

The Burial Act, passed at the end of the last Parliament, though brought in by a new Ministry, was in truth the embodiment of foregone conclusions. The Legislature had affirmed as principles that the dead must no longer be buried amongst the living; that to open new cemeteries, or burial grounds in urban districts, would be to perpetuate the evils already deplored; that the new cemeteries must be at a considerable distance from the metropolis, yet that regard must be had to the convenience of transit and access. The new act empowers the Secretary of State to close the existing churchyards wherever necessary, and calls upon parishes to form burial boards; which boards are to provide new burial grounds, none of which may be opened within two hundred yards of any dwelling-house, without the written permission of the owner or occupier. This is tantamount to the prevention of all burial-places, save at a distance from the metropolis.

The hardship and attendant difficulties of this interdiction, however, appear to have been much removed by the act of the London Necropolis and National Mausoleum Company, passed a short time previous to the Government Burial Act. The site of the Necropolis (of which we have engraved a view) is at Woking-common, adjoining the South-Western Railway, and about half a mile from the Woking station. The cemetery comprises 2000 acres, and is to be so arranged that parishes may secure certain portions for their own burial-grounds, over which they will exercise every control, without any immediate expenditure of the parish funds. The cost of the ground is included in the charges for each interment. In the centre of this vast area an edifice is to be erected, in which the service of the Church of England will be performed, and suitable buildings and arrangements will be made to provide for the obsequies and interment of the members of every religious denomination. There are also to be stations and reception-rooms for arrival and departure, a manager's house and offices, stabling, an hotel, a lodge entrance, a bell tower, a church, two auxiliary churches, a central monumental plateau, while seats and alcoves will be numerous. The extreme length of the ground is three miles, and the breadth half a mile. The situation is well chosen, and commands most extensive views of the surrounding country, which is gently undulating studded with woods, and softened by fertile fields and pastures. On either side hills of considerable magnitude arise, and fruitful valleys lie between, so that the site is really a graceful panorama, and presents exactly that style of picturesque beauty which should distinguish a cemetery of such a vast national character. From the Waterloo Terminus, the most central in the metropolis, the cemetery can be reached in thirty minutes, and the whole journey to and fro, including the time occupied in the interment, may be effected in two hours. The tariff of charges is to be such as to effect a saving to the community of twenty-five per cent on the present cost of sepulture; 15s will be the charge for a pauper funeral, including conveyance of two attendants to Woking and back, and £1 5s for the class immediately above the extremely poor.

A report having been circulated that the site was a low boggy part of Woking-common, the directors of the company issued invitations in September to about 250 of the principal officers of the metropolitan parishes, who were conveyed by special train to Woking, when resolutions were passed, stating that the site was "admirably adapted for the purpose;" and that it was "a national cemetery of such an extent as to meet all the requirements of the metropolis."

The Secretary of State has already exercised his powers upon some of the parish burial-grounds, which are ordered to be closed, and new burial-places to be provided forthwith. We understand that several parishes have made application to the Necropolis Company for allotments of ground. Leaving the officers to act according to their discretion for their several parishes, we must rejoice that the time is coming when hideous fever will no longer be assisted in its career by the decay of those who have already fallen victims to its ravages; and that, ere long, the horrors of intramural sepulture will be among the historical facts of a bygone age.

The whole has been designed and laid out by Mr. H. R. Abraham, the projector and architect of the Westminster Improvements.

WILLIAM MARTIN, THE CENTENARIAN.

This aged man, who died on the 14th ult., was born at Ewell, near Epsom, on the 10th March, 1750. His parents were farmers, in good circumstances, who apprenticed him to his uncle, a builder, which business he afterwards carried on himself for many years. He subsequently resided at Poole, in Dorsetshire; the gaol of which town was built by

THE LATE WILLIAM MARTIN, AGED 102.

him. At Poole he married. He afterwards resided for fourteen years at Harrow-on-the-Hill, where he built the parsonage. He seems, however, to have been unfortunate in business; for, throughout an unusually long career, he never contrived to store up for his later years. Martin possessed all his faculties till within a short period of his death; to the last he wrote without the aid of spectacles. The style and clearness of his writing would shame many a younger hand. Martin possessed a retentive memory, and his recollection of public events, over his pipe and cup of coffee, relieved the monotony of many an hour. His spiritual wants were carefully tended by the Rev. Thomas Dale, the worthy Rector of St. Pancras, in which parish he died. He was buried in the Old Church.

The accompanying Portrait of Martin is from a sketch by Mr. Robert Nunn, an amateur artist, through whose intervention the old man was honoured by the notice of the Queen, who, on more than one occasion, sent substantial presents, which were delivered by one of her Majesty's messengers.

Martin's widow is upwards of eighty years of age.

Last month Mr. Mungo Murray, who kept a draper's shop in Crieff, Perthshire, for the very long period of upwards of seventy years, died, at the age of 103 years.—*Inverness Courier.*

THE LONDON NECROPOLIS AND NATIONAL MAUSOLEUM, WOKING, SURREY.

THE FALLEN EAST CLIFF, AT HASTINGS.—(FROM A DAGUERREOTYPE BY CONNOP AND WHITE.)

FALL AT THE EAST CLIFF, HASTINGS.

On Sunday week, at noon, two enormous "falls" of the East Cliff, at Hastings, took place at the easternmost groine, about a quarter of an hour intervening between each fall. The crash is described as resembling thunder, and the rise of the dust like a column of smoke. The total fall comprised several hundred tons of rock, sand, and earth, some of the fragments rolling a considerable distance down the beach. A wooden tool-house was knocked to pieces, but providentially no person was injured. A man and a woman had just passed to the eastward when the first fall took place; and, on witnessing the danger they had so narrowly escaped, the woman fainted on the beach. The continued rains, and the grubbings of the sand-diggers, are supposed to have led to this unusually large fall. A Daguerreotype of the scene was immediately taken by Messrs. Connop and White, whence the accompanying Illustration has been engraved.

GREAT NORTH OF SCOTLAND RAILWAY.

The ceremony of turning the first turf on this important line of railway took place on Thursday, the 25th ult., in a field on the grounds of Sir James Elphinstone, at Westhall. The proprietary of the adjoining districts turned out almost without exception, some coming from Banff and Elgin; and a numerous and respectable body making their appearance from Aberdeen in omnibuses, appropriately decorated with red green, and white railway signals, union jacks, and other bunting in profusion. The contractors arrived from Aberdeen in a handsome drag. The Lord Provost and magistrates of Aberdeen, with the City Clerk and Chamberlain, drove up in a carriage and four. They were loudly cheered on their arrival, and proceeded up the hill to Westhall to join the directors and county gentry who had there met, along with the tenantry of the district. About half-past one, this assemblage moved off from Westhall in order of procession, preceded by a military band. An area round the spot on which the interesting ceremony was to take place had been fenced off, and within the fence seats had been constructed all round, for the accommodation of the ladies. At short intervals around the circle flags fluttered, and the immense holiday-attired crowd and back-ground of elegant equipages, with their fair occupants, formed altogether such a spectacle as has never before been witnessed in the Garioch. The effect of the gay scene was heightened by the surrounding landscape.

The Rev. Mr. Cushnie opened the proceedings with an impressive and appropriate prayer.

Lady Elphinstone then advanced, and, taking the spade, which was handed to her by Sir James, neatly turned up the first turf, amid enthusiastic cheers, and laid it on the barrow, which, amid renewed shouts of cheering, was rolled off by Master Elphinstone, and emptied. The barrow is of beautifully carved and polished oak, and bears the arms of the Railway Company and of Sir James Elphinstone. The spade having a finely burnished ornamental blade.

The initiatory steps having been completed, Lady Elphinstone retired amid loud cheering, and renewed acclamations greeted Sir James, as, laying hold of one of the navvies' shovels, he dug up a large barrowful of the earth, which he trundled off in a business-like and workman-like style. His example was followed, amid reiterated shouts, by the Lord Provost, Sir A. L. Hay, Provost Blaikie, Master Graham Elphinstone, several of the directors, and other gentlemen.

Sir James Elphinstone then said: "We are met here to-day to turn the first turf of the Great North of Scotland Railway; and the next time I shall have the pleasure of meeting you will be to drink success to it when it is completed to Elgin. (Loud cheers.) We have, within the last eighteen months, got money sufficient to pay every inch of ground to Huntly. (Cheers.) We will go to Huntly, and pay as we go. We will then carry on the railway to Aberdeen. (Cheers.) The

COMMENCEMENT OF THE GREAT NORTH OF SCOTLAND RAILWAY, AT WESTHALL, ABERDEENSHIRE.

first step has been taken; the necessary funds for the erection we are commencing are in our hands; and, when we get to Huntly, I am satisfied we will soon proceed to Keith, and thence to Elgin." (Loud cheers) Sir James then thanked the company for having turned out so numerously to witness the commencement of an undertaking upon which the prosperity of the country in that quarter so much depends.

Sir Andrew Leith Hay stated, that it was mainly owing to the exertions of Sir James Elphinstone that the Great North of Scotland Railway was that day commenced, and called for three cheers for Sir James, which were most lustily given.

The Lord Provost of Aberdeen congratulated those present on a commencement having been made to this line; and concluded by calling for three cheers for Lady Elphinstone, which were given with enthusiasm. This closed the proceedings.

In the evening the event was celebrated by a large number of gentlemen dining together; Sir James Elphinstone presiding.

METROPOLITAN NEWS.

THE POLISH BALL.—The annual festival in aid of the funds of the Literary Association of the Friends of Poland took place on Wednesday night at the Guildhall. The arrangements were upon a more than usual scale of splendour and magnificence. A cloth, manufactured expressly for the purpose, covered the flooring of the hall, adding greatly to the convenience and comfort of the dancers. Some officers of the new militia attended in their uniforms for the first time, which, together with a few Highland and many costumes not required throughout the ball-room, added much to the brilliancy of the *coup-d'œil*. A concert, under the direction of Mr Lindsay Sloper, was not the least attractive part of the entertainment, especially when Miss Arabella Goddard and Mr. Sidney Pratten, Miss Ransford, Miss Messent, Miss Cicely Nott, Madame Weiss, Mr. Frank Bodda, Mr Weightman, Mr. Weiss, and a great number of other public favourites.

TEMPERANCE AND THE CRYSTAL PALACE.—At a meeting of the Lon on Temperance League held on Wednesday night, in Exeter hall, the chairman, George Cruikshank, informed the meeting that, in reply to a letter addressed by him to the Crystal Palace Company, Mr. Grove, the secretary, had written him off to letter stating that the directors were desirous of having a stall for the sale of wines or spirituous liquors, "*under any circumstances whatever*," in the Palace or grounds thereof.

THE CONSERVATIVE LAND SOCIETY.—The executive committee, on Tuesday last, elected C. L. Grenestien, Esq., the secretary of the society. Mr. Grenestien has been honourably connected with the public press, at home and abroad, for many years

THE BUDGET.—Public meetings to oppose the Budget have been held at S. Andrew's, Holborn, and St. George the Martyr; St. Giles, and St. George, Bloomsbury; also at Liverpool, Southampton, Canterbury, Buckingham, Bedford, Worcester, Manchester, Newcast e-on-Tyne, Chatham, Edinburgh, and other places.

SOCIETY OF ARTS.—The fourth annual exhibition of this society was opened to the public on Thursday. The exhibition is arranged under the principal heads:—1. Motive machines, including railway mechanism; 2. Manufacturing machines and tools; 3. Building contrivances and materials, naval and military mechanism; 4. Philosophical instruments and hardware; 5. Agricultural implements, harness and saddlery; 6 Miscellaneous, including articles for personal use.

MEETING OF JAMAICA PROPRIETORS.—At a meeting of proprietors and merchants connected with Jamaica, held at Wells' Rooms, on Tuesday, at which it was resolved to memorialise Lord Derby on the distressed condition of the island, Mr. Marshall stated that, although they might feel disappointed at the Council of the Exchequer's statement, he had reason to believe that the Government would shortly do something for Jamaica.

LONDON MECHANICS' INSTITUTION.—On Monday a *soirée* and *conversazione*, in celebration of the 29th anniversary of the excellent institution, was held in the theatre of the institution, Chancery-lane. Lord Dudley Stuart, M.P., Mr. O'Brien, M.P., and other influential gentlemen, were present

POLICE FOR AUSTRALIA.—The final arrangements for sending out a body of metropolitan police have almost been concluded. On Saturday ten men selected for the service were paid £34 4s. 8d. each, being a half-year's salary in advance, in addition to gratuities from Mr. Commissioner Mayne, varying from £10 upwards, according to rank. The men are to find their own passage free. After three years' servitude they can return home, and their former situation in the service will be allowed them. Another gratuity of a day's pay, according to rank, was given to the men assigned as the escort of the late Duke of Wellington; viz., 3s. 6d to the first class, 2s 9d. to the second-class, and 2s 6d to the third-class.

THE GREAT ANNUAL SMITHFIELD MARKET-DAY was held on Monday last. It is calculated that the number of sheep penned amounted to about 34 000, and of beasts to between 6000 and 7000. The display on all sides was most excellent, and the beasts were generally in prime condition. It was the general opinion that the exhibition was fully equal, in every respect, to that of last year, and showed the care that had been taken by our breeders and graziers to rear a stock for the consumer, and not merely for the production of fat.

METROPOLITAN FANCY RABBIT CLUB.—The eleventh winter show of this respectable and flourishing society, was held on Wednesday evening, at Aubergh's Hotel, Pentonville, James Hindley, Esq., the president, in the chair. The vice chair was occupied by Mr. Bates, president of the Chatham Club, and upwards of 150 gentlemen were present.

ACCIDENT AT JULLIEN'S BAL MASQUE.—On Monday night, when the excitement of Jullien's masqued ball, which took place at Drury-lane Theatre, was at its height, considerable alarm was caused by the falling of what was supposed to be the body of a lady from an upper tier of boxes to the pit. It was soon discovered that a hoax had been played, and that the supposed lady was only a "dummy," but of such a weight as to cause considerable injury to a gentleman on whom it fell, and to render him insensible for some time. Medical aid was obtained, and he was removed to a cab to his residence. The perpetrator of this silly and mischievous joke escaped undetected

PREPARATIONS FOR CHRISTMAS.—The Duke of Cambridge has presented, for the Christmas festivals to the poor, conducted by the Leicester-square Soup-kitchen, an ox. The Lord Mayor has presented to the City Hospitals a quarter of an ox for the same purpose.

AFFECTING INSTANCE OF SUDDEN DEATH.—During the reading of the prayers by the Rev. Hugh Allen, on Wednesday evening, at the church of St. Olave, Old Jewry, a lady of the name of Acton was taken suddenly ill, and almost as soon as discovered by the vestry she expired.

EXTRAORDINARY FIRE IN NEWGATE-STREET.—On Wednesday morning, at a few minutes before seven o'clock, a fire of a very alarming nature, and nearly attended with fatal consequences to not fewer than five human beings, happened on the premises of Mr M'Donald, the eminent dealer at the "Number Seven" wine and spirit vaults, situate in Newgate-street, City, immediately facing the school of Christ's Hospital. The outbreak occurred in the following manner:—Some time prior to closing the house on Tuesday night, one of the inmates found that the gas was escaping from a hydraulic chandelier in the bar, which induced the proprietor of the establishment to fill the vacant space with water. For a considerable period the escape of gas was prevented by the barmaid, who lighted one of the gas chandeliers; but for upwards of two hours she smelt the gas escaping, and eventually the vapour, after accumulating to the extent of 9000 cubic feet under the cellar, became ignited, and exploded with terrific violence, breaking a great number of valuable decanters, at the same time demolishing the variegated plate glass in the bar, and setting the ground floor in one immense flame. The engine of the Lower Bridge Brigade, &c., promptly attended; and, owing to the exertions of the firemen the flames were subdued, but not until considerable damage was done. Unfortunately, the sufferer was not insured.

BIRTHS AND DEATHS.—The births registered in the metropolis for the week ending Saturday, December 11, were—Males, 810; females, 769; total, 1579. Deaths during the same period—Males, 522; females, 490; total 1012 The above return includes the whole of the metropolitan districts.

METEOROLOGICAL OBSERVATIONS.—At the Royal Observatory, Greenwich, the mean height of the barometer in the week was 29.820 in. The mean temperature of the week was 49·3 deg., which is 7·9 deg. above the average of the same week in ten years, and also 7 degrees higher than the temperature of the previous week. The mean daily temperature was above the average on every day of the week, and this excess, on each day, in the order of Saturday amounted to 10 and 11 degrees. The wind blew daily from the south-west. The amount of rain that fell in the week was 0·61 in.; and the mean difference between the dew-point temperature and air temperature was 5·3 deg.

EAST INDIA MILITARY COLLEGE, ADDISCOMBE.—On Tuesday the examination of the Gentlemen Cadets educated at the East India Company's Military Seminary, at Addiscombe, near Croydon, took place in the presence of Sir James Weir Hogg, Bart., M.P., the chairman; Russel Ellice, Esq., the deputy chairman; several members of the Hon. Court of Directors, and a number of distinguished visitors. The company arrived at the College shortly before eleven o'clock, and proceeded to the hall, where the Cadets were examined in mathematics, fortification, engineering, and other branches of study. At the close of the examination the prizes were awarded, and the chairman delivered an impressive address to the Cadets. A luncheon was then served up in the house of the Lieutenant-Governor, Colonel Abbott, to the directors and visitors, and the proceedings terminated. The drawing evinced a marked improvement, with considerable depth and brilliancy, which may in some slight degree be attributed to the use of moist water colours, manufactured by the Messrs. Reeves, which have recently been introduced into this College.

NATIONAL SPORTS.

Steeple-chasing is, and for some time to come will be, a dead letter, and the coming Calendar for next week is confined to four fixtures of no public interest, viz: Tuesday, Biggar: Wednesday, Cound, Horrigham, and Acton-Cumbermere.

TATTERSALL'S.

MONDAY.—A moderate amount of business was transacted, at the following prices:—

ANOTHER NEW PLANET.—Mr. Hind announces another discovery in the celestial regions. He says:—"I have again to announce my discovery of a new planet detected at 6 h. 30 m. 30 sec. mean time, this Wednesday, (both being evening, while comparing our celestial chart, for four threes of right ascension with the heavens. It shines as a star of the tenth magnitude, with a pale bluish light. The observed positions are:—

	Greenwich Time.			Apparent Right Ascension.			North Polar Distance.		
	h.	m.	s.	h.	m.	s.			
Dec. 15, at	7	18	39	3	12	4·98	73	10	14·5
" at	8	43	2	3	12	2·70	73	12	2·0

If am the first discoverer of this planet, Mr. Bishop proposes to call it 'Thalia.'"

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

Notwithstanding the settlement—which has passed off well and that the actual business doing has been by no means extensive, the value of the national securities has ruled very steady throughout the week. Owing chiefly to the large amount of capital withdrawn for commercial as well as for speculative purposes, the premium on Exchequer Bills has continued to decline; nevertheless, we understand that numerous *Bull* operations have been entered into for the opening of the Transfer books, on the 1st inst. Whether any profit will be derived from these transactions, remains to be seen: but our opinion is that Consols are now too high to admit of re ke's investments. It must be observed that private holders generally are not satisfied with the return from the Funds, and we do not hesitate to say that many of the securities now in the Market offer a most tempting bait to those possessed of comparatively small sums that large sums of money have been turned from what may be considered legitimate, or, rather, positively safe channels, is evident from the great rise which has lately taken place in the value of Bank and other miscellaneous Shares. However, the steady accumulation of capital in this country, the great extension of our home and foreign trade, and the rapid increase in the supply of gold in Australia, must tend to keep up the prices of Consols as well, indeed, as of most other securities. The discrimination on the part of Government not to interfere with the existing rate of interest on Consols, has done much to support the market. Of course, it is absolutely necessary to observe good faith towards the national creditors; but it occurs to us that the time will arrive when a reduction of interest will become inevitable.

On Monday the Three per Cents. Reduced, were done at 100¾; the New Three-and-a-Quarter per Cents. at 100¾; the Consols for the opening, 100¾; India Bonds were 81s to 75s; Ditto, under £1000, 80s to 75s; and Exchequer Bills, 60s to 58s premium. The changes in prices on Tuesday and Wednesday were nothing. On Thursday the 2nd inst. a steady Bank Stock was marked 213 to 214; the Three per Cents Reduced, 101 to 100¾; New Three-and-a-Quarter per Cents, 100¾ to 101; Long Annuities, 6¾ 7-16; India Bonds, 75s to 79s; Exchequer Bills, June, 62s to 63s; Ditto, Small, 60s to 63s; and Consols for Opening were 100¾.

The imports of bullion have been again large; viz. £10,000 from the Brazils; £30,000 from France; £10,000 from Spain; £134 000 from Australia; and 375,000 dollars from New York. As the exchanges upon the latter place given a slight profit upon shipments, no doubt we shall continue to receive large supplies of the precious metals, especially as the arrivals of gold at New York from California are still increasing. The total quantity of gold deposited in the various mints of the Union, this year, has exceeded £9,000 000 sterling. Heavy shipments of gold and silver have been made to London, but less than £500 000, in coin, having been forwarded to Sydney. Gold is now dearer, both at Hamburgh and Paris, than in London.

The supply of bullion in the Bank of England continues active. According to the last return it had fallen £1,250 000, being £3,000 000 less than the stock held at the beginning of September. The advances upon stocks and Railway Shares have further improved £1 240,000; on the other hand, £1,240,000; and upon other securities, £1 000,000. It is into mated that, in future, Railway Shares will find very little favour with the Direction.

Spanish Bonds—ready from the Queen's speech of disasters in Spain have ruled heavy, at drooping prices. Most other securities—especially Russian and Portuguese—including Danish and Chilian, have continued tolerably firm, at full quotations. The new Tuscan loan of £1,000,000 has been satisfactorily floated at Florence. No portion will be brought into this market. Letters from Constantinople state that the Ottoman Government have made arrangements for the payment of the principal and interest of the Loan of last year. The effect of the bond-holders to make further advances will, therefore, be futile. The Dutch Government will very shortly convert the Four per Cents into a Three-and-Three-Quarters per Cent. loan. The Government bonds of the Republic of Costa Rica, bearing six per cent. interest, have been offered in Hamburgh, at 80 5-8 per cent. A bonus of 1 per cent is expected to be given, being equal to four years of the dividend offered. The Belgian Government have made the final announcement of the conversion of their Five per Cents. In transactions have been forwarded to India for the conversion of the Five per Cent Transferable Loan of £3,500,000 in Four per Cent, without bonus, to be paid immediately, at 98 3-4, per cent. rupee. On Thursday, Brazilian Five per Cents were 102¾; Ditto, Four-and-a-Half per Cents, 98¾ ¼; Ditto, Five per Cent, New Bonds, 101; Buenos Ayres, for the account, 78¾; Danish Five per Cents, 108; Ecuador, 30¼; Grenada Deferred, 19¼; Mexican Three per Cents, 24¾; Portuguese Four per Cents, 40¾; Ditto, for the Account, 40 11-16 40¾; Portuguese, Small, 40¾, Russian Five per Cents, 119; Russian Four-and-a-Half per Cents, 104¾; Spanish Three per Cents, 20¾; Ditto, for the Account, 20¾; Ditto, Passive, 5 to 5⅜; Spanish Committee's Certificate, 3¾; Turkish Loan, 13 to 13¼; Peruvian Four-and-a-Half per Cents, 105 (cash—ex 25f. 20c.); Belgian Four-and-a-Half per Cents, 99¾; Dutch Two-and-a-Half per Cents, 67¾; Dutch Four per Cents, 99¾.

A full average business was done in miscellaneous securities. Bank of Australasia Shares have marked 78¾ to 80; Bank of British North America, 68; Chartered Bank of India, Australia, and China, 3¾; English, Scottish, and Australian Chartered Bank, 4¼ to 4⅝; London Chartered Bank of Australia, 5; Provincial Bank of Ireland, 47¾; Union Bank of Australia, 68¾; Australian Agricultural, 85; Australian Royal Mail Stm con (£5 paid), 4¾ to 5¼; General Screw Steam Shipping, 5¼ to new; North of Europe Steam, 2¾; Royal Mail Steam, 2¾; Peninsular and Oriental Steam, 82 to 82½; South Australian Land, 45; Van Diemen's Land Company (£25 paid), 9¾ to 10¼

Railway Shares in the Railway Share Market have been by no means extensive, and prices have not been supported. Foreign lines are experienced the greatest fall. The following are the official closing prices on Thursday:—

ORDINARY SHARES AND STOCKS.—Aberdeen, 24¼; Amberstn, Nottingham, and Boston Junction, 6¼; Bristol and Exeter, 107; Caledonian, 68; Chester and Holyhead, 23¾; East Anglian, 6¼; Eastern Counties, 13¼; Ditto, B. and C., 1¾; Edinburgh, Perth, and Dundee, 31; Great Northern Stock, 89 ex new; Ditto, A Stock, 44; Ditto, B, 102¾; Great Western, 56¾; Lancashire and Yorkshire, 84; Ditto, Fifths, 11¾; Leeds Northern, 17¾; London and Brighton, 108; London and North-Western, 128¾; London and South-Western, 93; Midland, 80; Norfolk, 56; Ditto, New, 8¾; Northern Counties Union, 9¾; North British, 39¾; North Staffordshire 13¾; Oxford, Worcester, and Wolverhampton, 52¾; Scottish Midland 66; South-Eastern 80¾; South Wales, 39¾; Thames Haven Dock and Railway, 6¾; Vale of Neath and Merthyr, 9¾; York, Newcastle, and Berwick, 73; York and North Midland, 59¾.

LINES LEASED AT FIXED DIVIDENDS.—Bristol and Gloucester, 167¼; Buckinghamshire Railway, 102¾; Caledonian, 104¾; Eastern Counties, 12¾, Great Western, 1, 4; London and North-Western, 1, 4; London and South Western Stock, 98¾; Manchester, Sheffield, and Lincolnshire Half Shares, 10; Ditto A's, 9¾; Newcastle and Darlington, 97¾; North British, 102; York and North Midland, 10¾.

FOREIGN.—Grand Junction of France, 7¾ ex div; Luxembourg, 6; Namur and Liege, 8¾; Northern of France, 20¾; Rouen and Havre, 9¾; Rouen and Strasbourg, 2¾; Rouen and Havre, 21; Sambre and Meuse, 11¾; Upper Indian Peninsular, 1 prem; Western of France, 20¾.

MINING SHARES have been tolerably firm. Agua Fria have marked 2¾; Anglo-California, 1¾; Australasia, 7¾; Australian, 4; Australian Freehold, 1; Ave Maria, 1; British Australian Gold, 1¾; Carson's Creek, 29 ex div.; Copiapo, 7. Cornish Consolidated, 1¾; Liberty, 2 to 1¾; Nouveau Monde, 2¾; Port Phillip, ¼; Santiago de Cuba, 10¾; and United Mex can, 9¾.

FRIDAY EVENING.—The Consol Market opened heavily to-day, at a decline in yesterday's quotations of one-eighth per cent—the Three per Cents and a few first marked 100 to 100¾. Since the morning, the business doing has been extensive, and prices have steadily advanced. The Three per Cents have run up to 100⅞; the Three per Cents Reduced, 101 to 101⅛; and the New, received-a-Quarter per Cents, 101⅛. Bank Stock, 213 to 214; India Bonds, 75s to 79s.; and Exchequer-bills, 60s. to 62s. prem. Foreign Bonds and Railway Shares firm.

THE MARKETS.

CORN EXCHANGE (Friday).—The quantity of English wheat received up to our market this week continues to be very small, and the arrivals from the country by land carriage have proved quite unimportant. Both red and white were very limited. For all kinds the demand ruled quiet at full, in most instances, further advances being asked. The quantity of foreign in port quarter. A steady business was done for forward delivery, at the late rates. Barley, only 2,93 quarters of which were entered, was in moderate request. The supply of malting was very moderate, and the trade rather inactive, at late rates. Beans, peas, and flour were steady. Oats of foreign change, and were extremely high in price. There was an improved sale for most kinds of barley and malt, at very full prices. Oats, the supply of which was trifling, were in good request, and in parcels quarter sold at extreme rates. Beans, peas, and flour were steady. A good business was done in Indian corn, the value of which had an upward tendency. The prices of the week were as follow:—

ARRIVALS.—English wheat, 1723 quarters; barley, 3430; malt, 1810; oats, 170, flour, 2,90. Foreign wheat, 3,561; oats, 9 0; flour, 30 sacks; Indian corn, 3070 bushels.

WHEAT.—Essex, Lincoln, and Kent, red, 42s to 45s; ditto white, 44s to 48s; Northumberland and Scotch, red, 40s to 43s; ditto, white, 44s to 47s; rye, 38s to 39s; grinding barley, 19s to 22s; malting ditto, 27s to 29s; malting ditto, 27s to 30s; Scotch and Irish distilling, 23s to 25s; brown ditto, 20s to 24s; Kingston and Ware, 57s to 63s; Chevalier, 58s to 63s; Yorkshire and Lincolnshire feeding, 17s to 19s; potato ditto, 21s to 24s; Lincoln and Cork, black, 17s to 20s; ditto, white, 18s to 19s; tick beans, new, 34s to 36s; ditto, old, 36s to 38s; grey peas, 34s to 35s; maple, 33s to 36s; white, 36s to 38s; boilers, 37s to 40s per quarter. Town-made flour, 41s to 43s; suffolk, 38s to 39s. Stockton and Yorkshire, 33s to 37s per 280 lbs. Foreign—American red, 32s to 33s per barrel; French, 34s to 36s per sack.

OATS.—Limited in its extent required, and value decays. Regulated active, at 19s to 24s per quarter. All other articles support late rates.

LONDON.—Wheat, 42s to 45s; barley, 27s to 30s; malt, 46s to 52s; oats, 18s to 21s; beans, 34s to 36s; peas, 34s to 36s; tick beans, new, 34s to 36s, old, 36s to 38s; grey peas, 34s to 35s; maple, 33s to 36s; white, 36s to 38s; boilers, 37s to 40s per quarter. Town-made flour, 41s to 43s; suffolk, 38s to 39s. Stockton and Yorkshire, 33s to 37s per 280 lbs. Foreign—American red, 32s to 33s per barrel; French, 34s to 36s per sack.

OATMEAL.—Limited in its extent required, and value decays. Regulated active, at 19s to 24s per quarter. All other articles support late rates.

LIVERPOOL.—Barley, 30s to 32s; malting, 40s to 48s; Mediterranean and Odessa, 26s to 28s, hempseed, 37s to 41s per quarter. Coriander, 9s to 12s per cwt. Brown mustard seed, 7s to 9s; white, 6s to 7s 6d; tares, 4s 6d to 5s 6d per bushel. English red wheat, 44s to 46s per quarter of 8 bushels. Canada, 43s to 45s per 480 lbs. Flour, 38s to 39s per barrel. Indian corn, 34s to 35s per quarter. Oatmeal, 18s to 19s per cwt. Canary, 50s to 52s per quarter.

Bread stuffs.—The sales of wheat in the mark t public are from 7d to 7½d; of household ditto, 5½d to 6d per 4lb. loaf.

Provisions.—Average prices of the week:—

Wheat, 43s 1d; barley, 29s 9d; oats, 18s 7d; rye, 29s 11d; beans, 34s 4d, peas, 34s 10d.

Tea.—Private sales to a large business has been done, in the article of tea, chiefly on speculative account, at a reduction in the quotations of a penny per lb. Common congou may be had at 1s 1d per lb. Up to Saturday last, duty was paid on 40 005,634 lbs, against 37,000,000 lbs. in 1851.

Sugar.—There has been rather more inquiry for muscovado sugar, at fully previous rates. The refining trade has realised 40s 6d to 42s 6d for fine Mauritius, 39s to 39s; good ditto, 38s 6d to 39s 6d; fine grainy yellow, 38s to 38s 6d; and low to fine white brown, 35s 6d to 37s 6d per cwt. Refined goods are dull at from 44s to 46s. Crushed lumps, 47s. Grocery raw sugars continue very firm at fully the late advance in the quotations.

Coffee.—Buyers do not exhibit any disposition to operate, yet prices are supported.

Provisions.—The sale for all kinds of butter is limited, at unaltered rates, and the general quotations have a downward tendency. In bacon, very little is doing, at 52s to 56s per cwt less money. Lard supports previous rates; but other kinds of provisions are a dull inquiry

Tallow.—The fresh arrivals are very small, and quite in part over. Fine P Y on the spot is quoted at 44, 9d to 45s per cwt; town tallow, 42s per cwt net cash; rough fat, 2s 8d per 8 lb.

Coals.—Generally speaking, the demand is steady, at full prices. Lamton, 20s to 20s 6d per cwt.

Spirits.—The market for rum is very active, at high rates. Proof Leewards, 1s 2d to 1s 3d; East India, 1s 8d to 1s 8½d; and Barbadoes, 1s 7d to 1s 7½d per gallon. Brandy moves slowly, and the quotations have an upward tendency. British-made spirits active, at full prices. Geneva, 1s 6d to 1s 7d per gallon.

Hay and Straw.—Monday, hay, 42 15s to 5 4s; clover, 4 0s, 4 15s to 5 5s; and straw, 1 17s to 2 1s per load. Trade sluggish

Wool.—English qualities are quite as dear as last week, but foreign and Colonial parcels command little attention.

Potatoes.—Scarce qualities are scarce and worth 120s to 140s per ton. All other kinds moving off slowly, at late rates. Yorks, 75s to 110s per ton.

Coals (Friday).—Carr s Hartley, 15s 6d, Holywell, 16s; Stewart's Hartley, 16s 6d; Tanfield Moor 16s; Townley, 16s 6d; Hetton, 16s 6d; Eden Main, 16s, Stewart's, 16s 9d; Carr's, 17s; Tees, 16s 9d per ton

Hops (Friday).—Owing to the extent of the last growth, our market is very moderately supplied with all kinds of hops in which a steady business is done, at 5l 10s to 6l 6s per cwt for pockets, 5l 5s to 6l 15s; Weald of Kent, 6l to 10l; Mid and East Kent, 6l to 13l 13s per cwt.

Provisions.—Although the supply of beasts on sale on Monday, for Christmas consumption was large the demand for all breeds ruled active, at, in most instances an advance in the prices of last week of 2d per 8 lb. Mutton was in good request, and generally 2d per 8lb. Veal moved off heavily, and late currencies had an upward tendency. Inferior calves were dull, and 2d per 8lb. lower. Pigs, the supply of which was moderate, sold heavily, at late figures. Milch cows were very dull, at from £14 to £ 8 each, but calving cows were in small request.

Per 8 lb to sink the offals—Coarse and inferior beasts, 3s 6d to 3s 10d; second quality ditto, 3s 10d to 4s; prime large oxen, 3s 8d to 3s 8d; prime Scots, 4s; 3s 10d to 4s 2d; coarse and inferior sheep, 3s 4d to 3s 6d; second quality, 3s 8d to 4s; prime coarse-woolled ditto, 4s 2d to 4s 4d; prime South Downs, 4s 2d to 4s 4d; large lambs, 4s 6d to 5s 6d; prime small ditto, 5s 2d to 5s 6d; large hogs, 2s 10d to 3s 6d; small ditto, 3s 8d to 3s 10d; sucking calves, 4s 6d to 5s; and quarter-old store pigs, 1l 1s to 1l 4s each.

Newgate and Leadenhall (Saturday).—A large business is doing to-day, and prices are on the advance.

Per 8 lb to sink the offals—Inferior beasts, 3s 4d to 3s 6d; middling ditto, 3s 8d to 3s 10d; prime large ditto, 3s 8d to 3s 8d; prime small ditto, 3s 4d to 3s 6d; second calves, 3s 8d to 3s 8d; inferior ditto, 3s 0d to 3s 4d; middling ditto, 3s 6d to 4s 0d, prime ditto, 4s 2d to 4s 6d veal, 3s 6d to 4s 0d; small pork, 3s 4d to 4s 0d.

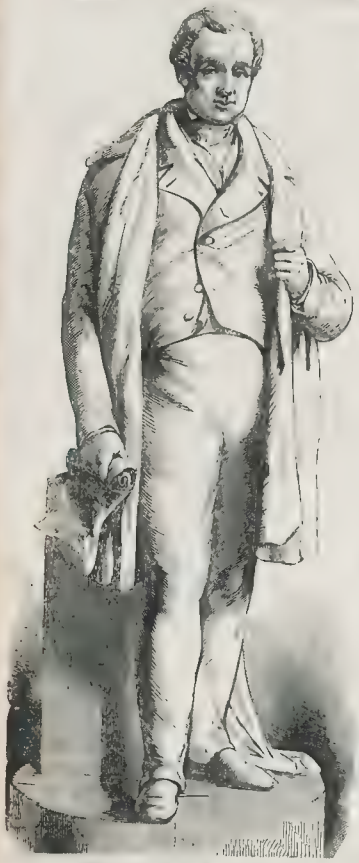
Schools and Families attended. Schools and Families attended

STATUE OF THE LATE GEORGE STEPHENSON.

A VERY appropriate ornament is about to be added to the Great Hall of the Euston-station of the London and North-Western Railway—in a statue of the late George Stephenson, who effected more than any other engineer towards the development of the railway system.

The statue, which is of fine Carrara marble, is ten feet in height; and when erected, will rest on a pedestal of the same material, in the centre of the grand Entrance-hall at Euston-station. The figure is habited in the costume of the times; and holds in the right hand a scroll, upon which is inscribed the Elevation of an Aqueduct. The sculptor is Mr. E. H. Baily, R.A.



MARBLE STATUE OF THE LATE GEORGE STEPHENSON, BY E. BAILY R.A.: TO BE PLACED IN THE EUSTON STATION OF THE LONDON AND NORTH-WESTERN RAILWAY.

SENOR LOPEZ, PRESIDENT OF PARAGUAY.

INTELLIGENCE has just been received from Buenos Ayres, dated Nov. 2, stating the recognition of the independence of Paraguay to have been formally confirmed, since the departure of General Urquiza, by the Chambers of this province, who have also declared their adhesion to the principle of throwing open to the flags of all friendly nations the navigation of the Parana.

We take this opportunity of presenting our readers with a Portrait of the present ruler of Paraguay, with a brief sketch of the events which led to his elevation

On the overthrow of the authority of the Spanish Vice-Royalty in South America, in 1810, the province of Paraguay refused to acknowledge the Provisional Junta established at Buenos Ayres, and at once declared its independence. An armed force was, in consequence, sent from Buenos Ayres, under the command of General Belgrano, to reduce Paraguay to obedience; but the army of the Junta was defeated, and the General was glad to capitulate on any terms The new State, elated with this success, then declared its absolute independence, not only of Buenos Ayres, but also of Spain. A triumvirate Government was set up, and Dr. Gaspar de Francia was named Secretary. A convocation of a general assembly of deputies from the towns and villages was next held, when Dr. Francia laid before them a scheme for a constitution, which was adopted by acclamation: his plan being the investiture of the supreme Government in two Consuls, with unlimited powers. This constitution was proclaimed on the 12th of October, 1813, and Dr. F. Yegros and Dr. Francia were named the two Consuls. Dr. Yegros shortly afterwards resigned, and Dr. Francia was elected, by the General Congress, sole Dictator of Paraguay: he died in September, 1840, at the advanced age of 85, leaving a character behind him of one of the most unscrupulous tyrants that ever had the destinies of a nation entrusted to him. The ascendancy was now hotly contested, and the Government was alternately seized by the conflicting parties, until the end of the year 1841; when Senor Charles Antonio Lopez, the present President, was placed at the head of the nation by the soldiery, as First Consul. During the above period, that is, from 1813 to 1841, Paraguay, although *de facto* independent, was an isolated state, holding no commercial intercourse with its neighbours, or with European powers; for, although both Francia and his successors were anxious to open a direct trade between England and Paraguay, still no foreigners were permitted to resort further up the river Paraguay than the little village of Nembuco, about twenty leagues above Corientes. This was owing to the peculiar situation in which the Republic was placed, with regard to its rivers: it being separated from Bolivia and the Buenos Ayrean provinces of Soita and Tucuman, by the river Paraguay, and from Brazil, and the Buenos Ayrean provinces, of Entre Rios and Misiones, by the river Parana, so that endless disputes arose between Paraguay and Buenos Ayres respecting the navigation of these rivers.

On the 25th of November, 1842, the Independence of the Republic was formally proclaimed at Assumption; and, on the 14th of March, 1844, in conformity with the fundamental law of the Republic, sanctioned by the National Congress, Lopez was nominated President of Paraguay, for ten years, and he has since been recognised by several European and South American States. The prospect of a direct trade between Paraguay and England is now not far distant, since General Urquiza, as Provisional Dictator of Buenos Ayres, has formally recognised the independence of Paraguay, and has concluded a treaty with Lopez, by which the free navigation of the rivers Paraguay and Parana is secured to the Republic of La Plata and the Empire of Brazil.

NEW EXPRESS ENGINES ON THE LONDON AND NORTH-WESTERN RAILWAY.

THE magnificent new Engines now worked on the London and North-Western Railway for the express trains are of the largest class of passenger engines yet introduced upon the narrow gauge. They combine several important improvements, which have recently been patented by Mr. M'Connell, the locomotive engineer of the company.

From the admirable proportions of all the parts, both of engines and tenders, they retain a beautiful and symmetrical appearance, notwithstanding the great power and strength of the working portion. The cylinders, which are compactly arranged inside the framing, are 18 inches in diameter, with a 24-inch stroke. The pistons, which are of wrought iron, forged solid with the rod, are, with increased strength, at least one-third lighter than when constructed on the ordinary principle; while the very rapid reciprocating motion of this part of the machine makes any reduction of weight a matter of importance. This will be better understood when it is known that it makes a difference in this instance of not less than 40 tons per minute on each piston when travelling at the rate of 60 miles per hour. The driving-wheels are 7 feet 6 inches diameter, and the axles are hollow—a mode of construction which ensures greater soundness in the manufacture, with the advantage of increased strength, and a reduction of fully one-third of the weight. The bearing-springs and buffers are of india-rubber, prepared by an improved process, rendering its elasticity uniform, and remaining unaffected by any changes of temperature.

The more peculiar improvement introduced into the construction of these engines, however, consists in the arrangement of the boiler and tubes: thus, a portion of the fire-box is continued, or rather projected, into the barrel or circular part of the boiler, and forms a recess or chamber

SENOR LOPEZ, PRESIDENT OF PARAGUAY.

for the more perfect combustion of the gases evolved from the fuel in the fire-box, into which a further supply of air is admitted through hollow stays employed for the support of the combustion chamber, and communicating with the external atmosphere. Owing to this projection, the tubes traversing the boiler are much shorter than usual; but, although the gases pass off at a higher temperature, a more intense heat is generated by the same quantity of fuel; thus, effecting great economy in the use of coke. Experiments have been made with anthracite coal, which has been found to answer perfectly, making this improvement of great importance where coke cannot be procured, unless at an extravagant price. The application of a surcharging vessel, which has been introduced into the smoke-box for the purpose of heating and drying the steam, adds a vast amount of force to its action, and greatly reduces the consumption of fuel. Not less than 50 per cent of elastic force being obtained by this application. Small steam pumping-engines are fixed upon the foot-plates to keep up the supply of water in the boilers at all times. By this means the necessity of running out on the line, for the supplying water in the boiler, is obviated.

Bourdon's pressure gauge is an appendage of great convenience to the driver, by its indicating the actual pressure of steam in the boilers.

Altogether, these engines may be considered an important step in the progress of locomotion upon railways.

MUSICAL SUPPLEMENT TO THE ILLUSTRATED LONDON NEWS.

ENGLISH SONGS & MELODIES.

THE POETRY BY CHARLES MACKAY.

THE SYMPHONIES AND ACCOMPANIMENTS BY SIR H. R. BISHOP, KNT.,

PROFESSOR OF MUSIC AT THE UNIVERSITY OF OXFORD.

MUSICAL SUPPLEMENT.] SATURDAY, DECEMBER 18, 1852. [GRATIS.

WORDS OF THE SONGS.

WITCHES AND FAIRIES.

[AIR—"Haste to the Wedding."]

I.

Oh, yes! we believe in the witches and fairies;
They tease us and please us wherever we stray;
Ellens and Claras, and Jessies and Maries,
And scores of tormentors as wicked as they.
Their eyes are enchanted,
Their dimples are haunted;
Wherever they wander, some mischief is found;
Tears, smiles,
Blushes and wiles,
And spells without number they scatter around.

II.

'Tis well there's a charm that can bring them to reason,
And make the most dangerous safe to behold;
A charm independent of place or of season—
A plain little, sweet little, circle of gold.
Put *that* on the finger,
No mischief will linger,
The witchcraft will fade and the danger depart:
Come! try,
Ye who deny,
And you'll find all the fairies kind women at heart.

BREATHE AGAIN THAT SONG OF SADNESS.

[AIR—"Lovely Nymph."]

I.

Breathe again that song of sadness,
Tender memories round it cling;
Dreams of long-departed gladness
Rise before us as you sing.
Joy and sorrow, disunited,
Seem to mingle in the strain;
Sorrow tearful and delighted,
Pleasure deepening into pain.

II.

Sing again! in happy childhood
Round the village-green we play;
Now we wander through the wild wood,
Light of heart, and fresh as May:
Dear companions roam beside us,
In whose smile our faces shine;
Love displays the light to guide us,
Earthly splendour, yet divine.

III.

Cease the song! our tears are gushing;
Joy so fervent could not last;
Floods of thought, o'er memory rushing,
Waft our spirits to the past.
Cease! oh cease! our hearts endeavour
Vainly to repress the tear;
Voices hushed, alas! for ever
Seem to echo as we hear.

NOTES ON THE MELODIES BY SIR H. R. BISHOP.

WITCHES AND FAIRIES.

"COME, HASTE TO THE WEDDING."—There is reason to conjecture, that in the "olden time" many English *dance-tunes* were founded upon melodies composed originally by the minstrels for their songs and ballads. At a later period, when the "minstrels" had disappeared, *original* dance-tunes were produced, to which words were subsequently adapted. Judging from their construction, such tunes as "The Hemp-Dresser," "Hey, boys, up go we," "Greenwich Park," "Joan's Placket," "Poor Robin's Maggot" ("If the heart of a man"), "May Fair," "Old Sir Simon the King," and, "Come, haste to the Wedding," must have been of the number. This last-mentioned very beautiful and graceful melody was popular upwards of a century ago, and is still often played in country parishes as an invitation for "friends and neighbours" to haste and "see rural felicity" at a wedding.

BREATHE AGAIN THAT SONG OF SADNESS.

"LOVELY NYMPH."—An air composed by Dr. Arne, and introduced by Michael Kelly into the burletta of *Midas*. The song of "Lovely Nymph," as originally sung, does not appear in the early editions of the music of *Midas*; but in the first edition of the words, 1764, it is stated to have been adapted to the tune of a ballad entitled, "When on thy bosom lying," a copy of which is to be found in Dr. Burney's collection of English songs in the British Museum. The tune, however, bears a striking resemblance to that of an older ballad, beginning, "Thy fatal shafts unerring move," said to be "set by Mr. Oswald." From Dr. Arne's composition I have ventured to expunge a few florid and superfluous passages—written, perhaps, to gratify a vitiated musical taste of the age—and have thereby endeavoured to render it more in accordance with the simple character of the present Series of Melodies.

In moderate time, and gracefully.

THE ILLUSTRATED LONDON NEWS

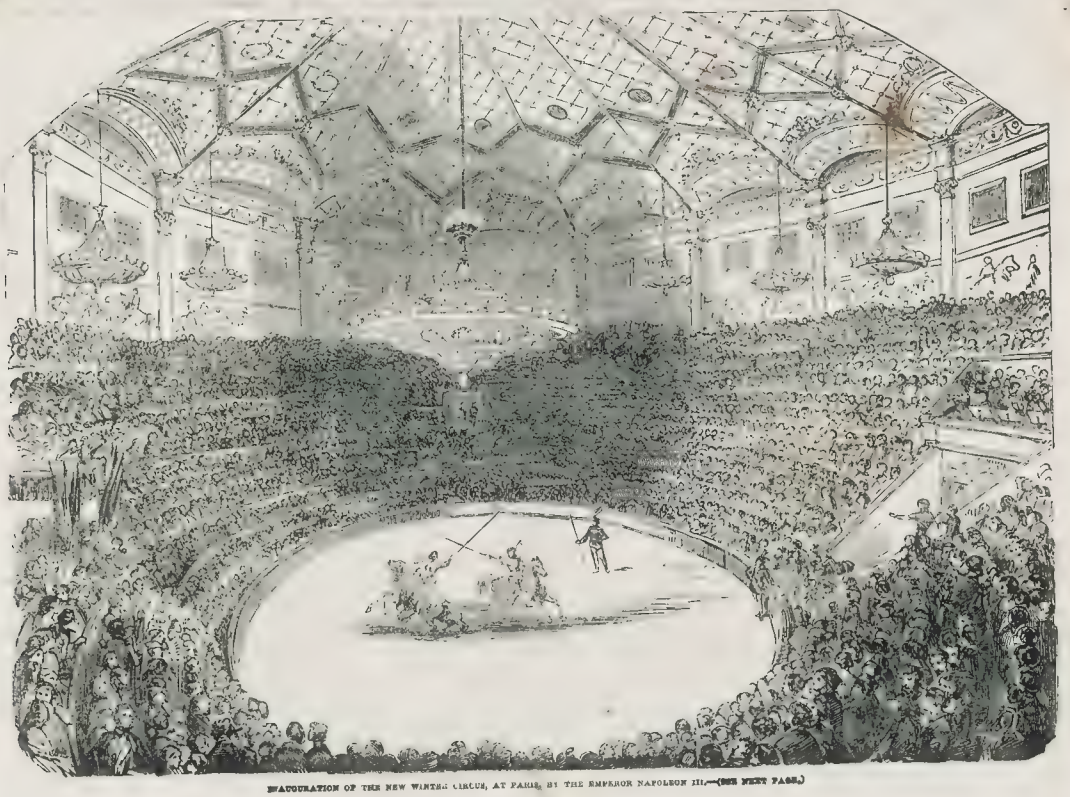
No. 599—VOL. XXI.] SATURDAY, DECEMBER 25, 1852 [TWO NUMBERS, 1s.

FALL OF THE DERBY ADMINISTRATION.

THE first trial of strength in the new Parliament has proved fatal to the Administration of Lord Derby and Mr. Disraeli. So early a catastrophe, though natural, was scarcely expected by the public, and certainly not desired by the Opposition. It was not, however, to be averted. The unwise toleration extended to men who change or remodel their opinions for the sake of power, the unhappily lax tone of political morality which is the result, joined to the unwillingness as well as unreadiness of the great Parliamentary leaders to enter upon the responsibilities of office at the present time, all tended to maintain Lord Derby and Mr. Disraeli at the head of affairs. But higher and more patriotic motives than these induced the Opposition, as well as moderate men throughout the country, to accord a fair hearing to the measures which the Ministers might propose, and to judge them, not by the demerits of their past professions, but by the merits of their present performances. Yet all these influences, powerful as they were, failed to prevent their fall.

The financial scheme on which Mr. Disraeli had based the fortunes of himself and his colleagues, was too much for the nation and for Parliament to bear. Compelled by their own sense of right, as well as of constitutional usage, to abide the decision to be pronounced upon that project, though selecting a minor and partial, rather than a broad and general, issue on which to stand or fall, the Ministers met their defeat in the manner that was expected; and, instead of striving to amend the Budget, resigned office. Their resignation was immediately accepted, and the Marquis of Lansdowne and the Earl of Aberdeen were summoned by her Majesty to form an Administration. The advanced age of the noble Marquis has prevented him from responding to the call of the Sovereign, and the wishes of the country; but the benefit of his tried sagacity, his long experience, and his unsullied character will, it is understood, be secured to the new Ministry as far as good wishes, advice, and unofficial aid can extend. The Earl of Aberdeen will have a difficult task to perform. He succeeds to office at a critical time, and selects his colleagues from parties that have not yet acquired the coherency or homogeneity hitherto essential for carrying on a Government; and he will be confronted by an Opposition of great strength, that has just disembarrassed itself of an inconvenient question, and started afresh, without the "Old Man of the Mountain" of Protection upon its shoulders, to impede or to strangle it. Yet he may reckon upon as fair a trial as his predecessors, and upon the cordial support of the country, if he follow out—as it is to be expected he will—the wisely conservative and reforming principles which he learned and practised with Peel and Wellington. Those illustrious men are no longer amongst us, but the inheritors of their statesmanship survive; and the old Whig party, with whom they have so little, if any, difference on essential and fundamental principles of policy, will have, there can be no doubt, sufficient virtue and self-denial to act with them.

But before considering the composition, the character, or the prospects of the new Ministry, it is just that, like our contemporaries, we should record our verdict upon the old. The Administration of Lord Derby and Mr. Disraeli is already a matter of history, and demands the record of the journalist. We cannot be classed among the number of those who have blown hot and cold upon the subject—who supported them once, when they seemed likely to be successful, and turned against them when defeat and disgrace "loomed in the future" before them. We may, therefore, claim to speak upon the subject with the authority derivable from consistency, great or little as that authority may happen to be. That the Ministry was an unnecessary one—we endeavoured to show in the very week of its formation. It was unnecessary, because when Lord John Russell, in the spring of the present year chose to resign office in a fit of spleen or of disgust—he was not compelled by the usages of Parliament, or by the real state of parties, to advise the Sovereign to choose his successors among the ranks of those who had not defeated him, and whose principles were not in question. But contemporary criticism may well grant the necessity of its existence. It was, and therefore it ought to have been. People look upon it as a fact, and make the best and the most of it. The impartial observer of events is justified, however, when he treats it as a fact, to inquire what was its character, individual and collective; and what good or what evil resulted from its tenure of office? Of its character little can be said. Lord Derby, throughout life, a brilliant debater and an uncertain politician, maintained



INAUGURATION OF THE NEW WINTER CIRCUS, AT PARIS, BY THE EMPEROR NAPOLEON III.—(SEE NEXT PAGE.)

l is former reputation in both respects; but forgot, or laid by, his old ambition, to become secondary to a more brilliant debater, and a more uncertain politician than himself. Mr. Disraeli was in reality, though not in name, the chief of the Ministry, and played his difficult part with a courage which many will admire, but with results up on the political morality of the age which all great statesmen of past ages will most unfeignedly deplore. The remaining members of the Admin stration were respectable and useful men, but stood at a long interval beneath these two. If Lord Derby and Mr. Disraeli were general's and field-marshals, their colleagues were but corporals at the best. If they were worthy to play *Hamlet* or *Macbeth*, the rest were but walking gentlemen, or scene-shifters. It is not now necessary to discuss their merits, for it is conceded that all, or nearly all, the good measures passed by the late Ministry were inherited from their predecessors; and that to the weak but well-meaning and honest Administration of Lord John Russell, and not to that of Lord Derby and Mr. Disraeli, were due the valuable law reforms of the present year, and even the Militia Bill itself.

When we carry our inquiry beyond the personal character of the Ministry, and ask in this convenient, but often abused, phrase l igy of the day—What was its mission? we find that Mr. Disraeli was not without his uses. It is true that he and Lord Derby impaired the public faith in public men a grievous calamity; but it must be admitted that the evil which they did was accompanied by s me countervailing benefits and advantages. They proved that not even party exigencies, strong as they are, are sufficient to fight successfully against an economic, a political, and a moral truth. Amid the storm and conflict of opinion they helped, perhaps against their will, and certainly against their convenience, to clear the political atmosphere. They rendered involuntary homage to the sagacity and the patriotism of a departed statesman. They dug the grave of an obstinate error. They removed a huge impediment from the path of all future Ministers, and left a clear field for the consideration of a thousand practical questions affecting the employment, the health, the education, and the morals of the people which that one pertinacious subject—the Corn-laws—kept continually in neglect and abeyance. For this consummation the country may well be thankful.

THE NEW WINTER CIRCUS, AT PARIS.

The opening of this magn ficent theatre, intended for performances in the winter, as the Olympic Circus of the Champs Elysées is for the summer season, was noticed in the letter of our Paris Correspondent last week. The Winter Circus is situated on the Boulevards des Filles du Calvaire: it is a vast edifice, with a decorated ceiling; and the interspaces of the supporting columns are embellished with characteristic paintings, wherein the noble horse is paramount. The seats for the spectators rise from around the arena to a great he ght, reminding one of the *cavea* of Old Rome. The orchestra is placed over the entrance to the arena; and, for the opening night, when the Emperor was present, a state-pavilion was erected for his Imperial Majesty, who was seated in front of the box, which was appropriately decorated with the colours, the eagles, &c. The Emperor evidently enjoyed the chivalrous performances in the circle, and the drolleries of M. Auriol

Altogether, this new theatre must be admired for its sparkling decorations, as well as for its vast ex ent. In the centre hangs a large chandelier, and around it a circle of smaller lustres; the flood of gas-light from which gives a fairy-like brilliancy to the entire scene.

FOREIGN AND COLONIAL NEWS.

FRANCE.

The Senate makes some small show of independence It appears that although the Emperor postponed his trip to Compeigne for several days, in hopes that the Senate would be induced at once to vote the Senatus Consultum re ative to the modi cation to be made in the constitution of the 14th of January, 1852, he was obliged to leave Paris before the final settlement of that q estion. The committee on the measure having found that the Emperor was determined not to yield on the subject of the additional powers which he demanded, agreed to accept, for form's sake, an amendment which the Emperor will have the initiative in the re-modelling of the ar ic le, but he will ask, or take, the advice of the Senate. The article relative to the granting of the Budget by Ministers gave rise to very warm discussions in the committee of the Senate. Several of the members declared that the effect would be to deprive the country of all control over the expenditure, and reminded their colleagues that a serious and real control over the Budget was the traditional right of the French people, and that it had been exercised even in the days of Napoleon I. and Louis XVIII., by the States-Gene a . They added that as the keys of the purse-strings were declared that he was determined to maintain the principle of 89, he ought at all events not to give less control over the finances of the country than was given at that period, and even before it. But none of these arguments would make the Emperor yield. His only answer was, "So the Senate wants a conflict;" and the Senate, in a fright, yielded

On Monday the Senate met, and M. Troplong read his report, the mere reading of which occupied an hour and three quarter . The question of the printing the report was carried unanimously, and the Senate adjourned till Thursday.

The Emperor, it is said, seeks to strengthen his hand by attaching the Republicans to his service For the purpose M. Bethmont, who held a seat in M. de Lamart ne's Provisional Government, was summoned to the Tuileries, and honoured with an audience. Louis Napoleon did not discuss his views of able agents, or the hostility of all the statesmen who had belonged to the Moderate parliamentary Governments anterior to 1848. He expressed his readiness to treat on almost any terms with the men who had served the Republic, observing that they must now be aware that no government but his own was possible. M Bethmont was summoned to communicate what had passed to his friends, including General Cavaignac It is unnecessary to add that the result was a cool ve and indi ant refusal.

On Sunday the Emperor left the Tuileries for Compiegne, where, on Monday, attended by the representatives of foreign Courts, he had a grand hunt.

PRUSSIA.

In consequence of the visit—a visit not without a political purpose—the first, we believe, that has occurred of an Austrian Emperor to Berlin, that town is in a state of unwonted gaiety. On Saturday a grand parade took place, and furnished a noble sight to the foreign officers and to the citizens of Berlin. The great point of attraction was the young Emperor, whose earnest and expressive countenance, symmetrical figure, and erect military carriage, produced a most pleasing effect. In the evening, a magnificent banquet was held in the White Hall, where covers were laid for u, wards of 450 of the most distinguished personages of the land, as well as for the suite of the Emperor, and some other foreign officers, among whom were M. or General Charles Baillache and Colonel Torrens, of the Welsh Fusiliers The third act of the day's amusement was a gala then re, to which, in addition to all the party who dined at the palace, there assembled all the diplomatic corps and their ladies, without exception, were invited, the whole of them having been engaged for the purpose by the King. The piece was a sort of opera of "Orpheus," to which little attention was paid, as eyes being intent on the Royal box, where sat the young Emperor, who was greeted upon his entrance with most enthusiastic cheers and waving of handkerchiefs, which his Imperial Majesty replied to by bowing repeatedly from the front of the box. The aspect of the house was splendid. Every corner from the pit to the roof was filled with ladies and gentlemen in uniforms or court dresses, sparkling with stars and decorations, and resplendent with the costly toilets of the diplomatic and court ladies which former have in this country rar. occasions for exhibiting their taste or splendour. It was nearly half-past nine when the drop-scene fell upon an allegorical scene representing the union of Prussia and Austria, and the Royal party withdrew amidst the loudest cheers.

SPAIN.

The Ministry of Bravo Murillo exists no longer. General Roncali called on by the Queen, has formed a Cabinet as follows:—Roncali, Premier, and Minister for Foreign Affairs; General Lara, War; General Mirasol, Marine; Valvey, Justice; Aristizabel, Finance; Llorente, Interior.

With the exception of one or two, the present Ministers are not persons of much influence, or much known in the political world General Roncali came into notice in 1842, after the downfall of Espartero, at le ast enabled for a short time in the Basque provinces between the Carlists and Christinos to the Captain-General of Granada, where he carried on a command fiercely and unscrupulously. His services were rewarded by the rich Captaincy-General of the Island of Cuba, where he conducted himself more that of O'Donnell than of Jose Concha. He is never heard as a politician General Lara is only known as having commanded for some time in the Campo de Gibraltar. Neither has the new man any great position in the army, a thing remarkable in his career General Count Mirasol is better known. He is the senior member of the Cabinet. He commanded in Bilbao in 1835, when Zumalacarregui besieged that city, and when the Carlist chief was struck by a stray ball from the effects of which he died a short time after. In one of the sallies outside the garrison, Mirasol narrowly escaped being made prisoner by the Carlist outposts. He commanded in Guipuzcoa, in the Basque provinces, in the summer of 1837, and had his head-quarters at Hernani, when he was obliged to fly, in consequence of an insurrection in one of the Spanish regiments of the garrison. An English officer, named Ellsworth, who had belonged to the British Auxiliary Legion, was shot dead by mistake for the General, whom he resembled in size, though much younger. General Mirasol afterwards commanded in Puerto Rico Count Mirasol, however, is best known to the English public by his mission to London in 1848. It was he who was sent by the Duke of Sotomayor to explain the reasons for the delivery of his despatches to the British Minister by the Spanish Government. M. Valvey is not much known He is considered to be an ally of M Salamanca, as also is M. Aristizabel, who is still less known. M. Llorente was in 1846 a member of the ephemeral *Terza Pavia*, the Puritanos—at the head of which was M. Pacheco, who was Minister with Salamanca, General Cortina, Ros de Olano, Pezuela, and others In 1848, that Ministry was upset a Court intrigue, in which General Serrano who was then the great favourite, took so prominent a part. General Narvaez resigned after the power of the Queen Mother was annihilated by the Revolution of 1840. Again, we hear from Madrid that the mountaineers of the Herzegowina refused the payment of taxes, and have declared that they are ready to oppose force to force. The certainty of receiving aid in case of need, not only from the Sclavonic portion of Austria, but also from other provinces, explains the fact that the Montenegrines, who hitherto, however expert in raids and forays, have never been trained to field fighting, now venture to wage warfare with the Sultan's troops on Turkish ground. The 40,000 men force disposable for their reduction cannot be very formidable, on account of the numerous and grievous impediments in the way. But the Montenegrines are, moreover, remarkable for courage and fortitude The leaders put the entire Turkish garrison of Zabjak to the sword, in order that the soldiers might not take their place might feel that in the event of an attack by the Turks, of defeat, they had nothing to look for but death, and so might fight with the energy of despair.

AMERICA.

President Fillmore has delivered his last message, preparatory to his resignation of power. It is dated Washington, December 6th. It asserts that satisfactory explanations have been given by the British Government of the real nature and object of the recent movements in relation to the fisheries of the north-east coast, and a desire is expressed that new arrangements in regard to these fisheries should, if possible, be made between the two countries, redounding to their mutual advantage. The effort, it admits, would be attended with difficulties, but yet, there being a sincere desire on both sides, it is not unlikely to prove successful. Reference is made to the Cuban question, and the difficulties affecting the commercial intercourse with Cuba They are spoken of as comprising acts of which the United States have a right to complain; and it is stated that the refusal of the Captain-General to allow passenger and the mails to be landed in certain cases from vessels which did not comply, in the opinion of the Government, even a good presumptive ground for such a prohibition, has been made the subject of a serious remonstrance by the United States Government. In the earlier part of the present year, I was officially invited by England and France to become a party with those powers to a Tripartite Convention, binding themselves against an acquisition of any portion of the Island of Cuba by any of the three, and that the invitation was respectfully declined. Yet efforts, it is declared, have been made to induce the two Governments named to adopt measures against the views and objects of the United States Government, and to incorporate Cuba into the Union.

The differences between the Government and Mexico, in regard to the Tehuantepec route, are acknowledged to be embarrassing, but it is hoped they will be satisfactorily adjusted. A similar hope is expressed in regard to the Nicaraguan difficulty. Venezuela, it is stated, has acknowledged important claims of citizens of the United States Steps have been taken to obtain commercial access to the extensive countries which l y the tributaries of La Plata.

In regard to the Lobos Islands, it is fairly and honourably admitted that further investigation has removed all doubt of the title of Peru to a sovereignty over them

Reference is made to the Japan Expedition, and its object is distinctly declared to be the procurement of a relaxation of the unhospitable and anti-social system which Japan has pursued for about two centuries, and to be altogether peaceful and friendly in its nature

The domestic affairs of the country are represented as very satisfactory. The revenues of the country are in an unusually prosperous state.

The President again urges the strong facts and arguments in favour of the revision of the present tariff, so as to prevent frauds, and better protect the industry of the country. Whatever disposition of this matter may be made by Congress, the Executive has fully acquitted itself of all its duties in regard to it The unsatisfactory operation of the present law, it would seem, is too manifest to be either denied or to.erated.

The general condition of Indian affairs is believed to be improving In regard to the Mexican boundary commission, it is stated that the survey of the Gila has been completed, but that the survey of the Rio Grande has been suspended, in consequence of defects in the existing law. The efforts during the year to restrain the incursions of the Indians into Mexico, it is said, have been unusually successful.

The Message closes with a clear and powerful vindication by the President as to his adhering, in all great essentials, to the liberal conservative policy laid down by the fathers of the Republic.

WEST INDIA MAIL.

By the *Orinoco*, which reached Southampton on Sunday, we hear much of the ravages of disease in the West India Islands. The cholera at Nassau had nearly disappeared, though in other parts of the Bahamas it was raging to a considerable extent. At St Thomas's and the Leeward Islands the yellow fever was making sad havoc Several of the officers and crew of the *Esk* had been attacked with yellow fever, soon after leaving at Thomas's. The mortality at Barbadoes, both among the natives and Europeans, had been very great Assistant Commissary Neil and the whole of his family, numbering six persons, had fallen victims to the disease Two or three cases of undoubted cholera had occurred at Jamaica, the small pox was disappearing. Sir Charles Grey was about to leave Jamaica, and Lord Howard de Walden or Lord Wharncliffe would be his successor A severe shock of earthquake was felt at Jamaica on the 26th ult, but did no damage Trade was dull in every department. The produce-market was quiet. Rum and sugars maintain last quotations. The heavy rains in St. Elizabeth and Manchester districts have been most destructive to the coffee crop. Ten deaths from yellow fever occurred in the homeward passage of the *Orinoco*. On Monday Sir William Pym, from London, visited the *Orinoco*, and determined that the vessel and its passengers should remain in quarantine for the present.

IMPERIAL PARLIAMENT.

RESIGNATION OF MINISTERS.

In the House of Lords, on Monday, the Earl of Derby rose and said, consistent with the usual practice on such occasions as the present, he came forward for the purpose of making that declaration on the part of the Government in the House which was generally expected on Lau. In coming to, he felt bound to enter into an explanation of the causes which had led to the resignation of the Government, an event which could not, under any circumstances, but be more or less productive of disturbance to the public service. He felt that he might rest to throw no office from any light grounds. He was relieved from the necessity of trespassing at any length upon their Lordships' time, because the grounds of his resignation was on the surface and patent to all. There were 310 gentlemen in the other House, who, he believed, were disposed to give their support to the Government. There were, however, three, if not more, other parties in the other house with whom the Government had to deal. The one included in its ranks a great variety of opinions, from the high and aristocratic and exclusive Whig down to the wildest theorist and most extreme Radical. That party comprised about 2-5 in number There was another party from the other kingdom, which principally represented the views of the Irish Roman Catholic clergy, and the extreme doctrines known by the title of Ultramontanism. That party was pledged to overthrow the present or any other Government in which it was not prepared to act as they were disposed to give their support to the Government. There were, however, three, if not more, other parties in the other house with whom the Government had to deal. The one included in its ranks a great variety of opinions, from the high and aristocratic and exclusive Whig down to the wildest theorist and most extreme Radical. METROPOLITAN NEWS.

POLITICAL MEETING AT LORD DERBY'S.—On Monday, at noon, about 160 members of the two Houses of Parliament, met at the official residence of the right Lord of the Treasury, in Downing-street. Lord Derby addressed the meeting at some length, declaring, his firm resolution, at whatever cost of personal convenience, to continue his services to the great cause and the powerful party with which he was so closely connected, and urging upon all present the imperative necessity that existed for the closest and most intimate union. A general feeling of satisfaction was manifested at the conclusion of this address; and a strong expression of confidence in the character, conduct, and guidance of the noble Earl was embodied in a speech made by Lord Delaware.

FINE ARTS IN THE NEW CRYSTAL PALACE.—A letter has been received by Messrs. Owen Jones, and Digby Wyatt from the Baron Von Klenze, of Munich, who, during their visit to that town, kindly undertook to interview with King Louis of Bavaria for permission to mould some of the chief works of sculpture belonging to the public galleries and monuments. Baron Von Klenze reports that the interest which his Majesty feels in the Sydenham undertakings as a step in the same direction as his own institution of the Glyptothek—is so great, that he has granted in his favour the permission which he has hitherto refused even to the Governments of Europe. The works which will be thus first cast in metal through the knowledge of the English public are "Schwantha er's Victories," a colossal figure from the monument of Kaiham, by Hadgs; and the finest antique sculptures of the Glyptothek, the private property of the King. The Academy of Munich has kindly granted permission to mould the colossal head of Bavaria, by Schwanthaler.

ST. THOMAS'S DAY.—Tuesday being St. Thomas's Day, wardmotes were held in each of the 26 wards of the City. In very few of them did any contest or change occur.

THE LATE CONTEST FOR MIDDLESEX.—On Tuesday night about three hundred and fifty gentlemen sat down to a cold collation at the Albion Hotel, Hammersmith, to celebrate the return of Lord Robert Grosvenor and Mr. Bernal Osborne. Sir John Shelley, M.P., occupied the chair, and was supported by Lord R. Grosvenor, M.P., Mr. Osborne, M.P., Mr. A. Rothschild, Mr. J. Williams, D. Sampson, Captain Reid, Captain West, &c.

CHRISTMAS GIFTS TO THE POOR.—On Saturday last the parochial authorities of St. Clement Danes, St. Martin's, St. James's, and nearly every parish in the metropolis, commenced the distribution of their Christmas gifts, and with them blankets, flannel, tea, and small gifts of money to the aged. On Monday the Queen's bounty of 5s. to each of 460 persons above 60 years of age was distributed at the Almonry Office, in Scotland-yard. On Christmas-day, at dinner, roast beef and plum-pudding is to be given to some thousand poor people at the City Soup Kitchen and the Leicester-square Soup Kitchen. Bands of music have been engaged, and music is to be played during the evening.

THE PARISH OF ST. CLEMENT DANES AND THE LATE DUKE OF WELLINGTON'S FUNERAL.—The Committee having the conduct of the erection and sales of sittings in the Churchyard of St. Clement Danes, on the occasion of the funeral of the late Duke of Wellington, have already been enabled to dispense the following sums to the undermentioned valuable institutions, viz:—the St. Clement Danes' Benevolent Pension Society, £31 10s.; the King's College Hospital, £310 0s.; the Strand Union Workhouse, £30; the St. Clement Danes' District Visiting Society, £30; the Parochial Charity Schools, £25; the Public Dispensary, £25; the Parochial Sunday Schools, £20, with many other charitable donations of smaller amounts.

ABOLITION OF CHRISTMAS-BOXES.—The City and metropolitan commissioners of police have issued stringent orders to the constables that they were to refrain under pain of dismissal, from soliciting Christmas-boxes.

EAST INDIA CADETS.—At a general quarterly meeting of the East India Company, held on Wednesday, the following motion made by Captain M'Gregor was carried unanimously:—"That in accordance with a principle which obtains at the Royal Military Colleges of Woolwich and Sandhurst, it be recommended to the Honourable the Court of Directors to establish at Addiscombe a reduced scale of payment for cadets, reducing the charge for the sons of Indian officers proportionately to the ascertained means of parents, provided the same can be effected without increased charge to the East India Company."

THE NEW CHELSEA-BRIDGE.—The works for the construction of the new suspension-bridge near the end of the Grosvenor canal, Chelsea, and which is intended to connect that neighbourhood and Pimlico with the long-delayed Battersea-park, are being carried on with great activity. The structure, it is said, is now far in advance of any other building on the river nearly completed, and when the planking of the bridge is laid down, it will rise the level of the road from 18 to 20 feet above the present ground, and will be applied on the same with the level of the new streets to be built in this Commercial-fields, and which will branch off from the proposed new street in continuation of Lower Sloane-street. When the whole work is completed, the bridge and the craft will be enabled to pass under the bridge without lowering their funnels or masts at high water. The remains of the Great Exhibition building are to be put up in time in the Commercial-fields; pillars, balusters, column, and all the iron railing that surrounded the outside of the building are here, whence they are taken, as wanted, down the river to Sydenham.

THE BRITISH MUSEUM.—A valuable addition to the extensive catalogues to the Museum library has just been made, in the form of an explanatory catalogue of such on music possessed by the library of the nation. The above catalogue introduced to the reading-room is entirely in manuscript form, and is composed of 87 volumes folio. It is divided into two parts—music, and names of authors of music so made.

DEATH OF THREE PERSONS FROM THE FUMES OF CHARCOAL.—On Sunday morning, Thomas Martin, aged 24, Harry Burton, aged 17, and William Sheen, aged 20, assistants in the emp oy of Mr. Elliot, a cheesemonger, of Prince-man-place, but their lives by the effects of charcoal fumes. The deceased left at an early hour on Sunday morning, in a room where a period charged with decadent charcoal was standing under an opening in the skylight, there being no chimney in the apartment. Their non-appearance on Sunday at the usual time, led to a search, when two of them were found dead in their beds; while the third, Burton, was unconscious, and died in the evening.

FIRES IN THE METROPOLIS.—There have been very numerous fires this week. On Monday, there was one fire under the Eastern Counties Railway, in No. 36 arch, situate in Tapp-street, Bethnal green, the property of Mr. T. Cripps, a pig and cattle merchant.——Another took place in the premises of Mrs. Ellen Sullivan, No. 17, Wells-street, Poplar.——A fire occurred on the premises of Mr. J. Smithey, a bread and biscuit baker, No. 1, Brick lane, Old-street, St. Luke's.——A fourth broke out in the premises of Mr. J. Bedford, No. 35, Artesian-street, Weston-street, Southwark.——A fifth happened on the premises of Mr. S. M. Mann, oilman, No. 35, Langley-place, Commercial-road.——A sixth took place in the premises of Mr. J. Seaborne, 3, Blue Anchor-alley, Ratcliffe. The greater part of these fires originate from carelessness with candles.——On Tuesday a fire, attended with a destruction of property valued at several hundred pounds, broke out in the extensive premises belonging to Mr. R. Smith, linen-draper and silk-mercer, carrying on business at Camberwell-gate. The outbreak commenced in the shop from, it is supposed, an escape of gas.

BIRTHS AND DEATHS.—Last week the births of 878 boys and 784 girls were registered in London. The deaths were 1041.

METEOROLOGICAL OBSERVATIONS.—At the Royal Observatory, Greenwich, the mean height of the barometer in the week was 29.318 inches. On Wednesday the mean height was 29.814 inches, and on Friday it was 30.044 inches. The mean temperature of the week was 48.5 deg., which is 7.5 deg. above the average of the same week in ten years. The mean dew point temperature was about 43 deg. on the first three days, and from 6 deg. to 8 deg. above it on the next three days. On Friday the mean temperature was 49 deg., and on Saturday it fell to 41 deg.

RAILWAY LEGISLATION.—The committee, consisting of Mr. Henley, Mr. Hume, Mr. Gladstone, Mr. Labouchere, Mr. Strutt, Mr. Patten, Col. Mure, Captain Jones, Mr. Deedes, Mr. Milnes, Mr. Denison, and Mr. Laffan, appointed to consider the principle of amalgamation as applied to railway and canal bills about to be brought under the consideration of Parliament, and to consider the principles that ought to guide the House in railway legislation, have reported that in their opinion all railway bills introduced into the House during the present session should, as a general rule, be made integral in them selves, and that the greatest caution should be exercised in admitting into their, otherwise than by specific enactment, provisions which repeal, continue, or extend the powers of former acts, and that the attention of committees on private bills should be directed to this point.

THE WELLINGTON NUGGET.—This singular piece of gold, which has recently attracted so much attention in London, from the great resemblance in profile to the late Duke of Wellington, was brought in to the month of June last from the Rock Diggings, on the Peel river, Tamworth, New South Wales, by Mr. Stuart A. Donaldson, one of the members of the St. Kilda Legislative Council, and by him shipped to Messrs. Donaldson and Lamb er., of the City. The resemblance to the features of the Duke are surprising in the bold forehead, the nose, the temple, with the peculiar shape of the mouth, and over lip. The weight of this nugget is something more than six ounces, of pure gold. It arrived in England by the *Maitland*, on the day of the Great Duke's Fun eral.

QUARANTINE, AND THE EUPHRATES ROUTE TO INDIA.—Dr. Thompson has just returned from his mission to Constantinople and Vienna, to make inquiries upon the above subject, and on Wednesday had a long interview with the Earl of Malmesbury, at the Foreign-office.

ARMS FOR THE KAFFIRS.—It has been often asked how the Kaffirs get supplied with arms and ammunition. The following account may throw some light on the matter. A large French barque was driven ashore at Natal, on the Chesil Bank, near Weymouth, on the night of Wednesday last, laden with muskets and gunpowder. Out of fifteen sou's who c mposed the crew, only six were saved. Upon being asked where the vessel w. s bound, it was answered, "The Cape of Good Hope."

MUSIC.

THE HARMONIC UNION.

Mr. Charles Edward Horsley is the first composer who has selected the Biblical narrative of Joseph and his brethren for the subject of an oratorio. The celebrated Mehul, the pupil of Gluck and rival of Cherubini, composed an opera in 1807, called "Joseph," which was produced at the Opera Comique, and was revived at the same establishment about two years since with prodigious success. The opera has been presented in this country as an oratorio, but Mehul never contemplated that his work would be executed in any other mode than that which the lyric stage exacts, namely, with a dramatic *mise en scene*. It was the popularity of Mehul's "Joseph," in France and Germany, which induced Rossini to compose "Moise" (known in England by the two titles of "Pietro el Eremita" and "Zora"), and which also prompted Auber to compose the "Enfant Prodigue." It is to be regretted that Mr. C. Horsley, the clever composer of "David," an oratorio of so much promise, should have chosen for his second sacred work the legend of "Joseph," the incidents of which are so picturesque and admit of such fine opportunities for contrasts and diversity of treatment. It is evident that however prolific have been the productions of painters, in illustrating the principal adventure of Joseph in Egypt, the poet and the musician are debarred from using the incident in an oratorio. It is to be doubted whether any ingenuity could have rendered the story of "Joseph" sufficiently interesting for a sacred composition of three hours' duration; and it is positive that the author of Mr. Horsley's oratorio has utterly failed in doing so. A more confused book, a duller narrative, and words more ill-adapted for music, have rarely been met with. A musician of creative genius might, perhaps, have triumphed over the fatal defects of the poem; its monotony might have been relieved, and its diffuseness rendered less wearisome; but Mr. Horsley seems to have been depressed by the heaviness of his materials; and the youthful elasticity, which, despite the want of originality in "David," inspired the amateurs with such hopes of the young composer's future, has disappeared in "Joseph." Long before its conclusion, the auditory must, Easter-laid, with us, evidently felt such a sense of fatigue and prostration, that the benches became deserted, leaving only to a very small minority the task of calling for the composer as a tribute of respect, at all events, for his industry and his unquestionable talent. Many of the oratorio choruses cannot be a particle of sustained interest, as a whole; although in detached pieces, the composer commands the sincerest sympathy, and, at times, the cordial admiration of his listeners. The orchestral part is the symphony between the first and second acts, may be subjected to the charge of over-elaboration; but the two orchestral pieces are beautifully scored, and the accompaniments to many of the choruses equally challenge eulogium for their fancy and piquancy. However clever may be some of the vocal combinations, sublimity is never reached; and an oratorio without sublimity is like an epic without genius—the length only making the want of the divine spark more sensibly felt. Essentially Mendelssohnian as are the ideas and forms of Mr. C. Horsley, he signally fails to imitate the vocal fine and inspirations of his great model. The most natural, the most unaffected, and consequently the most pleasing specimen of part writing, is in the quartet "He Lord Knoweth," sung by Miss Birch, Miss M. Williams, and Messrs. Lockey and Lawler; and it was redemanded with unanimous alacrity. Miss M. Williams was also invited to repeat the contralto air, "How Plentiful is thy Goodness," which has been inserted in the work since its first performance by the Liverpool Philharmonic Society, on the 21st of May last. Mr. Horsley has been remarkably happy in writing for the tenor songs for Mr. Lockey, who sang the part of *Joseph* with an expression and fervour worthy of especial commendation. There can be no question that the bass airs, allotted to Mr. Lawler, as *Jacob*, must have been infinitely more effective in the hands of Herr Formes, who sang the part in Liverpool, and every allowance must be also made for the want of sufficient rehearsals; but, all drawbacks and contrarieties admitted, the lack of individuality in the composer's style was too palpable to be open to mistake as to the impression created by the first performance in London of Mr. Horsley's "Joseph." He has displayed a very honourable and praiseworthy ambition; and, as a musician of considerable attainments, he will be respected; but, as an oratorio writer, his fame will have to rest on the future, not on the present.

Of the aims and intentions of the "Harmonic Union," mention has already been honourably made in these columns. The main object—to afford to living composers the opportunity of producing their works sacred and secular—is so good, that all success and encouragement ought to assist the society in every possible manner. An admirable orchestra has been engaged, under the experienced command of Mr. Benedict, who has already displayed the utmost zeal for art advancement in this country. The choristers must be, however, cautious in the production of new works, and must be careful that they are not performed without sufficient preparation; the failure of Bach's noble motet in B flat, No. 6, on the opening night, should be a warning to secure the services of a p aniste who can sustain with tact the voices, in emergencies such as those which unfortunately occurred.

Mendelssohn's "Walpurgis Night," Beethoven's "Ruin of Athens," and a new overture by Henry Leslie, will be included in the scheme of the first secular concert. Here, again, is a noble, and novel field for exertion. In addition to the MS. works of our native composers, why not introduce the latest compositions of Schumann, Richard Wagner, Gade, Reber, David, Berlioz, &c., to afford a motion of the state of continental art?

MUSICAL EVENTS.

A meeting of the Board of Professors of the Royal Academy of Music—including Mr. C. Potter (chairman), Sir H. R. Bishop, Messrs. W. S. Bennett, Goss, Lucas, Blagrove, and Howell took place on Monday, for the election of candidates for the vacant King's Scholarships. There were 12 candidates, about 15 of whom were pupils of the Academy, and the other half strangers. The election fell on Miss Janetta Aylward and Mr. Henry Baumer (pianoforte and composition). Miss Rosina Bentley and Mr. Louis Schroeder received special notice, and the following were highly commended:—Miss Sadler, Spiller, M. Males, R. P. Lyne, S. Marie James, and Eliza A. Hughes; and Messrs. J. W. Pen, W. Pettitt, and T. Watson. There were more competitors than has been known for some years past, and a considerable degree of talent was displayed, particularly in the female department. The branches of study of the candidates were chiefly the pianoforte, harp, violin, violoncello, and harmony. The ages of the candidates varied from twelve to nearly eighteen years, no one having allowed the limit of the compete ages of nine years of age.—The last meeting of the fourth season of the Brighton Musical Union took place on Thursday at the Royal Pavilion. the executants were Madame Oury (pianoforte), Messrs. Oury and W. Hill (violins), Mr. W. Cramer (viola), Mr. R. Nibbs (violoncello); and Miss Messent, Mrs. Dance, Signor Arigotti, and Mr. Normanville (vocalists).——The Cecilian Society performed Handel's "Messiah" last night, at the Albion Hall.——Miss Dolby gave her third and last *soirée* on Tuesday night, assisted by Miss Birch, Miss Barnley, Messrs. Francis, Land, Bodda, W. S. Bennett, Sainton, Dando, Lucas, Lazarus, and Lindsay Sloper.——Haydn's "Creation" was performed, on Wednesday night, at Mr. Salaman's Amateur Choral Meeting.——The same performance took place at Exeter-hall, on Wednesday last, under Costa's direction, Madame Fiorentini making her second appearance on this occasion. Miss Birch and Miss Dolby, Mr. Lockey and Mr. Phillips, were the other vocalists.——In New York——Mendelssohn's "Elijah" was executed by the London Sacred Harmonic Society, under Mr. Surman's direction. The oratorio was preceded by Dr. Mackay's elegy, "Mourn for the Mighty Dead," the music by Sir H. R. Bishop (published in the ILLUSTRATED LONDON NEWS). The principal singers were Mrs. Anderson, Miss Stewart, Miss C. Felton, Miss Dolby; Messrs. Lockey, Seymour, Morgan, Cotterell, Barsham, and Phillips.——The accounts of Sontag's great success in America are fully confirmed; she was to appear in Italian opera at New York.——Meyerbeer had not been so fortunate in her concerts as had been anticipated, although her singing was so much admired.——Madame Thillon, Mrs. Bishop, and Mr. Augustus Braham had no reason to complain of the want of patronage in the United States.

JULLIEN'S BAL MASQUE.—We understand that there were admitted to the parterre of Drury-lane Theatre, on the night of Jullien's Bal Masqué, last week, 2600 persons, and to the other parts of the theatre, 2256 spectators; total, 4786 persons. Such was the anxiety to witness the fancy dress that private boxes were let at from eight to twenty guineas, making the entire receipts to exceed those at any former Bal Masqué in London or Paris. M. Jullien's popularity is attributable, irrespective of his talent, to the fact that during a period of fourteen seasons he has never disappointed the public, or been induced to prolong an engagement beyond the advertised "positively" last night.

THE THEATRES.

PRINCESS'.

On Saturday, as we had announced, the veteran Mr. Bartley took his farewell benefit at this house, being the fiftieth anniversary of his acting. The play was the first part of "Henry IV." Mr. Bartley's performance of *Falstaff*, on the last occasion, was touchingly interesting. It was full, also, of his usual unction, and he revelled in the humour which he had to embody. At the conclusion, Mr. Bartley delivered an admirable farewell address, with great elocutionary propriety and emphasis, which was followed by immense applause. The house was crowded in every part.

FORTHCOMING PANTOMIMES.

The theatres, at the time of our going to press, are busy with night-rehearsals of their Christmas pieces. DRURY-LANE will make its usual spending feature, and the pantomime, from the pen of Mr. Blanchard, is announced under the title of "Harlequin Hudibras; or, Dame Durdan and the Droll Days of the Merry Monarch." The subject is a good one: and *Clowns* (Tom Matthews) excellent. It will be preceded by a new drama in three acts, founded on "Uncle Tom's Cabin," and dramatised by Mr. Fitzball, who professes to have depicted therein "the horrors of slavery." At the PRINCESS', the name of the pantomime is "Harlequin Cherry and Fair Star;" while SADLER'S WELLS rejoices in the subject of "Whittington and his Cat."

Mr. Nelson Lee, as usual, provides pantomines for his own and other stages. In that at the ADELPHI, he will be aided by the extraordinary talent of Flexmore, the most excellent of modern clowns. The subject selected is certainly a happy one—"Nell Gwynne, or, Harlequin, the Merrie Monarch, and the Orange Girl;" and, from the programme, the piece includes an unusual variety of character, and a profusion of scenery, with an extraordinary amount of decoration; particular care having been taken to provide Flexmore with sufficient opportunity for eccentric display. Next to this, the pantomime at the OLYMPIC, is opulent in resources, and has a theme capable of abundant development. "Romeo and Juliet; or, Harlequin and Queen Mab in the Land of Dreams," is the attractive title; and the incidents and poetic personifications of the dialogue of the immortal drama are wrought into an ingenious and allegoric series of scenes, in which the demon of Poison, appears as the principal character, a prominent part. Mr. Edwardes is the clown. A third pantomime, by the same author, appears at ASTLEY'S, entitled "Fortuno and his Horse Comrade, and the Seven Gifted Men," The clown is Mr. Gardeven Bolero, and the piece of the most costly description. At the LYCEUM THEATRE, in the CITY OF LONDON, Mr. Lee has trusted to a subject of his own invention, sufficiently intelligible, however, from the title, "King Emerald and Harlequin in the Crystal Palace on Fairy Land," in which are introduced some new and remarkable mechanical constructions by Mr. Beaumont and Mr. J. Johnson.

The HAYMARKET promises an extravaganza, called "Leo the Terrible;" but the LYCEUM has not yet announced the name of its Christmas drama.

GALLERY OF ILLUSTRATION.

—Additions for the holidays have been made to the Diorama of the Wellington Campaigns—the Lying-In-State of the remains of the Great Duke the Funeral Procession—and the interior of St. Paul's. The last is accompanied with music and singing; and by a combination of art, the illusion of the scenes both of seeing and hearing with the solemn reality of the scene. The lecture was well delivered, and attended on Monday by a numerous and well-pleased assembly of spectators.

MR. J. L. TOOLE.—This gentleman—whom we commended some twelvemonth since for his resumption of character-parts in certain humble entertainments at more than one literary institute—has adopted the advice given him by several journals—ours among the number—and taken to the stage as a profession. We find that he has been serving his 'prentice term at the Queen's Royal Theatre, Dublin, and succeeded in such parts as *Paul Pry* and *Robert Tyke*; his quaint and original drolery, pathos, and impersonating power being acknowledged to be first-rate. We are not surprised at this result. Last week, we learnt that Mr. J. L. Toole took his benefit, which was extremely well attended, on which occasion he appeared in a smartly-written original farce, by Mr. Edward Copping, entitled "Wanted a Madman," and which proved highly successful. His acting and make-up as *Waifs* is reported to have been admirable. We have no doubt of Mr. Toole's prosperous career.

NATIONAL SPORTS.

The steeple-chase campaign for 1852 is at an end, and the only proximate gatherings for next year are Stratford, on the last of January, and another metropolitan early in the same month, in the neighbourhood of Epsom. The season has been unusually productive of public interest; they stand thus:—Monday, Epsom; Tuesday, Aston; Wednesday, Limerick, Kyle, and Aston Cumbernere.

TATTERSALL'S.

MONDAY.—A very indifferent muster, and speculation the reverse of brisk; enough, however, was done to admit of the following quotations:—

METROPOLITAN HANDICAP.	
30 to 1 agst Mazeppa	25 to 1 agst Ammonite
	25 to 1 agst Lord Faucenberg
CHESTER CUP	
66 to 1 agst Ethelbert	50 to 1 agst Cardinal Wiseman
DERBY.	
12 to 1 agst West Australia	25 to 1 agst Lord Faucenberg
100 to 8 — Chanos	33 to 1 — Mr. Drummer
17 to 1 — Umbriel	50 to 1 — Mazeppa

CHRISTMAS BEEF FOR THE SOVEREIGNS OF ENGLAND, PRUSSIA, AND BELGIUM.—On Saturday last, Mr. Morton, of Wandsworth, brought to bar Lord Chamberlain, slaughtered the remarkably fine Devon ox, exhibited by his Royal Highness Prince Albert at the Smithfield Club Show, and has since had the honour to forward the rumps and loins to the Kings of Prussia and Belgium respectively, while it is understood that another portion of the beef will be supplied for the use of the Queen, at Windsor Castle. The intention, we believe, is, that portions of the Prince's ox should grace the sideboards of the King of Prussia, the King of the Belgians, and the Queen of England simultaneously on New Year's-day.

THE CURVILINEAR OMNIBUS.—On Monday this improved patent of the Messrs. Scott was exhibited to a number of gentlemen at the Carriage Repository, King-street, Baker-street, Portman-square. Its peculiarities render this considerably more convenient and comfortable to the passengers than other omnibuses. In the first place the seats are separate, resembling armchairs, commodious enough, the seats of a first-class carriage in a railway train, the backs bulging outwards, and thus becoming what the patentees call curvilinear. Then there is to each seat a bell, affording the means of instantaneous and easy communication with the conductor. A sort of little platform runs up the whole length of the conveyance, and under this every passenger can place his feet in such a way, that no incomer, even if he make his way to the further end, can tread upon them; and last, not least, the ventilation being provided by means of an apparatus in the roof, there is no liability to dissension as to which of the windows shall be opened.

OFFICIAL APPOINTMENTS.—Adam Murray Alexander, Esq., has been appointed Puisne Judge of the Supreme Court of British Guiana. Mr. Robert N. Spence is appointed Commissary Clerk of Zetland. Mr. George Smith is appointed Sheriff Clerk of Zetland, in the room of Mr. Charles Duncan, resigned.

POST-OFFICE NOTICE.—Henceforward letters for Switzerland, when especially addressed to be forwarded in the Prussian closed mails, vid Belgium, will be liable to a rate of postage of 10½d., instead of 1s. 1d., the single letter, not exceeding half an ounce in weight, and so on, according to the scale in operation for ensuing heavier letters. This postage may be paid in advance, or the letters may be forwarded unpaid, at the option of the sender.

THE GREAT CENTRAL GAS COMPANY *v.* TALLIS AND ANOTHER.—On Monday, in the Court of Exchequer, this case, which appears to have created great public interest, was brought to a close by the jury returning a verd ct for the plaintiffs for £169 13s. 3d. The plaintiffs sought to recover the sum of £224 16s. 8d. for four quarters' supply of gas at 4s. per 1,000 cubic feet. The defendants paid £119 3s. 9d. into court, and denied their liability to pay the balance.

THE FRACAS BETWEEN THE HON. BUTLER JOHNSTONE, M.P. AND MR. OLIVEIRA, M.P.—At the Middlesex Sessions on Tuesday, shortly after the Grand Jury had been discharged, Mr. Huddlestone said: My Lord, perhaps I may be permitted to take this opportunity to trespass on your time for a few moments, to make an application to the Court. I have to apply, on the part of the Hon. Mr. Butler Johnstone, that the recognisances of himself and his two friends, Lord Drumcairn and Mr. Stirling, may be discharged. Mr. Serjeant Ballantine was bound over to appear at this session to answer a charge of assault, but the matter, I do not recollect say, has been amicably arranged, privately, through the intervention of mutual friends of both parties in a satisfactory manner. The Assistant-Judge granted the application, and said: I am very glad to hear that this is so, for that is the manner in which gentlemen ought always to arrange such differences.

SHOW OF THE METROPOLITAN FANCY RABBIT CLUB.

METROPOLITAN FANCY RABBIT CLUB.

The eleventh Winter Show of this prosperous Society was held on the evening of Wednesday week (the 14th), at Anderton's Hotel, Fleet-street; Mr. James Handey, president of the Society, in the chair. The vice-chair was occupied by Mr. Banoks, president of the Chatham Club; and upwards of 180 gentlemen were present. After an appropriate address from the chairman, there were exhibited some remarkable rabbits, which, from various circumstances, were ineligible for the competition. The following rabbits, to whom the judges had awarded prizes, were then shown:—

1st Prize.—Length of ears: Mr. Park's fawn doe; aged 6 months 29 days; length, 31⅜ inches; width, 5½ inches. To this animal the judges appended the remark—"This is the finest specimen ever shown."
2nd Prize.—Length of ears: Mr. Park's fawn buck; 6 months 29 days; 20½ by 4¼. Brother to the above.
3rd Prize.—Black and white: Mr. Herring's buck; 7 months 2 days; 19½ by 4½; a tie with Mr Lillerton's buck; 7 months 20 days; 18¾ by 4¾.
4th Prize.—Yellow and white: Mr. Lock's buck; 7 months 14 days; 19½ by 4¾.
5th Prize.—Tortoiseshell: Mr. Herring's buck; 7 months 3 days; 19¾ by 4¾.
6th Prize.—Blue: Mr. Handey's doe; 7 months; 17½ by 4¼. A perfect specimen of a "blue butterfly."
7th Prize.—Grey and white: Mr. Lock's doe; 7 months 7 days; 19¼ by 4¾. No competitor.
8th Prize.—Self colour: Mr. Bird's fawn buck; 5 months; 19½ by 4¼
9th Prize.—Weight: Mr. Payne's yellow and white doe; 6 months 4 days; 19½ by 4½; 10 lb 13 oz.
10th Prize.—Weight: Mr. Stinton's sooty fawn buck; 7 months 23 days; 19 by 4½ inches; 9 lb 13 oz.
Aggregate length of ten rabbits, 195 inches.

In the accompanying Sketch are shown six specimens, which, commencing from the left, are—Mr. Park's fawn buck, prize 2; Mr. Park's fawn doe, prize 1; Mr. Handey's "blue butterfly," prize 6, occupying the centre of the group. To the right are Mr. Lock's buck, yellow and white, prize 4; Mr. Herring's buck, black and white, prize 3; and Mr. Herring's buck, tortoiseshell, prize 5.

After a merited tribute to the merits of the exhibition, the chairman proposed "Prosperity to the Metropolitan Fancy Rabbit Club."

The summer show was announced for the 3rd of June next.

BURSTING OF THE RESERVOIR AT BURY.

This destructive inundation was fully detailed in our Journal of the 11th inst. The Illustration shows, in the fore portion, the remains of the burst Reservoir and embankment. On the right is seen the breach through which the water rushed, and swept onwards to Mr. Whitehead's dye and bleach works, consisting of a group of buildings occupying about an acre of ground.

The "Lodge," as the Reservoir is called in the neighbourhood, is an accumulation from three narrow streams rising in Cockney-moor. An immense embankment thrown across the valley at this point served to retain the waters of the Reservoir. Owing to the heavy fall of rain during the previous week, there was an immense body of water in the Reservoir at the time of the accident, and it became a source of serious and well-founded alarm to the inhabitants of the district. During the whole of the preceding night the rain fell in torrents, and numbers of people were on the embankment anxiously watching the progress of the accumulation. About seven o'clock on Sunday morning (the 5th instant) it became evident that the by-wash of the "Lodge" was no longer sufficient to carry off the surplus water, and almost immediately afterwards the waves commenced making a clear breach over the central portion of the embankment. The earth forming what is called the "backing," which supports the puddle-wall in the centre of the embankment, was first washed away. About nine o'clock the puddle-wall, from which the backing had been washed, gave way in a body, and a breach, measuring 36 feet in height by about 40 in breadth, was made in the embankment. The pent-up water rushed from its lodgment in an immense volume till it reached the second reservoir, where it received a momentary check. A great portion of the flood swept completely over this, however, while the pressure o the rest in a short time burst the right hand side of the embankment of the second lodgment. In this way the flood made two clean breaches through the buildings forming Mr. Whitehead's bleach-works, and made a complete wreck of a large portion of the property.

THE POULTRY EXHIBITION AT BIRMINGHAM.

The annual exhibition of Poultry at Bingley-house took place last week, commencing on Tuesday, and closing on Friday; and the excellence of the display well attests the extraordinary importance and interest attached in this country to the rearing of poultry. A larger space was allotted to the show than was appropriated last year; and this extra provision was indispensable, there being 200 additional pens.

The show of Poultry was magnificent, comprising about 5000 birds. The competition to be found at Birmingham is now so well understood, that the owners of inferior birds abstained from sending, and the result was the above number of first-rate specimens. It may safely be affirmed, that so good a collection of Spanish fowls was never before seen together. The admirers of this beautiful breed, who had believed the dead white face to be unattainable, must have had their minds disabused of this error by the specimens exhibited by Captain Hornby, who took the first prizes, Mr. Peck taking the third.

Of Dorkings there were 198 pens, and the best breeders in England contributed their stock. The Hon. and Rev. S. W. Lawley (precluded by his duties, as one of the judges, from exhibiting) had some pens of extra stock of unusual merit: one hen weighed nearly 9 lbs. The White Dorkings were but poorly represented, and they appear to be losing ground. We hope the breed will, however, maintain its supremacy, which, by the way, dates from the time of Columella.

The Cochin-Chinas were numerous and beautiful, numbering 275 pens. The Birmingham show has become the peaceful battle-field of all

REMAINS OF THE BURST RESERVOIR, AT BURY.

THE HON. MRS. ASTLEY'S SILVER-PENCILLED HAMBURG.—FIRST PRIZE.

MRS. HORNBY'S SPANISH.—FIRST PRIZE.

MR. J. H. PECK'S SPANISH.—THIRD PRIZE.

the amateurs of this breed; and the contrast between this magnificent exhibition and the little display of 1846 is not more marked than the alteration in the prices of these birds. The first pen that took the medal at Birmingham was sold for eight guineas; now £100 is a common price. The desire to gain the Birmingham medal has, undoubtedly, much contributed to raise the price.

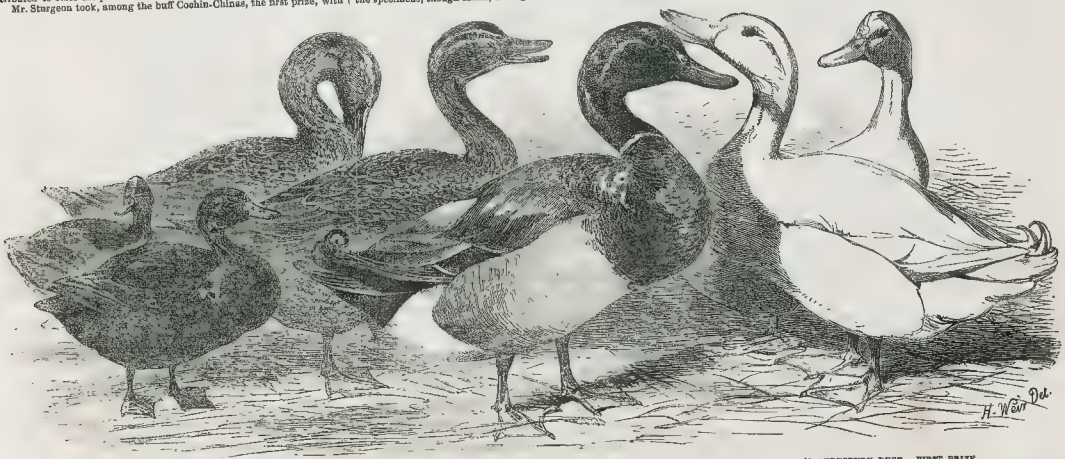
Mr. Sturgeon took, among the buff Cochin-Chinas, the first prize, with the celebrated cock, Jerry, which we have engraved. Some of these birds were of immense size; but many specimens showed crosses of the breed, though exhibited as Cochins. There were also some good partridge-colour birds. Mr. Herbert's white Cochins were very fine. Mr. Fairleigh's black also attracted much attention.

The Malays seem nearly to have gone out of fashion, few being shown: the specimens, though small, were good.

The Game Fowls, in 164 pens, well supported the reputation of past years. Some of the specimens might challenge comparison with anything ever exhibited.

The Hamburg, both pencilled and spangled, were in great force, and of the highest merit, and were represented by 166 pens. The pencilled Hamburgs exhibited by the Hon. Mrs. Astley were very fine.

The Poland class was of the highest order of merit, and the judges



MISS CLIFTON'S LABRADOR DUCK.—FIRST PRIZE

MR. PURCHARD'S ROUEN DUCK.—FIRST PRIZE.

LORD HILL'S AYLESBURY DUCK.—FIRST PRIZE.

were of opinion such a display had not before been witnessed. All classes—black with white top-knots, golden and silver, bearded, and others—were in force, and most favourable specimens. They numbered 69 pens. Mr. Hewitt's black Polands with white top-knots were extremely good.

The next class was of a miscellaneous character, and the lover of natural curiosities might here have enjoyed a rich treat, in scanning Silk Fowls, Negroes, Créveccurs, Frizzled, Andalusian, Russian, Java, and Poland. All quarters of the globe thus contributed to this display.

The improvement in Bantams was marked; and each class, gold and silver-laced, black, white, and partridge, was represented.

The Geese were numerous, but rarely so heavy as last year. The Ducks were excellent, and numerous; and the Turkeys unequalled. The cock in the prize pen weighed 22¾ lb., and many others varied from 18 lb. to 21 lb each

The show of Pigeons was capital.

A number of pens were, as usual, set apart for dealers; and Mr. John Baily sent some uncommonly fine Spanish, Cochin-Chins, and Dorking fowls with some very superior Sebright bantams, Buenos Ayres and Call ducks, and Toulouse geese. Messrs. Baker, of London and Chelsea, and Mr Nolan, of Dublin, were also contributors—the best specimens from the former being Dorkings and Toulouse geese; and of the latter, turkeys, stated to have been bred from wild birds.

We have not space for the List: but we have engraved a few of the finest specimens of Fowls and Ducks. We should add that the sales of

MR. STURGEON'S BUFF COCHIN-CHINA.—FIRST PRIZE.

MRS. HERBERT'S WHITE COCHIN-CHINA.—FIRST PRIZE.

Poultry were very large—in one day amounting to £1000. Some pairs of fowls brought as much as £10 and £20; and in the catalogue, prices of £100, and even £1000 were put down for special pens, though these sums were fixed practically to protect exhibitors who did not wish to sell; but in some cases "protection" failed here, as elsewhere, and specimens, of the highest price, were bought.

CALENDAR FOR THE WEEK.

SUNDAY, December 26.—First Sunday after Christmas. St. Stephen.
MONDAY, 27.—St. John the Evangelist.
TUESDAY, 28.—Innocents.
WEDNESDAY, 29.—Lord Stafford beheaded, 1680.
THURSDAY, 30.—Royal Society established, 1660. Coleridge born, 1772.
FRIDAY, 31.—Silvester. Charter to East India Company granted, 1600.
SATURDAY, January 1, 1853.—Circumcision. Union with Ireland, 1801.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, DECEMBER 25, 1852.

THE NEW MINISTRY.

We shall not imitate the example of club coteries and idle politicians, and reproduce lists of the new Ministry. At present such lists are purely speculative. Amid the absolute plethora of competent and tried statesmen, from whose ranks the Earl of Aberdeen may choose the members of his Administration, it is impossible for any one to construct such lists without naming most of the men who must ultimately be included in his Lordship's arrangements. At the earl period of the week, at which the mechanical necessities of our publication compel us to write, the exact composition of the new Ministry is probably not known even to many noblemen and gentlemen who will form part of it. This much, however, may be stated with certainty, that whatever difficulties may environ the Earl of Aberdeen in the fulfilment of the arduous duty which has devolved upon him, they are not of a character similar to those which once prevented, and a second time impeded, his predecessor from forming an Administration. The Earl of Derby had to choose his colleagues from the ranks of a party, not agreed in itself as to one grand paramount and essential point of policy. The Earl of Aberdeen has two great parties from whom to choose—each party strong in character, in experience, and in knowledge, and agreed on every really essential political question. It augurs well for the stability of his Administration, of whomsoever it may ultimately be composed, that such men as Lord John Russell and Lord Aberdeen have consented to act together for the common good, at a critical period in the history of this country and of Europe; that a Tory Ministry and a Whig Ministry, in the old and almost obsolete tenor of these words, being alike impossible, men who were once moderate Tories, and men who were once Conservative Whigs, have opened their eyes to a discovery long since made by the nation, that the difference between them was more in their names than in their principles. A coalition of parties is a phrase and a thing that are not very popular. If rival parties coalesce to overthrow a rival party that is acting for the public good, and to the public satisfaction—if they combine for the merely selfish objects of their own ambition, and without regard to the national welfare—their coalition, or combination, or conspiracy—for either of the designations would fit it, and the last the best—would deserve all possible odium and condemnation. But a coalition of the followers of Lord John Russell and of the late Sir Robert Peel—not for a selfish purpose, but to enable the Government to be carried on—is a coalition of a different kind, and one that requires a different word to express its true meaning. In our day, party is no longer what it was in the years prior to 1829. Sir Robert Peel and the Duke of Wellington commenced the break up of the old sub-divisions at that time, and effaced, to a great extent, their distinctive marks and angularities. The solution of the Corn-law question completed the work then begun, and the only party that the public cares to see, or will support, in office is the party of practicability—the party of hard, honest, and sincere workers. Such a party, there is every reason to believe, will have accepted office before this sheet is in the hands of our readers. If it prove, as we trust it will, a wise and reforming, but truly Conservative Ministry, it will be supported by the moderate and enlightened public, which forms the vast majority of this nation. Such a Ministry will have many noble tasks before it. To simplify and amend the law—to extend the franchise to unrepresented property, intelligence, and good conduct—to remove impediments from trade and industry—to promote the employment of the people—to untax cleanliness, health, and knowledge—to extend the blessings of education to the humblest British child—to amend our whole system of taxation—to conciliate and satisfy our colonies and dependencies—to promote our wholesome and beneficial influence over the greater and lesser nations of the world—to cement and increase a friendly understanding with all civilised countries—to maintain the national honour and dignity in all circumstances, great or little—these are the onerous but honourable objects to be attained, and in the prosecution of which an honest Ministry, even although its enemies may call it a coalition, will find abundance of supporters.

ELECTION RECOGNISANCES.—The following are reported unobjectionable:—Cork, Carlow county, Ennis, Liverpool, Westmeath, Sligo and Sligo county, and Louth.

THE MINISTERIAL CRISIS.

The Earl of Aberdeen continues busily engaged in the task of forming an Administration.

A meeting of the leading members of the Peel party, including the Duke of Newcastle, the Right Hon. Sidney Herbert, the Right Hon. W. E. Gladstone, and Sir James Graham, took place on Tuesday, at noon, at Argyll House

Lord John Russell left his residence, in Chesham-place, at ten o'clock on Tuesday morning. His Lordship drove direct to Argyll House, and remained in deliberation with the Earl of Aberdeen for nearly two hours. The noble Lord left shortly before the arrival of Sir James Graham.

After the meeting at Argyll House, the Earl of Aberdeen proceeded to Lansdowne House, and had an interview with the Marquis of Lansdowne.

A Queen's messenger, bearing despatches from her Majesty, addressed to the Earl of Aberdeen, arrived at the Waterloo terminus of the South-Western Railway at one o'clock on Tuesday. A servant in the noble Earl's livery had previously gone to Osborne with a letter for her Majesty. The Queen's messenger returned to Osborne, with a second despatch for her Majesty, by the train leaving the Waterloo station at three P.M.

The Marquis of Lansdowne, we regret to learn, continues much indisposed.

CHURCH, UNIVERSITIES, &c.

ORDINATIONS.—On Sunday morning the Bishop of London held a general ordination at the Chapel Royal, Whitehall. Prayers were read by the Rev John H. Howlett, M A, and the sermon preached by the Rev. W. Gheeon, Humphrey, B.D., vicar of Northolt.

WINCHESTER COLLEGE.—The examination for the Goddard scholarship at this college commenced on Tuesday last, and at its close, on Saturday, the examiners - the Rev. T. Brancker, M.A., of Wadham College, Oxford, and the Rev. F. Fanshawe, M.A., Fellow and Tutor of Exeter Col ege, Oxford—adjudged the scholarship to H. Pilkington (scholar); the second in merit being G. H. Moberley (scholar). At the same time the Duncan prizes for mathematics were also awarded, the senior to F. Morshead (scholar), the junior to A. H. Harrison (commoner)—A very excellent portrait of himself (painted by Grant) has lately been presented to the head-master, Dr. Moberly, by those educated at Winchester under him, as a mark of their esteem, and of the respect in which he is held by them.

PREFERMENTS AND APPOINTMENTS.—The following preferments and appointments have recently been made:—*Rectories:* The Rev. W. D. Astley, to East Largdon, near Dover; the Rev. A. Lyall, to St. Dionis Backchurch, in the city of London; the Rev. A. H Stogdon, to Ovington, Hants; the Rev. E. Thompson, to St. John the Baptist, Middleton Scriven, near Bridgnorth; the Rev E Wickham, to Preston Candover, Hants; the Rev. Philip Parker Gilbert, M.A., incumbent of St Mary's, Haggerstone, to High Halden, Kent. *Vicarages.* The Rev. E. E. James, to Letterston Regis, Berks; the Rev. H. P. Edwards, to Llanspythid, near Brecon, the Rev. W. D. Morris, to Longbridge Deverill, with Monkton Deverill and Crockerton Chapelries, near Warminster; the Rev. W. St. George Sargent, to Kimberley, Notts; the Rev. T. Stanton, to Surbage, in the diocese of Sarum; the Rev. J. W. Watkin, to Stowell, near Horncastle

TESTIMONIALS.—The following clergymen have recently received testimonials of affection and esteem:—The Rev. J. Wardale, late assistant-master of Highgate school, from the pupils of the school; the Rev. J. S. Haygarth, principal of the Cirencester Agricultural College, from the students of that institution; the Rev. John Teagrue, from the parishioners of Whetfield, near Glossop; the Rev. W. Barnes, from the parishioners of Briston Deveril, near Warminster.

A meeting of the friends of the London Colonial Training Institution was held at Great Smith-street, Westminster, for the purpose of taking leave of twelve inmates, about to emigrate. During the past year it appears that that upwards of 2000 discharged criminals have applied for admission. There are at present about 100 in the institution. The most of those who have left have been sent to America, the passage to Australia being too expensive. They are subjected to a rigorous course of industrial training, and religious instruction is given to the inmates on the broad basis of those Bible truths upon which all real Christians are agreed.

The friends of the Sons of the Clergy Society met on Saturday, to make Christmas benefactions to clergymen with families. The cases of eighty-five poor clergymen were submitted, and sums from £10 to £20 given to seventy-eight. £540 was also divided amongst the widows, single daughters, and children of clergymen.

The perpetual advowson of the vicarage of Boston has been sold by the Ecclesiastical Commissioners to a layman, for £1050.

PROVINCIAL INTELLIGENCE.

THE DUBLIN EXHIBITION.—The public, both in England and Ireland, have not been slow in following the examples set them by the Earls of Charlemont and Yarborough. Among the numerous noblemen and gentlemen who have promised to become exhibitors in this department, we have pleasure in mentioning Lord Talbot de Malahide, who has consented to place his entire collection at the disposal of the committee. His gallery contains many fine gems of art by Sir Peter Lely, Vandyck, Peter Wouvermans, Middleton, Hogarth, &c. The Marquis of Conyngham has also promised to send some of his valuable paintings. Lord Massereene and Ferrard exhibits the thrones and mace of the Irish House of Commons, and some fine paintings and curiosities. The Hon. Richard O'Grady will contribute some original Do Gress; Mr. Peto, M.P., several pictures; Mr. Robert Stephenson some works of Clarkson Stanfield, and other eminent English artists; Mr. J. Sheppard, of Hanover square, some Raphaels and Rubens; Mr. Charles Cammal, of Sheffield, and Mr. Gesner, of the same place, some fine specimens of the Dutch and Flemish schools. Mr. W. Jackson, M.P., has group of Lancashires by Gibson, a pupil of Canova, &c.; and the Right Hon. Sidney Herbert many fine gems from his well-known "Pembroke collection."

THE CONVICT KHWAN.—The Hon. Justice Crampton has refused to reserve for the consideration of the Court of Criminal Appeal the points of exception made by Messrs. Butt, Q.C., and J. A. Curran, counsel for the convict, at the conclusion of the trial. Kirwan is full of hope that the change in the Government will save his life. He has been led to expect that the new Lord-Lieutenant—whoever he may be—will decline to sign a warrant for his execution on commencing his duties at Dublin Castle. A deputation will wait upon his Excellency with a numerously-signed petition, praying that the punishment of the wretched criminal may be mitigated to transportation.

NARROW ESCAPE OF MR. ISAAC DAY.—Mr. Isaac Day, the well-known trainer of Ephesus, Newcourt, Coronation, and many other celebrated race-horses, had a most wonderful escape from drowning whilst hunting with Mr. Villebois' foxhounds, last week. Mr. Day, in attempting to jump a gate upon a bridge, from the floods, fell backwards with his horse into the stream, and was upon the point of being dragged under the bridge when he was rescued by two pedestrians, who dragged him out by the hair of his head.

HARBOURS OF REFUGE.—In addition to the harbours of refuge intended to be constructed by Government on the east coast of England, it is intended to apply for a charter of incorporation for the purpose of forming a harbour of refuge at Cardigan, South Wales, on the west coast. The measure has been decided upon, owing to the mouth of the Tyvy, where it enters the bay of Cardigan, being admirably adapted for the protection of vessels passing through St. George's Channel, where they are exposed to all the dangers of the Welsh coast, and often obliged to put back in great distress by contrary winds when attempting to proceed round the Land's End, or leaving the Channel for America. It is also intended to make a direct communication between the metropolis and the port of Cardigan, by the formation of a line of railway from Carmarthen to Cardigan, on the broad gauge principle.

PLAY AT PORTSMOUTH.—Much gossip has prevailed at this port lately in reference to some reported heavy losses at play incurred by officers of some of the corps now in this garrison. A party of foreigners, pretending to be of "distinction," took up their quarters at one of the first hotels in the borough about th ee weeks ago, bringing with them what appeared to be first rate introductions, and by these they procured access to the best military circles. The result of their operations is, that they have netted very large sums in cash, besides, it is said, some £2000 in I O U's.

INUNDATIONS AT SOUTHERY, NORFOLK.—In consequence of the extensive and destructive inundations in the Fens, in New Fen District, the inhabitants of Southery are thrown into the greatest distress. At the present time 5000 acres of land are flooded to the depth of from four to six feet; and of the greater part of this year's produce, now ripe for the harvest, one-third will be rendered useless. Upwards of 100 poor families have been compelled to leave their habitations, and are now crowded together wherever they can find shelter—from 15 to 20 persons in a cottage. The fuel which they had provided for the winter is for the most part carried away or spoiled, not to mention other losses. The farmers, without timely aid, must many of them be inevitably ruined, having lost not only much of their corn, also their newly sown wheat, and a great portion of their root crop. As it is calculated that the land cannot be drained for three months, there will be scarcely any employment for the labourers, and if there were, so crippled are the occupiers in their finances that it would be difficult to find the wages. The estimated loss of the district is from £30,000 to £50,000.

In six months ending the 10th October last there were 14,488 sailing vessels and 2258 steam vessels employed in the foreign and colonial trade of the United Kingdom, entered inwards; and 17,582 sailing and 2583 steam vessels cleared outwards.

THE ROYAL CHILDREN.

[VICTORIA-ADELAIDE-MARY-LOUISA, born November 21, 1840, *Princess Royal.* ALBERT-EDWARD, *Prince of Wales*, born November 9, 1841. ALICE-MAUD-MARY, born April 25, 1843. ALFRED-ERNEST-ALBERT, born August 6, 1844. HELENA-AUGUSTA-VICTORIA, born May 25, 1846. LOUISA-CAROLINE-ALBERTA, born March 18, 1848. ARTHUR-WILLIAM-PATRICK-ALBERT, born May 1, 1850.]

THERE'S pleasure in the lowliest lot,
With "pure affection undefiled,"
There's rapture in the poorest cot
That boasts a little child.
And teeming wealth and lowly state,
Without such buds, are desolate.

Fair branches of our Royal tree!
The sweetest blossoms of our isles!
The people's hearts, with fervour free,
Return you smiles for smiles;
And fondly deem you all their own,
As much as her's who fills the throne.

Cornelia's jewels, what were they
Compared with you, ye Regal gems,
That glitter in the face of day
Beyond all diadems?—
Britannia's jewels, maid and son,
And rich with blessings every one!

Amid the poverty of States—
Their penury of law and right—
Their grim oppressions, wrongs, and hates—
Their darkness, black as night—
We look abroad with grateful eyes,
Like free men worthy of the prize;

And see that here, on English ground,
A man may think, and speak, and do;
That here one chosen spot is found
Where law is just and true:
Where Tyranny forbears to tread,
And Freedom lifts its honoured head.

Green branches of our kingly race,
We love you with a selfish joy;
In each young life, and blooming face
Of blushing girl and boy,
We find a pledge and warrant sure
That all these blessings shall endure;

That, like a hope to others given,
Our Britain, ever fair and free,
Shall flourish in the light of heaven,
Amid her circling sea:
Her beacon lit, her flag unfurled,
To cheer the darkness of the world.

THE COURT.

Her Majesty the Queen and his Royal Highness Prince Albert, with the youthful members of the Royal family, and the ladies and gentlemen of the Court, arrived at Windsor Castle, on Wednesday afternoon, from Osborne. His Serene Highness the Prince of Leiningen accompanied his illustrious relatives to Windsor.

The Duke of Devonshire will entertain a numerous family party at Chatsworth during the Christmas recess.

The Duke and Duchess of Bedford are entertaining a large party at Woburn Abbey.

Her Grace the Duchess of Wellington honoured Messrs. Leggatt, of Cornhill, by inspecting at their gallery Mr. Barker's interesting picture of the meeting of the late Duke and Marshal Blucher at La Belle Alliance, on the evening of the battle of Waterloo, with which her Grace expressed entire approval.

The Marquis and Marchioness of Westminster and family have arrived at Grosvenor-house from Eaton-hall. The marriage of the Lady Octavia Grosvenor with Sir Michael Shaw Stewart, will be solemnised on Tuesday week

The Marquis and Marchioness of Anglesey are entertaining a family circle at Beaudesert. Viscount and Viscountess Sydney, and Lord Clarence Paget joined the party on Saturday.

The Earl and Countess Howe and family have arrived at Gopsall-hall for the holidays.

Viscount and Viscountess Canning have arrived in Grosvenor-square, from visiting the Earl and Countess Cowper, at Panshanger.

Viscount and Viscountess Palmerston have returned to town, from visiting Viscount and Viscountess Melbourne, at Brocket-hall, Herts.

Viscount and Viscountess Ebrington have left London for Paris, where they intend to pass the winter.

Lady Carrington gave birth to a son on Saturday last, at the family mansion in Whitehall. Her Ladyship, with the infant, is going on most favorably.

MARRIAGE IN HIGH LIFE.—Married on Tuesday, at St. George's, Hanover-square, the Right Hon. Lord Erskine, to Anna, widow of Thomas Cadwallader Durham, Esq., of Largo, and of Poiton. The marriage ceremony was performed by Lord Erskine's brother, the Hon. and Very Rev. the Dean of Ripon.

THE IRISH VICEROYALTY.—The Earl and Countess of Eglinton will hold an undress morning reception at the Castle previous to their departure from Ireland. No day is yet named for the ceremony. Without reference to party or politics, it may be truly stated that no Irish Viceroy, during the present generation at least, enjoyed more general popularity in the course of a brief government than did the noble Earl who is about to resign the reins of office. It would be impossible to point to any administrative act which could justly give offence to either of the hostile parties into which Irish society is divided. Much higher praise could not be awarded to any one filling the anomalous office of Lord-Lieutenant of Ireland.

THE DUKE OF WELLINGTON'S FUNERAL.—Hamilton, Canada West, 4th December, 1852.—Sir,—As you are publishing much which relates to the immortal name of Wellington, it may not be uninteresting to you to learn that throughout this province of Canada, from Quebec to Sandwich, in all of the principal towns, all possible respect was paid to the day on which the remains of that great man were supposed to be consigned to his last resting-place in St. Paul's. In this riding city, at the head of Lake Ontario, the mournful day was observed by the suspension of all business, and eighty-three minute guns were fired, while in the evening the numerous fire brigade turned out in procession with torchlights, and were addressed by Sir Allan Napier Macnab, which was received with gratifying respect. At the several taverns on St. Andrew's Day, "The Memory of the Duke of Wellington" was introduced as a standard toast.—I am, Sir, your most obedient servant, A SUBSCRIBER.

A SHEET OF PAPER.—We had the pleasure of inspecting, on Friday last, at Airthrey Mills, an enormous sheet or web of white paper. The web is without a break, being one continuous sheet, 3600 yards in length—within a little of a mile and three quarters—54 inches broad, and weighs 460 lb. This web was made, dried, and finished, ready to be despatched, within three hours, and might have been at its destination (Edinburgh) that night, had it not to wait until the next morning for the Excise officer to charge it with duty, and then an additional number of hours, to give the supervisor an opportunity to re-weigh it, causing a delay of about two days. For this delay and careful supervision there is charged upon the web £3 11s. 6d. as duty. The manufacturers will receive rather under £10 for the above sheet.—*Stirling Journal.*

PETERBOROUGH ELECTION.—A petition from the electors of Peterborough has just been presented against the return of Mr. G. H. Whalley, who contested the representation with Mr. Cornewall Lewis, praying that the return of the former may be declared null and void, on the ground of bribery and corruption.

PRINCESS ROYAL. PRINCE ALFRED.

PRINCESS HELENA. PRINCE AR

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

The Duke of Portland has been presented with his likeness, as a testimonial of respect, by his tenantry.

It is calculated that one eminent iron and coal master in the neighbourhood of Wolverhampton has lost £20,000 by the damage done to the pits by the late floods.

Last week the Hon. F. Scott, M.P., was elected chairman, and Mr. Hibbert deputy-chairman, of the South-Western Railway.

Mr. Vincent, the only officer saved from the ill-fated *Amazon*, has been carried off by yellow fever.

Last Saturday, with the exception of two vessels, the whole of the German fleet passed into the hands of the General Steam Navigation Company.

An English company has been formed to supply Berlin with water.

In future all rails in Prussia to be laid down on new lines are to be of wrought iron.

The *Monitour* publishes the returns of the merchandise imported into France during the eleven months of 1852, ending on the 1st inst., the duties on which produced 126,354,477 fr., or 19,000,000 more than during the corresponding period of 1851.

Tampico advices of the 26th ult. state that a formidable revolution had broken out in the State of Tamaulipas.

Havannah accounts of the 29th ult. state that the *Crescent City* affair was at last settled, the Governor-General having taken Purser Smith's affidavit as satisfactory.

The Vienna Correspondent of the *Times* says:—"A very handsome bracelet, set with diamonds, has been forwarded by a society of Viennese to the Austrian Embassy in London." It was intended for Mrs. Benfield, the landlady in Bankside, who saved General Haynau from the mob, but she has disappeared.

Some valuable remains, drawings and models of which have been sent to the Royal Society, have lately been discovered at Metarennan, the ancient Memphis.

The Emperor of the French has decided that there shall be established at his cost, in three of the poorest quarters of Paris, premises containing public baths and wash-houses.

A report was current at Vienna on the 11th that the Austrian Government was about to contract in England another loan of a hundred millions of florins (£10,000,000).

A letter from Trieste states that a Sclavonian chief of the frontier of Albania, the Kuez of Mirdital, has revolted against the Ottoman Porte.

A meeting was held last week in Kilkenny for the purpose of erecting a monument to the memory of John Banim, the novelist.

The celebrated Irish sporting horse, Harkaway, which began its career on the Curragh eighteen years ago, was sold by auction last week for £880.

The Corporation of the city of London has presented the liberal donation of one hundred guineas in aid of the building fund of the Royal Orthopædic Hospital in Bloomsbury-square.

The Grand Duchess Stéphanie of Baden, aunt of the Emperor Napoleon III., arrived at Coblentz on the 14th, on a visit to the Prince of Prussia.

Last year, out of the grants made by Parliament in aid of the county rates, £241,371 12s. was expended in the prosecution of prisoners; £5482 1s. 7d. in the conveyance of prisoners; and £69,024 8s. 6d. in the maintenance of prisoners from the 1st of April, 1851, to the 31st of March last.

Of the 50,000 militia-men required to be raised in the present year, only 29,531 volunteers have been enrolled, leaving 20,813 men to be made up by ballot.

Letters from Leipsic state that the betrothal of the Emperor of Austria with the Princess Marie Sidonia, one of the daughters of the King of Saxony, will be solemnised during the visit of his Imperial Majesty at the Court of Dresden.

The trial of Mr. Bower for the murder of Mr. Morton will take place at Paris, on the 27th.

The *Posen Gazette* states, from Warsaw, that the Emperor of Russia has in contemplation to abolish generally in his dominions the punishment of the knout, which is to be preserved only in the army.

Accounts from America mention that one wheel of the caloric-ship *Ericsson* had been moved by the natural elasticity of the air, no fire being used.

The deliveries of tea last week were only 148,720 lbs., being 100,000 lbs. less than in the preceding week.

Mrs. Stowe is about to commence the publication in the *National Era*, the Abolitist paper at Washington, of a new story called "Mark Sutherland; or, Power and Principle."

Thirty-seven private banks, and seven joint-stock banks, have, since the act 7 and 8 Vict., cap. 32, ceased to issue their own notes.

A great fire occurred on the night of the 1st instant at Boston, by which property to the amount of 200,000 dollars was destroyed, and upwards of 100 persons thrown out of employment.

The manager of the theatre at Breslau is giving frequent representations of a drama called "Luther," and the peasants from Protestant villages come in large parties to demonstrate, by their applause, their resentment at the Jesuit mission.

The Canadian Rebellion Losses Commissioners have adjudicated on 244 cases, in which the compensation claimed amounted to no less than 751,850 dollars. They have allowed claims to the amount of 331,328 dollars. The act of appropriation only sets apart 100,000 dollars.

The *Cologne Gazette* states that the Turkish Government had caused 200 Magyar soldiers in its service to be suddenly disarmed and led to a person at Serajevo in Bosnia. The alleged cause of this proceeding is, that the men were about to desert.

It is said that M. Ledru-Rollin has just been enriched by a legacy of 4,000,000 francs, bequeathed to his wife, an English lady of good family.

King Oscar is now out of danger, and no more bulletins will be issued for the present.

A glass bottle, supposed to be thrown overboard from the *Amazon*, was picked up in the Solway Firth last week.

Several apple-trees in the neighbourhood of Gulval (Cornwall) are yielding a second crop.

The British Government has entered into a treaty of reciprocity with Austria for the delivering up of deserters from Austrian vessels found on British territory.

A piece of land was sold recently in the neighbourhood of the Royal Exchange, at the enormous rate of £600,000 per acre.

The *Augsburg Gazette* states that the Prince Regent of Baden has made proposals to marry the eldest daughter of the reigning Prince of Liechtenstein.

Rumour has found a new bride for Louis Napoleon, in the daughter of the Duke Maximilian of Bavaria.

The Belgian Government has given orders that, in addition to the medical men-in-chief which is carried in every railway train, the chief or inspector at every train shall also carry a book, containing instructions as to the conduct to be pursued when it shall be necessary to render assistance after an accident, before medical advice can be obtained.

The proclamation of the Empire took place at Algiers on Sunday, the 12th inst., with great ceremony, and amidst universal enthusiasm.

Mr. Napier has returned to Dublin, it is said, for the purpose of carrying on the prosecution of the *Anglo-Celt*, in his capacity of Attorney-General.

The *Corriere Mercantile* states that Madame Madiai has been ill for some days, and that the Grand Duchesses, moved by her miserable state, have exercised their influence to exhort her to return to the Catholic religion, hoping thus to obtain her liberation from the Grand Duke, but without success.

A person named Guarducci has been arrested at Florence for having been found in possession of an illicit amount of salt.

The Emperor has deigned (says the *Moniteur*) to remit sentences pronounced by courts-martial on 434 soldiers, and to mitigate the sentences of forty-five. Pardon has been granted to seventy-two condemned to drag the bullet, and the time contracted in 126 other cases; eighteen under capital sentences have had their sentences commuted, and four imprisoned for insurrectional acts have been pardoned.

Mr. Frederick Lémaitre, the well-known actor, appeared on Saturday, before the Tribunal of Correctional Police, Paris, to complain of M. Bessélièvre, for having written, and of M. Villemessant for having published, on the 1st of August last, in the periodical called the *Chronique*, of which he is the editor, an article charging him with subjecting theatres to heavy loss by neglecting to fulfil his engagements. The tribunal condemned M. Bessélièvre to 300f. fine, M. Villemessant, who made default, to 800f. fine, and both jointly to 1600f. damages.

CHESS.

TO CORRESPONDENTS.

HIBERNIA, JARNDYCE and OTHERS.—We mentioned in our last that the varia tions arising from the Game between Messrs Anderssen and Dufresne were far too lengthy for our columns. They have to us seemed to be the *Chess-Players' Chronicle* and, though very remarkable beauty and value will, no doubt be given in the opening number for January

R. C. Wakefield.—You may have two or more Queens on the board at the same time

SCHACHER.—All letters should be addressed simply to the Editor of the ILLUSTRATED LONDON NEWS. We wish correspondents would attend to this

T. G, of Liverpool.—If a problem can be solved in *fewer* moves than the number stipulated, it is conspicuously worthless; and even if it admit of two different ways of solution, it is considered of little value. The problem you refer to is one of the most beautiful we have published.

P Q R—The solution is given in the work from whence you have taken the problem—1. B to Q B 8sq; 2. Kt to K 5th; 3 Q mates. It is of no consequence how Black plays—he cannot delay the mate

D W H.—Your solution of the Enigma No. 773 is incorrect. If you wish a reply the same week, you must send much earlier

E. H. H, Hull.—They were duly received

G. Sutherland, North Carolina.—Your Problem, No 1 to eight moves, can be easily solved in *four*; and No 2, in five moves. In an obvious mate to force

A. L. F, St Thomas.—The solutions are all correct. As to the short-hand notation, it is, like many other systems submitted to us of late, very neat and ingenious, but not at all likely to supersede the notation in common use in this country

R T H, St Albans. A pretty, though very easy and game

H. B. W, of Plymouth.—You must be good enough to send us the position in question, as we have no means at hand to find the back Number

A. D.—Why it would than evidently play *R to Q Kt sq* (dis ch) &c

SOLUTIONS of PROBLEM No 685, by *A S, I F of St. Neot's*, Robin Hood, are correct;

SOLUTIONS of PROBLEM No 683, by T M. Alpha, J P, E P H of Hackford Lodge, R G, G L, Leagher K P H, Anna, Brig-end, Monbuch, D D, Rev B M P, Secretary, Knowsley, M G, Weston, S M, F A S Ilmenau, Lynx-eye, are correct;

SOLUTIONS of ENIGMAS, by Beatrice, A, Alpha, J, Sigma, Stella, D W H, are correct; all others are wrong

* * W; are compelled to postpone the greater part of our answers to Correspondents until next week

SOLUTION OF PROBLEM NO. 463.

WHITE.	BLACK.	WHITE.	BLACK.
1. Kt from Q 6th to Q B 8th (ch)	King moves	5. Kt from Q B 8th to Kt 6th (double ch)	King moves
2. Kt to Q Kt 6th (ch)	King moves	6. Kt to Q B 8th (ch)	Kt to R
3. Kt from K 7th (ch)	King moves	7. Kt mates	
4. Kt to Q 7th (ch)	King moves		

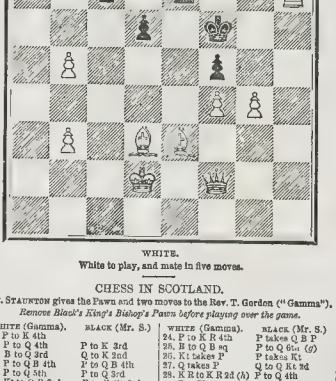
PROBLEM NO. 464.

With deference to the talented authoress of this position, we submit that she has overlooked one variation by which Black may escape. To remedy this, we propose that the Pawn at White's Q B 4th should stand at White's Q B 2nd.

PROBLEM No. 465.

This ingenious stratagem, which is taken, with some modification, from the Sanscrit, we owe to the kindness of the celebrated Oriental scholar PROFESSOR D. FORBES.

BLACK.



WHITE.

White to play, and mate in five moves.

CHESS IN SCOTLAND.

Mr. STAUNTON gives the Pawn and two moves to the Rev. T. Gordon ("Gamma").

Remove Black's King's Bishop's Pawn before playing over the game.

WHITE (Gamma).	BLACK (Mr. S.)	WHITE (Gamma).	BLACK (Mr. S.)
1. P to K 4th		24. P to K 4th	P takes Q B P
2. P to Q 4th	P to K 3rd	25. B to Q B sq	P to Q 6th (e)
3. B to Q 3rd	Q to K 2nd	26. Kt takes P	P takes Kt
4. P to Q B 4th	P to Q B 4th	27. Q takes P	Q to Q Kt 3rd
5. P to Q 5th	P to Q 3rd	28. K Kt to K R 2d (h)	P to Q 4th
6. Kt to Q B 3rd	P to K K t 3rd	29. P to K R 5th	Kt to Q B 6th
7. P to K B 4th	B to K Kt 2nd	30. Q to R 3rd	R to K 4th
8. Kt to K B 3rd	Kt to K R 3rd	31. Q to K B 2nd	R takes Q R P
9. B to Q 2nd	Castles	32. P takes K Kt P	P takes P
10. Q to Q B 2nd	Kt to Q B 3rd	33. Q to Q B 5th (e)	Q R to K R 6th
11. P to Q R 3rd (a)	Kt to Q B 2nd	34. K R to Q B 2nd	Q R to K B sq
12. Castles on Q side	P to Q R 3rd (b)	35. Q to Q 6th	Q to K B 2d
13. P to K E 3rd	B to Q 2nd	36. Q takes Q R P	R to K 3rd
14. P to K Kt 4th (c)	P to Q Kt 4th	37. Q to Q 3rd	P to Q 5th
15. Q P takes K P	Q Kt takes P (d)	38. Q to Q B 4th	B to K 4th
16. Kt to Q 6th	P to Q sq	39. R to R 3 sq (f)	Q to K 2nd
17. P to K B 5th (e)	Kt to Q 5th	40. R takes R (ch)	K takes R
18. Kt takes Kt	P takes Kt	41. Q to K B (ch) (g)	Q to K B 2nd (m)
19. P to K Kt 5th	Kt takes K B P	42. Q to K B 2nd	B to B 3rd
(f)		43. R takes B	R takes R
20. P takes Kt	B takes P	44. Q takes R	Q takes Q
21. R takes B	R takes B	45. P takes Q	K to B 2nd
22. K to Kt sq	R to Q B sq	46. B to K R 5th	
23. Kt to K B 4th	Q to Q 2nd		And wins

(a) The opening is carefully played on both sides; and White, if he has not improved, has at least preserved the advantage originally given him.

(b) Preparatory to an advance of his forces on the K side

(c) White, palely seeing that his best defence is counter attack, wisely resolves to push on vigorously with his infantry, and throw his enemy into confusion by an assault upon the King's entrenchments

(d) Tempting, but hardly so good as taking with the Bishop, on account of its allowing the adverse Q Kt to be planted as commandingly in the centre of the field.

(e) "Gamma" has now a splendid attack.

(f) Hurried Away by the impetuosity of his assault and the temptation of capturing a Kt, White overlooks a more advantageous move than P to K Kt 5th, which enables Black to gain two Pawns for the Kt and escape free from all difficulties: he should have played—P to K B 6th.

(g) This move, properly followed up—as it equalises the forces, and leaves Black with no infeiority of position—should at once have drawn the game, but it is not the best that he could make. The far less promising move of P to Q B 6th, it will be found on close examination, won d have given him a manifold advantage. We commend the position, which leads to many most instructive combinations, to the study of the reader

(h) This was necessary, for Black threatened to take the Bishop with his Rook, and mate next move

(i) The terminating moves are extremely well played by White.

(k) Very well conceived.

(l) Much stronger than R to K B sq, because it enables the Queen to go afterwards to K B 3d.

(m) The game has evidently been drawn for some time past, but this unaccountable lapse throws it away. Black should have moved his King, of course, to Kt 2nd.

CHESS ENIGMAS.

No. 783.—By SOPHIA.

White: K at his Kt 5th, Q at Q Kt 7th, R at Q B 6th; P s at K B 2nd, 4th, and 6th, Q 3rd, and Q R 4th.

Black: K at Q 4th, B at K sq; P s at K B 2nd, Q 3rd, and Q B 4th.

White to play, and mate in three moves.

No. 784.—By a CANADIAN, of Toronto.

White: K at his R sq, Q at Q Kt 2nd, R at K R 2nd, B s at K Kt 2nd and Q Kt 8th, Kt at K 6th, P at Q R 5th.

Black: K at Q B sq, Q at K Kt sq, Rs at K Kt 6th and Q B 3rd, Bs at K B 2nd and Q 3rd, Kt at Q sq, P s at Q 2nd and Q R 3rd.

White to play, and mate in six moves.

No. 785.—This position occurred in a game between Signor DUBOIS, the best player in Rome, and an Amateur:—

White: K at his Kt 5th, P s at K 6 5th, and K Kt 5th.

Black: K at his Kt sq, P s at Q Kt 3rd and Q R 6th.

White, Signor D., having to play, won the game.

No. 786.—This position occurred in a game between Signors DUBOIS and ZOUFFI:—

White: K at his 8th, Kts at K B 2nd and 4th; P s at K R 6th, K B 3rd, and K 2nd.

Black: K at his Kt 4th, B at Q Kt 6th; P s at K R 2nd and 5th, Q B 6th, Q Kt 5th, and Q R 5th.

White, Signor D., having to play, gave mate in six moves.

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

HENRY PEYTO, LORD WILLOUGHBY DE BROKE.

THE decease of this venerable nobleman, who was in his eightieth year, occurred on the 16th inst., at his seat, Compton Verney, county Warwick. His Lordship was the second son of John Peyto Verney, sixth Baron, by the Lady Louisa, his wife, sister of the celebrated Minister, Lord North. The Peerage he inherited, was a Barony in fee, conferred originally on his ancestor, Sir Robert Willoughby, Kt., of Broke, a gallant warrior of the time of Henry VII. His Lordship was also heir general to the Barony of Latimer, created by writ 20th December, 1299.

He married, in 1829, Margaret, third daughter of Sir John Williams, Bart., of Bodelwyddan: but had no issue. His nephew and heir (the son of his late sister Louisa, wife of the Rev. Robert Barnard) is Robert John Barnard, born 17th October, 1809, now ninth Lord Willoughby de Broke; who married, in 1842, Georgiana Jane, third daughter of Major-General Thomas William Taylor, of Ogwell, Devon, and has two sons and a daughter.

ADMIRAL SIR THOMAS BRIGGS.

ADMIRAL SIR THOMAS BRIGGS, G.C., M.G., Commander-in-Chief of Portsmouth, was the seventh and only surviving son of Stephen Briggs, Esq., Chief Surgeon at Madras, by his wife, Magdalene, youngest daughter of James Paisley, Esq., of Craig. Through his lady, his mother, Admiral Briggs was nearly allied to a galaxy of naval and military heroes. Admirals Sir Pulteney and Sir Charles Malcolm, General Sir John Malcolm, and Colonel Sir James Malcolm were his first cousins: Sir Thomas Paisley, Bart., Admiral of the White, was his uncle. Briggs himself was a scion worthy of this goodly race. Born in 1780, he entered the Royal navy 10th September, 1791, when but eleven years of age. His rise through the minor grades was rapid, and his career throughout most gallant. He became a captain in 1801. During the late war he was in continually active employment, and he did good service to his country by his captures of hostile vessels, and by other feats of arms too numerous to detail. Among his most remarkable exploits were the part he took as second in command of the *Salamine* at the reduction of Genoa; and the fame he won at the expedition to Egypt, under Keith and Abercrombie. After the conclusion of the war, Briggs filled the offices of Resident Commissioner of the Navy at Bermuda from 1823 to 1829, and Superintendent at Malta Dockyard from 1839 to 1845. He was made a Rear-Admiral in 1832; a G.C.M.G. in 1838; a Vice-Admiral in 1841; and an Admiral the 2nd September, 1850. He was appointed Commander-in-Chief of Portsmouth on the 18th September, 1851.

Sir Thomas Briggs married, 1814, Isabella Harriet, daughter of General Trepand, and has had issue three sons, of whom the eldest, Lieutenant George Campbell, R.N., is deceased, and an only daughter, married to Captain George Bohun Martin, R.N., C.B. The death of Sir Thomas Briggs took place somewhat suddenly, on the 16th inst. at Portsmouth. His loss is generally and sincerely felt. A kinder-hearted man never lived, nor one more devoted to the service. In the discharge of his duties he was most active: he might be seen every day in the dockyard. His hospitality and benevolence had a very wide extent, and he was as much beloved in the social circle as he was universally respected in the navy.

PETER BORTHWICK, ESQ.

THIS gentleman was formerly M.P. for Evesham, and was known for the eccentric ability of his speeches in the House of Commons: he was also for some time manager of the *Morning Post* newspaper. Mr. Borthwick was a high Conservative in politics, and took an active part against the Slavery Abolitionists: he delivered lectures on the subject in opposition to those of Mr. George Thompson.

Mr. Borthwick died on the 18th inst., at his residence Walton villas, Brompton.

OBSEQUIES OF THE LATE EARL OF SHREWSBURY.

THE death of the Earl of Shrewsbury, which took place at Naples, on the 9th ult., was recorded in our Journal of the 27th. The body was removed to Alton Towers by the 30th ult., and was placed in the Talbot Gallery, where an altar had been erected; and here were completed the requiem-masses of thirty days, which had been commenced by his Lordship's chaplains, the Rev. Dr. Winter and the Rev. W. Gabbins, when the sad intelligence of the Earl's death was received. The arrangements for the funeral having been completed in the chapel of St. Peter, the work of removal commenced. The Rev. W. Gabbins, preceded by cross and torch-bearers, led the procession, chanting the "Dei Profundis;" and the Rev. Dr. Winter gave the asperges at the door. The body was then placed on a bier beneath the magnificent catafalque. The chapel of St. Peter communicates with the family residence. The interior, in gorgeous decoration, equals the church at Cheadle: the windows are filled with stained glass; the roofs are spangled with stars; and the mural stone filling, and carved figures of saints and angels give the interior a very sumptuous appearance. Among the pictures, in superb Gothic frames, are the "Communion of St. Jerome," by Domenichino; the "Transfiguration" of Raffaelle (a copy); the "Assumption of the Blessed Virgin," after Titian. On each side of the altar are exquisitely carved statues of the four earliest English saints, in niches. The altar was hung with black velvet, bearing a white cross in the centre; and the windows were covered with black drapery, every ray of light being carefully excluded.

In the large Illustration of the gorgeous solemnity, upon the next page, the catafalque is placed nearly in the centre of the chapel; it is ornamental, and is supported by twelves pillars of beautifully carved wood, eight having gilt coronets surmounting them, and at the summit, talbots, bearing standards with coronets of light. Corronas of light surmount the points of the gables, whilst at each corner of the catafalque (on the first floor) are four great standards with branches of lights, and between them, eight smaller standards, with branches; the tapers altogether numbering between 300 and 400, magnificently displayed the gilt catafalque. The gilt scrolls on the cornice, the saints in the niches, the star-spangled roof and the paintings, with their massive frames. The roof of the catafalque is covered with black cloth, dotted with the letter S, supporting coronets. A valance with gold fringe hangs round the whole, on which is embroidered the inscription. The eastern gable of the catafalque contains the device of the three Earldoms, worked on a black ground; wreaths of shamrocks surmount the coronets of Waterford and Wexford, and the Shrewsbury coronet is surmounted by the Tudor rose. In the west gable is the achievement of the Earl, worked in the proper, on a black ground. The north and south gables have many coronets, with the inscription "In hoc signo spes mea."

The coffin and pall, both executed by Hardman, of Birmingham, are of very superior workmanship. The coffin is of Spanish mahogany, covered with crimson velvet; the edges are engrailed with gilt metal work, and the corners clamped and richly ornamented with the letter S in the centre. On the coffin is a rich velvet pall, both executed by Hardman, of Birmingham, are of very superior workmanship. The coffin is of Spanish mahogany, covered with crimson velvet; the edges are engrailed with gilt metal work, and the corners clamped and richly ornamented with the letter S in the centre. On the coffin is a rich velvet pall, both executed by Hardman, of Birmingham, are of very superior workmanship. The coffin is of Spanish mahogany, covered with crimson velvet; the edges are engrailed with gilt metal work, and the corners clamped and richly ornamented with the letter S in the centre. On the coffin is a rich velvet pall, both executed by Hardman, of Birmingham, are of very superior workmanship. The coffin is of Spanish mahogany, covered with crimson velvet; the edges are engrailed with gilt metal work, and the corners clamped and richly ornamented with the letter S in the centre. On the coffin is a rich velvet pall, both executed by Hardman, of Birmingham, are of very superior workmanship. The coffin is of Spanish mahogany, covered with crimson velvet; the edges are engrailed with gilt metal work, and the corners clamped and richly ornamented with the letter S in the centre. On the coffin is a rich velvet pall, both executed by Hardman, of Birmingham, are of very superior workmanship. The coffin is of Spanish mahogany, covered with crimson velvet; the edges are engrailed with gilt metal work, and the corners clamped and richly ornamented with the letter S in the centre. On the coffin is a rich velvet pall, both executed by Hardman, of Birmingham, are of very superior workmanship. The coffin is of Spanish mahogany, covered with crimson velvet; the edges are engrailed with gilt metal work, and the corners clamped and richly ornamented with the letter S in the centre. On the coffin is a rich velvet pall, with a cross of white velvet running through the centre; the arms of the late Earl, in gold embroidery, surmounted by four coronets. The family motto, "Prest d'accomplir," is worked in gold on crimson velvet, running bend-wise across the whole pall. The initials of the late Earl, "J. T.," are placed in each of the angles, and on each end, in gold embroidery, the verscule, "Requiem eternam dona eis Domini et lux perpetua luceat eas." The painting and decoration of the catafalque and church was executed under the superintendence of Mr. Kearns, his Lordship's painter, to whom the church at Cheadle owes its exquisite finish. The coffin, pall, and other embroidery are by Hardman; the designs for the whole being supplied by Mr. Edward Pugin, son of the late distinguished architect.

On the morning of the 14th two altars were erected in the chapel; masses were commenced at six, and were carried on without interruption till eleven o'clock, when the grand high mass commenced. The Bishop of Birmingham was the celebrant, with the Very-General as Deacon, and the Vice-President of Oscott as Sub-Deacon. There were present, besides the Bishop officiating, the Bishops of Northampton, Shrewsbury, and Clifton. There were also present several distinguished clergymen of the Roman Catholic faith.

The Cistercian, Benedictine, Dominican, and Passionist Orders were represented by members of each, dressed in their peculiar habits; and there were at least 150 secular priests present. The "Dies Irae" was then sung, the other hymns and responses peculiar to a mass for the dead, were sung and chanted by the priests in full choir, with lighted tapers in their hands; and the choir of St. Chad's, Birmingham, assisted at the ceremonies. After the mass, Dr. Weedall ascended the pulpit, and preached an eloquent sermon, eulogising the late Earl. The ceremony of incensing the coffin, and chanting the prayers for the dead, was performed by each of the four Bishops. The coffin was then removed, and the procession formed, of the cross-bearer and torch-bearers; the choir; monks and friars, bearing lighted tapers and chanting; the canons, in purple vests; his Lordship's chaplains; the Bishops; a servant, bearing the coronet; the hearse, drawn by six horses; and the chief mourners. The head-servants walked next in the procession; then the tenantry, to the number of several hundreds, and the labourers employed on the estate. On reaching the extremity of his Lordship's domain, the priests and religious orders divested themselves of their surplices, and returned to the Towers; the Chaplains, Bishops, and Canons being conveyed in mourning coaches to the little Chapel of St. John, situated on a rocky eminence overhanging the river Churnet, and there deposited it remains in a vault beneath the Sanctuary, with all the usual ceremonies of the Roman Catholic Church.

THE REMAINS OF THE LATE EARL OF SHREWSBURY LYING IN STATE, IN ST. PETER'S CHAPEL, ALTON TOWERS.—(SEE PRECEDING PAGE.)

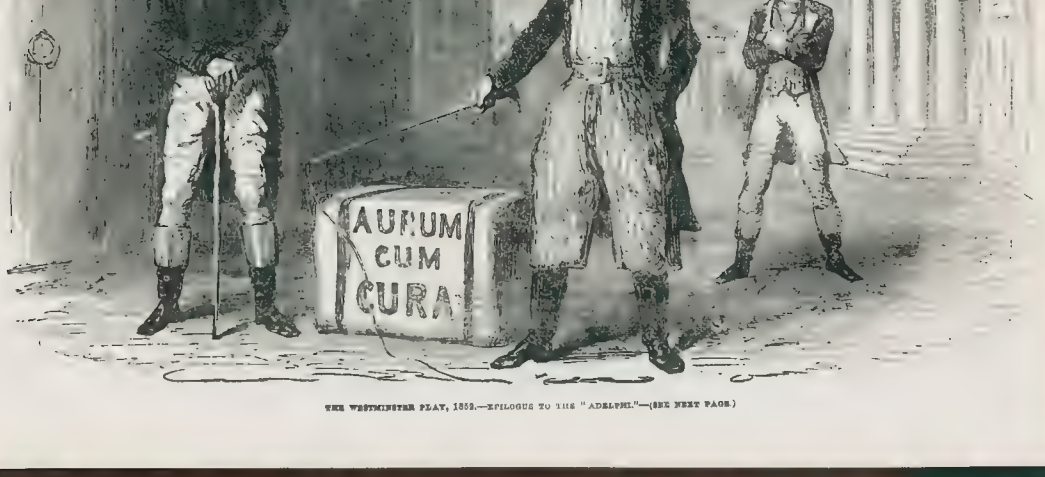
MR. ALBERT SMITH'S "ASCENT OF MONT BLANC," AT THE EGYPTIAN HALL, PICCADILLY.

"THE ASCENT OF MONT BLANC."

Mr. Albert Smith has gracefully acknowledged the success of his last season at the Egyptian-hall, in Piccadilly, by adding to the attractions of his already favourite entertainment; by which judicious course he has not only maintained his popularity, but bids fair to extend it through the present season. Thus, Mr Smith has reproduced his "Mont Blanc" with scenic novelty, having himself acquired fresh glimpses of his sublime locality, he has added to his sparkling monologue; and the public have not failed to recognise these renewed exertions for their gratification. We are induced to particularise these merits, because it is a common error with *entrepreneurs* for the public entertainment to get spoiled by popular favour, to grow careless of further excellence, and, in some cases, retrograde; so that the general public are in the end losers by their recognition of merit.

Mr Smith has chosen the wiser part of rendering his entertainment as perfect as possible, and one of his means is in aiding *association* by accessories in themselves realities. Thus, the proscenium has been re-constructed precisely to represent the exterior of a Swiss *chalet*, not in the mere style of stage carpentry, but actually of solid wood, and of the real size. The centre of this rises out of sight while the views are exhibited, and a pretty effect is gained by the light through the curtained windows in the interval of the scenes. The front is occupied by a large pool of water, surrounded by granite rocks and Alpine plants, and well stocked with some fine live fish; and from this spring clumps of bulrushes and Arum lilies, which throw water and gas from their petals. Chamois skins, Indian corn, Alpinstocks, vintage baskets knapsacks, and other appropriate matters are grouped about the balconies, and vines and creepers cling about the rafters and beams. The model was made by Kehrli, whose shop for white wood fancy-ware is the most attractive place in Chamouni, and all the detail has been carried out under Mr. Smith's direct supervision.

The room itself is adorned with the banners of the Swiss cantons, as well as some interesting pictures having relation to Mont Blanc and the neighbourhood, and some remarkably elegant lamp-shades of hanging leaves and flowers break the light very agreeably. Altogether, the effect is very novel, and in itself an exhibition; and this tasteful decoration is evidently appreciated. The room is crowded night after night by the most fashionable audience, and the excitement appears quite equal to that of last season.



THE WESTMINSTER PLAY, 1852.—EPILOGUE TO THE "ADELPHI."—(SEE NEXT PAGE.)

THE WESTMINSTER PLAY.

With December, 1852, arrived the turn for the representation, by the Queen's scholars at Westminster, of Terence's play of the "Adelphi." It is to be produced here every fifty years: and if the reader will turn to our Journals for 1847, No 296, he will there find a full notice of the last performance, with a view of the classic precinct, annually erected for the occasion in the dormitory of the College, and the audience of the Westminster scholars and their friends, and the ladies ranged apart from the rest, according to the ancient manner.

The "Adelphi" is one of the most delightful specimens of Terence's comedy of manners. It is of a more quiet character than the "Eunuchus" or the "Andria," but in construction and truthful colouring it is unsurpassed. The amiability of the old townsman, *Micio*; the honest severity of the countryman, *Demea*; the affection of the young brothers, *Aschinus* and *Ctesipho*, for each other; are all charmingly portrayed, and the personages are brought in a manner witnessed only on these occasions. The order of proceeding was the same as in preceding years; and the architectural "fit," designed by Garrick, be the grand classic background for the youthful actors. The arrival of the principal visitors was announced, about seven o'clock, by the military instrumentalist, whose "Sea the conquering hero comes" indicated the presence of the head master, Dr. Liddell, and the immediate commencement of the performance.

The play at Westminster is usually well acted; but the "Adelphi" was this year performed with more than ordinary excellence. It had less of the formality of training than before. Mr. Tatet *Bayne* was prominent as "Syrus"—an unconventional and definite character: his bewitty and gestures were admirable. The querulous *Demea* was well brought out by Mr. Gibbs; and the gentler department of *Micio* was well sustained by Mr. Gibbs's brother, who, as the benevolent *Micio*, played with much ease. Mr. Dodgson touchingly delineated the maternal anguish of *Sostrata*. According to recent rule, the metrical system of *Terentius* is the only source of the language employed.

The programme for the year, in tribute to the memory of the Duke of Wellington, was ably delivered by the captain of the school, Mr. Twiss; and referred specially to evidences of muscular Christianity, previously pointed out by a correspondent of *Notes and Queries*, as follows:—"The 'Adelphi,' as is well known, was originally produced at the funeral games of the Roman general Paulus Æmilius. One of its terms for representation at Westminster also closed just after the death of General Wolfe. Again, in the year 1773, on the memory there are in the Westminster programme that year some beautiful Prologue, written by Mr. Lloyd. The turn of the same play now arrived, and its representation was postponed in consequence, in the year 1817, when the country had to deplore the death of the Princess Charlotte, wife of Prince Leopold; now again its turn falls out just after the death of the late Commander-in-Chief, Wellington."

In the epilogue, the gold-fever of the day was cleverly illustrated. Here *Demea*, hoping to repair his shattered fortunes, addresses *Syrus*, who has just returned from the diggings with a package of gold, inscrib.d—"Aurum concentra," when this conversation ensues—

(Sy.) (*Singing*) " Ad urbem ivit Doodilus cum
Cabo la et cocco,
Ornavit plus à pilleum
Et clixi Macaroni."

(D) To cook comes them. (Sy) Tu sapientæ agis.
(D) Non te noverunt, de qui de palpere divis
Exa'am minimis sumptibus atque mori.
(Sy.) Ah mortis? quo te laterum puper in astro?
Ba balve mam tels iterare sen x
Quid? Cal fordic ops, Australiensque fodinas
Nescis? arrivra, fames aures tera jaset.
Extat quippe novus mortalibus Eldorado,
Sacra fames auri, sic tient, et sitis auri
Quo mamibus vendit vir pede rapta sua?
Esse famem auri concnovimus atque sitem auri:
Quid si aurum fessor potet odaique? (D.) Fayse!

Our Artist has, upon the preceding page, illustrated the close of the Epilogue, after Hegio has entered as a nigger groom.

Altogether, by this performance of the "Adelphi," the Queen's Scholars preserved, as Warton elegantly phrases it, "this liberal exercise, in the spirit of true classical purity, at the College of Westminster."

The third performance, on Monday, was attended by the American Minister, the Earl of Devon, Sir Charles Trevelyan, the Dean of St. Paul's, Archdeacon Hale, Archdeacon Lane Freer and the Rev. Temple Frere, the Rev J. Jennings, the Rev. E. Repton, and the Rev. Dr. Jelf, canons of Westminster.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

Since we last wrote, the dealings in the National Securities have been tolerably extensive, notwithstanding the Whitsuntide holidays. In the quotations, no change worthy of notice has taken place; but we may observe that they have had an upward tendency. On most days of the week, the Three per Cents for the opening, ex dividend, have marked 100⅛; the Three per Cents Reduced, 101⅛ ⅜ 100; New Three-and-a-Quarter per Cents, 104⅛ to ⅜; Bank Stock has realised 223 to 224½; Long Annuities have been quoted at 6 7-16; India Bonds, 77s. to 80s.; and Exchequer Bills, 60s. to 62s. 6m.

The extraordinary accounts at hand from Australia—and especially the intelligence that upon the territory of the Australian Agricultural Company, comprising 350 000 acres in the "block," the precious metal has been found to an extent promising immense results—have been productive of great excitement amongst the speculative class. The shares of the above-named company, upon which only £25 has been paid, have, therefore, risen to as high as 310; but they were last quoted at 240 to 250. The Van Diemen's Land Company's shares have improved in value to some extent; but we have great doubts of the policy of investing at high prices, because it is just possible that the present mania will be followed by a great re- ction.

The reports of the precious metals have been again on a very extensive scale. £310 000, in gold, having come to hand from Australia; 760,000 dollars, the Company is doing, from the Pacific; and 450,000 dollars from New York. The returns have been liberal, and amongst which is the export of not less than 47,000 to Calcutta, Ceylon, and Alexandria. As we have long since stated, the supply of bullion in the Bank of England does not materially increase—it being now nearly £22,000,000. Nevertheless, it is evident that it will steadily accumulate for some time; unless, indeed, the exchanges should remain unfavourable to England for a lengthened period. Such a result, however, is not likely to follow our increasing commercial prosperity, as the present time gold is 0 48 per cent. dearer in Paris than in London; 0 60 per cent. dearer in Hamburg than here; but the excess is nominally 0.57 per cent. in favour of England compared with New York. The latter quotation leaves a slight profit on shipments, consequently, it is probable that further heavy remittances will be made, more especially as the receipts of Californian gold at the various mints were rapidly on the increase, 879 940,000 sterling having been deposited in the first eleven months of the present year, or £1,100,000 more than in 1851.

The rate circulation of the United Kingdom is now considerable larger than for a series of years past; and it is well understood that the quantity of acceptances in the hands of all the leading bankers is unusually heavy; yet such is the great abundance of money, no change has taken place in the rates of late on the security of our commercial districts, and the increasing means of the labourers, have produced much firmness in the colonial markets; the importers have been taken somewhat "aback," owing to the defeat of the Budget; most of the holders of tea, under the impression that a portion of the duties on that article would be speedily reduced, having found some difficulty in effecting sales within the last few days.

On the whole the Foreign House has been tolerably firm. Spanish Bonds have somewhat recovered from the late decline. Portuguese Old Bonds have been on the advance; but Turkish Scrip, from the Bank at Constantinople, having remained State paper money, has been quoted at from ⅝ to ¾ prem. Northern Securities have continued very steady. Swedish 8s 1p has been among the purchases. Brazilian Bonds have sold at 103 to 103⅝; the Four-and-a-Half per Cents, New, 98; the Spanish Three per Cents, 24¾ to 25; Equador, 2⅞; Mexican Three per Cents, 21¾; Peruvian Deferred, 6¼; Sardinian Five per Cents, 87½; Spanish Three per Cents, 51¾ to 50¾; New, Deferred, 24¼; Spanish Active (Cerruvetti), 5¾; Spanish Committee's Certificates of Coupon, not funded, 4, 4¼ per cent; Venezuela, 21½; ditto, Deferred, 17; Austrian Five per Cents, 85½; Dutch Two-and-a-Half per Cents, 68⅞ to 68⅝; and the Four per Cent Certificates, 99⅝ to ⅞.

Railway securities have met a steady market, and prices almost generally have been well supported. Australasia Bank Shares have sold at 32½ to 34; Irish North Australian, 58; Chartered Bank of India, Australia, and China, 34; English, Scottish, and Australian Chartered, 63½; Union Bank of London, 20¾; London Joint Stock, 20⅜; London and Westminster, 35; Oriental, 33½; South Australian Land, 6⅛ to 6¼; Van Diemen's Land, 20 to 22; and Union of Australia Bank, 72 to 73. Royal Steam Navigation Shares have been 2⅜. General Screw Steam, 59 to 61½; North of Europe Steam, 2⅜; Peninsular and Oriental Steam, 78 to 80; Royal Mail Steam, 80.

Accounts from Paris and Vienna show a revival of speculative activity, with comparatively easy money markets.

The market for Railway Shares has been firm, yet the business doing has not been to any extent. Transactions have taken place in Caledonian, Eastern Counties Railway and Dock Company's shares, at 10s. to 20s. pm. The dealings have been reported as follow:—

ORDINARY SHARES AND STOCKS.—Aberdeen, 32½; Caledonian, 68½; Dublin and Belfast Junction, 42½; Eastern Counties, 13½; Eastern Union, 11; Ditto, B stock (Crewe), 8½; East Lancashire, 78; Edinburgh and Glasgow, 70½; Great Northern Stock, 84 ex new; Ditto, B Stock, 122½ ex new, Great Western, 59½; Lancashire and Yorkshire, 84½; Ditto, Fifths, 11¼; Leeds Northern, 18⅝; London and Brighton, 102; London and North-Western, 125½; Ditto, Fifths, 16½; London and South-Western, 53 to 55; Londonderry and Enniskillen, 20½; Manchester, Sheffield, and Lincolnshire, 31½; Mid-and, 60; Norfolk, 82½; North British, 40; North Staffordshire, 13⅝; Oxford, Worcester, and Wolverhampton, 55; Scottish Central, 95; Scottish Midland, 64; Shrewsbury and Birmingham, 67; South Devon, 4½; South-Eastern, 82½; South Wales, 59½; Vale of Neath, 13; Waterford and Kilkenny, 9½; Waterford and Limerick, 27½; York and Berwick, 74½; Ditto, Extensions, 13⅜; Ditto, G N E. Purchase, 7½; York and North Midland, 30½ to 60. London and Blackwall, 9⅜.

LIST OF LEASED AND FIXED RENTALS.—Buckinghamshire, 109; Hull and Selby (Quarters), 27½; Manchester, Buxton, and Matlock, 9½; Northern and Eastern, 64 to 6; West Cornwall, 22½.

PREFERENCE SHARES.—Aberdeen, 42½; Eastern Counties Six per Cent, 15; Eastern Union, 18½; Great Northern Five per Cent, 113; Great Western Four-and-a-Half per Cent, 110; Manchester, Sheffield, and Lincolnshire, New £10 Shares, 11½; Ditto, £5, 5⅛; Consolidated Branch and Birmingham, 150; North British, 103; Oxford, Worcester, and Wolverhampton, £15 Shares, 17; South-Eastern, 99½; York and North-Midland (purchase), 10½

FOREIGN AND COLONIAL.—Antwerp and Rotterdam, 3; Belgian Eastern Junction, 1; Dutch Rhenish, 7; Great Indian Peninsula, 7½; Great Western of Canada, 11½; Luxembourg, 5½; Paris and Lyons, 27½; Paris and Strasbourg, 33 ex div.; Quebec and Richmond, 3½; Sambre and Meuse, 11½; Upper India Scrip, 4 premium; West Flanders, 6½; Western of France, 21; Northern of France, 37½.

Mining Shares have ruled very active, and prices have fluctuated to some extent. Agua Fria have marked 3½; Anglo-Californian, 1½; Australasian, 9; Australian, 10½; Australian Cordeiras, 2; Australian Freehold, 1⅝; Ave Maria, 1½; British Iron, 9 to 10; Brazilian Imperial, 5½; Carson's Creek, 1½; Cobre Copper, 41½; English and American, 1½; Gold Australia and Bremingham, 150; North Brazil, 1½; Liney, 2½; Mariquita, 1⅝; New Granada, 2½; Nouveau Monde, 3; Port Phillip, 8½; Rhymney Iron, 23; South Australian, 2½; Tin Croft, 1½; United Mexican, 2½; West Mariposa, 1½; Yuba, 2½.

THE MARKETS.

CORN EXCHANGE.—Although the arrivals of English wheat up to our market this week have been on a very moderate scale, the demand for all kinds has ruled inactive, and, in some instances, low and damp parcels have fallen in value 1s per quarter. Foreign wheat, the imports of which have continued moderate, has sold slowly, but we have no change to notice in the quotations. Floating cargoes have been dull in demand. Fine barley has realised full currencies; but grinding and distilling sorts are as well as last week. Malt commanded very little attention. Oats have produced extreme quotations. In the value of beans, peas, and flour we have no alteration worthy of notice.

English.—Wheat, Essex and Kent, red, 42s to 45s; ditto white, 45s to 50s; North and Scotch, 38s to 40s; ditto white, 42s to 45s; rye, 30s to 32s; grinding barley, 22s to 24s; distilling ditto, 27s to 28s; malting ditto, 30s to 34s; Lincoln and North malt 30s to 32s; brown ditto 30s to 34s; Kingston and Ware, 36s to 38s; Chevalier, 40s to 42s; Yorkshire and Lincolnshire oats, 17s to 22s; potato ditto, 19s to 24s; Poughkeepsie, 23s to 25s per quarter; beans, 30s to 34s; pigeons, 34s to 36s; harrow ditto, 32s to 34s; grey peas, 30s to 32s; maple, 30s to 34s; white ditto, 32s to 36s; and tares, 28s to 30s per bushel. English flour sold slowly, at 30s to 32s per sack of 280 lbs for town-made; Lincoln, Boston, and Essex, 28s to 30s; Suffolk, 25s to 28s; and Yorkshire, 23s to 27s per 240 lbs. *Foreign*, American flour, 20s to 22s per barrel.

Irish and Scotch.—Oatmeal, 17s; and all kinds of seeds command firm, and prices are well supported.

Linseed, English, sowing, 50s to 56s; Baltic, crushing, 40s to 42s; Mediterranean and Odessa, 40s to 42s; hempseed, 37s to 41s per quarter. Coriander, 9s to 9s per cwt. Brown mustard-seed, 7s to 9s; white ditto, 7s to 9s; and tares, 4s to 6s per bushel. English rape-cake sold slow, at 6l to 6l 2s per last of 10 tons. Linseed-cake, English, 6l 5s to 6l 10s, and foreign 5l 10s to 5l 15s per ton. Rape cakes, 5l 15s to 6l 0s per ton.

Provisions.—The prices of wheaten bread in the metropolis are from 7d to 7½d; of household ditto, 5d to 6½d per 4 lb loaf.

Butter.—Best, 1s; barley, 1s; oats 1s; rye, 1s; beans, 1s; peas, 1s.

Tea.—Owing to the defect of the Budget, the demand for all kinds of Tea is heavy, and prices are not supported. We have to report a decline of 3d per lb on congou, and 1d per lb on Southong. On Saturday last, duty was paid on 6l,886 lbs against 39,000,000 lbs to the same period in 1851.

Sugar.—The amount of business doing in raw sugars is by no means extensive; nevertheless, prices are steadily supported. Foreign refined goods command more attention, chiefly for shipment to the Continent. Refined goods are selling more freely, at 45s to 48s per cwt for low to fine grocery. Crushed sugar remains nearly the same. The total clearances to the 8th inst. were 1,272 tons, against 1,461,927 cwt to the same date last year, showing a decrease of 189,927 cwt. Stock continues to move off steadily, but we have no change to make in the last. Good ordinary native Cuba is quoted at 34s per cwt.

Rice.—The prices of Carolina, and 5s per cwt lower. Most other kinds of fruit are in good request, at full currencies.

Provisions.—For all kinds of butter the inquiry is in a very limited state, owing, chiefly to the nullness of the weather. In some instances prices are in favour of buyers. Irish bacon is dearer is quoted at 52s to 58s, and the best Prime Mess, 60s to 62s per cwt. Hams move off slowly, at from 48s to 54s. according to quality. Lard sells, and somewhat dearer. Hams command very full prices. In other kinds of provisions next to nothing is doing.

Tallow.—Our market is somewhat firmer than last week, and prices are on the advance. P C 4 on the spot is quoted at 42s to 42s 3d. Town tal ow is 42s per cwt, net cash, rough fat 2s 6d per 8 lb.

Oils.—Linseed is speaking. On account of early and late sales are well supported. Linseed 28s 6d to 30s; rapes not. 35s to 36s per tun. Sperm, 84l per tun; cod, 34l; seal, 33l; pale ditto, 42l to 43l; southern 33l to 34l per tun.

Spirits.—We have an active inquiry for all kinds of rum at further advanced rates. Of Leewards, 1s 8d to 1s 9½d; East India, 1s 6d to 1s 7d; and Jamaica, 1s 7½d to 1s 8d per gallon. Brandy is still in good request, and we have no change to notice in the value of cognac but brands of the vintage of 1851, 2s to 2s 3d per gallon. British-made gin is in fair request, at 13s per puncheon.

Hay and Straw.—Meadow hay, £2 15s to £4 5s; clover ditto, £3 15s to £5 5s; and straw, £1 5s to £1 15s per load. Trade dull.

Coals.—Stanton, 17s 6d; Stewarts', 17s 6d; Eden Main, 17s; Belmont, 16s 9d; Braddyll, 17s; Hetton, 16s; South Hartlepool, 17s per ton. Trade firm.

Wool.—Best, calves, and pigs, have sold steadily, at full rates of currency. Sheep have moved off briskly, at a further advance in the quotations of 2d per 8 lb.—

Beef, from 2s 8d to 4s; mutton, 3s 6d to 4s 10d; veal, 3s 8d to 4s 8d; pork, 3s 4d to 4s per 8lb by the carcass.

Smithfield and Leadenhall.—The supplies of fresh kind of meat on sale, this week, have been numerous; yet the demand has ruled steady, and prices have been fairly supported.—

Beef, from 2s 8d to 4s; mutton, 3s 6d to 4s 10d; veal, 3s 8d to 4s 8d; pork, 3s 4d to 4s per 8lb by the carcass.

THE LONDON GAZETTE.

FRIDAY, DEC. 17.

BANKRUPTS

C JACOB, Ingram-court Fenchurch-street, merchant J K VOTE, Albion square, Dalston, builder R S BOULDER, Mount-row, Newington-road, Lambeth, tailor. J ATKINSON, Kingston-upon-Hull, draper and woollen dealer W BANKS, Cumberland-terrace, Harrow-road, builder B SALTER, Abbotts Langley, Hertfordshire maltster and miller. CRIPE D Newcastle-upon-Tyne, common brewer and maltster. B JAMES, Newport, Monmouthshire, builder WHEELER, Great Russell-street, and Bedford-street, Bloomsbury, publisher and bookseller. C TULLY, sunderland, shipowner and merchant. B B HARRISON, Sunderland, linendraper.

TUESDAY, DEC. 21.

BANKRUPTS

J ANTIGUS, Mark-lane, City, general merchant. J W THOMAS, Leadenhall-street, City, auctioneer. J MANLEY, Exeter, dealer in wool. W BATE, Cumsford, Cornwall builder. F PEARSON, Liverpool, painter.

SCOTCH SEQUESTRATION.

R RUTHERFORD, Jedburgh, farmer.

BIRTHS.

On the 16th inst, at Carlton, Maynooth, the Right Honourable Countess of Kildare, of a son.—On the 17th inst, at Swindon Rectory, near Cheltenham, the wife of the Rev L M C Griffiths, of a daughter.—On the 16th inst, at Radlip House, Worcestershire, the Countess Henri di San Damiano, of a son.

MARRIAGES.

On Thursday, the 16th inst, by the Rev the Hon and Rev Baptist W Noel, at Desmarais-place Chapel, Camberwell, William, fourth son of the late George Payne, Esq, of the Priory, Peckham, to Hephzibah, youngest daughter of Henry Dobson, Esq, of Glenthorne-terrace, Camberwell.—On the 16th inst, at St Nicholas', Warwick, the Rev Arthur Charles Copeland, eldest son of St. John's, Bury St Edmunds, to Emily Sophia, eldest daughter of the Town Clerk, James Tibbs, Esq, Eyton-crescent, Warwick.—On the 16th inst, at Shrivenham, the Rev John Francis Hunt, to Cecilia Isabella, eldest daughter of F Hurt, jun, Esq of Hopton-hall.

DEATHS.

"On the 19th inst, after a long and severe illness, Alexander Macdonald, Esq, of the firm of Macdonald and Co, Regent street, aged 67.—On Wednesday last, at Buxton Vicarage, Derbyshire, deeply lamented, the Rev George Marvin, D, V and for 30 years Vicar of that parish.—On the 18th inst, at the Parsonage, Woodhouse Eaves, Leicestershire, the Rev R W Close, Perpetual Curate of the Parish, and Rural Dean, second son of the late Major Close, R A, aged 47.—On the 16th inst, at his seat, Compton Verney, Warwickshire, Henry Peyto, Lord Willoughby de Broke, in his 80th year.—On the 20th of July, at Saguenay, William Lyne, Esq, New South Wales, Janet, relict of the late Rev John Geddes, D D, sister of the late General Sir Kenneth Douglas, Baronet, and mother of Colonel Kenneth Snodgrass, C B, aged 90.

THE GROCERS' SHOPS AT CHRISTMAS TIME.

Many shops affect a peculiar style of decoration at Christmas time. The pastry-cook turns her counters into miniature plantations of fir-trees, that are laden with wax tapers and various bon-bons—the sportsman of fruit only to be gathered in fairy-land and at juvenile parties. The butterwomgers throw up in their shop-windows wonderful masses of fortifications, which caenum peeping through port-holes, and sentinels leaning over parapets—the entire work constructed of the same materials as those and butter; whilst beautiful white swans, made out of lard, swim about in a cool lake of real water in front of a rock of Stilton. The greengrocer presents an impenetrable thicket of holly and evergreens. The butchers delight in ornamenting their stock with bushes of ribbons and rosettes of the gayest colours, as if the animals had had their heads with pride upon the butcher's block, too happy in the sustaining notion that these pay pecuniary enormous honours would be paid to them when once they had entered into the state of beef or mutton-hood. Who knows that a Sloathorn or a Southdown, panting under the weight of medals and prizes, may not die with as much heroism for his country as any great patriot? At least it is best to think so, for such ennobling thoughts may sweeten the poor animal's last moments, and render his meat more tender. From the butcher's to the grocer's there is but one step; more it one supplies the suet, the other returns the plums and raisins, and all are important members in the grand Parliament of Plum-pudding that is held in every Englishman's house at this giving and forgiving time of the year. But we are almost inclined to believe that the grocers make the best Christmas display of all the London shopkeepers. Their style of decoration is more composite—the materials they work with more varied in form and richness of colour. We have seen many a shop-window that might vie in splendour with the last scene of a pantomime. It glittered all over with spangles, like a harlequin's dress. Some, which we have admired in common with a whole Fop's-alley of fascinated boys, hang out a crystal curtain, in glorious emulation of Jullien's *bal masqué*; and the effect is so dazzling that you can see to set your watch on the opposite side of the way. The latter experiment, however, is not recommended, as it might be attended with a certain degree of danger; for, strange to say, the grandest shops in the grocery trade exist and shine in the poorest and most crowded neighbourhoods, where a watch rarely shows its face, except in the windows of a pawnbroker: for instance, the grandest specimens in the way of illuminations and tinselled paper are to be found in the Bow-cut, Shoreditch, and Tottenham-court-road. There it is not unusual to count as many as twenty gas-lights burning the whole length of the shop, and the effect of these is repeated in all directions by the contrivance of chandelier-drops and looking glasses, until the shops by the side of it look quite gloomy and black, like the cavernous entrance before you plunge into the sea of light of Vauxhall-gardens. Why currants and sticks of cinnamon (by the way, there seems to be a curious competition as to who shall get the longest sticks—we have seen some much longer than a beadle's staff), and candied lemon-peel and spice should require more gas and a greater amount of calico drapery and highly-coloured illustrations to make their merits apparent than carrots, or pork, or poultry, or milk, or ginger-beer, or anything that is eaten or drunk, is one of those puzzling mysteries of trade that we have neither time nor patience nor space to inquire into. Suffice it to say, that if all the grocers were swept out of the shopocracy of London, the streets would lose some of their gayest decorations, and the little boys would be puzzled in finding a resting-place where they could see more to feast the stomach as well as the imagination; and we, too, should miss the gorgeous labels, illuminated in the most confident style of boastful recommendation; for a grocer's shop-window is at all times as full of challenges as an Irish club; but, at Christmas time, it breaks out with more challenges than ever we. At that period there isn't a thing in his warehouse but what he "challenges," the entire world to produce "a better article at the same price," until you would imagine a Grocer must be the most egregious fire-eater in existence, instead of being the smooth-faced, smooth-spoken, oily-pated fellow we find him, with the scales in his hand, instead of a pair of pistols, behind his counter.—H. M.

THE DIARY OF A BANKER'S CLERK.

(WRITTEN ON CHRISTMAS-DAY.)

Here have I been ever since eight o'clock this morning! The hours hang heavy, as if there were large pieces of lead tied on to the end of them. like the weights of a Dutch clock. How slowly they move! and yet all my wishing and sighing will not make them move quicker. I am here for the entire day, and I may as well endeavour to make myself happy The only difficulty is, how am I to do it?

It is my turn this year to be on guard on Christmas-day, and I oughtn't to grumble. It is by the custom of our house for certain of the clerks to take the duty in turns. Last year it was Brown's turn. The year before that it was Simpkins's, and I recollect he told me he passed away the time by playing four-handed whist all by himself on the counter; but I haven't even that consolation, for I don't know any game except-ing *beggar-my-neighbour*, and that might be rather ominous in a place like this, though I have been told that the game has been played, and successfully played, by many a swindling bank before now. However, playing at cards by yourself must be of very unnatural enjoyment. Simpkins must have had a one-sided mind to have played with three dummies all day long. There cannot be much fun surely in cheating yourself, or in winning your own money?

Hallo! it's very strange I never saw that almanack before. I thought I had noticed everything in the office from the pattern on the floor up to the cracks on the ceiling. Let's look at it. There's on the top a fine engraving of Greenwich-park, with the birds, and the deer, and the children, and their kites, all beautifully flying about. That's consoling to me in my present position, where I have no more chance of running or flying than the dragon on this George-the-Third sovereign I am tossing with; and, moreover, it's highly wrong in me to think of flying from a respectable establishment where I have obtained credit has never been shaken any more than the "Bank on which the wild thyme grows." Pshaw! I've no voice to sing to-day; but, by the way, what a regular time-server the cashier to the "Bank on which the wild thyme grows" must have been.

But, talking of flying, I can't help feeling for that poor, miserable fly, who is crawling at such a funeral pace, as if he was mourning for all his defaunt brothers and sisters, round the glass of that abominably slow clock. Poor fellow-prisoner! I can quite sympathise with you. I know how wretched it must be for you to be locked up on Christmas-day—locked up, too, in a bank in which you have no interest—not even in the Three-and-a-Half per Cents, or the Reduced Annuities, or any other stock. I wish I could open the window to let you fly out; so that, if you have a heart in which gratitude ever keeps a permanent rend balances the favours it pays away against those it receives, you could wing your way to a certain second-floor in Islington, and there tell a certain answer that quiets a certain fly, who is now sitting down to dinner with her children, that I am drinking her health at this present moment, "with all the honours," out of this convivial pot of porter.

I have narrowly escaped losing my sovereign. I wasn't altogether sorry for it, it took me a good half hour to find it again. It is now one o'clock. It was very kind of Sir Jeremy to give me this sovereign; though I wish he hadn't said anything at the time about "a merry Christmas," for he knew I was going to stop here all day, and the sovereign, as it fell, coupled with that strange wish, seemed to ring with irony instead of the bright sound I am sure a kindness intended it to sing in my ears. But he thought, perhaps, that I should be more in want of a "merry Christmas" than any one else, and so it was only natural that he should wish it me!

Two o'Clock.—I have been trying to make some conundrums. It's more difficult than I thought, for when you hear them they seem easy enough. I can do the questions beautifully; but it's the confounded answers that puzzle me. However, it's a good occupation, requiring almost a Chancery suit of patience, and I shall certainly try it again, for it pushes the clock on most wonderfully.

Half-past Two.—The housekeeper has just brought in the candles. Poor old soul! she looks more cheerful with a little light thrown upon them. The almanack comes out quite glowingly, and seems to smile a warm welcome upon me. However, its greeting is as hollow as a bandbox; for, on looking at CHRISTMAS-DAY, I found written opposite to it, "*Holidays* all the Banks and Public Offices." There's a mockery for you, when I am shut up here, worse (if it wasn't for the fire) than the Prisoner of Chillon!

Three o'Clock.—The old lady (she has been here five-and-twenty years; and I think that, at times, the bank would break, or some misfortune and I think that, at times, the bank would break, or some misfortune would come to it, if she was to leave it) looked bright as a new shilling, in her beautiful silk gown, which she told me "Sir Jeremy, like a dear gentleman—which he always is—had given her as a Christmas box." She was very merry, and talked as incessantly as a parrot in a girl's boarding-school. She had to cook her dinner, and yet stood chatting with me for half-an-hour, as if minutes were of no moment in the boiling of a plum-pudding. She gave me a bag of Spanish nuts while she would come up again shortly, and if I wanted anything I was to be sure to call; and she ran down the stone staircase, chatting to herself every step she took.

Four o'Clock.—I amuse myself roasting my chestnuts.

Five o'Clock.—The housekeeper has brought me in plate after plate, crowded with good things—turkey, mince-pies, sausages, and tarts, until I couldn't have feasted more if I had been at a Lord Mayor's dinner. Neither was beer wanting; and to crown all, she poured me out a tumbler of hot gin punch, and her eyes shone so brightly that it was as good as a Yuletide log to look in her face.

Seven o'Clock.—I am happy now: if I could only smoke a pipe, and have my family round me, I wouldn't envy the best man his feelings of enjoyment on this happy day. But as neither luxury is possible, I must content myself with what I have, and I have plenty of everything. The good housekeeper has stocked the counter with golden oranges and pippins, the sight of which is more agreeable to my eyes than the heads of sovereigns I see shovelled on it during the week days; and which is more palatable to my lips than any you could offer me out of a railway king's cheque-book. All the black thoughts which haunted me in the opening part of the day have left me. The knowledge of so much wealth about me was poison then to my sense of mind. I recollected the accounts in which I knew thousands were lying idle, almost unused for, and it stung me like an adder to think how a small portion of them would purchase my freedom, and allow me to spend this one great holiday of the year with my family. I felt envious and discontented, probably the more so, because the profusion of riches with which I was surrounded as with the walls of a pri-

GROCER'S SHOP AT CHRISTMAS.

THE BANKER'S CLERK.

(Continued from page 566.)

son, appeared to taunt me, and to remind me mockingly of the cause of my being detained a prisoner within them. All these wicked thoughts have left me, and I feel ashamed of myself for having ever entertained them. I am now at peace and happiness with all men; and do not envy any one the smallest particle of his gold or treasures that may be locked up in the rich safe below. What is the cause of this joyful change? Is it the influence of the good dinner? Is it to be attributed to the kindness shown me by the housekeeper? or is it the result of my own thoughts as I kept looking into the fire (which may have purified them), slowly watching the roasting of my chesnuts? Never mind what is the secret of this mental metamorphosis. I feel so happy I could take my greatest enemy by the hand, and dance with him round the room.

Half-past Nine o'Clock.—A band of music has struck up in the street. It is playing a polka. Oh, how I could dance if I only had a partner. Ah! here's the housekeeper!

Quarter-to Ten.—Ha, ha the poor old woman is so exhausted she cannot go round any more. She has retired "to put herself to rights;" for, to speak the truth, I fell (at least she said it was *I*) over one of the desks, and there she lay on the ground, laughing to that extent, that I thought she would never be able to get up again. I laughed also, as I thought that we had been dancing, where dancing, probably, had never taken place before, and I wondered if it could be construed into desecration of the Shrine of Mammon? I don't care much if it is!

Five Minutes to Ten.—My partner has returned. Whilst waiting for the music to break out again, she helps me on with my great coat. I don't know how sufficiently to thank her for her kindness, and I offer her the sovereign. She smacks my face, calls me a stupid fellow, and asks me what I mean; she then folds the comforter round my neck, and makes me drink another tumbler of hot punch. I shall be tipsy if I go on at this rate.—Hark! there's a knock at the door. "Who's there?" "All right; the watchman."

My Christmas imprisonment is at an end, and, strange to say, I feel loth to leave the scene of it. I open my prison door, and, if I can believe my eyes after drinking so much punch, there's my wife. "Bless you Peggy, dear, for thinking of coming to fetch me home. Have I spent a merry Christmas? Yes, dear, much happier than I could have expected; it only wanted you and the little ones by my side to have made me perfectly happy."

On our way home I told my wife of the black envious thoughts that had hung everything in the morning with black, and how bright all things seemed now; and our hearts returned thanks to those kind souls who, out of their small means, share their comforts with others who have not the means of procuring them, to make them happy on Christmas-day.

Horace Mayhew.

CHRISTMAS SUPPLEMENT TO THE ILLUSTRATED LONDON NEWS

No. 600.—Vol. XXI.—December 25, 1852.

Two Numbers, One Shilling.

CHRISTMAS MORALITIES
FOR 1852.

There are stated periods in the year which the whole community regards with traditional respect or religious veneration. The anniversaries of memorable events—the days on which illustrious men were born, or useful institutions founded—are consecrated in the national memory. Such retrospective associations inspire a people with hopefulness, strengthen their moral feelings, call forth their gratitude, and fortify their resolutions. They teach us to admire our ancestors for the difficulties they surmounted and the triumphs they achieved, of which we are reaping the fruits; and impress upon us the duty of emulating their example, and enriching the inheritance that we have to bequeath to posterity. In such remembrances we connect the present with the past—seize the initial point from which great improvements in science and art have started, and trace through the obstructions of ignorance and the resistances of prejudice the advancing movements of social progress. We recognise the power of individuals to elevate the human race and to stamp the impress of their genius not only on their contemporaries, but on future generations; and the fact conveys a lesson of responsibility from which none can be permitted to plead exemption. The invention of printing has made thought, with its results, a continuity, and civilisation is matured as the stores of wisdom are transmitted and accumulated.

This season of the year is distinguished from all others by the solemnity of the mission with which it is associated. If the works and deeds of men, their discoveries or their personal sacrifices, as these affect our temporal welfare, demand a grateful commemoration; our hopes and aspirations, our feelings and emotions, are warmed with holier fervour, and sublimed into a purer and loftier elevation when we meditate on the spiritual blessings with which the festival of Christmas is connected. It is a season for the forgiveness of injuries, the pardon of enemies. We are called upon to cast away the pride of birth and riches, and to remember the lowly and the poor. The pursuit of wealth is to be suspended for its distribution, and in dispensing charity we are reminded that we are no more than trustees of our worldly possessions. "The earth is the Lord's and the fulness thereof."

We are not about to usurp the functions of the pulpit, and deliver a sermon, but the opportunity is not inappropriate to connect some of the laws of social and industrial progress with higher considerations than the speculations of political economists, and the theories of statesmanship. Barbarism and despotism have both this in common—that they regard the law of the strongest as the law of nature; and, on this rude maxim, both practically act, till moral power conquers physical force. This is a great epoch in the history of progress, for it announces the downfal of slavery and feudalism, but not the extermination of privilege and exclusiveness. These spring from the ruins of what has been destroyed; but, if their aspect be blander or less openly repulsive, their influence is scarcely less fatal to the progress of humanity. We only give half a definition of real civilisation, when we describe it as the conquest of the external world; the other half is the conquest of individual selfishness, which is the special mission of Christianity; and, if this be true, all legislation must fail till it is based on Christian principles. It is consolatory to know that so far at least as the production of material objects is concerned, the tendency of public opinion is flowing with a strong current in this really religious direction.

On the present occasion we desire to avoid political, and confine ourselves to social, views. That all our material wealth is derived from the three kingdoms of nature, is a truth universally acknowledged; but, at this season of the year, we should remember who is the donor of that wealth. It is not man who gave fertility to the earth—who implanted the law of obedience in those animals which are our domestic servants—who appointed the ebb and flow of the tides, and gave its peculiar properties to the magnet. It is not man who fashioned in such diverse forms the foot of the horse, the ox, and the camel—each variety in the structure being a special adaptation to the uses which the animal has to subserve. It is not man who deposited the metals and minerals in the mines, or secured them against waste and injury till they could promote the happiness of our race—which could scarcely have emerged from barbarism without the gifts of coal and iron. It was not man who imparted lateral and longitudinal strength to the oak, or infused the constituents of cordage into hemp, or those of sailcloth into flax; nor was it man who ordained the trade-winds, or indented the coasts with natural harbours of refuge. In the midst, then, of the material civilisation by which we are surrounded, let us not forget who gave us the external world, and its countless treasures for our conquest. Let us with reverential gratitude hear constantly and deeply in our hearts and minds how ample is the provision made for the whole human family, and that it was made prospectively, even from the beginning, before man was placed on the earth.

Such reflections should influence our conduc

CHRISTMAS CEREMONY IN EXETER CATHEDRAL.—(SEE NEXT PAGE.)

towards each other as members of society, sprung from one common origin, reserved ultimately for one common destination—the destination of being accountable for our actions; for "after death comes the judgment." Political economy may aid us in the more easy conquest of the external world; but it is Christianity alone that can teach us how its fruits may be most equitably distributed, by destroying selfishness and inculcating generosity and disinterestedness. We are apt, indeed, to overlook its influence as a civilising agent, though it has effected a moral revolution wherever its teachings have penetrated. To be convinced of this truth, we have only to compare the social spirit of antiquity with that of the modern world. Surely there is more of brotherhood amongst us than in the palmiest days of Greece and Rome. Our hospitals, our asylums, our schools for friendless children, our retreats for old age, attest the purifying and ennobling character of Christianity. The mildness of our criminal code, the abandonment of brutal sports, the efforts constantly made to facilitate the administration of justice, also testify to its social influence. What laudable efforts are we not daily witnessing to improve the dwellings of poverty, to destroy drunkenness, to point out the advantages of cleanliness and ventilation! Who can estimate the benefits derived from Mechanics' Institutes, local libraries, lectures educating the mind and the feelings? A short-sighted or ungrateful philosophy is too prone to attribute these social ameliorations to mere unaided human means, which are included in the compendious term civilisation; but if our civilisation be superior to that of antiquity, let us not forget that it arises from Christian influences, which have purified the heart, softened the temper, elevated thought, and made art and science not the exclusive servants of a privileged class, but the instruments of ennobling our common humanity.

In the ancient world, slavery was an institution sanctioned by philosophers, legists, and statesmen. In the middle ages this hateful system declined, through the influence of the Christian priesthood, for it is known that they constantly refused the last rites of the church to the dying till they had given freedom to their slaves. England is now free from this atrocious guilt, and her example has taught a moral lesson to the world which will terminate in universal emancipation. But it is not enough that slavery should cease, it is essential that the dignity of labour should be recognised. We attach glory and honour to the profession of arms, and crown the soldier and sailor with laurel; but, if they who defend our country against the horrors attendant on war deserve our gratitude and applause, have we no praise or thankfulness to bestow on the ingenious mechanic and skilful artisan who produce our wealth, and create that civilisation which is the boast of our age? Surely Christianity teaches no such narrow and heartless lesson. Labour is the destiny of the millions, but in labour there is nothing degrading; it is idleness rather that dishonours. The Great Exhibition had a nobler object in view than merely to teach the processes of industry in connection with the plough, the anvil, and the loom; it sought also to direct the minds of the working classes to study the laws of the material, mental, and moral universe, to form a more enlarged estimate of human capabilities; and, by the improvement of taste, to encourage the good and restrain the evil impulses of our nature. The Crystal Palace now erecting is designed to be a permanent temple, or school of high intelligence, so as to render labour self-respecting and dignified. Hitherto honour has been paid to the poet, the sculptor, the painter, the musician—these professions being regarded as the aristocracy of the arts; but why exclude the manufacturer of a steam-engine, the ingenious weaver, the naval architect, the worker in metals, or any one of those varied classes who confer grandeur on empires and shed lustre on civilisation? The labourer is not merely "worthy of his hire," he is worthy of the esteem and admiration of his fellow-citizens; and, as prejudice dies away, he will occupy the station to which he is entitled. There is no surer test of social progress than a national recognition of the claims of industry.

It is gratifying to observe that the old political heresy, which regarded foreigners as "natural enemies," has partially disappeared, and is becoming no more than a mere tradition of ancient intolerance. The nations of the earth are now brought into brotherly intercourse. Intervening mountains and rivers and seas are treated but as geographical boundaries, not as the frontiers of hostile races. It is the desire of gain first prompted to international commerce, Christianity, following in its train, conquered prejudices, removed distrust, conciliated prejudices, and linked traders in friendly co-operation. The Gospel was to be preached to all nations, that its influence might unite together the scattered members of the human family, by the sanction of a common bond, by the upraising of a standard to which all could make a common appeal. Thus was the savage tamed, and the aboriginal brought into fearless contact with the stranger. It is one of the glories of our epoch to have conquered many of the resistances which formerly impeded the brotherhood of nations. Commercial liberty is the best guarantee of peace; under its auspices nations become families, having identical interests. We are all beginning to learn that there is more glory in feeding and clothing our fellow-creatures than in stripping their dead bodies on a field of battle. Public opinion has already branded duelling with ignominy, though it once was the most honoured of fashionable vices; and that same opinion, deepened and widely-spread through Christian influences, will, in the fulness of time, convince the world that war is a curse, a crime, and an infamy. Ocean navigation by steam—submarine telegraphs—the rapidity of personal intercourse—the multiplicity of transactions—all are strengthening and lengthening the chain which binds society together, and the rupture of a single link would be felt to the extremities of the earth. Statesmanship has been taught that every hand is a producer, and every mouth a consumer; that industry is the true vocation of our race—the supply of mutual wants our interest and our duty; and that civilisation can only advance from conquest to conquest under the sheltering ægis of peace.

We commence a new year under hopeful auspices. A Sovereign universally beloved graces the throne; her bright example, as a daughter, a mother, and a wife, hallows the domestic virtues in every home. The laws are administered by Judges of unquestioned integrity. The national revenue exhibits a surplus over expenditure; and we may calculate on a progressive reduction of taxes. Pauperism is largely on the decline. New mines of wealth and enterprise are opened to us in every part of the world. Our colonies are recovering from recent depression. The war in Kaffirland is fast drawing to a termination, and the sword in India will soon be returned to the scabbard. With all foreign powers our relations are friendly. Our people are fully employed; their wages are remunerating, their provisions are abundant. We have reason to be grateful for the blessings we enjoy; and, in celebrating the anniversary of the commencement of the Christian era, let us reflect how much we are indebted to Christian teaching for the advances we have made in social well-being; and the lesson that such reflections will impress on our minds will prompt us to acknowledge that the development of civilisation must be preceded by a yet deeper diffusion of the truths of Christianity.

CHRISTMAS MORNING IN EXETER CATHEDRAL.

THE custom of welcoming this season of holy joy with "psalms and hymns, and spiritual songs," lingers in the cathedral city of Exeter, where, during Christmas-eve, the parish choirs perambulate the streets singing anthems, with instrumental accompaniments. The singing is protracted through the night, when the celebration often assumes a more secular character than is strictly in accordance with the festival. A more solemn decoration is, however, at hand.

At a quarter past [illegible] the cathedral bells ring out a merry chime, and the [illegible] of persons in the nave [illegible] by the [illegible] there are the [illegible] of the [illegible] well-washed faces and sleepy eyes; but a large number are early risers, who have left their beds for better purpose than a revel. There is a great muster of the choir, and the fine Old Hundredth Psalm is sung from the gallery to a full organ, whose billows of sound roll through the vaulted edifice. The scene is strikingly picturesque: all is dim and shadowy; the red light from the flaring candles falling upon up-turned faces, and here and there falling upon a piece of grave sculpture, whilst the grey light of day begins to stream through the antique windows, adding to the solemnity of the scene. As the last verse of the Psalm peals forth, the crowd begins to move, and the spacious cathedral is soon left to the more devout few who remain to attend the morning service in the Lady-chapel.

THE UNPARDONABLE SIN.

BY NATHANIEL HAWTHORNE.

BARTRAM, the lime-burner, a rough, heavy looking man, he grimed with charcoal, sat watching his kiln, at nightfall, while his little son played at building houses with the scattered fragments of marble, when, on the hill-side below them, they heard a roar of laughter, not mirthful, but slow, and even solemn, like a wind shaking the boughs of the forest.

"Father, what is that?" asked the little boy, leaving his play, and pressing betwixt his father's knees.

"Only some reveller, I suppose," answered the lime-burner; some merry fellow from the bar-room in the village, who dared not laugh loud enough within doors lest he should blow the roof of his house off. So here he is, shaking his jolly sides at the foot of Graylock."

"But, father," said the child, more sensitive than the obtuse, middle-aged clown, "he does not laugh like a man that is glad; so the noise frightens me!"

"Don't be a fool, child!" cried his father, gruffly; "you will never make a man, I do believe; there is too much of your mother in you. I have known the rustling of a leaf startle her. Hark, here comes that merry fellow now. You shall see that there is no harm in him."

Bartram and his little son, while they were talking thus, sat watching the lime-kiln. It was a rude, round, tower-like structure, about twenty feet high, heavily built of rough stones, and with a hillock of earth heaped about the larger part of its circumference, so that the blocks and fragments of marble might be drawn by cartloads and thrown in at the top. There was an opening at the bottom of the tower, like an oven-mouth, but large enough to admit a man in a stooping posture, and provided with a massive iron door. With the smoke and jets of flame issuing from the chinks and crevices of this door, which seemed to give admittance into the hill-side, it resembled nothing so much as the private entrance to the infernal regions, which the shepherds of the Delectable Mountains were accustomed to show to pilgrim

There are many such lime kilns in that tract of country, for the purpose of burning the white marble which composes a large part of the substance of the hills. Some of them, built years ago, and long deserted, with weeds growing in the vacant round of the interior, which is open to the sky, and grass and wild-flowers rooting themselves into the chinks of the stones, look already like relics of antiquity, and may yet be overspread with the lichens of centuries to come. Others, where the lime-burner still feeds his daily and nightlong fire, afford points of interest to the wanderer among the hills, who seats himself on a log of wood or a fragment of marble, to hold a chat with the solitary man. It is a lonesome, and, when the character is inclined to thought, may be an intensely thoughtful occupation, as it proved in the case of Ethan Brand, who had come to strange purpose, in days gone by, while the fire in this very kiln was burning.

The man who now watched the fire was of a different order, and troubled himself with no thoughts save the very few that were requisite to his business. At frequent intervals he flung back the clashing weight of the iron door, and, turning his face from the insufferable glare, thrust in huge logs of oak, or stirred the immense brands with a long pole. Within the furnace were seen the curling and riotous flames, and the burning marble, almost molten with the intensity of the heat, while without, the reflection of the fire quivered on the dark pathway of the surrounding forest, and showed in the foreground a bright and ruddy little picture of the hut, the spring beside its door, the athletic and coal-begrimed figure of the lime burner, and the half-frightened child, sometimes shrinking into the protection of his father's shadow. And when [illegible] was done, [illegible] the [illegible] of the hill-side, which was [illegible] to [illegible] shapes of the neighbouring mountains; and, in the upper sky, there was a flitting congregation of clouds, still faintly tinged with the rosy sunset, though thus far down into the valley the sunshine had vanished long and long ago.

The little boy now crept still closer to his father, as footsteps were heard ascending the hill-side, and a human form thrust aside the bushes that clustered beneath the trees.

"Hollo! who is it?" cried the lime-burner, vexed at his son's timidity, yet half infected by it. "Come forward and show yourself like a man, or I'll fling this chunk of marble at your head!"

"You offer me a rough welcome," said a gloomy voice, as the unknown man drew nigh; "yet I neither claim nor desire a kinder one, even at my own fireside."

To obtain a distincter view, Bartram threw open the iron door of the kiln, whence immediately issued a gush of fierce light that smote full upon the stranger's face and figure. To a careless eye there appeared nothing very remarkable in his aspect, which was that of a man in a coarse, brown, country-made suit of clothes, and shoes, with the staff and heavy shoes of a wayfarer. As he advanced, he fixed his eyes—which were very bright—intently upon the brightness of the furnace, as if he beheld, or expected to behold, some object worthy of note within it.

"Good evening, stranger," said the lime-burner; "whence come you so late in the day?"

"I come from my search," answered the wayfarer, "for, at last, it is finished."

"Drunk, or crazy!" muttered Bartram to himself. "I shall have trouble with the fellow. The sooner I drive him away the better."

The little boy, all in a tremble, whispered to his father, and begged him to shut the door of the kiln, so that there might not be so much light, for that there was something in the man's face which he was afraid to look at, yet could not look away from. And, indeed, even the lime-burner's dull and torpid sense began to be impressed by an indescribable something in that thin, rugged, thoughtful visage, with the grizzled hair hanging wildly about it, and those deeply-sunken eyes, which gleamed like fires within the entrance of a mighty cavern. But, as he closed his door, the stranger turned towards him, and spoke in a quiet, familiar way, that made Bartram feel as if he were a sane and sensible man after all.

"Your task draws to an end, I see," said he. "This marble has already been burning three days. A few hours more will convert the whole to lime."

"Why, who are you?" exclaimed the lime-burner. "You seem as well acquainted with my business as I am myself."

"And well I may be," said the stranger; "for I followed the same craft many a long year, and here, too, on this very spot. But you are a new comer in these parts. Did you ever hear of Ethan Brand?"

"The man that went in search of the Unpardonable Sin?" asked Bartram, with a laugh.

"The same," answered the stranger. "He has found what he sought, and therefore he comes back again."

"What! then you are Ethan Brand himself?" cried the lime-burner, in amazement. "I am a new comer here, as you say, and they call it eighteen years since you left the foot of Graylock. But, I can tell you, the good folks still talk about Ethan Brand in the village under, and what a strange errand took him away from his lime kiln. Well, and so you have found the Unpardonable Sin?"

"Even so!" said the stranger, calmly.

"If the question is a fair one," proceeded Bartram, "Where might it be?"

Ethan Brand laid his finger on his own heart.

"Here!" replied he.

And then, without mirth in his countenance, but as if moved by an involuntary recognition of the infinite absurdity of seeking throughout the world for what was the closest of all things to himself, and looking into every heart, save his own, for what was hidden in no other breast, he broke into a laugh of scorn. It was the same slow heavy laugh that had almost appalled the lime-burner when it heralded the wayfarer's approach.

The solitary mountain-side was made dismal by it. Laughter, when out of place, mistimed, or bursting forth from a disordered state of feeling, may be the most terrible modulation of the human voice. The laughter of one asleep, even if it be a little child; the madman's laugh; or the wild screaming laugh of an idiot, are sounds that we sometimes tremble to hear, and would always willingly forget. Poets have imagined no utterance of fiends or hobgoblins so fearfully appropriate as a laugh. And even the obtuse lime-burner felt his nerves shaken as that strange man looked inward, at his own heart, and burst into laughter that rolled away into the night, and was distinctly reverberated among the hills.

"Joe," said he to his little son, "scamper down to the tavern in the village, and tell the jolly fellows there that Ethan Brand has come back, and that he has found the Unpardonable Sin!"

The boy darted away on his errand, to which Ethan Brand made no objection, nor seemed hardly to notice it. He sat on a log of wood, looking steadfastly at the iron door of the kiln. When the child was out of sight, and his swift and light footsteps ceased to be heard treading first on the fallen leaves, and then on the rocky mountain path, the lime-burner began to regret his departure. He felt that the little fellow's presence had been a barrier between his guest and himself, and that he must now deal, heart to heart, with a man who, on his own confession, had committed the one only crime for which heaven could afford no mercy. That crime, in its hardened blackness, seemed to overshadow him. The lime-burner's own sins rose up within him, and made his memory riotous with a throng of evil shapes that asserted their kindred with the master sin, whatever it might be, which it was within the scope of man's corrupted nature to conceive and cherish. They were all of one family; they went to and fro between his breast and Ethan Brand's, and carried dark greetings from one to the other.

Then Bartram remembered the stories which had grown traditionary in reference to this strange man, who had come upon him like a shadow of the night, and was making himself at home in his old place, after so long absence, that the dead people, dead and buried for years, would have had more right to be at home, in any familiar spot, than he. Ethan Brand, it was said, had conversed with Satan himself in the lurid blaze of this very kiln. The legend had been matter of mirth heretofore, but looked grisly now. According to this tale, before Ethan Brand departed on his search he had been accustomed to evoke a fiend from the hot furnace of the lime-kiln, night after night, in order to confer with him about the Unpardonable Sin; the confession of the fiend, each labouring to frame the image of some mode of guilt which could neither be committed nor forgiven. And, with the first gleam of light upon the mountain top, the fiend crept in at the iron door, there to abide the intensest element of fire, until again summoned forth to share in the dreadful task of extending man's possible guilt beyond the scope of Heaven's infinite mercy.

While the lime-burner was struggling with the horror of these thoughts, Ethan Brand rose from the log, and flung open the door of the kiln. The action was in such accordance with the idea in Bartram's mind, that he almost expected to see the evil one issue forth, red-hot from the raging furnace.

"Hold, hold!" cried he, with a tumultuous attempt to laugh, for he was ashamed of his fears, although they overmastered him. "Don't for mercy's sake, bring out your devil now!"

"Man!" sternly replied Ethan Brand, "what need have I of the devil? He has left him far behind me on my track. It is with such halfway sinners as you that he busies himself. Fear not because I open the door. I do but act by old custom, and am going to trim your fire like a lime-burner as I was once."

He threw open the vast cook, thrust in more wood, and bent forward to gaze into the hollow prison-house of the fire, regardless of the fierce glow that reddened upon his face. The lime-burner sat watching him, and half-suspected his strange guest of a purpose, if not to evoke a fiend, at least to plunge bodily into the flames, and thus vanish from the sight of man. Ethan Brand, however, drew quietly back, and closed the door of the kiln.

"I have looked," said he, into many a human heart that was seven times hotter with sinful passions than your furnace is with fire. But I found not there what I sought. No, not the Unpardonable Sin!"

"What is the Unpardonable Sin?" asked the lime burner; and then he shrank further from his companion, trembling lest his question should be answered.

"It is a sin that grew within my own breast," replied Ethan Brand, standing erect, with a pride that distinguishes all enthusiasts of his stamp. "A sin that grew nowhere else! The sin of an intellect that triumphed over the voice of brotherhood with man and reverence for God, and scorned everything to its own mighty claims! The only sin that deserves a recompense of immortal agony! Freely, were it to do again, would I incur the guilt. Unshrinkingly I accept the retribution!"

"The man's head is turned," muttered the lime-burner to himself. "He may be a sinner like the rest of us, nothing more likely, but I'll be sworn he's a madman too."

Nevertheless, he felt very uncomfortable at his situation, alone with Ethan Brand on the wild mountain side; and was right glad to hear the rough murmur of tongues, and the footsteps of what seemed a pretty numerous party stumbling over the stones and rustling through the undergrowth. Soon appeared the whole lazy regiment that was wont to lounge, at nightfall, in the bar-room, and was still puffing what seemed to be the same cigar that he had lighted twenty years before. He had great fame as a dry joker, though, perhaps, less on account of any intrinsic humour, than from a certain flavour of brandy-toddy and tobacco-smoke which impregnated all his ideas and expressions, as well as his person.

Another well-remembered, though strangely-altered face, was that of Lawyer Giles, as people still called him in courtesy—an elderly ragamuffin, in his soiled shirt-sleeves and tow-cloth trousers. This poor fellow had been attorney in what he called his better days—a sharp practitioner, and in great vogue among the village litigants; but flip, and slug, and toddy, and cocktails, imbibed at all hours—morning, noon, and night—had caused him to slide from intellectual to various kinds and degrees of bodily labour, till at last, to adopt his own phrase, he slid into a soap-vat. In other words, Giles was now a soap-boiler in a small way. He had come to be but the fragment of a human being—a part of one foot having been chopped off by an axe, and an entire hand torn away by the devilish grip of a steam engine. Yet, though the corporeal hand was gone, a spiritual member remained; for, stretching forth the stump, Giles steadfastly averred that he felt an invisible thumb and fingers with as vivid a sensation as before the real ones were amputated. A maimed and miserable wretch he was; but one, nevertheless, whom the world could not trample, and had no right to scorn, either in this or any pre-

ss stage of his m ort nes, since he had still kept up the courage spirit of a man, a nothing in charity, and, with his one hand— that the left one—ought a stern battle against want and hostile umstances.

mong the throng, too, came another personage, who, with certain nts of similarity to Lawyer Giles, had many more of difference. It s the village doctor, a man of some fifty years, whom, at an earlier iod of his life, we should have introduced as paying a professional t to Ethan Brand during the latter's supposed insanity. He was e purple-visaged, rude, and brutal, yet half-gentlemanly figure, h something wild, ruined, and desperate in his talk, and in all the nals of his gesture and manners. Brandy possessed this man like an spirit, and made him as surly and savage as a wild beast, and as erable as a lost soul; but there was supposed to be in him such wonful skill, such native gifts of healing, beyond any which medical nce could impart, that society caught hold of him, and would not him sink out of its reach. So, swaying to and fro upon his horse, grumbling thick accents at the bedside, he visited all the sick mbers for miles about among the mountain towns, and sometimes ed a dying man, as it were, by miracle or quite as often, no doubt, his patient to the grave that was dug many a year too soon. The tor had an everlasting pipe in his mouth; and, as somebody said, allusion to his habit of swearing, it was always alight with hell-fire. These three worthies pressed forward, and greeted Ethan Brand h after his own fashion, earnestly inviting him to partake of the nts of a certain black bottle, in which, as they averred, he would d something far better worth seeking for than the Unpardonable . No mind which has wrought itself by intense and solitary ditation into a high state of enthusiasm can endure the kind of ntact with low and vulgar modes of thought and feeling to which han Brand was now subjected. It made him doubt—and, strange ay, it was a painful doubt—whether he had indeed found the Unrdonable Sin. And found it within himself. The whole question on ich he had exhausted life, and more than life, looked like a delusion. "Leave me," he said, bitterly, "ye brute beasts, that have made threselves so, shrivelling up your souls with fiery liquors! I have done th you. Years and years ago I groped into your hearts, and found thing there for my purpose. Get ye gone!"

"Why, you uncivil scoundrel," cried the fierce doctor, "is that the y you respond to the kindness of your best friends? Then let me l you the truth. You have no more found the Unpardonable Sin an yonder boy Joe has. You are but a crazy fellow. I told you so enty years ago: neither better nor worse than a crazy fellow, and e companion of old Dumphrey, here."

His political to an old man, shabbily dressed, with long white hair, h visage, and unsteady eyes. For some years past this aged person d been wandering about among the hills, inquiring of all travellers om he met for his daughter. The girl, it seemed, had gone off th a company of circus performers, and occasionally tidings of her me to the village, and fine stories were told of her glittering appear ce as she rode on horseback in the ring, or performed marvellous ats on the tight rope.

The white-haired father now approached Ethan Brand, and gazed ntently into his face.

"They tell me you have been all over the earth," said he, wringing s hands with earnestness. "You must have seen my daughter, for e makes a grand figure in the world, and everybody goes to see her. id she send any word to her old father, or say when she was coming ck?"

Ethan Brand's eye quailed beneath the old man's. That daughter, om whom he so earnestly desired a word or greeting, Ethan Brand d made the subject of a psychological experiment, and wasted, abrbed, and perhaps annihilated her soul in the process.

"Yes," murmured he, turning away from the heavy wanderer; "it is delusion. There is an Unpardonable Sin!"

While these things were passing, a merry scene was going forward the area of cheerful light, beside the spring, and before the door the hut.

A number of the youth of the village, young men and girls, had urried up the hill side, impelled by curiosity, to see Ethan Brand, is hero of no mean a legend familiar to their childhood. Finding noing, however, very remarkable in his aspect—nothing but a sunburnt rver, in plain garb and dusty shoes, who sat looking into the fire, if he fancied pictures among the coals, these young people speedily rew tired of observing him. As it happened there was other amusent at hand. An old German Jew, travelling with a diorama on his ack, was passing down the mountain road towards the village just as e party turned aside from it; and, in hopes of thing out the profits f the day, the showman had kept them company to the lime-kiln.

"Come, old Dutchman," cried one of the young men, "let us see our pictures, if you can swear they are worth a shilling of it!"

"Yes," answered the Jew—whether as a matter of thrifty or craft, he styled everybody captain—"I shall show you, ntleman, some very superb pictures!"

So, placing the box in a proper position, he invited the young men d girls to look through the glass orifices of the machine, and proised to exhibit a series of the most outrageous scratchings and daubs, as specimens of the fine arts, that ever an itinerant showman had his face to impose upon his circle of spectators. The pictures were worn out, moreover—tattered, full of cracks and wrinkles, dingy with tobacco-oke, and otherwise in a most pitiable condition. Some purported to ve been taken from the battle-fields of Europe; others represented Napoleon's battles, and Nelson's sea-fights; and in the midst of ese might be seen a gigantic, brown, hairy hand, which might have en mistaken for the hand of Destiny, though in truth it was only the howman's, pointing his forefinger to various scenes of the conflict, m also to other gave historical illustrations. When with much merriment at its abominable deficiency of merit, the exhibition was oncluded, the German bade little Joe put his head into the box. Viewed through the magnifying glasses, the boy's round, rosy visage, ramed the strangest imaginable aspect of an immense Transcendental, the mouth grinning broadly, and the eyes and every other eature overflowing with fun at the joke. Suddenly, however, that merry face turned pale, and its expression turned to horror, for this easily-impressed mind actually believed that he could discern in Ethan Brand who was fixed upon him through the glass

"You make the little man to be afraid, captain," said the German Jew, turning up the dark and strong outline of his visage, from his stooping posture. "But look again, and, by char es, I shall cause you o see something that is very fine, upon my word!"

Ethan Brand gazed into the box for an instant, and then starting back, looked fixedly at the German. What had he seen? Nothing, pparently; for a curious youth, who had peeped in almost at the same oment, beheld only a vacant space of canvas.

"I remember you now," muttered Ethan Brand to the showman.

"Ah, captain," whispered the Jew of Nuremburg, with a dark mile; "I find it to be a heavy matter in my show-box—this Unpardonable Sin! By my faith, captain, it has wearied my shoulders this day to carry it over the mountain."

"Peace!" answered Ethan Brand, sternly, "or get thee into the furnace yonder."

The Jew's exhibition had scarcely concluded, when a great elderly dog—who seemed to be his own master, as no person in the company laid claim to him—saw fit to render himself the object of public notice. Since he had shown himself as a very quiet, well-disposed old dog, going round from one to another, and, by way of being sociable, offering his rough head to be patted by any kindly hand that would take so much trouble. But now, all of a sudden, this grave and venerable ast underwent a most unaccountable change, and without the slightest suggestion from anybody else, began to run round after his tail, which, to heighten the absurdity of the proceeding, was a great deal shorter than it should have been. Never was seen such heading eagerness in pursuit of an object that could not possibly be attained; never was heard such a tremendous outcreak of growling, snarling, barking, and snapping, as if one end of the ridiculous brute's body were at deadly and most unforgiveable enmity with the other. Faster and faster round about went the cur, and faster and still faster fled the unapproachable brevity of his tail, and louder and fiercer grew his yells of rage and animosity, until, utterly exhausted, and as far from the goal as ever, the foolish old dog ceased his performance as suddenly as he had begun it. The next moment he was as quiet, mild, sensible, and respectable in his deportment as when he first scraped acquaintance with the company.

As may be supposed, the exhibition was greeted with universal laughter, clapping of hands, and shouts of "Encore!" to which the canine performer responded by wagging all that there was to wag of his tail, but appeared totally unable to repeat his very successful effort to amuse the spectators.

Meanwhile, Ethan Brand had resumed his seat upon the log, and moved, it might be, by a perception of some remote analogy between his own case and that of this self-pursuing cur, he broke into the awful laugh, which, more than any other token, expressed the condition of his inward being. From that moment, the merriment of the party was at an end; they stood aghast, dreading, inexplicable sound should be reverberated around the horizon, and that mountain would thunder it to mountain, and so the horror be prolonged upon their ears. Then, whispering one to another that it was late; that the moon was almost down; that the August night was growing chill, as they might with their unwelcome guest. Save for these three human beings the open space on the hill-side was a solitude, set in a vast gloom of forest. Beyond that darksome verge, the fire-light glimmered on the stately trunks and almost black foliage of pines, intermixed with the lighter verdure of sapling oaks, maples, and poplars, while here and there lay the gigantic corpses of trees, decaying on the leaf-strewn soil. And it seemed to little Joe—a timorous and imaginative child—that the silent forest was holding its breath, until some fearful thing should happen.

Ethan Brand thrust more wood into the fire, and closed the door of the kiln; then looking over his shoulder at the lime-burner and his son, he bade, rather than advised, them to retire to rest.

"For myself I cannot sleep," said he. "I have matters that it concerns me to meditate upon. I will watch the fire, as I used to do in the old time."

"And call the devil out of the furnace to keep you company, I suppose," muttered Bartram, who had been making intimate acquaintance with the black bottle above-mentioned. "But watch if you like, and call as many devils as you like! For my part, I shall be all the better for a snooze. Come, Joe!"

As the boy followed his father into the hut, he looked back at the wayfarer, and the tears came into his eyes, for his tender spirit had an intuition of the bleak and terrible loneliness in which this man had caverned himself.

When they were gone, Ethan Brand sat listening to the crackling of the kindled wood, and looking at the little spirits of fire that issued through the chinks of the door. These trifles, however, once so familiar, had but the slightest hold of his attention, while deep within his mind was reviewing the gradual but marvellous change that had been wrought upon him by the search to which he had devoted himself. He remembered how the night dew had fallen upon him; how the dark forest had whispered to him; how the stars had gleamed upon him, a simple and a loving man, watching his fire in the years gone by, and even musing as it burned. He remembered with what tenderness, with what love and sympathy for mankind, and what pity for human guilt and woe, he had first begun to contemplate those ideas which afterwards became the inspiration of his life; with what reverence he had then looked into the heart of man, seeing it as a temple originally divine, and, however desecrated, still to be held sacred by a brother; with what awful fear he had deprecated the success of his pursuit, and prayed that the Unpardonable Sin might never be revealed to him. Then ensued that vast intellectual development, which, in its progress, disturbed the counterpoise between his mind and heart. The idea that possessed his life had operated as a means of education; it had gone on cultivating his powers to the highest point of which they were susceptible; it had raised him from the level of unlettered labourer to stand on a star-high eminence, whither the philosophers of the earth, laden with the lore of universities, might vainly strive to clamber after him. So much for the intellect! But where was the heart? That, indeed, had withered, had contracted, had hardened, had perished! It had ceased to partake of the universal throb. He had lost his hold of the magnetic chain of humanity. He was no longer a brother man, opening the chambers or the dungeons of our common nature by the key of holy sympathy, which gave him a right to share in all its secrets; he was now a cold observer, looking on mankind as the subject of his experiment, and, at length conveting mankind as tools and victims to be his purpose, and pulling the wires that moved them to such degrees of crime as were demanded for his study.

Thus Ethan Brand became a fiend. He began to be so from the moment that his moral nature had ceased to keep the pace of improvement with his intellect. And now, as his highest effort, and the only one adequate to his full development, he had made himself the high priest of the direst offence that can pollute the human heart. The sacrifice was accomplished. He had thrown away all the rich wealth of his spirit, and gained—what? Knowledge, indeed, but knowledge that was hateful to him, and which he would have trampled into dust and cast behind him, could he have found any other mode of being happy! But, as it was, he had become a scientific machine, and, in the process of manufacture, had converted his moral being into a heap of ashes!

Such was the sad history of the lime-burner's former life, and the present condition to which he had been brought by pursuing that one idea in which human sympathy had perished. Ethan Brand had contemplated it in all its bearings, and he knew it well. But, even now, he had not reached the profoundest depth of his misery and crime. Not yet had he quite exhausted the intellectual food, which, once digested, would satisfy the immortal appetite that craves for infinity. He had shut himself from the sympathy of the world, and now found that the secret of happiness must be sought in the heart of man.

While he sat musing, the fire had crept inward from the mouth of the kiln, and the immense mass of limestone that filled the upper portion of the interior was now heated to a white glow. Intense as was the heat, and unendurable by human frame, it could not wither the human heart that was beating in his own breast, and was awaiting its doom. He thought of his native village, and of the spring where he had drunk, and the brook where he had fished, when a boy, and his mother's cottage, and her face looking from the door, and his father's decline into the mouldering tomb. He thought of the strange vicissitudes of his life, and how, from being the simple child of the hills, he had become a wanderer, a restless seeker after knowledge, a potent magician, and a miserable fiend. He thought of the coldness and scorn that had chilled his heart, and of the wrongs that had driven him forth, and of the love that had never been offered him, and which he had never found in his own heart to bestow. And he thought of the preliminary step that had cost him so little, when the germ of evil was implanted in his nature, and which had now grown to such a fearful height.

Ethan Brand had mused as long as he desired, or as was allowed him, when he drew open the door of the kiln, and, thrusting in a torch of wood, surveyed the white-hot mass of lime-stone. It was ready to be drawn forth, and burned into quicklime. Throughout the limekiln country, the lime-burners knew when the stone was fit for burning, by the quality of the flame that issued from the chinks of the kiln. Ethan Brand knew it well, and he knew, moreover, that the lime-burner and his son, who had charge of the kiln, were waiting for the consummation of his task, and would kindle no other fire. But he lingered yet a little longer, enjoying the moment as a miser enjoys the counting of his gold, or a proud man the knowledge of his power, or a poet the intoxication of his song. Then, with a long pole, he thrust down the blazing mass of wood, and, as it fell, sent a shower of sparks into the air, and illuminated the whole cavern of the kiln. Now was the moment! Fuel, fire, and lime-stone were in accordance, and the process had begun.

Ethan Brand closed the door, and, carefully stopping every crevice through which the smoke might escape, applied a torch to the pile of faggots and logs that had been heaped against the entrance of the kiln. Immediately, with a tremendous roar, the whole mass of wood was in a blaze, which sent its illumination far and wide over the forest, and quite down into the valley of the river. The hill side was illuminated by the fire that shone from the open door of the kiln, and the white glow of the lime-stone formed a singular contrast with the flickering radiance of the blaze. Within the kiln, the heat was almost insupportable, and the human victim felt that he was purifying himself for heaven by undergoing an infernal torture.

Meanwhile, the lime-burner and his son, and the wayfarer, had been awakened by the light, and by the sense of heat, which, even through the distance of the hut, and the thickness of its walls, made itself felt. They looked forth, and saw the door of the kiln standing open, and a great volume of fire rushing out, which, instead of being confined to the narrow limits of the interior, seemed to have taken possession of the whole outward world. Bartram and his son hastened to the kiln, and, supplying it with fuel, drew forth the lime, which was now perfectly burned, and resembled snow-drifts piled upon the floor. Then, shutting the door, they returned to their hut, and to sleep.

Ethan Brand, meanwhile, had been standing in the doorway of the kiln, and thus had enjoyed a brief space of cool air. But the fire soon began to scorch his face, and kindled in his eyes a kindred flame. He felt impelled to look once more upon the spot where he had cast off his earthly nature, and had risen, or fallen, into the unsympathizing intellect. He knelt down before the door of the kiln, and thrust his head far into the burning cavern, so that his hair was singed by the fire that melted and reduced to a red-hot liquid the limestone rock of ages. There, with fire raging around him, he beheld the emblem and the reality of his own nature and fate. His grosser self had been consumed, and had disappeared for ever. His spirit had become a flame. It was the fire that shone from the open door of the kiln, and quivered on the outward atmosphere.

Suddenly, the three human forms that had been sleeping in the hut were awakened by a loud, long, and fearful cry, that rang through the forest, and seemed to come from a distance far beyond the limits of the visible world. Bartram and his son leaped from their beds, and the wayfarer hastened after them, as they ran to the kiln, and asked one another what terrible event had befallen them.

"Some bear must have got into the kiln," said the lime-burner, "and the heat has driven him mad!"

"Father," said little Joe, "it was a human voice!"

"Yes," growled the lime-burner, with an oath, "but he has let the fire go down, and no thanks to him if five hundred bushels of lime are not spoilt. If I catch the fellow hereabouts again, I shall feel like tossing him into the furnace!"

With his long pole in his hand, he ascended to the top of the kiln. After a moment's pause, he called to his son.

"Come up here, Joe!" said he.

So little Joe ran up the hillock and stood by his father's side. The marble was all burnt into perfect, snow-white lime. Just on its surface, in the midst of the circle—snow white too, and thoroughly converted into lime—lay a human skeleton, in the attitude of a person who, after long toil, lies down to a long repose. Within the ribs—strange to say—was the shape of a human heart.

"Was the fellow's heart made of marble?" cried Bartram, in some perplexity at this phenomenon. "At any rate, it is burnt into what looks like special good lime; and, taking all the bones together, my kiln is half a bushel the richer for him."

So saying, the rude lime burner lifted his rake, and hitting it full upon the skeleton, the relics of Ethan Brand were crumbled into fragments.

CHRISTMAS SUPERSTITIONS OF SUABIA.

BY JOHN OXENFORD.

THE peasantry of the kingdom of Wirtemberg attach great importance to the Three Thursdays before Christmas, which are called different names in different districts. In the regions about Tübingen and Stuttgard they are named "Knöpflingsnächte," which, as "Knöpfling" signifies any small round body, we may venture to translate "pea-nights." The children of the villages celebrate these nights by shooting peas, barleycorns, &c., at the cottage windows through a reed, or, as we should say, a "pea-shooter." They are generally rewarded by the inhabitants with a forcible repulse, in which words and blows are brought into combination.

The name of "Knöpflingsnächte" also obtains in the district of Weinsberg, and the evenings are celebrated there by the recitation of children going about and singing a rude Suabian song, thus freely rendered:—

> Knöpflings night has come, I trow;
> Corrandt! Corrandt!
> Give me apples and pears enow,
> And I'll give thanks to thee.
>
> An angel sits behind the door,
> He has apples and pears in store;
> Throw pears upon a stem,
> Come, good man, give us them;
> Give us apples and pears enow,
> And thou shalt have good luck, I trow.

In the neighbourhood of Ellwangen, the three Thursdays are called "Ankiopfet," or "knocking days." and are likewise celebrated by children going about for trifling gifts. The song at Buhlerthaü is in this fashion:—

> Knock, hammer, knock!
> Of bread there's a stock.
> Out your pears and apples throw,
> Or to some one else I'll go.
> The roses, the roses.
> They grow on one tree:
> My master and mistress,
> How lovely you be.

In certain districts a menace is conveyed by the song, which runs as follows:—

> Knock, knock! I'll thank ye for bread:
> He who don't give it, I'll break his head.

The children, who sing the doggerel, of which the above doggerel is a version, beat at the houses, and on their admission favour the master with the poetical treat.

There is more than one explanation of the custom of throwing peas against windows on the "Knöpflingsnächte." Some derive it from a practice which was adopted when Suabia was visited by a pestilence, and every house was barred by its inhabitants. No strangers were admitted; but at night passengers in the street would throw a handful of peas at the windows, by way of asking if the inhabitant of the house was yet alive. If such was the case, the master would show himself at the window, and give a friendly salute; but, if no one appeared, the passengers concluded that all the residents had perished. The solemn salute with which, in some districts, the children are answered, even at the present time, is in favour of this explanation. Others say that the pea-throwing owes its origin to the precaution of the Primitive Christians of Suabia, who adopted this fashion of giving a signal when they were about to hold their religious assemblies. The fact, however, that the ceremony is appropriated to Suabian "bogie," called the "Pelzmärte," who is supposed to show himself on Christmas-eve. He is often pictured with twisted pea-straw, his face is black and sooty, he has a basket in one hand and a stick in the other. His name seems to be derived from a cap of fur (pelz), which he occasionally wears, while another name which he bears, more clearly indicates his real character. This name is "Schäute Klas," an evident corruption of "St. Nicholas," the known patron-saint of children, whose festival is on the 6th of December. By his practice of rewarding good children and punishing bad, as he pursues his travels on Christmas-eve, the mysterious goblin proves his affinity to the celebrated saint. In the market-place of Calw "Klas," or Nicholas, is visibly represented by the chief of a party of children, who run about with cow-bells in their hands, intended, it is said, to remind the people that the Redeemer was born in a manger.

While, however, the sanctity of Christmas is rated so highly in Suabia, that the very cattle are supposed to fall on their knees in the midnight of Christmas-eve, and the sun to take two leaps in his course out of pure joy, it is nevertheless supposed to be a time when witches and demons are especially potent. In accordance with this belief, an alarm-bell is rung in the neighbourhood of Tübingen for the purpose of driving the intruders away. While the bell is sounding, it is deemed prudent to feed the cattle, and to bind straw about the fruit-trees, as a means of securing fertility; but the practitioner is rigidly enjoined to perform these operations before the ringing has ceased, as they will otherwise be of no avail. That the father of evil is supposed to be in a good-humour at Christmas time may be inferred from the belief that he is then easily to be found on a Suabian cross-road at midnight, and will bestow presents of money and corn on those who have courage sufficient to ask the favour.

For the discovery of witches at Christmas a peculiar kind of spoon is requisite. A stake is cut into the form of a ladle, in the course of the three "Knöpflingsnächte," and on each of the three nights it must be used to stir porridge, care being taken not to wash away the meal that adheres to it. This ladle, in which a hole is bored, is taken into church on Christmas-day, and all the witches who happen to be present may be seen through a hole in it during the delivery of the sermon. They invariably have their backs towards the preacher, and, strange to say, carry a milk-pail on their heads. The experiment, however, is not without danger; for, if the observer has not quitted the church, and reached a distance of three paces before the bells have ceased ringing, he will be torn to pieces by witches on the road. According

to a popular tradition three persons came, in this manner, to an untimely end, no further back than the year 1832.

Where witches abound, it may be readily imagined that charms like those of Hallow-e'en, immortalised by Burns, are not wanting. Thus, on the three special Thursdays the village-girls about Pfullingen pour warm lead into cold water, and predict from the shapes taken by the metal the trades of their future husbands. In the same district, and at the same period, a gosling is also used as a matrimonial oracle. The girls form a ring, in the midst of which is placed the gosling with its eyes blindfolded, and the one whom he first approaches is destined, before long, to obtain a husband.

The virtue of the Christmas period extends to the festival of the Epiphany, or, as they say in Germany, to the "Three Kings' Day." In the neighbourhood of Pfullingen it is deemed impious to spin on the twelve holy evenings; and dreams that occur in their course are supposed to have prophetic value. Much weather wisdom, too, is based on an observation of the meteorological changes which occur at this time; and it is supposed that the state of the weather for the whole year is predicted by that of the twelve days, a quarter of a month being represented by every six hours. The mode adopted to record the observations is primitive in the extreme. Twelve circles, representing the twelve months, are made on a sheet of white paper, and each of them is divided by cross lines into four compartments. In each compartment the Suabian peasant marks the result of each six hours. If he be a scholarly man, he makes his record in words; but if he be blessed with that unsophisticated innocence of reading and writing which Jack Cade so much admired, he denotes fine weather by leaving the paper white, and wet weather by a smear. It is, however, a singular fact, that the value of this elaborate proceeding is only regarded as hypothetical till Twelfth-day actually arrives. If that day proves fair, the record paper is valid; but in the contrary event, it may be cast aside as worthless. In some parts of Suabia, an onion is used as the oracular instrument. It is cut in half, and twelve little cups are made by separating the layers. Into these some salt is put, and accordingly as this salt melts or remains dry, the weather of the month to which the particular cup refers is expected to be wet or fair.

In a country so rife with mediæval superstitions, it could not be supposed that the three magi, or "Kings," to whom Twelfth-day is dedicated, would be without visible representations. In many villages during the whole interval from Christmas to the Epiphany, three boys go about, attired in white gowns and leathern girdles, with crowns of coloured paper on their heads, one of them having his face blacked, to denote the complexion of the Moorish King. It is likewise customary to invoke a blessing on a house, by writing on the door the letters K. M. B., the initials of Kaspar, Melchior, and Balthasar, as the three magi are named in Romish tradition.

THE DREAM OF THE THREE HOLY KINGS" BY C. BEGAS

OF THE EPIPHANY.

[SIR JOHN BEAUMONT, the author of the following poem, was born in 1582, and died in 1623. He was the elder brother of Francis Beaumont, the celebrated colleague of Fletcher. His known poetical remains are comprised in a small volume of miscellaneous poems. His contemporaries speak of his having written the "Crown of Thorns," a poem in eight books; but this is apparently lost to posterity. Winstanley, in his "Honour of Parnassus," speaks of Sir John Beaumont, as one of "the great souls of numbers," and his poems certainly possess great merit. The chief recommendation of them is, however, that they are all dedicated to the service of virtue and piety: no mean praise for a writer of the times in which he lived.]

FAIR eastern star, that art ordained to run
Before the sages to the rising sun,
Here cease thy course, and wonder that the cloud
Of this poor stable can thy Maker shroud:
Ye heavenly bodies glory to be bright,
And are esteemed as years rich in light;
But here on earth is taught a different way,
Since under this low roof the Highest lay;
Jerusalem erects her stately towers,
Displays her windows, and adorns her bowers;
Yet there thou must not cast a trembling spark—
Let Herod's palace still continue dark.
Each school and synagogue thy force repels,
There pride, enthron'd in misty errors, dwells;
The temples where the priests maintain their choir
Shall taste no beam of thy celestial fire.
While this weak cottage all thy splendour takes,
A joyful gate of every chink it makes.
Here shines no golden roof, no ivory stair,
No king exalted in a stately chair,
Girt with attendants, or by heralds styled;
But straw and hay inwrap a speechless child.
Yet Saba's lords before this babe unfold
Their treasures, offring incense, myrrh, and gold.
The crib becomes an altar; therefore dies
No ox nor sheep, for in their fodder lies
The Prince of Peace, who, thankful for his bed,
Destroys those rites in which their blood was shed;
The quintessence of earth he takes and sees,
And precious gums distilled from weeping trees;
Rich metals and sweet odours now declare
The glorious blessings which his laws prepare:
To clear us from the base and loathsome flood
Of sense, and make us fit for angels' food;
Who lift to God for us the holy smoke
Of fervent prayers, with which we him invoke,
And try our actions in that searching fire
By which the seraphims our lips inspire.
No muddy dross pure mind'rals shall infect,
We shall exale our vapours up direct:
No storms shall cross, nor glittering lights deface,
Perpetual sighs, which seek a happy place.

THE TRIUMPH OF LOVE.

BY MRS. T. K. HERVEY.

HE cometh! Like a dawn delayed,
When rolling mists, the earth surrounding,
Too long control the gracious sun's abounding.
He cometh! Through the clouds that shade
A world for peace, and love, and gladness made:
A world whose silent chords await his finger's holy sounding!

He cometh! To his father's fields
With heavenly gaze he draweth near,
Like a mild gleaner, ere the grain is sere!
Too blest when aught rich harvest yields,
The bread of life within his hand he wields,
His meek eyes bent like sunset down upon the golden ear.

With curb unbound, and slackened rein,
He rideth, meeker than a child,
The monster War, that through the world ran wild.
Counting his bondage richer gain,
The humbled savage needeth not the chain—
Grudging no toil, but proud to bear that burthen undefiled.

A conqueror whose words are peace,
He weeneth o'er each ruined city,
Where Famine's voice rings out its tumult ditty.
The captives' bonds his prayers release,
And, while he bids the work of havoc cease,
Sets flowing through the arid streets the precious founts of pity.

All human heart that throbs that beat
His true but veiled disciples are
The railings of strange alien cannot bar
The eager tread of stainless feet;
Each mountain is a shrine for worship meet
Where e'en the scouted Pariah's voice may praise him unaware.

His love doth fall upon the soul
Like silent droppings of quick tears
Amid the sobbings which God only hears!
It bids the shattered heart be whole.
And hope no more drop fainting at the goal
Where life itself sinks, deafened by the rushing tramp of years.

Where his mild wand the hours doth number,
Where his right hand the way doth keep,
Death's but the falling of the lids in sleep,
Life but a robe whose folds encumber,
And Memory's failure only the soft slumber—
The dreamy trance of angels—silent, beautiful, and deep.

O, glorious sleep! More glorious waking!
When the tired soul, its journey o'er,
All dumbly walking heaven's shining floor,
Shall see the ransomed Just partaking
Those waters that—life's thirst divinely slaking—
Through God's crown'd kingdom ever flowing, flood the eternal shore!

THE STAR OF BETHLEHEM.

THE ANNUNCIATION AND TRIUMPH OF CHRISTIANITY.

We give here, as peculiarly appropriate to the season, two illustrations having reference to the above subjects. They are extracted from a series of plates, etched by the artist himself (Joseph Fabrich, of Munich), exhibiting, with striking simplicity and expressiveness, the successive steps in the progress of Christianity, from its first prefigurations to its promulgation by the Great Teacher himself, and its subsequent, and as yet, far from completed triumphs. This is done by a long train or procession of symbolic and historic figures, each summing up a remarkable point in the history of the progress of the Christian idea, and serving as a fresh link to show its relation to man. An earnest and elevated spirit pervades the whole work, and powerfully appeals to both the understanding and the heart. We have selected the central and the terminal group: but in order to connect both these with the rest of the work, it will not be by any means uninteresting to show, in a short summary, with what appropriate-

THE MIGHT OF GENTLENESS.

ness and fullness of meaning the artist has wrought out his idea Adam and Eve begin the procession, and form the starting-point from which all the rest take their purpose and necessity. In their sin and their departure from God, are involved the sufferings, the struggles, the needs, the atonement, and the triumph impersonated in the figures which follow. Whilst Adam, under a sense of sin and death, walks with down-bent gaze, Eve, with her burden of sorrow and repentance, lightened by a ray of hope, lifts upward her hands and eyes to Him who has given her seed the promise of victory. Abel follows them: as showing, by his murder, the first awful consequence of sin, and prefiguring, by his sacrifice, the great atonement. Next comes Noah, bearing a model of the Ark; which was a symbol of that covenant into which all tribes and nations were to be received, and saved from the deluge of evil; while, over the ark, descends the dove, with the olive branch, emblem of that spirit which moved over the face of the chaotic waters, and brought forth order and goodness from blank disorder, and descended on the Great Teacher also, when he set out on his mission of order and goodness, among the universal moral chaos. Melchizedech then appears, the figure of the great high-priest; and Abraham and Isaac, with the knife and the fire and the wood, prefiguring the great sacrifice of the Son by the Father. Next comes Jacob with the heaven-ladder of his dream, as a memorial that at that very Bethel, the place of his vision, should be born—Him who should open to the whole world the vision of the way to heaven, and that there the angels of his dream should announce, "Glory to God, on earth peace, and good-will among men." Joseph then appears, whose fate also is prefigurative: cast out by his brothers, deliberated over and sold; redeeming them in their starvation and distress by the riches he has stored up with the King; while, as in his dreams, the surrounding sheaves, and the sun, moon, and stars, all that springs from earth, all greater and lesser dignities, bend before and worship him. He is followed by Moses and Aaron, the law and the priesthood, the state and the church, the moral and the spiritual in life and doctrine. The spies Joshua and Caleb succeed them, to the end of whom God appointed the sun, and to the other the fleece of the lamb, as a sign of victory. Samuel comes next, and Sampson, both Judges in Israel; while the latter, bearing the gates of Gaza, prefigures Christ's bursting the gates of death, and in his death also overwhelming the oppressing and shaving powers and dissipations of this world. Now there appears, heading the troop of the prophets, David the poet-king—the prophet-singer—the outward ancestor of Christ. First among the prophets advances Isaiah, with the clear, seer-glance; Jeremiah, sunk in sadness at the calamities of his people, and prophetically bewailing the Saviour; Daniel, the one true man among many false; and Ezekiel, the seer of the great universal resurrection, the descent of new divine life into the dark valley of the shadow of worldly death. The six lesser prophets follow, among whom Jonas, three days buried and then upraised, more peculiarly prefigures Christ. After these appear the Sybils, women of mysterious inspiration, who, in dark figures and omens, spoke out to heathen night of the Light that was to come.

And now the immediate foretellers of Christ pass before us: the star which guides the three wise men of the holy kings of the East, and the angel calling the herdsmen to the manger; shepherds of the people and shepherds of the flocks, going onward to the great everlasting Good Shepherd; and who recall reaches equally the peasant and the king, and absorbs both in old traditions of the divine dealings, which had floated down, from the ancient times, among the simple pastoral races the wisdom of Eastern philosophy, which had accumulated, from the days of Abraham's fellow Chaldeans to the latest star-readers and solvers of earth's riddles. In the midst of this group (the central one which we have given in our Illustrations) stands forth John the Baptist, who, more than a prophet, exclaims, "I am the voice crying in the wilderness, make straight the way of the Lord;" and, pointing to where Christ himself advances, cries "Behold the Lamb of God." The murdered innocents of Bethlehem, the first young martyrs, with palms in their hands, fill up this group; and, with the announcement of the new faith, prefigure the manner of his first teaching.

At length Christ himself appears, sitting in a car; as world-deliverer, he holds in his left hand a globe surmounted by a cross, over which he extends his (for us) pierced right hand, in blessing. At his feet sits Mary, his mother, his first guardian and sharer of his last sorrow, now sharer of his honour and triumph. The four great teachers of the early church, Gregory, Ambrose, Jerome, and Augustine, push on the wheels of the car, which is drawn by the four mystic beings of the Apocalypse. These are followed by the great first messengers of the Evangel, the apostles, led by Peter, the holder of the keys, and by Paul, the unwearying—invincible world-apostle. These are succeeded by the most notable of the martyrs: Stephen, bearing the stones which shed the first blood that watered the young plant of Christianity—the young tree of life. Lawrence, with the tiara and dress of the head of the Church; Polycarp, Etnelbert, and John of Nepomak, the patron saint of Bohemia; Sebastian, with the arrows in his hand, and George slaying the dragon, both warriors, as a sign that it is, through battle and victory over evil, we must follow Christ; while St. Vitus, and Wenceslaus of Bohemia, close this group.

But, that it may be remembered that God makes the weak also mighty through faith, and that not to men only are we indebted for the upholding and spread of the truth, there follows next a group of women and maidens, who in humility—in gentle patience—in steadfastness through sorrow, boldly suffered. Helena, Constantine's mother, goes first, with the cross; Thekla, Barbara, Catherine, and others follow, with the signs of their martyrdom. Cecilia, the patroness of sacred music, plays a small organ. The young martyr, Agnes, carries a lamb, and is an emblem of the innocence and virgin purity that persecution could not crush. The maid-servant, Nothburga, appears in this group, as a sign that in every station God may be and is glorified. The penitents Magdalene and Margaret of Cortona, show both that only through repentance and punishment can purification and lost innocence be restained, and that even to the lost does the message of mercy reach.

After these comes a group, led by Paul, the first anchorite, in a dress of plaited palm-bark, of early hermits and monks; who, led by an hallowed vocation to renounce the pleasures and pastimes of the world, and to meditate in the solitude of deserts and cloisters, on "the one thing needful," sought to tame the wild spirits of the times, and lead the active and unbridled energies of men into submission, to truth and good; Antonius, Makarius, Serapion, Francis of Assisi, Seraphicus, and Bruno, Jean of Bohemia, Procopius, and others.

The last group (which we also give) contains other characters and symbolic figures; and closes the procession, and returns us, by its figurative personifications, the later progress and ultimate triumph of the Christian idea. They represent spirits which, in the most various circumstances of life, pursue the same end or attaining, maintaining, and extending God's Faith; and they also represent the victory of that Truth over the various worldly principles and powers, and the bringing into order and submission the physical, the kingly, and the intellectual forces which move men on earth. The legendary giant, Christopher, gently bearing through the swollen river, through darkness and storm, the strength unknown, that, then recognised as Christ, is a symbol of the bending of the physical powers of the world, which seem gigantic as compared to the small voice of Truth, and of their willing service in bearing through the rough stream of events—through the darkness of ignorance and the storm of opposing passions, the pure and gentle influence of Christ.* Pascal Anfray, the zealous spreader of Christianity, baptising a young negro, personifies the missionary agency, which pours out the water of life upon heathen nations. He is followed by a husbandman and a herdsman—Isidor and Wendelin—the latter a king's son, who exchanged the sceptre for the shepherd's crook, who here claim a place, in The triumph as in the Annunciation of Christianity, for the simple and lowly, the toiler with rough hands—the labourer in the inclement fields. After them come two of the mightiest and most elevated in the world's ranks, Constantine and Charlemagne, who may either represent Christianity reaching the throne, even in these dark ages, and bending the ambition of the most ambitious to its establishment, and the spread of its influence through laws and social institutions; or may personify one of its greatest obstacles, in its name being taken hold of as a tool by worldly designing rulers, and its semblance in reverse being established on the throne of the state, and the unworldly made worldly—the spiritually and ineffably rich—degraded into a wealth of material revenue and gaudy trappings, and the unattainably infinite narrowed into a round of forms and prescribed doctrines; but over this too, it shall triumph. The procession is closed by the humble and gentle Fra Angelico da Fiesole, in whose unpretending but various and elevated talents are well personified the magnificent old schools of art, and the revival of science and literature, thus beautifully and appropriately summing up the progress of the Christian idea, by pointing to the alliance of eternal truth with eternal beauty and to the triumph of science and letters, as that which, imbued by divine impulse, shall come after, but last beyond, all the other powers, and glories, and ambitions of the world.

* In October, 1851, three very interesting mural paintings of "St. Christopher," "St. George," and "The Boom," were discovered in the parish church of Gawsworth, near Macclesfield, in Cheshire. The wall upon which the paintings were found had been repeatedly whitewashed, so as to assume the character of a thin coat of plaster; and a workman, having accidentally struck the surface, a quantity pealed off, and discovered a subject in colour; and, subsequently, two others were found. Mr. J. F. A. Lynch, of Macclesfield, immediately made drawings of the three subjects, this requiring great application, as the colours faded on the picture being exposed to the air. The execution of the original was extremely rude; but the artist had laboured, in many parts, to produce a finished effect. The nimbi round the warriors' heads were gilt, and elaborate; and the armour on St. George was singularly decorated. St. Christopher is represented in the midst of the river, supporting the infant on his shoulder; and a monk spiders on the shore, bearing a lantern to light the saint. Below is a man angling, and fish are represented in the stream. Upon the opposite bank are a castle, trees, &c. The paintings were executed in tempera, and of great brilliancy, which, however, in a few weeks a most entirely disappeared. These specimens of early pictorial art, which are especially interesting to the antiquary and ecclesiologist, have been lithographed by Mr. Burgess, of Macclesfield, and may be had of Dolman, New Bond-street.

THE CHRISTMAS TREE.

BY MRS. T. K. HERVEY.

O goodly Christmas Tree!
From whose green heights depending,
The sacred gifts of love we see;
Thy torch-light flames like glow-worm lamps are hanging
Amidst these boughs whose pious luding
The light-winged hours have drawn:
The small bells 'neath thine arches ringing
That nod in music to their leavy shade.
Thy tiny censers slowly swinging,
Sound and breath unto Heaven!

Beautiful art thou in thy dainty trimming,
Thy quaint devices strange:
Magnetic fishes in the brook are swimming,
And birds with wings of scanty range.
Arrows that poison not, nor wound,
And harps by Love's own finger tuned;
Bittie manmers meet for fairy hall,
Trumpets for elfin call,—
Wild stags through forest boughs their antlers rearing,
Hounds swiftly chasing, and bold steeds careering.

On that blessed Eve when the banned witch is seared,
And the stalled ox goes down upon his knee,*
When youth and maid have to the dance repaired,
Children shall gather round the Christmas Tree,
And with eyes upward gaze,
Lost 'mid the leafy maze,
Stand rapt in mute delight,
Or rend the stilly air of hallowed night,
Hailing with infant voice the world's new prime—
Innocent laughter, holy as the Time!

Man, with the silvered locks,
Standing 'midst these white flocks,
Blessing Christ's eve with bent and humbled brow,
Lay at these childrens' feet
Gifts beautiful and meet,
That Love and Gratitude from Joy may grow!
So shall each toy, thrice hallowed by the hour,
Touch the deep heart of childhood in its spring;
And thine shall be to each unsullied flower
The wise man's offering.

Thou, darling, in whose cheek,
The Soul begins to speak,
Lis down, soit dreaming of thy Christmas Tree!
And may its fruits be to thy vision be
Like guardian wings in love outspreading,
Where angel guests are threading
The leafy depths whose hoarded treasures seem
Like flowers ever dropped,
Which God hath dropped,
To make thy life one summer dream.

Woman! in whose deep eyes,
The holy aspect lies
Of glorious motherhood, unstained of earth,
Breathe o'er each sleeper's rest
The words Christ's lips have blessed;—
O guide them heavenward from their first life-birth!
And though they should require
Thee, like thy gifts to-night,
Slighting the heart that breaketh with their fall,
Still in thine arms uplift them to God's great call!

A WINTER SCENE.

DRAWN BY B. FOSTER.

Winter's white shroud doth cover all the ground,
And Cæcilus blows his bitter blasts of wos.
The ponds and pooles and streams in ice are bound,
And famished birds are shivering in the snowe.

Among the countless instances which ever prompt man's gratitude to the maker of this beautiful world, a scene of Winter, such as the Artist has here depicted, is one of the most impressive; more especially at the present blessed season. The sketcher's objects are few; but the picture is cheery, and poetic withal. The lowly homestead and hovel are here picturesquely grouped; the snow-clad roofs are in bright contrast with the dark sky; while the fair, fleecy snow touches with silver the forms of the trees, which are stripped bare but to show the strength, beauty, and grace of every limb. The stream is silent; or, as the poet sings:—

The little brook that erst my cot did lave,
And o'er its flinty pavement sweetly sung,
Durst now forget to roll, her wanton wave,
For winter hoar her icy chain has flung.
And stiff'd the babbling music of her tongue.

There is no season more beautiful

Than Wi ter when 'tis clad with snow;

as Milton calls it, at the season of the Nativity, "innocent snow," conscious of the presence of Divine innocence.

The picture before us has its incidents of busy life breaking the wintry silence. The cottager and his family have just returned with the firewood they have picked up, and the good housewife is ready to give them welcome; even the ducks are astir upon their "crystal pavement." The sight of the cottagers is suggestive of the faggot cracking upon the hearth for the evening cheer: hence, this is a cheerful view of Winter:—

For 'tis the season, when the nights are long:
There's time, ere morn, for each to sing his song.

A snow-clad landscape is a favourite subject for painters and poets. One of the latter thus describes its characteristics, as we often witness them in a quiet nook of the country, wrapped in utter silence beneath the snowy pall:—

Deep on the face
Of the wide landscape lies the spotless flood.
* * * * *
The yester rain, that thunder'd as it pass'd,
Now makes impression on the rugged plain

* Brande, in his "Popular Antiquities," gives an account of a superstitious notion prevailing in the western parts of Devonshire, that at twelve o'clock at night on Christmas-eve, the oxen in their stalls are always found on their knees, as in an attitude of devotion.

With frozen sockets rough, now soft'ry moves,
And labourers bent through the fleecy drift,
As if its every wheel and every foot
Were shod with noise as fleet, or slower down.
How fair the deluge that enwraps the hills!
Its whiteness as shame-less murky cloud above;
Makes mean turf a seem, and death yawns;
And to the sullied aspect of the ill
Allows no mean ness. What it the clear orb
Of night or day, from the pervan t of heaven,
Look impudent down! How glowing then
The thicker-bash'd purity of earth beneath,
Wrapp'd, like a spirit, in a blaze of light!
And how excell'd her splendour, well oppos'd
By the deep azure of the heaven above.

How touching is this sleep of the year, so like unto death that the poet has sung its dirge—but to dispel its gloom:—

Orphan hours, the year is dead,
Come and sigh, come and weep!
Merry hours, smile un-dead,
For the year is but asleep.
See it smiles as it is sleeping,
Mocking your untimely weeping.—Shelley.

THE ELFIN OF HAZELNOOK.

A TALE OF CHRISTMAS-EVE.

Zyg was couchant on a puff of swan-down, in the cup of an acorn, he lay listening to the flake-falls of the snow on the holly close by, and he was not in the best of humour thereat; for he loved the great red berries which were fast being covered by the broad congeries of crystals that continued to descend. Every now and then he turned over and beat up his bed, declaring the down was coarse, and had lumps in it; his jerkin, too, which was made of gossamer, was a new one, and he was sure it was a misfit, for the seams hurt his wings: he ordered his glow-worm in waiting, who lay on a half-withered leaf hard by on the same low branch, to move to a greater distance, for her vulgar glare was hurting his eyes; and he requested her to be more careful for the future. The vibrations of the morrow's east wind were causing his joints to ache, and giving him a violent cold; but what put him most out was the chirrup of a cricket somewhere near, against which he vowed a signal vengeance. Stretching himself out, he regarded languishingly a sparkling necklace of honey-dew with which he had lately been presented; but turned from it to gape on, and then kiss rapturously, a ring of nectar which encircled one of his fingers—the love-token of his adored Vermille. It cannot be disguised that Zyg was a great fop, and that he was also capricious; but in the main, be it understood, he was as well-meaning and amiable a little sprite as any in all Fairydom.

Zyg lay *perdu* waiting for twelve o'clock; for it was Christmas-eve, and he had a commission—a mission we mean, simply, for he owned no allegiance to any lord of Fairyland, but took in sprite-work on his own account. The fortunes of Toby Postlethwaite were engrossing his professional attention, and he had lately neglected everything else most ruinously in his care for that sole object. From the first moment, when the shutting of the lattice in Toby's cottage parlour imprisoned him temporarily there, and he overheard the circumstances that had interested him so much, he had run all sorts of risks of being caught in the course of his frequent visits; for, more than once, when Toby's children thought they saw a butterfly flutter by, it was no one else than our small friend Zyg, on one of his reconnoitring expeditions; and, as he had no ambition at all for figuring as a specimen in the glass case over the chest of drawers which contained the Postlethwaite collection of wasps and cockchafers, and other objects of natural history, and to have a pin twice as tall as himself stuck through his body, however highly he might have been prized, those narrow escapes had been rather alarming to his spriteship. The circumstances in the fortunes of Toby Postlethwaite, which had engaged so exclusively his attention, were briefly these:—

Toby's family had lived at the dairy farm of Hazelnook from times at least as remote as those of the Roundheads; and, though small, it was their own independent patrimony. In that stretch of time they had known many reverses, being sometimes well up, and sometimes rather low down, though never exactly broken, on Fortune's wheel. On the whole, the waves of the sea, as boys depict them in their first drawing-books, would represent their fortunes with tolerable accuracy; still they always managed to preserve Hazelnook intact. It had so happened that when old Simon Postlethwaite, the father of Tobias, and who was still alive, was in his prime, and when Toby was up in arms—in his mother's we mean—that the contiguous estate of Lindengrove became the property, by purchase, of one who had amassed great wealth in India—Mr. Nugent Malabide by name; and that when that gentleman entered upon possession, and coined over, with his agents, Messrs. Sligo and Griffin, the title-deeds and maps of his demesne, he grew dark in the countenance when he found that the continuity of his north-east boundary, till it should intersect the King's highway, was interrupted by the dovetail forming the small landed possession of Simon Postlethwaite. Now he was a man of business was Mr. Malabide, to say the least; and when he discovered that flaw in the fair proportions of Lindengrove, he promised himself no rest until the annexation of Hazelnook thereto should be accomplished.

The ingenuity of the law agents was forthwith in exercise; but the material obstacle to their success consisted in the fact that the owner of the dairy farm had no desire to part with it, and had his valid and unembarrassed titles lying snug and dry in his strong box. The market demand for dairy produce was healthy; so were his wife and children; and his income was enough for his wants. Such were the arguments with which Simon met the advances made to him; but his thought besides, within himself, there was some virtue in baulking desires which could only have their origin in pride and intolerance. These very sentiments his great neighbour had already suspected, and he did not like him the better for them; but resolved that a money sacrifice, if such would avail, should not be wanting to attain his removal. Sligo and Griffin had now authority to offer terms which Simon believed were far beyond the actual value of Hazelnook—and his mind wavered; "for," thought he, "so far from acting as a good steward over the birthright of my children, I may be depriving them by thus stubbornly consulting my own feelings, of a better fortune." He gave way, then, to the importunity of those practitioners, permitted them to prepare the deed of sale and conveyance, had it home with him to Hazelnook Cottage, and admitted his seal and sign-manual in due form.

All that was needful now was to look out his titles, send for the agents, receive the money, hand over the documents, and transport his moveables; but, as he leant back in his high-backed chair, and scanned the old features of the place—with which the humble history of his family was associated time out of mind, and thought of the uncertainties of the world's ways, in things which were out of the beaten track which he had been born to tread, and of the honest pride which would be lost to his children of occupying the scene which their forefathers had so long made honourable by exemplary conduct, and also contemplated the grasping pride whence the transaction arose, and to which it was to contribute, he well nigh cursed himself for his folly in submitting to be led so far, and resolutely deposited the deed in the

same secret receptacle which contained his other papers—an action to which Toby's mother gave her entire concurrence.

The wrath of Malahide and his agents, on the return of their messenger, when that individual announced the reply which Simon Postlethwaite had made to the inquiry if he had signed the deed of sale—"Yes, I've signed it, but I've also changed my mind: and before I'll part with the property of my children, to pamper your purse-proud employer, I'll see him and his oily-tongued agents d—d first!"—rendered the trio a tableau worthy the pencil of a Hogarth; and at the same time added, if possible, to the enmity with which they already regarded him.

"Let him alone a bit," said Nicholas Sligo; "let him calm down again, and we'll conquer his contumacy yet.

And they did let him alone awhile, and met him so pleasantly that he thought he might possibly have judged them over-harshly; and, being more hasty than ungenerous in his disposition, Simon returned their civilities in kind.

At length, one day, Mr. Sligo encountered him, apparently by the merest accident. "Morning, Mr. Postlethwaite," said he." I have just been admiring your crops and your fences."

"Oh! they're nothin' very extra, sir, either o' 'em," said Simon.

"Oh! yes, they're very fine, very fine," repeated Sligo. "By-the-by, I have never had your bill of costs, Mr. Postlethwaite."

"Bill!" said Simon. "I beg your pardon."

"For the conveyance which was talked of, but was taken up"

"Oh! ah! sure!" said Simon, with a new feeling of alarm. "I'm sorry I did not think of it. What may be the amount, sir?"

"Oh, only—so much: stamps, you know—correspondence—expensive; but it's of no consequence."

"Dear me! I had quite forgot it," pursued Simon, a good deal nettled at having overlooked the circumstance that Malahide's agents had added a claim upon him, and rather alarmed at the amount, which indeed a claim upon him, and rather alarmed at the amount, which indeed the did not feel prepared for, and yet ought to settle at once. "Would you wish to have payment soon, Mr. Sligo?"

"Oh, eh—No, no—never mind! By the way, Mr. Malahide is going to shut up Lindengrove House for a while, having business that will detain him in London. His son—young Loftus, you know—is rather delicate; and it strikes me your place is very healthy and beautiful: would it be possible for us to arrange anything for him at the farm? How are you off for room there?"

Now the proposition conveyed in these sentences was one which Simon would have been slow to entertain, coming from any quarter; and was not over palatable coming from the one it did; but the preamble about the bill, for which he had been unprepared in mind, and was also unprepared in purse, gave it another colour; and he acknowledged that there was more house-room at Hazelnook than they had occasion for.

The wily Nicholas laughed loudly—in his sleeve. He had gained his point, and thereby advanced a piece of deep-laid treachery against Simon Postlethwaite, in which, not his employer, but the younger Malahide (who inherited the father's qualities, but nourished to a worse degree by the latter's designing subtlety) was his accomplice. This was no other than to obtain possession of the titles and conveyance of Hazelnook; for, could but Postlethwaite's strong-box, which was no very heavy affair, be spirited away, he saw no great obstacles to being himself, ere long, master of that desirable possession. Old Malahide's constitution, damaged by his eastern life, had lately shown symptoms of breaking up; and over the younger he had obtained an ascendancy which he promised himself greater scope with when once the right time should arrive.

The arrangements for Mr. Loftus Malahide taking up his quarters at Hazelnook were soon completed upon liberal terms. Mr. Malahide, sen., saw in it a chance for accomplishing, amicably or otherwise, some day, his scheme for annexing Hazelnook to the Lindengrove estate: in fine, all parties were made easy. Leslie Malahide, jun., became one of the family at the dairy farm. The young gentleman, being an adept in the *finesse* to which he had been tutored by old Nick Sligo, made himself, ere long, a general favourite; and things proceeded quite prosperously.

Loftus was not long in discovering the resting-place of the coveted strong-box; and more than once, while weighing it in his hands, did he weigh in his mind the possibility of carrying it, some propitious night, far enough to clear the boundary line that parted Hazelnook from Lindengrove; and he did not despair: there it lay, never looked at or thought of; and likely enough it had not been locked at for six months. Numerous were the meetings which the conspirators had together; but Sligo was never a visitor at Hazelnook: numerous, too, were the occasions fixed on for carrying off the prize, but something or other occurred to render the attempt inexpedient.

Fortune at length seemed to favour their villanous enterprise: a member of the household, the proximity of whose sleeping room to the closet in which the box lay had been hitherto, night and day, an insuperable barrier, was to be absent for one night. It was late in autumn, and the moon was far in her last quarter. Loftus contrived to communicate with Sligo, and at midnight the attempt was to be made.

Now, Simon and his family followed the adage "Early to rest, and early to rise;" and as they did not indulge in afternoon naps, they slumbered soundly, unracked, when nature drew the curtain of night around their dwelling.

Long before midnight, all, save Loftus, were wrapped in deep sleep; and his nerves were strung for the venture. The hour approached, and he opened the doors that were convenient for his purpose, seized the prize, wrapped a cloth around it, and, with unerring steps, had cleared the house; when, lo! in his progress by the gable, having failed to mark precisely the situations of sundry pits which Simon had dug for receiving two rows of young trees, and now suddenly, perceiving his error, he became agitated in the extremity, and going wrong in seeking to avoid them, stumbled over a heap of earth, and fell into one of them headlong, giving utterance uwon fatly to a slight exclamation which was answered by a bark from the house-dog chained at a little distance. The panic which had seized him was now so strong that any energetic effort to still carry off his prize vanished altogether from his thoughts; and he had just presence of mind sufficient to scramble up an armful of earth over the box and its wrapper, regain his feet, clear the other pit-falls, take off his shoes on the grass-plat, find the doors close and fasten them, and reach his own room, when another bark of two from the dog roused Simon Postlethwaite. Simon thought it was rather an unusual demonstration on the part of Towzer, and accordingly put on his slippers, slipped down in the dark, and went quietly out to reconnoitre; but shortly feeling assured there was nothing wrong, he returned, honest man, to his repose.

Loftus, when he had undressed and got inside his room-door, more dead than alive, but when all listened and heard Simon return to his bed without making any search, he took up some of his wonted courage again; yet to carry the box down stairs that night was worth to get that box back again. Time must put again that night, however, he dare not; and neither must he be the first stirring in the morning. These thoughts for a while kept him in some perturbation; but at length fatigue overpowered him, and he fell asleep. At early day he awoke again; and the task of removing from his clothes the evidence of his fall into the pit, afforded him occupation till the proper time for making his appearance. At breakfast, thanks to the valuable tuition of the worthy Nick, he looked most quintessently simple; and when asked by Simon whether the dog had disturbed him in the night, he smiled benignly, and answered, "Not at all." Sleep has managed to breathe the morning air on the scene of his night's adventure; he glanced at the several pits, but could not distinguish one from another; and he could not for the life of him make out the one in which he had so hastily deposited the treasure!

Simon seemed to have some slight passing thought, for he removed the house dog nearer to the cottage; and, as it happened, to just such a spot as would prevent any covert attempt in future to obtain possession of the strong-box. So there, no doubt, it lay, in one or other of those pits. The young trees were soon planted, and the turf made good; and a month or two passed, and no words of the box being stolen from its corner. Mr. Malahide, senior, returned to Lindengrove; Mr. Malahide, junior's health had improved, and he went home; and Mr. Sligo chewed the cud of disappointed hopes as he could. Another month or two passed, during which sundry civilities also passed between the proprietors of the large and small estates.

But at Hazelnook, by and by, misfortune knocked at the door, and that did not run away, but entered without bidding. Simon had a younger brother in South America, who, after being many years silent, had communicated the intelligence that, after long prosperity, and when he had resolved to return to the bosom of his family, he had suffered by the perfidy of a partner; and unless a good round sum could be immediately remitted to him he must be completely ruined. What was to be done? Simon loved his brother, and the money must be raised, if it were possible. The proposed sale of Hazelnook returned to Simon's mind: he went to have a look at the signed deed of conveyance. His strong-box was nowhere to be found! Some hard-earned savings and the titles to his property were gone! The individuals of his family—of his household—were man-hailed in review before his imagination: the younger Malahide followed: no, he could suspect no one! Then that night, when the dog had been disturbed, occurred to him; and he could but suppose that *there* his treasure had been stolen. He could no way else account for his loss; and he now cursed his folly in having reposed his whole confidence in the lock, never having visited further the coin itself might be carried away.

One day he met Sligo; and the latter opportunely spoke of Hazelnook.

"I think we must draw on you for that little bill of ours," said the lawyer.

"Oh, certainly," replied Simon, "but what would you say to my drawing on you, sir, on the security of Hazelnook?"

"No great deal to say about that, Mr. Postlethwaite; for I suppose it is quite unencumbered," answered Sligo; and he chuckled, internally; for, thought he, "now I shall get you into a net of your own seeking."

"Quite free of burthen as yet," said Simon.

"Then I'm your man, sir; for Mr. Malahide is desirous to invest some money just now."

The idea of Malahide advancing the money on Hazelnook was unpalatable to Simon's feelings, but he could not help himself: and the preliminaries were gone further into. In a few days the necessary deed of mortgage was prepared, the money was paid into Simon's hands, and, saving the amount of Sligo and Griffin's bill, and a small sum beside, was paid into the bank to the credit of his brother in South America. In the course of the transaction Simon had to own the loss of the papers, which, with any other negotiator, would probably have proved a difficulty insurmountable; Nicholas Sligo, however, waived it, on such grounds as to himself appeared tenable.

Simon had the satisfaction, in due course of time, to learn that his brother's credit was preserved, and fortune was again promising fair with him; but his own cares were heavy at home: the interest on the mortgage he year after year paid without fail, but year after year the effort required became greater and greater, and the achievement more miraculous; still he struggled on. Meanwhile his family grew up: his son, Tobias, in course of time, married, and the resources of the dairy farm were taxed to the uttermost. Mr. Malahide, senior, followed the course of nature, and of all the Malahides; and suddenly, too, dropt old Nick Sligo from his perch; so Malahide, junior, reigned alone at Lindengrove, a reserved and sullen man. Simon's interest fell years into arrear; and the old man, with his aged helpmate, sank into the chimney-corner, hopeless, and resigning all effort into Toby's hands.

At length it appeared to Mr. Leslie Malahide that circumstances were fully ripe to justify native steps at Hazelnook; and he caused notice to be served that sale must ensue immediately. A valuation was, however, made which old Simon's memory told him was not half what had been long before offered to him; and the inhabitants of the dairy farm had the option of agreeing to the offer now made, or incurring the expenses of a sale. A written representation was made as to the disparity between the old and present offers; but Malahide had never seen the first, and there was no evidence respecting it; so he scouted it with contempt; well knowing that the evidence lay buried under the roots of one or other of those handsome sycamores, which now, in summer's prime, formed an umbrageous little vista to the bow-windowed parlour of Hazelnook: assured of his safety, therefore, he scornfully wrote in reply, that, "let them prove such an offer to have been made by his father, and he would soon ratify it." It mattered little which alternative of the offer made them they now chose, for little would result to them either way. They agreed to the sum proposed; and the last day of cold December was to see the sad departure from the home of their fathers of Toby Postlethwaite, his aged parents, and his wife and darlings; and whither he had not yet made out.

Such was the position of affairs at Hazelnook on the Christmas-eve on which our tale commenced. It was said Christmas eve to the Postlethwaites. There were no busy preparations for that yearly festival on the morrow which once gladdened its ample kitchen: no yule-log was in store; no pudding simmered in the great pot; no holly or mistletoe hung from the dark oaken beams of the ceiling.

They are queer creatures, these fairies: how they busy themselves with other people's affairs, and give them ear-ringings by day, and brain-buzzings by night! To think that no sooner can you lay up your weary body and limbs for rest, and promise your thought again brain a night's repose, but the instant your back is turned, and you are off, the little vagabonds swarm in, and are at their pranks commencing your head with their *diabolerie*, whispering insidious suggestions into your ears, heaping themselves like gigantic mites upon your heaving chest, so as to suspend digestion, and waking up your mental vision only to harass it with fitful and indefinable phantasies. No: that their delight is solely to tease, we acknowledge; for your visions are sometimes, truly, beyond all rapture; and much wealth would you give to slumber away again into such ecstatic happiness, which neither to be realised nor recalled; and for that reason are we constrained to forgive the funny elves, with all their mischief.

Zyg, the *nitty*-est of his tiny race, no sooner got an inkling of the state of matters at Hazelnook, than he must needs take the entire business under his own especial charge; and, *certes*, there, in the cup of the acorn, as we said, he lay, fidgetting and petulant, on Christmas-eve, waiting for twelve o'clock.

The long hour resounded at length from the distant village tower; and just as a merry shout sped through the crisp air from the same quarter, foretokening the plots that were laid for the morrow's festivity, Zyg sprang to his feet, spread forth his wings, and skipped like lightning from tree and shrub, and from the snow-flakes, which afforded him broad footing as they floated, slowly descending; and only pausing for an instant when he reached the thumb-latch of the cottage-door; when, feeling the dignity of his mission, he stalked proudly through the keyhole, and presently alighted between the two pillows on Toby's couch. Poor things! Toby and his wife, Alice, were soundly sleeping, worn-out with the care-fraught thoughts of the day.

To relate the antics which Mr. Zyg, in the exuberance of his humour, played off at the expense of the weary sleepers, as he skipped like a concentrated merriman from ear to ear, or squatted, snip-fashion, upon the tip of Toby's nose (which, had it been of the carbunculated and fiery order, would only have served him according to his merits) would, we feel, be derogatory to the dignity of our pen; and hence we can but await with all patience till it shall be the pleasure of his elfship to proceed discreetly with something like business.

A somersault of the most sprite-ly kind landed him close by the ear of Toby Postlethwaite, wherein he whispered with all his might, till Toby grew restive under the operation. Three skips then brought him to the ear of Mrs. P., into which he whispered in like manner, till he was hoarse; when presently he was fain to effect his escape to a pinnacle at a distance, in consequence of the turmoil he had stirred up in the heavy heads of the honest couple.

"Toby, Toby," cried the drowsy spouse of the dreaming Postlethwaite, as she sat up, rocking, and rubbing her eyes; "d'ye hear, man? Wake! for I've had such a strange dream. Wake up: don't you see the house is a-fire?"

Alice was wide awake enough to tell a white one; but it had the desired effect: and Toby was soon staring at her, although it was pitch dark, all but the faint infusion of light from the snow that was [illegible].

"I've heard, Alice?' said Toby: "a dream? Sure enough you couldn't have a stranger one than I've had: dear, dear, such strange nonsense!'

Now Alice was rather particular in the relation of *her* dreams; while Toby, if he condescended to allude to *his* at all, was extremely brief; so she chose, very shrewdly, to hear his first; and he complied with more than his wonted readiness. But what was her surprise to find, as he proceeded, that he was describing *her* dream, without flaw or omission!

"Yes, yes," she said, "it's all quite correct; but tell me *your own* dream."

"The woman's mad!" said Toby. "Am I not telling you my own dream as fast as I'm able?"

"But that's just what I've been a-dreaming myself," reiterated his spouse; "and word for word!"

"Do you say so?" exclaimed Toby: "the middle tree on the north?"

"The middle tree on the north; or, at least, it's the third one," re-echoed Alice.

"Well, that is extraordinary," said Toby, thoughtfully; and he was impelled to rise and strike a light; for his rest was disturbed; and a superstitious sensation crept over him as he groped about for the tinder-box. That article was soon found; and ere long Toby had the lamp alight. He then interrogated Alice again as to the particulars of her dream, thinking it possible there might be some mystification about the matter which would vanish with the obscurity; but Alice stood stanch to her property: it was *her* dream, in every particular. While the lamp was being lit, Zyg cut some most fantastic and complicated capers on the table on which he had perched himself; then, with [illegible] skips, reaching the lock of the door, he gave a merry look back, sprang through the keyhole, and is seen no more.

"Well, then, I'll tell you what it is," said Toby, as he bustled on with his clothes, "whatever you may think of it, I'll not rest again till I've seen the bottom of it—of that tree, I mean."

"You are quite right, Toby," said his wife; for she had caught his enthusiasm, and her curiosity was excited. "Quite right, lad; and I'll help thee myself."

It luckily happened that they alone slept at the end of the house where the scene of their operations lay, and thus they could indulged their wishes without awakening the other members of the family. So Alice took care to see that her husband and she were well protected against the night air and the falling snow; and, having secured spades and picks, they proceeded to the spot, where stood the veritable rows of sycamores under one of which lay buried the long-lost money and papers. Hard and long did they work, for the ground was frozen to some depth; but it is wonderful what enthusiasm—superstitious enthusiasm—and a union of efforts, will achieve. Toby stood up to stretch his back, and to look at the tree, which he had undermined on one side; for he thought it just possible that it might shortly fall over; and he up with his pick again, and sent it with a powerful stroke into the tough bottom of the pit; when it struck hard, and gave a wrench that almost drew him over.

"What's the matter, Toby?" said his wife, in some alarm.

"Why, I've broke the pick!" said he: "there's a stone there, or father's strong-box, or something of the sort, that's certain." And to it he went again. In half an hour the iron box lay on the snow-clad grass-plat, even with some rags of the wrapper in which it had been buried adhering to it: and Toby and Alice sank, in admixed fear, gratitude, exhaustion, on the large earth-heap they had raised. In another half hour it lay on the floor of their bed-room, open, Toby having found the old rusty key, which had always been preserved, and the lock having yielded to the invincible strength with which he plied it. There were the documents so long sorrowed after—*there* the titles and wills—*there* the deed of sale, with the high offer for Lindengrove!—and *there* a goodly purse of the current coin of the realm; though the deeds were rather mildewy, and the mintage somewhat dingy and out of date.

Need we say that old Simon Postlethwaite and the dowager Mrs. P. were raised at an unreasonable hour that morning, and that the old folk suddenly grew young again, and without going so far as second childhood either? Need we say that the proud owner of Lindengrove was invited to call with his agent that very morning—not to ratify his father's offer, but to receive a round portion of the arrears of interest due on the mortgage? Or will it be doubted that, when he saw that pit and thought of his own act, and examined those mildewy parchments, and heard the relation of that twin dream, he shrank from any further attempt to dispossess the rightful occupiers of Hazelnook? No; these are probabilities so palpably in the course of nature that they need not be insisted on. So may those that there was yet found time to procure a [illegible] pig, a fat calf, and a plum-pudding as hot and heavy; and a [illegible] Lolly-bush with berries as ruddy, and a mistletoe with berries as fair, as had of yore gladdened the hearts of old and young on Christmas nights at the dairy farm. And who was that who, ere long, filled

THE ELVIN OF HAZLENOOK."—TOBY POSTLETHWAITE RECOVERS THE LONG-LOST TREASURE.

another big arm-chair in the family circle? Why, who but old Uncle Mark, with his short neck and long purse, that had returned to strengthen the old house, and to end his days where he had begun them—in Hazelnook Cottage.

* * * * *

Some people will be infidels enough to doubt the agency of our friend Zyg in the matter of the double dream, and will prefer to adopt some such theory as—the *likelihood* that the loss of the box of money and papers, and its assumed occurrence at the time when the grass-plat presented the unusual appearance of so many pits made for the reception of so many sycamore trees, should, by virtue of its being often the subject of thought and topic of conversation, act coincidently on the brains of two persons equally interested in the matter. And no doubt such a view is ingenious and philosophic enough, considering the subtilty of the premises: so, as it would take no end of chapters to go into a discussion adequately ratiocinative to satisfy the heterogenous idiosyncrasies which might array themselves against us, we must be content to leave those respectable but benighted individuals to the enjoyment of their respective hypotheses, and hug ourselves in the conscious integrity of having given the story as it came to us.

A WINTER SCENE.—DRAWN BY FOSTER.—(SEE PAGE 574.)

A STORY OF A COLUMBINE.

BY ANGUS B. REACH.

CHAPTER I.

BOXING-NIGHT.

Christmas-day—an old Christmas-day—had passed, but the genial atmosphere of the time was at it its richest. It was Boxing-night; and, as everybody knows, the full climax of Christmas festivity is not attained, the full glory of the Christmas rite is not consummated, until, somewhere between ten and eleven o'clock of the night of the 26th of December, a fairy in gauze and spangles pronounces from a gilded car the magic rhymes by which, from tyrants, respectable citizens, beadles, and other functionaries, are hatched Harlequin and Columbine, Pantaloon and Clown. These rhymes, then, had just been spoken at a theatre which I shall call the Nonsuch, situated in a leading thoroughfare of town, and which on Boxing-night was, of course, crowded to the roof; the rolled-up shirt sleeves and the incessant mopping of foreheads giving a notion of the temperature in which revelled the gods But they were in a state of high delight, nevertheless: shout after shout had burst forth as Harlequin made his first tetotum spin; as Pantaloon first wagged his decrepid head; and a still more thundering roar greeted the apparition of the Columbine (her first appearance in the part)—a slenderly formed young girl—too young, perhaps, for the violent exertion, but who curtseyed with a smile in which there was blended the *naiveté* of the child with the acute intelligence of matured womanhood; and the whisper buzzed round the house, "Miss Lucy Bradley—old Bradley's daughter—old Bill Bradley's daughter—old Clown Bradley's daughter," and an extra "hand" was awarded to the offspring of the popular favourite. The next moment he himself was before them—the clown visage grinning in their faces, the clown walk with the intertwisting legs, and the turned-in, goose-like toes, and hands holding out from either thigh the mass of drapery which forms the intricacies of the clown's pockets. Up, shaking the crystal drops of the chandelier and making them ring against each other a tiny music, went the hoarse roar of popular mirth; and louder and louder it pealed as the grotesque face began to work in those strange convulsions into which only the cheeks, jaws, and tongues of Clowns ever fall, and at length the mute heavings found an expression in a rich chuckling voice, which spoke the time-honoured phrase—"Here we are again. How are ye?" All the world agreed that old Bill Bradley had never looked more intensely clownified, and had never before spoken his entering words with so inimitably rich a chuckle.

"Ah, there's the clown for you! Nothing like Bill since old Joe, eh? Wonderful fellow for fun. No pantomime would be a pantomime at the Nonsuch without Bill. Wouldn't draw a sixpence without old Bill. Bill's the boy for stealing sausages—ah, see Bill butter the stage. Bill is *the* pantomime."

Columbine danced gracefully and brilliantly; Harlequin was as active and light as need be; Pantaloon was deliciously feeble, and took the severest kicks and cuffs with the mildest complacency; but Clown—Clown was superb. He picked ever so many pockets in no time, he bonneted policemen, and pulled the tails off their coats to an unknown amount; he stole a string of sausages as long as a cable, and ate them at three gulps; and then, with a strange fat chuckle, a race, and a bound, he leaped at the dial of an eight-day clock in the scene and disappeared. Up rose again the shout of applause, but in a moment it was checked. Hardly had the Clown's ancles vanished through the yielding surface, when a loud and intense cry of pain rang through the theatre, making itself heard over the boisterous merriment of boxes, pit, and gallery. Pantaloon, who had been tottering about the stage, suddenly moved off like any ordinary being; but Columbine shot from near the orchestra, like a flash of white light, into the recesses behind the scenes. The next moment the curtain fell, and, amid the confused clamour of inquiry and surmise, a gentleman in evening dress and white gloves glided before it. "Hush, hush!" and there was hush. "An accident," he was sorry to say, "Mr. Bradley—not aware to what extent—medical man just sent for—would audience wait for few minutes, with that kindness, generosity, &c., which always characterised," &c.

Meantime, what was the scene occurring in what is technically called "behind"? Close to the aperture through which the poor Clown had so gallantly leapt were stationed three or four half-drunken carpenters (popularly sceneshifters—a word, by the way, unknown in a theatre), with a strong blanket in which the performer was to be caught and safely restored to mother earth. A second before his leap, one of these worthies had suggested that they had as well be ready, holding the blanket in his hands. "It's all right," said one of his comrades, "there's time enough—let's have another swig first." He was in the act of putting the pewter-pot to his head, when Bill Bradley dashed in like an eighteen-pounder, prostrated the drinkers, and after flying six or eight feet, fell like a log, half upon a small platform which was to be a part of the next scene, and half down an open trap, up which a great structure of canvass and wood was just ready to rise. In the utmost dismay the carpenters rushed towards him to raise him, but at the first grasp he uttered the cry which the house had heard, and they let him sink again upon his hard bed. In a moment he was surrounded be a noisy, gesticulating group, rushing hither and thither, as the furious stage-manager, high in oath, aimed kicks and blows at the appalled carpenters, and ordered them off the premises, never to return. But in the centre of the crowd was a sight strange and touching to see. It had never before occurred in any pantomime. Clown lay uttering low moans in Columbine's arms, one powerless limb lying stick-like across her lap; the fingers of the other hand clasping and being clasped by hers. The face of Clown was distorted and working, but not in glee, but pain, and the eyes, peering out from the circles of grimy paint, were bent upon the face which leaned down close to his—a royal treasury of love and agony in its gaze.

"The angel of consolation supporting a stricken mortal," was the slightly inflated, but perhaps not unnatural thought which occurred to Lewis Ruthven, a fair-haired young man, with a face, despite its somewhat bleached hue, indicating above all other feelings, firmness, as he, with a mob of others, some in private, some in stage costume, were hustled to one side by the stage-manager, who, in a fury of desperation, and a voice at which humble actors and actresses quaked, burst through the group, in one breath consigning the carpenters to eternal heat, and urging Bradley to make an effort to get up and finish the part somehow.

"Oh, don't say so; it's impossible, Mr. Vamp; my poor dear, dear par (pronounced as written); he's hurt—oh, he's hurt so bad." And as she touched his arm, even with her fond light fingers, the maimed man did not cry, but he shivered and ground his teeth under the torture.

"Oh! stuff—nonsense. Come, Bill, make an effort, it's only to make an effort. Let's see what's wrong." He was stooping to examine, when a little nicely dressed man, with an intensely bald head, gently put him aside. It was Doctor Bland, the doctor of the theatre, who

THE PRACTISED HANDS OF THE DOCTOR GLIDED OVER BRADLEY'S LIMBS. "VAMP," SAID HE QUIETLY, "GET A NEW CLOWN."

gave the sick certificates upon grounds more or less substantial, so his enemies alleged, as his terms with the manager chanced to be friendly, who knew everybody and everything in the house, and in every other house, who used to slip about from private box to private box, with his quick and purr-like voice, retailing a bit of good humoured scandal, or, perhaps, a smartish joke with a sting at its tail: in fact, a clever, sly old man of the world, as simple in speech and manners as a Corydon out of a pastoral, but not to be done by the united talents of Machiavelli and Robert Macaire.

The practised hands of the Doctor glided over Bradley's limbs. "Vamp," he said quietly, "get a new Clown." Two bad fractures, left leg and right arm. Poor Bradley groaned and his daughter bent her face close to his and held him tighter.

"By all the ——" the stage-manager was beginning, when Mr. Sludge, the prompter, whispered that an enterprising "super" who had played Clown in the country, and was "up in the business" had ochred his face on speculation, and was ready to "go on." The stage-manager rushed in search of the enterprising super, after a deeply sympathetic order to "carry old Bradley out of that, some of you there, will ye?"

In a contiguous dressing-room, good-naturedly given up by the kindest-hearted and most pious man in the theatre, who always played the ruffians and the devil, the poor Clown was stretched, preparatory to Dr. Bland's reducing operations, his daughter's arm still around him, and his eyes still fixed on her face. "Lucy," he moaned out, "don't leave me, Lucy."

At this moment an ugly boy popped a sharp face into the room. "Miss Bradley" he cried in a shrill, mechanical tone.

"Oh! oh!" she exclaimed. "I can't leave Par, I can't."

"Miss Bradley!" thundered the stage-manager, appearing in his turn. "The stage will be waiting, Miss Bradley."

She made made no answer, but clung to her father. The Doctor interfered. He took her kindly by the hand. "Go, my dear," he said. "You will be better away. Leave your father to me. It's best for both. Go, play it out."

She looked a moment in her adviser's face, then kissed her father's forehead again and again, until her lips were water with chalk than terror, and flew from the room.

"Capital good Columbine" said Bobby Jones of Somerset House Dickey Gray, Liscomra leat the desks, as—in consequence of having jointly accepted a bill for £160 at 20 per cent. for three months, proceeds £30 down, the rest in pianos and pictures by Raphael—they lounged in a pit-tier box: "Capital good Columbine."

"Why, by Jove, Bob," replied Dickey, gazing through his double-barrelled lorgnette, "she's crying—actually crying."

"Crying in a pantomime?" answered Bobby, who was an incredulous philosopher and a *rose* sceptic of the French school. "Absurd! How could she cry when its not in the bill?"

CHAPTER II.

CLOWN AND COLUMBINE IN PRIVATE LIFE.

Clown was aged fifty-tree—a great age for a posturist and dancer to be in work—but he was habitually a sober man. Indeed, a pantaloon, with whom he long played, used to state that he despised him because he liked tea. The Pantaloon liked stronger stuff, but some how he broke down at forty and disappeared. Clown was, however come to the turn of life—in men of his profession it comes soon—and so the consequences of his accident were the more to be dreaded Columbine would be sixteen next June. In June, sixteen years ago, her mother had left her an infant, three days old, in the handsof Clown. The mother was also a dancer in a small way—one of those

TURNED UP THEIR NOSES AT LUCY....AND NICKNAMED HER "SIDDONS JUNIOR."

meek, uncomplaining, weak-fibred, but long-enduring women, who furnish forth so goodly a conscription to the army of the unknown social martyrs. The child was delicate but not weakly. It throve, and Clown loved it with all the love of his battered body, and had a very strong or enlightened soul, and while he was presenting the first spoonful of pap it was ever his lot to give to Miss Lucy, he muttered to himself, "The night I see her Columbine will be the proudest night of my life." And here we get at the great feature and point in Bill Bradley's character. He fully, firmly, and enthusiastically believed that a pantomime was the greatest possible artistic emanation of human genius, and that to the first Clown on any stage, was to hold the most elevated position the practical drama could bestow. To assail this position in Bill's mind, all reasoning, and all facts, were like hailstones rattling on the rock of Gibraltar. He heard them all placidly, and his unvaried and complacent reply was, that "those things might be all very well, but that made no difference". So, although he was often trotted out for the amusement of his comrades, Bill's theory had been given up as totally impregnable years ago, and he lived in the middle of it—like Jove in Olympus. The natural consequence, or perhaps the natural cause, of Bill Bradley's opinions was that he was a sadly ignorant and unintelligent man. Most actors know little or nothing out of their art, but the art of a Pantomime actor is of the lowest description—not calling for that degree of intelligence and acquaintance with the art of expressing natural emotion in suitable terms, which, even the lowest speaking artist must possess. Bill then knew nothing save about Pantomimes, but in that respect his knowledge was immense. He could recite you the scenes and call over the tricks of every noted entertainment of the kind—from "Mother Goose" downwards. He was clever, indeed, at inventing tricks himself, and made the model mechanics, apparatus with some neatness. As he sat by the fireside, the smoke from his pipe curling round his worn and coarse-y-skinned face, Lucy would say "Now, then, Par, a thinkin' about a trick." And "Par," would pat her head and go on thinking strenuously. This, indeed, was about the only subject on which he ever did think. But if he thought little he felt much. He had a mild shallow nature, and it was all filled up with love of Lucy. For years and years he had grieved for her mother. The girl could remember when she was a child, packed in her crib in a closet off her father's small room, having in a waste and listened to him sobbing and crying for "Lucy," and it it had been for her mother she would have risen and gone to him. But the Lucy whose name she heard would answer no more.

The child grew up, and the father recovered all his gaiety. Lucy was hardly ever out of his arms, and the first word she was taught to lisp was not "Par," but "Pan—Pan—Panto"—(Oh, what a hard word!)—"Pantomime." One day poor Bradley received a terrible blow. He wondered what Lucy would think of him as Clown; and he painted his face privately and experimentally for the purpose. The child—she was not more than two years old—shrieked and called "Par," and Bradley retreated abashed to the washstand-stand. The difficulty, however, was soon conquered. Before a week was out, Lucy crowed and clapped her hands at the patches of red and white upon her father's cheeks. Christmas was approaching—it came, and nightly he carried down the child to the theatre, and the little thing was so pretty and so taking that worn-out old dressers quarrelled as to who should have charge of it; and even the dreadful stage-manager made no objections to its presence. It was odd, too, to see Clown, just after he had squeezed one baby flat upon the stage and pulled the legs out of three others to the extent of at least eighteen feet, standing for a moment, perspiring, at the wing, and dandling in his arms the little girl, who crowed and laughed, and called him "Par." She was soon initiated in the sayings and doings of the wing, was poor Lucy.

As she grew up her father taught her to dance. Since she could stand she naturally stood in one of the "positions," and at five years of age she could skip about the floor in merry and by no means bad imitation of the popular *danseuse* of the Nonsuch. One evening, at her father's desire, she went over all her little nursery accomplishments. The grace and the agility of the little thing were wondrous. Old Bill called "Bravo!" (he had but an indefinite notion of genders), and applauded till his hands were sore. Then she came to his knee, and looked up with deep, serious eyes into his face. He had never seen a child look so much like a woman. She was like to old Lucy, but there was a difference, he knew, but he could not define it.

"Par," whispered Lucy, "I'd like to speak on the stage, better than to dance on the stage."

Poor Clown stood aghast. Here was heresy—and from his own flesh and blood!

"When you are playing Clown, Par, they all laugh, but when Mrs. Delamaine was a playing *Mrs. Beverley*, they listened, and cried, and applauded. I cried too," she added softly.

Here was a knell that Bradley could only dimly comprehend his own child, but her words jarred on his ear. Laughter was all the applause he had ever thought of. A guffaw from Mr. Bobby Jones, Mr. Dickey Gray, and their co-equals was his crown of laurels. He could conceive no other. For the first time in his life he was harsh to Lucy, and she went to bed in tears. Next day she was put under the charge of a theatric dancing-master, a figurant, as he called himself, and who let out his pupils, to fill up all the *corps de ballet* in London. For each girl he had 5*s.* a week. He called himself Monsieur De Saint Roquelette—his christened name was John Brown.

Under the auspices of this distinguished foreigner, Miss Lucy Bradley learned to a certain extent the art of theatric dancing, and drafted with her comrades from one house to another, wherever a "heavy" spectacle was in progress, she made fair advances in her profession. But as to the rest of her education—alas! Dancing was all her education! She learned somehow—she hardly knew how, but principally by studying playbills to read—after a fashion; but a long word was a fearful stumbling block, and although she would pronounce many short words rightly, she read them wrong. Thus "said" she would pronounce when reading as rhyming to "plaid" or "raid." Her writing was a monstrous collection of manifold sticks. Sometimes she could make it out, more often she could not. In fact it was not writing at all, for any practical intents or purposes. But still Lucy could read, and she did, how she did read. Every leisure hour was passed in reading, in devouring the stage editions of every play, tragedy, comedy, drama, or melodrama she could scrape together. When old Bradley was snoring she would shiv rise, light a candle, or "thieves" lucifer match, and thing herself, brain and heart, into the "Wreck Ashore," "the Slave," "Victorine," or just as probably as not, "The Maid's Tragedy," the "Duchess of Malfy," or "Julius." The essential dramatic element was all she looked for, or, indeed, could appreciate. That one lighted upon with a God-given instinct which was wonderful and sublime. What were the literary qualities of a play to her? She thought, or knew, or cared nothing about construction, or language, or the theory of situations. But let the heroine—the Juliet or the Desdemona—be in a position only dramatic, and she was down on it like a tiger, and with flashing eyes and quivering frame, would act, all under her breath, the scene to herself. By slow degrees, as she got on in her dancing, and earned higher and higher salaries, she let her father into the secret of her dramatic readings; but all the time a far purpose than in the mere tootling of relaxation from her salutary studies. So viewed Bill had no objections, and sometimes would ask her to give *Lady Macbeth*, or *Mrs. Haller*, or, indeed, *Shylock* or *Othello*—she was not particular about sexes—when he would sit by the fire-side, pipe in mouth, and laugh till the tears ran down his cheeks, just as one of the elder Kembles might enjoy Mrs. Fanny Butler giving an imitation of Pantaloon when her elocutionary studies for the day were over. The passion, the untaught nature, the tremendous energy of these performances the actress had not the slightest idea of. Neither had Bill. None were there to mark the flush of power in the cheek or the spark of genius in the eye. The father laughed and thought the exhibition "not bad monkey tricks." It was when she worked hard at her posturing and dancing that he looked earnestly on, and the tears of gratified pride and strong affection came into his eyes.

They lived in a small set of rooms, up three pair of steps, in Broad-court, Bow-street. There was a humble parlour; Clown's bed closet on one side and Columbine's on the other. The place was charmingly neat. The picture of Joe Grimaldi over the fire-place was the main ornament, and models of pantomime tricks flanked it. Lucy's little dramatic library was piled on a shelf in her own room; Bill's principally consisted of files of Christmas play-bills, of course, with a pantomime in each. Father and daughter were, for theatrical people, curiously domestic. When unoccupied in the summer evenings, they walked together. They always, if possible, were engaged at the same house. They came home together after the performance, ate their suppers and went to bed—two as inoffensive and loving creatures as lived in the world of God

CHAPTER III.

COLUMBINE IN LOVE.

Three weeks had elapsed since the accident, and poor Clown lay helpless on his back, nursed daily and nightly by Columbine, and fretting and mourning over the terrible probability that as a Clown he could never again appear upon the stage. Dr. Bland attended the poor fellow with as much regularity as if he had a fee for every time he mounted the three pair of stairs; and day by day was the clever, clear-headed Doctor deeper and deeper impressed by the strong affection and the unwearied assiduity of the daughter. As she watched and tended the sick man, whose peevish querulousness never banished the coaxing smile from her pretty face. Almost without knowing it, the Doctor found himself taking a strong interest in the little household. Meantime Lucy, the nurse all day, was still Columbine at night; and when she was at the theatre, poor Clown lay alone, generally occupied in the perusal of play-bills.

While these events were perpending, Lucy had unconsciously made a conquest. Mr. Bobby Jones, of Somerset House, had never got over his admiration of the "capital good Columbine." Night after night he was in the pit—the private box was too dear for a continuance—rolling an ugly little pair of eyes at the performer, and sometimes favouring on the refined Don Juan-ism of a wink. Lucy had never made any responsive signal however to these blandishments, so that at last Bobby Jones determined to take bolder steps and accost the young lady as she left the theatre. "There's nothing," as he remarked to Dicky Gray, "like boldness with that sort of people;" with which philosophical sentiment his friend fully agreed. Accordingly, one Saturday night, as Lucy, closely wrapped up, was gliding from the theatre, her whole soul in the home to which she was going, she found a spruce young gentleman, of what is called "sporting" appearance, her unwelcome companion.

"Now then, my dear," was the elegant salutation of Mr. Bobby Jones, "take my arm, Miss Bradley, you danced magnificently to-night. Upon my soul you did. I never saw half so prime a Columbine. And you don't know now deep I am in love with you."

Lucy was accustomed to the ordinary free and easy style of address between the *camarades* of the theatre, but she had never been so approached in the street. In a great fright she ran quickly on, but Bobby was at her side.

"What are you running away for, my dear Miss Bradley, I must going to eat you. Come now, be sociable; don't do the modest so terribly; come now." And he attempted to take her round the waist, when, crack, down upon the crown of his hat came a lusty a buffet as trod he, and Mr. Bobby Jones was in a sitting position on the stones.

"Permit me, Miss Bradley, to protect you from insult to your house," said a low voice not unknown to her, and she saw the pale firm face of Mr. Ruthven, with whom, as the author of two or three rattling farces, and who was consequently a good deal in the theatre, she had a sort of bowing acquaintance. Heartily thanking him, as well as his agitation won'd allow her, they hurried off together.

"Can I not be permitted to see you home. He dreamt of her again. You can't think. He frets so till I come."

"I trust he is getting round. I heard them say so at the theatre."

"Oh! sir," murmured Lucy, "oh! sir, I'm afraid he'll be a poor cripple all his days; he's not able yet to move a limb, sir; he lies like a child till I come home and move him, sir." And she stopped, choked with her tears.

Next moment they were in Broad court. Lucy looked up to the windows and utte.ed a loud exclamation, "Look, sir! oh, my God, look, sir! There's fire, fire in his room; something has caught. Oh, my God!" And she flew up a common stair, used by all the tenants. Stopping only for a moment to see a bright red glare glimmering fiercely through the drawn blind, Lewis instinctively followed her, and they burst into the room together.

The sight was terrible. On his bed, as unable to move as a log of wood, his face ghastly in the glare, and unutterable horror in his eyes upon staring eyes and face quivering, speechless lips, lay the Clown. The curtains blazing in one bright flame above him and around him, and a mass of burning play-bills just setting fire to the drapery of the bed beneath.

Uttering no sound, but, with a leap like a wild animal, Lucy sprang to her father, caught him in her arms as if he were an infant, and left him muffled in the still unkindled bed-clothes from beneath the arch of fire, the ribbons of her dress catching in the process. Ruthven was by, and at the expense of severely scorched fingers, he crushed the nascent fire, while, by the help of a water-jug, the original conflagration was presently extinguished. Then they both stooped over Clown.

"Par," said Lucy, with her quivering voice; "Par, it's all right now, you're safe—the fire's put out"

Clown looked at his daughter and at the stranger; but there was no intelligence in his eye. It was a strange stony glance, and meant nothing

"Par, par, why don't you speak; it's me—me, Lucy! Speak, speak."

"Here we are again. How are ye?" came with a ghastly chuckle from Bradley's jaws, and then the hollow Clown laugh grated on the ears of the listeners.

"M. Bradley, Mr. Bradley; it's your daughter, Miss Bradley—Miss Lucy," cried Ruthven.

"Your own Lucy—your own. Oh, my God! speak to me. Do you know me? Only a word—a word, for God's sake."

"Here's the pole, e," squeaked the Clown in the Clown's voice.

Lucy shrank within herself in horror. Ruthven looked steadfastly into the man's eyes. They were totally vacant in expression, a meaningless as the eyes of the Sphynx.

"I fear—I much fear—Miss Bradley, that the fright—the horror of being burned to death—has—has—"

"Has took away his reason. Oh dear! oh dear! Par, speak; just one word—do; please, please do."

But the poor wretch rolled his eyes round and made a Clown's grin. How often had brilliant houses applauded it! Lucy shrieked and covered her face; and Ruthven murmured to himself, "God help us all, what poor weak devils we are!"

Just then a foot was heard upon the staircase, and in a moment Dr. Bland, white-gloved and trim as though just out of a bandbox, stepped gaily in.

"Thank God! Oh dear, dear doctor, come here, look at him," screamed poor Lucy. The doctor did so. He was speedily enlightened as to the catastrophe, and long and carefully did he examine the patient, particularly the contraction and dilatation of the eye-balls, as the candle was flashed before them. Poor Clown was perfectly quiet and tranquil. He seemed to suffer no pain, and was easily replaced in bed, where he lay smiling with a strange, unmeaning stare. Dr. Bland then kindly, but candidly, informed Lucy that the nervous and cerebral systems had received so great a shock, that, with the worn constitution of the patient, it was more than doubtful whether he would ever recover the use of his faculties. Another shock might possibly set all to rights again; but that was a desperate experiment, only to be risked under certain peculiar circumstances. Meanwhile quiet was imperatively necessary. He must just be treated like an infant again—so said Bland—and added, that to-morrow an experienced elderly woman, an acquaintance of his, would be there "She's used to such cases, and will do all that's needful."

Lucy struggled to speak through her tears. "We have so little, Doctor, that"—

The jolly-faced little man patted her upon the head. "Leave all that to me," he said. "You are a good little girl, Lucy, and deserve to be helped. When you are a *première danseuse* at Covent Garden, and I a poor broken-down old fellow nobbling about town, you'll give me an order now and then to see the great new *pas* that all the world is mad about. But," he added, with an odd smile, "not a word about this, or it would spoil my character as the knowingest old codger about. So dry your eyes, your father will be quite quiet till morning, and to-morrow Mrs. Dosey will be here by breakfast time."

Lucy lighted the gentlemen down stairs, and returned alone to watch through the long night over poor mindless Clown.

Ruthven and Bland knew each other slightly; but the incident to which they had both been witness had naturally brought about, *quoad* the scene they had left, an intimacy.

"I tell you what, sir," said the Doctor, "trust an old fellow who knew the world before you were born, and who sees and hears much more than he says; trust me, that that little girl that we have left is a trump, a regular ace of trumps."

"She's very pretty," said Ruthven, remembering the features.

"It's undeveloped beauty," answered the Doctor, "Pity she's the daughter of such an old fool. She knows nothing. She can't speak her own language; but, it's in her, my boy, it's in her, and some day it will come out?"

"What will?" enquired Ruthven.

"How should I know," was the reply, "but this I do know, there's something working in that girl. She's none of your common rats. (French slang, we may perhaps as well say, for ballet-girls.) There's the *stuff* that heroines are made of in that face, and in that heart. What's a heroine, eh? There's two sorts, the doers and the sufferers, active and passive, Mr. Ruthven, and that girl is fit for either character, or both. Poor little Lucy. An ace of trumps"

They parted, the Doctor to his residence in Pall-mall, Ruthven to his chambers in Dusty-inn. He climbed up three pair of stairs, sat down in an uncommonly mouldy room, like all the rooms in all the Inns of court, stirred up a smouldering fire, and drawing a writing-desk close to the grate, inscribed on a blank sheet of paper, "Act I., Scene I.," and then —— stuck. He sat long musing over the paper, but not a word would come. He rubbed his head, walked up and down, and then sat to the desk again.

"It's no use," at last he said aloud—"I see her face before me; her voice is in my ears. Lucy, the prettiest of all female names—Lucy! I'll call, of course, to-morrow the first thing; it's only decent. A good old card, and sharp, too, that B. and. I never thought so much of him before. Lucy, I wonder if she will make acquaintance: I mean serious acquaintance. Lucy, it is a pretty name; and that face, so sweet, so pure!"

He went to bed and dreamt of Lucy, just as Lucy, fatigued with long watching, sank into a doze and—let the truth be told—dreamt of Ruthven.

Lewis Ruthven, a cadet of a ruined Scotch family, was one of the sedate sort of fortune of the pen which, amongst all great capitals abound—a journalist, a dramatist, a novelist—not of very great fame in either capacity, but still possessed of a rising reputation for brilliance of style and lively play of fancy. He was also a thoroughly sound-hearted fellow, a merry companion, with just an occasional dash of nationality in his speech and pronunciation to put piquancy into his conversation, elastic and keen of temperament, sanguine and bright of hope, and endowed—his best gift—with undaunted enthusiasm in whatever he undertook. His fortunes, though varied, were, on the whole, prosperous. A clever and ready writer, with some tact and a good address, may soon work himself into a decent competence in London; and this Ruthven was just beginning to see before him. Still he was indolent in making the first exertion. Labour was a task until he was hot in the harness: then it was a pleasure and a blessing. He wanted a stimulus, and he soon became aware that at length he had found one.

He called on Lucy the next morning. Mrs. Dosey was there—a sharp, bustling old dame, with a cheering voice, invaluable in a sick-room. Poor Clown was no better, and no speedy change was to be looked for. In the evening Ruthven walked to the theatre with Miss Bradley, and at night he escorted her home. He dreamt of her again. She dreamt of him again. He had not said that he would call next day: but he did, and she did not seem either surprised or angry. Of course he called to inquire after Mr. Bradley. He was in his little room. Mrs. Dosey with him. Lucy and Ruthven sat together in the parlour. Overhead, the shadow of Joe Grimaldi; and when Mrs. Dosey came in and said that the patient had dropped off asleep, they were astonished to hear how late it was. Next day it was the same; and so with many days. Ruthven gave up writing and reading, and his friends joked him, and Columbine's health was drunk with significant nods at a certain club, of which he was a distinguished member or, rather, it was about to be drunk, when Ruthven, calmly, mildly but with resolute firmness, begged that that lady's name might not be made the subject of after-supper conversation; and from this time it was known that matters looked serious.

Meantime, how were the days spent by Lucy and Ruthven, for they were constantly together? Lucy had leisure; for a spectacle in which she played had a great run, and her presence was only needed at night. The days were passed in hard, unremitting study. Ruthven was the teacher; Lucy the apt scholar of pupils. It was not until she knew Ruthven that she had seriously felt her deficiencies, and in a fearful agony of delight she embraced his offer to teach her, to lift her nearer to his own level of intellectual culture. Her progress was wonderful. She leaped instinctively at knowledge, grasped it, and kept it; and Ruthven thought of the dancing judgment of the "something" he could not yet tell what, but which would come out. In fact, her talents, now at last finding a vent, carried everything before them; and the fiery dramatic instinct, now softened by knowledge and chastened by purity of pronunciation, made Ruthven look with wonder, almost dread, at the creature he had, as it were, called into a new being. She had told him of her old dramatic amusements, her old solitary recitations, and she had almost involuntarily burst into one of them. It was the magnificent torrent of sorrow of *Constance* in the third act of "King John." Ruthven listened, overwhelmed, until as she paused and knelt down by him, as she sometimes did in taking her lessons, he said, "Lucy, you are not only an angel; you are a genius."

She looked up in his face, and replied, "I only want to be worthy of you."

CHAPTER IV.

THE LAST TRANSFORMATION OF COLUMBINE.

Ruthven had written a very carefully constructed play of strong interest, and intended to appeal to home and domestic sympathies; but he could not get the management of the Nonsuch to entertain it. He had a reputation for lively touch-and-go farce, and the present manager looked with suspicion upon elaborate dramas intended to "embrace the entire strength of the company," unless they came from very experienced hands. So put off by vague promises and heart-breaking postponement by hour, month, and year—and that was a feat—to get his MS. from the dusty drawers of the manager's room, intending to reserve it for more favourable auspices. This play, Lucy, who had heard snatches of the plot, was very anxious to see; and, accordingly, Ruthven had brought her the manuscript, written out in the neatest handwriting of a theatrical copyist. On his next visit—and it was not, as may be believed, very long postponed, not much over two hours—Lucy met him at the door, her face flushed and her eye bright.

"Oh, my dearest!" she exclaimed; "your play. I have read it—I know it by heart almost. It is glorious. I feel *Mary's* part so—I could give it so—I feel I could. Ruthven. Nothing I ever read has appeared to me more glorious." She had read Shakspeare; but then Shakspeare was not her lover; so poor Lucy must be excused for the warmth of her panegyric. "Oh, Ruthven, if we could get that piece accepted, and I could play *Mary*, and father could understand and appreciate, oh, what a night that would be—a night of triumph and glory for us all."

"Perhaps one day, dear, such a thing may come to pass; we must work, and wait, and hope together; and, after all, that will not be so unpleasant."

"Unpleasant, Lewis, with you?" But lovers' talk is confessedly insipid except to the parties, and we omit the long half-whispered dialogue which succeeded. Presently, however, they spoke of their prospects. It had been determined that the spectacle in which Lucy then danced should be her last appearance as one of what a certain caste of good people call the votaries of Terpsichore. Her mind revolted at the mindless capering to which so many long years had been devoted.

"It is so dreary—oh, so sad," she murmured, "to put on that unvarying restyped smile, with no cause, no reason. Night after night to come, and so smiling through those wretched evolutions of twirls, and languishing jumps for the gaping libertines, whose [illegible] among the cancer, who are incapable of any [illegible] at theatres than that of a sort of lazy a muration of physical beauty. Oh, dear Lewis, take me from it, for your own sake and mine. I feel I am doing you a wrong every night I appear upon the stage"

And so it was arranged. There were obstacles however, as

to Lucy's entering the higher class of her artistic companions—those old conventional obstacles which are sure to attend all changes, however unobjectionable abstractedly. The manager could not see why dancers should wish to become actresses. The ladies of the ballet corps were jealous. Latterly Lucy had mingled with them more than was necessary. She had her new associations, her new cares, her new tasks, her new hopes to interest her, and cared abundantly little for details of whitebait dinners with the Guards, or early evenings at Richmond with gentlemen whose names were often in the *Court Circular*. So the *troupe* of young ladies with pretty legs—it was legs the manager always looked to in that department when giving an engagement; if he didn't he would have been in the Bankruptcy Court in a twelvemonth—the young ladies of the pretty legs therefore turned their noses up at Lucy, and talked of "stuck up people" *at her*, and mocknamed her Siddons Jun'or, and did many other clever things of the same moral calibre, which the persecuted victim laughed at very heartily, as heartily as she could, considering how much she had to be anxious about. Engagement or no engagement, however, it was determined that she should leave the "victuals of Terpsichore." Ruthven would set to work strenuously. He had great plans. Journals to be founded, "quarterly reviews" to be established, theatres to be taken, and dramas to be written. Both of our young friends were excellent castle builders; and when they sat by the quiet fireside in Broad-court the atmosphere steve round was all one superb palace.

We revert to the evening when Lucy had studied Ruthven's rejected play. The great scene had descended on her soul like a cloud of fire; and, almost unknowing in her frenzy what she did, she sprang upon the floor and began an impassioned speech, in which the heroine lamented her intention of giving up a brilliant match and vast prospects because she would be separated from an infirm and doting father. Ruthven gazed at the light of her enkindled eyes, the dilation of her form, and shook in the rapt passion of her declamation like one beside himself. Lucy had never looked so beautiful, had never looked so triumphant. She was formed to conquer, and he knew it; and so, in the wisdom of her genius, did she. Their exultation lasted but for a moment. The door opened, and Dr. B—— appeared. Lucy screamed, and ran instinctively to Ruthven, hiding her face in her hands.

"I heard all—I heard all," cried the little Doctor. "Admirable! wonderful! genius—genius at last upon our stage! Lucy, my child, my darling, hold up your head; what are you hiding it for? God bless you! You did remember, I'm proud of you. I told him you had it in you, I did, and I was right; I'm always right. Come here, you jade, and let me kiss you. Soldiers junior, indeed. We'll make some people hug in the wrong side of their mouths, I'm a rail. Before a month is out you will do that on the stage. Oh! you wicked, sly, abominable, darling little slut, you."

Lucy had gone off into hysterics. They were soon quieted, however, because they were the genuine thing, and not imitation; and then the three sat down by the fireside, Mrs. Dosey of course being with the patient.

"I declare," said the Doctor, as a gentle joke to lead the way to ordinary conversation, "if Mr. Bradley recovers, I shouldn't be surprised if he runs off with Mrs. Dosey."

Then came the question of the play.

"Jorum would not have it," said Ruthven.

"D—— Jorum! who the deuce is Jorum?" replied the occasionally peppery doctor.

"Why, the manager of the Nonsuch, of course," answered Ruthven literally.

"Confound the manager of the Nonsuch. I am the manager of the Nonsuch when I choose. Why, if he don't do what I ask him, I'll give all the actors and actresses sick certificates half an hour before the curtain goes up, and make him shut his house up." If the Doctor had been an untheatrical man he would have concluded with "That play shall be acted." As he wasn't, he finished with, "That piece shall be done."

They sat long in talk about the play, and about poor Clown. He was in the same hopeless, imbecile condition. He was brought in dressed to the parlour, was led out on sunny days leaning on Lucy's arm. His old comrades, with sympathising faces, and sympathising hearts too, came to see him, and tried to talk to him. It was useless. The mind, if not gone, was utterly dormant. Clown was a puppet. Upon all this, we repeat, they sat talking.

All at once Dr. Bland's face lighted up with a most uncommon beam. Then he paused, then he lighted up still more, then he burst out—"There's another genius in this room, and he sits in my chair."

Lucy and Lewis were prepared for some joke; but the increasing seriousness of the Doctor's face undeceived them.

"Ruthven," he said, "in that piece of yours you have a young girl and an old man and lover. Listen, you are a clever fellow, and will jump at what I say. You saw a catastrophe, or have one night in which there was a father and a daughter, could you in any way reproduce it on the stage?"

"Oh, no," exclaimed Lucy, with a sort of hysterical pulsation agitating her whole frame, and her quick keen woman's mind leaping on to the result before the practised dramatist's. "Oh, oh," she said, with a sort of sob which shook her in her chair, "I know what you mean."

"And so do I," exclaimed Ruthven. "A great, a hopeful plan. Hush, stay one moment!"

There was a pause; the Doctor's and Lucy's eyes looking into his.

"Yes," he shouted, leaping up. "Yes, I see it. It can be done. It shall be done."

"Then," said the Doctor, "there's one more chance for Clown."

CHAPTER V.

THE NEXT BOXING-NIGHT.

Since the opening of our story, Clown has lain three weeks immoveable upon his bed; and has passed fifty-nine—an unconscious, immoveable man, only appearing most complacent at home when nearest to useless man, only appearing most complacent at home when nearest the fire, and without doors when basking in the sunshine.

Boxing-day has come again, and again we are in the Nonsuch Theatre; the audience we saw there last year are once more reassembled, and the gentlemen in the gallery are again mopping their foreheads with even more assiduity than before; and all this without a pantomime! No, there is to be no pantomime, but a drama—a wonderful drama—of which a wonderful rumour has spread far and near, and not quite (as the writers of good Saxon would say) "unbeknown," and not quite (as the writers of good Saxon would say) "unbeknown," and the newspapers have been full of puffs preliminary—"paragraphs" the wise call them. The "entire resources of the theatre," and ever so many more resources besides, were to be pressed into the service. The many more resources besides, were to be pressed into the service. The drama was a great outburst of wild—not to say frantic—type. It appeared as if the manager had set his management upon the cast, and that he would stand the hazard of the die.

Let us listen to some of the conversation emanating from the same class of auditors whose comments we repeated upon the last occasion of Boxing-day. "Mary—Miss Bradley?" "What! old Bradley's daughter—Columbine this night last year." "What! old Bradley's daughter—old Clown Bradley's daughter?" "She herself. They say she's turned a first-rate actress, and she's going to be married to a chap, Ruthven; there's been a lot of fakes and such like of his here." "And the old men?" "Oh; done up. Don't you remember he had an accident last year?" "Jumping through the clock?" "Exactly so."

One melancholy sight there was in the gallery. It was Bobby Jones and Dickey Gray up among the dark sleeves. It was humiliating. Nevertheless, they had paid the £100 bill by hard struggling, and they had both acquired very great degree of additional common sense. Bobby had, indeed, improved immensely. He had bought a bouquet, cheap,—it was principally made of wall-flowers—to cast to his old flame. Being a frequenter of small theatrical circles, he had heard how it fared with her, and laying his own professions, and all feelings of animosity aside, he had determined, during now a fit of virtuous indignation,—a step in advance of stoic philosophy—to forgive her past grievances.

"I say, Bobby," said Dickey, "where's old Bradley to-night, I wonder?"

"Ah, where indeed?" said the plaintive Bobby.

He was not so far off, after all, seeing that, accompanied by Ruthven and Doctor Bland, he occupied precisely the pit-box which had been engaged by the two honourable gentlemen in the gallery on the previous anniversary. He was pale and woe-begone, and knew nothing of where he was. His companions gazed on him with palpitating anxiety. The lights flashed up. He started. The music began. He breathed short. The curtain rose. He rubbed his forehead.

"The struggle is beginning," said the Doctor; "keep quiet."

Lucy entered.

Bradley breathed hard and quick; and, as they watched his eyes, they saw returning into them something like the intelligence—the mind of man—that which distinguishes our eyes from the eyes of cats and parrots.

Their highly raised hopes were gradually beaten back. The shock had not yet been strong enough, and the patient was relapsing into imbecile lethargy. "Never mind," said the Doctor, "all depends upon the scene."

The audience, however, were obstreperous in their delight, and Lucy was called before the curtain at the end of the first act. Immediately after, the box-door opened, and a muffled-up figure entered.

"How is he?" she asked.

"You have made an impression," whispered the Doctor. "Everything depends on *the* scene."

Another act passed. Bradley had given still stronger symptoms of the approaching crisis. Tears were seen gathering in his eyes, and he listened to the thundering applause of the house as a war-horse to the trumpet.

The play was "going" triumphantly. The third act came. Bradley seemed more and more absorbed, although they knew not to what extent he understood it. The house was in a state of fiery excitement magnificent to see. Poor Ruthven was in tears and laughter at the same moment. Only the Doctor was as cool as though he had been dissecting, his eyes fixed on Bradley's, and his fingers on Bradley's pulse. In the phrase of his own profession, he was "exhibiting" the play to his patient, and watching its operation.

The scene came. The effect upon the audience was overpowering. Ruthven and the doctor only watched Bradley's face. It became whiter and whiter. Then the blue veins appeared on each temple. The nostrils quivered and dilated, and the lips moved as though he "had dressed himself to speak." Amid a roaring torrent of applause the superb climax was given by the triumphant actress, as she dashed forward to save her sick parent from impending death; and faintly uttered, unheard by any save those who stood over him, there was pronounced by the sick man, stretching forth his thin white hand, and trembling from head to foot with a strange emotion, the first words he has spoken announcing returning consciousness.

"That's me!" he stammered out, rising in his chair, and panting as he spoke, "and that's her! that's Lucy, my own Lucy! my daughter, Lucy; that's how she saved me from the fire. Lucy, Lucy," he cried in his weak, shrill voice, "Lucy, come to me—come to your father!"

But the adjuration was unheard in the mighty roar of acclamation which followed the *coup* of the play, and no one, so intense was the gaze fixed upon the stage, observed that a pale old man in a pit box had left upon the floor in struggling to get to the front, and had been raised by his companions and borne away.

Among the score of bouquets blooming up on the stage was one principally composed of wall flowers, drooping with the head. When Lucy picked it up, the faithful Bobby Jones uttered a disconsolate *bravo*, and hastened from the theatre to drown his sorrows in a pint of stout and a Welch rabbit.

Upon the stage, after the curtain fell, father and daughter met. He knew her, and blessed her. She was not Columbine now. Heaven will be done! She was still Lucy; and the infirm old man wept silently on her neck. They were blessed tears. Dr. Bland said they re-established his reason.

Then came the congratulations—some sincere, more false—poured upon the successful actress. The manager was at her feet; and of course the rest of the company would have gone, if they could, lower than her feet.

"I told you so, you unbelieving heathen," vociferated Dr. Bland; "told you what the piece would be, and what the woman would be. God bless the actress and the author. Come here to me, both of you brats. Shake hands, friend Bradley; you have a great daughter and a great son-in law, and, what's better, a good daughter and a good son-in-law."

Bradley still stood looking confounded.

"Ah! my poor fellow," the Doctor continued, "you've had a long illness. Never mind, your children have cured you. Join the hands. Confound me if genius and affection are not better than physic."

Bewildered, but yet with some glimpses of what was meant, Bradley did as he was told.

Clown that was put into the grasp of Ruthven the hand of Columbine that was.

These two hands clasp each other yet; so do these two hearts. Bradley is well—the Doctor merry.

THE NEW GAME OF REGATTA.

A NEW GAME.—THE REGATTA.

This Game (says the inventor, who has obligingly forwarded a sketch and description) is played with dice, on a piece of painted canvas, three or four feet square, representing the sea, pinned upon a table, and numbered as in the Engraving. The Guard-Ship (pool) should be from 8 to 10 inches long; breadth in proportion; the hulls of the Yachts, from 2 to 2½ inches, cast in brass or lead; and the Lighthouse of wood, 3 or 4 inches in height. When the stakes are agreed upon, and the pool made, each member must then select his yacht, and enter her at the starting-buoy. All the players must then throw; the highest thrower, with the letter A marked on his die, superintends the Game, and is to be styled Admiral, and may or may not enter a yacht; but if he should enter one, he commences. unless he be a gallant Admiral, when he allows the fleet pays one counter to (100) Guard-Ship. If the letter A turn up, every one pays to the Admiral but if the letter F turn with any of the above letters, it is nice nerved, viz:—

A F All pay 1 to Guard-Ship.

A All pay 1 to Admiral.

F Guard-Ship pays 1 all round the fleet.

A F Admiral pays 1 all round the fleet.

The Admiral must keep all the counters he receives from the fleet s[e]parate from his own; for, should his yacht be wrecked on the Light house rock (81, 82), he has to give them all up to the possessor of the lea[d]ing yacht, who then becomes Admiral, and remains so until the end [o]f the Game, unless he also gets wrecked. Any yacht running aground [o]n the sandbank (91, 92, 93) not only pays half stakes, but goes back [t]o Any yacht getting on the Lighthouse rock (81, 82) must withdraw fro[m] the game, as wrecked. The yacht that first reaches the buoy marked 1[00] gains the pool. All yachts that pass the Lighthouse are to throw b[y] with one die. In reaching the winning buoy, the number thrown must amount exactly to 100.

LITERATURE.

ILLUSTRATED GIFT-BOOKS.

THE SALAMANDRINE. By CHARLES MACKAY, Author of "Egeria," "Legends of the Isles," &c. With Illustrations, drawn by JOHN GILBERT; engraved by the Brothers DALZIEL. Ingram, Cooke, and Co.

The story of the Salamandrine is sweetly told; it abounds with graceful imagery, life-like description of scenery and incident, and true pathos. The Illustrations, from the pencil of Mr. John Gilbert, are alike characterised by variety and beauty, piquancy and artistic grace. The incidents are striking, the accessories have been carefully studied. They are exquisitely engraved upon wood by Messrs. Dalziel; and, what is indispensable to success in this branch of art, the work is most delicately printed: it is very tastefully bound; and, altogether, the Salamandrine is one of the most elegant gift-books of the season.

The argument of the poem is drawn from the Rosicrucian story of the "Count de Gabalis," by the Abbé de Villars. "The Salamanders (as we learn from this authority) are inhabitants of the region of fire; and their wives and daughters, the Salamandrines, are more beautiful than all the other holy creatures of the human form, because they are of a purer element. The beauty of their minds surpasses that of their bodies; but their souls are mortal, and they have no hope of divine felicity in the presence of that Supreme Being whom they know and whom they religiously adore; from their extreme purity, they do not die till after many centuries, and return at last into eternal nothingness. This thought so afflicted the philosophers that they complained to God of the fate of these wretched people; and He revealed to them that as man, by the alliance which he has contracted with God, has been made a participator of the divinity, so the Salamanders, by the alliance which they may contract with man, can be made participators of man's immortality." This idea supplies the main incidents of the poem. It is divided into seven cantos: the Watch-fire; the Soldier's Return; Love Betrayed; Hope and Fear; the Bridal Feast; the Doom; and the Triumph of Love. The illustrations, some fifty in number, are selected with taste and judgment, so as to personify the varieties of action with which the poem abounds. The plan of Illustration is, first, that the master-passion of each canto is portrayed in a title-page: thus, "The Watch-fire" is personified by a line of mounted warriors. The tail-piece to Canto One is a vignette of the battle-field, with a group of the slain, a touching episode of war. The intervening incidents are the gathering of the host on a frosty morning; the sentry and his beacon-fire; the shivering remnant of the host, seated round a fire; the appearance of the Salamandrine to Sir Gilbert, the hero, and captain of the band, in a vision; Sir Gilbert attempting to follow the vision: and the réveillé, a spirited group of richly-costumed trumpeters—such are the pictures of Canto One.

The title-page of the Second Canto is a bright contrast to the opposite tail-piece of the saddening battle-field. "The Soldier's Return" is personified by the sturdy man of war playing with his infant, beside his loving wife: in the head-piece, the wives and children welcome the returning host; next, the peasants' dance, and youths and maidens and elder people beneath the trees; Sir Gilbert thrown from his horse, and found by the maiden in the wood; Porphyr shooting deer; and the maiden pensive by the stream, illustrate Canto Two.

"Love Betrayed" in Porphyr's absence, the cavalier and maiden seated upon a flowery bank, opens the Third Canto; the head-piece, "Mora's lovely stream, in a sweet wild-wood valley;" succeeded by the lover's walk in the woodlands; the lovers outwatching the moon, on the border of the forest; they are surprised by Porphyr, the maiden's mysterious brother; and the maiden watching her lover out of sight.

In the Fourth Canto—Hope and Fear—the maiden awaits her lover by the stream—is the title-page; the head-piece, a festal scene in Minden's domain, to celebrate Sir Gilbert's return from the wars; next is the banquet of 500 in the hall; the maiden at her lattice, watching for her lover; Sir Gilbert wooing another; his sire and mother preparing for the marriage feast; and the procession of peasants, maskers, and cottage-girls, and the bride and bridegroom; and a picturesque tail-piece, completes the illustration of the canto.

The Fifth Canto—the Bridal Feast—has for its title-page a sparkling picture of the peacock borne to the banquet; head-piece, the arrival of the guests "at Minden's lordly hall;" the revel broken by the sudden appearance of Amethyst, the first love, "like Melancholy's self;" Sir Gilbert reproved, in the forest shade; and the faithless one fallen, yet consoled, closes the canto.

The Doom—Canto Six—portrays, in three scenes, Gilbert, "soul-stricken and heart-sore," in the gloomy forest, hooted by men and children, and spurned by his wife; a beldame, with flaming brand, closing the canto

Canto Seven.—The Triumph of Love has, for its title-page, the hero and the witch-like woman drooping over him; in the head-piece he is in her cave by her fire; then, he goes forth to gather branches; next, Sir Gilbert is reading his own epitaph; then he sees from behind a tree the bridal procession of his Rosalina. He now seeks his first love, his guardian spirit in the aged form. "His soul was Amethysta's now;" they are united, but

> Old traditions say
> The maiden perished on her bridal day;
> Slain by excess of rapturous joy, she fell
> Lifeless upon the breast she loved so well.

Such is the closing vignette of the most varied and graceful series of Illustrations it has ever been our pleasure to welcome from Mr. Gilbert's masterly pencil.

THE POETS OF THE WOODS; Twelve Pictures of English Song Birds.—Bosworth, Regent-street.

This sylvan choir numbers the Nightingale, Robin, Chaffinch, Skylark, Bullfinch, Thrush, Linnet, Blackbird, Goldfinch, Cuckoo, Woodpigeon, and Turtle-dove: whose portraits are beautifully printed in colours by Messrs. Hanhart, after water-colour drawings by Joseph Wolf. In several cases, the nest of the birds are also introduced in the circular picture within frames printed in gold, each of different design. The letter-press accompaniment consists of passages selected from our best English poets, vividly describing the characteristics of each bird. Some of the pieces are of great length; as, Keats's beautiful address to the Nightingale; Montgomery's touching lines to the Robin, Shelley's noble lyric to the Skylark, and Smythe's apostrophe to the "sweetest warbler of the skies," Logan's old familiar lines on the Cuckoo, and Mrs. Heman's impassioned address to the same bird; so that here we have poetic excellence combined with pictorial attraction.

THE COURT ALBUM; Twelve Portraits of the Female Aristocracy.—Dogue.

This year's bevy of beauties are Mrs. Wood, the wife of Captain William Mark Wood, of the Coldstream Guards; Viscountess Nevill, the lady of the son and heir of the Earl of Abergavenny; the Hon. Mrs. Fellowes, eldest daughter of Baron Londes, and wife of Edward Fellowes, Esq., of Ramsey Abbey, Herts; the Viscountess Falmouth, Baroness le Despenser, in her own right the lineal female representative of the ancient house of Neville, and thus at the head of the female aristocracy of England; and the Lady Jane St. Maur Stanhope, "representative of the Stanhopes of Elvaston, in whose veins, in common with the noble house of Chesterfield, still runs the royal blood of the Lady Anne Plantagenet, daughter and sole heir of Thomas, Duke of Gloucester, younger son of Edward III." Next upon the royal and noble list, is the Princess of Saxe-Weimar, second daughter of the Duke of Richmond, married to the Prince of Saxe-Weimar Eisenbach, whose family is connected with every noble house in Europe. The remaining portraits are Miss Charlotte Anna Hume, only child of William Wentworth Fitzwilliam Hume, M.P.; Lady Emily Toler, sister of the Earl of Norbury; Lady Cecilia Catherine Lennox, youngest daughter of the Duke of Richmond; Miss Cholmeley, only daughter of Sir Montague John Cholmeley, Bart.; Mrs. Cordelia Boyd, the wife of Captain Walter Boyd; and Miss Baillie, of the ancient family of the Baillies of Dochfour, Inverness. The portraits are the presentments of several styles of female beauty, such as is only to be found among the aristocracy of Great Britain. The drawings are by F. Grant, R.A.; and by John Hayter, C. Durham, and H. Weigall. The memoir-sketches are rich in piquant anecdote and noteworthy points of genealogical history.

THE KEEPSAKE, 1853. Edited by Miss POWER. Bogue.

This "last rose" of the once numerous family of "Annuals" presents a muster-roll of pens whose contributions are altogether of higher attraction than of late years. They include a few graceful *nouvelettes*, recollections of travel, and pleasant anecdote, and some graceful poetry; by Barry Cornwall, Walter Savage Landor, R. Monckton Milnes, Sir Walter Scott, Albert Smith, W. M. Thackeray, Mr. and Mrs. Alaric Watts, &c. It would occupy more space than we can spare to enumerate the pieces, some fifty in number. The twelve illustrations, engraved under the superintendence of Mr. F. A. Heath, include Buckner's portraits of the Duchess of Manche ter, Mrs. Kgiton James, Lady John Manners, and Lady Otway; Solomon's characteristic picture of "Scandal;" two scenes by E. H. Corbould; "Hotspur and Lady Percy," by Lo-d Bury. Altogether, we must congratulate Miss Power upon her editorial success.

BOOKS FOR CHRISTMAS AND THE NEW YEAR.

The tasteful multiplication of Gift-books is one of the most interesting characteristics of our intellectual age. Hence the recurrence of the present festal season is marked by the production of a shoal of volumes, of an instructive and amusing class, in which the higher purpose of moral teaching is not lost sight of for the sake of mere entertainment. Meanwhile the books themselves have been greatly improved by the abundant means which the progress of illustrative art has placed at the hands of their producers; and what are in common parlance termed "Children's Books" are no longer starveling in their embellishments; but the engravings are raised in character as well as increased in number. Time was when Francis Newbery and Benjamin Tabart scattered a few carelessly-coloured plates in a few widely-printed pages, within a gaudy binding, and the "child's book" was complete: or, perchance, the Christmas gift from the St. Paul's churchyard publisher was garnished with a few wood-cuts, ill engraved and worse printed; while still less attention was paid to the fare in which the holiday plums were dropped: but Newbery's successors have greatly improved upon this scant system, although they have not found another Goldsmith among their staff of writers for the smaller growth. Now and then a genial spirit left the infant world of its day a legacy worth preserving; such, for instance, as Mrs. Trimmer's "Tame Robins; or, the History of Flapsy and Pecksy"—a delightful piece of humanity-teaching; but the precious bequest was often in a manner spoiled by re-production, and there was little externally to attract the child to the beautiful lesson of tenderness to animals, which was to be found in its ill-printed pages. This retrospect of the tasteless publication of books for the young might be "profusely illustrated;" but we are content with this well-remembered example, for the sake of pointing attention to the very superior manner in which such works are "got up" in the present day, in comparison with the "juvenile books" of the last generation; and how largely the little folks of the present day have profited by the great spread of wood engraving and improved printing we need not tell; unless it be to say that the sum of holiday pence be contributed in gratitude to raise testimonials to Caxton and Albert Durer, the inventors of the immortal arts of wor d-enlightenment. Neither need we enlarge upon the improved tone of the children's books of the present day, unless it be to remind the reader how admirably has been followed the excellent advice of that master-spirit, Sir Walter Scott, who, delighting to write for tender minds, has thus nobly expressed his opinion on the matter: "I am persuaded," said Sir Walter, "both children and the lower class of readers like books which are written *down* to their capacity, and love those that are composed for their elders and betters. I will make, if possible, a book that a child shall understand, yet a man will feel some temp ation to peruse, should he chance to take it up. * * * * The grand and interesting consists in ideas, not in words"

And now to our glance at what has been produced for the current season. First come the Christmas books, so entitled, commencing with—

Christmas-tide: its History, Festivities, and Carols. By William Sandys, F.S.A. J. R. Smith, Soho-square.—A very pleasing representation of olden Christmas observances, wherein the olden lore has been re-written and moulded into a more attractive form than hitherto. The book is better adapted for the teens than the earlier growth, and a very delightful task has the learned Editor of the Early Popular Antiquaries, the author, accomplished in this volume. Here the characteristic incidents of bygone ages are taken out of their cramped quaintness, and put into pleasantly flowing narrative; and the book is wound up with an excellent collection of carols, some of which date from music; to the illustrations upon wood and stone we cannot award high praise; but, for authority and judicious handling of the subject, this is the best Christmas book of the season; the binding, green, with holly and mistletoe in gold, is beautifully characteristic.

A Holiday-book for Christmas and the New Year (Ingram, Cooke, and Co., Strand) consists of tales and sketches, and poetry, illustrative of the festive seasons; accompanied by a profusion of highly-finished engravings, mostly selected from the ILLUSTRATED LONDON NEWS, and carefully reprinted in a very handsome manner. The majority of these papers are the contributions of writers of celebrity; and the artistic portion is of the same high character. To these reprints have been added some original sketches and music. The title-page is a beautifully characteristic composition, printed in tint; and the decorative binding, worked in colours, is rich and gay.

The Dial of Love: a Christmas Book for the Young, by Mary Howitt, is a little periodical, gathered into a volume; containing "New Stories, suggested by Old Rhymes," "Walks in the Country," "Nut-woods and Sea-sides," a few stories of travel, and Christmas scenes, all narrated in Mrs. Howitt's very attractive manner; with appropriate wood engravings.

*A Leaf of the Christmas Tree** is a little collection of tales, from the German, edited by the Rev F Gilbert White, M.A., and published for the benefit of two children who, by the death of their father (a clergyman in the Irish fever of 1848, were left to the sole care of their widowed mother; who, as an aid towards their maintenance, has published these tales of her own German "Fatherland." They are five in number, are narrated in the true spirit of the season, and are full of pleasant simplicity. To each story there is an illustration.

A Hero Philip's Book, by the author of the "Head of the Family," has for its narrator Uncle Philip, who, on several occasions, tells of Scottish scenes and incidents in a lively, discursive manner, much to the delight of his little family of listeners. There is a novelty of incident and manner in the book, which is welcome. It has four clever illustrative scenes by James Godwin.

Arnold Lee; or, Rich and Poor Children†, by Cousin Kate, is a tale of our times, one of its incidents being from a ragged school set up by "Mother Betty," who imitates John Pounds in her benevolence. The book has an ingenious story-telling framework, and a tone of religious teaching judiciously introduced. There is a frontispiece of Mother Betty's school.

The Unseen Hand; or, Episodes in an Eventful Life‡, by the Rev. Stopford J Bam, M.A., contains, the author assures the reader, "a record of occurrences and events that have really taken place during the last ten years; and, as far as we have examined them, they contain nothing beyond the strangeness of truth. They include some extraordinary scenes from college life, Liverpool, and emigrant ships, and a course of unhealthy excitement, temptation, and trouble, through which the "Unseen Hand"—the unceasing interference of Divine Providence—guides and protects the hero to a happy marriage. One of the author's secondary objects is, by picturing the abuses of university life, to aid in its reformation; the writer observing, incidentally, that of the two universities, Oxford has distinguish themselves in a literary point of view, at Cambridge, the majority are composed of those, who, on entering the university, could not successfully take their place among the ranks of the so-called gentlemen, and whose means may not exceed £120 or £130 per annum; but who, by unwearied perseverance, diligence, and self-denial, elevate themselves to a condition far more really ennobling and great than that of the polished gentleman, who, on £1000 a year, contrives, during his college course, to do nothing but consume tobacco through scented water, and become thoroughly acquainted with Newmarket and *Bell's Life*. This may be pleasanter teaching than by "Blue Books" and the scenes on board an emigrant ship are alike cleverly sketched. We need scarcely add that the book has a religious tone, and its pathos is occasionally impressive.

The Unclaimed Daughter; a Mystery of Our Own Day,§ edited by C. G. H—, is published with the avowed hope "that the facts thus made known might lead to the discovery of the forsaken child's parents or kindred, and thus unravel the secret of her birth." There is an appendix of documents attesting the character of the chief agents in the narrative. "It is almost impossible," says the preface, "with any approach to certainty, to form an idea of what the circumstances were which thus cast a child of a few years old, and apparently of gentle birth and careful nurture, into a position so strangely different from that in which she had been born. The facts of the English soldier's attendance after the murder of the lady who is supposed to have been her mother, the advertisement in the *Times*, and the English officer's apparent scrutiny, seem to give colour to the idea that she may be of Irish connection. Perhaps, stolen from her parents by some unlawful claimant of property to which she was the natural heir, and never called by her name, that she might lose all trace of her origin. Deceived, perhaps, by a resemblance of the house near Nicholas Murphy's cottage, to her half-remembered home; for it appears hardly probable that she should have been kept so near it—the lady from whom, in her desolation, she so piteously yearned, may at last have traced, and been hastening to claim her, when arrested by the murderer's hand—that murderer may be, but not the agent of others." Such is the mystery which is narrated in this volume; embellished, by the way, with a portrait of "the Unclaimed."

HISTORY OF GREECE. By GEORGE GROTE, Esq. 10 Vols. Murray

If the Scottish bard may as proudly boast of his Rob Roy as the "English ballad-singer" of his Robin Hoode, between Germany and England a like competition exists, not, however, in relation to their thieves, but their historians. If Germany has its Niebuhr, England has her Grote—both subtle questioners of the past, reflecting upon it the light of the present for the benefit of the future. In one sense, both are the great apostles of doubt, and proceed sceptically. They tell us what can not be known, and reveal our ignorance rather than add to our knowledge, except negatively; that is, they show that a great deal that has been generally mistaken for knowledge is merely conjecture—or, to use a favourite phrase of Mr. Grote, "guesswork"—and that the boundaries of historical fact imply exceedingly narrow limits, and a very contracted area.

Judging by the practice of modern historians, it would seem that an initial scepticism is now the main qualification for success in historical investigations. Formerly, a credulous accumulation of materials was all that the reader, however learned, required. Now, these materials are sifted: such only as are probable admitted, none conceded as certain. Facts are separated from ideas that, by this rule, even while the latter, as in Euclid, are in themselves apodictical, as the philosophers term it, the former have to be proved by evidence, and partake of the debate which are inseparable from the nature of the proof. To the perception of this difference we are indebted for Niebuhr's "Rome," and the "History of Greece" by our own country man, now before us.

No doubt, scepticism has a legitimate use. It should ask a question for the sake of the answer, and thus lead the way to further information. In the historian's case, the result is, frequently, that no further information is obtainable. Thus, Mr. Grote finds that the early Greek genealogies, with their gods and heroes, are fictitious. History, like the science of law, and other sciences, commences in fiction. The postulates assumed are ideal, and exclusive y matters of faith. Niebuhr and Grote will not admit them into the field of speculative or historical belief. Nevertheless, they have a *practical* effect and influence on the human mind in the shape of poetic legend, or oral tradition, which the historian is not at l berty to ignore. Mr. Grote, who considers these mythical researches in a chronological aspect, to be "fruitless in regard to any trustworthy result, and as diverting attention from the genuine form and really illustrative character of Grecian legend," still esteems the inquiry to have a certain value as illustrative "of the ideas which guided the Greek mind," and as exhibiting "the progress of the bards from Homer to those of Herodotus." The purpose of the historian is subordinate to that of the philosopher. Absolute beginning or origin, Niebuhr confessed, was beyond his reach, the historical conception comprehends nothing beyond development and progress, or, as Mr. Grote expresses it, "change from one set of circumstances to another, operated by some definite continuation of physical or moral laws." The legendary age of the Greeks, he adds, "as the earliest in any way known to us, must be taken as the initial state from whom this series of changes commences."

Mr. Grote's chapters on the "Iliad" and "Odyssey" contain some interesting criticism; particularly in relation to the moral condition of the Homeric age. It was one in which power was held to be goodness, both in gods and men. *Good* and *just*, in relation to both, were "euphuisms arising from submission and fear, being not only not verified, but often pointedly belied, by their particular acts." The ethical meaning of the words hardly appears until the discussions raised by Socrates, and prosecuted by his disciples. The epithets of *good men best men*, habitually applied afterwards to the aristocratical parties, descend from the rustic period of Grecian society. Those words then signified the man of birth, wealth, influence, and daring, whose arm was strong to destroy or to protect, whatever might be the turn of his moral sentiments; while the epithets *evil, bad*, designated the poor, lowly, and weak, from whose dispositions, be they ever so virtuous, society has little either to hope or to fear. With too many, even to the present day, is not the case practically the same?

Personal authority was indeed the source of heroism, and of the submission to it shown by the crowd. Mr. Grote illustrates this position by some graphic remarks on the Homeric Boulê, or Council of Chiefs, and the Agora, or general assembly of freemen. The former was a purely consultative body, with no power over its president or King, in whose determinations it acquiesced. The latter merely received the announcement of the Royal intentions, on which anything might be said, but nothing done, whether in the shape of a vote or otherwise. To sum up, in the heroic Grecian Government is essentially monarchical, reposing on personal feeling and divine right." The chiefs uniformly treated the multitude as Odysseus did Thersites, who was not only sharply rebuked for his political interference, but threatened with being stripped naked, and turned out of the assembly with ignominious blows; as an earnest of which Odysseus administered to him on the spot a smart stroke with the studded sceptre, imprinting its painful mark in a bloody weal across his back. Odysseus had just before treated the people in the same manner, when he found them with their chiefs, retreating to their ships. Hastening among the dispersing crowd, "to the chiefs he addressed flattering words, trying to shame them by gentle expostulation; but the people he visited with harsh reprimand and blows from his sceptre, thus driving them back to their seats in the Agora." Hereupon, Mr. Grote takes occasion justly to remark that "the feeling of personal dignity of which philosophic observers in Greece, Herodotus, Xenophon, Hippocrates, and Aristotle boasted, as distinguishing the free Greek citizen from the slavish Asiatic, was yet unconceived in the time of Homer."

The esthetic merits of the Homeric poems are of secondary importance. Mr. Grote has entered fully into the Wolfian discussion as to the authenticity of the poems. To him it seems clear that the "Odyssey" has a greater degree of unity than the "Iliad," and is the work of one hand; but that the "Iliad" is an enlargement of an "Achilleis," which originally consisted of the first and eighth books, and then from the eleventh to the twenty-second inclusive, to which two more were subsequently added. "The books from the second to the seventh inclusive, together with the tenth, are of a wider and more comprehensive character, and convert the poem from an 'Achilleis' into an 'Iliad.'"

This is the conclusion in which Mr. Grote lands the argument, and there is much in the internal evidence which is strongly in his favour. What appears against him, he thus disposes of—

The primitive frontispiece, inscribed with the anger of Achilles and its direct consequences, yet remains, after it has ceased to be co-extensive with the poem. The parts added, however, are not necessarily inferior in merit to the original poem: so far is this from being the case, that amongst them are contained some of the noblest efforts of the Grecian epic. Nor are they more recent in date than the original; strictly speaking, they must be a bit more recent, but they belong to the same generation and state of society as the primitive "Achilleis."

Both poems (if we accept the historian's hypothesis) were unwritten compositions, and so remained for two centuries. The power of memorising such long pieces must be regarded as a wonderful exercise and productive act in the Greek people mind. The union of the poet and

actor, of the imaginative and the memorial, in one continuous narrative of such extent, is indeed a marvel. If it were pre-arranged by concert between several poets, the wonder is multiplied by the addition of numbers to the same proportion as it is reduced by the division of labour. We have many marvellous minds in their degree, though none to the same extent marvellous, as on the hypothesis of one author. The age, we are told, "was favourable to such fraternisation of poets, of which the gens called Homerida probably exhibited many specimens." The sing-song reminds us of the school of prophets among the Hebrews; but their songs were written; in fact which, we confess, it litates against the supposition of the Homeric poems being originally merely oral. That the "Odyssey" was the work of a single poet, to Mr Grote seems clear; but, he recognises the probability of many having been engaged on the "Iliad:"—

Whatever presumptions (he says) a disjointed structure, several apparent inconsistences of parts, and large excrescences of social matter beyond the opening promise can create, may probably be indulged against the supposition that this poem all proceeds from a single author. There is a difference of opinion upon the subject among the best critics, which is probably not destined to be adjusted, since so much depends partly upon critical feeling, partly upon the general reasonings, in respect to ancient epical unity, with which a man sits down to the study. For the champions of unity, such as Mr Payne Knight, are very ready to strike out numerous and often considerable passages as interpolations, thus meeting the objections raised against unity of authorship on the ground of special inconsistencies. Herrmann and Boeckh, although not going the length of Lachmann in maintaining the original theory of Wolf, agree with the latter in recognising diversity of authors in the poem, to an extent overpassing the limit of what can fairly be called interpolation. Payne Knight and Nitzsch are equally persuaded of the unity. Here then is a decided contradiction among critics, all of whom have minutely studied the poems since the Wolfian question was raised. And it is such critics alone who can be said to constitute authority; for the common reader, who dwells upon the Iliad only long enough to relish their poetical beauty, is struck only by that general sameness of colouring which Wolf himself admits to pervade the poem.

The question seems now to have been examined on every side, and it must therefore be left to adjust itself as it may in individual minds. A critical decision would be an absurdity. The Greek legendary age merits to be understood, because of the light which it throws on the historical; and this, in its turn, serves to interpret the first. There occur, as Mr. Grote admonishes his readers, numerous circumstances in the after political life of the Greeks which cannot be comprehended unless we are first initiated into the course of their legendary associations. Their sentimental attributes, their religious and poetic vein, are as important as their more vigorous and palpable ones—such as their powers of acting, organising, judging, and speculation, by which they were distinguished in their after political relations. It is the fictions that rules, after all, the historical; for, in truth, the ideal is the soul of the Actual.

The Greeks were also naturally affected by their geographical position, climate, and the mountainous nature of their country. That

Position made them at once mountaineers and mariners, thus supplying them with great variety of objects, sensations, and adventures; next, that each petty community, situated apart amidst its own rocks, was sufficiently severed from the rest to possess an individual life and attributes of its own, yet not so far as to subtract it from the sympathies of the remainder; so that an observant Greek, commencing with a knowledge of half-a-dozen, whose language he understood, and whose idiosyncrasies he could appreciate, had access to a larger mass of social and political experience than any other man in so unadvanced an age could personally obtain. The Phœnician, superior to the Greek on ship-board, traversed wider distances, and saw a greater number of strangers, but had not the same means of intimate communion with a multiplicity of fellows in blood and language. His relations, compared to purchase and sale, did not produce that mutuality of action and reaction which pervaded the crowd at a Grecian festival. The scene which here presented itself was a mixture of uniformity and variety, highly stimulating to the observant faculties of a man of genius. Every much in its unlettered authors of the old epic. Such periodical intercommunion, of brethren habitually isolated from each other, was the only means then open of procuring for the bard a diversified range of experience, and a many-coloured audience; and it was by the exact degree in which these two requirements were fulfilled that the perfection and popularity of their early epic poems conduced to the diffusion among the Greek of a common type of language, and thus keeping tog ther the sympathies of the Hellenic world. The historical period assigns the primitive unity. The Olympic victories furnish historical computers with recorded dates; every fifth year the victor-runner's name was inscribed, for a succession of Olympiads. The habit of running, wrestling, boxing, &c., in gymnastic contests, with the body perfectly naked, was common to the Greeks during the whole period of the Pentecmonian fashion in the fourteenth Olympiad. Thucydides and Herodotus remark, that it was not only not practised, but even regarded as unseemly among non-Hellens. Of such customs, says Mr. Grote, a great number cannot be specified, but enough is known to warrant the remark, "there did really exist in spite of local differences, a general Hellenic sentiment and character, which counted among the cementing causes of a union apparently so little assured;" disunion being the political principle of the Grecian States—the members of each city being aliens to every other.

It is convenient in a subject so extensive as the argument of this history, to be enabled to group its several parts. This Mr. Grote has in part felin tonely accomplished. Taking, he says, the period from Cyrus and Peisistratus down to the generation of Alexander (560—300 B.C.), the phenomena of Hellas generally, and her relations, both foreign and internal political, admit of being grouped together in masses, with continued dependence on one or a few governments. Contemporaneous events can be said to constitute a sort of historic Epopee. This merits to be called the first strictly historical period. Even the story of Lykurgus and the Spartan constitution is of a stateless legendary character. Mr. Grote takes a milder view of the Kypselus thing than we did; though he leaves the assassination of the two thousand Helots untouched, on the authority of Thucydides. Of the democratic tendencies of the Grecian states, Mr. Grote rejoices in taking a very different view from Mr Mitford, and in rising superior to Aristotle's opinion. The conception which the Greek formed of an irresponsible Monarch was peculiar. According to Herodotus, he was necessarily "a subverter of the customs of the country; he (adds the historian) violates women; he puts men to death without trial." According to our experience, and in Mr. Grote's opinion, this notion of a King o. ht to be favourably modified. But this could not be the case either with Herodotus or Aristotle.

The theory of a constitutional King, especially as it exists in England, would have appeared to them incredible: to realise it to the mind of a Greek would require a considerable effort. The executive authority is carried on, yet with a will is, in practice, of little or no effect exempt from all responsibility, without making use of the same person—receiving from every one unmeasured demonstrations of homage, which are never refused him except within the bounds of a known law—surrounded with all the paraphernalia of power, yet acting as a passive instrument in the hands of Ministers marked out for his choice by indications which he is not at liberty to resist. The remarkable combination of the fiction of superhuman grandeur and license with the reality of an invisible strait-waistcoat, is what an Englishman has in his mind when he speaks of a constitutional King: the events of our history have brought it to pass in England, amidst an aristocracy the most powerful that the world has yet seen, but which seems to learn whether it can be made to exist elsewhere, or whether the conversion of a single King, at once able, aggressive, and remote, may not suffice to break it up.

The story of Solon, the Athenian legislator, is beautifully told in the third volume of this history; and that of the usurpation of Peisistratus might be cited in illustration of the foregoing remarks. Mr. Grote had previously stated that the theories now prevalent respecting Cromwell and Bonaparte, "who are often blamed because they kept out a legitimate King, but never because they seized an unauthorised power over the people, had no place in the rock of Athenian philosophy." So far from considering success in usurpation as a justification of the attempt, such writers as Herodotus, Thucydides, and Lokrates, "regarded the despot as among the greatest of criminals." His position, however coveted by ambition, is painted in the darkest colours by them—as the foregoing remarks. Aristotle—as "revealing clearly enough those wounds and lacerations of mind, whereby the internal Erinnys avenged the community upon the usurper who trampled them down." Those ancient Radicals seem to the roots of the matter, while they execrated the tyrant, held in honour his assassin. "A virtuous Greek," says Mr. Grote, "would seldom have scrupled to carry his sword concealed in myrtle branches, like Harmodius and Aristogeiton, for the execution of the deed." Peisistratus was compelled to resort to stratagem to create for himself that military power which modern tyrants have found ready made for their use. The world-be usurper appeared one day in the Agora of Athens in his chariot with a pair of mules; he had intentionally wounded both his person and the mules, and in this condition he threw himself upon the compassion and defence of the people, pretending that his political enemies had violently attacked him. He implored the people to grant him a guard, and at the moment when their sympathies were freshly aroused, both in his favour, and against his supposed assassins, Aristo proposed formally to the Ekklesia (the pro-boulcutic Senate, being composed of friends of Peisistratus, had previously authorised the proposition) that a company of fifty clubmen should be assigned as a permanent body-guard for the defence of Peisistratus. Such was the simple elementary form of a process which, in a more complicated style, has recently been acted on the stage of the world, attended with more elaborate deceptions and a larger result. Mr. Grote adds to this narrative that the number of the body-guard was not long confined to fifty, and that, probably, their clubs were soon exchanged for sharper weapons. Peisistratus, moreover, soon found himself strong enough to throw off the mask, and seize the Acropolis. "Such is the moral of all human tales," yet, it would seem as if the past had existed, and its history been written in vain.

Thus far we have held it a sacred duty, in giving a character of this elaborate work, to maintain the spirit in which it is written. This was all the more expedient, since it is impossible for us to discuss fully the extensive matter of ten volumes of historical research. Else should we be happy to enter into the details of the battles of Marathon, Thermopylæ, Artemisium, Salamis, Platea, Mykale, and of innumerable episodes connected with the fortunes of Sparta, Athens, and other states. Among these, the stories of Themistokles and Aristeides are prominent. To which may be added, those of Pausanias, Perikles, Pheidias, Ktesias, Alkibiades, and Socrates. A parallel drawn between the English jury and the Athenian dikastery is full of excellent application; and the argument on the influence of Athenian art and architecture on the public mind is admirably conducted. The antagonism of Corinth to that great and active state is also graphically set forth. Indeed, the whole subject of the Peloponnesian War is treated with the hand of a master. The story of Cyrus and the Ten Thousand Greeks is also abridged from Xenophon, with great skill; that of their retreat is remarkably exciting, interesting, and instructive.

Mr Grote enters at large into a defence of the Greek sophists, showing that the term originally intended nothing derogatory, and that Socrates himself came rightly within the definition of the term. Compared, however, with that of Socrates and Plato, their aim was limited. Their object was to educate and accomplish the orator and professional man; whereas the purpose of these great philosophers was to edify and accoutre the man *proper*, elevating him, at the same time, to a transcendental point of morality, never attained, if attainable, by mortal. Besides and Alexander were the fruits of this purely intellectual method; and their minds were universalised, as it would seem, to lend the character of infinity to their lusts or their ambition. Such, in relation to Alkibiades, was indeed the charge brought by his accusers against Socrates; and, though the issue, question-ed, rests with the recipient of the philosophic element, rather than with the element itself, not without some ground in the actual fact. Mr. Grote, indeed, states that Socrates's philosophy was deficient on the moral side; but this, we are bold to think, arises from misapprehension on his part. He takes the Socratic leading assumption to mean only the half of what it does: the knowledge required includes self knowledge, or wisdom, and, therefore, all those moral affections involved in the human personality. Upon his own ground, however, Mr Grote has argued his case strongly; and the reader will derive much important information by a careful perusal of his elaborate chapters on this "high argument."

The major portion of the last two of these ten volumes breaks up new ground, commencing with the condition of Greece under the Lacedemonian empire—a subject which, with others, will be included and concluded in volumes yet to be published. We must await their appearance before we venture on so copious a theme.

MEMOIRS, JOURNAL, and CORRESPONDENCE of THOMAS MOORE. Edited by the Right Hon. Lord JOHN RUSSELL, M.P. Vols. 1 and 2. Longman and Co.

These memorials of a distinguished poet have been undertaken by a distinguished statesman, in pursuance of a promise made by the latter to the former, and referred to in the will of the deceased bard, in which the task is confided to Lord John Russell of preparing them for publication, as "the most unlikely person for the task, from his rank and family." That will was written in 1828, since which date the testator's children have died; and Mrs. Moore only remains to be benefited by the work before us. Messrs. Longmans have fulfilled the wishes of the poet and his executors by purchasing the papers on that form the basis of it, at a price that, "with the small pension allowed by the Crown, will enable Mrs Moore to enjoy for the remainder of her life the moderate income which had latterly been the extent and limit of the yearly profits of the literary property connected with an autobiography dated 1833, and extending to the poet's twentieth year (1799), with a journal begun in 1818, and concluded in 1847, when his last illness prevented its continuance; and much of his correspondence, particularly with the friends of his youth." The present noble editor has constructed a biography which rests more on them than on his own remarks. Facts and letters are left to speak for themselves, and Lord John has not further interfered with them than in placing them in succession and connection. He has preferred, as he tells us, to present the details of "the daily current" of the poet's life, and the "lesser traits of his character." He professes, indeed, to furnish "profuse details," such as give interest to "the lives of Sir Walter Scott and Madame Genlis." His Lordship also enters into the *rationale* of this—adducing the examples of the "greatest masters of fiction," who "introduce small circumstances and homely remarks, in order to give life and probability to stories which otherwise would strike the imagination as absurd and unconceivable;" and instances "Dante's tailor threading his needle," and "the crowds passing over a well-known bridge." Certainly the descriptions of individuals and places, Defoe's use of trifling circumstances, and Swift's minute measurements in "Gulliver's Travels." In conclusion, Lord John suffers his individual taste to look out, and surprises us of his esteem of these authors, as superior to his opinion, in the respects, to Homer, Virgil, and Shakspeare. Indeed, he states that "Don Quixote," "Robinson Crusoe," and "Gulliver," are "better known to us" than the three poets just named; meaning, we presume, than the heroes of their works. That this is an exaggerated statement need not be pointed out. It may be readily met with the fact that, for once, in the most ordinary literary composition, the names of the specified romantic personages are added to, those of the heroes of the "Iliad" and the "Odyssey," of the "Divine Comedy" and the "Æneid;" proving, as such quotations usually do, that the utmost effect is produced by the most familiar.

Moore's instinct for rhyme was, in his own opinion, prior to his poetic development, which, indeed, according to his own account, only grew out of it; and his feeling for it seems to have been nurtured by his mother. From her, too, he appears to have derived that love for society, which distinguished him in the days of his celebrity; and the old custom to call his voice into play, and to exercise his taste and talent for singing, to enliven her gay tea-parties and suppers. Such was the life to which he was born—and to it the vivacity of his disposition in after days may be fairly attributed. To it he was doubtless attracted for his progress in London life, and the interest which Lord Moira took in his career, soon after his arrival in the metropolis, introducing him to the Prince of Wales, who at once conceived a great liking for the insipient poet. His address to the latter, on the score of his publication of a translation of "Anacreon," which he wished to dedicate to his Royal Highness. Of his introduction to Carlton-house he writes in terms of delight, and describes the fascinating manners of the Prince; who, in his turn, was much pleased with Moore's poetical talents. On both occasions at this time were very small, and he had much difficulty in obtaining a new coat for the interview, for which he had to give an old coat and two guineas.

A very full account of the intended duel with Jeffrey, on account of his criticism in the *Edinburgh Review*, is given by the autobiographer, in which these minute details required by Lord John Russell are "profusely" supplied. They testify to the coo age and *sang froid* of both parties. To both, honour was more than life. Yet it is clear that, at least, Moore was not quite satisfied with the morality of such a contest; for, on the combatants conversing together, and Jeffrey observing, "What a beautiful morning it is!" Moore relates that he answered, with a slight smile, "Yes: a morning made for better purposes;" and shortly afterwards regaled the man he was about to shoot with a merry anecdote. The duel, however, as our readers know, was prevented by the police; and an acquaintance, thus oddly commenced, ultimately ripened into friendship

The letters, too loosely strung together by Lord John Russell, are singularly deficient of exciting materials for quotation. The interiors of Sloppierton and Mayfield cottages are indeed laid open, and the domestic affections in the poet are illustrated by unmistakeable signs; but with that tendency of style which enables us to see any portion as a picture for exhibition. The reader must gather all this, and whatever else may be desiderated, as a sentiment present in innumerable passages and scattered over many segments of correspondence, but not anywhere concentrated, and to be specified in an exemplary instance. The poet's correspondence with his publishers is of a strictly business-like character. He proposes to provide so many verses for so much money, and on such conditions. Even in the most trying affairs of his life—the defalcation of his Bermuda agent, he writes with a matter-of-fact coolness, that precludes any tragic emotion. His diary, indeed, lets us a little more into his inner man; but there is too little of the habit of self-intuition to invest even these entries with any philosophical value. They are discursive and various enough, but not important, nor very brilliant. We never felt more impressed with the want of the reflective power in the writer. Nor is there much of delineation. It was only as an artist or poet that Mr. Moore was descriptive; as a correspondent or journalist, he was negligent in the setting of his thoughts and the collation of his objects. He dealt in small talk, which was not calculated to live beyond the moment of its utterance; and was not at all remarkable for that "discourse of reason," which "looks before and after." All here is fugitive: but our trust is that the volumes in time may be more interesting. The want of colouring in the present is partly due to the absence of those remarks with which it might have been expected that their noble editor would have graced the space between letter and letter, drawing out the spirit of each by recounting to its associations. We cannot but think that too much haste has been shown in the preparation and manipulation of the materials here printed, rather than edited.

LETTERS LEFT at the PASTRYCOOK'S; being the Clandestine Correspondence between Kitty Clover at School and her "Dear, dear, Friend" in Town. Edited by HORACE MAYHEW. Illustrated by Phiz. Ingram, Cooke, and Co.

Here we have the entire collection of the Letters, the commencement of which were given in the ILLUSTRATED LONDON NEWS in October last, a series of piquant exposures of the practices of boarding-schools, and a satire on the system of mis-education so frequently pursued at those establishments. We should be sorry, however, to have it implied that the strictures, intended by the correspondence before us, were applicable to all or even the majority of female seminaries; but there are, doubtless, exceptional cases, in which Mr. Mayhew's censure is eminently needed. In this age of progress, school discipline should improve with the age, and prepare the pupil for the exigencies of a highly-civilised state of society, by a moral cultivation sufficient to resist not only strong but exceedingly subtle temptations. With these preliminary remarks, we proceed to present our readers with a few characteristic extracts.

In the following description of one of her schoolfellows, Kitty Clover wields a graphic pen.

But the girl I dislike most is Susan Carney. Fancy a tall, thin creature, with hair the colour of blotting-paper, and with eyes like an owl's, that cannot look at you, and you have her standing before you. She is the "sneak" of the school, and is always trying to curry favour with us. When we are taking secrets, and turn round, there she is—pretending to look for something, but in reality listening. Or, if a girl has comfortably got one of James's delicious novels inside her sampler, and is reading it with the utmost gusto, there is Carney's cold fish eye sure to be fixed sideways upon her. Peggy says that her eye is so sharp, she's confident that, like a needle's, it would cut thread. We cannot have a bit of fun but Miss Carney is sure to spoil it. We cannot read or write a letter in class without her knowing it. She cannot talk to the maid-of-all-work, or have a comfortable bit of gossip about the filthy dinners and the Lady Principal, without our hearing of the request, before the day is half over, "to step in Mrs. R.'s boudoir," after which you will see the girl coming back with red eyes and burning cheeks.

The strange thing is, no one is sure that it is Carney who tells, though every one is convinced that she does. She manages it so cleverly that she is never found out. We tease her as much as we dare, calling her "policeman," "spy," "hi-her," and everything we can think of; but it takes no effect upon her. She turns a little pale, talks morality in a whining tone, and leaves it to Mrs Rodwell to redress her wrongs.

Another curious thing is the way in which she wheedles a secret out of you. Though on your guard, she flatters and fawns, and coaxes and leaves, till you have parted with your secret long before you are aware of it. You would imagine she was endeavouring, so cleverly does she extract it, without the smallest consciousness on your part. You'll see she crawls over you, Meg; and as for talking, it is my firm belief she would talk a letter out of a letter box. She is undeniably neat and clean, with not a single hair out of bounds, and, somehow, her dress, like her crosses de Jesuite, nor her shoes creak, as other persons do. She is down upon you, like a shower at the horticultural fête, before you have time to run for it. What with her crawling, and her sleek appearance, and her gliding so noiselessly about the room, she looks like a big lizard, or a no slippery serpent, that was advancing towards you; and I always feel inclined to scream, or to put up my parasol, when she comes near me, to frighten her away.

Nor is she much a favourite with the remainder of the school. The little girls bribe her with oranges and cakes, and lend her small sums of money, to prevent her telling. But the big girls know it's no use, and waste nothing upon her: they know well enough she will take the bribe one minute, and go and tell the next. The governesses even are afraid of her, and begin talking of the weather whenever she approaches.

But what shocks me the most, Nelly, is that she is righteous. She moans and groans, and turns up the whites (or the yellows, rather) of her eyes, and is so pious at church, and is always preaching against "the shameful wickedness of the school. Then she reads hymns, and is embroidering a *prie dieu* for her godpapa, who is something in the Church, and exceedingly rich, and she writes such pitifully long sermons, twice the length of anybody else's, and after service she begs to see Mrs. Rodwell, *pour confier son cœur*, as she calls it, but we all know what that means, for, as sure as plum-pudding on Sundays, she is sure to be punished that same afternoon. I only wish we could find her out in anything. I really believe the entire school would rush up to the Lady Principal, and tell of her. But Miss Carney is far too cautious to be caught tripping: they tell me she even sleeps with her eyes open.

His portrait is decidedly clever—a literal likeness, skilfully avoiding caricature. The following is in a more gracious spirit, and true to nature:—

But, Nelly, you would quite love little Jessie Joy; she is the week's little thing you ever saw. You might knock her down with a *feather*. You would declare that she was not more than ten, and yet she was sixteen last birthday. She has a rosy round face, and little flaxen curls, exactly like a pretty doll, if you could only keep her quiet for a moment to look at her. She plays about the room like the sun on a looking-glass, and her whole body seems to quiver with light. I defy you to catch her, unless, perhaps, it was in the dark. We call her "pet" and "fairy."

I don't know how it is, Jessie cannot be right; and yet she is far from being an idiot, for the little thing understands; nor is she stupid, for she is quick enough at learning us all. Still, she never seems to be at her books or her sewing. Her eyes (I don't know what colour they are) fly away like butterflies directly you attempt to catch them, and settle on all places but on her book. We think she can read, but no one is ever sure. If told to learn, she pouts her lips like cherries, until you feel inclined to bite them; and her little head swings to and fro, Nelly, like the birds on a mantle, when set a-dancing by the wind. The Lady Principal cannot scold her. The utmost she can do is to call her to her as an angry one, when she takes up her little head in her two hands as if it were a bowl of milk, and kisses her gently on the forehead. This is all her punishment; and the tits are culprits back into her places as quick as a rabbit.

But if she can't read, or spell, or learn, you should only hear her sing, Nell! It is like a wild bird. She warbles every air she hears. Music seems to gush from her, but no one knows from whence it flows. Some say it is a fountain, others say it sounded like the rejoicing of good spirits; but she cried when they wanted her to do it again, and has never touched the instrument since. She dances more like a fairy than a human being. And yet when Monsieur Vaudon (the French dancing-master) attempted to teach her the polka, she ran away and hid herself behind the great globe in the music-room. The truth is, her dancing has neither time nor step-room in it. She flits about so restlessly, it makes your eyes wink to look at her. Her feet never seem happy on the ground, and I always have a curious fear when the window is opened that Jessie will fly out of it.

The girls are rather frightened at her restless ways and her strange beauty, which seems to belong more to the air than to the earth. They declare that she is a fairy changeling; and that the tale which is told of her father being shot in a duel, and of her mother dying when Jessie was born, is all a story. Jessie rare y goes home. The only person who comes to see her is an aged aunt, with a face all over lines like a railway map. She brings her plenty of toys and plenty of sweeties; but Jessie, apparently, does not care the least about her. The only person her flighty disposition stops in its giddy career to alight upon is Amy Darling. She listens to no one else with so much patience. She will play with her for hours, exactly as a young kitten (but be sure no one tells Jessie we said so). But then I believe if Amy spoke to the lightning, it, at the word stop it.

As might have been expected, the misery of being a professional governess to Lesh is dwelt on—

She hasn't a moment to herself. She is the first to rise, and the last to go to bed. She hasn't even the privacy of a bed-room to herself, for she is obliged to keep in the same room as Lesh girl, and look after them. The only privacy she knows is when she creeps into bed and draws the curtains round her. Our pay-hours are no play-hours to her; rather on the contrary, for then her torments really begin, and only end when the last train again for Essex. She is the terror of all her scholars' smallest movements, that it is perfectly clear from them all her words and smallest movements, that it is perfectly clear Hope never whispers into her ear any of those soft motherly words which soothe the agony of one's heart, and lull it quiet y off to sleep.

She may justly be called our "mistress of all work," She does a little of everything; she helps the smallest girls to dress; takes the junior pupils; hears the reading; sees to the wardrobes; gives out the linen; teaches needlework; and superintends the Saturday night's cleaning. In short, she is expected, as they say of servants, "to make herself generally useful;" which means, in our instance, that she is worked to death by everybody, and spared by nobody; because, that she is worked to death by everybody, and spared by nobody; because, that she is worked to death by everybody, and spared by nobody; because

NEW SONG—WELLINGTON. By PAULIN HUGOT, FEARCE, Baths, Ramsgate, Author of the "Waterloo Price 2s. Post free.
See the Duke of Wellington heads admire
Of Wellington the great!
With eyes fix'd on the field, he viewed
Blue, Minie, or Tipoo's ante,
How the Guards with a shout in every field
Of Portugal and Spain,
That victory is mine, I ween he revealed
His movements on the plain.

How valiant from the Portuguese,
The rights of man restore;
Drove Joseph with his sword,
And Soult with all his power
Amidst the turmoil's sad,
His skill never fails, the plants grew—
Sad was Napoleon's gaze.

March on! advanced sons, conquer France,
Said Wellington to his band
Behold the chance of sword and lance,
Fresh Paris's our prize.
The French Guard, fled o'er heaps of dead,
And cried that all was lost;
Cries shot and shell, and balls no bind,
And dear the victory cost.

Glory chase round, and Britons crown'd
At sunset on a rosy light
Shrill bugles sound, and Prussians frown'd
And quickly ran for flight
Nia's now by Queen illumed the scene
With her sun-rays of peace,
And Brother Jonathan rejoice,
Vowed Paris walls to raze.

Bet on the turf, with lively mirth,
Diamond and Newry Pearl,
Make not the Parish purpose dear we wish—
The Duke again to rise!
Now Wellington his Fame has sung,
Through age the warrior dies;
His work is done, and like the sun,
He sets again to rise!
W HOGHILL, 15, Paternoster-row.

MR. CRIVELLI begs to acquaint his Friends and the Public that a Third Edition of the ART of SINGING, as urged and newly arranged in the form of a Grammatical System of Rules for the attainment of the Vocal Organ, is now ready, price 21. PIANOFORTES TUNED. F. W. ANDERTON, has long been engaged by the Nobility, Gentry, and Public generally to merit the attention of the nobility, gentry, and public to his Establishment, 294, Regent-street, opposite the Polytechnic Institution. Pianofortes will receive a regular monthly visit by the year the increase is made upon an amount than on any previous occasion—A considerable proof of the estimation in which the Society is held by the public

The following table exhibits the amount of new business in each year since the establishment of the Society

YEAR	New Policies issued.	Sums Assured by New Policies.	Annual Premiums on New Policies
		£ s. d.	£ s. d.
1843	128	55 545 8 0	1 992 11 7
1845	268	87 800 16 11	2 976 16 6
1844	157	80,4,2 8 6	4 1 2 0 4 3
1845	263	110 644 11 0	3 763 17 6
1846	197	83 203 4 5	4,585 8 5
1847	2,5	113,6 9 4 5	4,232 3 9
1848	172	124 4 8 17 9	4 285 0 8
1849	172	124 4 8 17 9	4 285 0 8
1850	269	113,469 16 11	3 163 15 7
1851	1,0	1,0,1,1,0	3 1,2 7
1852	278	3 1 3 0 8 4	15,483 17 10
Total	4155	1,887 853 16 5	73 459 16 6

It will thus be seen, that during the past year the number of Policies in and has been 278

The amount of Assurances effected, £261,206 8s 1.

And by the Annual Premiums to the extent of £15,489 17s 10d

The Directors of the Society have much pleasure in announcing their data than by previous the same courses of management that has been exercised every favourable result.

At the same time that the business has been largely increased the mortality has not exceeded the calculation, and when it is borne in mind that the mortality of the last two years was so favourable, that it is not to be expected that could hardly have be surpassed.

The Directors are happy to state that the investments of the Society's funds have yielded a very large annual income.

The Annual Report of the Society will be ready for delivery at the Branch of the business continues to afford ample satisfaction to those who have effected policies with the Society.

It may be interesting to the Meeting to be informed that the Actuary has at present in hand a valuation of the Society's assets and liabilities, in which the Actuary is engaged in making a complete analysis of the Society's experience, in the instances of different ages of assurance, and the duration of time during which the policies have been in force.

The Actuary is in communication with the Board of Settlers as to investigation in the Society's affairs will be proceeded with as soon as the Actuary's report to determine the present value of the Society's assets and liabilities, and the future prospects of the Society, as indicated by the policy sheets the last division of profits will be made in the month of January next year and the Directors would therefore beg to call the attention of the assured to the necessity of paying the premiums on their policies, as every Policy effected prior to the 25th of June, 1853, will be entitled to a share in the profits at the division to be made in January next.

The Directors retiring by rotation are Major Henry Dowdeswell and Benjamin Smith, Esq., and the Auditors Messrs Cooper and Benjamin Smith, Esq., and the Auditors Messrs Cooper and Wm. Cash, Esq., all of whom, being eligible, offer themselves for re-election

The Directors and Auditors retiring from office having been duly proposed and seconded, a poll was demanded, and the business of the Meeting terminated by the usual vote of thanks being given.

Prospectuses, containing very full tables of rates, forms of proposal, and every other information, will be forwarded postage free on application to any of the Society's agents, or to the Secretary, at the Chief Office, 25, Fall-mall.
F. G. P. NELSON, Actuary
C. DOUGLAS SINCLAIR, Secretary.
